S.U. Club News
by Alice Glibertin, Bonnie Roeland and Kathy McIntosh
CHEERS
This is the latest issue of "S.U. Club News" and is aimed at providing a comprehensive and timely information. The club members are encouraged to participate actively in the events and activities described. The club has a vibrant and diverse membership, and the news section is designed to highlight their achievements and contributions. The club also encourages members to share their experiences and ideas, fostering a sense of community and belonging. This issue features an article on the challenges faced by small businesses during the pandemic, highlighting the importance of support and resilience. The club also celebrates its annual picnic, which is a popular event among members. The members are invited to participate in the planning and coordination of future events. The club has a calendar of events throughout the year, and members are encouraged to check the website for updates. The club also encourages members to reach out to the club officers for any questions or concerns. The club is open to new members, and interested individuals are encouraged to join. The club offers a range of activities, from community service projects to social events, providing a diverse and engaging experience for all members. The club's mission is to promote a sense of community and support among its members, and it is committed to creating a welcoming and inclusive environment for all. The club also recognizes the importance of diversity and inclusion, and it encourages members to celebrate and appreciate different cultures and perspectives. The club is proud of its accomplishments and looks forward to continued success in the future.

The Case for the Development Program

The Case for the Development Program

The building school was once
the site of a New York State
school for the deaf, which
now belongs to the New York
State Education Department
in the same city. The
building school was
constructed in 1920 and
was vacated in 1965.

For the past several years,
the building has been
occupied by the
Suffolk County
Department of
Correctional Services.

The building school is
located on a 3.5 acre
site in the village of
Suffolk County. The
building is a three-story
building, with a
capacity of 240 students.
The building contains
classrooms, a
library, a
dining hall, and
administrative offices.

The building school was
designed to accommodate
the needs of deaf students
and provide educational
opportunities for them.

Keeping Pace With the New Boston

The Fundraising Effort

Fund raising for the New Boston is being conducted by the Suffolk University Board of Trustees and the Suffolk University Development Office. The campaign has two major objectives:

1. To provide the financial resources needed to construct a new building.
2. To increase the endowment of the University.

The Board of Trustees has established a master plan for the new building which includes:

- A state-of-the-art library
- A new student center
- Additional classrooms
- A new administrative building

The campaign is led by the President of Suffolk University, Dr. John F. Hynes, and the Suffolk University Development Office.

The Building Program

The new building will be erected on land which has been purchased from the city of Boston. The building will house the following departments:

- Business Administration
- Economics
- Accounting
- Marketing

The building will be designed to meet the needs of the students and faculty of the University.

For the Future

The new building will provide a modern and efficient learning environment for the students of Suffolk University. It will also serve as a model for the future development of the city of Boston.

The challenge is to raise the funds necessary to construct the new building. If you would like to contribute to this important cause, please contact the Development Office at 617-576-2222. Your support is greatly appreciated.

Suffolk Picnic

Fiction by William Hope. Presented at Suffolk University as part of the Shakespeare Festival, this is a modern adaptation of "Hamlet." The play opens with a scene in the park, where the audience is introduced to the main characters.

The setting is modern, and the language has been updated to fit the contemporary world. The play explores themes of love, loyalty, and the nature of good and evil.

Nocturnal Nature

Fiction by Ed Flaherty.

The linwood grill

The linwood grill is a cozy and inviting restaurant located in the heart of the city. With its warm and welcoming atmosphere, it offers a wide variety of dishes and drinks to suit every taste.

The menu features classic American cuisine with a modern twist, as well as a selection of international dishes. The restaurant is known for its fresh ingredients and attention to detail.

The linwood grill is open seven days a week, serving breakfast, lunch, and dinner. Whether you're looking for a quick bite or a more formal meal, the linwood grill has something for everyone.
Biology and Chemistry Utilize National Science Foundation Grant

The Biology Department is proud to report the training of additional students and the acquisition of new equipment and instrumentation. The number of enrolled students has increased, and we are able to offer more courses in the department. The Biology Department has also received a grant from the National Science Foundation to purchase new equipment and to develop new courses.

A TIME FOR MIND

By Neoro Kaoizeh Ohke

When Terrance was a young child, he still put the letters on the wrong side of the envelopes. The only way he could tell which side was up was by the way the letters were printed on the envelopes. As he grew older, he learned that the envelope was used to carry the information that was contained inside. Then he learned that the envelope was used to protect the information from being stolen.

WHITE AT NITE
by William White

Now this was good news! At the last "take home" meeting of the month at the bowling alley, it was decided to have bowling again. This time we had to meet at 6:00 p.m. instead of 7:00 p.m. as before, and we could have another pitcher game. We were all looking forward to it. The first game was won by the blue team, and the blue team was the winner of the second game. The scores were: Blue 7, Red 4. A third game was played, but the red team won this one, 7-6. The blue team had a good game, but they were not able to hold their lead in the last game. The blue team was down 1-0 after the first inning, and they were able to tie the game 1-1 in the second inning. The red team scored 3 runs in the third inning, and they held on to win the game 4-1.

"what can my job be at IBM?"

Especially when you can sit at the most computers you can.

As a IBM Data Processing Systems Engineer you would be responsible for managing and maintaining all aspects of computer systems, including installation, configuration, and maintenance. You would work closely with other engineers and technical support staff to ensure the smooth operation of all systems. You would be responsible for troubleshooting and resolving technical issues, and would be expected to have excellent problem-solving skills. You would also be responsible for training and mentoring new employees, as well as providing technical support to customers.

THE SUFFOLK JOURNAL
is still accepting
Short Stories and Poetry
which will be published
in future issues.

Interviews March 24
If you cannot attend the interviews, write or visit the nearest IBM office.
