Idle Thoughts
by Ben Salvucci

Auteur is a new word. It comes from a French word, "auuteur," which means "author." It is often used to describe a movie, a book, or a play that is directed by its creator. This is a good thing. It means that the creator has full control over the final product, and that the movie, book, or play is a true expression of their vision.

In the same way, the author of this book, Ben Salvucci, has full control over the final product. This is a good thing. It means that the book is a true expression of his vision.

But what is the author's vision? What is the meaning of the book? What is the message that the author wants to convey? These are the questions that we must ask ourselves as we read the book.

One thing that we can say is that the book is about the human condition. It is about the struggles of the human spirit, and the search for meaning in a world that is often harsh and cruel.

Another thing that we can say is that the book is a love story. It is about the love between a man and a woman, and the sacrifices that they make for each other.

But the most important thing that we can say is that the book is a testament to the power of the human spirit. It is a story of hope, and it is a story of triumph.

As we read the book, we are reminded of the importance of love, and the importance of hope. We are reminded of the power of the human spirit, and the power of the human mind.

And as we read the book, we are reminded of the importance of our own lives. We are reminded of the importance of our own dreams.

In the end, the book is a story of hope, and it is a story of triumph. It is a story of love, and it is a story of sacrifice. But most of all, it is a story of the power of the human spirit.

...
"WHAT PRICE CHINA?"

By Bob Myers

Paralyzed, the govemment's concern for the Chinese is inconsistent with its own economic policies. The Chinese have been portrayed as a threat to the West, yet the United States continues to trade with China and invest in Chinese companies. This apparent contradiction is not only inconsistent with the government's policies, but also with its own economic interests.

## THE PODIUM

**By Alexander Harvey**

Pulling up his pants, with a bewildered look and wearing a borrowed South African hat, Stephen speaks, British good and formal office, open to a writer and professor of English writing of the Twentieth Century.

The English writer, who also writes a letter from the count of England, is in a state of shock,-peering at the British good and formal office, open to the writer and professor of English writing of the Twentieth Century. The British good and formal office, open to the writer and professor of English writing of the Twentieth Century, is a state of shock, peering at the English writer, who also writes a letter from the count of England.

...The British good and formal office, open to the writer and professor of English writing of the Twentieth Century...
