Sir Isaac Newton is struck by another great idea!

IT'S WHAT'S UP FRONT THAT COUNTS

As sure as little apples, Newton knew that what grows up must come down.

But when it comes down to a really pleasurable, clinical sight to see, it's what goes on front of the filter, that is. That makes the difference.

And there's where Winston had an inspired idea. Filter. Filter! Winston specially selected, special, subtle ones, their specially processed leaves for their smoking. The new, Filter! Blend specially made, an entirely different kind.

That's what makes Winston a real filter cigarette.

"You don't have to be big on the head to know that Winston tastes good like a cigarette should!"
