ADF-181 Ideas of Western Art I

Credits:
4.00

Description:
This course will survey the major concepts and issues of Western Art, from prehistoric to the Early Renaissance. Architecture, sculpture and paintings will be studied individually for their formal elements and visual importance, and also within their own aesthetic, historic and cultural context. Class discussion and visual analysis of works of art will encourage personal interpretation and critical thinking.

Term:
Offered Fall Term

Type:
Humanities & History, Humanities Literature Requirement

ADF-182 Ideas of Western Art II

Credits:
Description:
This course will survey the major concepts and issues of Western Art, from Renaissance to contemporary art. Architecture, sculpture and paintings will be studied individually for their formal elements and visual importance, and also within their own aesthetic, historic and cultural context. Class discussion and visual analysis of works of art will encourage personal interpretation and critical thinking.

Term:
Offered Spring Term

Type:
Humanities & History, Humanities Literature Requirement

• ADF-S101 Foundation Drawing I

Credits:
3.00

Description:
This course concentrates on the traditional techniques of observational drawing. Fundamental principles and elements of drawing are introduced in structured lessons and exercises, which are supplemented by additional outside assignments. Foundation Drawing I stresses the development of visual skills as well as the broad use of drawing concepts, vocabulary, techniques and variety of materials.

Term:
Offered Both Fall and Spring

• ADF-S102 Foundation Drawing II

Prerequisites:
ADF S101

Credits:
3.00
This course will refine the basic visual skills developed in Foundation Drawing I (ADF S101). The elements of color and mixed media are introduced to expand technical possibilities, while more intensive work with the human figure provides exposure to gesture, structure and complex form. As students begin to develop a more sophisticated and personal approach, issues of expression and interpretation will be investigated, focusing on personal style and expression.

Term:
Offered Both Fall and Spring

- **ADF-S123 Painting**

  Prerequisites:
  ADF S101, ADF S166

  Credits:
  3.00

  Description:
  In this introductory course, students will learn to accurately perceive relationships of shape, form, color and value, and to translate that information through the medium of paint. In a series of in-class and outside projects on canvas, prepared paper and panel, students will explore various approaches to the use of acrylic and oil paint. Emphasis will be placed on the development of disciplined technical skills as well as the exploration of painting's potential as a medium of communication and creative visual expression.

  Term:
  Offered Spring Term

- **ADF-S143 Color**

  Prerequisites:
  Intended for majors only

  Credits:
  3.00
This course features a hands-on approach to the study of color as students create, modify and compare hues, values and strengths through the direct mixing and application of paint. Also explored will be issues of color harmony, chromatic light, space, color assimilation, and color psychology, as well as past and present views on the use of color in art and design. This intensive focus on the specific issues of color gives students experience with and flexibility in the use of color in their work.

Term:
Offered Both Fall and Spring

- **ADF-S151 2-Dimensional Design**
  
  Credits:
  
  3.00
  
  Description:
  
  The focus of this course is the fundamental logic and structure of two-dimensional organization. Emphasis will be placed on the essential elements of visual language: line, shape, value and texture. Students will learn to develop dynamic approaches to visual problem solving by combining these elements into a unified whole. Skills will include technical proficiency in a variety of wet and dry media, appropriate presentation of work, and the ability to discuss work critically.
  
  Term:
  
  Offered Both Fall and Spring

- **ADF-S152 3-Dimensional Design**
  
  Prerequisites:
  
  ADF S151, ADF S551, ADF S166, or ADF S566
  
  Credits:
  
  3.00
  
  Description:
This course focuses on the fundamental elements of three-dimensional form. Line, plane and volume will be explored as students develop visual analysis and critical thinking skills in the round. The role of scale, proportion, structure, surface, light and display will be addressed, as students create forms that activate space and engage the viewer. The course will proceed from work with simple forms and techniques to more challenging and comprehensive problems addressing both additive and subtractive methods.

Term:
Offered Both Fall and Spring

• ADF-S154 Design: Issues & Process

  Prerequisites:
  ADF S151

  Credits:
  3.00

  Description:
  This course involves comprehensive design projects which concern more advanced visual issues, executed in a wide variety of media. Decision-making in the creative process and the development of strong design concepts will be emphasized. Areas of study will include: an investigation of the real world concerns of fine artists and designers, non-Western imagery and culture, and visual social engagement.

  Term:
  Offered Spring Term

• ADF-S156 Imaging

  Prerequisites:
  ADF S166

  Credits:
  3.00

  Description:
Digital visual image generation and modification, especially when combined with traditional hand techniques, are essential skills for artists and designers of the 21st century. This course introduces techniques of image capture, manipulation and output. Weekly and longer-length assignments will address creative and innovative idea generation using these approaches.

**Term:**

Offered Both Fall and Spring

- **ADF-S166 2D/Color**
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This is an introductory-level course in the basic concepts and practices of two-dimensional design and color theory. The study of color and design is supportive of all studio disciplines and is vital to the understanding of all visual media. This course features an intensive, hands-on approach to color and design as students create, modify and master the three dimensions of color (hue, value, and strength) plus the principles of design (line, shape, value, composition and image). This in-depth study is essential and underlies all of the visual arts as they are practiced today. An understanding of color and design influences all artists’ decisions, affecting the look, meaning and use of visual phenomena.

- **ADF-S171 Integrated Studio 1**
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

- **ADF-S172 Integrated Studio 2**
  
  **Prerequisites:**
  
  ADF S101
This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media—including video/sound capture and editing—as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.

**ADF-S571 Integrated Studio 1**

Credits:

3.00

Description:

This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

**ADFA-304 Art and Architecture of the Italian Renaissance**

Prerequisites:

ADF-182 and the Fine Art Program Director's consent.

Credits:

4.00

Description:

This course introduces the students to Italian Renaissance art, artists and culture from the first evidence in the Italian Gothic (around the 1260's) to the Early and High Renaissance, predominantly in Florence and Venice, up to the 1600's. The course will survey the history of painting, sculpture and architecture as we study the works individually, for their formal elements and visual importance, but also within their aesthetic, historic, political and cultural context. Class discussion and a visual analysis of works of art will encourage personal interpretation and critical thinking. A list of terms related to the Renaissances introduces the language of art. Normally offered during the summer. Offered in Italy only.
- **ADFA-306 Art & Culture of Asia, Africa, South America and Oceania**

  **Credits:**
  4.00

  **Description:**
  The coursework introduces students to the artistic and visual traditions from South and East Asia, Africa, Oceania and the Americas. In addition to the material culture of the particular region under study, the coursework will consider socio-political ideals, religious belief systems, and cultural principles that 'shaped' or informed the work and the ideology of civilizations beyond the Western hemisphere. Comparative analysis among non-western and western traditions will be used to critically analyze the salient points of influence, rejection and modifications of aesthetic affinities. Class lectures will be supplemented with museum seminars specifically the rich non-western collections at the MFA, Boston. Guided field trips to the museum will allow students to formally analyze the works of art discussed in lecture and text material.

  **Term:**
  Occasional

  **Type:**
  Cultural Diversity Opt B, Cultural Diversity BFA, Asian Studies, Humanities & History, Expanded Classroom Requirement

- **ADFA-345 Art of India**

  **Credits:**
  4.00

  **Description:**
  A chronological survey of South Asian art (2300 BCE - 1750 CE) including India, Pakistan, Bangladesh, and Nepal. Examination of art and architecture from their first and still mysterious beginnings in the Indus Valley, through the great masterpieces of Buddhist and Hindu art to the coming of Islam, including the eclectic culture of the Mughal courts and the golden age of miniature paintings. Consideration is given to the multiple aspects of patronage in Indian culture - religious, political, economic - through case studies of individual works of art and architecture. (Formerly HUM 345)
• ADFA-400 Fine Arts Internship

Prerequisites:
Restricted to Juniors and Seniors

Credits:
3.00- 6.00

Description:
An elective course for those who wish to pursue issues of artistic development to a further degree, this internship may involve assisting an established member of the local art community (in his or her own studio) in the preparation, marketing and exhibition of his work. Internships in area galleries or museums are also an option. The purpose of the internship will be to give students experience in real world aspects of the artistic life for which he or she has so far prepared only in the classroom setting. Participating students will earn credit based on the number of hours devoted to the internship. One credit will be given for every 45 hours of internship time, and all hours must be verified in writing for credit given.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

• ADFA-500 Fine Arts Directed Study

Prerequisites:
consent of Program director required

Credits:
1.00- 6.00

Description:
The student completes a directed study project, either studio (ADFA S500) or non-studio (ADFA 500) under the supervision of a fine arts full-time faculty member. Please see Directed Study elsewhere in this catalog for details. Independent study forms are available from the Office of the Academic Dean and Registrar. All independent study request forms must be accompanied by a written proposal and must be approved by the individual faculty member, the Fine Arts Program Director, the NESADSU Chairman, and the Academic Dean. Normally available every semester.

- **ADFA-S201 Drawing: Language of Light**

  **Prerequisites:**
  
  ADF S102

  **Credits:**
  
  3.00

  **Description:**
  
  This course is an extensive exploration of the human form and how it is represented in drawing. Refining their drawing skills, students use a variety of dry media (graphite, charcoal, pastel, collage) to articulate figure/plane

  **Term:**
  
  Offered Fall Term

- **ADFA-S204 Sculptural Thinking**

  **Prerequisites:**
  
  Take ADF-S152

  **Credits:**
  
  3.00

  **Description:**
  
  Art is not just visual. Artists also think with their hands", understanding that engagement with the physical world is vital to the creative process, and often gives rise to unexpected and fruitful ideas. In this course, students will explore traditional and experimental sculptural processes in a spirit of directed play", focusing on both intuitive and critical responses to materials.
- **ADFA-S212 Figure Painting: Issues in Contemporary Realism**
  
  **Prerequisites:**
  Fine Art Program Director Approval needed
  
  **Credits:**
  3.00
  
  **Description:**
  This course functions as a lab for students to improve their painting skills. Working directly from the models, beginning and more advanced students will explore technique at their own level. Tri-weekly poses will allow in-depth investigation and complex images to develop. Students can work with the painting medium of their choice. Historical and contemporary painters will be used to further the students progress. Open to majors and non-majors.
  
  **Term:**
  Occasional

- **ADFA-S220 Drawing: Shifting Scales**
  
  **Prerequisites:**
  ADF-S102 or ADF-S502; ADF-S151 or ADF-S551;
  
  **Credits:**
  3.00
  
  **Description:**
  We live in a world of great contrasts in scale, where hand held screens can download Google earth and nanotechnologies can change the lives on entire continents. How do these shifts in scale alter our perceptions of space, and therefore change the way we understand and make drawings? This figure-based course uses descriptive observation as the starting point for addressing visual invention. Students will work from a model, using traditional figurative techniques to combine and contrast with digital imaging techniques, graphic novels, and various contemporary drawing approaches. A variety of wet and dry drawing media will be used with more experimental materials.
  
  **Term:**
  Offered Spring Term
• ADFA-S241 Advanced Painting

Prerequisites:
ADF S123.

Credits:
3.00

Description:

This course will involve the concepts and techniques of 20th and 21st century painting. Students develop an individual approach to non-objective and objective painted space. Open-ended assignments, lectures, critiques and discussions will clarify the work students produce. Substantial independent studio time allows students to focus on work that responds to contemporary issues in painting.

Term:
Offered Spring Term

• ADFA-S242 Sculpture Studio

Prerequisites:
ADF S152

Credits:
3.00

Description:

A focused study on the language of dimensionality in sculpture, students will explore traditional and non-traditional materials. Issues of craft, concept and context will aid students in developing work that responds to currents in contemporary sculpture. This class will also provide students with a substantial grounding in 20th and 21st century sculptural theory and practice.

Term:
Offered Spring Term

• ADFA-S251 Printmaking Studio
Prerequisites:
ADF S102

Credits:
3.00

Description:
This course is designed to familiarize students with the printmaking studio and various techniques. Students will gain exposure to a number of techniques including non-toxic processes. Over the course of the semester, students will be expected to develop a portfolio of prints while working in class and independently. Open to NESADSU majors only.

Term:
Offered Fall Term

- ADFA-S271 Fine Arts Seminar I

Prerequisites:
ADF S102, ADF S123, and ADF S152

Credits:
3.00

Description:
Fine Arts Seminar is designed as a vehicle for students to develop a personal relationship to contemporary art theory and practice. Questions are posed as a point of departure for the students to generate work. Visiting artists and weekly gallery and museum visits aid in examining aspects of current art making in order to assist students in creating a strong vision for their work. Restricted to Fine Arts Majors only.

Term:
Offered Fall Term

- ADFA-S272 Fine Arts Seminar I

Prerequisites:
ADFA S271
Credits:
3.00

Description:
A continuation of the first semester, this course aids students in recognizing the patterns and questions posed in their own studio practices. A large number of technical approaches to content will be explored.

Term:
Offered Spring Term

- ADFA-S311 Contemporary Trends & Practices

Prerequisites:
Intended for Majors only

Credits:
3.00

Description:
Contemporary Trends & Practices moves art theory into the studio and the studio out into the world. Students will look at the most significant artists and movements of the past 50 years while examining their social, cultural and political context. Canonized contemporary art categories (postmodernism, appropriation, anti-art and performance art are some examples) are assigned as group projects. Movements, strategy or style of art making is discussed as an expressive problem solving experience, blurring the lines between media. This course conflates contemporary art history with contemporary art practices.

Term:
Offered Fall Term

- ADFA-S330 Experimental Drawing & Painting

Prerequisites:
Take ADF-S123; or Instructor's Permission.

Credits:
3.00

Description:
This course is designed to provide a workshop style environment for students to achieve an increasingly sophisticated level of mastery. Students are encouraged to develop their own area of interest in painting and drawing. In class models will be available to those who want to work figuratively. Individual and group critiques are integrated into the semesters work. The class will study the works of contemporary and historical painters. This is not a class for beginning students.

Term:
Offered Both Fall and Spring

• ADFA-S342 Advanced Sculpture
  Prerequisites:
  ADFA S242
  Credits:
  3.00
  Description:
  In this course, students will explore contemporary sculptural issues, using a variety of found and generated materials. The process of installation, wall, floor, self-supported pieces and environmental works will be investigated.
  Term:
  Offered Spring Term

• ADFA-S344 Advanced Drawing Issues
  Prerequisites:
  Take ADFA-S272;
Credits:
3.00

Description:
This course has students assess their work of the past several years in order to determine current and future goals. Students use the tools they find in the relationship between 2D and 3D in order to define contemporary drawing for themselves.

Term:
Offered Fall Term

- ADFA-S345 Advanced Printmaking
  Prerequisites:
  ADFA S251 or instructor permission
  Credits:
  3.00
  Description:
  In Advanced Printmaking students will explore issues of technique, scale and multiple press runs that are not feasible within the context of the beginning Printmaking course. In this advanced course students will focus on a chosen area of traditional or contemporary print media, ranging from etching, digital imaging, lithography, paper molding, and photocopying, to relief and screen printing. Through the use of theory and developed skill, the course will allow students to create print-based works of an increasingly professional standard in both two and three dimensions. Students will undertake projects both as separate entities and as combined installed pieces, aimed at encouraging an individual, creative and professional approach to printmaking in the context of contemporary art practice.
  Term:
  Occasional

- ADFA-S361 Figure Studio: 2D
  Prerequisites:
  ADF S123 AND ADFA S241
This painting course is designed to provide an in-depth study and practice of two-dimensional contemporary figuration. Basing all students on the Masters and movements of the past, this course focuses on the methodology and effects of four major figurative painters from late-twentieth century through the present.

Term:
Offered Fall Term

• ADFA-S362 Figure Studio: 3D

Prerequisites:
Take ADF-S152 ADFA-S361;

Credits:
3.00

Description:
This sculpture course considers the figure in its importance both as a historical element and as a reflection and definition of self. Established an understanding of the figurative form in the space by relating gesture and structure through manipulated form. Weight, mass, plane and volume are considered while working directly from the model.

Term:
Offered Spring Term

• ADFA-S365 Advanced Figure Studio

Credits:
3.00

Description:
This course is an extension of the Figure Studio 2D & 3D course. The focus will be on advanced figuration in relation to contemporary and historical works. Students will work in any media that pertains to their exploration of depiction and content. Students are expected to work in consultation with the professor in class and in their individual studios.

- **ADFA-S371 Fine Arts Seminar II**

  **Prerequisites:**
  
  ADFA S271 and ADFA S272

  **Credits:**
  
  3.00

  **Description:**

  In this third semester of the Seminar sequence, students are responsible for integrating their visual culture influences and references within an expanded body of work.

  **Term:**

  Offered Fall Term

- **ADFA-S372 Fine Arts Seminar II**

  **Prerequisites:**
  
  ADFA S271 and ADFA S272 and ADFA S371

  **Credits:**
  
  3.00

  **Description:**

  During this final Seminar semester, the focused studio practices of students are channeled into the development of their final thesis exhibition. The four-semester Fine Arts Seminar sequence.

  **Term:**

  Offered Spring Term
• ADFA-S380 Advanced Fine Arts Seminar

Prerequisites:
Take ADFA-S272;

Credits:
3.00-6.00

Description:
This course functions as a bridge between the undergraduate processes of Fine Arts Seminar and the postgraduate environment of the visual arts. Particular attention will be paid to the contexts used by students to define their work in relation to feedback from professional outside reviewers. Individual contracts between faculty and students will be developed at the beginning of each semester. Contracts will assess the priorities for the work and adapt studio practices for the creation of new work. A research component will be attached when awarding 4-6 credits.

Term:
Occasional

• ADFA-S410 Senior Thesis

Prerequisites:
Fine Arts Senior status required.

Credits:
3.00

Description:
This senior-level course readies the student for the furtherance of his or her career as a creative artist. Though the development of a written artist's statement, slide and electronic documentation and the charting of their individual artistic lineage, students will begin to place themselves within the context of the contemporary art world. Normally offered Spring semester.

Term:
Offered Spring Term
• ADFA-S500 Drawing Fine Arts Directed Studio

    Prerequisites:
    Fine Art Program Director Approval needed

    Credits:
    1.00- 6.00

    Description:
    The student completes a directed study project, either studio (ADFA S500) or non-studio (ADFA 500) under the supervision of a full time fine arts faculty member. Please see Directed Study elsewhere in this catalog for details. Independent study forms are available from the Office of the Academic Dean and Registrar. All independent study projects must be approved by the individual faculty member, the Fine Arts Program Director, and the NESADSU Chairman. Normally available every semester.

• ADG-100 Fundamentals of Graphic Design

    Credits:
    2.00

    Description:
    This course will introduce students to the fundamentals of communication problem-solving, such as research, typography, concept and design development, and will expose students to the basic concepts of graphic design, including such specialties as advertising, corporate design and packaging. The primary purpose of the course is to aid students in deciding whether to pursue a career in graphic design. This course is a prerequisite for admission into the Electronic Graphic Design Certificate Program. A grade of B or better in this course will waive the standard portfolio requirement.

    Term:
    Offered Both Fall and Spring

• ADG-224 History of Graphic Design

    Credits:
The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

Term:

Offered Both Fall and Spring

Type:

Humanities & History, Humanities Literature Requirement

- **ADG-337 Professional Practice**
  
  **Prerequisites:**
  
  Senior BFA status
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This senior-year course is designed to provide final preparation for employment in the field of graphic design. In addition to helping each student develop a professional portfolio, the course will provide students with practical knowledge of the business aspects of graphic design, interviewing skills, and resume preparation.
  
  **Term:**
  
  Offered Spring Term

- **ADG-400 Graphic Design Internship**
  
  **Prerequisites:**
Senior BFA status.

Credits:
3.00-4.00

Description:
Seniors are required to pursue an internship with a local graphic design firm, whose work is directly related to that student's intended area of professional concentration, or complete a Thesis Studio (see below). Interns will observe and participate in all office procedures permitted by their place of internship and will be required to maintain a notebook of their observations. Required classroom seminars will reinforce new skills, share learning experiences and answer questions or concerns. Students with prior documented work experience in the field may be waived from the internship requirement, with the approval of the Graphic Design Program Director.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

- **ADG-500 Graphic Design Directed Study**

  Prerequisites:
  Consent of Program Director required

  Credits:
  3.00

  Description:
  The student completes a directed study project, either studio (ADG S500) or non-studio (ADG 500), under the supervision of a graphic design faculty member. All Directed Study request forms must be accompanied by a written proposal and schedule and must be approved by the individual faculty member, the Graphic Design Program Director, and the NESADSU Chairman. Available every semester.

- **ADG-510 Graphic Design Undergraduate Independent Study**

  Prerequisites:
An independent study form must be submitted to the CAS Dean's Office.

Credits:
1.00-6.00

Description:
An Independent Study provides the student with the opportunity to examine an issue of interest that falls outside the parameters of the existing curricula. The student will work on a one-on-one basis with a full time faculty member to realize a particular and well-defined goal. All proposals for Independent Study must be approved by the Dean's Office in advance of the beginning of the semester during which the work will be completed.

- **ADG-S201 Basic Typography**

  Prerequisites:
  ADF S151

  Credits:
  3.00

  Description:
  This course will introduce students to the creative use of typography in the design process and will provide them with the skills and knowledge necessary to design with type.

  Term:
  Offered Fall Term

- **ADG-S202 Computer Typography**

  Prerequisites:
  ADG S201 and ADG S219

  Credits:
  3.00
This advanced course focuses on the translation of the historical knowledge and hand skills learned in Basic Typography into an electronic format. Students will learn how to produce quality type in electronic format as well as experiment with and explore type through electronic manipulation.

Term:
Offered Spring Term

• ADG-S204 Design Beyond Design

Credits:
3.00

Description:
This multidisciplinary, hybrid course will focus on contemporary trends within Graphic Design. Students will gain understanding through the study of communication and marketing theory case studies and how those theories can be connected to the contemporary issues and topics facing designers today.

Term:
Offered Fall Term

• ADG-S206 Graphic Design I

Prerequisites:
ADF S151

Credits:
3.00

Description:
Emphasizing the creative process from thumbnail to comprehensive, the course will also introduce the student to the language, tools, and techniques of the professional graphic designer. Attention will be paid to conceptualization, production and presentation in solving design problems. This course will expose students to a series of assignments designed to show step-by-step problem solving from observation and research, to the incorporation of these findings into the design of communication vehicles.
• ADG-S207 Graphic Design II

Prerequisites:
ADG S206 and ADG S219

Credits:
3.00

Description:
A continuation of the skills learned in Graphic Design I, involving projects that are broader in scope, more in-depth, and include societal issues.

Term:
Offered Spring Term

• ADG-S213 Web Design I

Prerequisites:
ADG S219

Credits:
3.00

Description:
This course will introduce basic web site design and creation skills to students in order to prepare them for more advanced study in Web Design II. The class will use a variety of industry standard software to design and create basic working websites. Students will learn HTML, XHTML and CSS. Javascript, Flash and Action Scripting will be discussed and presented as supplemental tools. Information architecture, wire frames, interface design, user experience and web page layouts will be explored. The history, societal context and future of new media will be discussed throughout the semester. Software: Dreamweaver and Photoshop.
Prerequisites:

ADF S102

Credits:

3.00

Description:

This course introduces the skills necessary for meeting clients' illustration needs in a variety of media appropriate to their context. Emphasis will be placed on developing the ability to draw real objects and real people while advancing a personal style. Development of visual research and photo reference, thumbnailing and rendering skills for ones presentation of ideas and concepts while designing the proper environment for their illustration will be required.

Term:

Offered Both Fall and Spring

- ADG-S219 Computer Applications in Design

Prerequisites:

Intended for majors only

Credits:

3.00

Description:

In this course students will learn the major software applications used by graphic designers, such as Adobe Creative Suite: InDesign, Illustrator, and Photoshop. Through a series of problems, students will learn how and when to use specific software to produce their solutions and prepare portfolio-quality design.

Term:

Offered Fall Term

- ADG-S250 Graphic Design I-II
Prerequisites:
Open to MAGD Accelerated Program Students only.

Credits:
3.00

Description:
Emphasizing the creative process from thumbnail to comprehensive, this course will also introduce the student to language, tools and techniques of the professional graphic designer. Attention will be paid to the conception, production, and presentation in solving design problems. This course will expose students to a series of exercises designed to show how to get from observation and research, to the incorporation of these findings into the design of communication vehicles (logos, brochures, posters, ads, etc.) on a variety of scales. As a survey of graphic design, the goal of this course is to deal with typical problems faced by graphic designers in their profession.

• ADG-S302 Italian Journal: Painting and Drawing On Paper
   Prerequisites:
   Instructors Consent
   Credits:
   3.00
   Description:
   This course introduces the skills necessary for meeting clients' illustration needs in a variety of media appropriate to context. Florence, Italy and its environs will serve as the subject matter and catalyst in developing the ability to draw objects, i.e. Architecture, people and landscape while advancing a personal style. Study will begin with a pre-departure journal/book binding workshop at Suffolk University and then outdoors in and around Florence, Italy, Tuscan hill towns and the Veneto exploring basic illustration styles, methods and techniques. This course satisfies the expanded classroom requirement.
   Type:
   Expanded Classroom Requirement

• ADG-S305 Conceptual Typography
Prerequisites:
Take ADG-S202

Credits: 3.00

Description:
This course is designed to build on core typography knowledge and further your understanding of the conceptual possibilities of using type in design. Advanced typographic problems requiring the implementation of both traditional and alternative methods will facilitate a deeper exploration of modern communication issues including layered hierarchies, type in motion, typographic voice and illustration.

• ADG-S312 Packaging Design

Prerequisites:
ADG S201 or ADG S601 AND ADG S206 or ADG S606 AND ADG S219 or ADG S619 OR Instructor Permission.

Credits: 3.00

Description:
Almost everything in our lives is packaged. Peas and automobile accessories, prescription medication, and pearls; virtually every product requires a wrapper, a skin, a form of transport, a package. What you see on store shelves is a result of a complex process, involving the collaborative efforts of graphic designers, package engineers, printers, stylists, photographers and merchandisers. Package design is a team endeavor because in an overcrowded marketplace, it is crucial to a product's success and ultimately to the client's bottom line. In this course, students will study the evolution and history of packaging design, discuss philosophies, learn industry terminology and examine contemporary designs. Using case studies, students will analyze the package design process from concept to production and over the course of the semester, develop a line of packaging and supporting marketing materials for one brand. Guest lectures and field trips will supplement readings and in-class discussions, which will address brand extension and consistency, packaging templates, professional procedures, product photography and printing.

Term: Occasional
Prerequisites:

ADF S101 and ADF S102 or portfolio review and instructor permission

Credits:

3.00

Description:

An introduction to comics and the graphic novel as a means of visual narrative and personal expression. The course will identify and examine some of the key principles that make this art form work. A deeper, working understanding of these principles will be gained by applying them to a series of specific narrative projects with stated objectives. Students will have the opportunity to experiment with different visual styles and a variety of materials as they work to develop a personal artistic voice.

Term:

Occasional

ADG-S328 Designing for the Greater Good

Prerequisites:

ADG S207 and ADG S219

Credits:

3.00

Description:

Can designers who work for the greater good still make a good living? In a word, yes. In this class, students will study contemporary models of inspiring change through branding, systems design, and product design, and explore how design can have an impact in raising awareness and funding for social, environmental, political, and health issues. Students will work on three integrated design campaigns projects focused in social innovation, design of community, connected to health, and environmental impact to learn how to identify the opportunities to inspire change through design, and how to leverage print, social media, new fundraising tools, and online resources to create a successful effort. Students will also explore successful case studies in cause-related design, including the Obama campaign, FEED Projects, (RED), and Nike's Considered Program. Field trips are planned throughout the course, including a guided tour and talk at IDEO, one of the leading international design thinking companies.

Term:

Occasional
• ADG-S330 Motion Graphics

Prerequisites:
ADG S219 OR instructor approval

Credits:
3.00

Description:
Enter the world of motion design and learn how to make movies that incorporate image, type and video. This class will focus on learning and using specific software to create moving graphics that are geared toward being broadcast on television, web or film. Students will create time-based works such as title sequences, ads, and videos that they art direct. In the very near future, motion design will be a necessary skill for designers to compete in the marketplace. Motion design can be applied to many areas of graphic design from on-screen presentation to environmental design. During the class, students will build their motion design portfolio that will give them an edge above conventional print and web designers.

Term:
Offered Spring Term

• ADG-S334 Electronic Publication Design

Prerequisites:
ADG S202 and ADG S207 and ADG S219.

Credits:
3.00

Description:
This course will focus on the skills necessary to create publications such as books, magazines, annual reports and catalogs. The goal of this course is three-fold: to further enhance the understanding of typography in regard to publications, to provide the skills and knowledge necessary to design publications in an electronic environment, and to integrate the students' own art and/or photography in their work.

Term:
Offered Fall Term

- **ADG-S340 Web Design II**
  
  **Prerequisites:**
  
  ADG S213 or Instructors permission
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This course is intended as a continuation of the experience gained in Web Design I. The objective of the course is the development of advanced conceptual skills such as prototyping, usability testing, interactive philosophy, accessibility, project and content management. Students will further develop their professional multimedia skills by working with HTML, XHTML, CSS and other industry-standard tools. JavaScript will be discussed and we will use Flash for animation and video. Current techniques for distributions on mobile devices will be explored. Software that will be used during the class will include Dreamweaver, Flash, and other professional level software tools.

- **ADG-S343 Advanced Topics in Interactive Design**
  
  **Prerequisites:**
  
  ADG-S340;
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This course is designed to follow Web II (ADG S340/ADG S740) and will prepare you for the real-world experiences designers often encounter in the field of interactive media. You will continue your exploration of interactive design and choose a final project direction that furthers your understanding of interactive media. These topics include designing for and implementing Content Management Systems, designing and production for mobile computing platform uses, cross platform compatibility and concepts of information architecture, and designing with an emphasis on market needs for multimedia.

  **Term:**
• **ADG-S344 Graphic Design III**
  
  **Prerequisites:**
  
  ADG S202, ADG S207, and ADG S219
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This continuation of Graphic Design I and II (ADG S206, 207) will concentrate on increasing sophistication in creative problem-solving abilities. Students will also develop an understanding of prepress terms and operations and the impact of technology on those operations. It will also provide the knowledge and skills necessary to enable students to make appropriate prepress decisions regarding more complex projects. Senior status preferred.
  
  **Term:**
  
  Offered Fall Term
  
  • **ADG-S345 Graphic Design IV**
  
  **Prerequisites:**
  
  ADG S344
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  A continuation of the concepts and skills developed in Graphic Design III and their application to more complex, multi-pieced, in-depth projects.
  
  **Term:**
  
  Offered Spring Term
• ADG-S348 Advanced Illustration for Designers

Prerequisites:
ADG S214

Credits: 3.00

Description:
This course focuses on the preparation of illustration for specific markets within the graphic design product development and publishing fields. Independent development and proficiency in a variety of media and the learning of different methods of preparing artwork for reproduction in traditional printed and/or digital environments will be covered. The continuation of the development of a personal sketchbook, photo reference, and the shooting of photographs for research will be further explored.

• ADG-S354 Advanced Computer Applications

Prerequisites:
ADG S201, ADG S206, and ADG S219

Credits: 3.00

Description:
This course is designed to further explore software applications for specific and experimental effects. It aims to provide students with the knowledge and skills necessary to choose the appropriate software application and to execute the desired design, focusing on the design itself rather than on the limitations of computer programs. The course also focuses on solving the technical and production problems of preparing artwork electronically for printing. Software applications include Adobe Creative Suite: InDesign, Illustrator, and Photoshop. Normally offered fall and spring semesters.

Term:
Offered Spring Term

• ADG-S360 Corporate Design
Prerequisites:
ADG S202 and ADG S207

Credits:
3.00

Description:
This course explores the issues of contemporary branding used to identify, establish and promote the business community. Specific emphasis will be placed on the analysis and development of corporate identity systems including the development of logotypes, stationery, signage systems, marketing collateral/advertising/direct mail campaign development, environmental graphics and websites.

Term:
Offered Fall Term

• ADG-S365 Digital Photography

Credits:
3.00

Description:
Often mixed with other media, photography has evolved into a major tool for use by the contemporary artist and designer. This course offers students the experience of creating digital and film photographs while studying concepts of art direction and techniques that can enhance their compositions. The primary objective is to generate professional still and motion images for digital media, including the Web. Students will manipulate their photographic images using Photoshop rather than the traditional darkroom. Students will also learn how to photograph their own artwork and use a digital camera. Advanced students will be encouraged to explore independent tracks of study.

Term:
Offered Both Fall and Spring

• ADG-S366 Environmental Graphic Design

Prerequisites:
ADG S202, ADG S207 and ADG S219
A cross disciplinary course bringing together interior design students and graphic design students to collaborate on problem solving in the visual and built environments. In the studio, students will be exposed to design issues and problems, both experiential and graphic. Students will be working in teams bringing new insight to solutions for a variety of client/project types. Field trips to fabricators, professional firms and EGD sites will be included. This is a survey class designed to introduce students to ways of producing three dimensional graphic design projects within the built environment.

Term:

Offered Fall Term

- **ADG-S370 Artists' Books**

  Prerequisites:

  Take ADG-S202 ADG-S207 ADF-S152; or Instructor's permission.

  Credits:

  3.00

  Description:

  Books are vessels of information. They can present your graphic design, photography or fine art, house a cherished collection, and even express non-linear thought. This class will cover traditional book design and construction techniques, as well as contemporary, non-traditional methods. You will learn to blend design, craftsmanship and content to create books that are themselves works of art. This is a hands-on studio course intended for graphic design and fine arts majors.

  Term:

  Occasional

- **ADG-S500 Graphic Design Directed Studio**

  Prerequisites:

  Consent of Program Director required.
Credits:
1.00-6.00

Description:
The student completes a directed study project, either studio (ADG S500) or non-studio (ADG 500), under the supervision of a graphic design faculty member. All Directed Studio request forms must be accompanied by a written proposal and schedule and must be approved by the individual faculty member, the Graphic Design Program Director, and the NESADSU Chairman. Available every semester.

- **ADI-01 Introduction to Interior Design & Decoration**

  Credits:
  2.00

  Description:
  This elective course is designed to aid students in determining whether to pursue a career in interior design and decorating. Through both lectures and studio work, students will be shown basic drafting and graphic communication techniques used in presentation of visual ideas, as well as various elements of interior composition, such as space planning, color, furniture, finish and material selection. The final project will be suitable for inclusion in a portfolio. Normally offered each semester.

  Term:
  Offered Both Fall and Spring

- **ADI-221 History of Furniture & Architecture I**

  Credits:
  4.00

  Description:
The goal of this course is the enhancement of the student's critical comprehension of historic styles and the impact they have on contemporary design solutions. The survey begins with the Egyptian period and provides an overview of the history of furniture and architecture through the mid-1700s, including ancient Greece and Rome, the Gothic and Renaissance, Baroque and Rococo periods. Emphasis will be placed on chronological periods, the visual characteristics of each style including regional idiosyncrasies, and the terminology germane to a study of furniture and architecture.
- **ADI-222 History of Furniture & Architecture II**

  **Prerequisites:**
  ADI 221

  **Credits:**
  4.00

  **Description:**
  A continuation of History of Furniture & Architecture I, this course will extend the investigation of furniture and architecture into the 20th century, while addressing issues concerning preservation, restoration, rehabilitation, and adaptive re-use. Drawing on the vast resources of the city of Boston and its environs, students will become actively involved in stylistic progression, local living history, and the benefits of preserving our past for future generations. Field trips will include visits to restored Federal, Victorian and Contemporary venues.

  **Term:**
  Offered Both Fall and Spring

  **Type:**
  Humanities & History, Humanities Literature Requirement

- **ADI-234 Introduction to Interior Design Theory & Criticism**

  **Prerequisites:**
  Taken concurrently with ADI S201

  **Credits:**
Description:
This course introduces students to the important individuals, ideas and issues that have shaped the direction of contemporary interior design practice in the twentieth century, building upon the historical foundation established by the Ideas of Western Art and History of Furniture and Architecture classes. Intermixing lectures and readings with visits to important local buildings, it discusses the influences of culture, technology, fashion and media upon the work and thinking of the first generation of modern designers, as well as emerging social, moral and environmental imperatives that will form the basis of future practice; cultural identity, interdisciplinary collaboration, sustainability and universal design.

Term:
Offered Fall Term

- **ADI-242 Interior Codes & Construction**

  Prerequisites:
  Prerequisite: ADI S110 or S510.

  Credits:
  3.00

  Description:
  This course examines various interior construction assemblies of non-load-bearing walls, load-bearing walls, floors, stairs, elevators, fireplaces, ceilings, doors, interior windows, frames, millwork and fire-related construction. Emphasis will be placed on building codes including state, BOCA, Underwriters Laboratory, ASTM, state and federal accessibility codes and construction materials. Students will also be introduced to basic structural concepts and characteristics of structural materials.

  Term:
  Offered Both Fall and Spring

- **ADI-244 Interior Materials & Finishes**

  Prerequisites:
  Intended for majors only
Students will study the visual qualities, technical characteristics and applications of the common materials and finishes used in interior installations. These materials include floor coverings, wall coverings, textiles, ceiling and sustainable materials. Related fire, health and safety codes, as well as maintenance and life cycle costs, will be discussed. Class material will be presented in the form of lectures, guest speakers and a tour of the Boston Design Center. Students will learn to analyze, select and specify materials and finishes for the appropriate applications, write specifications, and prepare a resource notebook.

Term:

Offered Both Fall and Spring

- **ADI-254 Lighting**

  Prerequisites:

  Prior drafting or CAD experience recommended

  Credits:

  3.00

  Description:

  This course introduces students to the art and technology of lighting and explores the use of lighting as a design element in the interior environment. Class material will be presented as a series of lectures, readings and demonstrations. Students will learn to analyze interior lighting installations, calculate lighting levels for interiors, select appropriate light fixtures and prepare a lighting plan based on one of their studio projects.

  Term:

  Offered Both Fall and Spring

- **ADI-306 Portfolio**

  Prerequisites:

  Senior Status
This course teaches students how to develop a professional portfolio. Students will investigate overall development of portfolio content, substance, and design through a variety of hands-on exercises including digital and mock-up layout techniques; methods of documenting and archiving work; presentation formats; design influence investigation, and more.

Term:
Offered Both Fall and Spring

- **ADI-352 Environmental Systems**
  Prerequisites:
  ADI 242
  Credits:
  3.00
  Description:
  This course studies mechanical, electrical, and plumbing technology and systems commonly employed in residential and commercial interiors. It will introduce students to the vocabulary, concepts and basic components of these fields of engineering. This will enable students to integrate these building systems in their design work and communicate ideas effectively with project engineers and contractors. The course will include commonly used heating, ventilating, air conditioning, plumbing piping and fixtures, fire sprinklers, electrical supply and distribution, smoke detection and fire alarm systems. Related mechanical, electrical and plumbing codes will also be discussed.
  Term:
  Offered Both Fall and Spring

- **ADI-384 Interiors Marketing & Contracts**
  Prerequisites:
  ADI-S201; Intended for majors only
This course will cover the business aspects of interior design, including firm management, client, and contractor relationships, project management, proposal writing, and market resourcing. In addition, students will be exposed to career planning practices, such as portfolio development, resume preparation and interviewing techniques. Tours of architectural and interior design firms will also be included.

Term:
Offered Both Fall and Spring

• ADI-398 Senior Programming & Pre-Design

Prerequisites:
ADI S201, ADI S202, ADI S303, ADI S304, ADI S372

Credits:
3.00

Description:
This course is designed to be the first part of the BFA Senior Studio in Interior Design. The senior ID project is intended as the culmination of the interior design studio sequence. It is an individual effort, supported by the studio faculty, that is inclusive of the entire design process from the programming phase through final design and documentation. The objective of part one, Senior Programming & Pre-Design, is for individual students to research, develop, and draft a program document which will guide their design work in part two, Senior Studio. Students will explore the possible project types and precedents, select and develop a client profile and program, and research and analyze an architectural site. Written and graphic analysis tools will be employed. The preliminary conceptual (pre-design) phase of work is also introduced.

Term:
Offered Spring Term

• ADI-400 Interior Design Internship

Prerequisites:
ADI S202 and ADI S303; senior BFA standing required. This course fulfilling the Expanded Classroom Requirement.

Credits: 3.00

Description:

With the assistance of the faculty advisor, each student will identify an appropriate internship site with a local interior design firm. All interns are required to complete 120 hours of work/study within the semester, working a minimum of 8 hours per week under the direction of a qualified Interior Designer. Interns are expected to contribute to the host firm at a high level of design interaction. All interns will meet bi-weekly with the faculty advisor. The classroom seminars will reinforce new skills, share learning experiences, and answer questions or concerns. A firm site visit, production of firm profile, and participation in a professional organization are required within the seminar.

Term: Offered Both Fall and Spring

Type: Expanded Classroom Requirement

- ADI-500 Interior Design Directed Study

  Prerequisites:
  Consent of Program Director required.

  Credits: 1.00-6.00

  Description:
  Directed Study/Studio allows students to pursue an in-depth research project in an area of particular interest, directed by a qualified faculty member. Available every semester.

- ADI-H500 Interior Design Directed Study

  Prerequisites:
Directed Study/Studio allows students to pursue an in-depth research project in an area of particular interest, directed by a qualified faculty member. Available every semester.

- ADI-S106 Interior Design Communications
  
  **Prerequisites:**
  
  Take ADF-S101 ADI-S108 OR ADI-S205;
  
  **Credits:**
  
  3.00
  
  **Description:**
  Interior Design Communications teaches students how drawing media, observational drawing, perspective theory, color and design graphics can be integrated into the designer's process. In addition to exploring contrast, accent, reflection, shade and shadow, the course underscores the importance of freehand sketching as a tool to foster intellectual inquiry and convey design concepts to a wider audience. The course introduces students to manual and digital methods for composing work for conceptual expression, technical drawing presentation, and portfolio purposes.

  **Term:**
  
  Offered Both Fall and Spring

- ADI-S108 Perspective Principles
  
  **Prerequisites:**
  
  Prior or concurrent drawing experience
  
  **Credits:**
  
  3.00
Description:
This course introduces students to the systems of perspective developed during the Renaissance as a means of creating the illusion of 3-dimensional space on a 2-dimensional surface. Using 1-, 2-, and 3-point perspective, students will learn to effectively represent space. Basic drafting techniques and architectural scale are introduced. Both free-hand sketching and technical drawing methods will be emphasized. Manipulation of drawing through computerized scanning and digital photography included.

Term:
Offered Both Fall and Spring

• **ADI-S110 Digital Orthographics**

  Prerequisites:
  Take ADI-S108 OR ADI-S205;

  Credits:
  3.00

  Description:
  This course will enable the student to produce, manipulate and print 2-dimensional drawings using digital software including Computer Aided Drafting (CAD). Students will acquire the skills necessary for producing measured architectural plans, elevations and sections as well as isometric and axonometric drawing types. Fundamentals of illustrating drawings in color, light and shadow through digital programs will be introduced.

  Term:
  Offered Both Fall and Spring

• **ADI-S201 Interior Design Studio I**

  Prerequisites:
  ADF S152, ADF S143, ADI S110 Prior to or concurrent with ADI 234 Take ADI S106 or ADI S205

  Credits:
  3.00
This studio introduces students to basic design principles, design theory and concept development. Emphasis will be placed on design process, problem solving, spatial organization, anthropometrics, universal design awareness, and presentation techniques. Students will be given a series of projects of increasing complexity, utilizing and building upon the skills developed in the Foundation courses. Students will be expected to produce process diagrams, plans, elevations, models, and finish boards.

Term:
Offered Both Fall and Spring

• **ADI-S202 Residential Design Studio**

  **Prerequisites:**
  ADI S201 AND ADF S102

  **Credits:**
  3.00

  **Description:**
  This course addresses residential interior environments on a large scale. Students will develop client contact and programming skills. Emphasis will be placed on residential precedents, design process, human factors, accessibility, building codes, diagramming, spatial organization, detailing, presentation techniques, furnishings, finishes and lighting.

  **Term:**
  Offered Both Fall and Spring

• **ADI-S264 Advanced Interior Design Communication**

  **Prerequisites:**
  ADI S106 and ADI S110

  **Credits:**
  3.00
This course is designed to advance and reinforce presentation techniques and graphic technical skills introduced in Interior Design Communications. Students will continue to develop their proficiency in free hand sketching, rendering and perspective, and will learn various three-dimensional rendering software and other digital imaging techniques.

Term:
Offered Both Fall and Spring

- **ADI-S303 Contract Design Studio I**
  
  Prerequisites:
  
  ADF S102, ADI S201, ADI 242, ADI 244, ADI S264
  
  Credits:
  
  3.00
  
  Description:
  
  This commercial design studio focuses on the design of work environments. Students will develop programming and space planning skills unique to these environments through a series of small- to medium-sized projects. Emphasis will be placed on commercial precedents, programming, design process, human factors, building codes, ADA, spatial organization, detailing, presentation techniques, office furniture systems, equipment, finishes, and lighting.
  
  Term:
  
  Offered Both Fall and Spring

- **ADI-S304 Furniture and Detailing Studio**
  
  Prerequisites:
  
  ADI S201, ADI S264
  
  Credits:
  
  3.00
Description:
This course introduces students to the design process as it applies to furniture, addressing furniture ergonomics, materials, construction techniques, manufacturing and design. Students will research selected topics, and design seating, work/service pieces and cabinetry. Emphasis will be placed on furniture precedents, research, design process, human factors, accessibility, detailing, documentation and presentation techniques.

Term:
Offered Both Fall and Spring

- **ADI-S305 Contract Design Studio II**
  
  **Prerequisites:**
  
  ADI S202, ADI 221, ADI S110

  **Credits:**
  
  3.00

  **Description:**

  This studio focuses on adaptive re-use and renovation of commercial interiors with attention given to historical buildings in the Boston area. Emphasis on creative problem-solving methods and a philosophical approach to medium- and large-scale hospitality and retail design projects. Students will be required to incorporate the skills and knowledge gained throughout their studies to create a comprehensive project, including presentation drawings, models, material and furniture boards, and a set of construction documents and specifications.

  **Term:**

  Offered Fall Term

- **ADI-S366 Environmental Graphic Design**

  **Prerequisites:**

  ADI S372

  **Credits:**

  3.00
Description:
A cross-disciplinary course bringing together interior design students and graphic design students at the senior BFA level to collaborate on problem-solving in the visual and built environments. In the studio, students will be exposed to design issues and problems, both experiential and graphic. Students will be working in teams bringing new insight to solutions for a variety of client/project types. Field trips to fabricators, professional firms and EGD sites will be included. This is a survey class designed to introduce students to ways of producing three-dimensional graphic design projects within the built environment.

Term:
Offered Fall Term

- ADI-S372 Construction Documents
  Prerequisites:
  ADI S110 AND ADI S201
  Credits:
  3.00
  Description:
  Building on the curriculum of Orthogonal Drawing, this course will explore in more detail the features of CAD and BIM software. Programs will be used as tools to draft, organize, and produce a set of construction documents. Students will complete a full set of contract documents.
  Term:
  Offered Both Fall and Spring

- ADI-S401 Senior Studio
  Prerequisites:
  ADI S201, ADI S202, ADI S303, ADI S304, ADI S305, ADI S372 AND ADI 398
  Credits:
  3.00
This studio course completes the undergraduate studio sequence in Interior Design. This final design studio emphasizes individual competence with respect to the total design process. Students will utilize the research and programming document produced in ADI 398, Senior Programming & Pre-Design, to develop a comprehensive design solution for their individual studio problem through schematics, design development, presentation drawings and specifications.

Term:

Offered Spring Term

- **ADIL-224 History of Illustration**

  Credits:
  4.00

  Description:

  This course focuses on the study of how images have been used to illustrate ideas, tell stories, convey information, and assist in human communication throughout history. Students will become familiar with the historical antecedents of modern illustration, followed by an in-depth study of the individual movements and overall sweep of illustration from the late 19th century through the present. Particular attention will be paid to the impact printing and other reproduction and distribution technologies have had on the evolution of modern Illustration. Studies will include lectures and selected readings. Students will be asked to write and present research projects as well as critical essays. Normally offered spring semester.

- **ADIL-338 Illustration Professional Practice**

  Prerequisites:
  
  ADIL-S301

  Credits:
  3.00

  Description:

  This course introduces students to contemporary professional practices within a broad range of specializations and related fields. Students identify their personal interests, particular capabilities and strengths, career priorities and goals, and other preferences that will influence their decisions and future lives as creative professionals. Self-employment issues are explored in depth, since most illustrators work as freelancers, contractors, or
entrepreneurs, but small business practices are also covered. Marketing and self-promotion are particularly relevant subjects. Students identify and investigate potential clients and employers, professional competitions, and professional organizations that provide opportunities for networking. Based on his or her personal and professional goals, each student produces a professional resume, designs an effective logo, designs direct marketing/email promotions and prepares their artwork for offset printing. Important topics like reproduction rights, pricing and negotiation are discussed in depth, in addition to legal contracts and bookkeeping. Contemporary issues within the illustration profession are discussed, as are practical issues like income tax expenses and exemptions, sales tax, unemployment and disability insurance, retirement plans, etc. Students will contact legal professionals and practice their interviewing and presentation skills. In addition, students plan, research, and write proposals for two courses (collaboration and Studio Project) in the following final semester.

**ADIL-400 Illustration Internship**

**Prerequisites:**

Take ADIL-338;

**Credits:**

3.00

**Description:**

Students will complete an Internship with an artist or firm whose work is directly related to that student's intended area of professional concentration. Interns will observe and participate in all office procedures permitted by their place of internship and will be required to maintain a notebook of their observations. Required classroom seminars will reinforce new skills, share learning experiences and answer questions or concerns.

**ADIL-S201 Illustration I: Visual Communication**

**Prerequisites:**

Take ADF-S102 ADF-S143 ADF-S151;

**Credits:**

3.00

**Description:**

This course introduces fundamental concepts and principles of visual communication, with emphasis on the development of visual literacy," which is the basis for understanding the issues involved in effective communication of ideas and storytelling. Topics include staging, atmosphere, sequential narrative and timing, iconography, visual metaphor and analogy, and the meaning inherent in all visual forms (composition, style, and technique).
Informed by lecture, discussion, examples, and selected readings, students explore these concepts through a series of assignments, each presenting a different set of defined objectives and considerations related to audience and general function of the illustration (descriptive, expressive, narrative, iconographic, metaphoric, etc.). Through preliminary studies and sketches, students are encouraged to explore multiple solutions and strive for the most successful results, with thoughtful consideration of concept, drawing issues, composition, and technical concerns. Student work is evaluated on the basis of originality and effectiveness (process, appropriateness, readability, visual impact).

Term:
Offered Fall Term

**ADIL-S202 Illustration II: Process & Practice**

**Prerequisites:**
ADIL-S201;

**Credits:**
3.00

**Description:**
This course expands on concepts and principles introduced in Illustration I, with special emphasis on idea generation and the process of picture making. Through sequenced illustration assignments, students explore customary illustration practices as they have evolved from the days of early book illustration and letterpress technology to contemporary demands for immediate changes to digital files. Because illustration typically involves creative collaboration (art direction), because it is an applied art, with explicit purpose and function, and because it has traditionally been produced to be reproduced, the illustration process typically involves a series of steps, including preliminary research, brainstorming, thumbnail sketches, concept and layout approval, compositional studies, collection or creation of visual reference, tight sketches, image approval, comprehensive roughs and final art, with final approval. There may be particular requirements for presentation and formatting, depending on whether the image is for print or digital reproduction. Illustrators have always used a wide variety of media and techniques; most of them devise unique methods that contribute to a unique personal style. In this course, each assignment addresses an instructor-defined set of parameters related to a particular illustration market, a target audience and an application. Students practice visual problem solving within these constraints, using their choice of media, approach and technique. Emphasis is placed on the need to preserve spontaneity and authentic vitality in task-based creative work with multiple requirements, time restraints and periodic art direction. Evaluation is based on the results, on the efficiency and effectiveness of the preliminary process, and on the ability of students to maintain artistic integrity while, at the same time, satisfying assignment requirements.

Term:
Offered Spring Term
• **ADIL-S214 Illustration for Designers**

   **Prerequisites:**
   ADF S102

   **Credits:**
   3.00

   **Description:**
   This course introduces the skills necessary for meeting clients' illustration needs in a variety of media appropriate to their context. Emphasis will be placed on developing the ability to draw real objects and real people while advancing a personal style. Development of visual research and photo reference, thumbnailing and rendering skills for ones presentation of ideas and concepts while designing the proper environment for their illustration will be required.

• **ADIL-S223 Traditional Techniques in Illustration**

   **Prerequisites:**
   Take ADF-S102, ADF-S151, and ADF-S143;

   **Credits:**
   3.00

   **Description:**
   This course provides students with an opportunity to explore a variety of wet and dry media, materials, tools and approaches traditionally used for illustration. Imagery that is reproduced and distributed in print form must dry quickly and reproduce well, and because historically, it has been necessary to transport, store and reproduce illustration, it is typically (but not always) relatively small in format. Media include ink, transparent watercolor, gouache, acrylic, oil, pastel, color pencil, on a variety of surfaces, handled expressively or with precision and often used in combination. In this course, assignments address a range of subject matter, rendered or painted from direct observation, still life, wildlife, urban and natural landscape, portrait, and clothed figure. Preliminary exercises provide opportunities for experimentation and technical practice. Assignments are evaluated on the basis of technical process and proficiency, composition (cropping), knowledge of issues related to readability and reproduction, and the mixing of pigment to match observed value and color, as an indication of understanding and skillful application of color theory.

   **Term:**
   Offered Fall Term
• ADIL-S255 Digital Techniques

Prerequisites:

Take ADF-S143 and ADF-S156;

Credits:

3.00

Description:

This course builds on the introduction to digital media presented in the Foundation curriculum. Essential tools and techniques of Adobe Photoshop (photo retouching software) are explored and then compared to essential digital drawing and painting tools and techniques of Corel Painter (painting simulation software) and Autodesk Sketch Book Pro (drawing software). Students explore the basic tools and techniques of vector-based software through Adobe Illustrator (graphics software). Exploration and explanation of the interface, terminology, navigation and controls of Blender provides a very basic introduction to 3D computer modeling. Similarities and essential differences between applications are emphasized to help students appreciate the particular usefulness and limitations of these different applications. Basic scanning, printing, and presentation procedures are reviewed, with attention to efficient file management, basic formatting for print and web, as well as the use of Help menus and tutorials. Two assignments involve the incorporation of type (in Illustrator and Photoshop).

Term:

Offered Spring Term

• ADIL-S270 3D Modeling

Credits:

3.00

Description:

This course explores digital 3D modeling used in 3D animation, game development, visual effects for film, motion and interactive graphics and 3D concept and production art (illustration). Students use the basic function and tools of 3ds Max for polygon modeling (character, prop and environment), texture mapping, soft body dynamics (creating hair, fluids and cloth), lighting, simple rigging and animation (panning and tracking), as well as rendering and compositing, with output to Photoshop graphics software and After Effects 2D animation software.

• ADIL-S301 Illustration III: Style & Substance
Prerequisites:
Take ADIL-S202;

Credits:
3.00

Description:
This course examines the elements of visual style, the relationship between style and function (how style conveys meaning), and the role and impact of stylistic trends in illustration. It incorporates a historical survey of visual style in both the fine and applied arts. Effective illustration employs style in support of expressive and conceptual purpose. Individual artistic style evolves naturally from a particular technical approach, a unique combination of competencies and weaknesses, influenced by aesthetic preferences. Individual style both reflects and helps to define the contemporary culture in which it is produced. In this course, the topic of art direction is explored and discussed, as well as the rationale behind the choices of commercial art buyers and the general public. Each assignment involves a specific set of parameters related to subject and identify and take advantage of every opportunity for creative freedom that exists within every composition. Students are encouraged to explore their preferred media and technical approach as they develop awareness of the element that contributes to their own unique style. Evaluation criteria include the impact of appropriate style and the relative effectiveness of each illustration.

Term:
Offered Fall Term

• ADIL-S302 Illustration IV: Originality & Creativity

Prerequisites:
Take ADIL-S301;

Credits:
3.00

Description:
This course provides an opportunity for students to consolidate the knowledge and experience from the three previous semesters of Illustration to develop a synthesis of concept, process, technique and style. Students are encouraged to challenge themselves and extend their skills in search of fresh, innovative and personal ways to express visual ideas, without dismissing the need to address assignment parameters related to practical application. A variety of illustration assignments allow students to focus on an efficient and dependable ideation process, refinement of personal style and technical competence in the use of a preferred media. Progressing from instructor-defined objectives to student-defined objectives, students are challenged to pursue personal solutions within pre-determined parameters. The key to impressive illustration concepts and execution usually depends
on adequate preliminary research and efficient (time-conscious) preliminary process. Assignments vary in terms of the quantity and type of research and visual reference required. Preliminary stages will be discussed and critiqued by both instructors and peers. As students explore viable solutions for each assignment, they have the opportunity to practice professionalism in reaction to the instructors art direction. In the final weeks of the semester, students are asked to develop a draft proposal for an Illustration Studio Project the following semester. This draft must be approved by the instructor and a final proposal must be approved by the Illustration Studio Project instructor in the fall. Evaluation of student work and participation with emphasize creativity, technical competency and professional approach.

Term:
Offered Spring Term

- **ADIL-S305 Figure in Context**

  Prerequisites:
  Take ADF-S101 ADF-S143 and ADF-S151;

  Credits:
  3.00

  Description:

  This studio elective (for sophomores, juniors or seniors) provides an intensive exploration of the relationship between human figure and environment, as both 2-dimensional composition and as 3-dimensional illusion of volume and spatial depth. The course involves both drawing and painting concerns, and it provides students with practice drawing the clothed and costumed figure from direct observation, and incorporation of these subjects into invented but cohesive and convincing narrative scenes. To assist with this, principles of linear and atmospheric perspective and light logic are reviewed. Students work with various forms of visual reference for both the figure and the environment, and they attempt to successfully integrate this visual information from multiple reference sources. In addition to direct observation and collected print reference (scrap), they work with digital photography and Photoshop. Students thoughtfully arrange models, costume, props and lighting, with emphasis on effective staging (viewpoint and lighting) in support of narrative and emotional context. Students use a medium of their choice for drawing, painting or 3D diorama.

- **ADIL-S306 Visual Commentary**

  Prerequisites:
  Take ADF-S102 and ADF-S151;

  Credits:
Description:

This studio elective course (for sophomores, juniors or seniors) allows for sustained observational drawing of the clothed figure, sometimes in action or moments of transition, within exterior or interior environments. Emphasis is on implied narrative motivation, behavior, relationship and interaction suggested through facial expression, body language, and staging within the environment, which often reveals clues of human presence. This drawing practice may extend to animal subject matter. Visual commentary attempts to interpret significant incidents and situations social context, from the artist’s subjective point of view. This practice is the hand-drawn counterpart to photojournalism, which documents the community and the world at meaningful - sometimes dramatic or intimate - moments. This requires special attention to body language and facial expression, the exaggeration of which is the foundation of effective cartooning. The character and style of drawing (hesitant, confident, expressive, precise, distorted, etc.) contributes to the meaning and impact of the image. Students are asked to develop a proposal and a plan for a thematic body of work and, throughout the semester, they work independently, meeting in class for group critique and discussion. They are asked to experiment with media and expressive drawing technique. Final evaluation includes a portfolio of drawings assessed on the basis of observational acuity, reflective insight, originality and integrity, expressive interpretation and drawing skill. Offered in the Spring semester.

ADIL-S307 Visual Development

Prerequisites:

Take ADIL-S201 and ADIL-S255;

Credits:

3.00

Description:

This elective course introduces the basic components of the pre-production process for animation, computer games, film and television the concept, design and development of characters, props and backgrounds (components that are normally produced by different artists). Using a given story sequence, students develop plot analysis, a storyboard, a production illustration (concept art), a character design model sheet or a 3D maquette, a prop design model sheet, a scenic background layout, and a background matte painting. As in the professional world, collaboration is encouraged, particularly in terms of feedback from all class participants at each stage. Both aesthetic and technical issues are addressed, with emphasis on effective process, including research and generation of original and relevant ideas. Professional practices and presentation are stressed. Students review theories and techniques of visual storytelling, with attention to narrative sequence, point of view, action, metamorphosis, transition and editing. Production art involves consideration of theatrical/cinematic staging (the design of viewpoint, lighting and color for dramatic effect). Effective character design relies on consideration of anatomical structure and effective environment layout and matte painting relies on consideration of linear and atmospheric perspective. Students may work with a variety of media and applications for drawing and painting, both traditional and digital (Photoshop, Painter, SketchUp, Maya, ZBrush), although the course does not incorporate technical instruction (traditional techniques or digital applications). Offered in the Fall semester.
ADIL-S308 3D & Experimental Techniques

Prerequisites:
Take ADF-S102 ADF-S123 and ADF-S156;

Credits:
3.00

Description:
This junior/senior elective provides an opportunity for students to explore a wide range of materials and processes including printmaking, collage, transfers, fibers, monotype, collotype, sculptural relief, 3-dimensional sculpture and casting. Students each choose a theme or a concept for a series of illustrations. The 3-dimensional work will be lit and photographed to produce a final 2-dimensional image. A primary criteria of success will be reproducibility and readability. Offered in the Spring semester.

ADIL-S309 Advanced Digital Techniques

Prerequisites:
Take ADIL-S202 and ADIL-S255;

Credits:
3.00

Description:
This advanced elective course builds on the skills and techniques addressed in Digital Techniques. It presents advanced tools of digital painting software and introductory digital animation. Color setting, color management, channels and automate features are covered, Offered in the Fall Semester.

ADIL-S310 Advanced Representational Painting

Prerequisites:
Take ADF-S123;

Credits:
Description:
This course will focus on direct observational painting and issues involving realism; making painting effectively mirror the light, space, color and forms of the visible world. Geared towards the needs of Illustration majors, approaches may range from hyper-realistic to more painterly interpretations of subject matter. Painting methods will be included and Traditional Techniques will be explored in greater depth. Discussions will reference realist painters from the Renaissance to the present. Current museum and gallery show visits relevant to the course will be recommended. Color harmony and contrast, chromatic space, atmospheric perspective composition, viewpoint, lighting, and palette organization are among some of the areas of focus. Within the framework of realism, students are encouraged to develop a nuanced approach that best suits their painting goals.

• ADIL-S401 Studio Project

Prerequisites:
Take ADIL-S302 and ADIL-S338;

Credits:
3.00

Description:
The focus of this course is the experience of creative collaboration. Student illustrators have a valuable and unique opportunity to engage with other students on one or two intensive collaborative projects. They must work with existing, published content (manuscript, script, product, etc.) that is not their own. Several illustration students may choose to work as a team, each responsible for a piece of a multipart project. Projects may also involve collaboration with students from other art and design disciplines or Illustration students may choose to work with other College of Arts and Science majors. In Professional Practices the preceding semester, students plan and research projects with real applications. In the first week, each creative team submits a finalized proposal and timeline for program approval. The instructor functions as a facilitator. Weekly progress is documented, discussed, and evaluated. Each creative team submits a final written report, accompanied by photos or video. Final artwork must be ready for formal presentation and artwork must be camera-ready, formatted for pre-production. Each student group identifies and invites an appropriate outside professional to evaluate their project. In addition to the final product, students are evaluated individually on the basis of demonstrated cooperation, organization, effort, diligence and effective communication. An approved internship may be taken in place of this course, as long as the student is interacting with other creative professionals engaged in significant creative activity throughout the semester.

Term:
Offered Spring Term

• ADIL-S402 Collaboration
Prerequisites:
ADIL-S401;

Credits:
3.00

Description:
Each student prepares a written Studio Project outline for tentative approval the preceding semester by Illustration IV instructors. Finalized proposals are approved by the Illustration Studio project instructor in the third week of class. These proposals must include a clear set of conceptual and formal objectives, which may involve personal, social, cultural, scientific or commercial concern. They must also include a feasible timeline and a practical strategy for bringing the project to conclusion within a single semester. The course is intended to give students the opportunity to synthesize knowledge and apply the skills they've acquired. They are encouraged to engage in original, interdisciplinary research and experimental process in search of solutions for this self-defined challenge. This work may be the spark for ideas developed and implemented through Illustration Portfolio or Illustration Collaborative Studio. The experience and insights that are realized through the semester of rigorous intellectual and creative work are more valuable than the products that result. Assessment is weighted accordingly. Students carefully document all ideas, activities, and tangible results in journal format. These journals will be part of a public exhibition and eventually archived.

Term:
Offered Fall Term

- ADIL-S410 Portfolio

Prerequisites:
ADIL-S401;

Credits:
3.00

Description:
This course creates the opportunity for concentrated exploration and experimentation within a student's preferred area of illustration (or related art field), within a preferred illustration genre or market, involving the preferred subject matter, using the preferred media and format, for a preferred audience. Projects may involve self-generated content (creative writing, story treatment, clothing design, product design, etc.) or they may involve existing content. In the preceding semester, in Illustration Professional Practices, students develop a concise written project outline. This requires the approval of both instructors (Illustration Professional Practices and Illustration Portfolio). Students work independently to create a focused body of artwork, which will hopefully form the basis of a student's professional portfolio. Work is evaluated in weekly group and individual critique sessions. All
students create a professional online portfolio for presentation of the final artwork and, at the conclusion of the semester, students choose either to produce a professional portfolio of printed samples or to participate in an exhibition of original artwork. Assessment of the artwork is based on conceptual and technical quality, originality, integrity, consistency, etc., and final grades reflect the quality of work, the online portfolio, the print portfolio or exhibition, as well as participation, process, productivity and professional demeanor. Offered in the Spring semester.

- **ADIL-S500 Illustration Directed Studio**

  **Prerequisites:**

  Instructor's Approval

  **Credits:**

  3.00

  **Description:**

  The student completes a directed study project, either studio (ADIL S500) or non-studio (ADIL 500), under the supervision of an Illustration faculty member. All Directed Studio request forms must be accompanied by a written proposal and schedule and must be approved by the individual faculty member, the Illustration Program Director, and the NESADSU Chairman. Available every semester.

- **ALS-264 Introduction to Law and Legal System**

  **Credits:**

  4.00

  **Description:**

  Introduction to civil, criminal and constitutional law, with special focus on procedural law and the federal and state court systems. Limitations of the courts, forms of remedies, the law of equity and institutional sources of American law will also be studied. Introduction to judicial cases and brief writing. Normally offered each semester.

  **Type:**

  Social Science

- **ALS-266 Criminal Law**
This course examines criminal law in the United States from a broad perspective. It will present the general principles and doctrines that affect the whole criminal law, such as elements of criminal offenses, defenses to crime, and perspectives on crime and criminal law. In addition, students will learn the elements of specific crimes, such as homicide, criminal sexual conduct, terrorism and related crimes, crimes against public morals, and crimes against property. Discussions of the direction of the criminal law and constitutional limitations on government will be presented as preparation for future study.

Type:
Cultural Diversity Opt A

- **ALS-360 Fundamentals of Paralegal Practice**

  Credits:
  4.00

  Description:
  Introduces the student to the responsibilities of paralegals and to the culture of the legal profession. Topics include the development of paralegalism as a profession, the definition of the practice of law, ethical considerations, interviewing techniques, legal research, law office management, and client relationships. Normally offered each semester.

- **ALS-361 Legal Research & Writing I**

  Credits:
  4.00

  Description:
  How to use the law library, perform legal research, write legal analysis in memorandum form, and use computers as a research tool. Initial focus is on learning how to find legal materials, including federal and state case law, statutory law, and administrative law. Use of finding tools such as digests, encyclopedias, and CALR will be studied, as will Sheparding. Focus also on legal writing, from letters through case analysis. Normally offered fall semester. Sophomore Status Required
• **ALS-362 Civil Litigation**

  Credits: 4.00

  Description:
  The Rules of Civil Procedure dictate the steps taken in state and federal lawsuits. This course will acquaint students with rules and the practical requirements of the rules, from filing a complaint to clarifying a judgment and to the duties of paralegals in a litigation office. Normally offered each semester.

  Type:
  Social Science

• **ALS-363 Law of Contracts**

  Credits: 4.00

  Description:
  The existence and validity of a contract is determined by specific rules. Students will learn about formation through offer and acceptance, contract enforceability, the necessity of consideration, and breach of contract and will draft contract provisions as a paralegal might in a law office. Normally offered each semester. Sophomore status required.

  Type:
  Social Science

• **ALS-365 Wills and Probate**

  Prerequisites:
  Take ALS-264 or ALS-360 or Instructor's permission

  Credits:
State laws affect the disposition of an individual's estate at death, and upon death, the estate must be probated in court. Focus on estate information gathering, drafting of wills, and the probate of estates for those with and without wills. Emphasis on the role of the paralegal in a law office handling wills and probate. Prerequisites: ALS 360 or 363 or permission of instructor. 1 term - 4 credits. Normally offered yearly.

- **ALS-366 Corporate Law**

  Prerequisites:

  Take ALS-264 or ALS-360 or instructor's permission

  Credits:

  4.00

  Description:

  Corporations are unique business entities and specialized citizens of the state. This course will examine the special rules for establishing and maintaining a corporation, including the nature of corporations and their legal relationships with governments, individuals, and other business entities. Students will learn about the role of paralegals in corporate law offices, including document management and production, corporate litigation processes, and maintaining corporate compliance. Normally offered alternate years.

- **ALS-368 Real Estate Law**

  Prerequisites:

  Take ALS-264 or ALS-360;

  Credits:

  4.00

  Description:

  This course will present common law real estate principles and the effect of federal agencies on the buying and selling of real property. Sample forms including leases, purchase and sale agreements, and closing forms are reviewed and drafted. Normally offered alternate years.
• ALS-369 Family Law
   Prerequisites:
   Take ALS-264 or ALS-360;
   Credits:
   4.00
   Description:
   Family law includes marriage, divorce, support, custody, property division, and abuse prevention petitions. Essentially an area of state law, it is often the backbone of general practice law firms. The role of paralegals in a family law office will be studied. Normally offered yearly.

• ALS-374 Torts: Personal Injury Law
   Prerequisites:
   Take ALS-362;
   Credits:
   4.00
   Description:
   Many civil suits arise when the negligence of an individual creates injury to another. Elements of negligence law and specific types of cases such as automobile accidents and medical malpractice will be studied, with an emphasis on practical aspects of drafting and research for the prospective paralegal. Normally offered yearly.

• ALS-375 Technology and the Law
   Prerequisites:
   Take ALS-362
   Credits:
   4.00
The role of computers and software in the law office as it affects the paralegal. Lectures and hands-on applications will focus on the changing technology of computer hardware through fact scenarios that students will use to track changes from introduction to resolution in litigation. Focus on software applications involving word processing, spreadsheets, billing, diary and scheduling, research, and use of the Internet. Normally offered alternate years.

- **ALS-377 Pol of Regulation, Product Liability Litigation & Tort Reform**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  The law dictates that corporations, arguably the most influential institutions of our time, can have only one goal: to maximize profits for their shareholders. Corporations have no general legal or moral obligation to the well-being of society or individual consumers. This means that, if corporations are to be restrained from maximizing profit by harming the public good, they must be regulated. When regulation fails, and dangerous products make it into the marketplace, consumers who are harmed can bring product liability lawsuits. Despite these facts, massive deregulation has occurred in the U.S. and tort reform threatens the ability of consumers to bring product liability lawsuits. Using the food and tobacco industries as case studies, we will examine the history of deregulation and tort reform and answer the following question: How can law and government be used to protect society and consumers by regulating a system programmed to ignore the welfare of everyone except shareholders?

- **ALS-378 Advanced Litigation & Trial Practice**
  
  **Prerequisites:**
  
  ALS 362, or permission of instructor
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Building on the skills introduced in ALS 362, Civil Litigation, this course will provide a thorough study of the rules of evidence, the process of discovery, and the preparation of a case for a trial, as well as the roles of arbitration, mediation, and negotiation in litigation and other legal disputes. Theory will be combined with practical applications for prospective paralegals, such as deposition abstracting, gathering and preserving evidence, and techniques on how to prepare a case for ADR. Normally offered yearly.
- **ALS-381 Paralegal Internship**

  **Prerequisites:**
  
  Senior standing and at least 15 hours of paralegal courses, or instructor's permission.

  **Credits:**
  
  4.00

  **Description:**
  
  A one-semester internship in either a law office, a governmental agency, insurance company, or a for-profit or non-profit corporation, depending on the positions available during each semester. Once a week seminars will discuss such topics as ethical considerations in a law office, experiences gained as a paralegal interns, and seeking paralegal employment. For specific placements/information, students must contact the Director of Paralegal Studies prior to the start of each semester. Prerequisites: Senior status and at least 15 hours of Paralegal Studies or permission of instructor. 1 term - 4 credits. Normally offered spring and summer. ECR

  **Type:**

  Expanded Classroom Requirement

- **ALS-383 Immigration Law**

  **Prerequisites:**
  
  Take ALS-264 or ALS-360;

  **Credits:**
  
  4.00

  **Description:**
  
  Study of the immigration and nationality laws of the United States focusing on the interplay of the administrative agencies which administer those laws: Justice Department, Labor Department, and State Department. Topics include the immigrant selection system; the issuance of non-immigrant visas; grounds for excluding aliens and waiver of excludability; grounds for removal; change of status, and refugee and asylum status. Special emphasis on the paralegal's role in representing and communicating sensitively with aliens. Normally offered yearly.

- **ALS-384 Intellectual Property**
Prerequisites:
Take ALS-264 or ALS-360;

Credits:
4.00

Description:
A survey of the law of the protection of ideas, trade secrets, inventions, artistic creations, and reputation. The course will briefly review the bases for patent, trademark, copyright and trade secret protection, the distinction among the various forms of intellectual property, and the statutory and common law methods of enforcing rights. Normally offered yearly.

- **ALS-385 Legal Research & Writing II**

  Prerequisites:
  Take ALS-361;

  Credits:
  4.00

  Description:
  Building on the skills in ALS 361 - Legal Research & Writing I, this course continues the focus on learning how to find legal materials and how to summarize research results. Writing skills will be strengthened through various exercises and revisions. Skill development in legal analysis, writing legal memoranda, and using computer assisted legal research with Westlaw and Lexis will be emphasized. Normally offered spring semester.

- **ALS-390 Employment & Labor Law**

  Prerequisites:
  Take ALS-264 or ALS-360; or instructor's permission

  Credits:
  4.00

  Description:
The nature of the employment relationship and an overview of constitutional and federal statutory provisions that affect the employment relationship will be studied. Particular emphasis on the Civil Rights Act, the Age Discrimination in Employment Act, and the Americans with Disabilities Act. Statutory provisions regarding benefits and employment-related entitlements will also be studied. Normally offered yearly.

**ALS-391 Domestic Violence, Abuse & Neglect**

**Prerequisites:**
Take ALS-264 or ALS-360; or instructor's permission

**Credits:**
4.00

**Description:**
An opportunity to learn the history of domestic violence including battering, child abuse and child neglect, and the legal response to it. Focus will be on Massachusetts Law and its response, especially the Abuse Prevention Act, its application and enforcement, and on laws protecting children from abuse and neglect. Filings, law office issues and special issues in dealing with battered women and abused and neglected children will be included with the psychological issues, cultural issues, and advocacy possibilities. Normally offered yearly. Sophomore status required. Cultural Diversity A

**Type:**
Cultural Diversity Opt A

**ALS-396 International Law**

**Prerequisites:**
Take ALS-264 or ALS-360 or instructor's permission

**Credits:**
4.00

**Description:**
With the globalization of the world economy, legal professional and business people require knowledge of international law more than ever. This course offers students a survey of selected materials in public international law. Covered will be the practical and theoretical issues of international law, from the Law of the Sea to business implications to definitions of war and international concepts of justice. Normally offered yearly.
• **ALS-510 Independent Study**

  **Prerequisites:**
  Instructor’s consent required

  **Credits:**
  1.00-4.00

  **Description:**
  Individual program of reading and research on an approved topic under the supervision of a member of the department. Only for qualified juniors or seniors. Offered every semester.

• **AMST-111 Defining America and Americans**

  **Credits:**
  4.00

  **Description:**
  This course will examine artistic, social, and political imaginings of America and Americans. We will read works by American and foreign observers of the United States to ask how Americans define themselves and how others see them. Course assignments will introduce students to themes, perspectives, and methods in the field of American Studies.

  **Type:**
  Humanities & History, Humanities Literature Requirement
AMST-313 American Renaissance: Emerson And His Contemporaries
Credits:
4.00
Description:
Readings from Emerson and other American Renaissance writers, including Thoreau, Whitman, Hawthorne, Melville, William and Henry James, and Emily Dickinson, and examination of their intellectual congruence with pragmatism, modernism, and postmodernism. This is a seminar in American cultural, intellectual, political, and socioeconomic history which will examine the relationship between Ralph Waldo Emerson and other contemporary American 'cultural critics', as well as their relationship to the society from which they sprang and to the values of which they were, at the same time, giving enduring cultural formulation.

ARAB-101 Elementary Modern Standard Arabic
Credits:
4.00
Description:
Mastery of the Arabic alphabet and phonetics. Elementary formal grammar and the development of reading and writing skills. Conversation in the formal non-colloquial style. One language laboratory session per week. For students with no previous knowledge.

Term:
Offered Fall Term
Type:
BA FOREIGN

ARAB-102 Elementary Modern Arabic II
Prerequisites:
ARAB 101 or Instructor's consent
Credits:
Description:
Continuation of skills development from Arabic 101. One language laboratory session per week.

Term:
Offered Spring Term

Type:
BA FOREIGN

- ARAB-201 Intermediate Modern Standard Arabic I

Prerequisites:
ARAB 102 or permission of instructor.

Credits:
4.00

Description:
This course will apply the communicative approach to further develop proficiency in reading, writing, and speaking in Modern Standard Arabic. The class will also stress comprehension listening drills. Material will include authentic Arabic texts, print media, audios, and videos. Activities include conversation practice and brief discussions of topics related to Arab society and culture.

Term:
Offered Fall Term

Type:
BA FOREIGN

- ARAB-202 Intermediate Modern Standard Arabic II

Prerequisites:
ARAB 201 or Instructor's consent.

Credits:
4.00

Description:
Continuation of skills development from ARAB 201.

Term:
Offered Spring Term

Type:
BA FOREIGN

- ARAB-501 Directed Studies in Arabic Culture

Prerequisites:
REQUIRES INSTRUCTOR'S CONSENT

Credits:
4.00

Description:
The subject of this course is the Arab Cultural History. The approach will be one which sees Arab culture as the system of shared ideas, attitudes, values, perceptions and meanings, explicit and implicit, which Arabs use to interpret the world and which serve to pattern their behavior. This approach of Arab cultural history encompasses a range of facets reaching from the most mundane aspects of their lives to the most transcendent of thoughts and aspirations. It includes an understanding of their art, literature, and history of a society, but also less tangible aspects such as attitudes, prejudices, folklore and so forth. This endeavor seeks to embrace and comprehend the complexity of Arab culture and to recount its history - from its pre-Islamic genesis (roughly the 520s A. D.) until the present - through a broad and wide-ranging presentation of Arab literature.

Term:
Occasional
• **ARAB-510 Independent Study**

  Prerequisites:

  An independent study form must be submitted to the CAS Dean's Office.

  Credits:

  4.00

  Description:

  Term:

  Occasional

  Type:

  BA FOREIGN

• **ARH-101 Art History I**

  Credits:

  4.00

  Description:

  A survey of the art of western civilization from prehistoric caves to the cathedrals of the Middle Ages. Works of painting, sculpture, and architecture are presented in their historical context. Course covers Egyptian, Ancient Near Eastern, Greek, Roman, early Islamic, Byzantine, Romanesque, and Gothic.

  Term:

  Offered Both Fall and Spring
- ARH-102 Art History II

  Credits:  
  4.00

  Description: 
  A survey of the art of Europe and America from the Renaissance to the present. Works of painting, sculpture, and architecture are presented in their historical context. Course covers the Renaissance, Baroque, Rococo, Neoclassicism, Romanticism, Realism, Impressionism, Post-Impressionism, Cubism, Surrealism, Abstract Expressionism, Pop, and Post-Modernism.

  Term: 
  Offered Both Fall and Spring

- ARH-305 Art of Greece and Rome

  Credits:  
  4.00

  Description: 
  An examination of the civic, religious, and domestic art and architecture of the Ancient Mediterranean cultures of Greece and Rome. Temples, forums, basilicas, city planning, sculpture, pottery, wall painting, mosaics, and engineering achievements will be examined in their cultural contexts.

  Term: 
  Occasional
- **ARH-306 Art of the Middle Ages**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Religious and secular painting, sculpture and architecture and the minor arts in the context of medieval civilization. Examples of mosaic, ivory carvings, manuscript illumination, enamel work, stained glass, altarpieces, fresco painting, basilica churches, monasteries, and cathedrals from early Christian, Byzantine, Barbarian, Carolingian, Ottonian, Romanesque, and Gothic periods included.

  **Term:**
  
  Occasional
  
  **Type:**
  
  BFA Humanities Requirement, Humanities & History, Humanities Literature Requirement

- **ARH-307 Art of the Italian Renaissance**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Painting, sculpture and architecture of the 14th, 15th, and 16th centuries in Italy viewed in their cultural context. Issues covered include the search for ideal form, the tools of realism, changes in patronage, and the development of portraiture. Artists include Giotto, Masaccio, Donatello, Leonardo da Vinci, Raphael, Michelangelo, and Titian.

  **Term:**
  
  Occasional
  
  **Type:**
  
  BFA Humanities Requirement, Humanities & History, Humanities Literature Requirement
• **ARH-308 Art of the Baroque & Rococo**

  **Credits:**
  4.00

  **Description:**
  A study of 17th and 18th century painting, sculpture and architecture in Italy, Spain and Northern Europe. Artists include Rembrandt, Rubens, Caravaggio, Bernini, Poussin, Velasquez, Watteau, Boucher, Fragonard, Chardin, and Hogarth.

  **Term:**
  Occasional

  **Type:**
  BFA Humanities Requirement, Humanities & History, Humanities Literature Requirement

• **ARH-309 Art of the 19th Century**

  **Credits:**
  4.00

  **Description:**
  A study of Neoclassicism, Romanticism, Realism, Landscape painting and Impressionism in European painting. Artists include David, Ingres, Friedrich, Constable, Delacroix, Goya, Courbet, Millet, Daumier, Manet, Monet, Renoir, Degas, and Cassatt.

  **Term:**
  Occasional

  **Type:**
  BFA Humanities Requirement, Humanities & History, Humanities Literature Requirement

• **ARH-310 Modernism in Art**
A study of European painting and sculpture from around 1880 to 1940, including Symbolism, Post-Impressionism, Fauvism, Expressionism, Cubism, Futurism, Suprematism, Constructivism, De Stijl, The Bauhaus, Dada and Surrealism. Artists include Gauguin, Cezanne, Van Gogh, Matisse, Kandinsky, Picasso, Braque, Malevich, Mondrian, Duchamp, Masson, Magritte, Dali and Ernst. Normally offered alternate years.

Type:

BFA Humanities Requirement, Humanities & History, Humanities Literature Requirement

• ARH-311 American Art

Credits:

4.00

Description:

A study of American painting, sculpture, photography and architecture from the colonial period through WWII. Artists include the Freake limner, Smibert, Copley, West, Stuart, Jefferson, Whistler, Sargent, Eakins, Homer, Ryder, Bierstadt, Cole Church, Bingham, Lane, Hosmer, Inness, Sloan, Sullivan, Wright, Hopper, Sheeler, Davis, Shahn, O'Keefe, Dove, Hartley, Marin, Bellows, Riis, Hine, Stieglitz, Strand, Weston, Steichen and Lange.

Term:

Occasional

Type:

BFA Humanities Requirement, Humanities & History, Humanities Literature Requirement

• ARH-312 Art of the Northern Renaissance

Credits:

4.00

Description:
Painting, sculpture, and architecture of the 14th, 15th and 16th centuries in Northern Europe, viewed in their historical context. Issues included the invention of oil painting, the development of woodcut and engraving, the effect of the Reformation on art, and the relationship to the Renaissance in Italy. Artists include van Eyck, Durer and Brueghel.

Term:
Occasional

Type:
BFA Humanities Requirement, Humanities & History, Humanities Literature Requirement

• ARH-315 Modernism and Spanish Masters

Credits:
4.00

Description:
This course examines the Spanish contributions to Modern art with a specific concentration on the Spanish masters Goya, Picasso, Dali and Miro. Through these artists, the course will explore one of the most controversial periods of Spanish and European history, from the 19th through the dawn of the 20th century. The course is offered only at Suffolk's Madrid campus. Students will take advantage of the rich cultural offerings of the city by making frequent visits to the Prado, Thyssen and Reina Sofia museums. (Taught in Madrid)

Term:
Occasional

Type:
Humanities Literature Requirement, Humanities & History

• ARH-316 Contemporary Art

Credits:
4.00

Description:

Term:
Occasional

Type:
BFA Humanities Requirement, Humanities & History, Humanities Literature Requirement

- ARH-318 Art and Museums Today

Credits:
4.00

Description:
This course examines the art world of the past 20 or so years with special attention to the roles and exhibition practices of contemporary art museums and galleries. Questions addressed will include: Who are the major artists and what are the major trends in today's art world? What civic and educational roles have museums played historically, and what are their roles today? How do different approaches to exhibit display and interpretation fulfill those roles? Class visits and assignments at the Boston Institute of Contemporary Art (ICA) and other local venues will examine these issues in practical application. This course fulfills the ECR requirement.

Term:
Offered Fall Term

Type:
Expanded Classroom Requirement, Humanities & History, Humanities Literature Requirement

- ARH-320 Visual Culture of New England

Credits:
4.00
Description:
This course explores the rich cultural heritage of New England from the late seventeenth century to the early decades of the twentieth. Particular attention will be paid to the role that New England and the city of Boston played within a national cultural context and in shaping our ideas of a distinctly New England aesthetic. One of the goals of this course is to explore the idea of the imagined and idealized New England, which has come to serve as a nostalgic symbol of America's past. Through an examination of paintings, sculpture, photography, architecture, and material culture, the class offers an in-depth look at the ways New England developed its distinctive character and personality, and how its visual culture has shaped the region.

Term:
Alternates Fall & Spring

Type:
Humanities Literature Requirement, Humanities & History

- **ARH-321 Women, Art & Society**

  Credits:
  4.00

  Description:
  This course covers women artists from the sixteenth century to the present as well as the new direction of art-historical scholarship developed by feminist art historians during recent decades.

  Term:
  Offered Spring Term

  Type:
  Cultural Diversity Opt A, Cultural Diversity Opt B, BFA Humanities Requirement, Cultural Diversity BFA

- **ARH-347 History of Photography**

  Credits:
  4.00
Description:

An introduction to the study of photographs. The history of the medium in Europe and America from its invention to the present. Lectures address photographic theory and methodology, and photographs are studied both as art objects and as historical artifacts. Topics include portraiture, documentary photography and photojournalism, Pictorialism and art photography, landscape photography, and issues of gender, race, identity, and the body.

Term:

Occasional

Type:

Humanities Literature Requirement, Humanities & History

- ARH-401 Special Topic: Seminar in Art

   Prerequisites:

   Permission of instructor needed

   Credits:

   4.00

   Description:

   Topic will vary from year to year.

   Term:

   Offered Spring Term

   Type:

   Humanities Literature Requirement, Humanities & History

- ARH-510 Independent Study

   Prerequisites:
An independent study form must be submitted to the CAS Dean's Office.

Credits:

1.00-4.00

Description:

Students meet with a departmental faculty member to pursue advanced studies in areas of particular interest to them.

Term:

Occasional

Type:

Humanities & History, Humanities Literature Requirement

• ART-01 Jumpstart Art

Credits:

0.00

Description:

This is a 10-week introduction to basic studio skills and concepts for Undecided majors who need to assemble an Admission's portfolio for the BFA program. The course is designed to support students and to ensure their success by focusing on studio course homework. Special topic presentations will enrich and challenge students' learning experiences. Undecided majors must take ART 01 concurrently with first semester Foundation studio courses.

Term:

Offered Both Fall and Spring

• ART-02 Pre-College

Credits:

0.00
Intended for high school students and recent high school graduates. Normally offered summer semester.

- **ART-S209 Introduction to Drawing and Mixed Media**
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This course is an introduction to the fundamental principles of drawing using both traditional and experimental techniques. Media includes pencil, charcoal, pastels, oil pastels, image-transfer, and collage. This course is appropriate for beginners as well as more advanced students. Individual attention is given to students at various levels of ability and allows students to progress at their own pace. The lessons will be supplemented by lectures and visits to museums and galleries. Please note: This is a 3-credit studio course.
  
  **Term:**
  
  Offered Both Fall and Spring

- **ART-S211 Introduction to Painting**
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This introductory course is designed to encourage students with little or no knowledge of the use of various painting processes. The basic elements of painting are introduced in exercises enhanced by demonstrations and gallery visits. Students can choose to work with various painting mediums including oil, acrylic, or watercolor. Creative work is encouraged in a relaxed atmosphere where individual attention is given to students at various levels of ability. Please note: This is a 3-credit studio course.
  
  **Term:**
  
  Offered Both Fall and Spring

- **ART-S216 Italy: Image Making**
This studio based elective course includes painting from observation, image capture in photography, image manipulation in Photoshop, photo transfer and cross over techniques with hand manipulated materials while giving students a study abroad, create and cultural experience in Italy.

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**

  **Credits:**
  4.00

  **Description:**

  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

  **Term:**
  Offered Fall Term

  **Type:**
  Asian Studies, Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement

- **AS-210 Traditional Chinese Society From 1800 to 1949**

  **Credits:**
  4.00

  **Description:**

  This course focuses on traditional Chinese society from 1800 to 1949, taking up such areas as family and kinship, social mobility, education, economic and social differentiation, community and social life, and popular belief. Examining the practices and ideologies underlying each area will enhance our understanding of the nature of traditional Chinese society, and help explain how elements of Chinese traditional culture contribute to modern Chinese identity and everyday life.
- **AS-220 Chinese Food in America**

  **Credits:**
  
  4.00

  **Description:**
  
  There are more Chinese restaurants in the U.S. than MacDonald's, Burger Kings and KFC'S combined. This course examines the unique American phenomenon of Chinese food from a historical and anthropological viewpoint. Students will gain a better appreciation and understanding of the subject through the course and will probably never look at local Chinese takeout the same way afterwards.

- **AS-500 Asian American Community Experience**

  **Credits:**
  
  4.00

  **Description:**
  
  This course facilitates students' exposure to Asian American communities and enhances their knowledge of diverse Asian cultures through research projects and service activities or an internship. Students will study under the guidance of the Director of the Major program and/or a faculty member as well as work with a community organization or service agency for a semester. They will engage in specific projects or an internship in collaboration with the assigned organization or agency to understand the cultural values and current issues relating to Asian populations. They will complete required hours as per the arrangement with the site and submit a comprehensive service/research report on their learning process and critical reflection of their experience at the end of the semester.

  **Term:**
  
  Offered Both Fall and Spring

  **Type:**
  
  Expanded Classroom Requirement
• **AS-510 Independent Study**

  **Credits:**

  1.00-4.00

  **Description:**

  To maintain level of proficiency in Japanese language and writing, including Chinese characters (Kanji) which are used in contemporary language.

• **ASL-101 Elementary American Sign Language I**

  **Credits:**

  4.00

  **Description:**

  Introductory course for nonnative signers. Emphasis on receptive skills, vocabulary, and grammar. Introduction to issues important to the Deaf community. One language laboratory session per week.

  **Term:**

  Offered Fall Term

  **Type:**

  Cultural Diversity Opt A,BA FOREIGN

• **ASL-102 Elementary American Sign Language II**

  **Prerequisites:**

  ASL 101

  **Credits:**

  4.00

  **Description:**
Continuation of ASL 101. Patterns of lexical and grammatical structure reviewed and extended. Additional materials on the Deaf community and its culture. One language laboratory session per week.

Term:
Offered Spring Term

Type:
Cultural Diversity Opt A, BA FOREIGN

- **BIO-101 Principles of Biology I**
  
  Prerequisites:
  
  Must take BIO L101 concurrently
  
  Credits:
  
  3.00
  
  Description:
  
  An introductory course in basic concepts in cell biology, and genetics. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology. Not recommended for those interested in health careers.
  
  Term:
  Offered Fall Term
  
  Type:
  NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- **BIO-L101 Principles of Biology I Lab**
  
  Prerequisites:
  
  Must take BIO 101 concurrently
  
  Credits:
Description:
A series of experiments and explanations to study the principles of diffusion, enzyme function, cell division, genetics and evolution. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology.

Term:
Offered Fall Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- BIO-102 Principles of Biology II

Prerequisites:
BIO L102 must be taken concurrently

Credits:
3.00

Description:
Investigations of relationships among organisms in time and space. Evolution, diversity, and human biology in the context of contemporary society. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology.

Term:
Offered Spring Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- BIO-L102 Principles of Biology II Lab

Prerequisites:
BIO 102 must be taken concurrently

Credits:
1.00

Description:
Exercises and field trips designed to complement and demonstrate the principles developed in the lecture section. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology.

Term:
Offered Spring Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **BIO-104 Environmental Biology**

Prerequisites:
BIO 101 and BIO L101, can also be taken concurrently BIO L104 must be taken concurrently

Credits:
3.00

Description:
An introduction to basic evolutionary, behavioral and ecological principles. Readings and discussions emphasize the ways that humans are affected by ecological processes and principles as well as how humans and their technology affect ecosystems. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology. It is intended for non-biology majors as a follow-up to Biology 101. 3 hours lecture. Days Only. Madrid Campus only.

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **BIO-L104 Environmental Bio Lab**
Prerequisites:
BIO-104 must be taken concurrently

Credits:
1.00

Description:
Exercises and field trips designed to complement and demonstrate the ecological principles developed in the lecture section. The lab emphasizes the scientific method and employs long term group projects. Madrid Campus only.

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

BIO-105 Humans and the Evolutionary Perspective

Prerequisites:
This is for Non- Majors Only

Credits:
4.00

Description:
Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

Term:
Occasional

Type:
NATURAL SCIENCE FOR BA BFA & BSJ
BIO-106 Current Topics in Human Biology And Health

Prerequisites:
Non- Majors only

Credits:
4.00

Description:
Familiarize students with current trends in human biology and health. The technical and scientific aspects, along with ethical issues involved with the new frontiers in human health and biology research will be covered. Topics will include: cell biology, cancer biology, infectious disease and environmental health issues. In addition to exams and class discussion, students will be required to give a 10-minute presentation on a related topic of their choice. Meets one of the non laboratory science requirements for the non-science major. This course will not fulfill requirements for a major or a minor in Biology. Usually offered alternate Spring Semester

Term:
Occasional

Type:
NATURAL SCIENCE FOR BA BFA & BSJ

BIO-109 Plants and People

Credits:
4.00

Description:
This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.

Type:
• **BIO-111 Introduction to the Cell**

  Prerequisites:

  Must take BIO L111 concurrently

  Credits:

  3.00

  Description:

  Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student. Fall Offering: Science Majors ONLY; Spring Offering: Biology Majors ONLY.

  Term:

  Offered Both Fall and Spring

• **BIO-L111 Introduction to the Cell Laboratory**

  Prerequisites:

  Concurrently with BIO 111

  Credits:

  1.00

  Description:

  Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation. Fall Offerings: Science Majors Only; Spring Offerings: Biology Majors Only.

  Term:

  Offered Both Fall and Spring
• **BIO-114 Organismal Biology**

  **Prerequisites:**

  Must take BIO L114 concurrently. Science majors only.

  **Credits:**

  3.00

  **Description:**

  Introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. Only when offered in Fall participation in the annual October (Columbus Day Weekend) field trip to the Friedman Field Station is mandatory (a small fee is associated with this trip). Fall Offering: Biology Majors Only; Spring Offering: Science Majors. ECR credit is only earned during the Fall offering.

  **Term:**

  Offered Both Fall and Spring

• **BIO-L114 Organismal Biology Laboratory**

  **Prerequisites:**

  Must take BIO 114 concurrently Science majors only.

  **Credits:**

  1.00

  **Description:**

  A series of laboratory experiences in evolution, diversity, anatomy and physiology. Fall Offering: Biology Majors Only; Spring offering: Science Majors Only.

  **Term:**

  Offered Both Fall and Spring
- **BIO-201 Five Big Questions in Biology**

  **Prerequisites:**
  
sophomore status or above

  **Credits:**
  
4.00

  **Description:**
  
This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

- **BIO-203 Anatomy and Physiology I**

  **Prerequisites:**
  
BIO L203 MUST BE TAKEN CONCURRENTLY BIO 111, BIO L111.

  **Credits:**
  
3.00

  **Description:**
  
First part of a systematic survey of the structure and functional inter-relations of the organ systems of the human body. This course includes histology and discussion of the integumentary, skeletal, muscular, and nervous systems. Medical terminology will be used.

  **Term:**
  
Offered Fall Term

- **BIO-L203 Anatomy & Physiology Lab I**

  **Prerequisites:**
  
Must take BIO-203 concurrently
A study of the human skeletal system and a comparative look at other organ systems involving observation of anatomical models and dissection of mammalian specimens. Also includes computer simulations of physiological processes.

Term:
Offered Fall Term

- **BIO-204 Anatomy and Physiology II**

  **Prerequisites:**

  BIO 203, BIO L203, BIO L204 must be taken concurrently; By permission of the professor only.

  **Credits:**

  3.00

  **Description:**

  Conclusion of the survey of the structure and function of inter-relations of the organ systems of the human body. This course investigates the endocrine, circulatory, respiratory, immunity, digestive, urinary, and reproductive systems. Medical terminology will be used.

  **Term:**

  Offered Spring Term

- **BIO-L204 Anatomy & Physiology Lab II**

  **Prerequisites:**

  BIO 203/L203 and BIO 204 must be taken concurrently; By permission of the professor only.

  **Credits:**

  1.00
A study of the human viscera using anatomical models and dissection of mammalian specimens. Also includes microscopy of tissues.

Term:
Offered Spring Term

**BIO-213 Bio-Ethical Issues**

Prerequisites:
BIO 111 or BIO 114

Credits:
4.00

Description:
An introduction to ethical issues raised by advances in the biosciences and biotechnology. Topics include genetically modified organisms, reproductive technologies, genetic screening and privacy issues, therapeutic cloning, human uses of animals, and environmental sustainability. This course will provide an introductory philosophical background to bioethics, surveying several major ethical theories. A general understanding of the biosciences will be presumed.

Term:
Offered Spring Term

**BIO-222 Field Botany**

Prerequisites:
BIO 111. This course will fulfill the Expanded Classroom Requirement.

Credits:
4.00

Description:
A three-week camping excursion, during which common tracheotypes, bryophytes, algae, and other photosynthetic organisms characteristic of various habits in Maine will be identified. Emphasis will be on plant ecology including species interactions and habitat requirements. Vertical zonation in mountains, lakes and intertidal areas will be a point of focus. Participants will camp for one week at each of three sites: Baxter State Park, Central Maine (near Augusta), and the Friedman Field Station. Travel will be by van(s) and hiking (up to ten miles a day) over difficult terrain. Sleeping bags and tents required. Additional fees: Camping and food est. $475.00. ECR. The three-week camping excursion typically runs from late May (after tradition Spring course finals are over) into June. Taught alternate years.

Term:
Offered Spring Term

Type:
Expanded Classroom Requirement

- **BIO-225 Plant Biology**

  **Prerequisites:**
  
  Bio 111, L111 and Bio 114, L114; Must be taken concurrently with L225.

  **Credits:**
  
  3.00

  **Description:**
  
  Course introduces students to the anatomy, physiology, systematics, ecology, and economic uses of all major groups of plants. Aspects of the biology of nonvascular, non-seed, gymnosperm, and angiosperm plants are explored. An overview of Kingdom Fungi is also covered. Each student is required to do a 10-15 minute presentation to the class highlighting the economic use of a group of plants assigned by the instructor. Normally offered Spring semester.

  **Term:**
  
  Offered Spring Term

- **BIO-L225 Plant Biology Laboratory**

  **Prerequisites:**
Must be taken concurrently with Bio 225

Credits:
1.00

Description:
Lab exercises focus on plant anatomy, physiology, and systematics. Instruction in the identification of major plant families and fungal types is covered. Trips to a Boston area herbarium and botanical garden are required.

Term:
Offered Spring Term

• BIO-254 Marine Biology

Prerequisites:
BIO-114 and BIO-L114 or instructor's permission

Credits:
3.00

Description:
Introduction to the marine environment, its organisms and their specific adaptations. Emphasis on marine and estuarine ecology, intertidal habits, trophic relations, and physiology. Human impacts on the sea; fisheries, mariculture, pollution, law of the sea. Taught only at the R. S. Friedman Field Station Campus, Edmunds, ME. ECR. This course typically meets for three weeks from early to mid-August to early September (before typical Fall courses begin). Taught alternate years.

Term:
Offered Fall Term

Type:
Expanded Classroom Requirement

• BIO-L254 Marine Biology Lab
### BIO-254 Field Biology

**Prerequisites:**
- BIO-114 and BIO-L114 or instructor's permission
- Must Take BIO-254 Concurrently

**Credits:**
1.00

**Description:**
Field trips to local marine environments; field and laboratory observations of marine organisms. Independent student projects. Taught only at the R.S. Friedman Field Station Campus, Edmunds, ME. ECR

**Term:**
Offered Fall Term

**Type:**
Expanded Classroom Requirement

### BIO-262 Principles of Cell Culture

**Prerequisites:**
- BIO 111, L111 and BIO 114, L114 and CHEM 111, L111

**Credits:**
4.00

**Description:**
The course is designed as an application base educational experience that will allow students to learn the standard techniques associated with successful cell culture. As such, students are responsible for the maintenance, propagation, isolation, and preservation of their cells. A number of cell types and experimental manipulations of the cultures are investigated throughout the semester.

**Term:**
Offered Spring Term
• BIO-273 Biostatistics
Prerequisites:
BIO 111/L111

Credits:
4.00

Description:
Introduction to the application of statistical methods for the evaluation of biological problems. Sampling, confidence intervals, hypothesis tests, experimental design, analysis of variance, regression, and correlation are some of the topics offered.

Term:
Offered Spring Term

Type:
Quantitative Reasoning

• BIO-274 Genetics
Prerequisites:
BIO 111/L111, CHEM 111/L111, 'Must take BIO L274 concurrently

Credits:
3.00

Description:
An examination of the basic principles of genetics in eukaryotes and prokaryotes at the level of molecules, cells, and multicellular organisms, including humans. Topics include Mendelian and non-Mendelian inheritance, structure and function of chromosomes and genomes, biological variation resulting from recombination, mutation, and selection, and population genetics.

Term:
Offered Fall Term
• BIO-L274 Genetics Lab
  Prerequisites:
  Must be taken concurrently with BIO 274.
  Credits:
  1.00
  Description:
  Experiments designed to demonstrate principles presented in lecture, using a range of genetic model organisms that include E. coli, B. subtilis, S. cerevisiae, D. melanogaster, S. fimicola, and C. elegans.
  Term:
  Offered Fall Term

• BIO-285 Microbiology
  Prerequisites:
  BIO-111 and BIO-L111,
  Credits:
  3.00
  Description:
  Viruses and bacteria are surveyed in terms of their ecology, biochemistry, taxonomy, molecular biology and control.
  Term:
  Offered Fall Term

• BIO-L285 Microbiology Laboratory
Prerequisites:
Must take BIO-285 concurrently

Credits:
1.00

Description:
Introduction to microbiological techniques and their applications to health, research and industry.

Term:
Offered Fall Term

- **BIO-302 Writing for Research**

  Prerequisites:
  Take BIO-111 and BIO-114. Take ENG-101 or ENG-102;

  Credits:
  4.00

  Description:
  Development of skills for writing clearly, concisely, and creatively in the style of scientific journals. This course emphasizes the formulation of a research project of the student's choice and leads to a formal manuscript on the topic. Instruction includes literature search methods and software for the graphical presentation of data. Required of all biology majors.

  Term:
  Offered Both Fall and Spring

- **BIO-304 Comparative Animal Physiology**

  Prerequisites:
  BIO-114, L114 and CHEM-211, L211, Must take BIO L304 concurrently
Mechanisms of physiological adaptations to environmental challenges are studied. Examples of gas exchange, osmoregulation, fluid transport, temperature regulation, nervous control, and movement are examined in various animal forms. Spring semester.

Term:

Offered Spring Term

- **BIO-L304 Comp Animal Physiology Lab**

  Prerequisites:
  
  BIO-304 must be taken concurrently

  Credits:

  1.00

  Description:

  Selected physiological processes and mechanisms or adaptation in invertebrate and vertebrate animals are examined by observation and controlled experiments.

- **BIO-315 Animal Behavior**

  Prerequisites:

  BIO 114

  Credits:

  4.00

  Description:
Surveys animal behavior in a range of species (invertebrates, birds, fish, mammals including humans) to assess similarities and differences in the evolution of behaviors and their physiological mechanisms by which individual organisms and species adapt to their environments. Topics include: predator evasion; mating systems; parental care; social behavior; and learning.

Term:

Offered Spring Term

- **BIO-333 Ecology**

Prerequisites:

BIO 114 and BIO L114; and BIO 222 or BIO 224 and BIO 224 or BIO 225 and L225

This course fulfills the Expanded Classroom Requirement

Credits:

3.00

Description:

Areas of study include but are not limited to basic principles of population biology, community ecology, trophic dynamics, ecosystem structure and function and evolutionary theory. (Note: some aspects of the course may differ depending on if it is a Boston or a FFS offering) ECR. Offered even years at both the Boston campus (Fall semester) and the R.S. Friedman Field Station Campus (FFS), Edmunds, ME (Early Fall offering for three weeks). There is a $475 camping fee associated with the FFS BIO 333 offering.

Term:

Offered Fall Term

Type:

Expanded Classroom Requirement

- **BIO-L333 Ecology Lab**

Prerequisites:

BIO 114 &L114, BIO 222 or 224 or 225. Must take BIO 333 concurrently. Fulfills Expanded Classroom Requirement

Credits:
Field and laboratory experiences in techniques and concepts relevant to lecture materials; data collecting and report preparation. Group project with data collection, presentation and report preparation is required. (note some aspects of the lab may differ depending on whether it is a Boston or a FFS offering) ECR

Term:
Offered Fall Term

- **BIO-337 Evolution**

  **Prerequisites:**
  Take BIO-111 BIO-L111 BIO-114 BIO-L114. BIO 274 recommended.

  **Credits:**
  4.00

  **Description:**
  A survey of evolutionary theory, exploring processes such as the genetic sources of variation, natural and sexual selection, and evolutionary developmental biology. Using phylogenetic systematics and other tools, we will demonstrate how these mechanisms result in the visible patterns of evolution. This is a reading and writing intensive course centered on close reading of Origin of the Species and discussion of recent peer-reviewed literature about evolution.

  Term:
  Offered Fall Term

- **BIO-343 Biodiversity & Conservation Biology**

  **Prerequisites:**
  BIO 114, L114; BIO L343 MUST BE TAKEN CONCURRENTLY

  **Credits:**
Description:

The origin, measurement, and extent of biological diversity on Earth, its practical and theoretical importance, and current trends in extinction due to human activities. Anthropogenic influences on individuals, populations, and ecosystems will be considered, as well as strategies for biological conservation on a changing planet.

Term:

Offered Fall Term

**BIO-L343 Biodiversity & Conservation Biology Laboratory**

Prerequisites:

BIO-114 and BIO-L114; and must take BIO-343 concurrently

Credits:

1.00

Description:

Laboratory exercises dealing with the calculation of Biodiversity in the environment, as well as with the effects of contaminants on individuals, populations, and model ecosystems. The fates of contaminants in such systems will be explored, as well as the possibility of remediation of adverse effects.

Term:

Offered Fall Term

**BIO-345 The Biology of Vector Borne Diseases**

Prerequisites:

BIO 114 and BIO L114. Science Majors only.

Credits:

4.00
A survey of the occurrence, life history and pathogenicity of the most important arthropod-borne, human diseases both internationally (malaria, dengue, plague, trypanosomiasis, yellow fever, etc.) and within the United States (Lyme disease, EEE, West Nile Virus, and others). Demographic and environmental factors leading to the re-emergence and spread of these diseases will be considered.

**BIO-350 Vertebrate Biology**

**Prerequisites:**

BIO-111, BIO-L111, BIO-114, BIO-L114;

**Credits:**

3.00

**Description:**

This class will focus on the form and function of vertebrate animals from an evolutionary standpoint. The adaptations of major groups will be discussed in light of their phylogenetic history and ecology. A discussion of major adaptive radiations and abiotic factors that influenced these trends will also be highlighted.

**Term:**

Occasional

**BIO-L350 Vertebrate Biology Lab**

**Prerequisites:**

BIO-111, BIO-L111, BIO-114, BIO-L114;

**Credits:**

1.00

**Description:**

This lab will focus on the comparative anatomy of vertebrate animals. In-depth dissections will be the focus of the laboratory exercises. A Squalus shark, a Necturus salamander, a pigeon, and a mink will be examined in detail.
- **BIO-357 Biology of Fishes**

  **Prerequisites:**

  BIO 114/L114, and Junior standing. Requires permission from Marine Sciences Coordinator.

  **Credits:**

  3.00

  **Description:**

  The evolution, systematics, anatomy, physiology and behavior of freshwater, marine and anadromous fishes from temperate to tropical environments. The interactions of fish in their environments, including predator-prey relationships, host-symbiont interactions, and fish as herbivores. Taken with permission from the Marine Science Consortium Coordinator. [This is a Marine Science Consortium Course and enrollment is limited] Evenings only:

  Term:

  Occasional

  Offered Spring Term

- **BIO-374 Genomics**

  **Prerequisites:**

  BIO 111/L111, CHEM 111/L111, BIO 274/L274 Must take BIO L374 concurrently

  **Credits:**

  3.00

  **Description:**

  What can we learn from genomics? In this course, you will develop an understanding of how cutting edge techniques from biotechnology are changing our views of biology. You will learn how genetic sequencing can be used for everything from tracing evolutionary histories in the tree of life to shedding light on biodiversity patterns of populations. With a focus on human genetics, you will also explore how genes are discovered and linked to phenotypic
traits. Finally, you will consider methods of monitoring gene expression and how the resulting genetic networks can help medicine and drug development.

- **BIO-L374 Genomics Laboratory**
  
  Prerequisites:
  
  BIO 111/L111, CHEM 111/L111, BIO 274/L274 Must take BIO 374 concurrently
  
  Credits:
  
  1.00
  
  Description:
  
  In this course, you will develop an understanding of current genomic methods through collection and examination of your own data. In the first part of the lab, you will use sequencing techniques to compare genetic relationships and characterize the microbial biodiversity of a population. In the second part of the lab, you will focus on gene expression and functional genomics. You will determine the actions of a transcription factor through RNA-seq and also determine how a collection of uncharacterized transcription factors affect antibiotic sensitivity. In addition to reading primary literature and keeping a lab notebook, you will also learn how to analyze and present your genomics data.

- **BIO-377 Immunology**
  
  Prerequisites:
  
  BIO 114, L114 and CHEM 211, L211. Must take BIO L377 concurrently
  
  Credits:
  
  3.00
  
  Description:
  
  The concept of immunity, response to infection, structure of the immune system, biochemistry of immunoglobins, antigen-antibody interactions, allergy, immunological injury, lymphocyte subpopulations and cellular immunity, tolerance suppression and enhancement. Taught alternate/even years.

  Term:
  
  Offered Spring Term
• **BIO-L377 Immunology Laboratory**

  Prerequisites:
  
  BIO-377 must be taken concurrently
  
  Credits:
  
  1.00
  
  Description:
  
  Anatomy of the immune system, immunoglobin purification, hemagglutination, enzyme immunoassay. Immuno-chemistry, immunoelectrophoresis, gel precipitation assay.
  
  Term:
  
  Occasional

• **BIO-385 Advanced Microbiology**

  Prerequisites:
  
  BIO-285 and BIO-L285 BIO L385 must be taken concurrently
  
  Credits:
  
  3.00
  
  Description:
  
  Pathogenesis and host-parasite relationships; epidemiology and public health aspects of pathogenic microorganisms are stressed; molecular biology, applied and industrial microbiology. Current literature reviews. Taught alternate/odd years.
  
  Term:
  
  Offered Spring Term

• **BIO-L385 Advanced Microbiology Lab**

  Prerequisites:
BIO 285/L285; BIO 385 must be taken concurrently

Credits:
1.00

Description:
Isolation, quantization and cultivation of microorganisms, advanced general and applied microbiology and molecular biology. Experience in media, chemical and culture preparations.

Term:
Offered Spring Term

• BIO-403 Cell Biology

Prerequisites:
BIO 111/L111 and CHEM 211/L211

Credits:
3.00

Description:
The study of cells, approached through examinations of biochemical mechanisms, the relation between the structure and function of biological molecules and organelles, and the regulation of normal and diseased cells.

Term:
Offered Fall Term

• BIO-L403 Cell Biology Lab

Prerequisites:
Take BIO-111 BIO-L111 CHEM-211 CHEM-L211; and must take BIO-403 concurrently

Credits:
Description:

Examination of biological molecules and their role in cell function. Techniques used in these examinations will include enzymatic analyses, gel electrophoresis, immunologic identification, chromatography, and spectroscopy. Students are expected to develop their proficiency in the laboratory techniques used, to analyze their results in a quantitative manner, and to present their findings.

Term:

Offered Fall Term

- **BIO-409 Biology Seminar**

  Prerequisites:
  
  BIO 202, Senior standing

  Credits:
  
  1.00

  Description:

  The purpose of this class is to familiarize all senior biology majors with the process of investigating and implementing novel research in the biological sciences. The centerpiece of the course is a semester long project in which each student selects, researches, and designs an original experiment on the topic of their choice. Two in-class presentations and a full length research proposal are required. Weekly reading assignments and discussions of the primary literature are vital to the investigation piece of the course. Prerequisites: BIO 202 and senior standing. May not be used for credit towards or an elective for the Biology Minor.

  Term:

  Offered Both Fall and Spring

- **BIO-474 Molecular Genetics**

  Prerequisites:

  Take CHEM-211 and CHEM-L211; Take CHEM-331 or BIO-274 and BIO-L274;

  Credits:
Description:

An examination of concepts and techniques of modern molecular biology. Topics include the structure and function of DNA, RNA, and proteins, the regulation of gene expression in prokaryotes and eukaryotes at transcriptional and post-transcriptional levels, genetic modification of organisms, and genome analysis. This course will incorporate readings and discussions of primary scientific literature. Spring semester.

Term:

Occasional

**BIO-L474 Molecular Genetics Lab**

Prerequisites:

Take CHEM-211 and CHEM-L211; Take CHEM-331 or BIO-274 and BIO-L274; BIO-474 must be taken concurrently;

Credits:

1.00

Description:

This upper level laboratory course will consist of a semester-long project in the form of a series of consecutive experiments involving the generation of a genetically modified organism and its subsequent molecular analysis. Techniques employed will include genetic screens, DNA isolation, restriction endonuclease analysis, transformation of bacteria, gel electrophoresis, gene reported assays, RNA isolation, reverse transcription, and quantitative PCR.

Term:

Occasional

**BIO-475 Developmental Biology**

Prerequisites:

BIO-114, L114 and CHEM-211, L211 BIO L475 must be taken concurrently

Credits:
An examination of the molecular, cellular, biochemical and environmental mechanisms that regulate the developmental processes in organisms with an emphasis on vertebrates. Topics include the processes of differentiation, determination, tissue induction and morphogenesis.

Term:
Offered Spring Term

**BIO-L475 Developmental Biology Lab**

Prerequisites:

BIO 114/L114, CHEM 211/L211 BIO 475 must be taken concurrently

Credits:

1.00

Description:

Laboratory includes the classic sequential study of developmental stages in the frog, pig and chicken using prepared slides. It also includes experimental manipulation of development in vertebrates and other organisms to a lesser degree. Prerequisite: BIO 202, BIO 114, BIO L114, CHEM 211, CHEM L211, Must take BIO 475 concurrently. 1 term - 1 credit.

Term:
Offered Spring Term

**BIO-510 Independent Study**

Prerequisites:

An independent study form must be submitted to the CAS Dean’s Office.

Credits:

1.00-5.00
Description:

Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A written proposal which must have majority approval of the Biology Faculty is required prior to enrolling. A paper and oral report are required. Only ONE independent study may be used toward biology electives.

Term:

Offered Both Fall and Spring

• **BLC-AIM Academic Improvement**

  Credits:

  0.00

  Description:

  Suffolk University is introducing the Academic Improvement Program (AIM), a new initiative to assist students who have experienced academic difficulty. Because your cumulative grade point average has fallen below the University's standard of 2.0 and as a condition of your probation status at the University, you will be required to participate in AIM. AIM provides support, strategies, and resources to help students take control of their academic life and succeed. AIM participants meet individually and in a small group format with trained instructors to target common areas in which students have difficulty. In addition, the instructors work with students to identify what areas they need to improve and to develop an individualized plan for success.

• **BLKST-100 Introduction to Black Studies I: Survey Of the Discipline**

  Credits:

  4.00

  Description:

  An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by Black Studies. It includes history, philosophy, psychology and other disciplines, as well as a conceptual framework for the investigation and analysis of Black history and culture.

  Term:

  Occasional
BLKST-101 Introduction to Black Studies II Research and Writing

Credits:
4.00

Description:
This course will provide an introduction to basic research techniques and methods including library use, identifying resources, project development, documenting sources, and writing research papers.

Term:
Occasional

Type:
Social Science

BLKST-160 Introduction to the Wolof Language

Credits:
4.00

Description:
This seminar will introduce students to Wolof, the dominant language in Senegal, West Africa. Students will learn about Senegalese culture while acquiring the basics of the language and developing beginning conversational skills.

Term:
Offered Spring Term

BLKST-169 African American Genealogy
This seminar will introduce students to resources and techniques in African American genealogy. During the seminar students will explore methods of applying genealogical research to the larger African American and American story by working on an African American genealogy project. Note: This course is identical to HST 169. Normally offered by request.

Term:
Occasional

Type:
Humanities & History

- **BLKST-250 Haiti, Guadalupe and Martinique**

  Credits:
  4.00

  Description:
  This course explores the rich intellectual tradition of Haiti, Guadeloupe, and Martinique by considering historical moments linked to colonialism, the abolition of slavery, the representation of gender, departmentalization, and decolonization through essays, films, poems, novels, and short stories by critics and writers from the 19th-21st centuries.

- **BLKST-263 Sabar: Music and Dance**

  Credits:
  4.00

  Description:
  Participants will be introduced to sabar music and dance of Senegal through a study of music, dance, language and history. Each area will be taught by professional practitioners of the sabar tradition to develop a sense of how music and dance are used in both traditional and popular contexts. This course will be directed by Prof. Robert A. Bellinger. Cultural Diversity B
• **BLKST-299 Busing in Boston- Moakley Archives**

  **Credits:**
  4.00

  **Description:**
  This is a research seminar designed to give students the opportunity to explore the rich yet difficult history of busing in Boston, and develop their research skills by using material on Boston's school desegregation in the Moakley archives. Research will be augmented by discussions with local figures who were involved in the events of the era. Class time will be divided between classroom meetings and work in the archives with the documents. Students will be responsible for a final project based on their work in the archives. This course is identical to HST 299. Normally offered by request.

• **BLKST-469 African Amer Life-Slave & Free**

  **Credits:**
  4.00

  **Description:**
  This class is designed to provide students with a deeper understanding of the reconstruction era by working with the microfilm of the Freedmen's Bureau papers. To accomplish this there will be a classroom component and an on-site component. In the classroom component, students will be introduced to the reconstruction era and its history. In the on-site component students will work with the microfilmed copies of the Freedmen's Bureau
Class meetings will be divided between the Suffolk University campus and the National Archives and Records Administration (NARA) site in Waltham, MA. This course is identical to HST 469. Normally offered as requested.

Term:
Occasional

Type:
Social Science

- **BLKST-510 Independent Study in Black Studies**

  Prerequisites:
  
  An independent study form must be submitted to the CAS Dean's Office.

  Credits:
  
  4.00

  Description:
  
  Independent study in Black Studies

- **CAS-109 Introduction to Law and Advocacy**

  Credits:
  
  2.00

  Description:
  
  This course examines the American legal system and the legal profession from the point of view of a legal practitioner. Gain an insider’s perspective on the organization of law, the law school experience, and life as an attorney. Students will engage in classroom work and discussion as well as visit various courthouses and legal institutions in the Boston area. This course does not fulfill core requirements.

- **CAS-H110 Fixing the World- Energy and Water: The Science of Solutions**
Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **CAS-H112 Decoding Boston: Signs and the City**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This interdisciplinary seminar will explore the buildings, monuments, sites, and signs around Boston from the point of view of Visual and Culture Studies. In addition to providing a compelling introduction to the history, major landmarks, and culture of the city, the seminar is specifically intended to improve students' visual literacy: that is, their awareness of their visual environment and their ability to critically analyze the rhetoric of the spaces, buildings, and images with which they are surrounded.

- **CAS-H113 The Vietnam and Iraq Wars: Polarized Perspectives**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement just? To what extent were the methods used by the United States military during each war just? To what extent did the media
play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit the enemies of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

- CAS-H201 So Honors: Monsters & Nightmares

  Credits: 4.00

  Description:

  Fairy tales don't teach that monsters exist, but that monsters can be killed (G.K. Chesterton). This course looks beyond monsters to the conditions that produce them. Readings include fairy tales and Dr. Jekyll and Mr. Hyde; we will also consider contemporary inventions of monsters (the Loch Ness monster, serial killers), and monsters figuring youthful anxieties in Buffy the Vampire Slayer and Smallville. Secondary materials include archetypal and psychoanalytic explorations of what monsters (and our defeat of them) may represent.

- CAS-H202 MyTwitterFacebookSpace: The Social Networking Revolution

  Prerequisites:

  CAS Honors Scholar students only

  Credits: 4.00

  Description:

  MyTwitterFacebookSpace explores the significance of social networking media on various facets of contemporary life. Topics of discussion include, but are not limited to, the influence of social networking media on identity formation, personal and professional relationships, globalization, social change, presidential politics, creativity, journalism, copyright law, privacy, commercialism, and the dissemination of knowledge. This course is not designed to celebrate the next generation of networked technology, but requires students to seriously consider the influence of emerging forms of communication on micro and macro levels of daily life. Revolutions in communication have a long history - from the development of writing and the printing press to the discovery of electronic and digital signals. These histories provide a foundation for understanding how communication revolutions come about, what they often promise, what they usually deliver, and how each technological leap is understood at the time and in hindsight by end users. Students will read texts on canonical theory and history in communication studies as well as cutting edge work from the discipline on convergence culture and knowledge communities. A core teaching tool of this course are the technologies under investigation. For example, students will conduct a privacy analysis of their Facebook profiles and write a reflection essay on how the content might be interpreted by friends, family, and future employers; the class will develop a Flickr photostream for documenting their first semester experience; and the class will participate in a weekly
blog about the course readings and develop an annotated wiki of additional readings. In keeping with the Seminar for Freshmen goal of encouraging students to explore Suffolk and Boston outside the classroom and to develop a sense community with peers and the instructor, several activities involve field trips and group projects. The writing expectations in this propose

- CAS-H203 The Rebirth of Tragedy: Rock Music 1968-1972

Prerequisites:

CAS Honors Scholar students only.

Credits:

4.00

Description:

Writhing, screaming, howling, moaning, androgynous, chemically-altered youths cavorting to pulsating music. Does this describe the Woodstock concert or an ancient Dionysian festival? Friedrich Nietzsche's book The Birth of Tragedy will provide a key for interpreting Bob Dylan, Mick Jagger, Janis Joplin, Jimi Hendrix, and Jim Morrison (and many others) in this intellectual analysis of the music of rock's golden age and the culture surrounding it.

- CAS-H204 Politics, Power and the Media

Credits:

4.00

Description:

Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of big government", and the concept of a liberal media.

- CAS-H205 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life
The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.

- **CAS-H207 The Boston Theatre Scene: the Inside Experience**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston’s many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

- **CAS-H208 Getting Over It: Dealing With the Aftermath of Group Conflict/Mass Atrocity**

  **Credits:**
  
  4.00
  
  **Description:**
  
  Once violent conflict between two groups has ended, what is the best way to transition back to normality coming to terms with the past or simply moving on? To answer these questions we will examine the debates surrounding war crime tribunals, truth commissions, lustration policies, and reparations in the second half of the 20th century. Case studies will include post-apartheid South Africa, post-WWII Germany, and the Israeli/Palestinian conflict. We will discuss the philosophical problems raised by each of these instruments, as well as on the political, legal, and practical difficulties their implementation present. Cultural Diversity B

- **CAS-H209 American Gothic: Edgar Allan Poe, Flannery O'Connor and Annie Proulx**
This literature seminar will study and compare the short stories of Edgar Allan Poe, Flannery O'Connor, and Annie Proulx. Beginning with Poe as the father of the short story genre in America and exploring his critical theory of the grotesque and arabesque, the class will examine the emergence of the gothic literary idiom as a classic American genre. Critical essays on the gothic aesthetic will be analyzed and film adaptations and documentaries will be viewed.

- CHEM-101 Chemical Concepts Contemporary Issues I
  
  Credits:
  3.00
  
  Description:
  Principles of chemistry with illustrations from everyday life. Basic chemical concepts are used to decode consumer product labels and form a basis for understanding contemporary issues. Specifically designed to satisfy the Science requirement when taken with CHEM 102, L101, L102. May not be used by science majors for science credit. Concurrent enrollment in CHEM L101 required. 3 hours lecture. 1 term - 3 credits. Normally offered Fall/Spring.
  
  Type:
  NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- CHEM-L101 Chemical Concepts Contemporary Issues Lab I
  
  Prerequisites:
  Must be taken concurrently with CHEM 101
  
  Credits:
  1.00
  
  Description:
Principles of chemistry and its applications demonstrated through experimentation. Experiments may include field testing and analysis of ocean and river water, testing of household products and sunscreens, determination of calorie content of foods, and molecular modeling with computers. May not be used by science majors for science credit. 2-hour laboratory. Normally offered Fall/Summer I.

**Type:**
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **CHEM-102 Chemical Concepts Contemporary Issues II**

  **Prerequisites:**
  It is strongly recommended that students enrolling in this course have some acquaintance of basic chemical principles either on the college or the pre-college level. Must be taken concurrently with CHEM L102

  **Credits:**
  3.00

  **Description:**
  A continuation of CHEM 101, including topics in organic chemistry, biochemistry, polymer chemistry, ecology, air and water pollution, food and food additives, pharmaceuticals, and forensic science. Basic Chemical concepts are used to decode consumer product labels and form a basis for understanding contemporary issues. Specifically designed to satisfy the science requirement. May not be used by science majors for science credit. Prerequisite: CHEM 101, CHEM 111 or pre-college chemistry. 3 hours lecture. Normally offered Spring/Summer II.

  **Type:**
  NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **CHEM-L102 Chemical Concepts Contemporary Issues Lab II**

  **Prerequisites:**
  It is strongly recommended that students enrolling in this course have some acquaintance of basic chemical principles either on the college or the pre-college level. Must be taken concurrently with CHEM 102

  **Credits:**
  1.00
A continuation of CHEM L101. Experiments may include making plastics and drug products, analyzing food products, making a model of DNA, crime lab analysis procedures, making aspirin, and the study of flavors and fragrances using molecular models. Concurrent enrollment in CHEM 102 required. May not be used by science majors for science credit. Prerequisites: CHEM 101 and CHEM L101. 2-hour Laboratory. 1 term - 1 credit. Normally offered Spring/Summer II.

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **CHEM-103 Chemical Concepts Contemporary Issues IIA**

  Prerequisites:

  It is strongly recommended that students enrolling in this course have some acquaintance of basic chemical principles either on the college or the pre-college level.

  Credits:

  4.00

  Description:

  Topics include organic chemistry, biochemistry, polymer chemistry, ecology, air and water pollution, food and food additives, pharmaceuticals, and forensic science, with an emphasis on their application to current issues. Specifically designed to satisfy the non-laboratory science requirement for the B.A. degree. Science related information searches and writing assignments will be based on current topics from the semester's work. 3 hours lecture. It is strongly recommended that students enrolling in this course have some acquaintance of basic chemical principles either on the college or the pre-college level.

  Type:

  NATURAL SCIENCE FOR BA BFA & BSJ

- **CHEM-105 Chemical New Product Development**

  Prerequisites:

  MGT 101
This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

**CHEM-111 General Chemistry**

**Prerequisites:**

Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

**Credits:**

3.00

**Description:**

Fundamental principles of chemistry are discussed. Topics include introductions to atomic structure, stoichiometry, periodic table, gas laws, nature of chemical bonds, and thermochemistry. 3 lecture hours. Normally offered Fall/Summer I. This course is recommended for science and engineering majors or those considering careers in the health sciences. Students seeking to satisfy the core science requirement may wish to consider enrolling in CHEM 101/L101.

**Term:**

Offered Fall Term

**Type:**

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

**CHEM-L111 General Chemistry Lab**
Prerequisites:

Must be taken concurrently with CHEM 111.

Credits:

1.00

Description:

Exploration of basic principles of chemistry discovery through laboratory investigation, including recognition of the major reaction types, stoichiometry, and qualitative analysis. Additionally, students will be introduced to good laboratory practices and experimental techniques. 4-hour laboratory. Normally offered Fall/Summer I.

Term:

Offered Fall Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• CHEM-112 General Chemistry

Prerequisites:

CHEM 111/L111; Take MATH-T MPEL0 MATH-T MPEL1 MATH-T MPEL2 or MATH-T MPEL3; CHEM-L112 must be taken concurrently.

Credits:

3.00

Description:

Continuation of the discussion of the fundamental principles of chemistry. Topics include introductions to solutions, kinetics, equilibrium, acid-base systems, thermodynamics and electrochemistry. Prerequisite: Satisfactory completion of CHEM 111 and CHEM L111. 3 hours of lecture 1 term - 3 credits. Normally offered Spring/Summer II.

Term:

Offered Spring Term
• CHEM-L112 General Chemistry Lab

Prerequisites:

CHEM 112 must be taken concurrently; Take MATHT-MPEL0 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3;

Credits:

1.00

Description:

Laboratory investigation in discovery format of topics from CHEM 112, including introduction to instrumental analysis and acid-base chemistry. Quantitative analysis, particularly volumetric analysis, is emphasized. 4-hour laboratory. Normally offered Spring/Summer II.

Term:

Offered Spring Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• CHEM-211 Organic Chemistry I

Prerequisites:

CHEM 112

Credits:

3.00

Description:

Basic theories of structure, bonding, and chemical reactivity as specifically applied to modern organic chemistry. Topics include functional groups, acid/base chemistry, nomenclature, resonance, spectroscopy, and stereochemistry. Significant emphasis placed on the use of the arrow formalism to
indicate the location and movement of electrons; serves as a basic introduction to organic mechanisms. Prerequisite: CHEM 112, L112 Concurrent enrollment in CHEM L211 required unless L211 has been previously completed. Concurrent enrollment in CHEM L211 required. 3 hours lecture. 1 term - 3 credits. Normally offered Fall, days/Summer I, evenings.

Term:

Offered Fall Term

• CHEM-L211 Organic Chemistry Laboratory I

  Prerequisites:
  
  Must be taken concurrently with CHEM 211.
  
  Credits:

  1.00

  Description:

  Laboratory exercises providing an introduction to synthetic organic chemistry techniques, including melting point determination, distillation, crystallization, extraction, chromatographic separations, and infrared spectroscopy. A component of this laboratory course incorporates discussions of experimental design within the context of environmentally benign (green) organic chemistry. Reports are prepared in professional style. Prerequisite: CHEM 112, L112. Concurrent enrollment in 211 required. 4-hour laboratory. 1 term - 1 credit. Normally offered Fall/Summer, days and evenings.

  Term:

  Offered Fall Term

• CHEM-212 Organic Chemistry II

  Prerequisites:

  CHEM 211 CHEM L211

  Credits:

  3.00

  Description:
Builds on the core competencies acquired in Organic Chemistry I, includes detailed discussions of organic mechanisms of substitution, elimination, and addition reactions. Significant emphasis is placed on organic synthesis, structure determination, and spectroscopy. Prerequisite: CHEM 211, L211. Concurrent enrollment in CHEM L212 required. 3 hours lecture. 1 term - 3 credits. Normally offered Spring, days/Summer II, evenings.

Term:
Offered Spring Term

- **CHEM-L212 Organic Chemistry Laboratory II**
  
  Prerequisites:
  
  CHEM 211/L211
  
  Credits:
  
  1.00
  
  Description:
  
  Builds on the core competencies acquired in Organic Chemistry Laboratory I. Significant emphasis is placed on the characterization of organic molecules via nuclear magnetic resonance spectroscopy. A component of this laboratory course incorporates discussions of experimental design within the context of environmentally benign (green) organic chemistry. Reports are prepared in professional style. Concurrent enrollment in CHEM 212 required. 4-hour laboratory. Normally offered Spring/Summer II, days and evenings.
  
  Term:
  
  Offered Spring Term

- **CHEM-314 Instrumental Analysis**
  
  Prerequisites:
  
  CHEM 211; CHEM L314 must be taken concurrently.
  
  Credits:
  
  3.00
  
  Description:
Theory and application of analytical instruments: ultraviolet, visible, fluorescence, atomic and emission spectroscopy; chromatographic methods; electrochemical measurements. Prerequisites: CHEM 211; CHEM L314 must be taken concurrently. 3 hour lecture. 1 term - 3 credits. Normally offered Fall/Spring, days.

Term:
Alternates Fall & Spring

- **CHEM-L314 Instrumental Analysis Lab**

  Prerequisites:
  
  CHEM L211; CHEM 314 must be taken concurrently

  Credits:
  
  1.00

  Description:
  
  Laboratory experiments in chemical analysis using instrumental techniques, including spectroscopy and chromatography. Data collection and evaluation includes computer-based methods. Reports are prepared in professional style. Prerequisites: CHEM L112; CHEM 314 must be taken concurrently. 4-hour Laboratory. 1 term - 1 credit. Normally offered Fall/Spring.

  Term:
  
  Alternates Fall & Spring

- **CHEM-331 Biochemistry I**

  Prerequisites:
  
  CHEM 212/L212 or permission of instructor. CHEM L330 must be taken concurrently.

  Credits:
  
  3.00

  Description:
This course explores the foundations of biochemistry, including the structure, organization and behavior of proteins, carbohydrates, lipids, and nucleic acids. Topics include enzyme kinetics, membrane structure and signal-transduction pathways. Students will be introduced to the biochemical literature and computer-based bioinformatics techniques. Prerequisites: CHEM 212/L212 or permission of instructor. Concurrent enrollment in CHEM L331 required. 3 hours of lecture per week. Offered every Fall, days only.

Term:

Offered Fall Term

- CHEM-L331 Biochemical Techniques I
  
  Prerequisites:
  
  Must be taken concurrently with CHEM 331. Take CHEM-212 or permission of instructor.
  
  Credits:
  
  1.00
  
  Description:
  
  Laboratory course introducing biochemical techniques. Topics include purification of DNA and proteins, agarose and polyacrylamide gel electrophoresis, protein quantitation and detection, and enzyme kinetic assays. Lab work will be written up in the style of a professional journal article. Offered every Fall, days only.
  
  Term:
  
  Offered Fall Term

- CHEM-332 Biochemistry II
  
  Prerequisites:
  
  CHEM 331
  
  Credits:
  
  4.00
  
  Description:
This course explores the principles of bioenergetics and metabolism of biological compounds. Coverage includes intermediary metabolism of carbohydrates, lipids, amino acids, oxidative phosphorylation, and synthesis of purines and pyrimidines. Additional topics include the regulation and integration of metabolism. Lectures will be supplemented with discussions of the biochemical literature. Prerequisites: CHEM 331. 3 hours of lecture and 1 hour of recitation per week. Offered every Spring, days only.

Term:

Offered Spring Term

- **CHEM-355 Environmental Chemistry**

  Prerequisites:

  CHEM 211, or permission of instructor

  Credits:

  3.00

  Description:

  A study of the chemical processes (including biologically mediated ones) that affect the cycling and ultimate fate of chemicals in the environment. Topics include air, water, and soil chemistry as well as energy and climate change. The effects of pollutant loads on natural systems and the remediation and treatment methods used to minimize pollutant loads are investigated. 3 hour lecture. Normally offered spring, odd numbered years.

  Term:

  Alternates Fall & Spring

- **CHEM-L355 Environmental Chemistry Lab**

  Prerequisites:

  CHEM 355 must be taken concurrently. Take CHEM-L211;

  Credits:

  1.00

  Description:
Laboratory exercises designed to illustrate principles covered by topics in CHEM 355. Prerequisites: CHEM L211, concurrent enrollment in CHEM 355 required. 4-hour laboratory. Normally offered spring, odd numbered years.

Term:
Alternates Fall & Spring

- **CHEM-375 Advanced Inorganic Chemistry**

Prerequisites:
CHEM 212

Credits:
3.00

Description:

Topics in inorganic chemistry including bonding theories, chemical structures, symmetry and group theory, kinetics and mechanisms of reactions, and spectroscopy. Advanced topics may include bioinorganic chemistry, organometallics, or materials chemistry. 3 hours lecture. Normally offered spring, even numbered years.

Term:
Alternates Fall & Spring

- **CHEM-L375 Advanced Inorganic Laboratory**

Prerequisites:
CHEM 375 must be taken concurrently

Credits:
1.00

Description:

Laboratory exercises designed to illustrate principles covered by topics in CHEM 375. Prior or concurrent enrollment in CHEM 375 required. 4-hour laboratory. Normally offered spring, even numbered years.
- **CHEM-390 Advanced Organic Chemistry**
  
  **Prerequisites:**
  
  Prerequisite: CHEM 212.

  **Credits:**
  3.00

  **Description:**
  Expands on topics introduced in Organic Chemistry I and II; depending on student interest, may include in-depth discussions of carbonyl chemistry, industrial organic chemistry, organometallic chemistry and biomolecules. Prerequisite: CHEM 212, concurrent enrollment in CHEM L390 required. 3 hours of lecture per week. Normally offered alternate years.

  **Term:**
  Alternates Fall & Spring

- **CHEM-411 Physical Chemistry I**

  **Prerequisites:**
  
  CHEM 112; MATH 165; PHYS 152

  **Credits:**
  3.00

  **Description:**
  Principles of thermodynamics and its general applications to physical and chemical change; introduction to the kinetic theory of gases and concepts of statistical mechanics. 3 hours lecture. 3 hour lecture. Normally offered Fall, days.

  **Term:**
  Alternates Fall & Spring
CHEM-L411 Physical Chemistry Laboratory I

Prerequisites:

CHEM 411 must be taken concurrently

Credits:

1.00

Description:

Laboratory exercises covering classical experiments in thermodynamic and instrumental measurements. Significant emphasis will be placed on experimental design and data analysis skills in addition to technical writing skills as demonstrated by laboratory reports prepared in the professional style. 4-hour laboratory. Normally offered Fall, days.

Term:

Offered Fall Term

CHEM-412 Physical Chemistry II

Prerequisites:

CHEM 411

Credits:

3.00

Description:

Applications of thermodynamics to solutions, chemical equilibrium and electrochemistry; chemical kinetics will be covered. Quantum chemistry and the application of spectroscopy to molecular structure. 3 hours lecture. Normally offered Spring, days.

Term:

Offered Spring Term
CHEM-L412 Physical Chemistry Lab II

Prerequisites:
CHEM L411; CHEM 412 must be taken concurrently.

Credits:
1.00

Description:
Laboratory exercises using spectroscopic techniques (optical and electrochemical) to explore kinetic and thermodynamic and quantum mechanical properties of chemical systems. Emphasis will be placed on experimental design and data analysis skills in addition to technical writing skills as demonstrated through reports prepared in the professional style. 4-hour laboratory. Normally offered Spring, days.

Term:
Offered Spring Term

CHEM-426 Transition Metal Chemistry

Prerequisites:

CHEM 212

Credits:
3.00

Description:
Chemistry of transition metal complexes. Topics may include bonding theories, stereochemistry, preparation of complexes, complex ion stability, kinetics and mechanisms of reactions of complexes, and spectroscopy. Prerequisites: CHEM 212. 3 hours lecture. 1 term - 3 credits. Normally offered yearly.

CHEM-L426 Transition Metal Chem Lab

Prerequisites:
CHEM 426 must be taken concurrently

Credits:

1.00

Description:

Synthesis and properties of transition metal complexes. Properties investigated may include conductivity, magnetic moments, optical rotation, optical and NMR spectra, rate of reaction, and stability of complexes. Prior or concurrent enrollment in CHEM 426 required. 4-hour laboratory. 1 term - 1 credit. Normally offered yearly.

• CHEM-427 Special Topics in Chemistry

Prerequisites:

Instructors permission.

Credits:

1.00- 4.00

Description:

Advanced study of a special topic in chemistry, by arrangement with the chemistry faculty. Depending on the project undertaken, students may obtain ECR credit. Normally offered Fall/Spring.

Term:

Offered Both Fall and Spring

• CHEM-428 Research & Seminar I

Prerequisites:

CHEM 212; CHEM L212; Instructor's Consent required

Credits:

1.00- 4.00
Independent study under the direct supervision of the chemistry faculty. Students are required to attend departmental seminars, write a professional research report, and give an oral presentation on their project for review by the chemistry faculty. Depending on the project undertaken, students may obtain ECR credit. Prerequisites: CHEM 212 and CHEM L212 and by permission of the instructor. 1 terms - 1 to 4 credits. Normally offered every Fall.

Term:
Offered Fall Term

Type:
Expanded Classroom Requirement

• CHEM-429 Research & Seminar II

Prerequisites:
CHEM 212 and CHEM L212 and by permission of the instructor.

Credits:
1.00- 4.00

Description:
Independent study under the direct supervision of the chemistry faculty. Students are required to attend departmental seminars, write a professional research report, and give an oral presentation for review by the chemistry faculty. Depending on the project undertaken, students may obtain ECR credit. Prerequisites: CHEM 212 and CHEM L212 and permission of the instructor. 1 term - 1 to 4 credits. Normally offered every Spring.

Term:
Offered Spring Term

Type:
Expanded Classroom Requirement

• CHEM-L432 Advanced Biochemistry Research Laboratory

Prerequisites:
CHEM-331; CHEM-L331

Credits:
3.00

Description:
Advanced biochemistry laboratory course where students learn experimental design, data analysis, and critical analysis of the scientific literature through the development of independent research projects. Projects vary from year to year, but may include recombinant DNA techniques, purification and quantitation of DNA and proteins, protein detection, enzyme kinetics, and bioinformatics. Research will be written up in the style of a professional scientific journal article and presented as a poster. Students will attend scientific talks at local universities. Satisfies the Expanded Classroom Requirement (ECR). Offered in Spring, days only, every year or every other year.

Term:
Alternates Fall & Spring

Type:
Expanded Classroom Requirement

• CHEM-453 Introduction to Toxicology

Prerequisites:
Prerequisites: CHEM 212 and BIO 111

Credits:
4.00

Description:
The study of toxic actions of chemicals on biological systems, with discussion of general principles, methodology, and selected topics. Topics will include forensic toxicology, environmental and occupational toxicology, pesticides, neurotoxicants, and carcinogenesis. CHEM 332 and BIO 403 strongly recommended. 3 hours of lecture and 1 hour of recitation per week. Normally offered every other year.

Term:
Occasional
• CHEM-510 Independent Study

Prerequisites:

An independent study form must be submitted to the CAS Dean's Office.

Credits:

1.00-4.00

Description:

Advanced study of a special topic in chemistry, by arrangement with the chemistry faculty.

• CHEM-511 Capstone Project

Prerequisites:

CHEM-212 and CHEM-L212; junior standing and by permission of the instructor.

Credits:

1.00-4.00

Description:

Advanced study of a special topic in chemistry, biochemistry, forensic science, or a related field under the direct supervision of the faculty. Students attend departmental seminars, write a professional research paper, and give a formal oral presentation on their project. If approved by the instructor, the student may conduct their independent study through an off-campus internship or practicum. In this case, the student will work under the supervision of both a Suffolk faculty member and a mentor at the off-campus facility. Participation at government crime or forensic laboratories will be open only to those students approved by the Forensic Science Committee. Depending on the project undertaken, a student may obtain ECR credit.

• CHIN-101 Elementary Chinese I

Credits:

4.00

Description:
Introduces Modern Standard Chinese (Mandarin) with an emphasis on developing conversational skills by using fundamental grammatical patterns and vocabulary in functional contexts. Basic reading and writing (in simplified characters) are also taught.

Term:
Offered Fall Term

Type:
BA FOREIGN

- CHIN-102 Elementary Chinese II
  
  Prerequisites:
  
  CHIN 101 or Instructor's consent.

  Credits:
  
  4.00

  Description:
  
  Continuation of Chinese 101 with emphasis on developing basic skills to read and write modern colloquial Chinese. The reading, writing and oral skills will be taught on the basis of fundamental grammatical patterns and vocabulary in context.

  Term:
  
  Offered Spring Term

  Type:
  
  BA FOREIGN

- CHIN-201 Intermediate Chinese I
  
  Prerequisites:
  
  CHIN 102 or Instructor's consent.

  Credits:
4.00

Description:
Emphasis on improving Chinese skills in the areas of speaking, listening, reading, and writing. Expansion of vocabulary and further study of grammar. Discussion of assigned readings primarily in Chinese.

Term:
Offered Fall Term

Type:
BA FOREIGN

- CHIN-202 Intermediate Chinese II

Prerequisites:
CHIN 201 or Instructor's consent.

Credits:
4.00

Description:
Continuation of skills developed in CHIN 201.

Term:
Offered Spring Term

Type:
BA FOREIGN

- CHIN-305 Advanced Conversation and Composition I

Prerequisites:
Credits: 4.00

Description:

Students will be encouraged to perfect their speaking and writing skills in modern standard Mandarin. Various resources such as authentic texts, video and audio recordings, as well as discussions on current events will be done in conjunction with assigned essays.

Term:

Alternates Fall & Spring

Type:

BA FOREIGN

- CHIN-306 Advanced Conversation and Composition II

Prerequisites:

CHIN 305 or Instructor's consent.

Credits: 4.00

Description:

Continuation of skills developed from Chin 305.

Term:

Alternates Fall & Spring

Type:

BA FOREIGN
• CHIN-311 Survey of Chinese Literature & Culture I

Credits:

4.00

Description:

This is an introductory and interdisciplinary course on Chinese civilization and traditional Chinese literature. It will provide the student with an introduction to the cultural legacy and literature of China from the archaeological origins of Chinese civilization to the period of the mature imperial state in the 11th century (Song Dynasty). The diverse origins of China's civilization are stressed as topics in political, social, and economic history are explored, with a focus on developments in language, literature, and art. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for themes treated in Modern China.

Term:

Alternates Fall & Spring

Type:

Asian Studies, BSBA SOCIAL CHANGE

• CHIN-314 Traditional Chinese Society From 1800-1949

Credits:

4.00

Description:

This course focuses on traditional Chinese society from 1800 to 1949, taking up such areas as family and kinship, social mobility, education, economic and social differentiation, community and social life, and popular belief. Examining the practices and ideologies underlying each area will enhance our understanding of the nature of traditional Chinese society, and help explain how elements of Chinese traditional culture contribute to modern Chinese identity and everyday life.

Term:

Occasional

Type:

Asian Studies
• CHIN-510 Independent Study
  Credits:
  4.00
  Description:
  Students meet with a department member to pursue advanced studies in areas of particular interest to them.
  Term:
  Occasional
  Type:
  Asian Studies

• CJN-101 Introduction to Communication
  Prerequisites:
  CJN Majors Only
  Credits:
  4.00
  Description:
  An introduction to the discipline addressing social science, humanities and practical art approaches to the study of communication. Students investigate the broad themes and foundational concepts which unify the discipline in order to understand the diverse fields, functions and purposes of communication. Normally offered every semester.
  Term:
  Offered Both Fall and Spring

• CJN-103 Presentations Skills
Credits: 4.00

Description:
The development, delivery of oral presentations. Students develop skills in oral and physical delivery, organization, persuasion, critical thinking and use of support media.

Term:
Offered Both Fall and Spring

- **CJN-112 Journalism I**
  
  Credits: 4.00

  Description:
  An introductory news writing course designed to teach both the writing style used by journalists and basic techniques used for gathering and presenting information for general publication. The course emphasizes fundamental writing and reporting skills such as interviews, finding sources, and choosing essential facts. Students will also be introduced to feature news writing and be assigned to develop and write basic stories drawn from real-life situations.

  Term:
  Offered Both Fall and Spring

- **CJN-114 Great Works of Journalism**
  
  Credits: 4.00

  Description:
  An examination of important contributions to the literature of journalism through an analysis of major writers and news coverage of significant events from a journalistic perspective.
• CJN-177 Professional Communication

Credits:

4.00

Description:

An introduction to the processes of professional communication, with emphasis on oral presentations, report writing, effective listening, and interpersonal communication in the business environment. Required of all students in the Sawyer Business School.

Term:

Offered Both Fall and Spring

• CJN-H177 Honors Professional Communication

Prerequisites:

3.2GPA

Credits:

4.00

Description:

An honors-level introduction to the processes of professional communication, with emphasis on oral presentations, report writing, effective listening and interpersonal communication in the business environment. This course is required for all students in the Sawyer School of Business.

Term:

Offered Both Fall and Spring
• **CJN-210 Communication Research Statistics**

  **Credits:**
  
  4.00

  **Description:**
  
  The course develops an understanding of how statistics are used in the presentation of information and arguments in Communication and Journalism. Emphasizing a conceptual approach to learning statistics, the course focuses on data collection and summarization, correlation, regression, sampling, estimation, and tests of significance. Students perform basic statistical calculations using SPSS software.

  **Term:**
  
  Offered Both Fall and Spring

  **Type:**
  
  Quantitative Reasoning

• **CJN-212 Journalism II**

  **Prerequisites:**
  
  CJN 112

  **Credits:**
  
  4.00

  **Description:**
  
  Modern reporting techniques are examined and applied to writing of full-length news and feature news stories, with an emphasis on investigative journalism. The course includes an introduction to and an analysis of alternative or new journalism", combined with the survey of journalistic styles and standards as they evolved in the American and International Press over the last century.

  **Term:**
  
  Offered Both Fall and Spring
- **CJN-213 Feature Writing**
  
  Credits: 4.00

- **CJN-214 Professional Writing**
  
  Credits: 4.00
  
  **Description:**
  
  Provides students with the opportunity to develop their writing style for a professional audience. Memo writing, report writing, letter writing and other common writing situations for business professionals are considered.

  **Term:**

  Occasional

- **CJN-215 Interpersonal Communication**
  
  Credits: 4.00
  
  **Description:**
  
  Analysis of communication behavior in individual and group environments. Topics include conflict, leadership, common communication difficulties, communication roles and reflective thinking.

  **Term:**

  Occasional

- **CJN-216 Intercultural Communication**
  
  Credits:
An examination of the communication variations and cultural viewpoints and their impact on cross-cultural communication. A special emphasis is placed on rituals and message patterns in non-Western cultures. Cultural Diversity B

Offered Both Fall and Spring

Cultural Diversity Opt B

- **CJN-217 Gay and Lesbian Studies**

  Credits: 4.00

  Description:
  
  Examines the portrayal of homosexuality in political, social and cultural discourse. Analyzes the role of media and symbolic construction in the shaping of public values, opinions and social movements. Cultural Diversity A

  Term:
  
  Occasional

  Type:
  
  Cultural Diversity Opt A

- **CJN-L218 Photojournalism**

  Credits: 4.00

  Description:
An introduction to the role of photography in the journalistic process. A discussion of photography as communication and a survey of the history of photography.

Term:
Offered Both Fall and Spring

Type:
Humanities & History

- **CJN-235 Argument & Advocacy**
  Credits:
  4.00
  Description:
  Modern applications of argument in political, social and legal situations. Emphasis on development of arguments, analysis, use of evidence and delivery of oral and written assignments. Normally offered every semester.

  Term:
  Occasional

- **CJN-239 Media Law**
  Credits:
  4.00
  Description:
  Explores the legal rights, responsibilities, and constraints on the media, and media professionals. Special focus on defamation, copyright, obscenity, broadcast regulation and media-related tort law.

  Term:
  Offered Both Fall and Spring
• CJN-245 Forensics
  Credits:  
  1.00- 8.00

  Description:
  Intensive research on topics in debate and active participation in the University forensics program. ECR

  Term:
  Occasional

  Type:
  Expanded Classroom Requirement

• CJN-247 Design Lab
  Credits:
  4.00

  Description:
  Computer applications for Advertising and communication design. Using various graphical editing and design programs, students learn the theory and practice of design for layout, logos, and graphic elements in communication.

  Term:
  Offered Both Fall and Spring

• CJN-253 Broadcast Journalism
  Prerequisites:
  Take CJN-112;

  Credits:
Description:
Introduces students to newswriting, production and performance techniques for radio and television. Students write, produce, and perform new packages as part of the course.

Term:
Offered Both Fall and Spring

• CJN-255 Introduction to Media

Credits:
4.00

Description:
An introduction to the role of media in contemporary society, focusing on media’s influence on cultural, political, and ideological processes. An examination of the historical contexts within which newspapers, radio, television and new media technologies developed and how audiences interact with and influence the use of media.

Term:
Offered Both Fall and Spring

Type:
Social Science

• CJN-257 Advertising

Credits:
4.00

Description:
Theoretical and practical applications of communication are considered in terms of advertising strategies and campaigns for media.
- **CJN-259 Sports Public Relations**
  
  **Credits:**
  4.00

  **Description:**
  The application of Public Relations strategies and techniques in college and professional sports.

  **Term:**
  Occasional

- **CJN-265 Small Group & Team Communication**
  
  **Credits:**
  4.00

  **Description:**
  Analysis of the concepts and theories of communication in small groups and teams. Improvement of problem-solving, decision-making, analysis and evaluation skills in the team environment. The study and practice of merging trends in team dialogue, team learning, team development and leadership.

  **Term:**
  Occasional

- **CJN-275 Advanced Public Speaking**
  
  **Prerequisites:**
  CJN 103 or CJN 177
Intensive training in public speaking techniques employing a variety of speaking situations.

Term:
Occasional

- CJN-277 Public Relations
  Credits:
  4.00
  Description:
  The basic principle techniques and processes of public relations are examined. Issues, trends, opportunities, and problems faced by the practitioner and impacting the organization are analyzed.

  Term:
  Offered Both Fall and Spring

- CJN-285 Media and Pop Culture I
  Credits:
  4.00
  Description:
  Examines the influence of media upon contemporary society. Television, radio, film and print formats are discussed in terms of their persuasive impact on American mass culture. Focus is on the period 1950-1970.

  Term:
  Offered Fall Term
• **CJN-287 Media Criticism**

  Prerequisites:

  CJN-255

  Credits:

  4.00

  Description:

  Critical examination of various mass media including film, television, radio, music, newspapers and magazines. Theories of media criticism discussed and applied to specific media or media products.

  Term:

  Offered Spring Term

• **CJN-288 Film Language: From Silents to Citizen Kane**

  Credits:

  4.00

  Description:

  Film history from 1895 - 1940. An introduction to the language and technology of cinema as developed by pioneering filmmakers, and a basic discussion of aesthetics and criticism of film. Key films from the silent era through Orson Welles' Citizen Kane.

  Term:

  Offered Both Fall and Spring
• CJN-290 Women in Struggle on Film

Credits:
4.00

Description:
Problems of women at work and at war, in love, marriage and pregnancy, as seen in Hollywood films, both old and new, and in documentaries. The roles of women are examined historically, psychologically, sociologically, and cinematically. Normally offered yearly.

Term:
Offered Fall Term

Type:
Humanities & History

• CJN-291 Film Studies: the Modern Era

Credits:
4.00

Description:
Film history from 1940 until 1970. Includes an emphasis on film aesthetics, criticism, and history from World War II through the end of the Hollywood studio system; from film noir to Italian Neo-Realism to the French New Wave.

Term:
Offered Spring Term

Type:
Humanities & History

• CJN-293 Hong Kong Cinema
Conducted in a seminar format, we examine the film texts of Wong Kar-wai, Andrew Lau/Alan Mak by focusing on issues such as colonization/decolonization, transnational political economy and global Hollywood, the Greater Chinese Dynasty, diaspora, and postmodern aesthetics.

Term:

Occasional

Type:

Cultural Diversity Opt B

- CJN-297 New Media New Markets

Credits:

4.00

Description:

Explores current trends in advertising and public relations. Examines new media choices in cable, direct response and the internet and their impact on these professions. Includes an analysis of new markets in Generation X, Generation Y, the international, and ethnic communities.

Term:

Offered Both Fall and Spring

- CJN-301 Documentary Film and the Image of Conflict in the Middle East

Credits:

4.00

Description:
This course will focus on some of the divisions and conflicts within Israeli society. Students will analyze and compare mainstream media discourse to alternative representations in documentary film. Analysis will also cover media representation of the Israeli-Palestinian conflict.

Term: Occasional

Type: Cultural Diversity Opt B

- **CJN-313 Advanced Reporting**
  
  **Prerequisites:**
  Take CJN-112 and CJN-212;

  **Credits:**
  4.00
  
  **Description:**
  The principles and techniques of advanced news and investigative reporting are studied and applied. Students develop, organize, and write detailed news and news-feature stories based on original research. Each student is assigned a real-life news beat or news project to work on throughout the semester.

  Term: Occasional

- **CJN-317 Copy Editing**
  
  **Prerequisites:**
  CJN 112 or CJN 113

  **Credits:**
  4.00
Description:
A study of the fundamentals of copy editing, newspaper typography, and makeup.

Term:
Offered Spring Term

- **CJN-L318 Advanced Photojournalism**

  Credits:
  4.00

  Description:
  An in-depth analysis of the field of Photojournalism. Emphasis is placed on the development of photo essays and the visual impact of photography on the print media. Prerequisite: CJN 218. 1 term - 4 credits.

  Term:
  Offered Spring Term

- **CJN-325 World Cinema**

  Credits:
  4.00

  Description:
  This course examines films from cultures around the globe, including masterpieces of cinema from European, Asian, South American, and African nations. (Films are often subtitled.)

  Term:
  Occasional

  Type:
  Humanities & History
• CJN-335 Persuasion
  Credits:
  4.00
  Description:
  Analysis of persuasive techniques particularly those used by communicators in their attempt to gain public acceptance.
  Term:
  Occasional

• CJN-343 Advanced Feature Writing
  Prerequisites:
  Take CJN-112 and CJN-212;
  Credits:
  4.00
  Description:
  Emphasizes in-depth development of articles in the style of narrative journalism for magazines and other publications. Normally offered yearly.
  Term:
  Occasional

• CJN-347 Media Planning
  Prerequisites:
  CJN 257
  Credits:
Description:
The planning and purchasing of advertising space and time. The course examines media costs, budgets, and media strategy for different audiences and markets. Normally offered yearly.

Term:
Offered Both Fall and Spring

• CJN-353 Broadcast Journalism II

Prerequisites:
Take CJN-253 and CJN-355;

Credits:
4.00

Description:
Advanced work in newswriting, production, and performance techniques for television. Students report, write, and produce news packages, with emphasis on increasing the depth, breadth and frequency of reporting. Work will also include gathering, organizing, and evaluation the newsworthiness of information, evaluating the credibility of sources, writing the story, and producing broadcast quality work. Cannot be taken concurrently with CJN 483.

Term:
Alternates Fall & Spring

• CJN-354 Digital Cinema

Credits:
4.00

Description:
Students study cinematography techniques and theory, putting them into practical application in various projects using video cameras, lighting and composition to create images and scenes. Students produce work in multiple environments including stage and on-location shoots.

Term:
Occasional

- CJN-355 Media Production

Credits:
4.00

Description:
Practical exposure to methods of production and production equipment of the media. Students are introduced to basic theoretical concepts, such as three-point lighting and white balancing, and apply those to their productions. Students create a variety of non-fiction videos in teams and/or by themselves.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

- CJN-356 TV Studio Production

Credits:
4.00

Description:
This course provides students with a hands-on introduction to the process of planning, preparing, producing, and evaluating studio productions. Students are exposed to the elements and terminology of a multi-camera studio with live switching, audio mixing and studio lighting. Students produce interviews, PSA’s, and a live variety/talk show.

Term:
• CJN-357 Post Production

Credits: 4.00

Description:
An exploration into the activities that wrap up the creation of films and television programs. Students create and add motion-graphics and visual effects to edited programs, generating output for videotape, the web, and DVD platforms.

Term: Occasional

• CJN-358 Family Communication

Credits: 4.00

Description:
This course will look at different family structures using communication concepts and theories as a focus to glance at family life. Communication issues will include the creation of meaning and identity through storytelling, rules and roles, conflict, power, intimacy, and then glance at challenges to the family unit. Students will need to understand their own family issues so that they can glance across the street to neighbors’ differing viewpoints, so that we can broaden to begin to understand families from different cultures. We will accomplish this by examining both fictional and real families portrayed in television, movies, documentaries, as well as in fiction and non-fiction writing. Final projects will be a paper and presentation about a specific family communication concept applied to a specific family unit.

Term: Occasional

• CJN-359 Advertising Copy

Prerequisites:
CJN 257

Credits:
4.00

Description:
Continuation of Advertising, with special emphasis on practical advertising and advertising campaigns. Normally offered every semester.

Term:
Offered Both Fall and Spring

- CJN-361 Television News Producing

Prerequisites:
CJN 253 and CJN 355

Credits:
4.00

Description:
Students produce news segments, series, and/or specials leading to broadcast quality products. Emphasis will be on the pacing, timing, and flow of newscasts, as well as pre-production, teases (script and on-camera) and the issues of an audience and professional ethics. Cannot be taken concurrently with CJN 483

Term:
Alternates Fall & Spring

- CJN-365 American Cinema

Credits:
4.00

Description:

Term:
Occasional

- **CJN-366 Great Film Directors**

  **Credits:**
  
  4.00

  **Description:**

  An in-depth look at the films of one great film director, either American or foreign, demonstrating how the filmmaker develops his/her themes over the course of a career. As there is a different director each time, this course can be taken for credit more than once. (But will only count once towards the Major)

  Term:
  Occasional

  Type:
  Humanities & History

- **CJN-375 Organizational Communication**

  **Credits:**
  
  4.00

  **Description:**

  Historical development of the theory of organizations, examination of information flow, network analysis, communication overload and underload, corporate culture, superior-subordinate communications, organizational effectiveness and change processes. Normally offered yearly.

  Type:
  Social Science
CJN-377 Public Relations II: Strategic Research and Writing for PR

Prerequisites:
CJN-277

Credits:
4.00

Description:
An applied course that focuses on Public Relations research methods, the development of persuasive messages, and the selection, development and editing of appropriate materials used to communication with an organization's stakeholders.

Term:
Offered Both Fall and Spring

CJN-378 Event Planning and Promotion

Prerequisites:
CJN 277

Credits:
4.00

Description:
Examines how conferences are built, promoted, managed, and assessed, with particular emphasis on nonprofit conventions, trade shows, and volunteer organizations. Specific issues analyzed include facilities planning and contracts, legal issues, volunteer management, budgeting, marketing, and planner/staff communication.

Term:
Offered Both Fall and Spring
• CJN-381 Business of Media
Prerequisites:
CJN-255

Credits:
4.00

Description:
Explores how media in the 21st century are managed. Students learn contemporary trends in media regulation, ownership structures, programming strategies, audience measurement, and global business tactics. Students apply these concepts by running a media firm simulation. Normally offered yearly

Term:
Occasional

• CJN-383 Online Advertising
Prerequisites:
CJN-257

Credits:
4.00

Description:
All forms of online advertising are explored, including paid search, with a focus on building a brand online.

Term:
Occasional

• CJN-385 Globalization of Media and Telecommunications
Description:

Explores the development of global media and telecommunication corporations and technologies and the influence these transnational organizations and technologies bear on regional and nation-state communication policy, global and local culture, and the world economy. Cultural Diversity B ECR

Term:

Offered Spring Term

Type:

Cultural Diversity Opt B, Expanded Classroom Requirement, BSBA SOCIAL CHANGE

- **CJN-387 Media Relations**

  Credits:

  4.00

  Description:

  Examines the relationships among the public and private sector organizations and the media. The course focuses on issues management, the role of public relations and the perspective of media professionals in the discussion of public issues. Normally offered alternate years.

- **CJN-389 Social Media**

  Prerequisites:

  CJN-257

  Credits:

  4.00

  Description:

  Social media sites such as Facebook, MySpace, and Twitter are examined from a cultural and critical perspective. The use of social media for community formation, social presence, identity building and social activism are considered. The roles of advertising, public relations and branding are examined.
• CJN-390 Screenwriting  
Credits:  
4.00  
Description:  
Students learn the basic principles of writing a short film for the screen by closely examining professional scripts and one-act films, and then creating, step-by-step, their own one-act screenplay so that it could be ready for production.

Term:  
Offered Spring Term

• CJN-398 Special Topics: Photojournalism In Toscania  
Credits:  
3.00  
Description:  
This course will be an in-depth analysis of the field of Photojournalism. Emphasis will be placed on development of photo essays and the visual impact of photography on the print media. Following the pattern created in my photography classes at the Dakar campus students will also create personal and group portfolios and will exhibit the work to the greater university community in Boston. Additionally each student will be required to produce a research paper and photo essay as a Power Point presentation on a subject approved by the instructor that will allow the student to examine in depth an aspect of historic or contemporary life in Italy The history of photography and photojournalism will be discussed in order to give students a perspective on the field and to understand their own role in the journalistic process. The basic technical aspects of camera work and photo composition will be taught as well as the new advanced techniques used by photojournalists working with digital photography equipment and computers. Image capture, manipulation, captioning, electronic transmission and line quality printing for exhibit will be presented. The region of Tuscania and the facilities at the Lorenzo dc Medici campus make for an ideal location for the class, Field trips to Rome to explore and photograph the city and the Old Forum and to Florence where a visit to the Museo Nazionale Alinari Della Fotografia is planned, along with local excursions to archaeological sites near Tarquinia where permission has already been granted to visit and photograph and the nationally protected nature reserves nearby, as well as the town of Toscania itself will provide fertile visual opportunities for the aspiring photojournalism students. As always, Study Abroad
Photojournalism classes serve as a vehicle for spreading goodwill in the host country, creating greater inter-cultural understanding, and offering students the opportunity to begin developing a mature world view.

Term:

Summer

- **CJN-400 Media Effects & Audiences**

  Prerequisites:
  
  Prerequisite: CJN-255

  Credits:
  
  4.00

  Description:
  
  Explores the theoretical and practical research on major issues in the media from a social scientific perspective. Examines the effects that sexual and violent media content, stereotyping, political messages, communication technologies, advertising and marketing have on audiences. Students acquire quantitative method skills such as survey, experiment and content analysis. Normally offered yearly.

  Term:
  
  Offered Fall Term

  Type:

  Social Science

- **CJN-403 Issues in Journalism**

  Prerequisites:
  
  CJN-112

  Credits:
  
  4.00
Each time this course is offered it examines a different in Journalism, such as Social Justice Journalism, Electronic Journalism, Ethics, Political Journalism, and International Journalism. Normally offered yearly.

Term:
Offered Spring Term

- CJN-405 Communication Theory
  
  Prerequisites:
  
  Senior Standing; CJN majors only
  
  Credits:
  
  4.00
  
  Description:
  
  Senior standing; CJN majors only. An interdisciplinary examination of the development of communication theories from the classical tradition to the modern perspectives of rhetoricians, scientist, psychologist, sociologists, philosophers and others. Normally offered every semester.
  
  Term:
  Offered Both Fall and Spring

- CJN-415 Review Writing
  
  Credits:
  
  4.00
  
  Description:
  
  Analysis and critique of movies, theater, music, art and food. Normally offered every semester.
  
  Term:
  Offered Fall Term
- **CJN-421 Media Seminar**

  **Prerequisites:**
  
  Take CJN-255; CJN Majors with Senior Standing

  **Credits:**
  
  4.00

  **Description:**
  
  Conducted in an interactive and intensive seminar format, students examine special media topics by leading class discussion and engaging in original research. Possible topics include, but are not limited to: women, gender and communication technologies; media and social movements; topics in cultural studies; media and democracy; media and community; and participatory media culture. Normally offered yearly.

  **Term:**
  
  Offered Spring Term

- **CJN-437 Ad Campaigns**

  **Prerequisites:**
  
  CJN 359, CJN 257

  **Credits:**
  
  4.00

  **Description:**
  
  Principles of advertising campaigns. Students design, plan and produce a national advertising campaign for a client as members of a simulated agency team. Normally offered yearly.

  **Term:**
  
  Offered Both Fall and Spring
• **CJN-440 Health Communication**

  **Prerequisites:**
  
  CJN-277;
  
  **Credits:**
  4.00
  
  **Description:**
  
  This course examines the important functions performed by human and mediated communication for health care consumers and providers. In particular, the course focuses on the use of communication strategies to inform and influence individual and community decisions regarding health.
  
  **Term:**
  
  Occasional

• **CJN-455 Advanced Media Production**

  **Prerequisites:**
  
  CJN 355
  
  **Credits:**
  4.00
  
  **Description:**
  
  The course focus is on specialized production techniques including advanced lighting, sound recording, cinematography and editing techniques. Students work in teams to create a variety of fiction productions.
  
  **Term:**
  
  Offered Both Fall and Spring

• **CJN-457 Integrated Marketing Communication**

  **Prerequisites:**
Take CJN 277, CJN 257

Credits:
4.00

Description:
Examines the integration of advertising, promotion, public relations and marketing communication in the strategic communication process.

Term:
Offered Both Fall and Spring

- **CJN-465 Film and Society**
  
  Credits:
  4.00
  
  Description:
  The study of the relationship between film and society. The course features filmmakers who emphasize political, historical, racial, gender, and other important social issues. Normally offered yearly. Revised Description A study of how cinema reflects, and reflects on, the values of the society in which it is produced. The course features films and filmmakers who emphasize political and social issues dealing with race, gender, sexuality, and other important concerns.

  Term:
  Occasional

- **CJN-466 Seminar in Film**
  
  Prerequisites:
  Take CJN-288 CJN-291 and CJN-355;
  
  Credits:
  4.00
Course merges theoretical and practical film studies approaches. Students revisit concepts learned in previous classes and apply them to advanced film analysis. Analysis incl. (re)creation of important film scenes or concepts, such as Eisenstein's five types of montage. (Capstone course, prereq. 288, 291, 355)

Term:
Occasional

- CJN-467 Film Genres

Credits:
4.00

Description:
Theories of genre as applied to a specific film genre, with a different genre each semester: i.e., screwball comedy, horror film, science fiction, the western the musical, film noir. This film may be taken for credit more than once.

Term:
Occasional

- CJN-477 Public Relations II

Prerequisites:
CJN 277, 377 AND Senior Standing.

Credits:
4.00

Description:
Examines case studies and typical public relations problems experienced by profit and not-for-profit organizations. The course provides students with an opportunity to demonstrate their mastery of the skills, techniques, and knowledge of public relations by creating a comprehensive campaign for an actual client. Fulfills ECR requirement.
• CJN-479 Environmental Public Relations

Credits:
4.00

Description:
An examination of the public issues involving the environment. Focuses on public relations strategies for government agencies, corporations and other organizations concerned with the environment. Normally offered yearly.

Term:
Offered Spring Term

• CJN-480 Documentary Film Production

Credits:
4.00

Description:
Students analyze contemporary documentaries and study documentary history and theory. Working in teams, students also produce, write, direct, crew, and edit documentary shorts.

Term:
Occasional

• CJN-481 Making the Short Film
This advanced class works together as a crew for the creation of a short narrative film shot in HD video. Under the direction of the professor students learn the process of making professional-quality work. Each student will be responsible for various crew positions during pre-production and the shooting of the film.

Term:
Occasional

- **CJN-483 Suffolk TV News**
  
  **Prerequisites:**
  
  Take CJN 253 CJN 355 and either CJN 353 or CJN 361 or instructor's consent.
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Students write, direct, crew, edit and serve as talent in producing the CJN Department's weekly news program aired on Boston Cable Access. Cannot be taken concurrently with CJN 361 or CJN 353.
  
  **Term:**
  
  Offered Spring Term
  
  **Type:**
  
  Expanded Classroom Requirement

- **CJN-485 Rhetoric of Protest & Reform**
  
  **Credits:**
Description:

Examines the persuasive strategies of social reform movements with special emphasis on the civil rights', women's rights, and gay rights movements in the United States. Normally offered yearly. Cultural Diversity A

Term:

Occasional

Type:

Cultural Diversity Opt A, Humanities & History, BSBA SOCIAL CHANGE

- **CJN-490 Temple Street Project**

  Prerequisites:

  CJN-253, CJN-355

  Credits:

  4.00 - 8.00

  Description:

  Students write, direct, crew, edit and serve as talent in producing the Department's magazine-format television program aired on Boston Cable Access. Normally offered every semester.

- **CJN-491 Special Topics in Communications**

  Credits:

  4.00

  Description:

  Current issues in the field of communication. Normally offered every semester.
- **CJN-492 Special Topics in Public Relations**
  
  Credits:
  
  4.00
  
  Description:
  
  Current issues in Public Relations. Normally offered yearly.
  
  Term:
  
  Offered Fall Term

- **CJN-493 Special Topics in Film**
  
  Credits:
  
  4.00
  
  Description:
  
  Specialized courses in film theory, history, criticism and genre. Normally offered yearly.
  
  Term:
  
  Occasional

- **CJN-494 Special Topics in Advertising**
  
  Credits:
  
  4.00
  
  Description:
  
  Current issues in the field of advertising. Normally offered every semester.
- CJN-496 Special Topics in Media Production
  Credits: 4.00
  Description:
  Specialized courses in writing, editing, producing, directing, and other facets of media production. Normally offered yearly.

- CJN-497 Special Topics in Media
  Credits: 4.00
  Description:
  Specialized courses in media trends, history, theory, and criticism. Normally offered yearly.

- CJN-503 Experiential Learning in Communication
  Prerequisites:
  16 Hrs of CJN coursework or CJN Advisor consent
  Credits:
Description:
Internships, practicum, and independent study experiences in Communication are available prior to the start of each semester. Normally offered every semester. ECR

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

- **CJN-505 Journalism Practicum**

Prerequisites:
12 hours of CJN coursework and CJN advisor consent

Credits:
1.00-12.00

Description:
Practicum and Internship projects are available prior to the start of each semester. Prerequisites: Journalism majors with a minimum of 12 credits of coursework or permission of the Department Chairperson. 1-3 terms : 1-12 credits. Normally offered every semester. ECR

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

- **CJN-506 Honors Seminar**

Prerequisites:
Senior CJN majors with an overall cumulative grade point average of 3.0, and a major GPA of 3.4.

Credits: 4.00

Description:

Senior CJN majors meeting requirements for Departmental Honors are invited to participate in this seminar, which entails research and presentation of an approved research topic. Prerequisites: Senior CJN majors with an overall cumulative GPA of 3.0, and a major GPA of 3.4. 1 term; 4 credits. Normally offered yearly.

Term: Offered Spring Term

• CJN-510 Independent Study

Prerequisites:

An independent study form must be submitted to the CAS Dean's Office.

Credits: 1.00-12.00

Description:

Internships, practicum, and independent study experiences in Communication are available prior to the start of each semester. Normally offered every semester. ECR

Term: Offered Both Fall and Spring

• CMPSC-375 Introduction to Networks

Prerequisites:

CMPSC F331 & CMPSC 353
This course explores the fundamentals of computer networks, protocols and layering, applications and their implications to everyday networking life.

- **CMPSC-401 Erlang Programming With Applications**

  **Prerequisites:**
  CMPSC-F132 & Permission of the Instructor

  **Credits:**
  1.00

  **Description:**
  Erlang is a general-purpose, concurrent, functional programming language. It is designed to support distributed, fault-tolerant, soft-real-time, non-stop applications in the areas of telecommunications, online video games, social networking, high-performance Web development and databases. This course covers the language foundations, as well as intermediate topics such as distributed communications, client-server systems, and working with ETS tables and Mnesia database. Special attention will be paid to recursive and asynchronous programming, which are the two core principles of the language.

- **CMPSC-501 Software Development Internship**

  **Prerequisites:**
  CMPSC-F131, CMPSC-F132 and at least one CMPSC course numbered 200 or above. Prior to registration, student must submit credit approval form and gain faculty approval.

  **Credits:**
  2.00- 4.00

  **Description:**
  Student works in a qualified software development setting to gain practical experience in modern industrial software development. Student will apply lessons learned in the classroom within a supervised, professional development while developing a greater understanding of the job expectations and
organizational culture. Internship may be taken for 2-4 academic credit hours, at 4 hours of company work per week per each credit. Additional academic reports with be required. Students may take more than one internship, but the total number of credits applied toward graduation cannot exceed 12.

Type:

Expanded Classroom Requirement

- CMPSC-510 Computer Science Independent Study

  Credits:

  1.00- 4.00

  Description:

  Guided study on a topic at an advanced level.

  Type:

  Quantitative Reasoning

- CMPSC-F118 Computing With Words

  Credits:

  4.00

  Description:

  This course introduces students to aspects of Natural Language Processing involving computer-based analysis and comparison of texts written in natural languages (English and others). In addition to introductory computer programming in Python, the course also covers some basic statistics concepts. Intended for students at all levels.

  Type:

  Quantitative Reasoning

- CMPSC-F120 Programming for the World Wide Web
Credits: 4.00

Description:
This is a hands-on course aimed at non-CS students who want to learn how to build interesting and interactive web pages. We do not use any drag-and-drop software for this purpose. Instead we cover the basics of HTML and PHP and, if time permits, we look at some ways of building web pages that interact with databases. Each student will have, for the duration of the course, an account on a server that permits individuals to have web pages that are visible on the World Wide Web.

Type:
Quantitative Reasoning

• CMPSC-F124 Game Programming

Credits: 4.00

Description:
This course introduces students to computer game development, including, but not limited to, game programming. We use Game Maker, a framework for personal computers that runs equally well on XP, Vista, and Linux. We learn about the foundational concepts of two-dimensional (flat) games: graphics, sound, objects, actions, rooms, scores, levels, multiplayer support, artificial intelligence, and more. Game Maker has an intuitive interface that makes game development approachable for everyone, including those who have never written a single game or a single computer program. All games created by Game Maker can be saved as standalone applications and can be shared freely with classmates, friends, and family. This is not a course in graphics design, audio editing, or scriptwriting. Students are encouraged to use their creativity and imagination to design games and the correctness of game implementation is stressed throughout the course.

Type:
Quantitative Reasoning

• CMPSC-F125 Introduction to Multimedia Programming

Credits: 4.00
This course provides an introduction to multimedia programming: developing programs that create and manipulate digital images and sound. Topics include creating negative and gray-scale images, reversing and splicing sounds, creating sound visualizations, and other related topics. The student will learn some of the concepts and techniques underlying software applications like Photoshop or SoundEdit as well as fundamental concepts underlying all of computing, such as algorithms, abstractions, and how computers represent numbers, text, images, and sound. There is no prerequisite for this course. It is recommended for students with little or no computer programming experience or who are not confident in their programming background. However, the student should be aware that hands-on programming is a central component of the course, embodied in frequent programming assignments.

Type:
Quantitative Reasoning

- **CMPSC-F128 Programming II for the World Wide Web**

  **Credits:**
  4.00

  **Description:**
  This course is a continuation of Programming for the World Wide Web. Students are taught how to turn their home PC or laptop into a web server by downloading and installing XAMPP, a free program that bundles the Apache server, the MySQL database, and the programming language PHP. After learning PHP and MySQL, students are taught AJAX, a technology that improves client-server communication, and jQuery, a library that enhances JavaScript. The course finishes with an introduction to Content Management Systems. As in Web I, there will be several lab exercises, homework assignments, and a final project. Upon completion of this course, students will have been exposed to topics needed to work in industry as web developers. Prerequisite: CMPSC F120.

  **Type:**
  Quantitative Reasoning

- **CMPSC-F130 Game Programming II**

  **Prerequisites:**
  CMPSC-F124;

  **Credits:**
4.00

Description:
This course will be a continuation of CMPSC 124 and go more in-depth into coding and the designing of different types of games or applications. Using the Game Maker framework, students will challenge their creativity by developing strategy, isometric, and platform scrolling games, among others. In this class, students will go beyond the drag and drop options of Game Maker and explore the possibilities within the Game Maker Language (GML), creating more complex games. We will make GUIs, program audio engines, and experience the rich learning process of taking a game from inspiration through implementation.

Type:

Quantitative Reasoning

CMPSC-F131 Computer Science I

Credits:
4.00

Description:
This is a rigorous introduction to computer science in Java with an emphasis on problem solving, structured programming, object-oriented programming, and graphical user interfaces. Topics include expressions, input/output, control structures, intrinsic data types, classes and methods, iteration, top-down programming, arrays, graphical user interfaces, and elements of UML. Normally offered each semester.

Type:

Quantitative Reasoning

CMPSC-F132 Computer Science II

Prerequisites:
CMPSC F131

Credits:
4.00

Description:
Computer Science II (CSII) is the continuation of Computer Science I. The purpose of CSII is to expand students' understanding of Computer Science and computer programming, assuming that they have the basic knowledge of the Java language. The course introduces another programming language - C - and also focuses on the pure Object-Oriented features of Java, such as inheritance, polymorphism, and exceptions, as well as on simple data structures (lists, stacks, and queues) and algorithms (searching and sorting). By the end of the semester students will be able to develop sizable (several pages long) computer programs in the C and Java languages. Efficient C and Java program development requires an Integrated Development Environment (IDE) - a collection of tools that make it possible to edit, compile, and debug C and Java programs. Our IDE of choice is Eclipse. Eclipse is free and available for many operating systems, including Microsoft Windows (all flavors), Linux, Unix, and Mac OS X.

Type:
Quantitative Reasoning

• CMPSC-F253 Assembly Language and Computer Structure

Prerequisites:
CMPSC F132

Credits:
4.00

Description:
Introduction to computer architecture and machine language programming, internal representation of data and programs, and assembly language programming. Machine and assembly language implementations of constructs from higher-level languages such as C (including recursion and floating-point arithmetic) are studied.

Type:
Quantitative Reasoning

• CMPSC-F265 Data Structures & Algorithms

Prerequisites:
CMPSC F132

Credits:
Includes topics such as strings, stacks, queues, lists, trees, graphs, sorting, searching, hashing, dynamic storage allocation, and analysis of algorithms. Most programming will be done in the C language. Normally offered each semester.

Type:
Quantitative Reasoning

**CMPSC-F331 Object Oriented Programming**

Prerequisites:

CMPSC-F265

Credits:
4.00

Description:

Object-Oriented Programming in C++ is taught using Trolltech's multi-platform Qt library and other open-source libraries and tools. Emphasis is placed on program design and code re-use. Topics include: encapsulation, inheritance and polymorphism, UML, refactoring, parent-child relationships, properties, event-driven programming, test cases, regular expressions, constraints, XML, design patterns, and graphical user interfaces. We deal with some operating system and programming environment issues and also with code packaging. C++ is a very large language, so we do not attempt to cover it all. Instead we work with a carefully selected subset of language elements that permits students to exploit the powerful Qt libraries and write robust, idiomatic, and interesting code. By the end of the course, the student should have a good command of C++, facility using and building libraries, an understanding and appreciation of the design patterns that we covered, and a well-established discipline of refactoring and code reuse.

Prerequisite: CMPSC F265 (which may be taken concurrently). Normally offered each semester.

Type:
Quantitative Reasoning

**CMPSC-F333 Organization of Programming Languages**

Prerequisites:
An introduction to functional programming and to the meaning and implementation of various programming language features. The course begins with a brief introduction to the Scheme language, which is then used to write interpreters for small languages that contain features typical of larger, more realistic languages. Normally offered each spring semester.

Type:
Quantitative Reasoning

• CMPSC-F345 Software Engineering

This course introduces the fundamental principles of software engineering. Requirement specification and life cycles are emphasized. Topics include requirements analysis and specification, analysis and design, architecture, implementation, testing and quality, configuration management. Professional ethics considerations will be explored and emphasized throughout the course. Prerequisite: CMPSC F265. 1 term - 4 credits. Normally offered each year.

Type:
Quantitative Reasoning

• CMPSC-F353 Architecture of Computer Systems

Prerequisites:

CMPSC F253 and CMPSC F265.

Credits:
Description:
This course deals with the structure and operation of the major hardware components of a computer. Topics include basic logic design, basic datapath construction, basic pipelining, I/O system design, issues in memory hierarchy and network interface design. Normally offered each fall semester.

Type:
Quantitative Reasoning

- CMPSC-F355 Operating Systems

  Prerequisites:
  CMPSC F353 & CMPSC F265 and Working knowledge of C++.

  Credits:
  4.00

  Description:
  This course presents an overview of modern operating systems, from the points of view of an application developer and of a system developer. It covers process management, scheduling, concurrency management, multi-threading, memory management, and file system organization. Intensive programming assignments in the C language and in an assembly language help students to learn the POSIX application programming interface (API) and the low-level organization of a general-purpose operating system. Normally offered each spring.

  Type:
  Quantitative Reasoning

- CMPSC-F363 Intro to Database Systems

  Prerequisites:
  CMPSC 265 and MATH 285

  Credits:
  4.00
This is an introduction to the design and use of database systems --- systems that manage very large amounts of data. Topics covered include Entity-Relationship (E/R) data model, Relational data model, object-oriented model, and the conversion of E/R and relational models. We shall also learn some database languages, both concrete and abstract, including Structured Query Language (SQL), Object Query Language (OQL), relational algebra, etc. We will introduce the semistructured data, such as the popular Extensible Markup Language (XML), and their usage in database systems as well. The course is intended for computer science students who need to have an in-depth understanding of modern database systems. Normally offered each fall semester.

**Type:**

Quantitative Reasoning

- **CMPSC-F541 Advanced Databases**

  **Credits:**

  4.00

  **Description:**

  This course is an advanced continuation of Intro to Database Systems (CMPSC F363)

  **Type:**

  Quantitative Reasoning

- **CMPSC-R120 Programming for WWW Recitation**

  **Credits:**

  0.00

  **Description:**

  Taken simultaneously with CMPSC 120. Students work with lab instructors to do work that enhances the course understanding. Such work can include practice problems, supervised programming time, as well as question-answer time and group project work. The hybrid version of the recitation: Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. On alternate weeks students do individual programming and reading.
CMPSC-R131 Recitation for Intro to Computer Programming

Prerequisites:

Must be taken concurrently with CMPSC F131

Credits:

0.00

Description:

Taken simultaneously with CMPSC 131. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems and programming, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do online work such as lecture demonstration of additional examples or homework projects.

CMPSC-R132 Recitation for Computer Science II

Prerequisites:

Must be taken concurrently with CMPSC 132

Credits:

0.00

Description:

Taken simultaneously with CMPSC 132. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems and programming, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do online work such as lecture demonstration of additional examples or homework projects.

EC-101 Applied Microeconomics

Credits:

4.00
Introduction to the organization and operation of a market economy with a focus on how it allocates scarce resources; development of the economic way of thinking. The analysis of the theory of consumer demand and the profit-maximizing behavior of firms; examination of pricing and output decisions of firms under conditions of competition and imperfect competition in a global marketplace. Analysis of markets for labor and capital. Policy issues include price ceilings and floors, trade barriers, competition and monopoly. Required of all majors in Economics. Normally offered every semester.

Type:
Social Science, BSJ SOCIAL SCIENCE

- **EC-H101 Honors Principles of Microeconomics**
  
  **Prerequisites:**
  
  Honors Section Only: GPA of 3.3 or higher required.
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Introduction to the organization and operation of a market economy with a focus on how it allocates scarce resources; the analysis of consumer demand and profit maximizing behavior of business; examination of pricing and output decisions under conditions of competition, monopoly and imperfect competition. Analysis of markets for labor and capital. Policy issues include price ceilings and floors, competition and monopoly. Normally offered every semester.
  
  Type:
  
  Social Science, BSJ SOCIAL SCIENCE

- **EC-102 Global Macroeconomics**
  
  **Credits:**
  
  4.00
  
  **Description:**
This course provides an analysis of relationships among variables such as inflation, employment, economic growth, national income, and the supply of money. Heavy emphasis is placed on the role of government in setting both fiscal and monetary policy goals to achieve a stable economy. Balance of trade and exchange rates are examined to help provide an understanding of the global economy. Required of all majors and minors in Economics. Normally offered every semester.

Type: Social Science, BSJ SOCIAL SCIENCE

- **EC-H102 Honors Principles of Macroeconomics**

  Credits: 4.00

  Description:

  The measurement of economic growth; introduction to the theory of determination of national income and the price level; unemployment and inflation; theories on economic growth and the role of labor and capital in economic growth; functioning and impact of the monetary system; analysis of monetary and fiscal policies for economic stabilization; international transactions and their influence on the domestic economy. Prerequisites: GPA of 3.2 or higher. Normally offered every year.

  Type: Social Science, BSJ SOCIAL SCIENCE

- **EC-122 Poverty and Inequality**

  Credits: 4.00

  Description:

  This course looks at economic inequality, with a particular focus on those in the United States who have low or no incomes - the poor. Measures inequality, identifies the poor, and considers a variety of explanations for poverty. Evaluates the purposes and effects of a range of public policies that might help alleviate poverty. Since race and gender play prominent roles in discussions of poverty, this course also considers issues pertaining to race and gender discrimination, and so examines the economics of both poverty and of discrimination. Cultural Diversity A.

  Type:
• EC-131 Environmental Economics

Credits:
4.00

Description:
Identifies the environmental effects of economic activity, including polluted water and air, noise, and radiation, and values their costs and benefits. Analyzes mechanisms, including taxes and permits, for achieving a socially preferable level of pollution. Traces role played by institutions, including common ownership, in affecting environmental decay. Resource depletion (of oil, forests, and fisheries) and appropriate policy responses.

Type:
Social Science,BSJ SOCIAL SCIENCE

• EC-141 Development Economics

Credits:
4.00

Description:
Why do so many countries remain so poor? Why have some (e.g. the Asian tigers) grown so rapidly? Why have most of the countries of Eastern Europe and the Former Soviet Union been slow to ignite economic growth? These questions are addressed by looking at domestic factors (government policies, resource endowments) as well as the international environment (mobile investors, international financial institutions). Asks what economic choices these countries face now. Normally offered yearly. Cultural Diversity B

Type:
Cultural Diversity Opt B,BSJ SOCIAL SCIENCE

• EC-151 Economic & Human Geography

Credits:
4.00

Description:
The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

Type:
Cultural Diversity Opt B, Social Science, BSJ SOCIAL SCIENCE

- **EC-311 Intermediate Micro Theory**

  Prerequisites:

  EC 101 and EC 102

  Credits:

  4.00

  Description:

  Theory of consumer behavior and demand. Theory of production and costs of production. Theory of the firm, and price and output decisions in different market structures, i.e., under perfect competition, monopoly, monopolistic competition and oligopoly. Decisions relating to pricing and employment of various inputs (labor and capital) under perfectly competitive, and less than perfectly competitive, resource markets. Required of all majors in Economics. Normally offered every semester.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- **EC-312 Intermediate Macro Theory**

  Prerequisites:

  EC 101 and EC 102
This course covers the neoclassical and Keynesian models of aggregate economic activity. Coverage of the measurement of economic variables, such as aggregate income, the inflation rate, and the unemployment rate. Examines the behavior of the economy under conditions of price flexibility in the long run and price rigidity in the short run under rational and adaptive expectations. Analysis of the effect of changes in taxes and government expenditures, monetary policy and deficits on the economy. Coverage of the sources of economic growth. Required of all majors in Economics. Normally offered every semester.

Type:

Social Science, BSJ SOCIAL SCIENCE

**EC-331 History of Economic Thought**

Credits:

4.00

Description:

Presents the leading contemporary schools of economic thought as the outcome of theoretical and philosophical controversies that began with the ancient Greeks and that continue today. The course covers the major contributors to economic thought, including Aristotle, Aquinas, the mercantilists, and the contributors to the 18th-century enlightenment, notably Adam Smith and David Hume. Going forward, it considers Marx, the neoclassical school of Jevons, Menger and Walras and the Keynesian school, along with some of the more modern schools such as behaviorism, institutionalism and cognitive economics. The contributions of the economists and philosophers studied in the course are considered in context of the times in which they wrote and lived. Students will acquire a grasp of the principal tenets of contemporary economic theory as well as an understanding of the historical origins of the disputes that still divide economists on major theoretical and philosophic issues.

Type:

Social Science, BSJ SOCIAL SCIENCE

**EC-340 Economics of Energy and Natural Resources**

Prerequisites:
Take EC-101;

Credits:

4.00

Description:

This course applies economic analysis to identify the origins, consequences, and policy implications of problems related to renewable and non-renewable natural resources, with particular attention to energy. Resources considered include forests, fisheries, water, minerals, and land. Energy resources covered include oil, gas, coal, nuclear, and alternatives (wind, solar, biomass, hydrogen, etc.), as well as electricity. Concepts examined include externalities, learning-by-doing, peak-load pricing, regulation, sustainability, cost-benefit analysis, and the commons problem.

Type:

BSJ SOCIAL SCIENCE, Social Science

- EC-402 Mathematical Economics

  Prerequisites:

  EC 101, EC 102, and MATH 134, MATH 146, or MATH 161.

  Credits:

  4.00

  Description:

  This course introduces the mathematical basis of economic theory. Emphasis is placed on the mathematical tools that have been developed for various applications in microeconomic and macroeconomic analysis. The techniques of comparative-statics analysis are developed. Univariate and multivariate calculus are then presented in the context of unconstrained and constrained optimization. The course concludes by introducing the foundations of discrete-time and continuous-time dynamic optimization.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- EC-421 Public Economics: Tax and Budget

  Prerequisites:
EC 101 and EC 102

Credits:
4.00

Description:
The theory of tax policy and tax structure. The effects on economic behavior (including labor supply, saving, risk-taking and investment, charitable giving, and growth) of different taxes (income, sales, value-added, inheritance, wealth, property). Tax equity, efficiency and incidence, in the United States and in comparative perspective. Additional topics include modeling state taxes; social security and pensions; and tax compensation. Normally offered yearly.

Type:
Social Science, BSJ SOCIAL SCIENCE

- **EC-423 Economics of Regulation**
  
  Prerequisites:
  
  EC 101 and EC 102
  
  Credits:
  
  4.00
  
  Description:
  
  This course examines regulation and analyzes the structure, conduct, and performance of American industry. Monopoly and strategic behavior in oligopoly and monopolistic competition are considered. U.S. antitrust law and the effect of regulatory laws on industrial performance are explored. Regulatory practices, rate setting, deregulation, public-enterprise pricing, and issues in privatization are examined, with an emphasis on case studies and policy analysis. Normally offered every other year.
  
  Type:
  
  Social Science, BSJ SOCIAL SCIENCE

- **EC-430 Int'l Trade Theory & Policy**
  
  Prerequisites:
EC 101 and EC 102

Credits: 4.00

Description:

This course examines theories of international trade. The policy implications of each theory are explored and the effect of trade on the welfare of the nation is examined. Also the development of trade blocs and the the political economy of trade are studied. Normally offered every year.

Type:

Social Science, Asian Studies, BSJ SOCIAL SCIENCE

- EC-433 Public Choice

Prerequisites:

EC-101 and EC-102

Credits: 4.00

Description:

This course considers the degree to which it is possible to explain, predict, and guide political decision through the application of economic analysis. The course is organized around two competing visions of public choice: (1) a traditional organic approach that sees the core problem for public choice as requiring the maximization of social welfare and (2) a newer contractual approach that sees that problem as requiring attention to the institutional framework within which political decisions are made. Topics to be considered include the Arrow paradox and other problems in aggregating individual choices, rent-seeking, the Leviathan hypothesis, and non-market demand-revealing methods.

Type:

Social Science, BSJ SOCIAL SCIENCE

- EC-442 International Monetary Economics

Prerequisites:
EC 101 and EC 102
Credits: 4.00
Description: The balance of payments and foreign exchange markets and instruments, and the determination of exchange rates. Balance-of-payments adjustments under alternative exchange-rate systems, international liquidity, international economics policy and open economy macroeconomics.
Type: Social Science, BSJ SOCIAL SCIENCE

- EC-445 The Economics of the European Union
  Prerequisites: EC 101 and EC 102
  Credits: 4.00
  Description: An economic analysis of the European Union, the history of European monetary and economic integration, and the creation of the Euro. A survey of the development and evolution of key European policies, such competition, industry, agriculture, environment, regional, etc. A discussion of economic implications of the enlargement of the European Union, as well as its trade relations with the U.S. and other countries within the context of the World Trade Organization.
  Type: Social Science, BSJ SOCIAL SCIENCE

- EC-450 Applied Econometrics
  Prerequisites: STATS 350 or permission of instructor
Description:

A brief review of statistical methods, including probability theory, estimation, and hypothesis testing. This background is used in the construction, estimation, and testing of econometric models. The consequences of a misspecified model, where the assumptions of a classical regression model are violated, are studied and the appropriate remedial measures are suggested. Other topics include dummy variables, binary choice models, and autoregressive models. Emphasis is on applied aspects of econometric modeling. There is extensive use of statistical software for data analyses. Normally offered every year.

Type:

Social Science, BSJ SOCIAL SCIENCE

- **EC-460 Game Theory**

Prerequisites:

EC 101 and EC 102

Credits:

4.00

Description:

This course introduces students to the foundations of game theory using applications from economics and everyday decision-making. The course examines the common strategic elements of interactions between consumers and producers, governments and citizens, politicians and their constituencies, countries and their trading partners, and various other participants in social relationships. The course provides a theoretical framework for modeling strategic interaction, beginning with the development of the concept of a Nash equilibrium, reputation, signaling, collective-action problems, and voting procedures and strategies. Normally offered every other year.

Type:

Quantitative Reasoning

- **EC-483 Money, Banking & Financial Markets**
EC 490 Senior Seminar in Economics

Prerequisites:
Senior Standing; Or permission of Undergraduate Director.

Credits:
4.00

Description:
This is a required course for all students majoring in economics, to be taken in the spring semester of their senior year. Students are required to develop an economic thesis project in consultation with the professor for the course and to present it to the class.

Type:
BSJ SOCIAL SCIENCE, Social Science

• EC-503 Internship in Economics

Prerequisites:
Instructor's consent required

Credits:

4.00

Description:

Approximately 12 hours per week working in a position designed to give the student responsibility and a learning opportunity in economics. Interested students should consult the instructor in advance.

Type:

Social Science, BSJ SOCIAL SCIENCE

• EC-504 Economic Competitiveness: Theory and Practice

Prerequisites:

Instructor's consent required

Credits:

4.00

Description:

This course examines the concept of economic competitiveness among nations and states and its usefulness to policymakers seeking to improve economic conditions. The emphasis will be on state-based economic competitiveness. We will read the current literature on economic growth and competitiveness and explore the current controversy surrounding the shortcomings of business climate indices. Special attention will be given to Beacon Hill Institute’s index which attempts to identify the states with the sets of policies that sustain long-term economic growth and sustainable high incomes for citizens. The student will apply a stress test to the BHI index identifying its strengths and weaknesses. To learn how the index is used by professionals, the student will also compare the index against similar measures and interview at least two practitioners on how their states apply the index. The student will meet regularly with her advisor and submit a research paper and a professional memorandum advising BHI on how best to improve the index.

Type:

Expanded Classroom Requirement

• EC-510 EC Independent Study
Prerequisites:

An independent study form must be submitted to the CAS Dean's Office.

Credits:

1.00- 5.00

Description:

Independent study in economics

Type:

Social Science, BSJ SOCIAL SCIENCE

• EC-D102 Principles of Macroeconomics

Prerequisites:

FSL or EF-CAPS students only.

Credits:

4.00

Description:

This cohort restricted section, this course provides an analysis of relationships among variables such as inflation, employment, economic growth, national income, and the supply of money. Heavy emphasis is placed on the role of government in setting both fiscal and monetary policy goals to achieve a stable economy. Balance of trade and exchange rates are examined to help provide an understanding of the global economy. Required of all majors and minors in Economics.

Term:

Offered Both Fall and Spring

Type:

Social Science, BSJ SOCIAL SCIENCE
• ECE-101 Digital Electronics

Prerequisites:

ECE L101 MUST BE TAKEN CONCURRENTLY

Credits:

3.00

Description:

This course introduces the elements and tools of digital design. The course covers Boolean algebra, Karnaugh maps, Logic gates and digital circuits, analysis and design of combinational and sequential circuits, and timing issues. Adders, decoders, multiplexers, flip-flops, counters, and registers are implemented using TTL or CMOS ICs as well as VHDL-programmed FPGAs. Formerly ECE 203

Term:

Offered Fall Term

• ECE-L101 Digital Electronics-Lab

Prerequisites:

ECE 101 MUST BE TAKEN CONCURRENTLY.

Credits:

1.00

Description:

Illustrates the concepts of ECE-101. Exercises in various forms of Combinational and Sequential Logic design. Use of test equipment. Design projects will include a digital security system, use of PSPICE to verify feasibility of some designs. FPGA board citing Xilinx, software development tools from Xilinx and other third parties are introduced. Offered yearly. Formerly ECE L203

Term:

Offered Fall Term

• ECE-105 Circuit Theory I
Prerequisites:

ECE L105 must be taken concurrently; MATH 165 may be taken concurrently

Credits:

3.00

Description:

Basic elements and analysis techniques of DC circuits. Coverage includes resistors, capacitors, inductors, and sensors; independent and dependent sources. Ohm's law, power, energy, and power transfer. Kirchoff's voltage and current laws; Nodal and Loop analyses; Thevenin and Norton equivalents; step and transient responses of first-order systems; time constants. Emphasis on functional circuits. Prerequisite: Must be taken concurrently with ECE L105. Must take MATH 121 (must have a minimum grade of C in preqs.) 1 term - 3 credits.

Term:

Offered Spring Term

- **ECE-L105 Circuit Theory Lab I**

  **Prerequisites:**
  
  ECE 105 must be taken concurrently

  **Credits:**

  1.00

  **Description:**

  The Circuit Theory Lab I is designed to supplement the Circuit Theory I course.

  **Term:**

  Offered Spring Term

- **ECE-205 Circuit Theory II**

  **Prerequisites:**
ECE 105 with C or better; MATH 166 & PHYS 152 concurrently

Credits: 3.00

Description:

Term: Offered Fall Term

- **ECE-L205 Circuit Theory II Lab**

  Prerequisites:
  
  ECE 205 MUST BE TAKEN CONCURRENTLY

  Credits: 1.00

  Description:
  Illustrates the concepts of ECE 205. Simulations with PSPICE, LABVIEW, NXT Robotics, INCSYS Power Simulator, Mathematica; construction and design. First order, second order transients, ideal and non-ideal transformer circuits, sinusoidal steady state circuits, power grid simulation. Offered yearly.

  Term: Offered Fall Term

- **ECE-206 Solid State Devices and Circuits**

  Prerequisites:
  ECE L206 must be taken concurrently; ECE 205(must have a minimum grade of C in preqs.)
Review of Thevenin and Norton Equivalent circuits. Frequency Domain analysis and Bode Plots. Representation of an active device by its Gain, Input and Output Resistance. Thorough coverage of op amps - circuits, applications, and inherent limitations. Introduction to semiconductor physics and the PN junction. Diode circuits, applications, and models. Zener diodes and power supplies. Ripple estimations. The Bipolar Junction Transistor - large and small signal analyses. Active, cutoff, and saturation region characterization. Hybrid Pi and T models. Basic transistor configurations - common collector, common base, and common emitter - along with their characteristics, applications, and tradeoffs. Estimation of bandwidth using open circuit time constants. Prerequisite: ECE 205. Must have at least a C in this. Co-requisite: ECE L206

Term:
Offered Spring Term

• **ECE-L206 Solid State Devices & Circuits Lab**
  Prerequisites:
  ECE 206 must be taken concurrently

  Credits:
  1.00

  Description:
  The Solid State Devices & Circuits Lab is designed to supplement the Solid State Devices & Circuits course.

  Term:
  Offered Spring Term

• **ECE-225 Linear Systems**
  Prerequisites:
  MATH 166 and ECE 205 with a minimum grade of C; ECE L225 Concurrently.
Description:

Term:

Offered Spring Term

- ECE-L225 Linear Systems Lab
  
  Prerequisites:
  
  MUST BE TAKEN CONCURRENTLY WITH ECE 225

  Credits:

  1.00

  Description:

  The Linear Systems lab is designed to supplement the Linear Systems course. Matlab simulation of linear systems, Hardware Implementation of Analog Filters, measurement of the transfer function.

  Term:

  Offered Spring Term

- ECE-306 Solid State Devices and Circuits II

  Prerequisites:

  ECE-206 with a minimum grade of C. ECE L306 concurrently

  Credits:
3.00

Description:

Continuation of Solid State Dev & Circuits I, with emphasis on MOSFET field effect transistors; Physical structure, I-V characteristics, modeling, use as a switch and CMOS inverter, biasing circuits, and basic amplifier configurations - common drain, common gate, and common source. Differential Amplifiers - BJT and MOSFET implementations, along with small and large signal analysis. Multistage circuits, active loads. Design of current source and current mirrors. Internal capacitance and high frequency limitations. Low midband, and high frequency analyses of transistor amplifiers. Miller effect. Open and Short Circuit Time Constants. Cascade and Cascode configurations. Frequency response of amplifiers. Significant circuit design activities. Course tightly coupled to ECE-L306.

Term:

Offered Fall Term

• ECE-L306 Solid State Devices & Circuits II Lab

Prerequisites:

ECE 306 must be taken concurrently

Credits:

1.00

Description:

Illustrates the concepts of ECE 306. Exercises that help meld the practical aspects with the theoretical concepts taught in ECE 306. Biasing and design of MOSFET amplifiers. Construction of differential and multistage amplifiers. Investigation of different current source implementations. Simulation of bandwidth improvement using Cascode structures. Course concludes with a multistage design challenge using MOSFETs to reach a specified gain, output impedance and bandwidth objective provided by the instructor.

Term:

Offered Spring Term

• ECE-307 Electric Power Systems - Analysis and Design

Prerequisites:
Credits: 4.00

Description:

This course is a first course in understanding the components that compose the high power grid. Generation of power; transmission line characteristics, load impacts. Real and reactive power along with compensation techniques. Transformers. Synchronous generators and motors. Power flow. Power quality. Transient and dynamic stability issues. Handling faults, overvoltage and surge protection. Electronic control by high power devices such as thyristors, relays, and circuit breakers. HVDC examined. Recent developments and opportunities in the Power field. A strong emphasis placed on problems solving and representative exercises.

- **ECE-310 Special Topics in Engineering**

  Prerequisites:
  
  ECE 206 and MATH 166 with a minimum grade of C

  Credits: 4.00

  Description:

  Selected topics in Computer Engineering or Electrical Engineering. Offered to upper level students by permission of instructor. Prerequisite: ECE 206 and MATH 166, or instructors' approval. 1 term - 4 credits. Minimum grade of C in prerequisites.

- **ECE-311 Embedded Systems**

  Prerequisites:

  ECE-203 and ECE 206 with a minimum grade of C AND ENS 333 OR CMPSC F131 with a minimum grade of C; Must take ECE L311 concurrently

  Credits: 3.00

  Description:
This course will introduce the fundamentals of embedded micro controllers for system level applications: fundamental elements - sensors or transducers, microcontrollers, and the interfacing to external components. Procedural methods for design of the complete embedded system are developed. Programming using assembly, and C languages is utilized. Must take ECE L311 concurrently. Prerequisites: ECE 203 AND ECE 206, AND ENS-333 or CMPSC F131 (minimum grade of C in prereqs.) 1 term - 3 credits.

Term:
Offered Spring Term

- **ECE-L311 Embedded Systems Lab**
  
  Prerequisites:
  
  Must take ECE 311 concurrently
  
  Credits:
  
  1.00
  
  Description:
  
  The Embedded Systems Lab is designed to supplement the Embedded Systems course.

  Term:
  Offered Spring Term

- **ECE-325 Statistics for Engineering and Science**
  
  Prerequisites:
  
  MATH 166 with a minimum grade of C; Must take ECE L325 concurrently
  
  Credits:
  
  3.00
  
  Description:
  
  Understanding the fundamentals of probability and statistics of experimental data. Measures of central tendency, variation, probability, events, Bayes Rule, discrete and continuous random variables, discrete and continuous distributions including the binomial distribution, normal distribution, chi-
square distribution and student distribution, covariance, central limit theorem, hypothesis testing, linear regression, signal processing statistics (EE students), categorical data analysis (non-EE students). Use of Mathematica's statistical packages central to this course. Final project is a project with Biology measuring rat whisker resonance.

Term:
Offered Spring Term

- ECE-L325 Statistics for Engineering and Science Lab

Prerequisites:
ECE L325 MUST BE TAKEN WITH ECE 325

Credits:
1.00

Description:
The Engineering Statistics and Probability lab is designed to supplement the Engineering Statistics and Probability course.

Term:
Offered Spring Term

- ECE-335 Control Systems

Prerequisites:
ECE 225; Min Grade of C in Prereq. ECE L335 Concurrently.

Credits:
3.00

Description:
Introduction to feedback control systems; control system characteristics (stability, sensitivity, disturbance rejection, steady-state accuracy, transient response); stability analysis; root-locus analysis and design; frequency-response analysis and design; analysis and design of digital control systems. Normally offered bi-yearly.
• **ECE-L335 Control Systems Lab**

  Prerequisites:
  
  ECE 335 MUST BE TAKEN CONCURRENTLY.

  Credits:
  
  1.00

  Description:
  
  The Control Systems lab is designed to supplement the Control Systems course.

• **ECE-390 Data & Computer Communications Lab**

  Prerequisites:
  
  ECE 225 with a minimum grade of C;

  Credits:
  
  3.00

  Description:
  
  Basic principles and topics in data communication, local area networks, wide area networks, communication architectures and protocols. Data transmission, encoding, multiplexing, circuit switching, packet switching, frame relays, and asynchronous transfer mode are also discussed. The TCP/IP protocol suite is studied and a project involving configuring, implementing, and installing a network is carried out during the semester. Prerequisite: ECE 225 or instructor's approval. 1 term - 3 credits. Must be taken concurrently with ECE L390.

  Term:
  
  Offered Fall Term
Must be taken concurrently with ECE 390

Credits:
1.00

Description:
The Data and Computer Communications lab is designed to supplement the Data and Computer Communications course.

Term:
Offered Fall Term

• ECE-403 Applied Electromagnetics

Prerequisites:
ECE 205 and MATH 265 with a minimum grade of C; ECE L403 must be taken concurrently

Credits:
3.00

Description:
Electrostatics and magnetostatics, including Coulomb's law, Gauss's law, Biot-Savart law and Ampere's law, vector operations in rectangular, cylindrical, and spherical coordinates, divergence theorem and Stokes theorem, electric fields in materials, Lorentz force, magnetic torque, Faraday's law, Maxwell's equation, wave propagation, transmission lines with Smith charts, rectangular waveguides, Hertzian dipole antenna; examples related to power when applicable.

Term:
Offered Spring Term

• ECE-L403 Applied Electromagnetics Lab

Prerequisites:
Must be taken concurrently with ECE 403
**The Applied Electromagnetics Lab** is designed to supplement the Applied Electromagnetics course.

**Term:**
Offered Spring Term

**ECE-410 Communication Systems**

**Prerequisites:**
ECE 206, ECE 225 and MATH 265 with a minimum grade of C; L410 concurrently

**Credits:**
3.00

**Description:**

**ECE-L410 Communications Systems Lab**

**Prerequisites:**
ECE 410 must be taken concurrently

**Credits:**
1.00

**Description:**
Illustrates the concepts of ECE 410. Exercises will focus both on communication system components and in the construction of a complete communication system. Introduction to FSK, DTMF, Phase lock loops, AM and FM modulation, oscillators, A/D and D/A conversion and the Nyquist rate. Wireless transmissions. Troubleshooting of non-working systems. Students have flexibility in the design and construction a full communication system which includes digitization, rearrangement in parallel and serial formats, transmission over a distance, and reconstruction back to its original analog form.

- **ECE-411 Senior Project I**

  **Prerequisites:**

  ECE 205, ECE 306, ECE 225, MATH 265; permission of the instructor may be required.

  **Credits:**

  4.00

  **Description:**

  The Senior Project provides a significant opportunity for students to direct all of their previous training and learning towards one major endeavor. It has been modified from previous years to extend over two semesters (instead of one) to facilitate a more comprehensive effort in both the planning and execution of the project. Although resources and guidance are provided for each student, this course still requires them to take full responsibility to plan their time, manage, and implement their project. In Part I the student creates their project proposal. Over a fourteen-week period the student is subjected to the practical stress of completing and delivering in professional fashion a project of their own choosing (with endorsement from an appropriate faculty advisor or industrial mentor). This period includes the following objectives: selection and careful definition of a project; a review of background information; a selection of the desired approach with justification; identification of resources needed; an outline of the project implementation timetable with desired milestones; a delineation of how the completed project performance might be evaluated. Weekly progress reports and meeting with their advisor are required. A formal proposal document is reviewed by department members (and possibly Industrial constituents) and may go through numerous iterations to be deemed 'acceptable'. Along the way informal oral presentations of both the 'general' and 'technical' aspects of their project will be presented to the rest of their peer group. A formal presentation of the project proposal is made to an audience of peers, faculty, and outside advisors. **Prerequisites: ECE 205, ECE 306, ECE 225, MA265; permission of the instructor may be required.**

  **ECR**

  **Type:**

  Expanded Classroom Requirement

- **ECE-412 Senior Project II**

  **Prerequisites:**
In Part II the student implements, documents, and presents their completed project. Having defined their project, students gather the resources necessary and proceed to execute their designs. This period will include the construction, testing, troubleshooting, refinement, and evaluation of their project. A formal presentation of the project is made. A professional caliber documentation of the project is also required, and may go through numerous iterations of review. The final project report must consider most of the following: environmental impact, sustainability, manufacturability, ethics, health and safety issues, and political concerns. Time management, prioritization of process, formal communication, overcoming obstacles and meeting deadlines are monitored by the project advisor. Weekly reports and meetings are expected. The advisor also serves as a resource for the student. However, full responsibility for the success of the project rests on the student. Cross-disciplinary projects are encouraged.

Type:

Expanded Classroom Requirement

- **ECE-413 Wireless Networks**

  Prerequisites:

  Must be taken concurrently with ECE L413. ECE 225 with minimum grade of C. ECE 390 recommended.

  Credits:

  3.00

  Description:

  This course explores key topics in the field of wireless communications and networking including wireless technologies and architectures, wireless networks and protocols, and wireless LANs. Topics include antennas and propagation, signal encoding techniques, spread spectrum, error control techniques, satellite communications, cellular and cordless systems, wireless protocols, and wireless LAN technology. This course is intended for senior students who have had some prior exposure to data communications concepts.

- **ECE-L413 Wireless Networks Lab**

  Prerequisites:
Must be taken concurrently with ECE 413.

Credits:

1.00

Description:

The Wireless Networks lab is designed to supplement the Wireless Networks course.

- **ECE-414 Senior Project Proposal**

  Prerequisites:

  Take ECE-101, ECE-206, MATH-165;

  Credits:

  1.00

  Description:

  The aim of this course is for students to generate a thoughtful and well-written senior project proposal. This course will provide guidelines and critiquing for that purpose. By the end of the course, students will have narrowly identified their project, performed a review of current available related technology, and selected the approach they will pursue. They will also establish a parts list, timetable, set of milestones, and basis or procedure for determining an answer to the question how good is it? At the end of the course they will formally present their project and write a comprehensive project proposal document. Once accepted, they are permitted to take ENS 415 Senior Project. Note that this course is focused on the process of creating a viable proposal. Enough flexibility exists that students may either implement the project they documented in this course when they take ENS 415, or may pursue an alternative project if desired. Also note that this course replaces ECE 411 for the graduating class of 2016.

- **ECE-415 Senior Project**

  Prerequisites:

  Take ECE-414;

  Credits:

  4.00

  Description:
For the senior project the student implements, documents, and presents their completed project of the proposal generated in ENS 414. Having defined their project, students gather the resources necessary and proceed to execute their designs. This period will include the construction, testing, troubleshooting, refinement, and evaluation of their project. A formal presentation of the project is made. A professional caliber documentation of the project is also required, and may go through numerous iterations of review. The final project report must consider most of the following: environmental impact, sustainability, manufacturability, ethics, health and safety issues, and political concerns. Time management, prioritization of process, formal communication, overcoming obstacles and meeting deadlines are monitored by the project advisor. Weekly reports and meetings are expected. The advisor also serves as a resource for the student. However, full responsibility for the success of the project rests on the student. Cross-disciplinary projects are encouraged. Note: Replaces ECE 412 for the graduating class of 2016.

Type:

Expanded Classroom Requirement

- **ECE-430 Digital Signal Processing**

  **Prerequisites:**
  
  ECE 225, ECE 203 with minimum grade of C; ECE L430 concurrently

  **Credits:**
  
  3.00

  **Description:**
  
  Discrete signals and systems, digital simulation of analog systems, Z transforms, recursion equations, finite-order systems, Fourier transforms, line spectra and Fourier series, discrete Fourier series and Fast Fourier Transforms (FTT), sampling and interpolation, mean-square approximations, non-recursive and recursive filters, selected topics on algorithms, design and applications of digital signal processing. There will be an end-of-semester design project that will involve students' creativity, design of open ended projects, formulation of alternative solutions, detailed system description, realistic constraints (economic factors, safety, reliability, aesthetics ethics, and social impact).

  **Term:**

  Offered Fall Term

- **ECE-L430 Digital Signal Processing Lab**

  **Prerequisites:**
  
  ECE 430 must be taken concurrently
Illustrates the concepts of ECE 430. This laboratory course uses MATLAB, Simulink, and the Texas Instruments 6713 DPS board to design, test and implement various projects. The students will also learn how to use FPGA boards to design and implement various DSP systems. There will be a design project at the end of the course designed to synthesize what the students have learned.

Term:

Offered Fall Term

- **ECE-510 Independent Study**

  Prerequisites:

  An independent study form must be submitted to the CAS Dean's Office.

  Credits:

  1.00- 6.00

  Description:

  This is an independent study in electrical and computer engineering. Topics will vary.

- **EHS-110 Introduction to Education**

  Credits:

  4.00

  Description:

  Working with children and adolescents is a facet of many professions. This course will introduce students to the study of education occurring in formal and informal settings. This course focuses on the relationships among, and between, teachers, discourse, and community. Students will glean insight into the relationship of school and society as well as power and control in American Education. Required of all education minors. Five hours of field work required.
• EHS-202 Educational Psychology
  Credits:
  4.00
  Description:
  Examines the nature and development of human abilities and the teaching-learning process. Considers the facts and generalizations of child and adolescent growth and development, working with diverse cultures, and special needs children in school settings. Ten hours of field work.

• EHS-203 Service Learning: Pre-K Outreach and Tutoring
  Credits:
  4.00
  Description:
  Students complete a minimum of 35 hours of tutoring in an educational setting, or community organization, in conjunction with a weekly seminar on campus. Open to all majors. No previous experience required.
• **EHS-205 Service Learning: Community Tutoring Project**

**Prerequisites:**

This class fulfills the Expanded Classroom Requirement

**Credits:**

4.00-8.00

**Description:**

Students complete 35 hours per semester of educational tutoring in a local school (K-5), in conjunction with a weekly seminar on campus. Open to all majors. No previous experience required.

**Term:**

Offered Both Fall and Spring

• **EHS-206 Reading Theory, Pedagogy & Practice**

**Credits:**

4.00

**Description:**

Students will become knowledgeable about the various approaches to teaching reading, decoding, vocabulary development, and comprehension. The use of study skills in the Middle School content areas will be stressed. Students will be introduced to formal and informal assessment techniques to determine reading instructional needs. Normally offered yearly.
• EHS-207 Reading and Writing in the Content Areas

Credits:
4.00

Description:
In-depth investigation of leading theoretical approaches to teaching reading and writing in the content areas. Topics include: diagnosing problems, individualizing instruction, understanding IEP’s, and integrating reading and writing into the curriculum and instruction. Normally offered yearly.

Type:
Social Science

• EHS-208 Service Learning: College Access

Prerequisites:
Instructor's Consent required

Credits:
4.00

Description:
Students complete a minimum of 35 hours of tutoring and coaching in an educational setting, or a community organization in conjunction with a weekly seminar on campus. Programs include COACH, Connections to College, and others. Open to all majors. No previous experience required.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement, Social Science
• EHS-209 Reading and Writing in the Classroom

Credits:
4.00

Description:
Students will become knowledgeable about the various approaches to teaching reading and writing in the content areas. This course is designed for teaching the necessary literacy skills in both Middle School and High School. Topics include: formal and informal assessment techniques, differentiation of instruction, diagnosing problems and integrating reading and writing into curriculum and instruction.

• EHS-210 Service Learning: Alternative Spring Break

Prerequisites:
Open to all majors, Instructor’s signature required

Credits:
4.00

Description:
Students complete all research, travel, and reporting requirements in conjunction with Suffolk University’s Alternative Spring Break. Open to all majors. No previous experience required.

Term:
Offered Spring Term

Type:
Social Science

• EHS-310 Culturally Responsive Education

Credits:
4.00
The relationship between cultural diversity and schooling is explored by examining impediments to academic achievement and advancement by minority students, non-native English speaking students, and other under-represented groups. Topics include: standardized testing, identification of inequities, legal and ethical responsibilities of teachers, and promoting equity. Ten pre-practicum observation hours required for teacher candidates.

**Term:**

Offered Fall Term

**Type:**

Cultural Diversity Opt A, Social Science

**EHS-311 Curriculum and Pedagogy: Middle School**

**Prerequisites:**

This course fulfills the Expanded Classroom Requirement

**Credits:**

4.00

**Description:**

Introduces students to the basic competencies of Middle School teaching. Topics include: behavioral problems, classroom management, grouping for instruction, motivation and reward systems, individualized instruction, IEP's, requirements for licensure in Massachusetts, and discipline specific curriculum development using the curriculum frameworks developed by the Massachusetts Department of Education. Field observations and experiences are grounded in theoretical discussion as students begin to develop their personal philosophies of education. Field observations (40 hours) required. Required prior to student teaching. Normally offered yearly.

**Type:**

Social Science

**EHS-312 Curriculum and Pedagogy: Middle and Secondary School**

**Prerequisites:**

This course fulfills the Expanded Classroom Requirement
Credits:
4.00

Description:
Introduces students to the basic competencies of Middle and Secondary school teaching. Topics include: behavioral problems, classroom management, grouping for instruction, motivation and reward systems, individualized instruction, IEP's, requirements for licensure in Massachusetts, and discipline specific curriculum development using the curriculum frameworks developed by the Massachusetts Department of Education. Field observations and experiences are grounded in theoretical discussion as students begin to develop their personal philosophies of education. Field observations (40 hours) required. Required prior to student teaching.

Term:
Offered Fall Term

Type:
Expanded Classroom Requirement, Social Science

- **EHS-313 Classroom Communication**

Credits:
4.00

Description:
Examines communication between and among teachers and students in the classroom setting. Topics include: communication apprehension, building oral fluency, use of media technology to enhance student learning, cooperative learning, and related professional and legal responsibilities of teachers. Ten pre-practicum observation hours required for Teacher Candidates.

Term:
Offered Spring Term

Type:
Social Science

- **EHS-390 Employment and Labor Law**
Prerequisites:

EHS 263 or EHS 360, or permission of instructor

Credits:

4.00

Description:

The nature of the employment relationship and an overview of constitutional and federal statutory provisions which affect the employment relationship will be studied. Particular emphasis on the Civil Rights Act, the Age Discrimination in Employment Act, and the Americans with Disabilities Act. Statutory provisions regarding benefits and employment-related entitlements will also be studied. Prerequisites: EHS 264 or EHS 360 or permission of instructor. 1 term - 4 credits. Normally offered yearly.

- EHS-391 Domestic Violence, Abuse & Neglect

Prerequisites:

EHS 264 or EHS 360 or instructor's permission

Credits:

4.00

Description:

An opportunity to learn the history of domestic violence including battering, child abuse and child neglect, and the legal response to it. Focus will be on Massachusetts Law and its response, especially the Abuse Prevention Act, its application and enforcement, and on laws protecting children from abuse and neglect. Filings, law office issues and special issues in dealing with battered women and abused and neglected children will be included with the psychological issues, cultural issues, and advocacy possibilities. Prerequisite: EHS 264 OR EHS 360 or permission of instructor. 1 term - 4 credits. Normally offered yearly. Sophomore status required. Cultural Diversity A

Type:

Cultural Diversity Opt A

- EHS-402 History & Philosophy of American Education

Credits:
4.00

Description:
Explores the evolution of schooling in the United States from The English High School to present. Theorists include: Mann, Franklin, Dewey, Sizer, and others.

Term:
Offered Spring Term

Type:
Social Science

• **EHS-414 Urban Schooling**

   Credits:
   4.00

   Description:
   This course is an in-depth investigation of policies effecting urban schools; topics include: demographic influence on education, influences of national and state regulations on urban schools, sociological factors unique to urban schools, and in-depth analysis of equity and achievement.

   Term:
   Occasional

   Type:
   Social Science

• **EHS-415 Practicum: Middle School Teaching**

   Prerequisites:
   Coordinator of Student Teaching or Program Director's Consent

   Credits:
A 12-week practicum experience as a student teacher in a middle school. See regulations regarding student teaching.

Term:
Offered Spring Term

Type:
Social Science

- **EHS-416 Practicum: Secondary School Teaching**

  Prerequisites:
  Instructor's or Program Director's Consent

  Credits:
  8.00

  Description:
  A 12-week practicum experience as a student teacher in a secondary school. See regulations regarding student teaching.

  Term:
  Offered Spring Term

  Type:
  Social Science

- **EHS-417 Assessment Theory and Practice**

  Credits:
  4.00
This course examines the development of formative, summative, authentic, and alternative assessment in education. Seminal works by Archbald, Baron, Bloom, Kleinsasser, Schwab, and others comprise the theoretical component. The second half of the course is dedicated to the selection, application, and integration of formal and informal assessment strategies and tools. A final project requires students to design an assessment tool appropriate for their academic area and age level. Instructional strategies include case studies, class discussions, student presentations, and research reviews.

Term:
Offered Fall Term

Type:
Social Science

**EHS-421 Curriculum Theory**

Credits:
4.00

Description:
Examines major realism, idealism, pragmatism, existentialism, and other ideas as they relate to public and private K-16 education systems. Normally offered alternate years.

Type:
Social Science

**EHS-422 Curriculum Development**

Credits:
4.00

Description:
Students will explore methods and techniques of needs assessment, disciplinary literature reviews, and prepare objectives, linked units, and curriculum guides on a focused topic. Normally offered alternate years.
• **EHS-423 Curriculum Theory and Development**

  **Credits:**
  4.00

  **Description:**
  Examines major realism, idealism, pragmatism, existentialism, and other ideas as they relate to public and private K-16 education systems. Students will explore methods and techniques of needs assessment, disciplinary literature reviews, and prepare objectives, linked units, and curriculum guides on a focused topic.

• **EHS-424 Issues and Trends in American Education**

  **Credits:**
  4.00

  **Description:**
  Examines major current issues of educational policy against the background of demographic trends, technological innovations, standardized testing, and curricular shifts.

  **Term:**
  Occasional

  **Type:**
  Social Science

• **EHS-430 Issues in College Access & Success**

  **Prerequisites:**
Instructor permission required

Credits:

4.00

Description:

Issues pertaining to college access and success with respect to underrepresented students will be explored within a Pre-K thru 16 continuum framework that views students' college choice and success as a complex and interwoven by-product of numerous socio-political, socio-economic and socio-cultural factors. Emphasis will be placed on the body of college access literature that centers the collegiate experiences and outcomes as being intrinsically and unavoidably linked to structural factors, decisions, plans and actions taken by students and their families in the pre-college, or Pre-K-12, context.

Term:

Occasional

Type:

Social Science

- **EHS-510 Independent Study**

  Prerequisites:

  An independent study form must be submitted to the CAS Dean's Office.

  Credits:

  1.00- 4.00

  Description:

  Members of the Department will meet with students to direct their research in areas of special interest to them. Projects of this sort will be authorized only in unusual circumstances upon the recommendations of the Department Chairperson and with the approval of the Dean. Offered by arrangement only.

  Type:

  Social Science
• ELI-021 Low Intermediate English Listening/Speaking Skills
  Credits: 0.00
  Description:
  For non-native English speakers assessed to be at a low intermediate level (340-393 paper-based TOEFL, 63-90 computer-based, 20-29 Internet-based/1-1.5 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.

• ELI-022 Low Intermediate English Reading / Writing Skills
  Credits: 0.00
  Description:
  For non-native English speakers assessed to be at a low intermediate level (340-393 paper-based TOEFL, 63-90 computer-based, 20-29 Internet-based/1-1.5 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.

• ELI-023 Low Intermediate English American Culture Skills
  Credits: 0.00
  Description:
  For non-native English speakers assessed to be at a low intermediate level (340-393 paper-based TOEFL, 63-90 computer-based, 20-29 Internet-based/1-1.5 TWE) who need to acquire communicative fluency in American English. The focus is on American culture, values, and institutions, giving students a content-driven opportunity to practice the English language skills introduced in the other ELI courses. The course meets for five hours a week. College credit is not awarded.

• ELI-024 Low Intermediate English Academic Skills
For non-native English speakers assessed to be at a low intermediate level (340-393 paper-based TOEFL, 63-90 computer-based, 20-29 Internet-based/1-1.5 TWE) who need to acquire academic English fluency in American English. The focus is on classroom behavior, note-taking, asking questions and classroom discourse. This course meets for five hours a week. College credit is not awarded.

- **ELI-031 Intermediate English Listening/Speaking/ Pronunciation Skills**

  Credits: 0.00

  Description:

  For non-native English speakers assessed to be at a intermediate level (425-450/110-133 CBT TOEFL/2.5-3.0 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening comprehension, speaking, and pronunciation. The course meets for six hours a week. College credit is not awarded.

- **ELI-032 Intermediate English Reading, Writing, And Grammar Skills**

  Credits: 0.00

  Description:

  For non-native English speakers assessed to be at a low intermediate level (425-450/110-133 CBT TOEFL / 2.5-3.0 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.

- **ELI-033 Intermediate English - American Culture Lab**

  Credits: 0.00
For non-native English speakers assessed to be at intermediate level (425-450/110-133 CBT TOEFL/2.5-3.0 TWE) who need to acquire communicative fluency in American English. The focus is on American culture, value and institutions, giving students a content driven opportunity to practice English language skills introduced in the other ELI courses. The course meets for five hours a week. College credit is not awarded.

- **ELI-034 Intermediate English - Academic Skills Lab**
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  For non-native speakers assessed to be at intermediate level (425-450/110-133 CBT TOEFL/2.5-3.0 TWE) who need to acquire communicative fluency in American English. The focus is on computer skills needed to be a successful student at an American college. Skills include internet usage, word processing and spreadsheets, graphics creation, language drills, and TOEFL preparation. The course meets for five hours a week. College credit is not awarded.

- **ELI-041 High Intermediate Listening/Speaking/ Pronunciation Skills**
  
  **Prerequisites:**
  
  ELI Students only
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  For non-native speakers assessed to be at the high intermediate level (450-475/110-133 CBT TOEFL/2.8-3.3 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening comprehension, speaking and pronunciation. The course meets for six hours a week. College credit is not awarded. Co-Requisite courses: ELI 042, ELI 043, ELI 044

- **ELI-042 High Intermediate Reading/Writing/ Grammar Skills**
  
  **Credits:**
For non-native English speakers assessed to be at high intermediate level intermediate level (450-475/133-153 CBT TOEFL / 2.8-3.3 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.

- **ELI-043 High Intermediate Eli American Culture**
  
  **Credits:**
  
  0.00

  **Description:**
  For non-native English speakers assessed to be at a high intermediate level (450-475/133-153 CBT TOEFL / 2.8-3.3 TWE) who need to acquire academic fluency in American English. The focus is on American culture, values, and institutions, giving students a content driven opportunity to practice the English language skills introduced in the other ELI courses. The course meets for five hours a week.

- **ELI-044 High Intermediate English - Academic Skills Lab**
  
  **Credits:**
  
  0.00

  **Description:**
  For non-native English speakers assessed to be at a high intermediate level (450-475/133-153 CBT TOEFL / 2.8-3.3 TWE) who need to acquire academic writing skills. The focus is on research skills needed to be a successful student at an American college. The course meets for five hours a week. College credit is not awarded.

- **ELI-051 Low Advanced Listening/Speaking/ Pronunciation Skills**
  
  **Credits:**
  
  0.00

  **Description:**
For non-native English speakers assessed to be at low advanced level (475-500/3.0-3.5 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening, comprehension, speaking and pronunciation. The course meets six hours a week. College credit is not awarded.

- **ELI-052 Low Advanced Reading/Writing/Grammar Skills**

  Prerequisites:
  ELI students only

  Credits:
  0.00

  Description:
  For non-native English speakers assessed to be at a low advanced level (475-500/3.0-3.5 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.

- **ELI-053 Low Advanced American Culture Skills**

  Prerequisites:
  ELI students only

  Credits:
  0.00

  Description:
  For non-native English speakers assessed to be at a low advanced level (475-500/3.0-3.5 TWE) who need to acquire communicative fluency in American English. The focus is on American culture, values, and institutions, giving students a content driven opportunity to practice the English skills introduced in the other ELI courses. The course meets for five hours a week. College credit is not awarded.

- **ELI-054 Low Advanced Research Skills**

  Prerequisites:
For non-native English speakers assessed to be at a low advanced level (475-500/153-173 CBT TOEFL/ 3.0-3.5 TWE) who need to acquire academic writing skills in American English. The focus is on research skills needed to be a successful student at an American college. The course meets for five hours a week. College credit is not awarded. The course meets five hours a week. College credit is not awarded.

- **ELI-061 High Advanced Listening/Speaking/ Pronunciation Skills**

  **Prerequisites:**
  ELI students only

  **Credits:**
  0.00

  **Description:**
  For non-native English speakers assessed to be at a high advanced level (500-525/173-193 CBT TOEFL / 3.5-4.0 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening comprehension, speaking, and pronunciation. The course meets for six hours a week. College credit is not awarded.

- **ELI-062 High Advanced Reading/Writing/Grammar Skills**

  **Prerequisites:**
  ELI students only

  **Credits:**
  0.00

  **Description:**
For non-native English speakers assessed to be at a high advanced level (500-525/173-193 CBT TOEFL / 3.5-4.0 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.

- **ELI-063 High Advanced American Culture Skills**

  Prerequisites:
  
  ELI students only

  Credits:
  
  0.00

  Description:

  For non-native English speakers assessed to be at a high advanced level (500-525/173-193 CBT TOEFL / 3.5-4.0 TWE) who need to acquire academic fluency in American English. The focus is on American culture, values, and institutions, giving students a content driven opportunity to practice the English language skills introduced in the other ELI courses. The course meets for five hours a week. College credit is not awarded.

- **ELI-064 High Advanced Research Skills**

  Prerequisites:
  
  ELI students only

  Credits:
  
  0.00

  Description:

  For non-native English speakers assessed to be at a high advanced level (500-525/173-193 CBT TOEFL / 3.5-4.0 TWE) who need to acquire academic writing skills in American English. The focus is on research skills needed to be a successful student at an American college. The course meets for five hours a week. College credit is not awarded.

- **ELI-071 Special Advanced Listening/Speaking/ Pronunciation Skills**

  Prerequisites:
ELI students only

Credits:
0.00

Description:

For graduate level, non-native English speakers assessed to be at a high advanced level (525-550/ 190-200 CBT TOEFL / 4.0-4.5 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening comprehension, speaking, and pronunciation; the content is derived from Harvard Business School Case Studies. The course meets for six hours a week.

**ELI-072 Special Advanced Reading/Writing/Grammar Skills**

Prerequisites:

ELI students only

Credits:
0.00

Description:

For graduate level, non-native English speakers assessed to be at a high advanced level (525-550/ 190-200 CBT TOEFL / 4.0-4.5 TWE) who need to acquire written fluency in American English. The focus is on intensive practice in reading, writing, and English grammar; the content is derived from business texts and Harvard Business School Case Studies. The course meets for six hours a week.

**ELI-073 Spec Adv Amer Culture Lab**

Credits:
0.00

Description:

A course for graduate level, non-native English speakers assessed to be at a high advanced level of proficiency (525 - 550 PBT/ 193 - 213 CBT/ 70 - 79 IBT/ 3.5 - 4.0 TWE), who need to acquire communicative fluency in American English. The focus is on American culture, values, and institutions, giving students a content driven opportunity to practice the English skills introduced in the other ELI courses. The course meets for four hours a week. College credit is not awarded.
• ELI-074 Spec Adv Research Skills

Credits: 0.00

Description:

A course for graduate level, non-native English speakers assessed to be at a high advanced level of proficiency (525 - 550 PBT/ 193 - 213 CBT/ 70 - 79 IBT/ 3.5 - 4.0 TWE), who need to master graduate-level academic skills such as library research, evaluation of sources, quoting, paraphrasing and citation methods, and TOEFL preparation. The course meets four hours a week. College credit is not awarded.

• ENG-014 Preparing for College Writing

Prerequisites:

Requirements: Internet access, Suffolk e-mail, Microsoft Internet Explorer, MSWord or compatible word processing program. Fluency in English.

• **ENG-353 American Realism**

Prerequisites:

ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:

4.00

Description:

In-depth exploration of American Realism from the post-Civil War era to the pre-WWI era (roughly 1875 to 1915). Particular emphasis is given to the role of houses and material and consumer culture in the forging of American identity. Authors may include Howells, Twain, James and Wharton among others. Normally offered alternate years. Students will also visit authors’ houses in the Boston area. This course requires prior approval in order to count towards the Women’s and Gender Studies Minor. Students should consult with the instructor and the director of the WGS Minor no later than the first week of classes.

Term:

Occasional
• ENG-354 Hawthorne, Melville and Stowe

Prerequisites:
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00

Description:
An extended study of three major novels by Hawthorne, Melville and Stowe as prototypes of the Great American Novel: an elusive achievement that seeks to capture the essence of American experience. This course confronts issues of sin and redemption, ambition and failure, racial and national identity, and aesthetic and cultural value, and it assesses the imaginative influence of these foundational narratives in two contemporary rewritings by Mukherjee and Reed. This course requires prior approval in order to count towards the Women's and Gender Studies Minor. Students should consult with the instructor and the director of the WGS Minor no later than the first week of classes.

Term:
Occasional

• ENG-355 American Prose 1870 - 1920

Prerequisites:
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00

Description:
The revolution in American literary consciousness between the Civil War and the First World War, and the transition from the traditional to the modern, in the work of Mark Twain, Henry James, Stephen Crane, Theodore Dreiser, and others. Normally offered alternate years.

Term:
Occasional
ENG-356 Whitman and Dickinson

Prerequisites:

ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:

4.00

Description:

An investigation of the lives and works of two of nineteenth-century America's greatest and most original poets. Topics will include types of poetic language and formal structure, the work of the poetic imagination in transforming observations of the world into art, and the ways in which poets process the idea of death and the reality of war. Finally, this course examines Whitman and Dickinson's impact on American popular culture as well as on the writings of modern poets and literary critics.

Term:

ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00

Description:
The social, political and cultural revolution in pre-World War II England as it is reflected in the poetry of Auden and Spender and the fiction of Huxley, Waugh, Isherwood, Bowen, Orwell, and Greene. Normally offered every third year.

Term:
Occasional

• ENG-374 Drama Seminar

Prerequisites:
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00

Description:
Discussion and presentations on a pre-announced subject: a major playwright, a dramatic movement or genre, or the relation between script and performance. Normally offered every third year.

Term:
Occasional

- **ENG-375 Poetry Writing Workshop I**

  Prerequisites:
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  Credits:
  4.00

  Description:
  An intensive workshop course in which the student will be required to write original poetry for each class meeting. The focus of the course will be on the student's own work. We will examine the highly individual processes of composition and revision, and the methods writers use to keep their own practice of poetry alive and well. We will also examine as many of the constituent elements of poetry as possible, from image and rhythm to line and structure. Normally offered alternate years.

  Term:
  Offered Both Fall and Spring

- **ENG-376 Contemporary British Fiction**

  Prerequisites:
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  Credits:
  4.00
This course explores the development of post-World War II British fiction from the 1950's to the present. The focus is on the consequences in literature and culture of the fall of Empire and the redefining of Englishness and on the tension between realism and postmodern literary experimentation.

Term:
Occasional

- **ENG-377 The World of Literature on Film**
  
  **Prerequisites:**
  
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218
  
  **Credits:**
  
  4.00
  
  **Description:**
  Examination of film as an art form in the expression of literature. Several films to be viewed in class together with the relevant literary works. Normally offered every third year.
  
  Term:
  Occasional

- **ENG-379 Children's Literature**
  
  **Prerequisites:**
  
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218
  
  **Credits:**
  
  4.00
  
  **Description:**
The history and artistry of those works intended for the child reader: picture books, poetry, fairy tales, fantasies, realistic novels and biography, the international heritage. This extensive range covers Mother Goose to the contemporary novel, reflected by the works of Jean George, Robert Cormier and Katherine Paterson. Normally offered alternate years. Cultural Diversity A Cultural Diversity B

Term:
Occasional
Type:
Cultural Diversity Opt A, Cultural Diversity Opt B

- **ENG-380 Wharton and James**

  Prerequisites:
  
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  Credits:

  4.00

  Description:

  A study of the work of two of America’s greatest Realist writers, considering the achievement of each and their extraordinary friendship.

  Term:

  Occasional

- **ENG-382 Speculative Literature**

  Prerequisites:

  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  Credits:

  4.00

  Description:
The literature that raises philosophical concerns, often questioning the role of literature itself and the purpose of art. Representative writers are Lewis Carroll, Franz Kafka, Mikhail Bulgakov, John Gardner, Julian Barnes, Stanislaw Lem, Italo Calvino and A.S. Byatt. Normally offered alternate years.

Term:
Occasional

- **ENG-386 Classics of Mystery**

  **Prerequisites:**
  
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  **Credits:**
  
  4.00

  **Description:**
  Classic stories of suspense and detection, including short stories and novels by Poe, Doyle, Chandler, Hammett, Christie, and others. Current examples also to be included. Normally offered alternate years.

  **Term:**
  Occasional

- **ENG-387 Writing Women**

  **Prerequisites:**
  
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  **Credits:**
  
  4.00

  **Description:**
  This course studies 19th and 20th century women writers and questions the type of women who write, what they write about, and why they write. Themes we examine include domesticity, assimilation, and madness. Authors studied in the past have included Edith Wharton, Willa Cather, Anzia Yezierska, Nella Larsen, and Sylvia Plath. Normally offered alternate years. Cultural Diversity A
• ENG-390 Writing Process and Revision
  Prerequisites:
  ENG 102 or 103
  Credits:
  4.00
  Description:
  This course studies the expressive and cognitive approaches to the writing process through personal journal writing, metaphor use and a review of grammar and stylistics. Written assignments emphasize discovery and invention as well as the revising of academic prose. Normally offered every other year.

  Term:
  Occasional

• ENG-391 Research and Writing
  Prerequisites:
  ENG 102 or ENG 103
  Credits:
  4.00
  Description:
This course explores research and writing in the context of qualitative research, field work and bibliography. This course requires a lengthy report and project based on extended field work of at least 25 hours at an off-campus research site chosen by the student, approved by the instructor, and validated by a field site representative. This course fulfills the Expanded Classroom Requirement for CAS students. Normally offered alternate years.

Term:
Occasional

Type:
Expanded Classroom Requirement

- **ENG-392 Readings in Post-Colonial Literature**

**Prerequisites:**
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

**Credits:**
4.00

**Description:**
An Exploration of Post-colonial literature and how the empire writes back following the collapse of European colonialism. Special emphasis will be placed on the legacy of British Colonial rule and the contemporary use of literature and the English Language to both resist and problematize Eurocentric cultural assumptions. Authors studied will include E.M. Foster, Salman Rushdie, J.M. Coetzee, Anita Desai, Hanif Kureishi, and Zadie Smith, among others. Students will be introduced to Post-colonial critical theory and view film adaptations of literary texts.

Term:
Occasional

Type:
Cultural Diversity Opt B

- **ENG-393 History of English Language**

**Prerequisites:**
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00

Description:
This course provides a basic understanding of the historical development of the English language from its roots in the Indo-European family of languages to its status as the world language of today.

Term:
Occasional

- ENG-394 Critical Prose

Prerequisites:
ENG 102 or 103

Credits:
4.00

Description:
This course studies both the literary and rhetorical modes of expository essay writing. Readings will focus on the craft of writing, the art of revision and reflections on the reader-writer relationship. Students will be asked to analyze prose passages, compose critical essays and work in peer groups. Normally offered alternate years.

Term:
Occasional

- ENG-395 Rhetoric and Memoir

Prerequisites:
ENG 102 or 103
This course examines the rhetoric of memoirs written primarily by international figures who seek to use personal stories to shape readers' perspectives on political issues. After a brief introduction to rhetorical theory and to the genre of memoir, this course will examine contemporary memoirs that address such issues as racism, sexism, religious extremism, war, and genocide.

Term:
Occasional

Type:
Cultural Diversity Opt B

- ENG-396 Varieties of Workplace Writing
  Prerequisites:
  ENG 102 Or ENG 103
  Credits:
  4.00
  Description:
  This course studies a variety of workplace writing including summaries, memos, letters, directions, descriptions, reports and other technical and professional documents. Students may be required to complete certain assignments in collaborative teams. Document design and layout will also be emphasized. Normally offered alternate years
  Term:
  Occasional

- ENG-399 Irish Literature
  Prerequisites:
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits: 4.00

Description:

Writers of the Irish Literary Revival, from the 1890s to the 1930s. Readings from Yeats, Joyce, Synge, O'Casey, and O'Flaherty. The influence of Anglo-Irish history on Irish writers. Normally offered every third year.

Term:

Occasional

• ENG-404 Central European Literature
  
  Prerequisites:
  
  EN 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218
  
  Credits: 4.00
  
  Description:
  
  The culture of Central Europe as reflected in literature, theatre and film. English translations of Austrian, Czech, Hungarian and Polish authors whose poignant perspectives shaped the modern world.
  
  Term:
  
  Occasional

• ENG-405 Russian Literature
  
  Prerequisites:
  
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218
  
  Credits:
4.00

Description:

An introduction to the major works of Russian literature with an emphasis on cultural history. Translations of Pushkin, Lermontov, Turgenev, Gogol, Dostoyevsky, Tolstoy, Chekov, Akhmatova, Tsvetaeva, and others. Normally offered every third year.

Term:

Occasional

• ENG-407 Literary Theory

Prerequisites:

ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:

4.00

Description:

A seminar on current approaches to the interpretation of literature, including psychoanalysis, deconstruction and feminist criticism. Students will experiment with making use of theory in analyzing selected literary texts.

Term:

Occasional

• ENG-409 Literary Bloomsbury

Prerequisites:

ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:

4.00

Description:
This class will engage with the major novels and selected literary writings of two of the twentieth century's most important modernist voices, Virginia Woolf and E.M. Forster. We will approach their writings within the intellectual framework of British modernism and the cultural context of the Bloomsbury Group out of which they emerged. Special attention will be paid to their theoretical writings on fiction as well as their respective contributions to feminism and queer theory. The class will also view cinematic adaptations of certain novels and discuss how these films have contributed to the enduring appeal and status of these texts as classics of twentieth-century fiction.

Term:
Occasional

- **ENG-410 From Pagan Reason to Christian Revelation**

  **Prerequisites:**
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  **Credits:**
  4.00

  **Description:**
  A survey of major works of literature and thought crucial to the transformation of pagan models of reason to Christian systems of belief, including works by Plato and Plotinus, St. Augustine and Dante. Of central concern is the changing conception of love, from Eros to Agape. Cross-listed with History 336.

  **Term:**
  Occasional

- **ENG-411 Ancient Greece and Ancient Israel**

  **Prerequisites:**
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  **Credits:**
  4.00

  **Description:**
  A study of ancient Greek and Ancient Israel. Of central concern is the changing conceptions of the divine, from polytheism to monotheism, and the development of the concept of personal identity. Cross-listed with History 339.

  **Term:**
  Occasional
A survey of archaic thought from Greek myths of origin and Hebraic accounts of Genesis to Mosaic law and Aristotelian ethics. Major topics include: polytheism and monotheism, the Psalms, Homer's Troy, the complexity of desire and identity in the Hebrew Bible and in Sappho's poetry, biblical depictions of Jacob, Joseph, and David. Cross-listed with History 338.

Term:
Occasional

- **ENG-422 Special Topics in Group 2: Genre and Backgrounds**

  Prerequisites:
  
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  Credits:
  4.00

  Description:

  A course that fits Group 2 of the English major requirements with varying subject matter.

  Term:
  Occasional

- **ENG-423 Special Topics in Group 3: Literary History I: Medieval to Renaissance**

  Prerequisites:

  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  Credits:
  4.00

  Description:

  A course that fits Group 3 of the English major requirements with varying subject matter.

  Term:
ENG-424 Special Topics in Group 4: Literary History II: 1700-1900, American Or British

Prerequisites:
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00

Description:
A course that fits Group 4 of the English major requirements with varying subject matter. An interdisciplinary offering that features the writing of three of the late 19th century's greatest minds: Henry, the novelist who wrote The Portrait of a Lady, Daisy Miller, and The Turn of the Screw; William, the philosopher and psychologist who wrote Principles of Psychology (1890) and Varieties of Religious Experience (1902); and Alice, their sister, who became a feminist icon through her remarkable diary. A selection of these works will be explored alongside a James family biography.

Term:
Occasional

ENG-425 Special Topics in Group 5: the Shield of Achilles: War and Peace From Troy to Sarajevo

Prerequisites:
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00

Description:
A course that fits Group 5 of the English major requirements with varying subject matter.

Term:
Occasional
• ENG-426 Special Topics: The Eclogues of Virgil

Prerequisites:
Take ENG-213, ENG-214, ENG-215, ENG-216, ENG-217 or ENG-218;

Credits:
1.00

Description:
A study of these poems by the Roman poet with a focus on the issues of translation.

Term:
Occasional

• ENG-427 The Georgics of Virgil

Prerequisites:
Take ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
1.00

Description:
A study of these poems by the Roman poet with a focus on the issues of translation.

• ENG-428 Virgil's Aeneid: First Three Books

Credits:
1.00

Description:
A week by week reading of the Mesopotamian Epic that predates the Iliad by one thousand years, and is a masterpiece of heroic endurance and tragic insight. Discussions will be led by David Ferry, whose beautiful translation the class will use as text.

- **ENG-430 Literature of the Vietnam War and the Post 9/11 Wars**
  
  **Prerequisites:**
  
  Take ENG-213 ENG-214 ENG-215 ENG-216 ENG-217 or ENG-218;
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course will examine some of the fiction, non-fiction, and poetry produced in response to the Vietnam War and the most recent war in Iraq. In addition to comparing the literature that has emerged from these two very different wars, these texts will also be examined in relation to peace studies, a field in which there is an emerging consensus that literature and the arts must play a central role in examining questions of war and peace.
  
  **Term:**
  
  Occasional
  
- **ENG-431 Studies in Postmodern Fiction**
  
  **Prerequisites:**
  
  ENG-213 ENG-214 ENG-215 ENG-216 ENG-217 or ENG-218
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course introduces students to the innovations that have re-defined fiction following the modern period. Novelists will include significant writers (3 Nobel Laureates among them) of the 20th/21st century, including Borges, Kundera, Calvino, Saramago, Garcia Marquez, Vargas Llosa.

- **ENG-470 Fiction Workshop II**
Prerequisites:
ENG 370 or instructor's permission

Credits:
4.00

Description:
An intensive practical examination of plot, narrative, characterization, and style in the writing of fiction and/or creative non-fiction. Particular attention will be devoted to group discussion of weekly student writing assignments. Normally offered alternate years.

Term:
Alternates Fall & Spring

ENG-475 Poetry Workshop II

Prerequisites:
ENG 375 or instructor's permission

Credits:
4.00

Description:
An intensive workshop course in which the student will be required to write original poetry for each class meeting. The focus of the course will be on both the quantity and quality of the student's own work. There will also be specific assignments in the many formal elements of the art. Written self-evaluations will also be required. Normally offered in alternate years.

Term:
Offered Spring Term

ENG-480 Fiction Writing Workshop III

Prerequisites:
Take ENG-370

Credits:
4.00

Description:
An advanced course in fiction writing that focuses intensively on developing fiction through weekly group discussions of student writing. Particular attention will be devoted toward deepening and expanding the range of possibilities available to fiction writers.

- ENG-481 Boston in History, Lit & Film

Prerequisites:
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00

Description:
An interdisciplinary examination of the history of Boston. Special focus will be on Boston in fiction, poetry, and film, as well as on the analysis of historical documents and accounts. This course is recommended for History and Literature Honors Majors. Jointly taught by professors from the History and English Departments. Normally offered every third year.

Term:
Occasional

- ENG-485 Stay the Hand: Philosophical and Literary Readings on Law and Violence

Prerequisites:
ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

Credits:
4.00
Description:

An interdisciplinary course examining the idea of law and its function in human society, with a special focus on issues of violence, war, peace, and justice. The course will examine law as it represented, enacted, and discussed in various literary and philosophical writings from the ancient world to the present, to include various Biblical texts, Sophocles' Antigone, Aeschylus' Oresteia, Plato's Apology, Shakespeare's The Merchant of Venice, Melville's Billy Budd, Toni Morrison's Beloved, among many others.

Term:

Occasional

- ENG-490 Imperial Rome

Prerequisites:

ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218 also counts as HIST 304

Credits:

4.00

Description:

This course offers an introduction to the Golden Age of Roman culture and power. Close readings of selections from major historians, poets, political thinkers, and philosophers will be examined in the context of Augustan Rome. Topics such as pietas, virtus, and gravitas, as well as the competing claims of public duty and private devotion, stoic maxim and erotic love lyric, will be discussed from the perspectives of writers such as Virgil, Livy, Tacitus, Horace, Catullus, and Lucretius. Note: This course is identical to HUM 304. Normally offered in alternate years.

Type:

Humanities & History

- ENG-495 Poetry Writing Workshop III

Prerequisites:

ENG-475;

Credits:

4.00
Description:
An advanced course in poetry writing that focuses intensively on developing work through weekly group discussions of student writing. Particular attention will be devoted toward deepening and expanding the range of possibilities available poets.

- **ENG-510 Independent Study**

  **Prerequisites:**
  
  An independent study form must be submitted to the CAS Dean's Office.

  **Credits:**
  
  1.00-4.00

  **Description:**
  
  By special arrangement, a junior or senior may pursue an independent research project under the supervision of a faculty member. Consent of instructor and chairperson required. Offered every semester.

  **Term:**
  
  Offered Both Fall and Spring

- **ENG-514 Internship in English**

  **Prerequisites:**
  
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  **Credits:**
  
  4.00

  **Description:**
  
  Individualized guidance in a career-related activity. Upper-class English majors may gain academic credit for work preparing them for an English-related career, provided that the work is monitored by a member of the English faculty. Department approval is required.

  **Term:**
• ENG-H521 Honors Seminar in Group 1: Approaches to English Studies
  Prerequisites:
  ENG-213 ENG-214 ENG-215, 216, 217 OR 218 Admission by invitation only
  Credits:
  4.00
  Description:
  Honors seminar that fulfills Group I of the English major.

• ENG-H523 Honors Seminar in Group 3: Literary History I: Medieval to Renaissance
  Prerequisites:
  ENG 213, 214, 215, 216, 217 OR 218 Admission By Invitation Only
  Credits:
  4.00
  Description:
  Honors seminar that fulfills Group 3 of the English major.

• ENG-H524 Honors Seminar in Group 4: Literary History II: 1700 - 1900, American Or British
  Prerequisites:
  ENG-213, 214, 215, 216, 217 OR ENG 218 Admission by invitation only
• **ENG-H525 Honors Seminar in Group 5 Literary History III: 1900 - Present American, British, Or World.**

   **Prerequisites:**
   
   ENG 213, 214, 215, 216, 217, or ENG 218; Invitation only

   **Credits:**
   
   4.00

   **Description:**
   
   Honors seminar that fulfills Group I of the English major.

• **ENS-103 Introduction to Engineering**

   **Prerequisites:**
   
   ENS L103 MUST BE TAKEN CONCURRENTLY.

   **Credits:**
   
   3.00

   **Description:**
   
   This course provides exposure to engineering practice, with particular focus on electrical engineering components such as circuit elements and systems. It seeks to go beyond the mathematics and provide an intuitive appreciation of functional devices. Examples taken from a broad swath of technological history illustrate significant crossroads, decisions, and inventiveness. Emphasis is placed on learning to think as an engineer - assessment of problems, candidate solution tradeoffs, and implementations. Frequent exercises in creative engineering design will be used. Students will be required to design several elementary devices, such as a magnet, a capacitor, a timing device, and a motor, which they will enter in a competition for overall strength, compactness, accuracy, or speed. Sometimes assignments relate to "survival on an island" concerns, such as...
communication or drinking water. Students also learn about reverse engineering by selecting, building, troubleshooting, and presenting an electronic kit of their choice. A term paper determining the engineering behind a topic of their choice will also be written and presented. On occasion (see ENS L103) there will be team competitions between various smaller groups in the class.

Term:
Offered Fall Term

- ENS-L103 Intro to Engineering Lab

Prerequisites:
Must be taken Concurrently w/ ENS-103

Credits:
1.00

Description:
The Lab is designed to provide opportunities to gain familiarity with engineering tools. Students will be introduced to parts (e.g. learn the resistor color code), test equipment (multimeters, proto-typing trainers, signal generators, and oscilloscopes), and construction techniques (wiring, soldering, troubleshooting). Although it varies from year to year, Class Projects can be built during the Lab sessions. In the past these have included a 25 Watt electric generator, various door lock systems (both mechanical and electronic), and an AM transmitter and receiver (all projects made from scratch). It is likely that 2010-2011 may introduce some robotic creations for a competition. Electronic kits and motors can also be built and serviced in the Lab. There is an adjoining machine shop, which can be utilized (with supervision), for fabricating items. Individual creativity is encouraged, and informal problem solving sessions occasionally occupy lab time. However, the lab is accessible outside of the traditional scheduled time.

Term:
Offered Fall Term

- ENS-201 Engineering Mechanics

Prerequisites:
PHYS 151

Credits:
Forces, statics, and dynamics of rigid bodies, stress and strain analysis, kinematics, computer aided analysis. Focus on professional standards in practice for design of structures.

**ENS-L202 Technical Communication**

**Prerequisites:**

ENG-102, PHYS 152 AND L152;

**Credits:**

4.00

**Description:**

Emphasis on clarity, precision, accuracy, and conciseness in scientific writing. Assignments include a team-based design-contest proposal, an oral presentation on current scientific topics, a team-based design of an experiment with a write-up and an oral presentation, a paper on engineering ethics concerning the Challenger and an instruction manual. Memo writing, summary writing, and resumes are also included.

**Term:**

Offered Fall Term

**ENS-220 Design and Design Tools**

**Prerequisites:**

Take ENVE-104 and PHYS-151;

**Credits:**

4.00

**Description:**

This course applies design tools (AutoCAD primarily and others as necessary for specified design problems) to design problems specified by the instructor.
• ENS-333 Programming for Engineers
  
  Prerequisites:
  
  ENS L333 concurrently

  Credits:
  
  3.00

  Description:
  
  This course will introduce programming concepts in the context of solving engineering problems. Emphasis will be placed on applying the high-level programming skills learned to particular platforms such as embedded systems. Students will implement various microcontroller programming exercises as well as an end of the semester project.

  Term:
  
  Offered Spring Term

• ENS-L333 Programming for Engineers Lab
  
  Prerequisites:
  
  ENS 333 concurrently

  Credits:
  
  1.00

  Description:
  
  The Programming for Engineers lab is designed to supplement the Programming for Engineers Course.

• ENS-415 Senior Project
  
  Prerequisites:
  
  Take ENS-414;
For the senior project the student implements, documents, and presents their completed project of the proposal generated in ENS 414. Having defined their project, students gather the resources necessary and proceed to execute their designs. This period will include the construction, testing, troubleshooting, refinement, and evaluation of their project. A formal presentation of the project is made. A professional caliber documentation of the project is also required, and may go through numerous iterations of review. The final project report must consider most of the following: environmental impact, sustainability, manufacturability, ethics, health and safety issues, and political concerns. Time management, prioritization of process, formal communication, overcoming obstacles and meeting deadlines are monitored by the project advisor. Weekly reports and meetings are expected. The advisor also serves as a resource for the student. However, full responsibility for the success of the project rests on the student. Cross-disciplinary projects are encouraged. Note: Replaces ECE 412 for the graduating class of 2016.

Type:
Expanded Classroom Requirement

- **ENS-425 Heat and Thermodynamics**
  
  Prerequisites:
  
  MATH-265 and PHYS-152

  Credits:
  
  4.00

  Description:
  
  Temperature, thermodynamic systems, heat and the First Law of Thermodynamics, ideal gases, heat engines, Second Law of Thermodynamics, reversibility, entropy, enthalpy. Also included are statistical mechanics, phase transitions, chemical equilibrium, Gibbs' theorem, Nernst equation and heterogeneous systems. Normally offered fall semester.

- **ENST-101 Environmental Studies**
  
  Credits:
  
  4.00
An interdisciplinary course that focuses on the social science and humanities disciplines as they are related to the natural environment. Students will study texts from those disciplines to acquire a deeper understanding of the values and beliefs that underlie environmental issues. The course will also investigate the policy-making processes and institutions through which those issues are decided, and the social inequalities in the distribution of environmental problems. Texts to be studied will range from literature, philosophy and film to policy statements, impact reports, community advocacy materials, and investigative journalism.

**ENST-301 Issues in Environmental Justice**

**Description:**

Environmental justice is the fair treatment and meaningful involvement of all people regardless of race or income regarding the development, implementation, and enforcement of environmental laws, regulations, and policies. In this course, students will learn about the background of environmental justice, its basis in law, leaders in the movement, and key topics pertaining to environmental and health disparities, such as air quality, public transportation, access to healthy food, facility siting and clean-up, land use, and climate. Material will draw heavily upon local examples and readings from a wide range of fields. Students will learn about community organizing and advocacy, and how these skills can be applied to shape decision-making. We will also discuss sustainable practices that can be integrated into daily life to create healthy communities and equity. One term, 4 semester hours, normally offered once a year, no prerequisites.

**ENST-310 The Civilian Conservation Corps and the American Landscape**

**Prerequisites:**

Class will meet for 75 minutes a week and then travel over spring break. Instructor's consent is required

**Description:**

This course will focus on the history and lasting affect of the Civilian Conservation Corps (CCC) on the physical and political landscape of the United States. From 1933 to 1942 more than 3 million men served in the CCC, and this course will track the progression of their work from the planting of billions of trees to the development of recreational opportunities on federal and state lands. Over time, CCC work progressed from the conservation of natural resources to the conservation of human resources and promotion of recreation on public lands. As the CCC changed over time, so too did
public opinion concerning the CCC's work and mission. This class will explore opposition to CCC projects by significant figures in America's environmental movement such as Aldo Leopold and Bob Marshall, and the resulting influence on the environmental movement in America. We will also look at the role the CCC played in redefining conservation and creating a mainstream environmental movement. In addition, this class will consider the affect that the CCC had on New Deal politics. Finally, this class will study the lasting legacy that the CCC left on the American landscape through the development of other conservation corps programs. Students will also read first hand accounts, view films, and possibly hear directly from a CCC veteran. As a class connected with an Alternative Spring Break trip, this experiential education offering will allow students to experience and complete similar work to that completed by CCC members. During Alternative Spring Break, students will visit important CCC history sites such as the first CCC camp in the country and a major national park development project. During the course, assignments will challenge students to identify CCC sites in Massachusetts or their home states. Local site visits are a possibility for this class. Other assignments will challenge students to identify modern environmental organizations who can trace their origins to the

- **ENST-315 Foundations of Environmental Education**
  
  **Credits:**

  4.00

  **Description:**

  This course will provide an overview of Environmental Education (EE) by looking at how EE has been defined, how the field has changed over time, and how our own connections with the environment can inform our understanding and practice of this work. Students will consider the goals of EE and the variety of approaches utilized in the field to reach those goals. Age appropriate environmental education, place-based education, and urban environmental education will also be studied.

- **ENST-321 Introduction to Permaculture**
  
  **Credits:**

  4.00

  **Description:**

  Permaculture is the design of food systems and social structures to provide for human needs while restoring ecosystem health. Examining the interconnections between environmental, social and economic components, Permaculture is informed by the disciplines of systems ecology, ecological design and ethno-ecology.

- **ENST-380 Law for Environmental Protection and Pollution Prevention**
  
  **Credits:**
Description:

A course about how the constitution, common law and statutory law provide for environmental protection and pollution prevention. Students will learn basic skills needed to understand how environmental law works, including constitutional clauses and amendments, landmark civil litigation, the Clean Water Act, the Clean Air Act, landmark civil litigation, and hazardous waste law.

• ENST-401 Environmental Studies Capstone Course

Credits:

4.00

Description:

A course examining a contemporary environmental issue from various disciplinary perspectives. Using a case-study approach, students will develop a proposal to address the identified issue from the perspectives of policy, ethics, justice, science and culture. As appropriate, the proposal will be field tested, demonstrated, or presented to the local community. Possible topics include sustainable development, urban air pollution, sustainable farming, or water conservation.

• ENST-402 Environmental Studies Capstone II

Credits:

1.00- 4.00

Description:

A continuation of ENST 401

• ENST-403 Environmental Studies Practicum

Prerequisites:

This class fulfills the Expanded Classroom Requirement. Junior standing or above required or consent of the instructor.

Credits:
Description:
One course to be taken as a practicum or internship. The choice of internship or practicum is to be determined in consultation with the program director.

Type:
Expanded Classroom Requirement

- **ENST-420 German Greens and Environmentalism**

  Credits:
  4.00

  Description:
  The rise of the Green Party, from its grass-roots beginnings to participation in the federal government. Background on the development of green consciousness in Germany and Europe since the early 20th century. Present governmental policies and programs (e.g., alternative energy sources, organic farming, recycling, dismantling of nuclear power). Cross-listed GER 420 and GVT 420

- **ENST-450 Lobbying, Media, and Public Policy**

  Credits:
  4.00

  Description:
  As a result of new environmental and energy concerns championed by the media, politicians and the public government regulators in the US and around the world are being forced to rethink their priorities and react to these outside influences rather than rely on the process they have used for decades. But as we shift to notions such as the precautionary principle and embrace renewable power as a solution to climate change, is this reactionary approach relying too much on what the media and others say and too little on the facts? Are government agencies equipped to analyze these issues and disagree with rising public opinion? Is this a good way to develop public policy? Through discussion and analysis, we will critically examine all sides of these and other current issues and get behind the headlines using real world examples to try to separate fact from hype. We'll also probe the roles that politicians, lobbyists, and the media have in framing the debate.

  Type:
· **ENST-510 Independent Study**

  **Prerequisites:**
  
  An independent study form must be submitted to the CAS Dean's Office.

  **Credits:**
  
  1.00- 4.00

  **Description:**
  
  This is an independent study in environmental studies. Topics will vary.

· **ENVE-101 Engineering Practice**

  **Credits:**
  
  1.00

  **Description:**
  
  This course introduces students to environmental engineering through a weekly lecture series given by professionals in the field who will discuss their work and the different projects that they contributed to. There will also be field trips to points of interest such as waste water treatment plants and green buildings.

· **ENVE-104 Introduction to Environmental Engineering**

  **Credits:**
  
  4.00

  **Description:**
  
  This course is the basis course for environmental engineering and provides students with an overview of current and future environmental issues and concerns, practice in material and energy balance calculations, introduction to unit operations and treatment trains and their design, and ideas in sustainable design.
ENVE-220 Design and Design Tools

Prerequisites:
ENVE-104; PHYS-151

Credits:
4.00

Description:
This course applies design tools (AutoCAD primarily and others as necessary for specified design problems) to design problems specified by the instructor.

ENVE-226 Organic Compounds in the Environment: Origin and Fate

Prerequisites:
CHEM-112 OR PERMISSION OF INSTRUCTOR.

Credits:
4.00

Description:
This course examines the common families of organic compounds and their fate in the environment. Topics include organic nomenclature, characteristic chemistry of functional groups, the origin of anthropogenic organic compounds in the environment, and their ultimate fate. Processes studied include bioaccumulation, biomagnification, biodegradation, decomposition (including photochemical processes), air transport, groundwater transport, water transport, and accumulation and reaction in sediments.

ENVE-271 Air Quality and Air Pollution Control

Prerequisites:
ENVE 104, MATH 166 AND PHYS 152

Credits:
Description:

The focus of this course is on relative source contribution, regulatory standards, known health effects, and measurement techniques for criteria pollutants and specific air toxics. An emphasis on regulatory control strategies and the design of engineering controls is provided. Engineering Elective.

- **ENVE-310 Special Topics in Environmental Engineering**

  **Prerequisites:**
  
  ENVE-104 ENVE-220 and Permission of Instructor
  
  **Credits:**
  
  2.00- 4.00
  
  **Description:**
  
  This course is a directed study course for undergraduates. Students may submit proposals to the Director of Environmental Engineering Program for a program of study or work on current research in the Environmental Engineering Program.

  **Type:**

  Expanded Classroom Requirement

- **ENVE-325 Geographical Information Science**

  **Prerequisites:**
  
  Approved computer programming course or permission of instructor.
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This course provides the fundamentals of geographic information science (GIS) including the history of automated mapping. A review of the necessary hardware and software elements used in GIS is presented. Hands-on exercises with computerized mapping software are required.
• ENVE-L325 Geographic Information Science Lab

  Prerequisites:

  concurrently with ENVE 325

  Credits:

  1.00

  Description:

  Required companion computer laboratory to be taken concurrently with ENVE 325. Prerequisite: Approved computer programming course or permission of instructor.

• ENVE-361 Fluid Mechanics

  Prerequisites:

  ENVE-104 AND MATH-265 AND PHYS-152

  Credits:

  4.00

  Description:

  The basic equations of fluid statics and dynamics are covered in this course. Course topics include Archimedes' principle, Bernoulli's equation, and their applications; fluid kinematics, Eulerian and Lagrangian flow descriptions, and Three-dimensional flows; Reynolds transport theorem, finite control volumes, and differential analysis and modeling; and viscous flow in pipes, flow over immersed bodies, and open channel flow.

• ENVE-365 Hydrology

  Prerequisites:

  ENVE 104 AND MATH 166 and ENVE 361.

  Credits:
The following topics are considered in this course: the hydrologic cycle, precipitation processes, soil moisture, infiltration, groundwater, rainfall-runoff processes, utilization of water resources, and frequency analysis. Engineering Elective.

- **ENVE-375 Heat and Thermodynamics**
  
  Prerequisites:
  
  MATH-265 and PHYS-152

  Credits:
  
  4.00

  Description:
  
  This course covers the elements of thermodynamic systems, the laws of thermodynamics, the parameters and concepts of thermodynamic analyses (heat, work, internal energy, enthalpy, entropy, reversibility, more), and their application to ideal gases and heat engines. Topics include statistical mechanics, phase transitions, chemical equilibrium, Gibb's equation, the Nernst equation, and heterogeneous systems.

- **ENVE-401 Environmental Engineering Measurements**

  Prerequisites:

  Take ENVE 104; Take ENVE-226, CHEM-355, OR CHEM-211; Take BIO-273, MATH-341, OR ECE-325;

  Credits:

  4.00

  Description:

  This course describes the theory of measurement techniques used in analyzing environmental quality parameters and provides a detailed experimental understanding of air, water, and soil instrumentation for pollution measurement. Topics include criteria pollutants, sources, sinks, chemistry, and health effects of each pollutant.
- **ENVE-410 Water and Wastewater Systems**
  Prerequisites:
  Take CHEM-112; Take ENVE-226, CHEM-355, OR Chem-211; Take ENVE-361; or permission of the instructor.
  Credits: 4.00
  Description:
  This course considers the design of water and wastewater unit operations in treatment systems. Topics include water supply, water transmission and distribution systems, drinking water treatment, wastewater collection, and wastewater treatment.

- **ENVE-415 Green Engineering**
  Prerequisites:
  Take ENVE-361 and ENVE-375, CHEM 211 or ENVE 226
  Credits: 4.00
  Description:
  This course presents the principles of green engineering and their application to process engineering, building design. Sustainable and renewable energy systems are a particular emphasis of the course. Topics include risk concepts, evaluating exposures, green chemistry, life cycle analysis, industrial ecology, and environmental sensors. Prerequisites: Organic Chemistry Option, ENVE 361, ENVE 375. CHEM 211 or ENVE 226 Engineering Electives. 1 term - 4 credits.

- **ENVE-450 Environmental Engineering Project**
  Prerequisites:
  Course # formerly ENVE 411
  Credits:
This course provides the senior engineering student with meaningful problem analysis and design experience. The project and its documentation must illustrate use of fundamental elements of the design process: establishment of objectives and criteria, synthesis, analysis, testing, and evaluation. The project report must address realistic constraints including economic factors, safety, aesthetics, ethics, and social impacts. A public oral presentation before faculty and peers is also required. (Course # formerly ENVE 411). ECR

- **ENVE-510 Environmental Engineering Independent Study**
  
  Credits:
  1.00- 6.00

  Description:
  This is an independent study in environmental engineering. Topics will vary.

- **ENVS-111 Major's Environmental Science**
  
  Prerequisites:
  Open to Environmental Science and Environmental Studies majors, or by permission of instructor. Must be taken concurrently with ENVS L111

  Credits:
  3.00

  Description:
  Case study approach to the fundamentals of science applied to the environment. Topics include population and resources, environmental degradation, ecosystems, geologic processes, population dynamics, deforestation, biodiversity, climate change, ozone depletion, air, soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment. This course is required for all environmental science and environmental studies majors and minors. Other students will be admitted by permission of the instructor.

  Term:
  Offered Fall Term
• ENVS-L111 Majors' Environmental Sci Lab

Prerequisites:
Open to Environmental Science and Environmental Studies majors, or by permission of instructor. Must be taken concurrently with ENVS 111

Credits:
1.00

Description:
Laboratory exercises to illustrate topics covered in ENVS 111. Field testing and analysis of environmental samples. Field trips required. This course is required for all environmental science and environmental studies majors and minors and is the laboratory to accompany ENVS 111.

Term:
Offered Fall Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• ENVS-112 Major's Environmental Science II

Credits:
3.00

Description:
Case study approach to the fundamentals of science applied to the environmental. Topics introduced in ENVS 111 will be further developed with a focus on how environmental conditions affect human, animal and ecological health. Areas to be considered include control of environmental contaminants; public health and infectious disease control; antibiotic resistance; health issues associated with food production; contained animal feeding operations; the effects of industrialization on the environment; and the impact of disasters on environmental health. This course is intended for environmental science and studies majors and minors. Normally offered in spring semester Pre-requisites: open to environmental science and environmental studies majors only, or by permission of the instructor. Must be taken concurrently with ENVS L112

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS
ENVS-L112 Majors' Environmental Science II Lab

Credits:
1.00

Description:
Laboratory exercises to illustrate topics covered ENVS 112. Exercises will include analysis of environmental samples for such parameters as heavy metal contamination and evidence of sewage contamination, and analysis of air samples for criteria pollutants. Field trips are required. This course is required for Environmental studies majors and complements ENVS 112. 1 term: 1 credit hours Normally offered in spring semester Pre-requisite: enrollment in ENVS 112

ENVS-436 Environmental Science Practicum

Prerequisites:
This class fulfills the Expanded Classroom Requirement

Credits:
4.00

Description:
Application for the principles and techniques of environmental science to a specific environmental problem in a faculty directed independent study. Typically, this experience will include literature research and field work in an off-campus environmental agency. 1 term - 4 credits Requires instructor's consent. ECR

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

- **ENVS-510 Independent Study**

  Prerequisites:

  An independent study form must be submitted to the CAS Dean's Office.

  Credits:

  1.00 - 4.00

  Description:

  This is an independent study in environmental studies. Topics will vary.

  Term:

  Offered Both Fall and Spring

- **FR-101 Elementary French I**

  Credits:

  4.00

  Description:

  Emphasis on developing reading, writing, speaking, and listening skills. Audio-visual and textual materials based on French cultural themes. Weekly laboratory sessions required.
Term: Offered Fall Term
Type: BA FOREIGN

- **FR-102 Elementary French II**
  
  Prerequisites:
  
  Instructor's consent
  
  Credits: 4.00
  
  Description:
  
  Continuation of skills development from 101. Offered every spring semester.

Term: Offered Spring Term
Type: BA FOREIGN

- **FR-201 Intermediate French I**
  
  Prerequisites:
  
  Instructor's consent
  
  Credits: 4.00
  
  Description:
This writing-intensive course examines short readings, films, and print media in the development of language skills. Regular language laboratory sessions required.

Term:
Offered Fall Term

Type:

BA FOREIGN

- **FR-202 Intermediate French II**

  Prerequisites:
  Take FR-201 or Instructor's consent

  Credits:
  4.00

  Description:
  Continuation of skills development from 201.

  Term:
  Offered Spring Term

  Type:

  BA FOREIGN

- **FR-205 The Francophone World**

  Prerequisites:
  FR 202 or Instructor's consent

  Credits:
FR-216 Masterpieces of French and Francophone Literature in English Translation

Credits: 4.00

Description:
A study in English or representative works by major authors from the middle ages to the present. Genres: drama, fiction, and poetry. Regions: Africa, Western Europe, North America and the Caribbean, and Vietnam.

Term:
Alternates Fall & Spring

Type:
Cultural Diversity Opt B, Humanities Literature Requirement

FR-305 Advanced Conversation and Composition And Grammar

Prerequisites:
FR 202 or Instructor's consent.

Credits:
This course encourages the student to perfect conversational and writing skills in French. Authentic language and formal writing skills are detailed in this course. The development of oral proficiency is stressed with a focus on listening comprehension, reading and writing. This class is open to heritage speakers as well as those who have participated or are planning on participating in the CAVILAM, CCFS-Sorbonne, or Suffolk-Dakar Programs.

Term:

Offered Spring Term

Type:

BA FOREIGN

• FR-306 Composition, Conversation and Advanced Grammar

Prerequisites:

FR-202;

Credits:

4.00

Description:

This course enhances students' conversational and writing skills in French. Authentic language and formal writing skills are detailed. The development of oral proficiency is stressed with a focus on listening comprehension, reading and writing. Advanced French grammar is stressed with a focus on written grammatical exercises. This class is open to heritage speakers as well as those who have participated or are planning on participating in the CAVILAM, CCFS-Sorbonne Programs.

Term:

Alternates Fall & Spring

Type:

BA FOREIGN
- **FR-309 Survey of French Literature I**
  
  Prerequisites:
  
  FR 202 or Instructors permission
  
  Credits:
  
  4.00
  
  Description:
  
  A study of French literature from medieval times to the 18th century.

  Term:
  
  Offered Fall Term
  
  Type:
  
  Humanities Literature Requirement, BA FOREIGN

- **FR-310 Survey of French Literature II**
  
  Prerequisites:
  
  FR-202 or instructor's permission
  
  Credits:
  
  4.00
  
  Description:
  
  An analysis of the classic texts of French literature from nineteenth, twentieth and twenty-first centuries as they relate to important events in the art, culture, and history of France.

  Term:
  
  Offered Spring Term
  
  Type:
FR-314 Marie Antoinette, Fashion Revolutionary

Credits:
4.00

Description:
Marie-Antoinette refused to wear the clothing given to her by Robespierre for her beheading. Instead she donned a muslin chemise and a bonnet that she had kept hidden in her bedding for the occasion. Was she making a final fashion statement, or is this a final act of defiance by refusing to give up control? In this class we address questions like these and examine the discourse of fashion, visual culture and image in pre-revolutionary France. We will also analyze the relationship of dressing to image and the body politic of eighteenth-century France. The class is taught in English, and is cross-listed with the Gender and Women's Studies Program. This class can be counted toward the French or French Studies major or minor.

Term:
Occasional

FR-315 Mots Doux: Love, Lust and Literature

Prerequisites:
Take FR-205 or Instructor's consent

Credits:
4.00

Description:
The aim of this course is to introduce students to the basic trends of French literature in the context of a general thematic. While giving critical attention to the theme of love and its manifestations in representative works, this exploration also provides a base from which the student can access the evolution of French Literature. We will situate each work we study in its proper historical context while paying close attention to the evolution of literary genres and parallel trends in the formal study of literary discourse. In this class we will address various thematics that accompany a traditional survey of literature course such as, critical discourse, aesthetic representation, literary movements, genre, constructions of sexual identities, sexual politics and representations of ethnicity, class and culture.

Term:
Occasional

Type:

BA FOREIGN

- FR-316 Masterpieces of Theatre
  Prerequisites:
  Take FR-205 and FR-305 or instructor's consent
  Credits:
  4.00
  Description:
  The aim of this course is to introduce students to major plays written in French from the seventeenth to the twenty-first centuries, with a focus on both the works themselves and the socio-historical contexts in which they were written. Students will read, analyze, and produce scenes from the plays as well as produce, direct and perform select scenes at the end of the semester. Authors studied may include Molière, Marivaux, Beckett, Ionesco, Sartre, Camus, Genet, Anouilh, Sarraute, Reza, and Schwarz-Bart. Normally offered every two years

Type:

BA FOREIGN

- FR-317 Drifting Far From Home: the Representation of Travel in French Literature
  Prerequisites:
  FR-205 and FR-305 or instructor's consent
  Credits:
  4.00
  Description:
  This course examines literature written in the French language that focuses on the experience of travel. Primary texts will span from the nineteenth century to the twenty-first century, while secondary sources will explore the theoretical underpinnings of the concept of travel. Students will be
encouraged to read the literature in light of theoretical considerations formulated to better understand the experience of travel and its literary and critical uses.

Type:

BA FOREIGN

- **FR-318 Face in the Mirror: Writing & Reflecting The Self in French**

  **Prerequisites:**

  FR-205 and FR-305 or Instructor's consent

  **Credits:**

  4.00

  **Description:**

  This course examines literature written in the French language focusing on memoir, essays and autobiography. Authors such as Montaigne, Jean-Jacques Rousseau, Alphonse de Lamartine, Andre Gide, Sidonie-Gabrielle Colette, Marguerite Duras, Simone de Beauvoir, Linda Le, Daniel Maximin, Assia Djebar, Maryse Conde and Annie Ernaux may be included. Our readings will be informed by a range of literary theory which will inform our discussion on the differences between autobiography and autofiction and the question of truth and the fallibility of memory.

  Type:

  BA FOREIGN

- **FR-401 Special Topics in French and Francophone Studies**

  **Credits:**

  4.00

  **Description:**

  This seminar examines a range of topics in French and Francophone Studies. It provides individualized guidance and promotes advanced-level research in the special topic area.
Occasional

Type:

BA FOREIGN

- **FR-421 Sejour Linguistique en France**

  **Prerequisites:**
  
  FR 201-202 or permission of instructor

  **Credits:**
  
  4.00-8.00

  **Description:**
  
  This course is an immersion program in Vichy, France through our partnership with CAVILAM. Students are housed with families, participate in excursions, and take classes that are conducted entirely in French. This is an excellent opportunity to improve one's proficiency in French, to learn more about French Studies, and to live in a French-speaking country.

  **Term:**
  
  Summer

  **Type:**
  
  Expanded Classroom Requirement, BA FOREIGN

- **FR-422 Sejour Linguistique au CCFS-Sorbonne**

  **Prerequisites:**
  
  FR 201 and FR 202 or Instructor's Consent. Can take course for 1 term for 16 credits or 2 terms for 32 credits.

  **Credits:**
  
  4.00-16.00

  **Description:**
This course is an immersion program in Paris, France through our partnership with CCFS-Sorbonne. Students are housed with families, participate in excursions, and take classes that are conducted entirely in French. This is an excellent opportunity to improve one's proficiency in French, to learn more about French Studies, and to live in a French-speaking country.

**Term:**  
Offered Both Fall and Spring

**Type:**  
Expanded Classroom Requirement, BA FOREIGN

- **FR-502 Honors Senior Thesis in French**

  **Prerequisites:**
  
  Senior Standing and permission of Dept. Chair.

  **Credits:**
  
  4.00

  **Description:**
  
  A major research project completed under the supervision of a regular faculty member offered every fall semester. Prerequisites: Senior standing & permission of the department chair.

**Term:**  
Offered Fall Term

**Type:**  
BA FOREIGN

- **FR-510 Independent Study**

  **Prerequisites:**
  
  An independent study form must be submitted to the CAS Dean's Office.
Description:
Students meet with a department member to pursue advanced studies in areas of particular interest to them.

Term:
Occasional

Type:
BA FOREIGN

FR-T212 Business French Tutorial

Prerequisites:
FR-201 and FR-202 or instructor's permission

Credits:
1.00

Description:
INSTRUCTOR'S CONSENT Tutorial studies of the terminology, organization and practice of business in the French-speaking world.

Term:
Offered Both Fall and Spring

FS-303 Forensic Science

Credits:
3.00

Description:
Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall/Spring Does not satisfy University Natural Science requirement.

Term:
Offered Both Fall and Spring

- **FS-L303 Criminalistics Lab**
  
  Prerequisites:
  
  FS 303 concurrently and instructor's permission
  
  Credits:
  
  1.00
  
  Description:
  
  Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall/Spring.

  Term:
  
  Offered Both Fall and Spring

- **FS-403 Trace Evidence**
  
  Prerequisites:
  
  Prerequisite: FS 303 and FS L303 or instructor's permission
  
  Credits:
  
  3.00
  
  Description:
  
  This course covers the examination of trace materials, other than DNA sources, by visual microscopic analysis through advanced instrumental analysis. The collection, preservation, analysis, report preparation, and evidential significance for court testimony are described. Examples of common
materials, such as textile fibers, paints and glass are used to describe the process of comparison and chemical identification of a known versus a questioned specimen(s) suspect of being associated with a crime scene. Instrumental demonstrations are provided. Prerequisites: CHEM 314, CHEM L314, FS 303 and FS L303 or instructor's permission. 3-hour lecture. Normally offered in alternate years.

Term:
Alternates Fall & Spring

- FS-L403 Microscopy Lab for Trace Analysis

  Prerequisites:
  Chem 314 & L314; FS 303 & L303 or instructor's consent

  Credits:
  1.00

  Description:

  This class complements FS 403, Trace Evidence, and consists of lectures and laboratory exercises using microscopical analysis. An emphasis is placed on visual light microscope theory and usage. Stereoscopic and polarized light microscopes (PLMs) are located at individual student workstations. A comparison microscope is also available. Additionally, microscopes utilizing spectroscopic detection are studied and used. Infrared microscopy experiments are conducted on trace materials such as fibers, paint and glass. Prerequisites: CHEM 314, CHEM L314, FS 303 and L303 or instructor's permission. Student must be concurrently enrolled in FS 403. 3-hour laboratory. 1 term - 1 credit. Normally offered in alternate years.

  Term:
  Alternates Fall & Spring

- FS-428 Criminalistics Practicum

  Prerequisites:
  Instructor's permission is required for registration

  Credits:
  1.00- 4.00

  Description:
The practicum involves participation in government crime laboratories, private forensic laboratories, private analytical chemical laboratories (including biomedical laboratories), a forensic science project at Suffolk University or other laboratories where the student can demonstrate that he or she can acquire skills applicable to forensic analysis. Students are encouraged to seek a practicum sponsor that suits his/her skills and interests; assistance may be provided by the Forensic Science Program faculty. However, the Forensic Science faculty member teaching FS 436 must approve any outside practicum sponsor for this course, and if a suitable outside sponsor is not found, the student will fulfill this requirement through a forensic science project at Suffolk University. Participation at the laboratories is subject to requirements of the particular laboratory and will be open only to those students approved by the Forensic Science Committee. Ten contact hours per week, or 140 hours total, a project plan, regular project reports, and a final written and oral report are required. Normally offered Fall/Spring/Summer. ECR approved.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

- FS-429 Criminalistics Practicum II

Prerequisites:
Instructor's permission is required for registration

Credits:
1.00- 4.00

Description:
The practicum involves participation in government crime laboratories, private forensic laboratories, private analytical chemical laboratories (including biomedical laboratories), a forensic science project at Suffolk University or other laboratories where the student can demonstrate that he or she can acquire skills applicable to forensic analysis. Students are encouraged to seek a practicum sponsor that suits his/her skills and interests; assistance may be provided by the Forensic Science Program faculty. However, the Forensic Science faculty member teaching FS 436 must approve any outside practicum sponsor for this course, and if a suitable outside sponsor is not found, the student will fulfill this requirement through a forensic science project at Suffolk University. Participation at the laboratories is subject to requirements of the particular laboratory and will be open only to those students approved by the Forensic Science Committee. Ten contact hours per week, or 140 hours total, a project plan, regular project reports, and a final written and oral report are required. Normally offered Fall/Spring/Summer. ECR approved.

Type:
Expanded Classroom Requirement
• FS-504 Basic Bloodstain Pattern Analysis

Prerequisites:

Permission of the Forensic Science Advisory Committee

Credits:

4.00

Description:

This weeklong course, divided between lectures and laboratory exercises, teaches the fundamental principles of the discipline through theory and practice. The laboratory exercises allow students the opportunity to experiment with how blood reacts under known conditions. This course will not make 'instant experts' of the students, but it does give a firm foundation on which they can build expert qualifications. Offered occasionally - Most recently offered Summer 2010.

Term:

Occasional

• FS-508 Physical Evidence Testimony

Prerequisites:

FS 303 and a signature from the Forensic Science Advising Committee.

Credits:

4.00

Description:

Provides forensic scientists with legal and practical information concerning courtroom testimony. Topics include: Rules of Evidence of significance to forensic experts; the requirement of scientific reliability as a prerequisite to testimony; ethical considerations; preparation and relationship with the attorney calling an expert; persuasive courtroom behaviors and strategies; basic Fourth Amendment issues for experts; civil liability for forensic experts. Classes include lectures, discussions and simulations and are held in a courtroom. Offered occasionally; most recently offered summer 2006.

Term:

Occasional
• GER-101 Elementary German I

Credits:
4.00

Description:
Practice in both oral and written language skills using German culture as background for language study. Emphasis on active use of German to master structure, pronunciation and vocabulary. One language laboratory session per week.

Term:
Offered Fall Term

Type:
BA FOREIGN

• GER-102 Elementary German II

Prerequisites:
Ger-101 or instructor's permission

Credits:
4.00

Description:
Continuation of skills development from 101. One language laboratory session per week.

Term:
Offered Spring Term

Type:
BA FOREIGN
• GER-201 Intermediate German I

Prerequisites:

GER 102 or instructor's consent

Credits:

4.00

Description:

Four-skills approach (speaking, listening, reading, writing) utilizing authentic texts, recordings, and visual media. Grammar review, vocabulary expansion, and intensive practice. One language laboratory session per week.

Term:

Offered Fall Term

Type:

BA FOREIGN

• GER-202 Intermediate German II

Prerequisites:

GER 201 or Instructor's consent

Credits:

4.00

Description:

Continuation of skills development from 201. One language laboratory session per week.

Term:

Offered Spring Term
• GER-216 Masters of German Literature in English Translation

Credits:
4.00

Description:
Discussion of works by major authors from the 18th century to the present. Drama, fiction, and poetry. The specifically German contributions as related to the European context. Lessing, Goethe, Schiller, Heine, Buchner, Schnitzler, Kafka, T. Mann, Hesse, Brecht, Seghers, Grass, Boll, Wolf and/or others.

Term:
Occasional

Type:

Humanities Literature Requirement

• GER-218 Grimms' Fairy Tales

Credits:
4.00

Description:
A critical reading of Grimms' Fairy Tales in the cultural, literary, and political context of the times in which they were collected, edited, and read. Comparisons will be drawn with 20th/21st century cinematic adaptations. The investigation will include uncovering reasons for the graphic violence present in the tales. The contributions of major folklore scholars will also be discussed. The texts will be read in English translation.

Term:
Occasional

Type:
- GER-301 German Civilization
  Prerequisites:
  GER 202 or instructor consent

  Credits:
  4.00

  Description:
  A survey of civilization in the German-speaking countries from the Reformation to German unification (1871). Major figures, movements, and periods. Art, literature, music, and philosophy in the context of political and economic developments. Normally offered alternate years.

  Type:
  Humanities & History, Humanities Literature Requirement, BA FOREIGN

- GER-302 German Civilization II
  Prerequisites:
  GER 202 or consent of instructor.

  Credits:
  4.00

  Description:
  A survey of civilization in the German-speaking countries from the late 19th century to the present. Major figures, movements, and periods. Art, literature, music, philosophy, and popular culture in the context of political and economic developments.

  Term:
  Occasional

  Type:
• **GER-303 Advanced Conversation**

  **Prerequisites:**
  
  GER 202, or Instructors consent

  **Credits:**
  
  4.00

  **Description:**
  
  Further development of speaking ability in various contexts (e.g., informal conversation, debate, discussion of current events in the German-speaking countries). Short texts and audio-visual materials as a basis for classroom activities.

  **Term:**
  
  Occasional

  **Type:**
  
  BA FOREIGN

• **GER-304 Advanced Composition**

  **Prerequisites:**
  
  GER 202 or consent of the instructor

  **Credits:**
  
  4.00

  **Description:**
  
  Additional training in writing German. Practice in various modes (e.g., essay, poetry, dramas, short fiction). Some translation into English. Special attention paid to grammatical points where needed.

  **Term:**
• GER-306 German Cinema

Credits:
4.00

Description:
A survey of films produced in the German speaking countries from the 1920's to the present. Includes the Weimar republic, the Nazi period, postwar production from both East and West Germany, and new trends since reunification. Film esthetics and socio-historical context. All films shown in German with English subtitles.

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement

• GER-310 Masterpieces of German Literature

Prerequisites:
GER 202 or Instructor's Permission

Credits:
4.00

Description:
A reading of major works in the context of cultural trends and historical developments. Includes such texts as Goethe's Faust, Grimm's fairy tales, a selection of poetry, dramas, and short prose pieces, and at least one novel. GER 301 or GER 302 strongly recommended.
Humanities Literature Requirement, BA FOREIGN

- **GER-320 The German Press**
  
  **Prerequisites:**
  
  GER-202

  **Credits:**
  
  4.00

  **Description:**
  
  A comparative reading of articles from the German language press on such topics as contemporary culture, the environment, the European Union, globalization, immigration, minorities and the women's movement.

- **GER-412 Contemporary Germany**
  
  **Credits:**
  
  4.00

  **Description:**
  
  A survey of German culture, politics, and society from the end of World War II to the present day. Discussion of such topics as the post-fascist mentality, economic efficiency, re-education, Americanization, division and it's legacy, high culture, entertainment for the masses, environmental...
movements, pacifism, and multiculturalism.

Term:
Occasional

Type:

Humanities & History, Humanities Literature Requirement

- **GER-419 East Germany and the Cold War**
  
  **Credits:**

  4.00

  **Description:**

  When the German Democratic Republic was founded in 1949, observers in the West viewed it as an artificial construct created to serve the needs of the Soviet empire. The self-image of the GDR as created by its leadership revolved around the idea of an anti-fascist German state designed as a bulwark against any revival of National Socialism. Over a generation after the fall of the Berlin Wall, it is possible to undertake a dispassionate analysis of the forty-year history of the 'other' German state as manifested in its cultural identity and political role during the Cold War. Cross-list with GVT 472/872

  Term:

  Occasional

  Type:

  Social Science

- **GER-420 The Greens and Environmentalism**

  **Credits:**

  4.00

  **Description:**
The rise of the Green Party, from its grass-roots beginnings to participation in the federal government. Background on the development of green consciousness in Germany and Europe since the early 20th century. Present governmental policies and programs (e.g. alternative energy sources, organic farming, recycling, dismantling of nuclear power). Cross-list with ENST 420/GVT 420/620.

Term:
Offered Spring Term

Type:
Humanities & History, Humanities Literature Requirement

- **GER-502 Honors Thesis**

  Prerequisites:

  Permission of the Dept. Chair.

  Credits:

  4.00

  Description:

  A major research project completed under the supervision of a regular faculty member.

  Term:

  Offered Fall Term

  Type:

  BA FOREIGN

- **GR-101 Elementary Ancient Greek**

  Credits:

  4.00

  Description:
An introduction to the basic syntax and vocabulary of Ancient Greek with an emphasis on reading some modified passages from genuine Ancient Greek texts as soon as possible. No background in grammar or Greek is assumed.

Term:
Offered Fall Term

Type:
BA FOREIGN

- **GR-102 Ancient Greek II**

  Prerequisites:
  GR-101

  Credits:
  4.00

  Description:
  A continuation of GR 101. During the semester we will complete our introduction to Ancient Greek and begin to read continuously a classic work of poetry, history, or philosophy in the original.

Term:
Offered Spring Term

Type:
BA FOREIGN

- **GVT-110 Introduction to American Democracy**

  Credits:
  4.00

  Description:
An introduction to the American political system and constitutional framework. Focus will be on the interplay of various institutions (the Presidency, Congress and the Judiciary) in creating public policies. Contemporary public issues will be discussed, as will the role of political theory in shaping American democracy. Attention will be given to the role of the news media, public opinion, political ideology, political parties and interest groups in the American system.

Type: Social Science, BSJ SOCIAL SCIENCE

- **GVT-H110 Honors Intro to American Democracy**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Special honors section of GVT 110. Offered every fall.

  **Type:**
  
  Social Science

- **GVT-115 Evolution of the Global System**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  The goal of this course is to introduce the student to the main actors, social facts and processes that shaped the international system in the nineteenth and twentieth centuries. By analyzing the spread of industrialization, the race for colonies, the thrust of imperialism, and the rapid growth of nationalism, among other factors, this course explains the contradictory and simultaneous trends of unprecedented levels of prosperity and violence in Europe and beyond. While the course examines the role of the United States in the international system, particularly in light of its dominant role since the early twentieth century, it also emphasizes the developments taking place in other regions such as Asia, Africa and Latin America. This will allow students to understand the global arena as a space of complex interconnections involving varieties of forms of production, national political cultures, and idiosyncratic traditions. This course sets the foundations for other courses in International Relations and Regional Studies.
• GVT-120 Research Methods
  Credits: 4.00
  Description:
  Building on the skills learned in GVT 110, students will be introduced to the subfields of political science and learn to analyze political writings. Focus will be on the use of the scientific method for research on politics and government. Students will learn the steps in writing a research paper, including developing the research question and selecting a research design. Attention will be given to the use of statistical analysis and public opinion polling in political research.
  Type:
  Social Science

• GVT-H120 Honors Research Methods
  Credits: 4.00
  Description:
  A special honors section of Research Methods. Students will be introduced to the subfields of political science and learn to analyze political writings. Focus will be on the use of the scientific method for research on politics and government. Students will learn the steps in writing a research paper, including developing the research question and selecting a research design. Attention will be given to the use of statistical analysis and public opinion polling in political research.
  Type:
  Social Science

• GVT-201 Statistics for Political Science
  Prerequisites:
  Sophomore Standing GVT 110 and 120 and Math 130 or higher.
This course is an introduction to statistics and empirical research methods generally used in political science. The course will emphasize the use of statistics and its value in substantive political science research. Statistics is a tool for drawing conclusions and making inferences from observable evidence. As well, the specification of conditions under which evidence is observed affects the conclusions and arguments that political scientists draw about how social and political processes work. The purpose of this course is to equip students with tools to interpret and conduct original data analysis, critique and make an argument based on data, and provide a view into the process of political science research and how political scientists use statistical methods and research design to answer substantive questions about politics. Since most applied data analysis utilizes data management software, students will learn how to use SPSS as a tool for conducting data analysis. Prerequisites: Sophomore Standing, GVT 110 and 120 and Math 130 or instructor's consent. 1 term - 4 credits.

Type:

Quantitative Reasoning

- **GVT-203 Women in World Politics**

  Credits:

  4.00

  Description:

  The relationship of women to their political culture and structures. The role of women seen in theory (e.g., Marxism, American feminism, existentialism) and in global comparative analysis. Cultural Diversity B

  Type:

  Cultural Diversity Opt B, Social Science, BSJ SOCIAL SCIENCE, BSBA SOCIAL CHANGE

- **GVT-208 Politics / Religion**

  Credits:

  4.00
This course explores what major religions say about the status and responsibilities of the state and how, in turn, selective states have, in theory and practice, structured the place of religions in political life. Particular attention is given to issues of politics and religion in the United States. Cultural Diversity A

Type:
Cultural Diversity Opt A, Social Science, BSJ SOCIAL SCIENCE

- **GVT-223 American Politics & Institutions**

  Prerequisites:

  GVT 110 or GVT 120 or instructor's permission

  Credits:

  4.00

  Description:

  This course will provide an examination of the institutions that are involved in the American policy-making process. The student will learn about the presidential, (as opposed to the parliamentary) system that exists in the United States. The course will focus on a relationship between the President and Congress and how that relationship impedes or facilitates the public policy process, including the budgetary process. The course will include a discussion of the president's role as head of the executive branch, and the implementation of congressional policies. Attention will be given to the role of the judiciary in the policy process. Normally offered every year.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-224 American Politics & Policy**

  Prerequisites:

  GVT 110 and GVT 120 or instructor's permission

  Credits:

  4.00
An introduction to the process by which public policies are made in the United States. The class will focus on agenda-setting and policy formulation at the federal level, and will include a discussion of the various actors in governmental institutions that impact public policy. Several policy issues will be used as examples to illustrate the process. Some comparisons will be made to state and local policymaking. Normally offered every year.

**GVT-240 Acts of Courage and Political Conscience**

**Credits:**

4.00

**Description:**

This course will explore the actions and words of a range of individuals who dared to be different in the hope of having an impact on U. S. politics and society. The expression of their views and actions may have initially been rejected. In other cases, their views served as catalysts for change.

**Type:**

Social Science, BSJ SOCIAL SCIENCE

**GVT-243 American Constitutional Law**

**Prerequisites:**

not open to freshmen

**Credits:**

4.00

**Description:**

The growth of Constitutional law and the role of the Supreme Court is examined by analysis of court decisions dealing with Judicial Review, Federalism, Presidential and Congressional powers. Normally offered every year.

**Type:**
- **GVT-244 Civil Liberties**

  **Prerequisites:**
  
  Not open to Freshmen

  **Credits:**
  
  4.00

  **Description:**
  
  Analysis of Supreme Court decisions in regard to political and civil rights including freedom of speech, press, assembly and religion, obscenity, race and sex discrimination, and criminal procedure. Normally offered every year.

  **Type:**
  
  Social Science, BSJ SOCIAL SCIENCE

- **GVT-253 State and Local Government**

  **Prerequisites:**
  
  GVT 110/120 OR INSTRUCTOR'S CONSENT

  **Credits:**
  
  4.00

  **Description:**
  
  The development, structure and functions of state governments with emphasis on the government of Massachusetts; the various forms of local government in cities and towns; analysis of the relationships between local, state and federal governments. Normally offered alternate years.

  **Type:**
  
  Social Science, BSJ SOCIAL SCIENCE
- **GVT-261 Theory & Practical International Relations**

  Prerequisites:

  GVT 110, and GVT 120 or consent of instructor.

  Credits:

  4.00

  Description:

  Review of major approaches to the study of international relations. Definition of concepts such as power, nationalism, imperialism, and dependency. Special attention to the use of force and conflict resolution. Special class project. Normally offered every year.

  Type:

  Social Science

- **GVT-276 Political Theory**

  Prerequisites:

  Sophomore standing

  Credits:

  4.00

  Description:

  Political thought and philosophy from antiquity to the present, including such thinkers as Aristotle, Locke, Marx and Nietzsche. The course will highlight major watersheds in political theory such as the Renaissance and the Reformation, and will also examine non-Western traditions. Normally offered alternate years.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-279 Minority Politics in the United States**
Prerequisites:
Sophomore Status Required

Credits:
4.00

Description:
This course is designed to provide an intensive survey of minority politics in the political development of the United States. We will focus on the historical and contemporary experiences of several groups in American politics. In particular, the course will look at four groups that, for reasons of race, have been subjected to systematic discrimination and political subordination in U.S. history: American Indians, African Americans, Latino Americans, and Asian/Pacific Americans. In this course we will work toward an understanding of American politics from the point of view of politically active and engaged persons of color. This course will also take a close look at the future of race and ethnicity in American politics. It is a fundamental premise of this course that an understanding of race and minority politics is necessary to comprehensively understand American political development and many important issues in contemporary American politics. Cultural Diversity A

Type:
Cultural Diversity Opt A, Social Science, BSJ SOCIAL SCIENCE

• GVT-280 Law, Public Policy, and Psychology

Credits:
4.00

Description:
The law affects and is affected by public policy. Beyond this, the law affects, and is affected by, many other disciplines. Understanding the evolving relationship among public policy, law and psychology in the US is integral to both disciplines. This course explores contemporary forensic psychology's role in the legal system - e.g., jury selection; expert witnesses; biases; crime control vs. due process, etc. through readings, class discussion, occasional audio-visual material and guest speakers if and when appropriate and available. Normally offered every other year.

Type:
Social Science, BSJ SOCIAL SCIENCE

• GVT-281 Intro to Comparative Politics
Prerequisites:
GVT 110 and GVT 120 or consent of instructor.

Credits:
4.00

Description:
This course examines various methods of comparing political systems. Institutions such as executive departments, legislatures, court systems and local governmental systems are examined comparatively. It includes analysis of the impact of different economic systems on political/governmental institutions, and on economic circumstances that impact government. It also looks at political socialization both in terms of process and comparative content. An effort is made to include countries from all regions of the world. Normally offered every year.

Type:
Social Science, BSJ SOCIAL SCIENCE

- **GVT-283 Third World Politics**

  Credits:
  4.00

  Description:
  Theories dealing with the process of political change in countries of the Third World: the impact of the military, traditional culture and institutions, economic problems, strong personalities and other factors on political life and institutions. Prerequisite: Not open to freshmen. 1 term - 4 credits. Normally offered alternate years. Cultural Diversity B

  Type:
  Cultural Diversity Opt B, Social Science

- **GVT-284 Intro to Peace & Conflict: Horn of Africa & International Security**

  Credits:
  4.00
This course analyzes both ongoing and potential conflicts as well as conflict fault-lines in the Horn of Africa region and their implication to International Security. It inquires into the nature of regional conflicts and security complexes and explores ways of resolving them in a peaceful manner. In so doing, it examines such international security threats as state failure, Islamic terrorism, and piracy in the light of the dynamics and evolution of the debates on International Security as well as the transformations in the main global, continental, and regional security institutions such as UN, AU, and IGAD. Based upon International Relations perspectives, it analyzes the traditional definitions of security at the national, regional and international levels of analysis since 1945. Likewise, it studies how states and international institutions have revisited the concepts, policies and strategies of security in the post Cold War and post 9/11 world, from realist perspectives to the Copenhagen School of security studies.

Type:

Social Science

- GVT-302 Public Relations and Lobbying

Credits:

4.00

Description:

Methods and practices of interest groups trying to influence legislative and administrative decision making; methods and practices of public agencies trying to influence governmental policies; the military industrial complex and other cases on federal and state levels. Normally Offered every third year.

Type:

Social Science, BSJ SOCIAL SCIENCE

- GVT-303 Documentary Film and the Image of Conflict in the Middle East

Credits:

4.00

Description:

This course will focus on some of the divisions and conflicts within Israeli society. Students will analyze and compare mainstream media discourse to alternative representations in documentary film. Analysis will also cover media representation of the Israeli-Palestinian conflict.
• GVT-306 Women & Public Policy

Credits:

4.00

Description:

This course examines women's issues and roles in the public policy process. Topics will include policies that affect women, such as child care and reproductive issues. Emphasis will also be placed on women's roles in the policy process, as citizens, voters, and public officials. Prerequisite: Open to non-majors; not open to freshmen. Normally offered alternate years. Cultural Diversity A

Type:

Social Science, Cultural Diversity Opt A, BSJ SOCIAL SCIENCE

• GVT-308 International Security

Prerequisites:

GVT 281 and GVT 261

Credits:

4.00

Description:

This course examines the dynamic evolution of the debates on International Security as well as the transformations in the main global and regional security institutions such as UN and NATO. Based upon International Relations perspectives, it analyzes the traditional definitions of security at the national, regional and international levels of analysis since 1945. Likewise, it studies how states and international institutions have revisited the concepts, policies and strategies of security since the end of the Cold War and after the September 11 events, from realist perspectives to the Copenhagen School of security studies. Offered every year.

Type:

Social Science

• GVT-310 Global Political Economy
Prerequisites:
GVT 281 and GVT 261 or instructors consent

Credits:
4.00

Description:
This course explores the main premises and approaches to study Global Political Economy. After analyzing the history and development of the international system, it studies how states and markets are interconnected in the creation and reform of economic and political international institutions in the globalization process. It also focuses on the most acute problems of the current international system in the area of IPE, namely, environmental degradation, external debt, poverty, increasing gap between rich and poor countries, and trade conflicts. Offered every year.

Type:
Social Science

- GVT-311 Politics of the Arab-Israeli Conflict

Prerequisites:
Open to Juniors and Seniors

Credits:
4.00

Description:
An analysis of the origins and the local, regional, and international dimensions of the Palestinian-Israeli-Arab conflict, this course will examine the conflict through the eyes of the major protagonists and the roles played by them from the early twentieth century to the present: Zionists/Israelis, Palestinians and other Arabs, British, Americans, Soviets. We will also explore the questions of why this conflict has captured the world's attention and why it has gone unresolved since World War II. Finally, we will examine the possibilities and attempts for resolution of what appears to be an intractable human tragedy.

Type:
Social Science
• GVT-313 The Atlantic Triangle: European Union, United States and Latin America

Credits:
4.00

Description:
This course examines the main political, economic and social trends in the European Union, Latin America and the United States as well as the multiples interactions among them since the end of the Cold War. The readings are structured in two main sections. After briefly reviewing the historical development of these three partners on both sides of the Atlantic in the past five decades, the first section identifies the key processes that are defining the main characteristics of Europe (deepening vs. widening), United States (isolationism vs. internationalism) and Latin America (democracy vs. social equality). The second part of the course explains the tendencies and contradictions in the construction of the external relations of the European Union towards the United States and Latin America, from the cooperation and competition in development of a safe and free Europe in the 1990s to the acrimonious debate about the 2003 Iraq invasion and the prospects of the 2006 EU-Latin America Vienna Summit, among other important events.

Type:
Social Science, BSJ SOCIAL SCIENCE

• GVT-314 Media, Chaos, and Culture That Changed America

Credits:
4.00

Description:
The overall goal of this course is to understand why 1968 is considered one of the most tumultuous years in the 20th century as regards the news media; music and theater; television and film censorship; and in the shift in culture and mores of an entire subset of the population. The course will focus on specific touchstones that elucidate the communication to both the mainstream public, know broadly as the Silent Majority, and the new emerging 'boomers', whose values and attitudes still drive the media ten years into the 21st century. Students will learn how a single year of media can change forever how one part of a culture views itself, while at the same time discovering how another part of that same culture continues to resist those changes 40 years later. Students will learn how many of the seeds of ideas they take for granted in 2011, including educational and sports equality (Title 9) for women; environmental sensitivity, and gay rights were planted in the print, films and music of 1968, but didn't bloom until the years which followed. Guest speakers, films and lectures will be used to reinforce material from the texts.

Type:
BSJ SOCIAL SCIENCE, Social Science
GVT-323 Political Survey Research

Prerequisites:
OPEN TO JUNIORS & SENIORS

Credits:
4.00

Description:
Everything needed to design, carry out, and interpret a political survey. Topics covered will include questionnaire design, sampling, interviewing, coding data, and univariate and bivariate analysis of the results. Multivariate analysis will be discussed but not studied in-depth. An actual survey will be conducted as a class project. Normally offered every year.

Type:
Social Science, BSJ SOCIAL SCIENCE

GVT-324 The 1st Amendment in the Internet Age

Credits:
4.00

Description:
Defamation, privacy, copyright, pornography, incitement to lawless conduct and harassment are six areas in which first Amendment freedoms historically have been constrained to some degree. The constraints have been worked out largely through judicial decisions issued over the last century. This course would look at the traditional interests that were balanced to produce the constraints, the Internet's impact on those interests and whether the impact suggests the need for rebalancing.

Type:
BSJ SOCIAL SCIENCE, Social Science

GVT-325 U.S. Constitutional Law & Civil Liberties
This course examines a range of contemporary issues introducing students to the U.S. Constitution and the fundamental concepts of constitutional law. Students discuss and analyze topics including separation of powers, federalism, freedom of speech, the death penalty, gun control, and civil rights. We will explore current constitutional challenges and their relationship to law and society.

- **GVT-328 American Law, Government and Policy**

  **Prerequisites:**

  Prerequisites: Not open to freshmen

  **Credits:**

  4.00

  **Description:**

  This course provides an overview of the legal system in the United States of America, in connection with the role of the Federal and State government and their policy. This course is designed for undergraduate and graduate students. During the semester, we will explore a variety of issues involving the legal system of the United States and how it effects local and federal government.

  **Type:**

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-329 Law for Environmental Protection and Pollution Prevention**

  **Credits:**

  4.00

  **Description:**

  A course about how the constitution, common law and statutory law provide for environmental protection and pollution prevention. Students will learn basic skills needed to understand how environmental law works, including constitutional clauses and amendments, landmark civil litigation, the Clean Water Act, the Clean Air Act, landmark civil litigation, and hazardous waste law.
- **GVT-333 Conspiracy in American Politics and Culture**

  **Credits:**
  4.00

  **Description:**
  This basis of this course will be in-depth examinations of various conspiracies in American Politics and Culture, beginning with the Salem Witch Trials through the Lincoln Assassination Conspiracy and the Sacco & Vanzetti case through the present day. Present day conspiracies will include an examination of the JFK and RFK Assassinations, the Pentagon Papers case, the Watergate Conspiracy, the Iran/Contra scandal, Whitewater and the Vast Right Wing Conspiracy, the World Trade Center bombing, the Oklahoma City Bombing, Global Warming, and the 9/11 Investigation.

- **GVT-335 Law, Politics and Public Health**

  **Credits:**
  4.00

  **Description:**
  Law is one of the primary tools used to protect public health in the United States. This course will use various case studies (tobacco industry, food industry, health care policy, etc.) to explore innovative uses of the law in diverse areas related to public health. Students will learn about the ways in which attorneys, public officials, politicians, and public health practitioners work together to make public health policy. Normally offered alternate years.

- **GVT-336 Political Leadership**
This course begins with the premise that leadership is a continuous process, and that leadership can be studied, analyzed, and learned, across the public (as well as private for profit, and private non-profit) sectors. The first half of the course will, following the Northouse, Burns, and Gardner texts, delve into various theories of leadership, including the traits, skills, style, and situational approaches. We will also cover gender differences in leadership studies, and leadership ethics. The second half of the course will deal with transformational leadership, and real life (historical and recent) examples of political leadership, including Nelson Mandela, J. Robert Oppenheimer, George Washington, Margaret Thatcher, and others. There will also be in-class discussions on current challenges in public policy, asking students to envision what leadership skills they have studied that could come into play in solving these public policy challenges. During the second half of the course, students will be required to interview a leader of their choice, and, utilizing the material covered during the course, write a paper based on the interview.

**GVT-337 Public Policy & Business**

**Prerequisites:**

Not open to freshmen

**Credits:**

4.00

**Description:**

Public policy-makers' interests in formulating and implementing policy in the areas of environmental protection, consumer protection, equal employment opportunity, health care, taxation and competition with a focus on business responsibility will be critically analyzed. Costs and benefits to the public and business will be evaluated. Prerequisite: Open to non-majors; not open to freshmen. Normally offered alternate years.

**Type:**

Social Science, BSJ SOCIAL SCIENCE

**GVT-339 Community Advocacy**
Prerequisites:
GVT 110 OR GVT 120

Credits: 4.00

Description:
This course represents a unique opportunity for students to develop a general understanding of the relationship between politics and the community; a systematic and holistic way of viewing and analyzing the impact of community-based, community-wide organizations and efforts. Normally offered alternate years.

Type:
Social Science, BSJ SOCIAL SCIENCE

• GVT-340 Moot Court

Credits: 4.00

Description:
Moot Court consists of simulated arguments in front of the Supreme Court of the United States. Students brief approximately 20 Supreme Court cases and apply them to a hypothetical case before the Court. Students form written and oral arguments based on two constitutional questions in the hypothetical. Two person teams will develop legal oral arguments in favor of their clients. Students learn how to compose written briefs, develop a knowledge of case law, learn how to effectively respond to questioning, and develop forensic skills, and courtroom demeanor. Moot Court is a great preparation course for undergraduate students planning to attend law school.

• GVT-343 State Court Process & Policy

Prerequisites:
Junior status or above

Credits: 4.00
Contemporary state court processes, progress and problems including trial and appellate court practice, procedure and participants; plea bargaining, alternative dispute resolution; policy making. Normally offered alternate years.

Type:

Social Science, BSJ SOCIAL SCIENCE

- **GVT-344 Unleashing Legislative and Community Activism**

  Credits:
  
  4.00

  Description:

  This course will teach the students the importance of legislative advocacy to effect political and policy change and the important role advocacy plays in making our democracy transparent and accessible. The course will explore the various role and interplay between the political branches and the functions they perform individually as part of the overall democratic/political system. Through a combination of lecture, guest speakers, observation attendance at legislative sessions and hearing; and journal keeping, students will learn and see first-hand how local government, grassroots organizations, media, and one citizen can bring about change, solve problems, and make a positive contribution to our community.

  Type:

  BSJ SOCIAL SCIENCE, Social Science

- **GVT-345 New Directions in Advocacy and Lobbying**

  Credits:

  4.00

  Description:

  In this course we will examine the latest developments in interest group politics, including trends in grassroots organization, mobilization, and lobbying; fundraising; advocacy by nonprofit organizations; the growth of issues management; changing regulations; ethical considerations; and the evolving relationships between advocacy and electoral organizations. We will make extensive use of amateur and professional advocates and lobbyists as guest speakers. Students will be expected to write a research paper on some aspect of the current politics of advocacy and lobbying.
• GVT-346 The American Presidency
  
  Prerequisites:
  
  GVT 110 AND GVT 120 OR INSTRUCTOR'S CONSENT
  
  Credits:
  
  4.00
  
  Description:
  
  Perspectives on the role and problems of the presidency in American political life; the nature and difficulties of presidential influence and effectiveness, presidential authority within our system of government, and the impact of presidential character. Normally offered alternate years.

• GVT-347 Legislative Politics
  
  Prerequisites:
  
  GVT 110 and GVT 120 or instructor's consent
  
  Credits:
  
  4.00
  
  Description:
  
  The structure and functioning of legislatures. Particular emphasis on the U.S. Congress, how it works and how it compares with other legislatures. The role of legislatures in a democracy. Normally offered alternate years.
• GVT-348 Law, Race and Gender

Prerequisites:

GOV 110, GVT 120, or instructor's consent

Credits:

4.00

Description:

Covers the 13th, 14th, and 15th amendments, known as the Reconstruction amendments. This course focuses upon these three critical amendments, with an eye towards their importance in framing race-based rights, and the 14th with regard to gender-based rights. It emphasizes the politics of these amendments’ language, ratification, and impact (including their 130-year interpretation by the Supreme Court.) The course treats the U.S. Constitution dynamically, as a political and social educator. It also examines the extent to which the Constitution could be viewed as race- or gender-blind.

Type:

Cultural Diversity Opt A, Social Science, BSJ SOCIAL SCIENCE

• GVT-350 Inside Massachusetts Community Courts

Credits:

4.00

Description:

The object of this course is to teach the students the history of the District and Municipal Courts of the Commonwealth of Massachusetts and the important role they play in their respective communities throughout the state. The course will explore the various departments within each court and the functions they perform individually and as part of the overall court system. Through a combination of lecture, guest speakers, courtroom observation and journal keeping, students will learn and see first-hand how the local community courts dispenses justice, solves problems and makes a positive contribution to the communities they serve.

Type:

BSJ SOCIAL SCIENCE, Social Science
• GVT-352 Constitutional Reform

Prerequisites:

GVT 110, 120, 243, and 244 or instructor's permission

Credits:

4.00

Description:

A critical analysis of whether our constitutional system is adequate to effectively resolve the new and complex problems of governance in this century. The strengths and weaknesses of governmental structure created by the U.S. Constitution will be examined. Past and current amendment proposals will receive special attention. Normally offered alternate years.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-353 Politics in Film

Prerequisites:

SOPH STANDING REQUIRED

Credits:

4.00

Description:

A country's popular culture offers significant and accurate insights into the political values, attitudes and beliefs of its people at a given point in time. One form of popular culture, films, can be a powerful disseminator of political messages. This course will examine a number of different eras and political themes as they have been reflected through films in the U.S. Open to non-majors.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-355 American Parties & Politics
Prerequisites:

GVT 110 AND GVT 120, or instructor's consent

Credits:

4.00

Description:

Historical overview of party development in the U.S. and of ideological and political trends as reflected in voting behavior. Recent developments in party structure, electoral strategies and political style. The party crisis vs. the art of political campaigning. Normally offered alternate years.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-357 Urban Politics & Government

Prerequisites:

GVT 110/120 OR INSTRUCTOR'S PERMISSION Junior status or above

Credits:

4.00

Description:

This course examines the political process and problems characteristic of big cities in the United States today. Students are encouraged to do individual and group research on specific urban political topics. Normally offered alternate years.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-358 Politics and the Media

Prerequisites:

GVT 110 OR GVT 120
This course will explore the influence of the media on contemporary political issues and public opinion; and the use of media in political campaigns, advertising, etc. Topics may include the impact of talk radio, the issue of the media bias, the role of television, the Hollywood connection, etc. Normally offered alternate years.

Type:
Social Science, BSJ SOCIAL SCIENCE

- GVT-359 Hockey, International Development & Politics

Credits:
4.00

Description:
This class examines the way in which national identity, global and regional economics and international development intersect. It uses the professionalization of the sport of hockey and its subsequent spread around the globe as its case. It will look at the rise of the pro game, the way in which it shapes national identity in the Canadian case, the way in which the pro business model has changed in response to broad socio-economic changes in North America and geo-political shifts around the globe, especially in Eastern Europe and the Former Soviet Union.

- GVT-360 Elections and Voting

Credits:
4.00

Description:
How are elections administered in the United States? Do Americans have confidence in the electoral process? Should they? Why or why not? This course will examine elections in the United States in detail -- from how they are funded to how they are administered to how voters behave. Students will have a choice of either serving as poll workers during the November election or organizing and conducting research of potential voters. Students will gain hands-on experience in actual research design, election administration, and non-partisan get-out-the-vote activities. In addition, students will gain a deeper understanding of the relationship between attitudes, opinion, and voting behavior in American politics and institutions. ECR
- **GVT-363 American Foreign Policy**

  **Prerequisites:**
  
  GVT 281 and GVT 261

  **Credits:**
  
  4.00

  **Description:**
  
  A decision-making approach to understanding the domestic and institutional context of U.S. foreign policy. Includes analysis of continuity and change since WWII using case studies of critical decisions, e.g., Korea, Cuba, Vietnam, etc. Not open to freshmen. Prerequisites: GVT 110, GVT 120, GVT 261 or instructor’s consent. 1 term - 4 credits. Normally offered every year.

- **GVT-366 Massachusetts Legislative Process**

  **Prerequisites:**
  
  GVT 110 OR GVT 347; SOPH STANDING

  **Credits:**
  
  4.00

  **Description:**
  
  This course examines fundamental framework, legislative oversight of the Executive Branch and basic functions of the Massachusetts Legislative. Special emphasis will be placed on gaining a practical understanding of the Massachusetts legislative process. Students are encouraged to explore the methods by which the major legislative measures are undertaken, various roles of legislative leaders, committee hearings and the procedures that are used under the Massachusetts General Laws. Open to non-majors. Offered alternate years.
• **GVT-367 Politics of Spain**

  **Credits:**
  4.00

  **Description:**
  This course is designed to provide students with a basic grounding in political institutions and processes in contemporary Spain. Political developments are presented in their socio-economic context, with special emphasis on the Spanish transition from a dictatorship to a democracy. Attention is also given to the issue of the Basque and Catalan nationalism, as well as the process of European integration. Prerequisite: GVT 281 or instructor's consent. 1 term - 4 credits. Normally offered alternate years at the Madrid Campus.

  **Type:**
  Social Science

• **GVT-372 Coastal Zone Management**

  **Prerequisites:**
  Instructor's Consent

  **Credits:**
  4.00

  **Description:**
  This course presents a survey of a coastal environment, its physical characteristics, natural systems, economic uses, and development pressures. Lectures examine strategies formulated in the U.S. for land and water resource management in the coastal zone. The roles of federal, state and local government, environmental groups and resource users are also explored. Finally, by comparing coastal zone management problems in the U.S. to those elsewhere in the world, students gain a global perspective. Normally offered every years. The course available through the Marine Studies Consortium and will be taught on the campus of one of the Consortium's member institutions.

  **Type:**
  Social Science

- **GVT-382 Crisis and Integration in Europe**

  **Prerequisites:**
  
  Junior status or above
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Why did 17 European countries surrender the sovereign control of their currency and create the Euro? Will Turkey become a member of the European Union? Will Europeans continue free riding the security protection of the United States? Is the integration process another layer of bureaucracy or an institutional instrument to dean with the permanent crises in Europe? There are some of the questions guiding the discussions in the class.

  **Type:**

  Social Science

- **GVT-383 African Politics**

  **Prerequisites:**
  
  GVT 110 and GVT 120
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  The political development of Africa in colonial and post-colonial periods. Analysis of the evolution of governmental institutions includes economic, social and personal factors; political forces at work in present day Africa. Not open to freshmen. Normally offered alternate years. Cultural Diversity B

  **Type:**

  Cultural Diversity Opt B, Social Science
• GVT-384 U.S. and the Middle East

Credits:
4.00

Description:
This course will explore the role played by the United States in the Middle East in the twentieth century, with emphasis on the period since World War II. Our study will begin with a decision-making approach to understanding the domestic and institutional context of America's policy toward the region, followed by an examination of that policy as it confronted radical nationalist, socialist, and Islamic movements, Soviet influence, and specific contemporary problems - the Arab-Israeli conflict, the Lebanese civil war, the Iranian revolution, the Iran-Iraq War, and the Gulf War. Open to non-majors, not open to freshmen. Normally offered alternate years.

Type:
Social Science, BSJ SOCIAL SCIENCE

• GVT-385 Politics of Russia and the Former Soviet Republics

Prerequisites:
Not open to freshmen.

Credits:
4.00

Description:
This course will examine political and economic institutions of newly independent entities from Kazakhstan to the Baltics. It will include historical roots of the Soviet Union from the Russian Revolution through the Gorbachev years. Attention will be paid to Marxist theory and non-Marxist challenges for the economy of the area as well as the state. While some of attention will be paid to foreign relations of the former Soviet Union and the current regimes with Western Europe and the U.S. and elsewhere, the major emphasis will be on domestic policy on citizens of the former Soviet Union. Normally offered alternate years.

Type:
Social Science
• GVT-387 Reconciliation and Conflict in Central America

Prerequisites:
GVT 281 or instructor's consent. Junior status or above

Credits:
4.00

Description:
current political trends in the Caribbean and in selected Central American nations. Emphasis will be placed on comparative analysis of public policies in the region, as well as on external factors which impact on politics in the Caribbean and Central America. Students will use academic sources in their analysis, as well as novels and other literary sources for the background of their analysis. Not open to freshmen. Normally offered every third year.

Type:
Cultural Diversity B

• GVT-388 The United States and East Asia

Credits:
4.00

Description:
This course will examine US relations with East Asia through the lens of leading International Relations theories. We will analyze the growing regional influence of China, and will also examine the foreign policies of major regional powers including South and North Korea, Japan, and Taiwan. By exploring the economic and political factors that are working to shape the dynamic East Asian regional order, we will gain an understanding of the challenges faced by the US in this economically and strategically pivotal region.

Type:
BSJ SOCIAL SCIENCE, Social Science

• GVT-389 Politics of China
Prerequisites:
Junior status or above

Credits:
4.00

Description:
Emphasis on a particular approach to the problems of economic modernization and political development. Historical background; the revolutionary movement; present political structures and current issues. Cultural Diversity B

Type:
Cultural Diversity Opt B, Social Science, Asian Studies

• GVT-390 Global Politics of Resistance

Credits:
4.00

Description:
Utilizing the theoretical frameworks of Comparative Politics and International Relations, this course will focus on a critical analysis of contemporary forms of resistance politics, such as those culminating in popular struggles for peace, democracy, human rights, economic justice, gender equality, environment, and the rights of indigenous peoples.

Type:
Social Science

• GVT-391 Canada: Multicultural Politics

Prerequisites:
GVT 110/120 or Instructor’s permission

Credits:
Description:

This course examines the Canadian model of incorporating diverse communities into its constitutional and political framework, including the founding British North American Act of 1867, the 1982 Constitution Act, and two later attempts at constitutional reform. Canada's role in balancing two official languages, English and French, is discussed, as is its recognition of a First Nations native-governed territory in the Arctic. This course introduces students to the Canadian polity and compares its parliamentary system with the U.S. separation of powers system. Prerequisites: GVT 110, GVT 120 or instructor's consent. Normally offered alternate years. Cultural Diversity B

Type:

Cultural Diversity Opt B, Social Science, BSJ SOCIAL SCIENCE

- **GVT-393 Latin American Politics Today**

  Prerequisites:

  GVT 281 or instructor consent

  Credits:

  4.00

  Description:

  This course examines the evolution of Latin America in the context of globalization. The first part analyzes the main political and economic trends of Latin America as a region, while the second presents the main challenges Mexico is facing today in the area of security. The third part moves forward into the detailed explanation of the transformations of the largest South American countries such as Colombia, Argentina, Chile and Venezuela, among others. The final section looks at the relationship between Latin America and the United States.

  Type:

  Cultural Diversity Opt B, Social Science

- **GVT-394 Nation Building and International Intervention**

  Credits:

  4.00
What is the role of the international community in nation building? Who are the key nation building actors? Who should pay for nation building? How long should it take? And what are the main reasons for success and failure in nation building? This course will investigate these questions, looking especially at the cases of the former Soviet Central Asia and Afghanistan. Students will learn about one of the most pressing issues of the contemporary world, with an eye toward helping students navigate a globalized world.

Type:
BSJ SOCIAL SCIENCE, Social Science

- GVT-398 Terrorism and Extremism in South and Central Asia
  Prerequisites:
  Junior status or above
  Credits:
  4.00
  Description:
  This course discusses terrorism and extremism in South and Central Asia as forms of political violence and its effects on the security of the region and the world. Students will develop a working definition of terrorism and extremism and analyze tenets of states security policies. They will study the history of origin, political, economic and social causes of terrorism, the nature of Islamist terrorist organizations, their strategic goals, motivations, and the threats they pose to peace and development from the point of view of international relations and comparative politics. On the base of case studies and class discussions, students examine theories and instances of ideological, religious, and political extremism as a foundation for terrorism. Through thorough investigation of different cases students will acquire unique knowledge of the Al-Qaeda threat in Pakistan, Afghanistan and Central Asia, as well as activities of groups as the Islamic Movement of Uzbekistan, Lashkar-e-Taiba and others.

- GVT-399 Politics of Ethnic Conflict
  Prerequisites:
  SOPH STANDING REQUIRED
  Credits:
  4.00
The course will survey various theories of nationalism and ethnic conflict and test their applicability to a number of contemporary cases. After a look at the sources of ethnic conflict within a particular country we will examine the way in which the international system reacted. Special attention will be paid to conflicts that have or have had a U.S. diplomatic dimension, namely Northern Ireland and Israel/Palestinian territories. Open to non-majors.

Type:

Social Science, BSJ SOCIAL SCIENCE

- **GVT-401 Political Marketing**

  **Prerequisites:**
  
  Junior status or above

  **Credits:**
  
  4.00

  **Description:**
  
  This class will examine the techniques used to market political candidates, parties, issues, interest groups and think tanks in the modern American polity, as well as in Canada and the EU. The class will examine the causes and impact of the change that many observers have seen in the American polity from a civil to a consumptive political culture and question the extent to which this is a U.S. based versus more global phenomenon. At the same time, the class will aim to provide the student with a hands-on understanding of the way in which various marketing techniques are employed to sell politics. The techniques will include message development, branding, micro-targeting, and political marketing campaign strategy by looking at a series of cases from around the world. Cases examined will include the Barack Obama, Hillary Clinton and John McCain campaigns from 2008, the effort to brand the Conservative Party and New Labour in the United Kingdom.

  **Type:**
  
  Social Science, BSJ SOCIAL SCIENCE

- **GVT-403 Government 2.0**

  **Credits:**
  
  4.00
What is the next version of government? How will emerging technologies impact how governments at all levels function? What are government leaders (elected and otherwise) doing to transform the way government operates? This course will cover the historical applications of technology in government, pointing to various models used by all levels of government (Federal, State, and Local). National and international e-Government examples and case studies will be examined to show the most and least effective implementations. It will primarily be a discussion about what Gov 2.0 has meant and will mean as new technologies emerge.

Type:

Social Science, BSJ SOCIAL SCIENCE

- **GVT-410 Politics of Korea**

  Credits:
  4.00

  Description:
  
  Study of the government and politics of North and South Korea, including the political systems of the two countries and relationship between them, including issues of reunification, nuclear weapons, and democratization. Offered alternate years.

  Type:

  Social Science, Asian Studies

- **GVT-411 Politics of North Korea**

  Credits:
  4.00

  Description:
  
  This course focuses on the historical origins, evolution, and current trajectory of the North Korean state. Topics include history, social structure, the interplay of culture and ideology, political economy, humanitarian issues, security, and the politics of North Korean domestic and foreign policy. We will spend considerable time analyzing North Korea's relationship with regional and world powers and examining the origins, history, and implications of their nuclear weapons program. Students will be expected to demonstrate their ability to apply theoretical and historical knowledge toward analyzing the rapidly evolving landscape of contemporary issues related to North Korea.
• GVT-420 German Greens and Environmentalism

Credits:
4.00

Description:
The rise of the Green Party, from its grass-roots beginnings to participation in the federal government. Background on the development of green consciousness in Germany and Europe since the early 20th century. Present governmental policies and programs (e.g., alternative energy sources, organic farming, recycling, dismantling of nuclear power). Cross-listed GER 420 and ENST 420

• GVT-428 Congressional Parties, Leadership, & Public Policy

Prerequisites:
Junior status or above

Credits:
4.00

Description:
This course focuses on the Congressional leadership, parties in Congress and their impact on political interactions, and public policy. The course will examine the relationship between the leadership in the Congress and the powerful elements in the House and Senate such as committee chairmen and the party caucuses as well as the media and lobbyists. Emphasis is on the decades long trend toward greater political polarization and its impact on the ability of the institution to respond effectively current national problems.

• GVT-429 Congress and the Federal Budget: Procedure, Politics & Public Policy
Prerequisites:
Take GVT-110

Credits: 4.00

Description:
Focus is on the federal budget process, political interactions, and public policy outcomes. The budget represents nearly one-quarter of GDP making those decisions central to the functioning of our democracy and the health of our economy. Emphasis is on the Congressional budget process, appropriations process, and revenue decision-making because the Constitution establishes Congress as the guardian of the nation's purse strings.

Type:
BSJ SOCIAL SCIENCE, Social Science

- GVT-431 Congress: the Broken Branch
  
  Prerequisites:
  
  TAKE GVT 110
  
  Credits: 4.00
  
  Description:
  This course will examine the changes in the US Congress in recent years, as both party unity and party polarization have grown, with particular attention to the evolution of Senate rules as the need for a 60-vote majority has become a given.
  
  Type:
  Social Science, BSJ SOCIAL SCIENCE

- GVT-432 Legal Issues in Campaign and Elections

  Credits:
4.00
Description:

This course will explore legal issues affecting campaigns and elections. Among the topics covered will be the legal requirements to qualify for the ballot, campaign finance laws, challenges to candidates and ballot questions, and election recounts. Special emphasis will be given to the 2000 Presidential Recount in Florida.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-434 Immigration Policy and Politics

Credits:

4.00
Description:

This course examines how American governmental institutions, political actors, and processes have both shaped and responded to one of the most significant and complex issues of public policy facing the nation: immigration to the United States. This class will explore a number of intriguing and difficult policy topics related to the almost unprecedented level of immigration that the U.S. has been experiencing. The focus of the class will include the following: admissions, citizenship, deportation and detention (including that of suspected terrorists), refugee/asylum law, and highly contested issues of today, such as definitions of citizenship, immigrant rights, and border enforcement. A major objective of this course is to provide students with the opportunity to conduct their own original research in American politics by delving into some aspect of immigration as a public policy issue.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-435 Race and Public Policy

Prerequisites:

GVT 110 OR GVT 120 OR GVT 223 OR GVT 224

Credits:

4.00
Description:
Public policy's impact on Blacks Chicano's, Native Americans Puerto Ricans, and other minority groups; how public policy has contributed to racial oppression; policies for attaining racial equality; political strategies of minority groups. Cultural Diversity A

Type:
Cultural Diversity Opt A, Social Science, BSJ SOCIAL SCIENCE, BSBA SOCIAL CHANGE

- GVT-438 Environmental Policy & Politics

Prerequisites:
This course will have a service learning component Sophomore Status required

Credits:
4.00

Description:
From Rio to the Boston Harbor Project, this course examines the policies and politics of the environment. It examines the origins of the environmental movement in the United States focusing on the development and present function of government and non-government organizations responsible for the development and implementation of global, national, state and local environmental policies.

Type:
Social Science, BSJ SOCIAL SCIENCE

- GVT-439 Global Environmental Threat

Credits:
4.00

Description:
In the 20th century the general public became aware of the need for following a sustainable lifestyle. Non-governmental organizations, governmental institutions and individuals began to study environmental problems and issues to enhance the concept of conservation of nature and the protection of the planet's biodiversity among other important concepts. However, as we enter the 21st century, we are finding ourselves involved in new environmental threats such as increasingly disturbing natural disasters, eco-terrorism and endless extreme poverty. This course is aimed at learning
the basic environmental aspects that affect society and nature as a whole, along with the new issues that are arising and leading scientists to continue new lines of research in the field of environmental conservation and awareness, knowing also that the key to hope lies in the field of environmental education. Offered on the Madrid Campus only.

Type:
Social Science, BSJ SOCIAL SCIENCE

- GVT-450 Lobbying, the Media and Public Policy Opinion, and Politics

  Prerequisites:
  Junior status or above

  Credits:
  4.00

  Description:
  This class will examine the role of lobbyist and the media in influencing state and national decision makers and public policy. Focusing primarily on current issues relating to energy and environmental policy, we will discuss and critically examine all sides of today's hot topics- renewable power, climate change, sustainability and others. The goal is not to determine who is right and who is wrong, but rather to get behind the headlines and separate fact from hype and discuss how and why certain policy decisions are made and how policy makers are influenced. You'll gain an appreciation as to how public opinion, lobbyists and the media (even celebrities!) can actually change government priorities- and not always for the better, as rising public opinion and political pressure often collides with well established scientific evidence.

  Type:
  Social Science, BSJ SOCIAL SCIENCE

- GVT-452 Boston's Future: Local Politics in a Global Context

  Credits:
  4.00

  Description:
This year, Boston's longest-serving mayor of 20 years, Thomas Menino, announced he would not seek re-election. Twelve candidates are now vying to be mayor of Boston. Boston is among the most educated cities and is an epicenter for research and development, building an innovation economy of engagement, community networks, and collaboration. Yet it faces a variety of challenges. Boston also counts itself as third most unequal cities in the United States in terms of income inequality. Can Boston sustain its success while also lifting more of its population out of poverty? This course examines these questions by focusing attention on the 2013 mayoral election. What prescriptions for success and visions for the future of Boston do the various candidates offer? What constituencies vote? How will the successful candidate craft a winning coalition? Guest speakers, including candidates, local media analysts, and policy makers will highlight key aspects of the urban issues we will examine. Neighborhood visits and a variety of readings will round out the course. For any student interested in the interplay between politics, local government and the global economy, this course is for you.

- **GVT-458 Fundamentals of Political Fundraising**

  **Prerequisites:**

  Junior standing

  **Credits:**

  4.00

  **Description:**

  Political campaigns aim for votes, but they run on money. This course will introduce students to the basic elements of political fundraising: how to identify potential donors, small personal appeals through events to direct mail, along with the basic legal rules about fundraising, such as contribution limits, record keeping and reporting requirements. Students in this course will also examine the influence of money and PACs on politics and public policy, and will consider the relative advantages and disadvantages of other possible systems of campaign finance, both as practiced today in other countries and as proposed by reformers in the United States.

  **Type:**

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-462 Approaches to Foreign Politics & Diplomacy**

  **Prerequisites:**

  GVT 261, Junior status or above

  **Credits:**
The objective of this course is to analyze the mechanisms and processes of diplomacy. It provides a sense of the evolution of statecraft, and it seeks to assess the utility of different approaches to the development of foreign policy and to examine the successes and failures of these approaches in different circumstances. Prerequisite: GVT 281 or instructor's consent. Open only to Juniors and Seniors. 1 term - 4 credits.

Type: Social Science

- **GVT-463 International Legal Systems**

  Prerequisites:
  
  Junior status or above

  Credits: 4.00

  Description:
  
  This course explains the main components of the international legal system. It begins by exploring the rules, principles and norms that govern the relationship among states, the different cultural and philosophical legal perspectives and the history of the international legal system. The second part of the course covers the study of the sources and subjects of the international law, the jurisdiction of states, the peaceful settlement of disputes, the use of force and the legal personality of international actors. The third part of the course addresses a number of significant topics derived from the process of globalization legal norms: human rights, humanitarian intervention, law of the sea, environmental law, and economic relations.

  Type: Social Science

- **GVT-465 International and Transnational Organizations**

  Prerequisites:
  
  GVT-261

  Credits: 4.00

  Description:
4.00

Description:

This course explores the institutional structures, political processes, and impact of international governmental and nongovernmental organizations. It analyzes their increasingly prominent role in efforts to resolve a wide range of global problems and contribution to strengthen the current system of global governance. While the course covers the problems of international security, global distribution of wealth, deterioration of the environmental system, and threats to social welfare, it focuses on the interaction between the United Nations System and regional organizations, on the one hand, and the role of non-governmental organizations in cooperating or competing to solve specific problems in the area of international relations.

Type:

Social Science, BSJ SOCIAL SCIENCE, BSBA SOCIAL CHANGE

- GVT-466 Globalization, Regionalization and Sovereignty

Prerequisites:

GVT 261

Credits:

4.00

Description:

This course examines the intertwined nature of the globalization and regionalization processes from the perspective of global political economy. The first part of the course provides the basic elements and indicators to understand the main challenges the international economy is facing such as crisis, protectionism, and underdevelopment, inter alia. The second part presents the evolution of globalization and regionalism in the past decades. The third and final section compares how the distinct regions in the world are dealing with local and global problems; particularly attention is paid to the European Union, NAFTA, Mercosur and APEC.

Type:

Social Science

- GVT-467 Comparative Social Movements

Prerequisites:
Junior status

Credits:

4.00

Description:

This class examines the political ramifications of social movements primarily but not exclusively within the United States. It looks at ideology, beliefs and mechanisms of mobilization. Another important focus is an analysis of non-white social movements in this country and their impact on domestic politics. Among the movements to be examined are: the Pan-African movement 1919-1939 which will, to some extent, take us outside this country; the U.S. Civil Rights Movement 1955 to 1969 which covers the rise of the Black Power movement; and the U.S. Labor Movement 1900 to 1955 in terms of non-white influence on its programmatic goals. Normally offered alternate years. Cultural Diversity B

• GVT-468 UN & Humanitarian Governance

Prerequisites:

Junior Standing or Instructor's consent. Ends April 20, 2010.

Credits:

4.00

Description:

This seminar will explore actors and issues in the context of the United Nations system in connection with humanitarian governance challenges. We will examine theoretical, political, legal issues and institutional issues, then analyze protection, civil-military relations in peace operations. UN and other peace operations and responsibility to protect will be analyzed, and hard choices for all those who wish that globalization should be more humane, and who are interested to confront moving targets and evolving challenges of humanitarian governance, including dilemmas of not doing harm, when intending to do good", in international humanitarian engagement. With humanitarian action's new power comes knowledge that even the most well-intentioned projects can create as many problems as they solve. Are unforeseen consequences, blind spots, and biases of humanitarian work--from focusing too much on rules and too little on results? Students are expected to actively participate in interactive, visual and practical simulation exercises and role plays of humanitarian emergency operations Previous relevant knowledge/experience desirable.

Type:

Social Science
- **GVT-469 Human Rights**

  **Prerequisites:**
  
  GVT 261 Junior status or above

  **Credits:**
  
  4.00

  **Description:**
  
  An examination of human rights at the end of the 20th century. Attention will be given to the origin and expansion of the concept of human rights in different political systems, the links between culture and human rights and the means and mechanisms for safeguarding human rights with particular reference to the United Nations system.

  **Type:**

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-471 Topics in Democracy**

  **Prerequisites:**
  
  take gvt-110, gvt-120, or instructor's consent for non majors, Junior status or above

  **Credits:**
  
  4.00

  **Description:**
  
  In this course, students will have an opportunity to examine the basic foundations of the democratic theory and practice. Specifically, this course will focus on building blocks of a democratic relationship between people and government, including transparency, accountability, accessibility, and opportunities for effective advocacy and participation. Both classical and modern authors who have weighed in on these issues will be discussed. Normally offered alternate years.

GVT-472 East Germany and the Cold War

Credits:
4.00

Description:
When the German Democratic Republic was founded in 1949, observers in the West viewed it as an artificial construct created to serve the needs of the Soviet empire. The self-image of the GDR as created by its leadership revolved around the idea of an anti-fascist German state designed as a bulwark against any revival of National Socialism. Over a generation after the fall of the Berlin Wall, it is possible to undertake a dispassionate analysis of the forty-year history of the ?other? German state as manifested in its cultural identity and political role during the Cold War.

Type:
Social Science

GVT-482 Crisis and Integration in Europe

Credits:
4.00

Description:
Why did 17 European countries surrender the sovereign control of their currency and create the Euro? Will Turkey become a member of the European Union? Will Europeans continue free riding the security protection of the United States? Is the integration process another layer of bureaucracy or an institutional instrument to deal with the permanent crises in Europe? There are some of the questions guiding the discussions in the class.

Type:

GVT-485 Politics and International Relations of The Middle East

Prerequisites:
TAKE GVT-281 OR INSTRUCTOR'S CONSENT
Interlocking themes making the contemporary Middle East an area of chronic conflict: Big Power rivalries; social and political change within individual countries; unity and Arab rivalry involved in Arab nationalism; the Palestinian-Israeli-Arab dispute. Normally offered alternate years. Cultural Diversity B

Description:

This course explores the political and cultural history of Islam, with emphasis on the contemporary Islamic resurgence in Muslim countries. The origins and causes of this resurgence, its aims, and its effects on domestic, regional, and world politics will be examined. Offered as needed. Cultural Diversity B

Prerequisites:

not open to freshmen

Type:

Social Science, Cultural Diversity Opt B, Asian Studies

- **GVT-492 Islamic Political Thought**

  Credits:

  4.00

  Description:

  This course explores the political and cultural history of Islam, with emphasis on the contemporary Islamic resurgence in Muslim countries. The origins and causes of this resurgence, its aims, and its effects on domestic, regional, and world politics will be examined. Offered as needed. Cultural Diversity B

Type:

Social Science, Cultural Diversity Opt B, Asian Studies
What is the relationship between philosophy and Islam? Does the divine law (Shari'a) need to be supplemented with purely rational reflections on the nature and purpose of political life? What is the place of toleration and individual rights in the Islamic legal and philosophic tradition? We will explore these and similar questions by focusing on two particularly fertile periods of Islamic thought—the encounter of Islam with Greek philosophy in the classical period and its encounter with modern secular West in late modernity.

  - **Credits:**
    - 1.00-2.00
  - **Description:**
An off-campus experience, normally of one-week duration, arranged through a qualified agency in Washington D.C. Topics vary. Students will be graded by both an on-site evaluator and an assigned Government Department faculty member. A writing assignment is usually required upon completion of the seminar.

Type:

Social Science

- **GVT-506 Political Convention Program**

  Credits:
  
  6.00

  Description:

  An opportunity to do an internship through the Washington Center at either the Republican National Convention or the Democratic National Convention. College students will learn what goes on behind the scenes and interact with important public figures that are influential in setting public policy at various levels of government. They spend a week prior to the convention studying the electoral process, familiarizing themselves with conventions operations and preparing for their convention fieldwork assignments. In addition, they hear from a wide variety of speakers, including members of the media, party officials, and other political personalities. Students are then assigned as volunteers to assist with the work of the convention during the second week.

APPROVAL OF DEPT. CHAIRPERSON. Specially arranged study trip to a foreign country for the purpose of obtaining knowledge through direct experience and observation. Includes prearranged site visits, meetings, required reading and written assignments. ECR

Type:

Social Science, Expanded Classroom Requirement

**GVT-509 United Nations Seminar**

Prerequisites:

Instructor's consent

Credits:

4.00

Description:

This course provides an introduction to the study of the role of the United Nations System in the globalization era. The course is divided in two main sections. The first is based on a series of readings, lectures and discussion on the rules, principles and norms which govern the relationship among states and the UN system; it also covers traditional topics such as the sources and subjects of international law, the jurisdiction of states, the peaceful settlement of disputes, the use of force and the legal personality of international actors, human rights, humanitarian intervention, global environment, use of armed forces, as well as economic relations. The second part of the course is based on a required study trip to the UN headquarters in order to experience a direct contact with policy-makers within the UN system in a diversity of areas such as security, aid and peacekeeping areas.

Type:

Social Science, Expanded Classroom Requirement

**GVT-510 Independent Study**

Prerequisites:

Instructor's consent required

Credits:

1.00 - 4.00

Description:
Individual program of reading and research on an approved topic under the supervision of a member of the department. Only for qualified juniors or seniors. Offered every semester.

Type:
Social Science

- **GVT-513 The Presidency, Congress & Media**

  Prerequisites:
  
  Junior status or above

  Credits:
  
  4.00

  Description:

  This course is fast-paced, highly interactive, multi-media and thought provoking. We apply the traditional academic requirements at The Washington Center, while adding the unique elements that allow you to connect with students at other universities. This course offers interesting guests, lively discussions, thoughtful debates, historic video from C-SPAN and the National Archives. As we examine and analyze the political, legislative and social issues facing our country, we will take an in-depth look at the issues and events shaping the agenda for next Congress & the next round of elections. Our focus will also include the historical process of public policy making, as well as an intense examination on the changing role of media, especially social media, in shaping public opinion.

- **GVT-515 Senior Seminar**

  Credits:
  
  1.00

  Description:

  This course is designed to provide all Government degree-seeking students with a team-taught capstone experience. In this course, we will collectively discuss and consider career, professional and academic experience for the Government major, including learning more about the fields of public policy, public service, law, nonprofit management, international development, and nongovernmental organization management. This course focuses on career entry and transition, networking for career success, impression management concept and skills, and related life-long learning skills. Students articulate and reflect on academic, work, and co-curricular experiences from the perspective of professionals entering or advancing their careers. Pre-requisite: Senior standing.
- GVT-521 Internship in Government

  Prerequisites:
  Junior standing

  Credits:
  4.00

  Description:
  Approximately 12 hours a week working in a position that offers the student significant opportunity to learn about politics and/or government. Interested students should consult instructor in advance. ECR

- GVT-523 Washington Internship

  Prerequisites:
  Juniors standing and instructor's permission required

  Credits:
  12.00

  Description:
  A full-time, one-semester internship in Washington, D.C. Consult the Department office for more details. ECR
• GVT-524 Washington Internship

Prerequisites:
This course fulfills the Expanded Classroom Requirement

Credits:
8.00

Description:
A full-time summer internship in Washington D.C. Consult the Department for more details. ECR

Type:

- **HST-200 Gateway to the Past: The Historian's Craft**

  Credits:

  4.00

  Description:

  What does it mean to study history? Why is history a particularly valuable means of understanding human experiences and problems? Historians do more than acquire facts about people and societies of the past. Historians debate the past as they uncover new information, develop new interpretative frameworks, and ask new questions. This course introduces students to history as a method of thought and inquiry, the development of history as a discipline, and to new trends and methodologies in the field. Prerequisite: Must be a History Major with at least sophomore status.

  Term:
  Offered Fall Term

  Type:
  Humanities & History, Humanities Literature Requirement

- **HST-210 Traditional Chinese Society From 1800 to 1949**

  Credits: 
This course focuses on traditional Chinese society from 1800 to 1949, taking up such areas as family and kinship, social mobility, education, economic and social differentiation, community and social life, and popular belief. Examining the practices and ideologies underlying each area will enhance our understanding of the nature of traditional Chinese society, and help explain how elements of Chinese traditional culture contribute to modern Chinese identity and everyday life.

Type:

Humanities & History

- **HST-213 The British Empire and Commonwealth**

  Credits:

  4.00

  Description:

  The first British Empire (1607-1783); the second British Empire in the nineteenth century; dominion and Commonwealth status; dissolution of the Empire after 1945; the constituent territories of the Empire, their relationship with Britain, and their interrelationship within the Empire.

  Credits:

  4.00

  Description:
An examination of the Viking phenomenon between the eighth and eleventh centuries, including the origin of the Vikings in Scandinavia and the expansion and impact of the Danes/Normans in Germany, the Baltic region, England, France, and Sicily; the Varangians (Swedes) in Kievan Rus and Constantinople; and the Norse in Scotland, Ireland, Iceland, Greenland, and Vinland (Newfoundland and Labrador).

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement

- HST-216 The Thousand Year Reich: the Holy Roman Empire, 800-1806
  
  Credits:
  4.00
  
  Description:
  An examination of the purposes, ideology, structure, institutions, context, and historical evolution of Europe's most enduring, most important, most influential, and (before the European Union) most inclusive political formation, the Holy Roman Empire, during its thousand-year history from the coronation of Charlemagne in 800 to its dissolution in the Napoleonic Europe of 1806.

- HST-218 History of the Mongols
  
  Credits:
  4.00
  
  Description:
  The history of the Mongol Empire, from the emergence of unified Mongol federation at the beginning of 13th century to its dismemberment into independent territories in Mongolia, China, Transoxiana, Iran, and Kipchak Khanate. We will discuss the topological and geographical features of the Mongolian homeland; and the social, economic, and ideological aspects of their lives. The life and the military and political achievements of Genghis Khan will be highlighted, as well as the Mongols' rule over conquered realms. We will also explore through critical discussions the most important historical approaches to the Mongols.

- HST-221 William Lloyd Garrison in Boston's Abolition Movement
Description:

A focus on the life of William Lloyd Garrison, whom Frederick Douglass called, the chief apostle of the unconditional emancipation of all the slaves. We will focus on the words of Garrison, on his support from the Boston colored community, and his role in the national Abolition movement. Garrison’s confidence in the power of moral agitation to overcome institutional inertia will be a theme. The views of a spectrum of historians, writing from the context of many years, will raise questions about movement strategies relevant also today.

HST-223 History of Law

Description:

This course surveys the law's historical development, from the uncodified customs of the ancient world, to the first legal code of Hammurabi, to the European legal tradition: Roman law, Canon law, and the Anglo-Saxon common law. We will examine the law's historical development and its role in different historical moments. We will explore modern law and legal institutions; the relationship between law and society in the transition from feudalism to capitalism; the rise of human rights and the rule of law in Western democracies, including the rise of the legal exception (slavery, for example).
• HST-224 Civil Rights in the 20th Century

Credits:
4.00

Description:
What is meant by the term civil rights? How do civil rights affect notions of what it means to be an American? In Civil Rights in the Twentieth Century, students will explore the history of civil rights movements- from the Reconstruction era through the Conservative revolution of the 1970s and 1980s- to answer these questions, and to try to understand the contested definition of civil rights in modern America. We will begin with the emancipation of four million African-Americans during the 1860s; we will continue through the first wave feminist movement of the late nineteenth and early twentieth century, and the labor movement from the Gilded Age through the New Deal; and we will conclude with the Black, women's, and gay rights movements of the 1960s and 1970s, and their relationship to the rise of the New Right during the 1970s and 1980s. Special attention will be paid to primary documents written by civil rights leaders and their followers, as well as analysis of secondary material on how civil rights has evolved over time.

Type:
Cultural Diversity Opt A, Humanities Literature Requirement, Humanities & History, BSBA SOCIAL CHANGE

• HST-233 The Creation of Russia

Credits:
4.00

Description:
Russia--the world's largest country, leading energy exporter, a major nuclear and space power, and a permanent member of the UN Security Council, also exhibits many third-world drifts. We'll address Russia's contradictions and paradoxes. How did the Byzantine, Nomadic, and West European cultural layers help form the Russian civilization? How Russian were some of the famous Russian - the poet Pushkin, Catherine the Great, Stalin? What impact did the Mongols have in their 200-year rule? How did Russia compete and expand against more advanced and wealthier foes? Why was Ivan the Terrible actually terrified? How did Peter the Great's reforms 'Westernize' Russia, accelerate its development, but lead Russian intellectuals to challenge Czar's authority and ultimately bring about the 1917 Revolutions? Did Russia have a democratic tradition in the earliest times, or is it a 20th century Western import?
- **HST-234 History of Sport and the Olympic Games**
  
  **Credits:**
  4.00

  **Description:**
  We will explore the history of Boston through sports, with special focus on the Boston Marathon, from its origins in ancient Greece, to the first Boston Marathon in 1898, to the Marathon of today; the history of Basketball, first developed in Springfield; the development of the NCAA and college athletics; and the history and development of baseball. Students will also analyze how athletes and athletic events have been commemorated by statues and memorials in and around Boston.

- **HST-237 Medieval Iran Under the Nomadic Dynasties**

  **Credits:**
  4.00

  **Description:**
  This course studies revolutionary changes through three crucial centuries of Iran's history (12th-15th). Between the 12th and 15th centuries, Iran withstood two destructive invasions by nomadic leaders, including Genghis Khan and Tamerlane, who formed the nomadic Ilkhanids and Timurid dynasties. We will examine the social and economic changes Iran experienced, and the rise of Shi'ism and mysticism, which all resulted in the emergence of the Safavid dynasty. This course gives a multilateral perspective--political, cultural social, and economic--to conceptualize the different aspects of this important period.

- **HST-238 Reemergence of Iran and Its Medieval & Early Modern History**

  **Credits:**
Over two centuries (1501-1722) the Safavid dynasty reigned over a unified Iran. The Safavids raised Iran's culture and civilization to a high level which had never been in its Islamic period. But the Safavids also traumatized the unity of the Islamic world, preventing the Ottomans from prosecuting their military victories over the western world. We will examine many different aspects of political, social, economic, and cultural history of Iran in this period.

- **HST-244 History of the Iranian Islamic Revolution**
  
  **Credits:**
  
  4.00

  **Description:**
  
  The course reviews modern Iranian politics with a special attention on the history of the Islamic Revolution of 1979. It evaluates the factors which caused the revolution and its impacts on Iranian society, the Middle East, and the world. Among the important topics of discussion will be the role of the United States in Iranian politics (1953-1979); the policies of Mohammad Reza Shah Pahlavi (1941-1979); the hostage crisis (1979-1981); the Iran-Iraq War (1980-1988); the Reform Movement (1997-2005); and the re-emergence of radical policies under Ahmadinejad since 2005.

  **Term:** Occasional

  **Type:** Humanities & History, Humanities Literature Requirement, Cultural Diversity Opt B

- **HST-247 History of Modern Middle East**

  **Credits:**
  
  4.00

  **Description:**
  
  This course seeks to provide students with an understanding of the broad historical forces, conflicts and major events that have shaped the contemporary nations of the modern Middle East. The course begins with the emergence of the modern Middle East from the empires of the sixteenth
and seventeenth centuries. It deals with forces which attempt to meet the European challenge; the age of colonialism; the rise of nationalism; socialism, capitalism, the impact of Israeli and Palestinian conflict on the region; oil, the Islamic Revolution in Iran and the rise of Islamic fundamentalist movements, U.S. policy, and Saddam Hussein's Iraq.

Type:
Humanities & History, Humanities Literature Requirement

• HST-265 Comparative Slavery

Credits:
4.00

Description:
This lecture-discussion course compares the institution of slavery over time and across space. Beginning with its emergence and articulation in the Ancient World, the institution of slavery was evident on all of the continents and played a dynamic role in defining humanity and in forming social, economic, cultural, and political formations up to the Modern Era. The course examines the institution of slavery in its many manifestations from nomadic societies to sedentary ones, from kinship-based states to territorial-based ones, from tribal societies to advanced civilizations, from pre-capitalist economies to capitalist ones. It seeks to understand several overlapping and related questions. How did the institution define property? How were slaves recruited, treated, and manumitted? What was the relationship between slavery, citizenship, and the state? What was the relationship...
between slavery and religion? How did the institution regulate gender relations? What was the role of slavery in the construction of race and notions of genetic inequality?

- **HST-267 Russia in the 20th Century**

  Credits:
  
  4.00

  Description:

  This course is a survey of the history of Russia and the Soviet Union from 1900 to the present. We will examine the end of tsarist rule, the October Revolution and the Civil War, Lenin's rule, Stalin and the Stalinist system, the Great Patriotic War, Khrushchev's de-Stalinization, Brezhnev's economic stagnation, and Gorbachev's perestroika and glasnost. The final section of the course examines the collapse of the Soviet Union, the rise of Yeltsin, and the Putin-Medvedev era.

- **HST-293 Race and Reconstruction: the Transformation of America, 1850-1900**

  Credits:

  4.00
This course explores the political, economic, social, and cultural history of America from the decade prior to the Civil War to the end of the nineteenth century. Students will focus on the political, social, and racial catalysts that led to the Civil War, its aftermath, and the ideologies behind Federal Reconstruction between 1863 and 1877. Through primary and secondary source materials, students will explore the following: What were the long term effects of American slavery, American expansion, and the Civil War? How did different groups of Americans- north and south, Black, White, Asian, Latino- understand themselves, their government, and what it meant to be an American citizen? How did the social structure of white supremacy - epitomized in ante-bellum slavery, Indian removal, and rising anti-Chinese sentiment - contribute to the long-lasting social structure of American racism?

HST-319 The History of Black Music in America

Credits:
4.00

Description:
Black music has been one of the primary cultural factors in the United States. From the African roots to hip hop in the 21st century Black music has served as an expression of African American consciousness, providing commentary on many aspects of black life. This art form provides commentary on many aspects of black life including social and political. It has also been a major force in shaping the culture of the United States as a whole. As such it provides an excellent window for exploring the history of Black America as well as the history of all America. With the use of texts, videos, and recordings this class will examine the music of Black America in the context and communities in which it was created and performed, and also in relationship to the wider world. Cultural Diversity A

• HST-326 The Russian Revolution

Credits:

4.00

Description:

The long Russian Revolution (1900-1930) is one of the most important events of the 20th century. It brought 19th-century Russia in conflict with the political and socio-economic forces of the 20th century. We will examine the long-term trends and challenges and address the what ifs of history - that helped unleash the crises of 1917-1919. What were the reasons for and extent of Rasputin's influence at the imperial court? Was the Revolution brought about by the West? Then how and why did Russia become less westernized due to the revolution? Was the new Bolshevik regime confronted by the same challenges that crippled the Czarist regime? Could and should the revolution have been avoided? Was it a necessary step and stage towards progress and modernization? What similarities did the new USSR begin to have with the capitalist democracies of the West? How did the
revolution affect the status and role of workers, women, and peasants in USSR? How were Lenin, Trotsky, and Stalin different as leaders and individuals? When did the revolution end? (Formerly HST 433)

• **HST-362 History of Piracy**

**Credits:**

4.00

**Description:**

Why did men (and some women) turn pirate? Why is there a continuing fascination with pirates? This course will explore the reality and fiction of pirates and piracy, focusing on the Golden Age of Piracy from 1690 to 1730, with particular attention to the pirates of New England. We will examine primary sources, historical accounts, and fictional presentations - both books and films - to better understand piracy, why it happened, and why it continues to fascinate us.

**Term:**

Offered Spring Term

• **HST-365 Presenting History: Media & Methods of Public History**

**Credits:**

4.00

**Description:**

Considers the history, theory, and techniques of public history presentation. Learn what visitors want for themselves and their families when they choose to spend their time at a historic site, historic house or history museum. Modes of presentation covered include film documentary, Web site exhibition, popular historical writing, and reenactment. Students produce a project using survey data and information learned throughout the course about preserving history through media and method to demonstrate what the future of historic preservation might resemble. Note: There will be travel involved to visit various historic sites. Please allow time before and after scheduled class time.

**Term:**
• HST-367 Freedom Trail 101
Prerequisites:
take HST 181
Credits:
4.00
Description:
Meeting alternatively at Suffolk and at Boston's historical sites, students in this course will learn the principles and techniques of Museum Education. How does a museum create educational programs? What kinds of programs work best for different audiences? Students will have opportunities to work with museum professionals in designing and implementing educational programs.

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement

• HST-368 Boston's Historic Houses
Credits:
4.00
Description:
Working with historic houses in Boston, students will learn that art of interpreting history. Using collections, archives, and other repositories, students will research the houses and the people who lived in them. Many of these houses have existed from colonial times and had various uses. As part of the course, students will offer tours of the houses to visitors. Formerly: HST 368 Introduction to Historical Interpretation.
• **HST-369 American Objects: Materials, Meaning and History**

  **Credits:** 4.00

  **Description:**
  This course will explore American history through objects - from spinning wheels and silver cups to electric typewriters and cocktail glasses. What was an object's purpose? How was it made and who made it? How do we interpret the material culture of life? Topics covered will include the decorative arts, vernacular architecture, archaeology, industrial design, ethnicity and gender, visual culture, and landscapes. Lectures and discussions will be complemented with visits to museums, historic houses, and other sites. Students will learn how to research and write, placing objects or spaces in their historical context.

• **HST-370 Workers in America**

  **Credits:** 4.00

  **Description:**
  How have ordinary American working people shaped and been shaped by the experience of work in a capitalist economic order? This course surveys the world of work and workers, free and unfree, from 1800 to the present. Topics include changing conceptions of work, formation of workers' consciousness and communities, working-class cultures, movements for labor reform, and the impact of race, ethnicity, and gender on labor markets, workplace dynamics, and working-class families and communities. The course also explores workers' experiences of industrialization and technological innovation, immigration and migration, consumerism and globalization. Cultural Diversity A

  **Term:** Occasional
• HST-371 U.S. Women's History Colonial to 1865

Credits:
4.00

Description:
This course traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism, legal status, labor activism, and popular culture. With attention to ethnicity, race, class, age, region of residence, disability, and sexual orientation, the course focuses primarily on the everyday lives of ordinary women. Cultural Diversity A

- **HST-377 Caribbean and Latin American Diaspora**

  **Credits:**
  4.00

  **Description:**
  A look at the migration of people, along with their culture, to and from the Caribbean and Latin America. The first half of the course looks at how European, Asian and African diasporas settled in the region, assimilated and contributed to the ethnic and cultural base of Caribbean and Latin America countries in the colonial period. The second half offers insight into how and why people from the Caribbean and Latin America would later form diasporas of their own in countries like the United States in the twentieth century. Students taking this course will get a sense of the struggles, accomplishments and culture of Caribbean and Latin American peoples in the United States. Formerly HST 286.

  Occasional

  **Type:**
  Humanities & History, Humanities Literature Requirement
- HST-380 History of Plymouth

Credits:
4.00

Description:

Plymouth beyond the Mayflower Pilgrims, Thanksgiving and Plymouth Rock; this course will examine the history of Plymouth Colony from its origins in Reformation England to its absorption into Massachusetts in 1692. Particular attention will be paid to Native Wampanoag culture before, during and after King Philip's War. Students will read primary and secondary sources; investigate Plymouth Colony's material culture through architecture, food, and artifacts; field trips to sites in the Old Colony area will be arranged; and the lasting cultural significance of the Pilgrims and Plymouth will be examined.

Term:
Offered Fall Term

Type:

Humanities & History, Humanities Literature Requirement

- HST-381 American Colonial History

Prerequisites:
Sophomore Standing

Credits:
4.00

Description:

This course emphasizes the founding and settlement of English colonies in America; their social, economic, and political development; the Great Awakening; the British-French struggle for control of the North American continent; the background and causes of the American Revolution.
• **HST-382 The American Revolution**

  **Credits:**

  4.00

  **Description:**

  This course provides an analysis of the background, progress and results of the American Revolution. Emphasis is placed upon military aspects of the War for Independence, and on post-war efforts to establish a permanent workable American government culminating in the Federal Constitution.

  **Term:**

  Occasional

• **HST-383 Boston: Heritage of a City**

  **Prerequisites:**

  One History course

  **Credits:**

  4.00

  **Description:**

  The development and influence of Boston from its foundation in 1630: the Massachusetts Bay Colony, cradle of the American Revolution; Boston as a Yankee merchant capital, Brahmin cultural center, immigrant melting pot, and modern metropolis. When offered in the hybrid format, this course will
meet at the regularly-scheduled time, but lectures and other course materials will be available on the course Blackboard site in case you cannot attend. ECR

  **Type:**
• HST-471 Self, Body, & Sexuality- U.S. History

Credits:

4.00

Description:

This course examines American debates over the natures, capacities, and responsibilities of men and women from settlement of the New World through the present. Emphasis is given to three elements of the self: social and civic personhood, the body, and sexuality. We will focus on representations of womanhood and masculinity - across racial, ethnic, and class lines - and their effects on men and women in society, politics, and at law. Course readings will also examine concepts of human nature and the interplay among mind, body, and sexuality.

Term:

Occasional

Type:

Humanities & History, Humanities Literature Requirement

• HST-481 Boston History, Literature & Film

Credits:

4.00

Description:

An interdisciplinary examination of the history of Boston. Special focus will be on Boston in fiction, poetry, and film, as well as on the analysis of historical documents and accounts. This course is recommended for History and Literature Honors majors. Jointly taught by professors from the History and English Departments.

Term:

Occasional

Type:
• **HST-H483 Honors Death, Disease, Healing- U.S. History**

  Prerequisites:

  Permission of the instructor required.

  Credits:

  4.00

  Description:

  This course investigates how Americans have understood and responded to health, illness, and death from the eighteenth century to the present. The course will examine interactions among patients, healers (orthodox and heterodox), the medical and scientific professions, business, and government. We will explore the effects of scientific and technological advancements, industrialization, urbanization, immigration, war, and social movements on the nation's moral and political economies of health, and on evolving ideas about bodily integrity and autonomy, linked to historical relations of gender, race, class, and sexuality. Cultural Diversity A. This is an honors-level course.

  Term:

  Occasional

  Type:

  Humanities & History, Humanities Literature Requirement

• **HST-484 History of the Emotions**

  Credits:

  4.00

  Description:

  Do we all feel the same emotions across cultures and throughout history, or do we learn to feel according to the rules of our own time and place, or does the truth about human emotion lie somewhere in between? This course will first explore ideas about emotional life from the fields of history, anthropology, sociology, and psychology. We will then turn to our own examination of the evolution of emotion rules and prescriptions, focusing on western Europe and the United States since 1700. In the eighteenth century, emotions were seen as a positive influence on politics and public life,
especially during the French Revolution. After the fall of Robespierre, the emotions were banished to the private sphere - so we will read both primary sources and recent scholarship on 19th- and 20th-century ideas masculinity and femininity, romantic love and marriage, childrearing, and about what parents and children are supposed feel toward each other. How have ideas about these subjects changed over time - and do our feelings change with them?

Term: Occasional

Type: Humanities & History, Humanities Literature Requirement, Cultural Diversity Opt A

- **HST-494 Politics and Protest**

  Credits: 4.00

  Description:

  This course will examine the impact of organized reform movements on American History from 1800s to the 1960s. Themes include utopianism, assaults on injustice, and attempts to control the behavior of the undesirable groups. Topics include anti-slavery agitation and religious revivalism before the Civil War, problems of industrialism and the working class, progressive political and social reform, temperance and prohibition, women's suffrage and women's rights, civil rights and the counter culture.

  Term: Occasional

  Type: Humanities & History, Humanities Literature Requirement, BSBA SOCIAL CHANGE

- **HST-503 History: Theory & Practice**

  Prerequisites: Permission of the instructor

  Credits:
This course is intended for Honors students and for students interested in graduate study in history. It will focus on the nature of historical thought - with special attention to issues of current concern to the profession. A limited-enrollment seminar.

**Term:**
Offered Both Fall and Spring

**Type:**
Humanities & History, Humanities Literature Requirement

### HST-508 Study Trip to El Salvador

**Credits:**
4.00

**Description:**
This course will examine the history of El Salvador through readings, discussion, film, and most importantly, a fortnight in the Central American nation. Our goal is to explore how events ranging from the Spanish conquest of the sixteenth-century, the nineteenth century indigenous uprisings against land concentration, and the bloody and divisive civil war of the 1980s shaped today's El Salvadorans. ECR

**Type:**
Expanded Classroom Requirement, Humanities & History, Cultural Diversity Opt B, Humanities Literature R

### HST-510 Independent Study

**Prerequisites:**
An Independent Study form must be submitted to the CAS Dean's Office.

**Credits:**
1.00-4.00
By special arrangement, members of the History department will schedule seminars or individual discussion sessions with students interested in directed reading and research. Open to Juniors and Seniors with the permission of the instructor.

Term:

Offered Both Fall and Spring

- **HST-522 History Internship**

  Prerequisites:

  Permission of instructor required.

  Credits:

  4.00

  Description:

  History Internships require approximately 12 hours of work per week in a history-related position, for instance, at a museum, historical society, or archive, and are designed to introduce the student to the professional opportunities and responsibilities in the field of public history or historic preservation. Interested students should consult the instructor in advance. Prerequisite: Permission of instructor is required.

  Term:

  Offered Both Fall and Spring

  Type:

  Humanities & History, Humanities Literature Requirement, Expanded Classroom Requirement

- **HST-H555 Senior Honors Thesis**

  Credits:

  4.00

  Description:
An individual program of reading, research, and writing on an approved topic, under the supervision of a History faculty member. The completed thesis will be at least 20-25 pages reflecting original research. The qualifying student must have a 3.5 overall grade point average, and a 3.7 grade point average in History classes, must be recommended by two History faculty members, and must submit a writing sample of at least 5 pages to the Department chair by the end of their junior year. Must be taken in the Fall of the Senior year.

Type:

Humanities & History, Humanities Literature Requirement

- **HUM-103 Introduction to Asian Studies: Scope of The Discipline**

  **Credits:**

  4.00

  **Description:**

  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, and culture of Asia. Sample topics include international relations, political economy, religious and cultural exchanges, Asian experience in America, and the role of Asia in the 21st century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum. Cross-list with AS100/HST100

  **Term:**

  Offered Fall Term

  **Type:**

  Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement

- **IMGD-201 Intermediate Game Programming**

  **Credits:**

  4.00

  **Description:**

  This course is a continuation of the introductory game-programming course. It covers advanced topics such as GML (GameMaker programming languages) and networking.
• IMGD-510 Independent Study

  Credits:

  3.00

  Description:

  An Independent Study provides the student with the opportunity to examine an issue of interest that falls outside the parameters of the existing curricula. The student will work on a one on one basis with a Full Time faculty member to realize a particular and well defined goal. All proposals for Independent Study must be approved by the Interactive Media and Game Design committee and Dean's office in advance of the beginning of the semester during which the work will be completed.

• ITAL-101 Elementary Italian I

  Credits:

  4.00

  Description:

  Practice in both oral and written language skills. Audio-visual and textual materials based on Italian cultural themes. One language laboratory session per week.

  Term:

  Offered Fall Term

  Type:

  BA FOREIGN

• ITAL-102 Elementary Italian II

  Prerequisites:

  ITAL-101 or instructor's permission

  Credits:
ITAL-201 Intermediate Italian I

Prerequisites:
ITAL 102, or Instructor’s consent

Credits:
4.00

Description:
Review of grammar, practice in spoken Italian, with cultural and literary readings along with composition and translation. Language laboratory sessions as assigned.

Term:
Offered Fall Term

Type:
BA FOREIGN

JPN-101 Elementary Japanese I

Credits:
4.00

Description:
For students with no previous knowledge. An introduction to features of spoken and written Japanese. Stresses grammar, oral performance and simple characters. One language lab session per week.

Term:
Offered Fall Term

Type:
BA FOREIGN

- JPN-102 Elementary Japanese II

Prerequisites:
JPN-101 or Instructor's consent

Credits:
4.00

Description:
Continuation of skills developed from JPN 101. Emphasis on active command of spoken Japanese. Improvement in pronunciation and conversational skills. Further development in vocabulary, grammar, reading and writing. One language lab session per week.

Term:
Offered Spring Term

Type:
BA FOREIGN

- JPN-201 Intermediate Japanese I

Prerequisites:
JPN-102 or Instructor's consent

Credits:

4.00

Description:

Emphasis on improving Japanese skills in the areas of speaking, listening, reading, and writing. Expansion of vocabulary and further study of grammar. Discussion of assigned readings primarily in Japanese. Work in the language lab (one hour per week) and use of sources from the Internet are coordinated with class work.

Term:

Offered Fall Term

Type:

BA FOREIGN

JPN-202 Intermediate Japanese II

Prerequisites:

JPN-201 or Instructor's consent

Credits:

4.00

Description:

Continuation of skills developed from JPN 201. One language laboratory session per week.

Term:

Offered Spring Term

Type:

BA FOREIGN
- JPN-510 Independent Study
  Prerequisites:
  Instructor's Permission required.
  Credits: 4.00
  Description:
  Students meet with a department member to pursue advanced studies in areas of particular interest to them.

- LACS-500 Honors in Latin American and Caribbean Studies
  Prerequisites:
  Permission of Latin American and Caribbean Studies Chair
  Credits: 4.00
  Description:
  Candidates must register for a special research project in the fall semester of the senior year and complete a senior thesis under the supervision of a faculty member participating in the Latin American and Caribbean Studies Program.
  Term:
  Offered Fall Term

- MATH-000 Mathshop - Bridge to College Math
  Credits: 0.00
  Description:
A NON-CREDIT, full semester workshop designed for students who need substantial review before starting MATH 104, MATH 106, OR MATH 121. Similar to a course, MATHSHOP meets three hours per week throughout the semester. Topics covered are tailored to the needs of students and include basic math material, basic algebra, graphing use of calculators, ways of dealing with math fears and study methods. Several sections normally offered each semester.

- **MATH-002 Preparing for College Math**
  
  **Prerequisites:**
  
  Requirements: Internet access, Suffolk e-mail, computer headset with microphone and earphones. MyMathLab or WebAssign access key (obtained after registration for course)
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  This course is designed for students who want a refresher of some real numbers and algebra topics before taking MATH 130 and MATH 134 or MATH 121. Topics covered in each section will be adjusted based on students' needs but will include real number arithmetic, lines, graphs and some basic algebra. Designed for students with math placement scores 80-120.

- **MATH-104 Precalculus for Management & Social Sciences**
  
  **Prerequisites:**
  
  Appropriate Math Placement Exam score.
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  A selection of topics in algebra and elementary analytic geometry including, (but not restricted to): properties of real numbers, linear equations and inequalities, absolute value equations and inequalities, polynomials, rational expressions, exponents and radicals, quadratic equations, functions, linear, quadratic and polynomial models, rational, exponential and logarithmic functions. Applications and graphs are stressed throughout the course. This course is intended to prepare students who have only had one year of high school algebra to take MATH 134. Students may not use this course alone to satisfy the C.A.S. math requirement. Qualifying math placement exam score required. Students who are not prepared for this course should
- **MATH-121 Precalculus With Elements of Calculus**

  **Prerequisites:**

  MATH 104 or MATH 108 with a B or higher or appropriate math placement score

  **Credits:**

  4.00

  **Description:**

  A review of topics in algebra, trigonometry and analytic geometry intended for students needing one additional semester of preparation before taking MATH 165. Students may not use this course alone to satisfy the CAS math requirement. Prerequisites: MATH 104 with B or MATH 108 with B or higher or qualifying placement exam score indicating solid grounding in intermediate algebra. 4 lecture hours plus 1 recitation session per week. Normally offered every semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students. This course cannot be taken for credit by a student who already has credit for a more advanced course.

- **MATH-128 Math for the Modern World**

  **Prerequisites:**

  MATH-000 or appropriate Math Placement Exam score. Course does not fulfill math requirement for SBS majors.

  **Credits:**

  4.00

  **Description:**

  From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem solving in contemporary life and work. It uses a minimal amount of algebra and focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)
• **MATH-130 Topics in Finite Mathematics**

  Prerequisites:
  
  MATH 104, MATH 108, MATH121 or appropriate math placement score.
  
  Credits:
  
  4.00
  
  Description:
  
  Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments, Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

• **MATH-132 Math-Art, Tool and Human Side**

  Prerequisites:
  
  MATH-000 or appropriate Math Placement Exam score. Course does not fulfill math requirement for SBS majors.
  
  Credits:
  
  4.00
  
  Description:
  
  Mathematics is both an art and a tool. It has been used in many ways in contemporary and ancient society. The common bond is a way of thinking and a way of using reason to solve problems and describe things of all sorts. The course is designed to cultivate an appreciation of the significance of mathematics in daily life and develop students' mathematical reasoning. Topics will vary from section to section. Examples of topics that might be included are: the real meaning of a newspaper graph, methods to tally votes, fair division, routes and networks, consumer mathematics, the 'real' cost of a house, shapes and patterns, fractals, soap film surfaces, prime numbers and encryption, new discoveries in mathematics.

• **MATH-134 Calculus for Management & Social Sciences**

  Prerequisites:
MATH 104, MATH 121 or appropriate math placement score.

Credits:
4.00

Description:
A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, linear regression, limits and continuity, derivatives, differentiation rules, implicit differentiation, related rates, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

- **MATH-165 Calculus I**
  
  **Prerequisites:**
  Math Placement score or MATH 121 with a grade of C or better
  
  **Credits:**
  4.00
  
  **Description:**
  Functions, limits and continuity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; applications (curve sketching, limits at infinity, optimization, differentials); other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); anti-derivatives; indefinite integrals; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

- **MATH-166 Calculus II**
  
  **Prerequisites:**
  MATH 165 with grade of C or better
  
  **Credits:**
  4.00
Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (by parts, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series (computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

- **MATH-167 Honors Calculus Seminar I**
  
  **Credits:**
  
  1.00
  
  **Description:**
  
  Intended for students who are simultaneously taking Math 165 or Math 166, this seminar meets once per week to investigate some of the more theoretical and challenging aspects of the topics covered in MATH 165 and 166. Normally offered each spring.

- **MATH-220 Mathematics for Scientists and Engineers**
  
  **Prerequisites:**
  
  Take MATH-166
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Topics mostly selected from the following list: complex numbers (i, arithmetic, Euler phi function, DeMoivre's theorem, roots of unity); elementary computational linear algebra (matrices: addition, scalar multiplication, multiplication, adjoint, transpose, inverse, rank, Gaussian elimination, Cramer's rule, linear functions, transformations of 2 and 3 space; vectors: definition, addition, subtraction, dot product, cross product, basis vectors, change of bases, eigenvalues, eigenvectors); combinatorics (counting principles, permutations and combinations); finite probability (basic definitions, sample spaces, events, probabilities of unions and intersections). Normally offered once per year.
MATH-255 Probability and Statistics

Prerequisites:

MATH-166 with a grade of C or better

Credits:

4.00

Description:

Topics include: random variable and distribution; expectation and variance; special discrete/continuous distributions (uniform, binomial, negative binomial, geometric, hypergeometric, Poisson, normal, and exponential distributions); joint distribution, marginal distribution and conditional distribution; covariance; limit theorems (law of large numbers and central limit theorem); introduction to confidence interval and hypothesis testing; regression analysis. Offered as needed.

MATH-256 Statistics With R

Prerequisites:

MATH 255 or permission of instructor

Credits:

1.00

Description:

The course uses free software R to introduce key concepts in statistics. Topics include Descriptive statistics and graphics, One- and two-sample tests, Regression and correlation, and Analysis of variance. Data from financial markets or computer networks will be used for homework assignments and projects. We will focus on hands on experiences with R rather than theoretical details about statistical analysis.

MATH-265 Calculus III

Prerequisites:

MATH 166 with grade of C or better

Credits:
4.00

Description:
Parametric equations and polar coordinates (curves, areas, conic sections); vectors and the geometry of space (the dot product, vector arithmetic, lines and planes in 3-space, the cross product, cylinders and quadratic surfaces); vector functions (limits, derivatives and integrals, motion in space); partial derivatives (functions of several variables, limits and continuity, tangent planes and differentials, chain rule, directional derivatives, gradient, extrema, Lagrange multipliers); multiple integrals (double integrals, applications); vector calculus (vector fields, line integrals, fundamental theorem for line integrals, Green's Theorem, curl and divergence, parametric surfaces, surface integrals). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

• MATH-267 Honors Calculus Seminar II
Prerequisites:
Intended for students simultaneously taking MATH 265

Credits:
1.00

Description:
This seminar meets once per week to investigate some of the more theoretical and challenging aspects of the topics covered in MATH 265. Normally offered once per year.

• MATH-285 Discrete Mathematics
Prerequisites:
MATH-166 with a grade of C or better

Credits:
4.00

Description:
Topics mostly selected from the following list: Logic and set theory, elementary number theory, relations and functions and their properties (equivalence relations, partial order relations, recurrence relations and their solutions); computational complexity of algorithms (big O notation); graphs
and their properties (isomorphisms of graphs, Euler and Hamilton paths, shortest path problem, graph coloring) trees (tree traversal, minimum spanning trees); finite state machines; methods of proof (proof by induction, proof by contradiction). Prerequisite: MATH 220 or permission of instructor. 1 term - 4 credits (4 lecture hours per week). Normally offered at least once each year.

- **MATH-290 Financial Mathematics I**

  Prerequisites:
  
  MATH-166 with a grade of C or better
  
  Credits:
  
  4.00
  
  Description:
  
  This course is mainly designed for students who are interested in financial mathematics and/or actuarial sciences, especially if they plan to take the second actuarial exam, and/or if they plan to study more in financial mathematics. The materials covered include time value of money, annuities, loans, bonds, cash flows and portfolios, general derivatives, options, hedging and investment strategies, forwards and futures, and swaps.

  Type:

  Expanded Classroom Requirement

- **MATH-331 Introduction to Abstract Math**

  Prerequisites:
  
  MATH-165 and MATH-166 with a grade of C or better
  
  Credits:
  
  4.00
  
  Description:
  
  This course is intended to provide a firm foundation for and a taste of the study of advanced mathematics. While the course content varies somewhat, it is designed to give students a deeper understanding of the algebraic and analytical structure of the integers, the rational numbers and the real numbers and how they act as a building block to a variety of fields of mathematics. Students are introduced to the process of mathematical discovery and the language of mathematics. Exercises and projects are designed to illustrate the need for proof and to further refine the student's ability to
analyze, conjecture and write mathematical proofs. This course is a prerequisite for most upper level mathematics courses and, after completing it a
student will be in a position to determine realistically if he or she ought to major or minor in mathematics.

- **MATH-351 Geometry**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Topics chosen from such areas as foundations of geometry, non-Euclidean geometry, projective geometry and convexity. Prerequisite: MATH 331. 1
term - 3 credits. Offered as the need arises.

- **MATH-373 Ordinary Differential Equations**
  
  **Prerequisites:**
  
  MATH 262
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  A first course in differential equations. Topics generally include separable, homogenous, exact, and linear first order differential equations; variations of
parameters, differential operators, the Laplace transform, inverse transforms, systems of differential equations, power series solutions, Fourier series,
and applications.

- **MATH-391 Advanced Honors Seminar**
  
  **Credits:**
  
  1.00
  
  **Description:**
Intended for students with a substantial level of mathematical maturity who wish to investigate advanced topics. This seminar fulfills one of the Honors Math lab requirements. Prerequisite: Permission of instructor; 1 term, 1 credit; offered in response to need and interest.

- **MATH-431 Linear Algebra**
  
  **Prerequisites:**
  
  Math 331 must have grade C or higher

  **Credits:**
  
  4.00

  **Description:**
  

- **MATH-432 Abstract Algebra**
  
  **Prerequisites:**
  
  MATH 431

  **Credits:**
  
  4.00

  **Description:**
  
  An introduction to elementary group theory, including properties of groups, subgroups, first isomorphism theorem for groups, normal subgroups, finite group classification; elementary properties of rings, such as homomorphisms of rings, ideals, fields, Euclidean algorithm, rings of polynomials, factorization theory, integral domains, associates, primes and units in domains, and other topics in number theory. Prerequisite: MATH 431 with a grade of C or higher.

- **MATH-462 Real Analysis**
MATH 331 with at least a grade of C

4.00

A detailed treatment of the basic concepts of analysis including the real numbers; completeness and its equivalence to other properties of the reals such as monotone convergence, Archimedean property, Bolzano-Weierstrass theorem; the topology of Euclidean spaces, compactness and the Heine-Borel theorem, connectedness, continuity and uniform continuity and uniform continuity, pointwise and uniform convergence of functions, and an introduction to metric spaces.

• MATH-463 Real Analysis II

MATH 462 with at least a grade of C

4.00

Continuation of the basics of analysis including integration and measure theory.

• MATH-481 Complex Analysis I

MATH 462

4.00

Description:
Construction and properties of complex numbers, calculus in the complex plane, analytic functions, contour integrals and the basics of Cauchy theory, power series representations. Prerequisite: MATH 331 or instructor’s consent.

- **MATH-510 Independent Study**
  Credits: 4.00
  Description: Members of the department will hold conference hours with students and will direct their readings and study of topics in mathematics which may be of interest to them. Prerequisite: Consent of instructor. 1 term - credits to be arranged.

- **MATH-R104 Recitation for Pre-Calculus for Management and Social Sciences**
  Prerequisites: Appropriate Math Placement Exam score. Must be taken concurrently with MATH 104
  Credits: 0.00
  Description: Taken simultaneously with Math 104. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do on line work such as lecture demonstration of additional examples or homework projects.

- **MATH-R128 Recitation for Math for the Modern World**
  Prerequisites: MATH-000 or appropriate Math Placement Exam score. Must be taken concurrently with MATH 128. This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.
  Credits:
Hands on problem solving, discussion and examples of Math for the Modern World.

• **MATH-R130 Recitation for Finite Mathematics**
  
  **Prerequisites:**
  
  MATH 104 or appropriate math placement score. Must be taken concurrently with MATH 130
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  Taken simultaneously with Math 130. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do on line work such as lecture demonstration of additional examples or homework projects.

• **MATH-R132 Recitation for Math-Art, Tool and Humanside**
  
  **Prerequisites:**
  
  MATH-000 or appropriate Math Placement Exam score. Must be taken concurrently with MATH 132. This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  Taken simultaneously with Math 132. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do on line work such as lecture demonstration of additional examples or homework projects.
• MATH-R134 Recitation for Calculus for Management And Social Sciences
  
  Prerequisites:
  
  MATH 104 or appropriate math placement score. Must be taken concurrently with MATH 134.
  
  Credits:
  
  0.00
  
  Description:
  
  Taken simultaneously with Math 134. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do on line work such as lecture demonstration of additional examples or homework projects.

• MS-101 Principles of Cancer Management
  
  Prerequisites:
  
  Radiation Biology major only or permission of instructor.
  
  Credits:
  
  4.00
  
  Description:
  
  This course will introduce the students to the twelve major cancers. Topics to be covered for each cancer include etiology, epidemiology, detection, diagnosis, and prevention as well as the psychosocial aspects of being diagnosed with cancer. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy and immunotherapy, bone marrow transplants, and the use of clinical trials. The goals and objectives of the course will be met through the use of various teaching tools including but not limited to: models, videos, guest lectures, radiation therapy departmental tour, and a poster project with a presentation component. Cognitive assessment of the students will be accomplished through quizzes, exams and an oral presentation.
  
  Term:
  
  Offered Fall Term
**MS-111 Introduction to Medical Dosimetry**

Credits: 4.00

Description: This course will serve as a detailed introduction to the medical dosimetry profession and how it fits into the Radiation Oncology department framework. The professional relationships, responsibilities and qualifications of the medical dosimetrist and other staff will be examined. The scope of practice and code of ethics from the American Association of Medical Dosimetrists (AAMD) will be discussed in detail as well as the role of other professional organizations. The policies and procedures governing the medical dosimetry program in relation to the standards set by the Joint Review Committee on Education in Radiologic Technology (JRCERT) will also be reviewed. Other topics to be covered in order to prepare students for entry into their clinical rotations will include radiation safety, patient rights, privacy laws, infection control and an overview of department workflow starting from diagnosis through treatment and beyond. Finally, students will receive detailed instruction on basic hand calculations as these will form the basis of the start of their clinical rotations in the following semester.

Term: Offered Fall Term

**MS-200 Introduction to Medical Sciences**

Prerequisites: Acceptance into the clinical track or post-bac program.

Credits: 4.00

Description: This course will serve an an introduction to the role of the radiation therapist and medical dosimetrist in a Radiation Oncology department. Through a combination of detailed lectures, discussions, role-playing, case studies, and hands-on laboratory exercises, students will be introduced to the professional and clinical aspects of their respective professions. Additional topics included radiation safety, patients rights, infection control, communication for the clinic, patient assessment, and psychosocial aspects of cancer including death and dying.

Term: Offered Fall Term
• **MS-299 Intro to Clinical Radiation**

  **Prerequisites:**
  
  MS 101; Acceptance into clinical track or post-bac program

  **Credits:**

  4.00

  **Description:**
  
  This course will combine hands-on laboratory exercises, case studies, detailed lectures and discussions to introduce the student to radiation therapy. Topics to be covered include: history of x-rays, x-ray production, professional societies, departmental staff and structure, proper body mechanics, infection control, basic nursing/patient care and emergency procedures, patient communication, medical chart interpretation, linear accelerator operation, radiation safety, basic radiation therapy treatment techniques, basic medical terminology, and death and dying.

  **Term:**

  Offered Fall Term

• **MS-301 Clinical Radiation I**

  **Prerequisites:**

  BIO 204 and MS 200

  **Credits:**

  3.00

  **Description:**

  Through a systems-based approach, this course will review anatomy and physiology while teaching medical terminology. This course will also discuss the major cancers associated with each anatomical system and introduce the student to radiation therapy treatment techniques and procedures.

  **Term:**

  Offered Spring Term
• MS-L301 Clinical Radiation Lab I

Prerequisites:
MS 301 concurrently

Credits:
1.00

Description:
Provides the necessary clinical experience to become a radiation therapist. All labs are conducted at our clinical affiliates. Under the supervision of licensed radiation therapists, the students will become increasingly proficient in the manipulation of treatment equipment, will gain a thorough understanding of radiation treatment plans, will deliver a prescribed radiation dose to cancer patients, and will acquire knowledge of all relevant aspects of patient care. These labs are available only to students enrolled in the clinical track.

Term:
Offered Spring Term

• MS-302 Clinical Radiation II

Prerequisites:
MS 301

Credits:
3.00

Description:
This course is a continuation of MS 301. Through the same didactic approach, the course will cover all of the anatomical systems and their related medical terminology NOT covered in MS 301.

Term:
Offered Fall Term

• MS-L302 Clinical Radiation II Lab
Prerequisites:
Students must take MS 302 concurrently

Credits:
1.00

Description:
Provides the necessary clinical experience to become a radiation therapist. All labs are conducted at our clinical affiliates. Under the supervision of licensed radiation therapists, the students will become increasingly proficient in the manipulation of treatment equipment, will gain a thorough understanding of radiation treatment plans, will deliver a prescribed radiation dose to cancer patients, and will acquire knowledge of all relevant aspects of patient care. These labs are available only to students enrolled in the clinical track.

Term:
Offered Fall Term

- **MS-303 Clinical Radiation III**
  Prerequisites:
  MS 302
  
  Credits:
  3.00
  
  Description:
  For the senior radiation therapy student, through a systems-based approach, this course will emphasize advanced radiation treatment techniques, including patient simulation, immobilization, contouring, and beam modification. The course will also cover radiation therapy quality assurance, medical law, and medical ethics.

  Term:
  Offered Spring Term

- **MS-L303 Clinical Radiation III Lab**
Prerequisites:
MS 303 concurrent

Credits:
1.00

Description:
Provides the necessary clinical experience to become a radiation therapist. All labs are conducted at our clinical affiliates. Under the supervision of licensed radiation therapists, the students will become increasingly proficient in the manipulation of treatment equipment, will gain a thorough understanding of radiation treatment plans, will deliver a prescribed radiation dose to cancer patients, and will acquire knowledge of all relevant aspects of patient care. These labs are available only to students enrolled in the clinical track.

Term:
Offered Spring Term

- **MS-L304 Clinical Practicum for Radiation Therapy**

  Prerequisites:
  Take MS-301 MS-L301;

  Credits:
  1.00

  Description:
  Student radiation therapists will spend 12 weeks (full-time, 40 hrs/wk) gaining hands on patient care experience in the department of radiation oncology at our clinical affiliates. Under constant supervision by licensed therapists, the student will be guided toward the application of theory in the real world of cancer treatment.

  Term:
  Summer

  Type:
  Expanded Classroom Requirement
• **MS-310 Clinical Practicum I**

**Prerequisites:**

MS 301 and MS L301

**Credits:**

1.00

**Description:**

Student radiation therapists and student dosimetrists will spend fourteen weeks (full-time, 40 hrs/wk) gaining hands-on patient care experience in the Department of Radiation Oncology at our clinical affiliates. Under constant supervision by licensed therapists and certified medical dosimetrists, the student will be guided toward the application of theory in the real world of cancer treatment and planning.

**Term:**

Summer

**Type:**

Expanded Classroom Requirement

• **MS-L311 Clinical Dosimetry Rotation I**

**Prerequisites:**

MS-L111 and take MS-301 concurrently

**Credits:**

1.00

**Description:**

Under the supervision of a Certified Medical Dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Two,8-hour days per week, TTH.

**Term:**
**MS-L312 Clinical Dosimetry Rotation II**

Prerequisites:

Take MS-L311 and MS-302 concurrently

Credits:

1.00

Description:

Under the supervision of a certified medical dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Three 8-hour days per week, MWF.

Term:

Offered Fall Term

**MS-L313 Clinical Dosimetry Rotation III**

Prerequisites:

MS-L312 and MS-303 concurrently

Credits:

1.00

Description:

Under the supervision of a Certified Medical Dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Three, 8-hour days per week, MWF.

Term:

Offered Spring Term
• MS-L314 Clinical Practicum for Dosimetry

Prerequisites:

Take MS-301 and MS-L311;

Credits:

1.00

Description:

Student dosimetrists will spend 12 weeks (full-time, 40 hrs/wk) gaining hands on treatment planning experience in the department of radiation oncology at our clinical affiliates. Under constant supervision of certified medical dosimetrists, the student will be guided toward the application of theory in the real world of cancer treatment planning.

Term:

Summer

Type:

Expanded Classroom Requirement

• MS-315 Radiation Physics I

Prerequisites:

PHYS 112, BIO 111, and MATH 134 or higher AND MS L315 CONCURRENTLY

Credits:

3.00

Description:

Content is designed to establish a thorough knowledge of the radiation physics used in radiation therapy treatments. Topics to be covered in this course include a review of basic physics (energy, mass, matter, SI units), structure of matter, types of radiations, nuclear transformations, radioactive decay, the fundamentals of x-ray generators and x-ray production, interactions of x and gamma rays with matter, absorbed dose, measurements of dose, principles of and practical use of ionization chambers and electrometers, Geiger counters and other survey meters, principles and practical use of TLDs, film, calorimetry, scintillation detectors, radiation protection and quality assurance.
• MS-L315 Radiation Science Lab

Prerequisites:

MS 315 concurrently

Credits:

1.00

Description:

This lab will cover a broad range of experiments associated with the Department of Radiation Oncology at Massachusetts General Hospital. Topics include: Quality assurance measurements for radiation therapy, calibration of radiation teletherapy unit using ionization chambers, measurements of dose distribution via film, measurements of dose in a phantom via TLDs, radiation protection survey of therapy installation and brachytherapy sources, and radiation biology.

Term:

Offered Fall Term

Type:

Expanded Classroom Requirement

• MS-317 Radiation Physics II

Prerequisites:

MS 315

Credits:

4.00

Description:
This course is intended to expand on the concepts and theories presented in Radiation Physics I. It will provide a detailed analysis of the treatment units used in external beam radiation therapy, their beam geometry, basic dose calculations and dose distributions. This course will also cover the principles, theories, and uses of brachytherapy. This course was previously MS 412

Term:
Offered Spring Term

• MS-415 Clinical Dosimetry
  Prerequisites:
  MS 315; MSL415 concurrently
  Credits:
  3.00
  Description:
  This course will discuss the factors that influence treatment planning and govern the clinical aspects of patient treatment. Topics to be covered include treatment planning with 3-D CT and MRI beams, isodose plan descriptions, clinical applications of treatment beams and advanced dosimetric calculations. This course will also contrast new emerging technologies with conventional radiation therapy techniques (SRT, SRS, IMRT, Image Guided Therapy, Respiratory Gating).
  Term:
  Offered Spring Term

• MS-L415 Clinical Dosimetry Lab
  Prerequisites:
  MS 315, MS L315, MS 415 concurrently
  Credits:
  1.00
  Description:
This lab will provide the student with the opportunity to apply clinical dosimetry principles and theories learned in the classroom to actual treatment planning situations within the clinic. Through hands-on lab exercises the student will demonstrate the use of the treatment planning instruments and interpret information they compute.

**Term:**
Offered Spring Term

- **MS-416 Radiation Biology**
  
  **Prerequisites:**
  
  Take BIO 403, MS 315 and MS L315.

  **Credits:**
  
  4.00

  **Description:**
  
  Topics covered include: physio-chemical aspects of energy absorption, the sequence of events after irradiation occurring on the molecular, cellular and organized tissue levels, radiation response and repair of eukaryotic cells, effects of radiation quality, dose rate, environmental conditions, cell cycle kinetics, tumor and normal cell population dynamics, radiation-induced carcinogenesis and mutagenesis, tumor pathophysiology and radiobiology, and recent advances in experimental radiation oncology.

  **Term:**
  Offered Spring Term

- **MS-417 Clinical Dosimetry II**
  
  **Prerequisites:**
  
  MS 415

  **Credits:**
  
  4.00

  **Description:**
This course is a continuation of Clinical Dosimetry I and will focus on advanced treatment planning techniques including intensity modulated radiation therapy (IMRT), arc therapy, stereotactic treatment planning, and proton therapy. The advantages of each technique/modality over conventional 3D-treatment planning will be discussed. This will also be contrasted against the specific challenges presented by each technique such as the need for better immobilization, need for 4D CT scanning and daily IGRT (kV matching and/or CBCT).

Term:
Offered Fall Term

**MS-420 Oncology and Pathology**

**Prerequisites:**
BIO 204, MS 302 must be taken concurrently

**Credits:**
4.00

**Description:**
This course, taught by Massachusetts General Hospital physicians will review cancer epidemiology, etiology, detection, diagnosis and prevention, lymphatic drainage, and treatment. The pathology(s) of each cancer will be presented in detail including the rationale for each preferred modality of treatment.

Term:
Offered Fall Term

**MS-422 Radiology for Radiation Therapy**

**Prerequisites:**
BIO 204 & BIO L204: may also be taken concurrently

**Credits:**
4.00

**Description:**
This course will begin with an introduction to radiology, reviewing X-ray production and discussing basic radiation physics, image formation (Kv, mA) and distortion (blur, magnification), conventional processing and digital imaging. The above-mentioned radiographic imaging concepts will be presented with conventional lectures as well as with several imaging laboratories. In addition, the basic principles of each imaging modality, including mammography, CT, MRI, Nuc Med, and Ultra Sound, will be presented. With the use of departmental tours and guest lecturers, the use, benefits and limitations of each will be discussed. Building upon the information previously presented, radiographic anatomy will also be covered with an emphasis on cross sectional anatomy. Students will review basic anatomy viewed in sectional planes (axial/transverse) of the body. Using CT and MRI images, the topographic relationship between internal organs and surface anatomy will be interpreted and discussed.

Term:
Offered Fall Term

- **MS-430 Senior Seminar**

  **Prerequisites:**

  Available to Senior students in the Medical Science's Radiation Therapy Clinical Track.

  **Credits:**

  2.00

  **Description:**

  This course will be available to senior students enrolled in the Radiation Therapy Clinical Track. This seminar style course will serve three purposes; one will be to assist the senior students with the completion of the more advanced ARRT clinical competency requirements including, but not limited to, CSI, Mantle, and Paraaortic fields. This portion of the seminar will be conducted in a laboratory setting using our Phantom Patient. It's second purpose will be to prepare our graduating students for the ARRT's National Registry Exam. Exam preparation will include the use of lectures, student teaching, online teaching tools, mini mock registry exams and a full-length mock registry exam. Lastly, the seminar will assist the students with the preparation of their professional resumes including discussions regarding the skills necessary to make job interviews successful.

  **Term:**

  Offered Spring Term

- **MS-435 Brachytherapy**

  **Prerequisites:**

  MS-417;
Topics in this course will include, radioactive sources, calibration, instrumentation, factors affecting dose calculations, definitions of LDR, MDR and HDR, treatment planning and clinical dose calculation, implantation techniques, implant localization/verification, regulations, radiation safety, storage and QA. Detailed coverage of prostate brachytherapy including LDR and HDR will be emphasized.

Term:
Offered Spring Term

- **MS-450 Dosimetry Systems and Networking**

  Credits:
  4.00

  Description:
  This course is designed for the medical dosimetry student, to include a general overview of computer systems and networking in the field of radiation oncology. A historical view of computers will be covered as well as the intricate uses in the medical field today. Oncology information systems such as MOSAIC and ARIA, as well as radiation therapy software used for imaging, contouring, treatment planning, and patient charting applications will be covered. Data and system security will also be addressed.

  Term:
  Offered Spring Term

- **MS-455 Advanced Radiation Treatment Techniques**

  Prerequisites:
  MS 302 & RT Clinical Student

  Credits:
  1.00
For the senior radiation therapy student, this course will emphasize advanced radiation treatment techniques, including patient simulation, immobilization, contouring, beam modification, as well as special procedures.

**MS-465 Senior Seminar for Medical Sciences**

**Prerequisites:**
Senior status

**Credits:**
4.00

**Description:**
This course will be available to senior students enrolled in the Radiation Therapy and Medical Dosimetry programs. This seminar style course will serve a number of purposes; one will be to prepare our graduating students for board certification in their respective disciplines (AART for Radiation Therapy and MDCB for Medical Dosimetry). Exam preparation will include the use of lectures, student teaching, online teaching tools, mini mock exams, and a full-length mock exam. The seminar will also assist students with the preparation of their professional resumes including discussions regarding the skills necessary to make job interviews successful.

**MS-510 Independent Study**

**Prerequisites:**
Seniors Only; permission of program director

**Credits:**
1.00-7.00

**Description:**
Under special circumstances, seniors may be allowed to pursue studies in areas of particular interest to them. By special arrangement, members of the Medical Sciences Committee will schedule discussion sessions, assign projects and provide guidance and feedback. A paper & oral presentation are required.

**Term:**
• MUH-101 History of Music I

Credits: 4.00

Description:
A chronological survey of Western music from Gregorian chant to the death of Beethoven. Assigned readings, critical listening, class discussion and concert attendance.

Term: Offered Fall Term

Type: Humanities & History, Humanities Literature Requirement

• MUH-102 History of Music II

Credits: 4.00

Description:
A chronological survey of Western music from Schubert to the present. Assigned readings, critical listening, class discussion and concert attendance.

Term: Offered Spring Term

Type: Humanities & History, Humanities Literature Requirement

• MUH-110 Music Theory
Credits:
4.00

Description:
Topics in music history and theory, including terminology, notation, scales, chords, and basic composition, score analysis and aural skills, historical periods and genres. Assignments include reading, writing, listening, and class discussion.

Term:
Occasional

Type:

Humanities & History, Humanities Literature Requirement

- **MUH-211 Music of the United States**

Credits:
4.00

Description:
Survey from Colonial times to the present. Various attempts to create an indigenous style. Folk, religious music and symphonies, jazz and American musical theater. Composers include Billings, Beach, Ives, Copland, Bernstein and others.

Term:
Alternates Fall & Spring

Type:

Humanities & History, Humanities Literature Requirement

- **MUH-212 Popular Music in the United States**

Credits:
4.00
This course covers various popular music styles that emerged in the United States of America in the twentieth century, including blues, music theater, jazz, country, rock and hip-hop. In addition to representative musical selections, emphasis will be placed on various social and cultural factors that helped foster these new popular music styles.

Term:

Occasional

Type:

Humanities & History, Humanities Literature Requirement

- **MUH-221 History of Women in Music**

  Credits:

  4.00

  Description:

  The history of music from the Middle Ages to the present presented in the lives and music of women composers, performers, and writers. Assigned readings, critical listening, class discussion and concert attendance.

  Term:

  Alternates Fall & Spring

  Type:

  Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement

- **MUH-223 World Music**

  Credits:

  4.00

  Description:
Selected topics in the folk and traditional music of Africa, the Near East, the Far East, and the Pacific, examined in the context of their cultures and their roles in the life of the indigenous peoples of those areas. Assigned readings, critical listening, class discussion, and concert attendance.

Term: Occasional

Type: Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement

- **MUH-227 Jazz**

  Credits: 4.00

  Description:
  Evolution of jazz from blues and ragtime through Dixieland and the avant-garde experiments of today. Contributions of major soloists, arrangers and composers. Listening, reading and concert attendance.

  Term: Occasional

  Type: Cultural Diversity Opt A, Humanities & History, Humanities Literature Requirement

- **MUH-233 The Blues**

  Credits: 4.00

  Description:
  Selected topics dealing with the blues from its origins in various Southern regions of the U.S., through its post-war urban relocation, up to modern interpretations in rock, rap, pop, and hip-hop today. Blues music, both technically and culturally, will be considered from the artist's perspective as a form of African-American expression and American/African-American oral history, as well as a unique indigenous form of American music. Influences
of European, African, Country and Jazz styles will be examined, as well as the themes of race and alienation, and similar socio-cultural influences that have shaped and defined the music over time.

Occasional

Type:

Cultural Diversity Opt A, Humanities & History, Humanities Literature Requirement

• MUH-331 Music in Film

Credits:
4.00

Description:
This class studies the history and development of film music through reading, lecture and class listening. We investigate the process of film scoring, and how music and its relationship to film have changed over the last century. The class includes discussion and evaluation of different compositional styles and practices to listening critically to film scores while viewing movies.

Term:
Occasional

Type:

Humanities & History, Humanities Literature Requirement

• MUH-510 Independent Study

Prerequisites:
Instructor's Consent.

Credits:
1.00-4.00
Students meet with a departmental faculty member to pursue advanced studies in areas of particular interest to them.

Term:
Occasional

Type:

Humanities & History, Humanities Literature Requirement

- **MUH-510 Independent Study**

  Credits:
  1.00-4.00

  Description:
  substantive reading/research in area of special interest directed by a faculty member.

- **NEUR-101 Intro to Neuroscience**

  Credits:
  4.00

  Description:
  Introduces the student to the field of neuroscience, the study of the organization and function of the nervous system of humans and other animals. Neuroscientists examine how individual neurons function as signaling devices, how groups of neurons operate as circuits to produce fundamental units of behavior, and how much larger systems in the brain subserve complex functions such as memory and consciousness. Topics include the neuron and neural transmission, the overall function and organization of the nervous system, the development of the brain, and higher cognitive functions. Normally offered alternate years.

Offered Spring Term

Type:
Humanities & History, Humanities Literature Requirement

**PHIL-212 Formal Logic**

Credits:
4.00

Description:
An introduction to formal (or semi-formal) study of the basic types of deductive arguments (propositional and syllogistic logic). 1 term - 4 credits. Normally offered every year.

Term:
Occasional

Type:
Quantitative Reasoning

**PHIL-219 Philosophy of Art**

Credits:
4.00
What counts as art? What is beauty? Are there objective standards of beauty? This course examines the nature of aesthetic experience, art, beauty, and creativity. Through the classic and contemporary readings, the students will be introduced to philosophical issues concerning the meaning of art, artistic representation, perceptions of art, interpretation, and criticism. Students will be encouraged to reflect on their own experience of art and explore the relationships among the artist, the audience, the artwork, and the world. 1 term - 4 credits. Normally offered every third year.

**Type:**
- Humanities & History
- Humanities Literature Requirement

- **PHIL-228 Feminist Philosophy**
  - **Credits:** 4.00
  - **Description:**
    - This course is an introduction to the philosophy of feminist thought. Feminist theories of epistemology, metaphysics and morality will be examined as critiques of traditional philosophy. Feminist perspectives and methodologies include radical, liberal, postmodern, as well as more recent trends in ecofeminism. Special emphasis will be placed on explicit and implicit practices of alienation and exclusion as they have unfolded in the gendering of thought, truth, and reality. 1 term - 4 credits. Normally offered every third year.
  - **Term:** Occasional
  - **Type:**
    - Cultural Diversity Opt A
    - Cultural Diversity BFA

- **PHIL-231 Skepticism**
  - **Credits:** 4.00
  - **Description:**
Skepticism is an ancient philosophy with an influence that persists to this day. Versions of skepticism raise questions about our ability to know anything certain about ourselves, others, or the external world. This course will examine strands of the skeptical tradition, as well as some responses to it. Possible authors may include: Plato, Sextus Empiricus, Montaigne, Descartes, Hume, Moore, and Wittgenstein. 1 term - 4 credits. Normally offered every third year.

Term:
Occasional

- **PHIL-235 The Meaning of Life**

  Credits:
  
  4.00

  Description:
  
  The question about the meaning of life is among the oldest and most perplexing questions of humanity. What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our own destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? While our main focus will be philosophical, students will also explore the multiplicity of perspectives on life-meaning through the works of artists, poets, theologians, and psychologists. We will approach the question of the meaning of life both as an exciting intellectual endeavor and an existential challenge of great practical importance.

- **PHIL-250 Social & Political Philosophy**

  Credits:
  
  4.00

  Description:
  
  An examination of persistent debates in political and social philosophy, such as the meaning of property and welfare, the tensions between liberty and equality, censorship and freedom of expression, the relation of church and state, the possibility of political education and civic virtue, legitimacy of the state and revolution, war and problems of end and means, addressing historic injustice, such as racism, genocide, or sexism, among other topics. The class will focus on no more than two such themes. Students will read both classic and contemporary writings to address both the historical roots and the contemporary treatment of these questions. 1 term - 4 credits. Normally offered every year.

  Term:
  Occasional
PHIL-251 Philosophy of Race & Gender

Credits:
4.00

Description:
Prejudice of many kinds, such as racism and sexism, is so embedded in our social institutions, and is so traditional and pervasive that we often fail to notice it. In this course, we will deal with the history and nature of racism and sexism, as well as with possible solutions to these problems, including affirmative action and busing. Also to be discussed will be homosexuality, pornography and sex roles. 1 term - 4 credits. Normally offered alternate years.

Type:
Cultural Diversity Opt A

PHIL-253 The Philosophy of America

Credits:
4.00

Description:
A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. Other works, primary and secondary, that help to illuminate these documents and their philosophical significance will also be read. The course may also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation's history, from the struggle over slavery to America's contemporary role in the world. In addition to the founding documents, authors and texts may include: Locke, The Federalist Papers, Jefferson, Adams, Madison, Washington, de Tocqueville,
Emerson, Douglass, Lincoln, Stanton, Thoreau, James, and Dewey, as well as contemporary authors. 1 term - 4 credits. Normally offered every third year.

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement

- **PHIL-260 Philosophy of Religion**

  Credits:
  4.00

  Description:
  This course analyzes and interprets fundamental religious concepts and beliefs, examines the rational support for religious faith, and addresses the relation between religion and society. Fundamental questions concerning the nature and existence of God, salvation, and immortality will be explored, and for this the primary focus will be Western religious conceptions but may broaden to include other world religions. Other topics may include: whether all religions can be equally valid and true; the relation of religion and the state; the status of miracles; the history and psychology of religion; the conflict between religion and science. 1 term - 4 credits. Normally offered alternate years.

  Term:
  Occasional

Type: Cultural Diversity BFA, Cultural Diversity Opt A

PHIL-267 Chinese Philosophy

Credits: 4.00

Description:
A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course then considers Zen Buddhism, which is called Ch'an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.

Cultural Diversity Opt B

**PHIL-309 Philosophy of Freedom**

Prerequisites:
Prerequisite: One Philosophy course or consent of instructor.

Credits:
4.00

Description:
Focuses on the paradoxical relationship between freedom and responsibility and how that affects our thinking about freedom in the individual, social and political sphere. Both classical and contemporary thinkers will be considered. Prerequisite: One course in Philosophy or consent of instructor. 1 term - 4 credits. Normally offered every other year.

Term:
Offered Spring Term

**PHIL-310 Topics in the Philosophy of Religion**

Prerequisites:
Prerequisite: One course in Philosophy or consent of instructor.

Credits:
Description:

This course provides an opportunity to explore in depth a specific topic in the philosophy of religion. Subjects vary from specific authors or religious figures to particular issues in the philosophy of religion or to comparisons between Western and Eastern traditions. Prerequisite: One course in Philosophy or consent of instructor. 1 term - 4 credits. Normally offered every third year.

Term:
Occasional

- PHIL-314 20th Century Philosophy

Prerequisites:

Prerequisite: PHIL 211 or consent of instructor.

Credits:

4.00

Description:

Examines one or more of the following major philosophical movements of this century: Pragmatism, Phenomenology, Existentialism, Logical Positivism, Analytic (Linguistic) Philosophy, Postmodernism and Critical Theory (Post-Analytic Philosophy). Prerequisite: PHIL 211 or consent of instructor. 1 term -4 credits. Normally offered alternate years.

Term:
Occasional

- PHIL-316 Existentialism

Prerequisites:

Prerequisite: One course in Philosophy or consent of instructor.

Credits:

4.00
Description:

An overview of the existentialist tradition. Primary focus on issues and problems arising from the existentialist reaction to classical philosophy. Topics include: paradoxes and contradictions of human nature and human condition; radical freedom, commitment, and responsibility; existential anxiety, meaninglessness and the rejection of God; authenticity and self-deception; individuality and community. Philosophers to be discussed will include Kierkegaard, Nietzsche, Sartre, Camus, Dostoevsky, and Heidegger. Prerequisite: One course in Philosophy or consent of instructor. 1 term - 4 credits. Normally offered every other year.

Term:

Occasional

- **PHIL-317 Independent Research**

  **Prerequisites:**
  
  Prerequisite: Consent of instructor.

  **Credits:**
  
  1.00-4.00

  **Description:**
  
  This course focuses on philosophical research and writing. It is designed as an independent research course to allow students the opportunity to focus on a topic of their choice and develop critical skills in writing and research methods. Students will be required to produce a research paper of a length commensurate with the number of credits in the course, complete with abstract, thesis, outline, bibliography, and primary and secondary sources. Students will be expected to follow MLA guidelines. Prerequisite: Consent of instructor. 1 term - 1-4 credits (variable). Normally offered on an as-needed basis.

  **Term:**

  Occasional

- **PHIL-318 Philosophy of Law**

  **Prerequisites:**
  
  Prerequisite: One course in Philosophy or Instructor's consent
Description:
Readings may include a range of classical authors, such as Plato and Aquinas, as well as the works of such 20th-century legal philosophers as H.L.A. Hart, Dworkin and Rawls. Also included may be leading jurists such as Oliver Wendell Holmes and Learned Hand. Issues discussed may include the nature of law, its relation to justice, and how the legal system should operate to arrive at just decisions. Prerequisite: One course in Philosophy or consent of instructor. 1 term - 4 credits. Normally offered every third year.

Options:

- **PHIL-319 Topics in Applied Ethics**

  Prerequisites:

  PHIL 119, or 123 or 127

  Credits:

  4.00

  Description:

  This course will address in depth one or more specific issues in applied ethics. Topics will vary and may range from applied issues in political thought, such as just war theory or transitional justice, to specific questions in professional ethics or social policy, such as end-of-life care, economic justice, or the role of technology in the human future. Prerequisite: PHIL 119, or 123, or 127. 1 term - 4 credits. Normally offered every other year.

Occasional
• PHIL-363 Bio and Medical Ethics

Prerequisites:
Prerequisite: Phil 119, or 123, or 127.

Credits:
4.00

Description:
An examination of the moral problems facing health-care practitioners, their patients, and others involved with the practice of medicine in today’s society. Issues include euthanasia, the ethics of medical experimentation, the use of reproductive technologies, genetic counseling and genetic engineering, truth-telling and confidentiality in doctor-patient relationships, the cost and availability of medical care. Prerequisite: PHIL 119, or 123, or 127. 1 term -4 credits. Normally offered every third year.

Term:
Occasional

• PHIL-364 Business Ethics

Prerequisites:
Prerequisite: Phil 119, or 123, or 127

Credits:
4.00

Description:
An examination of the ethical questions in the working life and policies of the business and professional sectors of society. The focus will vary, but common themes will include: the role of commerce in civil society; the relation of business to conceptions of economic and social justice; the meaning and application of codes of ethics; obligations of corporations and professional organizations to shareholders and stakeholders; responsibilities to clients and colleagues; workplace conduct; the nature of success and conflicts between legal and moral obligations; the impact of globalization. The course will employ a variety of readings, including ethical theory and specific case studies. Prerequisite: PHIL 119, or 123, or 127. 1 term -4 credits. Normally offered every other year.
• PHIL-401 History of Ethics and Political Philosophy 1: Ancient and Medieval
  
  Prerequisites:
  
  Prerequisite: Consent of instructor.
  
  Credits:
  
  4.00
  
  Description:
  
  A survey of major works and themes of moral and political philosophy from ancient Greece to the late medieval period. Topics covered will include the nature of moral duties, the connection between happiness and morality, citizenship and virtue, the meaning of a good life, the attractions and limitations of moral relativism, the foundations of legitimate government, arguments for and against democracy, realism and idealism in statecraft, and the relationship between law and ethics. Authors may include the Pre-Socratic thinkers, Plato, Aristotle, Cicero, Augustine, and Aquinas, among others. Prerequisite: Consent of instructor. 1 term -4 credits. Normally offered every year in the fall.

  Term:

  Offered Fall Term

• PHIL-402 History of Ethics & Political Philosophy II
  
  Prerequisites:
  
  Prerequisite: Consent of instructor.
  
  Credits:
  
  4.00
  
  Description:
  
  A continuation of PHIL 401, covering the early modern era to the dawn of the 20th century. Authors may include Machiavelli, Hobbes, Locke, Rousseau, Kant, Hegel, Mill, Marx, and Nietzsche, among others. Prerequisite: Consent of instructor. 1 term -4 credits. Normally offered every year in the spring.
• PHIL-403 The Idea of Human Rights

Prerequisites:
Instructor's Consent

Credits:
4.00

Description:
This seminar will analyze and explore the universal human rights concept -- the idea that all human beings, by virtue of their humanity alone, have human rights that should be recognized by all nations. It will explore the concept's meaning; its theoretical underpinnings, critiques and defenses; and the kinds of specific rights suggested by the concept. The course will also provide an introduction to existing human rights law. Prerequisite: Consent of instructor. 1 term - 4 credits.

Term:
Occasional

• PHIL-414 Topics in Philosophy

Credits:
4.00

Description:
A detailed exposition and evaluation of a specific topic or of the views of one major philosophical thinker or group of thinkers. Readings from both primary and secondary sources. Prerequisite: PHIL 210 or 211 or consent of instructor. 1 term - 4 credits. Normally offered every year.

Term:
Offered Both Fall and Spring
• PHIL-415 Aristotle: Profiles in Philosophy

Prerequisites:

Prerequisite: PHIL 210 or consent of instructor.

Credits:

4.00

Description:

This course is an in-depth investigation into Aristotle's writings, teachings, and central doctrines. Readings include a range of Aristotle's work and treatises. Topics and texts may vary depending on the theme of exploration. Possible combinations of texts may include his works on Logic, Natural Philosophy, Metaphysics, Poetics, Politics or Ethics, among others. Students will be expected to critically examine textual readings. Classes will be conducted by means of lecture, class discussion, and primary text in translation. Prerequisite: PHIL 210 or consent of instructor. 1 term - 4 credits. Normally offered every third year.

Term:

Occasional

• PHIL-416 Plato: Profiles in Philosophy

Prerequisites:

Prerequisite: PHIL 210 or consent of instructor.

Credits:

4.00

Description:

A detailed study of Platonic texts and issues. Works studied will vary but will often include dialogues such as the Apology, Euthyphro, Phaedo, Republic, and Symposium. Themes may include, among others: the nature of philosophy and its relation to society; the dialogue form and the character of Socrates; the difference between truth and opinion; the meaning of virtue; justice and the ideal regime; the theory of forms and the nature of reality; love, death, and transcendence. Prerequisite: PHIL 210 or consent of instructor. 1 term - 4 credits. Normally offered every third year.

• PHIL-418 Kant: Profiles in Philosophy
Prerequisites:

PHIL 211

Credits:

4.00

Description:

An examination of Kant's ethics and theory of knowledge, including the following topics: structures of our knowledge of nature and the empirical world; the limits of rationality; the possibility of any knowledge of God, the soul and other metaphysical entities; the antinomies (paradoxes) of pure reason; Kant's theory of unconditional morality based on duty; the idea of the categorical imperative; autonomy and universal moral law; the problem of evil. Selections from Kant's political writings will also be introduced. Prerequisite: PHIL 211 or consent of instructor. 1 term - 4 credits. Normally offered every third year.

Term:

Occasional

PHIL-423 Advanced Formal Logic

Prerequisites:

Prerequisite: PHIL 212 or consent of instructor.

Credits:

4.00

Description:

In this course, students will put to work the logical theory developed in Formal Logic (Phil 212). In particular, students will use First-Order Logic to investigate computability and computation theory. Goedel's First and Second Incompleteness Theorems are a particular focus in the course. Prerequisite: PHIL 212 or consent of instructor. 1 term -4 credits. Normally offered alternate years.

Term:

Occasional

PHIL-425 The Shield of Achilles: War and Peace From Troy to Sarajevo
Prerequisites:
Take PHIL-119, PHIL-123, or PHIL-127; or Instructor's consent

Credits:
4.00

Description:
This course, co taught by Fred Marchant (English) and Nir Eisikovits (Philosophy) examines how literature, film, and other forms of cultural expression have made sense (or not) of war. Organized in an approximate chronological order, the works examined will be responses to ancient conflicts as well as to the wars of the last century (including the two World Wars, post-colonial struggles, and the contemporary war on terror.) Our goal in this endeavor will be broad cultural understanding of how we imagine, remember, forget, memorialize, and question the warfare of recent times.

Term:
Occasional

PHIL-440 Stay the Hand: Philosophical and Literary Readings on Law and Violence

Credits:
4.00

Description:
An interdisciplinary course examining the idea of law and its function in human society, with a special focus on issues of violence, war, peace, and justice. The course will examine law as it represented, enacted, and discussed in various literary and philosophical writings from the ancient world to the present, to include various Biblical texts, Sophocles's Antigone, Aeschylus's Oresteia, Plato's Apology, Shakespeare's The Merchant of Venice, Melville's Billy Budd, Toni Morrison's Beloved, among many others.

Term:
Occasional

PHIL-510 Independent Study

Prerequisites:
Prerequisite: PHIL 210 and 211 and consent of instructor.
PHIL-513 Internship in Applied Ethics

Prerequisites:
Prerequisite: PHIL 119 or 123 or 127 and consent of instructor

Credits:
4.00

Description:
Students in this course will serve as interns in a department-approved position with a service provider, professional organization, government agency, or non-governmental organization whose work is relevant to issues in applied ethics. A faculty mentor will meet with students regularly to develop individually designed programs of readings and to discuss this material and its relation to the internship experience. In addition to the substantial time commitment to the internship, course requirements will usually include a journal and a research project. PHIL 119 or 123 or 127 and consent of instructor. 1 term - 4 credits. Normally offered every year.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

PHIL-514 Advanced Topics in Philosophy

Prerequisites:
Prerequisite: PHIL 210 or PHIL 211 and consent of instructor.

Credits: 4.00

Description:

Students with sufficient background in philosophy and a special interest in areas of philosophy which cannot be covered in regularly offered courses will be guided by senior members of the Department. Students working on Honors in Philosophy must take this course in the first semester of their senior year to prepare a thesis proposal. PHIL 210 or PHIL 211 and consent of instructor. 1 term - 4 credits. Normally offered every year.

Term:

Offered Fall Term

- PHIL-515 Senior Symposium

Prerequisites:

Prerequisite: PHIL 210 and 211 and consent of instructor.

Credits: 4.00

Description:

This is a required course for all students in the major, to be taken in the Spring Semester of their senior year. Students will prepare a portfolio of their previous coursework, collaborate with the faculty symposium leader on a selection of texts to read in common with other seniors, and prepare one paper for delivery at the Senior Symposium, usually held in late April. Students seeking Honors in Philosophy must take this course to complete the senior thesis. PHIL 210 and 211 and consent of instructor. 1 term - 4 credits. Normally offered Spring Semester every year.

Term:

Offered Spring Term

- PHIL-HE123 Service Learning Component

Credits:
Description:
Service Learning Component

Type:
Expanded Classroom Requirement

- **PHYS-111 College Physics I**
  
  Prerequisites:
  
  Take MATH-121 or MATH-134 or permission of Physics department chair; PHYS L111 taken concurrently

  Credits:
  3.00

  Description:
  Introduction to the fundamental principles of physics. Study of vectors, Newton's laws, rotations, rigid body statics and dynamics, simple harmonic motion, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.

  Term:
  Offered Fall Term

  Type:
  NATURAL SCIENCE FOR BA, BFA & BSJ, NATURAL SCIENCE FOR BS

- **PHYS-L111 College Physics Lab I**
  
  Prerequisites:
  PHYS 111 concurrently

  Credits:
Description:
Introduction to the fundamental principles of physics. Study of vectors, Newton's laws, rotations, rigid body statics and dynamics, simple harmonic motion, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks and formal reports required.

Term:
Offered Fall Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- **PHYS-112 College Physics II**

  Prerequisites:
  PHYS 111 and Concurrently with PHYS L112

  Credits:
  3.00

  Description:
  Continuation of the fundamental principles of physics. Study of electric forces and fields, electric potential, DC circuits, electromagnetic induction, magnetic fields, AC circuits, introduction to optics, introduction to atomic, nuclear and particle physics.

  Term:
  Offered Spring Term

  Type:
  NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- **PHYS-L112 College Physics Lab II**
Prerequisites:

PHYS 111 and PHYS L111; PHYS 112 must be taken concurrently

Credits:

1.00

Description:

Continuation of the fundamental principles of physics. Study of electric forces and fields, electric potential, DC circuits, electromagnetic induction, magnetic fields, AC circuits, introduction to optics, introduction to atomic, nuclear and particle physics. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

Term:

Offered Spring Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **PHYS-151 University Physics I**

Prerequisites:

Take MATH-121 or MATH 165. PHYS L151 concurrently

Credits:

3.00

Description:

Introduction to the fundamental principles of physics using calculus. The course includes the study of vectors, Newton's laws, rotations, rigid body statics and dynamics, simple harmonic motion, heat and temperature.

Term:

Offered Both Fall and Spring

Type:
• PHYS-L151 University Physics Lab I

Prerequisites:
PHYS 151 concurrently

Credits:
1.00

Description:
The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton's laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

Term:
Offered Both Fall and Spring

Type:

• PHYS-152 University Physics II

Prerequisites:
PHYS 151, PHYS L152 concurrently

Credits:
3.00

Description:
This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss' law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday's law and AC circuits are discussed. This is followed by Maxwell's equations, electromagnetic waves, and properties of light.
• PHYS-L152 University Physics Lab II

Prerequisites:
PHYS 151 and L151 and PHYS 152 must be taken concurrently

Credits:
1.00

Description:
The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday's law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

Term:
Offered Both Fall and Spring

Type:
NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

• PHYS-153 University Physics III

Prerequisites:
Take MATH-121 or MATH-165;

Credits:
4.00
This calculus-based course is the introduction of the topics of modern physics. It begins with special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom. Then Schrodinger's equation is introduced with use of wave functions, particle box, barrier penetration, quantum mechanical tunneling, the Pauli Exclusion principle, the development of the periodic table, and the X-ray spectra. Development of solid state physics with bonding in molecules, band theory of solids and semiconductor behavior. The final topics cover nuclear physics, radioactivity, half-life, nuclear fission and fusion, medical uses of radiation, elementary particle physics and introduction to astrophysics.

Term:
Offered Fall Term

- **PHYS-205 Introduction to Astrophysics**

  **Prerequisites:**
  
  Prerequisite: PHYS 151-152
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  An introduction to the concepts and methods of astrophysics; including a history of astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors, space programs, science and technology in society. Astronomy of the cosmos; sun, stars, interstellar materials, galaxies, pulsars, quasars, black holes; nature of time relativity, cosmology.
  
  Term:
  
  Offered Fall Term

- **PHYS-206 Introduction to Radiation Oncology**

  **Prerequisites:**
  
  Radiation Therapy (Major or Certificate) or Medical Dosimetry Students Only
This course will serve an introduction to the role of the radiation therapist and medical dosimetrist in a Radiation Oncology department. Through a combination of detailed lectures, discussions, role-playing, case studies, and hands-on laboratory exercises, students will be introduced to the professional and clinical aspects of their respective professions. Additional topics included radiation safety, patients rights, infection control, communication for the clinic, patient assessment, and psychosocial aspects of cancer including death and dying.

Term:

Offered Fall Term

- **PHYS-215 Nanomaterials and the Energy Problem**

  **Prerequisites:**
  
  CHEM 111-112 or PHYS 111-112 Or Permission of Instructor
  
  **Credits:**
  
  4.00

  **Description:**
  
  This course is designed as an introduction to nanotechnology and some of its important uses. It is aimed at science majors who have taken basic courses in physics or chemistry. The course will cover the properties and uses of carbon-nanotubes, nanocomposites, and other nanomaterials that are being fabricated in labs and industries around the world. It will serve as an introduction to the important role of nanomaterials in solving modern-day energy problems.

  **Term:**
  
  Occasional

- **PHYS-301 Clinical Radiation I**

  **Prerequisites:**
  
  BIO 204 and MS 200
Through a systems-based approach, this course will review anatomy and physiology while teaching medical terminology. This course will also discuss the major cancers associated with each anatomical system and introduce the student to radiation therapy treatment techniques and procedures.

**Term:**

Offered Spring Term

**PHYS-L301 Radiation Therapy Rotation I**

**Prerequisites:**

MS 301 concurrently

**Credits:**

3.00

**Description:**

Provides the necessary clinical experience to become a radiation therapist. All labs are conducted at our clinical affiliates. Under the supervision of licensed radiation therapists, the students will become increasingly proficient in the manipulation of treatment equipment, will gain a thorough understanding of radiation treatment plans, will deliver a prescribed radiation dose to cancer patients, and will acquire knowledge of all relevant aspects of patient care. These labs are available only to students enrolled in the clinical track.

**Term:**

Offered Spring Term

**PHYS-302 Clinical Radiation II**

**Prerequisites:**

Radiation Therapy (Major or Certificate) or Medical Dosimetry Students Only

**Credits:**

1.00
Description:
This course is a continuation of MS 301. Through the same didactic approach, the course will cover all of the anatomical systems and their related medical terminology NOT covered in MS 301.

Term:
Offered Fall Term

- **PHYS-L302 Radiation Therapy Rotation II**
  
  **Prerequisites:**
  
  Radiation Therapy (Major or Certificate) Students Only

  **Credits:**
  
  1.00

  **Description:**
  
  Provides the necessary clinical experience to become a radiation therapist. All labs are conducted at our clinical affiliates. Term:

Offered Spring Term

• PHYS-L304 Radiation Therapy Practicum

Prerequisites:
Take MS-301 MS-L301;

Credits:
1.00

Description:

Student radiation therapists will spend 12 weeks (full-time, 40 hrs/wk) gaining hands on patient care experience in the department of radiation oncology at our clinical affiliates. Under constant supervision by licensed therapists, the student will be guided toward the application of theory in the real world of cancer treatment.

Term:

Summer

Type:

Expanded Classroom Requirement

• PHYS-L311 Medical Dosimetry Rotation I

Prerequisites:

MS-L111 and take MS-301 concurrently
Under the supervision of a Certified Medical Dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Two 8-hour days per week, TTH.

Term:
Offered Spring Term

• PHYS-L312 Medical Dosimetry Rotation II

Prerequisites:
Medical Dosimetry Students Only

Credits:
1.00

Description:
Under the supervision of a certified medical dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Three 8-hour days per week, MWF.

Term:
Offered Fall Term

• PHYS-L313 Medical Dosimetry Rotation III

Prerequisites:
MS-L312 and MS-303 concurrently

Credits:
1.00
Under the supervision of a Certified Medical Dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Three, 8-hour days per week, MWF.

Term:
Offered Spring Term

- **PHYS-L314 Medical Practicum for Dosimetry**

  **Prerequisites:**
  Take MS-301 and MS-L311;

  **Credits:**
  1.00

  **Description:**
  Student dosimetrists will spend 12 weeks (full-time, 40 hrs/wk) gaining hands on treatment planning experience in the department of radiation oncology at our clinical affiliates. Under constant supervision of certified medical dosimetrists, the student will be guided toward the application of theory in the real world of cancer treatment planning.

  **Term:**
  Summer

  **Type:**
  Expanded Classroom Requirement

- **PHYS-315 Radiation Physics I**

  **Prerequisites:**
  PHYS L315 concurrently; Radiation Biology, Radiation Science, Radiation Therapy (Major or Certificate), or Medical Dosimetry Students Only

  **Credits:**
Description:

Content is designed to establish a thorough knowledge of the radiation physics used in radiation therapy treatments. Topics to be covered in this course include a review of basic physics (energy, mass, matter, SI units), structure of matter, types of radiations, nuclear transformations, radioactive decay, the fundamentals of x-ray generators and x-ray production, interactions of x and gamma rays with matter, absorbed dose, measurements of dose, principles of and practical use of ionization chambers and electrometers, Geiger counters and other survey meters, principles and practical use of TLDs, film, calorimetry, scintillation detectors, radiation protection and quality assurance.

Term:

Offered Fall Term

- **PHYS-L315 Radiation Physics I Lab**

  Prerequisites:

  PHYS 315 concurrently

  Credits:

  1.00

  Description:

  This lab will cover a broad range of experiments associated with the Department of Radiation Oncology at Massachusetts General Hospital. Topics include: Quality assurance measurements for radiation therapy, calibration of radiation teletherapy unit using ionization chambers, measurements of dose distribution via film, measurements of dose in a phantom via TLDs, radiation protection survey of therapy installation and brachytherapy sources, and radiation biology.

  Term:

  Offered Fall Term

  Type:

  Expanded Classroom Requirement

- **PHYS-317 Radiation Physics II**
Prerequisites:
MS 315

Credits:
4.00

Description:
This course is intended to expand on the concepts and theories presented in Radiation Physics I. It will provide a detailed analysis of the treatment units used in external beam radiation therapy, their beam geometry, basic dose calculations and dose distributions. This course will also cover the principles, theories, and uses of brachytherapy. This course was previously MS 412

Term:
Offered Spring Term

- PHYS-333 Math Methods of Physics

Prerequisites:
Take ECE-225 and ECE-L225;

Credits:
4.00

Description:
Applications of specific mathematical methods to problems in physics. Topics include complex analysis, integral transforms, eigenvalue problems, partial differential equations and group theory. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

Term:
Offered Fall Term
• **PHYS-361 Classical Mechanics I**

  **Prerequisites:**
  
  PHYS 152 ; MATH 265 which may be taken concurrently

  **Credits:**
  
  4.00

  **Description:**
  
  Newton's laws of motion, projectiles, momentum, energy, conservation laws, oscillations, Lagrange equations, generalized momenta, central forces, orbits. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

  **Term:**
  
  Offered Fall Term

• **PHYS-362 Classical Mechanics II**

  **Prerequisites:**
  
  PHYS 361

  **Credits:**
  
  4.00

  **Description:**
  
  Mechanics in non-inertial frames, rotational motion of rigid bodies, coupled oscillations, nonlinear mechanics and chaos, Hamiltonian mechanics, collision theory, continuum mechanics. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).
Term:  
Offered Spring Term

- **PHYS-367 Observational Astronomy**
  
  **Prerequisites:**
  
  Prerequisite: PHYS 361-362
  
  **Credits:**
  
  2.00
  
  **Description:**
  

Term:

Summer

- **PHYS-L381 Laboratory Research Assistantship III**
  
  **Prerequisites:**
  
  Permission of Dept. Chair Required
  
  **Credits:**
  
  1.00-2.00
  
  **Description:**
  
  This is a laboratory based research experience which involves teams of students assisting faculty in Physics/Astronomy research projects. Students will participate in an intensive laboratory training period in the Canary Islands and will follow through with research work in consultation with faculty based in the Madrid and Boston campuses. A final paper and presentation is required. Permission of department chair is required for registration and determination of course credits.
• PHYS-411 Physics Senior Project

Prerequisites:
Senior Standing

Credits:
4.00

Description:
The senior project is the capstone research experience of the undergraduate Physics Major. This one semester course requires students to work one on one with faculty in an area of mutually agreed upon research. In general, the effort will involve the use of mathematical and programming skills, laboratory techniques, and possibly field work. The end result will be both a paper and a formal presentation to both faculty and students.

Term:
Offered Spring Term

• PHYS-415 Dosimetry I

Prerequisites:
MS 315; MSL415 concurrently

Credits:
3.00

Description:
This course will discuss the factors that influence treatment planning and govern the clinical aspects of patient treatment. Topics to be covered include treatment planning with 3-D CT and MRI beams, isodose plan descriptions, clinical applications of treatment beams and advanced dosimetric calculations. This course will also contrast new emerging technologies with conventional radiation therapy techniques (SRT, SRS, IMRT, Image Guided Therapy, Respiratory Gating).

Term:
Offered Spring Term
• PHYS-L415 Dosimetry I Lab

Prerequisites:

MS 315, MS L315, MS 415 concurrently

Credits:

1.00

Description:

This lab will provide the student with the opportunity to apply clinical dosimetry principles and theories learned in the classroom to actual treatment planning situations within the clinic. Through hands-on lab exercises the student will demonstrate the use of the treatment planning instruments and interpret information they compute.

Term:

Offered Spring Term

• PHYS-416 Radiation Biology

Prerequisites:

Take BIO 403, MS 315 and MS L315.

Credits:

4.00

Description:

Topics covered include: physio-chemical aspects of energy absorption, the sequence of events after irradiation occurring on the molecular, cellular and organized tissue levels, radiation response and repair of eukaryotic cells, effects of radiation quality, dose rate, environmental conditions, cell cycle kinetics, tumor and normal cell population dynamics, radiation-induced carcinogenesis and mutagenesis, tumor pathophysiology and radiobiology, and recent advances in experimental radiation oncology.

Term:

Offered Spring Term
PHYS-417 Dosimetry II

Prerequisites:
Medical Dosimetry Students Only

Credits:
4.00

Description:
This course is a continuation of Clinical Dosimetry I and will focus on advanced treatment planning techniques including intensity modulated radiation therapy (IMRT), arc therapy, stereotactic treatment planning, and proton therapy. The advantages of each technique/modality over conventional 3D-treatment planning will be discussed. This will also be contrasted against the specific challenges presented by each technique such as the need for better immobilization, need for 4D CT scanning and daily IGRT (kV matching and/or CBCT).

Term:
Offered Fall Term

PHYS-420 Radiation Oncology & Pathology

Prerequisites:
Radiation Therapy (Major or Certificate) or Medical Dosimetry Students Only

Credits:
4.00

Description:
This course, taught by Massachusetts General Hospital physicians will review cancer epidemiology, etiology, detection, diagnosis and prevention, lymphatic drainage, and treatment. The pathology(s) of each cancer will be presented in detail including the rationale for each preferred modality of treatment.

Term:
Offered Fall Term
• PHYS-422 Radiology

Prerequisites:
Radiation Therapy (Major or Certificate) or Medical Dosimetry Students Only

Credits:
4.00

Description:
This course will begin with an introduction to radiology, reviewing x-ray production and discussing basic radiation physics, image formation (Kv, mA) and distortion (blur, magnification), conventional processing and digital imaging. The above-mentioned radiographic imaging concepts will be presented with conventional lectures as well as with several imaging laboratories. In addition, the basic principles of each imaging modality, including mammography, CT, MRI, Nuc Med, and Ultra Sound, will be presented. With the use of departmental tours and guest lecturers, the use, benefits and limitations of each will be discussed. Building upon the information previously presented, radiographic anatomy will also be covered with an emphasis on cross-sectional anatomy. Students will review basic anatomy viewed in sectional planes (axial/transverse) of the body. Using CT and MRI images, the topographic relationship between internal organs and surface anatomy will be interpreted and discussed.

Term:
Offered Fall Term

• PHYS-431 Astrophysics Senior Project

Credits:
4.00

Description:
The senior project is the capstone research experience of the undergraduate Astrophysics major. This one-semester course requires students to work one-on-one with faculty in an area of mutually agreed upon research. In general, the effort will involve use of mathematical and programming skills.

Term:
Offered Spring Term

• PHYS-435 Brachytherapy
Prerequisites:
Medical Dosimetry Students Only

Credits:
4.00

Description:

Topics in this course will include, radioactive sources, calibration, instrumentation, factors affecting dose calculations, definitions of LDR, MDR and HDR, treatment planning and clinical dose calculation, implantation techniques, implant localization/verification, regulations, radiation safety, storage and QA. Detailed coverage of prostate brachytherapy including LDR and HDR will be emphasized.

Term:
Offered Spring Term

- PHYS-450 Dosimetry Systems and Networking

Credits:
4.00

Description:

This course is designed for the medical dosimetry student, to include a general overview of computer systems and networking in the field of radiation oncology. A historical view of computers will be covered as well as the intricate uses in the medical field today. Oncology information systems such as MOSAIC and ARIA, as well as radiation therapy software used for imaging, contouring, treatment planning, and patient charting applications will be covered. Data and system security will also be addressed.

Term:
Offered Spring Term

- PHYS-453 Modern Physics

Prerequisites:
PHYS-153;
Topics include atoms and elementary particles, atomic, molecular and nuclear systems. Quantum states and probability amplitude, wave mechanics and thermal properties of matter. Atomic spectra and structure, and molecular systems. Nuclear reactions, alpha and beta decay and high energy physics. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

Term:

Offered Fall Term

• PHYS-L455 Advanced Laboratory

Prerequisites:

PHYS 451 and PHYS 452 or equivalent.

Credits:

2.00

Description:

Classical and modern experiments in physics; Experiments may include Frank Hertz experiment, Hall effect, nuclear magnetic resonance, quantum dots, detection of muons, x-ray spectroscopy, ellipsometry, physics of timbre of musical instruments, data acquisition.

Term:

Offered Fall Term

• PHYS-456 Advanced Radiation Treatment Techniques

Prerequisites:
For the senior radiation therapy student, this course will emphasize advanced radiation treatment techniques, including patient simulation, immobilization, contouring, beam modification, as well as special procedures.

- **PHYS-461 Quantum Mechanics I**

  **Prerequisites:**
  
  PHYS 361 and PHYS 362.

  **Credits:**

  4.00

  **Description:**

  Non-relativistic study of particle systems, wave mechanical treatment, development of the concepts of observables, state vectors, operators and matrix representations. Hilbert space, angular momenta, coupling, symmetries, scattering, and perturbation theory. Harmonic oscillator and Hydrogen atom. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once a week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

  **Term:**

  Offered Fall Term

- **PHYS-462 Quantum Mechanics II**

  **Prerequisites:**

  PHYS 461, PHYS 361 and PHYS 362.

Offered Fall Term

PHYS-475 Senior Seminar for RT & MD

Prerequisites:
Senior status

Credits:
4.00

Description:
This course will be available to senior students enrolled in the Radiation Therapy and Medical Dosimetry programs. This seminar style course will serve a number of purposes; one will be to prepare our graduating students for board certification in their respective disciplines (AART for Radiation Therapy and MDCB for Medical Dosimetry). Exam preparation will include the use of lectures, student teaching, online teaching tools, mini mock exams, and a full-length mock exam. The seminar will also assist students with the preparation of their professional resumes including discussions regarding the skills necessary to make job interviews successful.

- **PHYS-476 Senior Seminar for Medical Dosimetry**

  Prerequisites:
  
  Senior Status

  Credits:
  
  4.00

  Description:

  This course will be available to second year clinical students enrolled in the Medical Dosimetry program. This seminar style course will serve a number of purposes; one will be to prepare our graduating students for board certification in MDCB for Medical Dosimetry. Exam preparation will include the use of lectures, online teaching tools, mini mock exams, and a full-length mock exam. The seminar will also assist students with the preparation of their professional resumes including discussions regarding the skills necessary to make job interviews successful.

- **PHYS-477 Electricity and Magnetism**

  Prerequisites:

  PHYS-362

  Credits:

  4.00

  Description:

  Electrostatic field energy, methods for solution of boundary value problems. The magnetostatic field and magnetic circuits. Electromagnetic field energy, plane waves, wave guides and cavity resonators. Interaction of charge particles with electromagnetic fields. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special
arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

Term:
Offered Fall Term

- **PHYS-510 Independent Study**

  Credits:
  4.00

  Description:
  Directed reading, lectures, seminar and research in selected areas of special interest.

  Term:
  Occasional

- **PSYCH-106 Human Sexuality**

  Credits:
  4.00

  Description:
  This course number has been changed. Please see PSYCH-222 for the most recent description. Examines the field of human sexuality across the life span. Topics include: sexual anatomy and physiology, sexual development, typical and atypical sexual behavior, sexual dysfunctions, current research on human sexuality, and relationship issues as they relate to sexuality and intimacy.

  Type:
  Social Science

- **PSYCH-114 General Psychology**
Surveys core theoretical concepts and contemporary empirical research from the major sub-fields of psychology: physiology; perception; cognition; learning; emotion; motivation; development; personality; psychopathology; psychotherapy; and social behavior. Required for psychology majors. Offered every semester.

Term:
Offered Both Fall and Spring

Type:
Social Science

- **PSYCH-215 Behavioral Statistics**

  Prerequisites:
  
  PSYCH 114; Restricted to majors only unless with permission of instructor.

  Credits:
  
  4.00

  Description:
  
  Introduces the use of statistics as tools for description and decision-making, including hypothesis testing. Prepares students for the analysis, interpretation, and evaluation of psychological research. Required for psychology majors; should be taken before the junior year. Offered every semester.

  Term:
  
  Offered Both Fall and Spring

  Type:
  
  Quantitative Reasoning
• PSYCH-216 Research Methods and Design

Prerequisites:
PSYCH 114 and PSYCH 215

Credits:
4.00

Description:
First provides an overview of the historical background and conceptual foundation of psychology as a science before introducing students to research methods employed in psychology including naturalistic observation, qualitative, correlational, quasi-experimental, and experimental designs. The experimental method and principles of experimental design are emphasized. The laboratory component of the class helps familiarize students with practical issues that arise when implementing an empirical research study. Required for psychology majors; should be taken before the junior year. Offered every semester.

Term:
Offered Both Fall and Spring

Type:
Social Science

• PSYCH-222 Human Sexuality

Credits:
4.00

Description:
Examines the field of human sexuality across the life span. Topics include: sexual anatomy and physiology, sexual development, typical and atypical sexual behavior, sexual dysfunctions, current research on human sexuality, and relationship issues as they relate to sexuality and intimacy. Normally offered yearly.

Term:
Offered Both Fall and Spring
• **PSYCH-226 Theories of Personality**

  **Prerequisites:**
  PSYCH 114

  **Credits:**
  4.00

  **Description:**
  Surveys the major theoretical approaches to personality including representative theorists from the psychoanalytic, trait, cognitive, behavioral, and humanistic perspectives. Topics include personality dynamics, personality development, and the study of individual differences. Normally offered yearly.

  **Term:**
  Offered Fall Term

• **PSYCH-233 Child Development**

  **Prerequisites:**
  PSYCH 114

  **Credits:**
  4.00

  **Description:**

Examines physical, cognitive, emotional, and social development in youth (i.e., from conception through adolescence). Surveys major developmental approaches including biological, learning, and contextual/environmental theories. Major focus is on normal development. Normally offered every semester.

Term:
Offered Both Fall and Spring

Type:
Social Science

- **PSYCH-236 Psychology of the Family**

  Credits:
  4.00

  Description:
  Focuses on the various forms and structures of families and family life over time and across cultures, with emphasis on the psychological impact of such forms. The complex relationship among individual psychology, family relationships, and the larger social context is addressed. Topics include marriage, parenting, and divorce. Normally offered every semester.

  Term:
  Offered Both Fall and Spring

  Type:
  Social Science

- **PSYCH-241 Social Psychology**

  Prerequisites:
  PSYCH 114

  Credits:
  4.00
Description:

Studies the social determinants of the behavior of individuals in relation to groups and surveys current research findings in such major content areas as attribution, prejudice, conformity, obedience, social cognition, interpersonal attraction, altruism, and aggression. Normally offered every semester.

Term:

Offered Both Fall and Spring

Type:

Social Science

• **PSYCH-243 Organizational Psychology**

  Prerequisites:

  Take PSYCH-114;

  Credits:

  4.00

  Description:

  Focuses on diversity concerns in various aspects of the psychology of the workforce. This includes job analysis, recruitment, selection, evaluation, training, retention, and termination. Employee morale, well-being, stress, and hardiness are considered.

  Type:

  Cultural Diversity Opt A, Social Science

• **PSYCH-245 Consumer Psychology**

  Credits:

  4.00

  Description:
Investigates the perceptual and motivational bases of consumer decision making in relation to advertising, packaging, brand loyalty, and other marketing considerations. Prior familiarity with psychological principles helpful but not essential. Normally offered alternate years.

Term:
Offered Fall Term

Type:
Social Science

- PSYCH-247 Asian Perspectives on Health and Work

Credits:
4.00

Description:
Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants. Students critically analyze similarities and differences between Asian and Western psychological perspectives of health and work through didactic and experiential learning components. This course fulfills the Cultural Diversity Requirement and may fulfill the Expanded Classroom Requirement. Normally offered alternate years.

Term:
Offered Spring Term

Type:
Social Science, Asian Studies, Cultural Diversity Opt A

- PSYCH-311 Sensation & Perception

Prerequisites:
PSYCH 114, PSYCH 215, PSYCH 216; Sophomore Standing.

Credits:
4.00

Description:

Examines the process of understanding the immediate environment with particular emphasis on the visual system. Topics include: the neurophysiology of the sensory systems; the elements of psychophysics; visual perception (color, depth, motion, illusions); and the process of perceptual inference. Normally offered yearly.

Term:

Offered Spring Term

Type:

Social Science

• **PSYCH-312 Cognitive Neuroscience**

  Prerequisites:

  PSYCH 114, PSYCH 215, PSYCH 216 and sophomore standing.

  Credits:

  4.00

  Description:

  Examines theory and research on a number of human cognitive processes, including topics of attention, perception, learning, memory, language processing, problem solving, and reasoning. The field of cognition integrates knowledge from the multiple disciplines of neuropsychology, neuroscience, linguistics, and information science. Normally offered yearly.

  Term:

  Offered Fall Term

  Type:

  Social Science

• **PSYCH-313 Physiological Psychology**
Prerequisites:

PSYCH 114, PSYCH 215 and PSYCH 216.

Credits:

4.00

Description:

Explores the organic basis for human and animal behavior. Topics include nervous system structure and function as well as neurological contributions to motivation, emotion, stress, and abnormal functioning. Normally offered yearly.

Term:

Offered Fall Term

Type:

Social Science

• PSYCH-314 Learning & Reinforcement

Prerequisites:

PSYCH 114 and Sophomore standing

Credits:

4.00

Description:

Considers the process of the storage of information including its affective coloration and the role of incentives and rewards. Topics include: principles of classical and operant conditioning; verbal and episodic learning; and traditional and contemporary theory. Normally offered alternate years.

Term:

Offered Fall Term

Type:
• **PSYCH-315 Neuropsychological Syndromes**

Prerequisites:

Take PSYCH-215 PSYCH-216;

Credits:

4.00

Description:

Provides students with a neuropsychological perspective on common neuropsychological disorders, including attention-deficit hyperactivity disorder (ADHD), learning disabilities, autistic spectrum disorders, seizure disorders, traumatic brain injury (TBI), multiple sclerosis, HIV, and various dementias. Normal aging will also be considered.

Term:

Offered Fall Term

Type:

Social Science

• **PSYCH-317 Psychology of Addictions**

Prerequisites:

PSYCH 114 and Sophomore standing

Credits:

4.00

Description:

Examines patterns of addictive behavior with an emphasis on physiological etiology. Social, historical, and other psychological perspectives are also discussed. Populations at high risk, the consequences of addiction, and research on interventions and treatment will also be addressed. Normally offered yearly.
- **PSYCH-321 Introduction to Counseling Skills**

  **Prerequisites:**
  PSYCH 114 and Sophomore standing

  **Credits:**
  4.00

  **Description:**
  Explores and examines basic models of helping and provides supervised practice of helping skills. Format includes lecture, discussion, role play, and video feedback. Normally offered yearly.

- **PSYCH-324 Psychology of Identity and the Self**

  **Prerequisites:**
  PSYCH 114 and Sophomore Standing.

  **Credits:**
  4.00
Description:
Focuses on the processes by which self-knowledge, self-awareness, self-conceptions, self-esteem, self-consciousness, and self-blame are developed and maintained. May also include consideration of: identity and the life story; biography, narrative, and lives; cognition and personality; cultural conceptions of self; and self psychology. Normally offered alternate years.

Term:
Offered Spring Term

Type:
Social Science

- **PSYCH-326 Abnormal Psychology**
  
  Prerequisites:
  
  PSYCH 114, and Sophomore standing or permission of the instructor
  
  Credits:
  
  4.00
  
  Description:
  
  Introduces the concepts of psychological disorder and focuses on description and etiology of various mental health problems from a variety of different theoretical perspectives. Students develop familiarity with the DSM classification system and major disorders described within it, including topics such as mood and anxiety disorders, thought disorders, personality disorders. Normally offered yearly.

  Term:
  
  Offered Both Fall and Spring

  Type:
  
  Social Science

- **PSYCH-333 Adult Development & Aging**
  
  Prerequisites:
PSYCH 114 and Sophomore Standing.

Credits:
4.00

Description:

Surveys theory and research about the physical, mental, and psychological aspects of life-span development. Age-related changes in mental health, personality, self-image, sexual relations, friendships, career development and spirituality are explored. Aging may also be explored as a global, demographic and cross-cultural issue. Research surrounding death and dying, bereavement, and hospice/nursing home care is also presented. Normally offered alternate years.

Term:

Offered Both Fall and Spring

Type:

Social Science

• PSYCH-334 Adolescent Development

Prerequisites:

PSYCH-114 and sophomore standing

Credits:
4.00

Description:

Examines the physical, cognitive, emotional and social aspects of adolescence. Attention is given to identity, parent-adolescent relationships, values, sexuality, and career development as well as psychopathology, drug use and abuse, delinquency, and alienation. Normally offered yearly.

Term:

Offered Fall Term

Type:
• PSYCH-336 Developmental Psychopathology

Prerequisites:

PSYCH 114 and sophomore standing

Credits:

4.00

Description:

Examines the etiology and symptoms of disorders of childhood and adolescence, as well as current therapeutic approaches. Developmental changes in the incidence of externalizing disorders, such as conduct disorder and attention deficit disorder, and internalizing disorders, such as depression and eating disorders, are addressed. Disorders that affect both behavioral and mental functioning such as Fetal Alcohol Syndrome and autism may also be included. The role of development in the understanding and treatment of the childhood disorders is reviewed. Normally offered yearly.

Term:

Offered Fall Term

Type:

Social Science

• PSYCH-341 Sociocultural Perspectives

Prerequisites:

PSYCH 114

Credits:

4.00

Description:

Exposes students, particularly those interested in helping and service careers, to the terminology and approaches used in the study and critical discussion of culture and diversity. This course will be useful for students seeking to develop sensitivity, respect, and understanding of the meaning
that individuals attach to their own definitions of culture. While topics relevant to specific, ethnic, racial, gendered and differently abled groups will be covered to varying degrees in each semester, attention is also given to culture as a personal and societal construction. Normally offered alternate years. This course fulfills the Cultural Diversity Requirement.

Term:

Offered Spring Term

Type:

Cultural Diversity Opt A, Social Science

**PSYCH-345 Teambuilding in Global and Diverse Workplaces**

Prerequisites:

PSYCH 114 and sophomore standing

Credits:

4.00

Description:

Examines effective approaches to building and maintaining successful teams in today's global and diverse workplace. Relevant theories and research concerning the cultural, organizational and individual factors that impact the structure, function and interpersonal dynamics of teams across settings are discussed. Topics include team characteristics, communication, leadership style, emotional and social intelligence, conflict and negotiation strategies, and challenges of working with multicultural, diverse and global team members and effectiveness of virtual teams. Students will explore essential components of functional versus dysfunctional teams, role of individual and cultural diversity, interpersonal relationship dynamics, globalization, and effective team work strategies across business, community and social organizational settings. Normally offered alternate years. This course fulfills the Cultural Diversity Requirement.

Term:

Offered Fall Term

Type:

Social Science, Cultural Diversity Opt A

**PSYCH-346 Community Psychology**
Prerequisites:
JR Standing; Majors only or instructor's consent; ECR

Credits:
4.00

Description:
Explores the efforts of psychologists to enhance the well-being of groups and communities. Complementing clinical approaches, community approaches have implications for both theory (e.g., environmental and/or person-environment theories) and practice (e.g., prevention-oriented paradigms targeted to groups and social systems). Students will be expected to attend weekly two-hour lectures to examine key concepts within the field (e.g., competence building, empowerment) as well as to engage in weekly community service activity. Normally offered every semester. This course fulfills the Expanded Classroom Requirement.

Term:
Offered Both Fall and Spring

Type:
Social Science, Expanded Classroom Requirement

- PSYCH-347 Cyberpsychology
  Prerequisites:
  PSYCH 114 and Soph standing.
  
  Credits:
  4.00
  
  Description:
  Examines the role of cybertechnology, such as web Internet use, and its psychosocial correlates across gender, age, and culture. The course focuses on the complex and multidimensional approaches to the study of behavioral informatics. Explores theoretical and empirical research issues concerning the psychological, organizational, and cultural factors that impact online behavior both at home and in the workplace. Use of the Internet/web in mental health service areas will also be addressed. Normally offered alternate years.

Term:
• PSYCH-350 Psychology Internship

Prerequisites:
Junior Standing. Restricted to majors only unless permission of instructor. This course fulfills the Expanded Classroom Requirement

Credits:
4.00

Description:
Focuses on interacting with others in a service environment in a professional role. Seminar emphasizes tools for interacting with recipients in a respectful manner, emphasizing strengths and resources of the recipient, and sensitivity to various kinds of diversity in the service setting. Students work in service settings for a minimum of 6-8 hours per week during the semester, with most of that time in direct contact with service recipients. Internship arrangements must be made before the course begins. Normally offered every semester. This course fulfills the Expanded Classroom Requirement.

Term:
Offered Both Fall and Spring

Type:
Social Science, Expanded Classroom Requirement

• PSYCH-408 Senior Seminar: History & System

Prerequisites:
PSYCH 114, PSYCH 215, PSYCH 216 and senior standing

Credits:
4.00
Description:
Presents the historical context for the development of core ideas, theoretical positions, and research in the field of Psychology. The interconnections between systematic orientations and domains of psychology are examined along with their relation to contemporary concepts and issues in the field of psychology. Offered every semester.

Term:
Offered Both Fall and Spring

Type:
Social Science

• PSYCH-422 Groups in Schools

Prerequisites:
Senior status and permission of department chair required.

Credits:
4.00

Description:
An overview of the various group counseling formats utilized in schools, and related theories. Issues related to the development and implementation of small counseling groups (e.g., group dynamics and processes for group member selection) and larger educational and prevention-based groups (e.g., fostering positive mental health, career-related programming, anti-bullying) will be explored and discussed.

• PSYCH-428 Honors Seminar

Prerequisites:
PSYCH 114, PSYCH 215 & 216; Senior standing and admission by invitation only.

Credits:
4.00

Description:
Emphasizes the reading of primary source material, critical thinking, seminar discussion, and critical writing. Examines both historical and contemporary theories in the field, along with current empirical research. Assessment and measurement issues emphasized, along with substantive writing, typically an empirical research proposal or a critical review of the theory and research in a focused domain. Admission by invitation only. Normally offered yearly.

Term:
Offered Fall Term
Type:
Social Science

- **PSYCH-510 Independent Study**

  Prerequisites:
  
  JR or SR status; Majors Only; Department chair consent.

  Credits:
  
  1.00- 4.00

  Description:
  
  Substantive reading/research in area of special interest directed by a faculty member.

  Term:
  
  Offered Both Fall and Spring

  Type:
  
  Social Science

- **RS-111 Introduction to World Religions: Western Traditions**

  Credits:
  
  4.00
This course will explore the comparative history and structure of Western religious traditions, broadly understood, and their impact on other world religions, while attempting to recognize the similarities and the differences among them. Traditions to be studied include Greek and Roman religion, the monotheistic faiths (Judaism, Christianity, and Islam, as well as Zoroastrianism, Sikhism and Bahaiism). We will also explore the impact of the Western religions on indigenous traditions, such as African religion, Native American religion, and Pacific Island religion. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. 1 term - 4 credits. Normally offered every year.

- **RS-112 Introduction to World Religions: Eastern Traditions**

  **Credits:**

  4.00

  **Description:**

  This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting to recognize the similarities and the differences among them. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. Normally offered every year. Cultural Diversity B

  **Type:**

  Cultural Diversity Opt B, Asian Studies

- **RS-301 Reason and Revelation**

  **Credits:**

  4.00

  **Description:**

  Traces the evolution of Judaism, Christianity and Islam to the High Middle Ages to explore the role of Neo-Platonism and Aristotelianism in clarifying and explaining dogma. Particular attention will be paid to ideas about the ways of knowing and rational proofs of God’s existence in Philo of Alexandria, Augustine, Anselm, Ibn Rushd (Averroes), Aquinas and Maimonides. 1 term - 4 credits. Normally offered in alternate years.
• RS-510 Independent Study
  Credits:
  1.00- 4.00
  Description:
  Students meet with a department member to pursue advanced studies in areas of particular interest to them.

• SCI-101 Intro to Physical Science I
  Prerequisites:
  One course of MATH 104,121,130,134, or 165; SCI L101 taken concurrently
  Credits:
  3.00
  Description:
  Topics in the physical sciences treated at a level appropriate for non-science majors. Newton's laws, circular motion, heat, electricity and magnetism, optics, and atomic physics are discussed with problem sets required to illustrate the concepts.
  Term:
  Offered Fall Term
  Type:
  NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• SCI-L101 Physical Science Lab I
  Prerequisites:
  SCI 101 concurrently
  Credits:
Laboratory experiments and exercises to illustrate the principles covered in Science 101. On-time attendance is mandatory for pre-lab lectures. Weekly lab write-ups completed during the lab.

Term:
Offered Fall Term

Type:
NATURAL SCIENCE FOR BA, BFA & BSJ, NATURAL SCIENCE FOR BS

- **SCI-102 Intro to Physical Science II**

  Prerequisites:
  One course of MATH 104 OR MATH 121 OR MATH 130 OR MATH 132 OR MATH 134 OR MATH 165. SCI 1102 Must be taken concurrently

  Credits:
  3.00

  Description:
  Continuation of topics in the physical sciences for nonscience majors. Nuclear physics, chemical reactions, organic compounds, latitude and longitude, study of the solar system, astronomy, and cosmology are all covered.

Term:
Offered Spring Term

Type:
NATURAL SCIENCE FOR BA, BFA & BSJ, NATURAL SCIENCE FOR BS

- **SCI-L102 Physical Science Lab II**

  Prerequisites:
SCI 102 concurrently

Credits:
1.00

Description:
Laboratory experiments and exercises to illustrate the principles covered in Science 102. On-time attendance is mandatory for pre-lab lectures. Weekly lab write-ups completed during the lab.

Term:
Offered Spring Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

SCI-103 Environmental Science

Prerequisites:
SCI-L103 must be taken concurrently

Credits:
3.00

Description:
Case study approach to the fundamentals of science applied to environmental degradation, ecosystems, geological processes, population dynamics, deforestation and biodiversity, climate change, ozone depletion, air soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment.

Term:
Offered Fall Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS
• **SCI-L103 Environmental Science Lab**

  **Prerequisites:**
  Must take SCI-103 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.

  **Term:**
  Offered Fall Term

  **Type:**
  NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• **SCI-L105 Composite Science Lab**

  **Prerequisites:**
  Permission of the department, transfer student status- 2 credits

  **Credits:**
  2.00

  **Description:**
  Combination of lecture and lab involving subject matter in the Physical Sciences (not Life Sciences). This is intended for transfer students who have received course credit in the physical sciences from another school and who still need to satisfy a two credit laboratory requirement.

  **Term:**
  Offered Both Fall and Spring
• **SCI-L106 Composite Science Lab**

  **Prerequisites:**

  Permission of the department, transfer student status- 1 credit

  **Credits:**

  1.00

  **Description:**

  Combination of lecture and lab involving subject matter in the Physical Sciences (not Life Sciences). This is intended for transfer students only who have received course credit in the physical sciences from another school and who still need to satisfy a one credit laboratory requirement.

  **Term:**

  Offered Both Fall and Spring

• **SCI-108 Introduction to Cancer Care**

  **Credits:**

  4.00

  **Description:**

  This course will introduce the students to the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be described. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants. The goals and objectives of the course will be met through the use of various teaching tools including but not limited to: PowerPoint presentations, videos, guest lectures, and a poster project with a presentation component. Cognitive assessment of the students will be accomplished through homework, quizzes, exams, and a group poster and oral presentation. Students with any type of academic background are welcome.

  **Term:**

  Offered Fall Term

  **Type:**
SCI-111 Astronomy I

Prerequisites:

MATH 104 OR MATH 121 OR MATH 130 OR MATH 134 OR MATH 165. SCI L111 must be taken concurrently.

Credits:

3.00

Description:

History of Astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors; space programs, science and technology in society. For non-science majors.

Term:

Occasional

Type:

SCI-L111 Astronomy Lab I

Prerequisites:

SCI 111 concurrently

Credits:

1.00

Description:

Laboratory experiments and exercises to illustrate the principles discussed in science 111. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations.
- **SCI-112 Astronomy II**
  
  **Prerequisites:**
  SCI L112 CONCURRENTLY

  **Credits:**
  3.00

  **Description:**
  Astronomy of the cosmos; sun, stars, interstellar materials, galaxies, pulsars, quasars, black holes; nature of time relativity, cosmology. For non-science majors.

- **SCI-L112 Astronomy Lab II**
  
  **Prerequisites:**
  SCI 112 concurrently

  **Credits:**
  1.00

  **Description:**
Laboratory experiments and exercises to illustrate the principles discussed in Science 112. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations.

Term:
Occasional

Type:
NATURAL SCIENCE FOR BA BFA & BSJ

- **SCI-123 Scientific Bases of Modern Problems**

  Prerequisites:
  
  one semester of a laboratory science, Math requirement (MATH 130 or higher) and Comp Sci req

  Credits:
  
  4.00

  Description:
  
  A seminar course that explores modern personal, social, and political problems in the world today, such as: stem cell research, genetically modified foods, cloning, exploration of outer space, hurricanes, earthquakes, artificial intelligence, environmental pollution, energy resources, or any other topic that is of current concern and that has scientific/technological components. Course activity is based on class discussion and writing on selected current readings along with outside weekly projects, culminating in a term paper project and presentation. Intended to satisfy the science requirement for the BA degree. Prerequisite: one semester of a laboratory science, mathematics requirement, computer science requirement.

  Type:
  
  NATURAL SCIENCE FOR BA BFA & BSJ

- **SCI-161 Physical Science**

  Prerequisites:
  
  One course from MATH 104 OR MATH 121 OR MATH 130 OR MATH 134 OR MATH 165 or permission of Dept. Chair. Students who have taken SCI 101/L101 or SCI 102/L102 are not eligible to take SCI 161.

  Credits:
Description:

This is a one-semester, non-lab introduction to the physical sciences. The student will obtain a good understanding of a wide variety of topics covered in selected chapters of the text (measurements, Newton's laws, energy, heat and global warming, wave motion, electricity and magnetism, atomic physics, nuclear physics, chemical reactions, and astronomy) and will be able to solve problems illustrating the most important concepts. Students who have taken SCI 101/L101 or SCI 102/L102 are not eligible to take SCI 161.

Term:

Offered Both Fall and Spring

Type:

NATURAL SCIENCE FOR BA BFA & BSJ

- SCI-171 The Built World: How Humans Engineer Environments

Credits:

4.00

Description:

The most basic needs of humans have not changed - water, food, and shelter - but the means of meeting these needs has. In this course, we will examine how technology-driven societies operate by studying how cities are built and how they function. Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design), and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.

Term:

Offered Both Fall and Spring

Type:

NATURAL SCIENCE FOR BA BFA & BSJ

Prerequisites:

**SCI L173** Must be taken concurrently Knowledge of Windows type Application

Credits:

3.00

Description:

Geographic Information Science (GIS) link information (number of fire hydrants on a block) to features on a map (e.g., a point representing street address) that has a designated geographic location (as designated by global coordinates). Unlike paper maps, GIS software allows the production of interactive maps that allows the user to layer data, to indicate spatial patterns, to analyze trends, and to combine different features of the mapped area in novel ways. For example, a business person may wish to use GIS to determine the optimum location of retail outlet (based on the mapped demographics of a neighborhood), while an environmental engineer may use GIS to determine the location of outfalls to see how they correlate to areas of stream pollution. In this course, students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

Term:

**Offered Both Fall and Spring**

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

1. **SCI-L173 GIS Lab**

Prerequisites:

Must be taken concurrently with SCI-173

Credits:

1.00

Description:

This laboratory illustrates concepts and methods taught in SCI 173. In this lab students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

Term:
**SCI-181 Science and Life in the 21st Century**

**Credits:**
4.00

**Description:**
This is a four credit, non-lab, science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.

**Term:**
Offered Both Fall and Spring

**Type:**
NATURAL SCIENCE FOR BA BFA & BSJ

---

**SCI-183 Contemporary Science and Innovation**

**Prerequisites:**
Concurrently with SCI L183

**Credits:**
3.00

**Description:**
This is a laboratory based science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.
SCI-L183 Contemporary Science and Innovation Lab

Prerequisites:
Concurrently with SCI-183

Credits:
1.00

Description:
This laboratory illustrates concepts and methods taught in SCI 183.

SCI-184 Contemporary Science and Innovation

Credits:
4.00

Description:
This is a 4 credit, project based science course that examines the central scientific problems confronting the 21st century. The course consists of lectures, class discussions, field trips, and in-class hands-on activities designed to familiarize the student with different concepts of the lectures. The
current focus is on sustainable energy production. A final team project related to the course topics will be given. This is the version of SCI 183 without a separate lab component. Students who have taken SCI 183, L183 are not allowed to take this course.

Term:
Offered Both Fall and Spring

Type:
NATURAL SCIENCE FOR BA BFA & BSJ

- **SCI-251 Intro to Coastal Geology**

  Prerequisites:
  Intro Math and must take SCI-L251 concurrently

  Credits:
  3.00

  Description:
  Coastal environments will be analyzed with an emphasis on the important environmental characteristics of these areas. Management and environmental problems within the coastal and offshore areas such as beach erosion, beach access, and oil spills will be considered. One required field trip.

  Term:
  Offered Spring Term

  Type:
  NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- **SCI-L251 Intro Coastal Geology I Lab**

  Prerequisites:
  SCI 251 must be taken concurrently
An introduction to laboratory and field techniques used in the geological study of coastal environments. Field trips will be taken to local coastal areas.

Offered Spring Term

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- SF-000 SF Place Holder
  
  Credits:
  
  0.00

  Description:
  
  Place holder for rooming purposes.

  
  Credits:
  
  4.00

  Description:
  
  Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their
water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-102 Economics and the Environment**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This seminar will establish a clear link between the environment and the macroeconomy. We will examine how environmental decisions are also economic decisions that affect output and employment, among other things. We will also establish that environmental issues are global in nature and have political and economic effects beyond our borders. Students will do a significant amount of research and writing and will engage in group discussions.

- **SF-104 Berlin and Vienna: Cradles of Modernity**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Does cultural identity come from language, history, or both? German is spoken in the capital cities of Germany and Austria, but no one would confuse a Berliner with a Viennese. We will try to find out what is behind this conundrum by studying dramas, stories, and historical texts; examining buildings and works of art; and viewing films.

- **SF-105 Voices in Conflict**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Why are conflicts so hard to resolve? How do myths about conflict affect communication? What is the role of power in conflicts? How can we use language and listening skills to engage in healthy conflict resolution? Course examines conflict within and across issues of gender, sexuality, race,
class, religion, and ethnicity. Explores attempts to negotiate meaning and power within and across socio-cultural conflicts and how this is revealed through language.

Type:
Expanded Classroom Requirement

- **SF-107 Life Lessons From the Writing of Alice Walker**
  
  **Credits:**
  4.00

  **Description:**
  This seminar will explore the poetry and prose of Alice Walker, a contemporary African American author whose writings offer rich lessons on gender, class, race, psychological development, and change. By exploring the author's works in-depth, students will gain an appreciation of the cultural and historical factors affecting individual lives. Videotaped interviews and filmed adaptations of Alice Walker's work will be woven into the curriculum. When opportunities arise, we will schedule relevant field trips and discussions to augment our understanding of the author's writings and experiences.

- **SF-109 Media Literacy**
  
  **Credits:**
  4.00

  **Description:**
  This course explores the cultural and social functions of the media with an emphasis on learning how to critically evaluate media content. Students will examine a diversity of media texts, from reality television and action films to pop music and video games. As a final project, the class will produce and edit a short documentary-style video investigating a contemporary social issue. ECR

- **SF-110 Indiana Jones and the Temple of American Law**
  
  **Credits:**
  4.00

  **Description:**
This course examines the American legal system and the legal profession from the point of view of an anthropologist. Readings will cover American legal history, the law school experience, life as a lawyer, legal theory, and even courtroom architecture as temples of justice. Seminar activities include field trips to Suffolk Law School, a Boston law firm, and courthouses. A prominent law school professor, a legal practitioner, and a judge will make guest appearances.

- SF-113 Citizens, Soldiers, and Scribes: a Literary Examination of the Civil War Era

  Credits:
  4.00

  Description:

  After years, the War Between the States continues to inspire writers in our own time. Reading works of recent fiction along with a number of relevant newspaper and magazine articles we will examine the challenges confronting those who lived through this pivotal period in our nation’s history.

- SF-115 Love, Death, & Immortality in the Ancient World

  Credits:
  4.00

  Description:

  This seminar will examine the related ideas of love, death, and immortality in a variety of readings from all over the ancient world, including Egypt, Mesopotamia, Greece, Israel, Arabia, China, Japan, Central America, and Africa. We will read and discuss some of the earliest and most profound religious, philosophical, and historical texts; epic and lyric poetry; prose fiction; and plays. We will also take at least one field trip to the ancient art galleries of the Museum of Fine Arts.

- SF-116 Enlightened Insanity

  Credits:
  4.00

  Description:

  Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality,
human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

Type:

Expanded Classroom Requirement

- **SF-120 Food: Sustainable Choice for a Healthy Planet**

  **Credits:**

  4.00

  **Description:**

  By now the general public is aware that individual food choices affect personal health. It is equally true that our food choices affect the health of the planet in numerous and complex ways. This seminar explores eating as a personal, political, and ecological act. Concerns and questions of course participants will be incorporated into the class discussions. Field trips and group meals will focus on available foodstuffs in the Boston area and their evaluation in terms of nutrition, social responsibility, environmental sustainability, and taste.

- **SF-121 The Challenge of the Cradle to Prison Pipeline**

  **Credits:**

  4.00

  **Description:**

  This course explores the process through which youth in urban areas are funneled into criminal careers and lives in prison. The focus is on the experience of young men who face the prospect of spending significant portions of their lives incarcerated. Three segments of the life-course for this population are explored - before, during, and after prison. The course is developed as a Service Learning Course, offering students opportunities to learn about and work in communities with programs that target criminogenic factors and are designed to prevent youth from ending up in prison. The community component of the course requires 15 contact hours in community service settings such as group meetings, agency hearings, courts, intervention programs, etc. The course utilizes a life story approach to learn more about individuals, families, and communities at risk. Other activities include a prison visit, reviews of programs in prison and class visits with former offenders.

- **SF-122 Family Ties: Gender, Marriage, Childhood And the History of Emotion**
Do we all feel the same feelings across cultures and throughout history, or do we learn to feel according to the rules of our own time and place or a little of both? This seminar will first examine ideas about emotional life from history, anthropology, sociology, and psychology. Then, through literature, film, and history, we will turn to our own exploration of how emotion rules have evolved for love, marriage, and bringing up children, from Jane Austen to John Updike, and into the twenty-first century.

- **SF-126 The Boston Theatre Scene: the Inside Experience**

  **Credits:**
  
  4.00

  **Description:**
  
  Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston's many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

- **SF-132 The Beatles: Here, There & Everywhere**

  **Credits:**
  
  4.00

  **Description:**
  
  This seminar will investigate the impact and legacy of the Beatles. The Fab Four deserve our scholarly attention as musical innovators and as cultural avatars of the 1960s, an era that still exerts influence today. We will examine the many ways in which the Beatles rocked the establishment and became defining figures in post-war youth culture. We will also discuss other media (the visual arts, film, fashion, style) and fields of study (mass media, marketing, recording technology, copyright law, English history) using the Beatles as our guides.

- **SF-135 Dynamics of Human Conflict Res**
This seminar looks at men and women in conflict and love by linking classical writings with current poetry, music, fiction, and nonfiction. Symbols of love, aggression, obedience, and altruism will be viewed from psychological, historical, and political perspectives.

- **SF-137 Democracy in Action: How Citizens Change The World**

  Credits:
  4.00

  Description:
  Should young people vote? Does it matter? What are other forms of political participation available to citizens and what is the citizen's responsibility to utilize these? This course takes you on a guided tour of the what, why and how of political participation: what forms of participation are there? How do citizens effect change? Does it make a difference? You will engage in a civic activity yourself and explore firsthand how participation effects the individual and the community. Each student (individually or in a team) will create and execute a civic engagement project to educate the campus and raise awareness.

- **SF-141 Modern Presidential Campaign Communications: 1952-2008**

  Credits:
  4.00

  Description:
  This seminar will focus upon presidential campaigns in the television age. We will examine the underlying important political issues, strategic use of television and advertising, debates and other media events in order to develop a better understanding of the presidential campaign process. Students in this seminar will analyze these campaigns through an examination of television footage, televised advertisements, relevant literature, guest speakers and a trip to the Kennedy Library and Museum.

- **SF-148 No Place Like Home: the American House and Cultural Identity**

  Credits:
The house as a cultural symbol permeates all aspects of our lives, from the literature we read (The House of the Seven Gables) to the television shows we watch (Extreme Home Makeover) to the magazines we flip through (O at Home). This course will examine these and other representations of home (including historic house museums in the Boston area) in our attempt to understand what meaning they hold, and why houses count for so much in America.

- **SF-149 Philosophy of Art and Beauty**
  
  **Credits:** 4.00

  **Description:**
  
  This course will examine the nature of aesthetic experience, art, beauty, and creativity. Through classical and contemporary readings the students will be introduced to philosophical issues concerning the meaning of art, artistic representation, perceptions of art, interpretation, and criticism.

- **SF-151 Getting Over It: Dealing With the Aftermath of Group Conflict/Mass Atrocity**
  
  **Credits:** 4.00

  **Description:**
  
  Once violent conflict between two groups has ended, what is the best way to transition back to normality coming to terms with the past or simply moving on? To answer these questions we will examine the debates surrounding war crime tribunals, truth commissions, lustration policies, and reparations in the second half of the 20th century. Case studies will include post-apartheid South Africa, post-WWII Germany, and the Israeli/Palestinian conflict. We will discuss the philosophical problems raised by each of these instruments, as well as on the political, legal, and practical difficulties their implementation present. Cultural Diversity B

  **Type:**
  
  Cultural Diversity Opt B

- **SF-152 Women, Gender, and the Media**
This seminar aims to empower female and male students through understanding the gendered nature of mass media. Students will acquire feminist languages to critique the media not only at the level of representations, but also the gendered political economic structure of the media, and audiences subjectivities in reading media texts. Cultural Diversity A

Type:

Cultural Diversity Opt A

- **SF-154 Music History and the Bible**

Credits:

4.00

Description:

Students will read and discuss significant Bible passages that have inspired music. We will hear and analyze different arrangements some vocal and some purely instrumental to understand how the composer interprets the text through music. Examples include the book of Genesis as set by Haydn in the oratorio The Creation and interpreted by Milhaud in the ballet La Creation du Monde.

- **SF-155 Dante's Divine Comedy**

Credits:

4.00

Description:

Dante's Divine Comedy is a journey to the three realms of the afterlife. In this seminar we will accompany him as he visits Hell, Purgatory, and Paradise in search of profound truths about himself and his world. The Divine Comedy is about love and hate, good and evil, laughter and tears, men and women, the social sciences and the humanities. Whoever you are, you can learn something from Dante's masterpiece.

- **SF-156 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life**
The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.

- SF-161 Passion, Knowledge, and the Morality of Great Minds

  Credits: 4.00

  Description:

  What motivates and inspires great minds? How do they gain and develop knowledge? How do they construct and define moral imperatives? This course will examine selected works of great minds whose lives and works continue to represent an enduring source of critical consciousness, courage, and commitment to humanity. We will review the works of Sophocles, William Shakespeare, Mahatma Gandhi, Simone Weil, and Martin Luther King, Jr., among others.

- SF-163 Fast Food and Big Tobacco: Using Law to Combat Corporate Harm

  Credits: 4.00

  Description:

  The law dictates that corporations, arguably the most influential institutions of our time, can have only one goal: to maximize profits for their shareholders. Corporations have no general legal or moral obligation to the well-being of society or individual consumers. Using film, text, and other media, we will take an eye-opening look at the food and tobacco industries to answer the following question: How can law and government be used to protect society and consumers by regulating a system programmed to ignore the welfare of everyone except shareholders?

- SF-164 The End of the World
Using materials drawn from several disciplines, this seminar examines ends (of culture, eras, and innocence) as well as scientific speculation regarding the end of the world. The course stresses writing and learning strategies, critical literacy, and academic survival skills, as well as exposure to great works and ideas.

- **SF-167 Women and Cinema in Contemporary Spain**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This seminar explores the history of women in Contemporary Spain and its representation in the country's cinema. Through a multi-disciplinary approach that examines representations of women in films from the 1960s to the present, students will not only become familiar with the most emblematic Spanish films but will also through a selection of required readings learn about the connections between cinema and Contemporary Spain's history and culture.

- **SF-168 Women in Art: Eastern and Western Perspectives and Issues of Identity**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course will survey issues of female identities and how they were 'shaped' or informed as functions of social, political and religious dynamics in the Eastern and Western hemispheres and within various historical periods. The students will 'objectify' their study with the rich and highly representative collection at the Museum of Fine Arts as they critically interpret female portrayals 'under the brush' of the male artists and the purse of the male patron. The evolution of female identities and shifting perceptions of women will also serve as a key objective in weaving a more comprehensive understanding of this phenomenon.

Expanded Classroom Requirement
SF-172 Seeking Paradise: From Modern Fantasy to the Classics

Credits:
4.00

Description:
Philip Pullman to Milton and back to C.S Lewis The course will begin with reading and discussing His Dark Materials (the trilogy that includes The Golden Compass) by Philip Pullman. Through reading this exciting but complex fantasy students will begin an examination of the ideas and narrative structures that Pullman uses to expand on and develop his sources, which among others include Paradise Lost, the poetry and paintings of William Blake and The Bible. Students will then read and examine excerpts from these sources and read about their use in His Dark Materials. The final section of the course will compare Pullman's work with that of fellow Oxford resident C.S. Lewis's Chronicles of Narnia and look at the different ways the two authors use the same source material. With both authors' works having recently been filmed and turned into video games, the opportunity is here to look at the influences of elements of the literary canon on 21st century culture. Readings will include Pullman's His Dark Materials trilogy (The Golden Compass, The Subtle Knife and The Amber Spyglass). C.S. Lewis' The Lion the Witch and the Wardrobe, and extracts from Prince Caspian and The Last Battle. Essays by Pullman and Lewis about their work and their ideas, particularly Pullman's humanistic atheism and Lewis' journey towards a personal Christianity. Extracts from Paradise Lost, William Blake and The Bible. Journal Articles and essays about Pullman and Lewis from literary critics, theologians, anthropologists and cultural critics.

SF-173 Crime in American Society

Credits:
4.00

Description:
Popular beliefs about crime are often inspired by the media and by specific criminological theories. These theories about and media images of crime will be examined in detail, including the hits and misses.

SF-174 Tragedy and Literature

Credits:
4.00

Description:
This course will focus on classic works of ancient and modern literature that examine the human condition from a tragic perspective. We will concentrate on close readings from the following texts: Homer's Iliad, Sophocles' Antigone, The Bhagavad-Gita, Shakespeare's Othello, Chekhov's short stories, and Joyce's Dubliners.

- SF-175 War and Apocalypse in Science Fiction

  Credits: 4.00

  Description:

  This seminar will examine science fiction literature, film, and television from 1940 through 1970: A time when science fiction moved from the era of pulp magazine to the large and small screens.

- SF-176 Political Marketing and Campaign Politic

  Credits: 4.00

  Description:

  This class will examine the way in which marketing techniques are used in campaign politics at the Presidential and Congressional levels. It will focus most closely on the 2008 electoral cycle but will expand outward to examine the use of such techniques in Presidential and Congressional elections from 1990 to the present. At a minimal level, students will learn about the communicative strategies employed by electoral campaigns but also about the reasons why such techniques do or do not work and the consequences of marketed politics for American democracy. In short, the ultimate goal of the class is produce savvier consumers of political information than are often presently found among American citizens.

- SF-177 Language, Culture, and Identity in Globalization

  Credits: 4.00

  Description:

  Language is a living thing. It grows and changes with each generations usage, and dies when no longer needed. Language is also a key component of cultural identity. People who share a language can communicate about issues, rituals, and ideas that are important to them, and thus can
participate in the same culture. People who do not understand the language of the culture they are living in become isolated and marginalized. Throughout history, travelers and traders have visited other cultures and learned their languages. This has allowed them to communicate, trade and prosper. Technology and rapid transportation, hallmarks of modern globalization, have provided more opportunities for people from different cultures to interact and share. Still, one complication to these interactions is language. There is a perceived need for a common language in order to facilitate improved communication, trade, and exchange of ideas. However, the promotion of a common language, increasingly English, leads to concerns about loss of native languages, cultural knowledge, and the ties that bind communities. The youth of the 21st century are in a challenging position; they must strive to be both the agents of change, and keepers of their national and cultural identity. This course provides a framework for students to examine these challenges and consider the value of bilingualism, language preservation, and global communication.

- **SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.
  
  **Type:**
  
  Cultural Diversity Opt A

- **SF-181 The Psychology of the American Teenager: Integrating Nature and**

  **Credits:**
  
  4.00
  
  **Description:**
  
  American adolescence is relatively a short-lived age period but it has a long lasting effects. What is it about American adolescence that makes it so important? To answer this question, we will examine adolescence from several different perspectives. For example, we will explore how and why the period of adolescence has grown longer over the past 100 years. We also will look at some of the unique biological and psychological aspects of adolescents. Finally, we will examine societal expectations, how adolescents function in school, their leisure activities, and some of the unique psychological problems associated with this period of life.
SF-182 Heroes, Antiheroes and Outsiders: Reading the Graphic Novel

Credits:
4.00

Description:
How is it that comics, a genre often viewed as entertainment for children and adolescents, has become one of the most exciting forms of narrative and visual art? To answer this question, this seminar will examine a range of graphic novels, from those that celebrate their origins in superhero comics, such as Alan Moore's Watchmen, to those that treat subjects not usually considered proper to the comics genre, such as Art Spiegelman's Maus, about the Holocaust, and Alison Bechdel's Fun Home, about the complexities of sexual identity. As we read these works, we will look at how the combination of words and still images makes the graphic novel a unique storytelling form, as well as how artists and writers push the envelope to create new styles and challenge our expectations. In addition to class discussions and writing assignments, we will take a field trip to the Museum of Fine Arts and create a collaborative group graphic novel step-by-step over the course of the semester (all abilities welcome).

SF-183 Politics, Power and the Media

Credits:
4.00

Description:
Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of big government, and the concept of a liberal media.

SF-184 The Natural History of the Gulf of Maine

Prerequisites:
This class includes a one week period in residence at the University's Friedman Field Station in Edmunds, Maine. The cost of room and board for the Field Station is $150/week per student, which would be borne by the students.

Credits:
4.00

Description:

This class includes a one week period in residence at the University's Friedman Field Station in Edmunds, Maine during the period just before the beginning of fall classes. This exposure would enable an in depth introduction to the marine resources of the Gulf of Maine, to the faculty and staff of the Field Station, and to each other. The cost of room and board for the Field Station is $150/week per student, which would be borne by the students.

Type:

Expanded Classroom Requirement

• SF-185 Emerson & American Renaissance

Credits:

4.00

Description:

Readings from Emerson and other American Renaissance writers, including Hawthorne, Melville, Thoreau, Whitman, Margaret Fuller, Elizabeth Cady Stanton, Frederick Douglass, William and Henry James, and Emily Dickinson, and examination of their role in shaping twentieth- and twenty-first-century American culture, American pragmatism, and European modern and postmodern philosophy, literature, and cultural criticism. This is a seminar in American cultural, intellectual, political, and socio-economic history which will examine the relationship between Ralph Waldo Emerson and other contemporary American cultural critics, as well as their relationship to the society from which they sprang and to the values of which they were, at the same time, giving enduring cultural formulation. An examination will be also be undertaken of the formative influence of Emerson and his contemporaries on their successors in American cultural production and cultural criticism, and of their enduring influence, for good or ill, on a twentieth- and twenty-first-century America that was in the process of changing profoundly - socially, economically, and ethnically - from that of Emerson's day.

• SF-188 Travel, Exile, and the Literary Imagination

Credits:

4.00

Description:

Why do we travel? What does it mean to call oneself a citizen of the world? This course explores how the adventure of travel and the displacement of exile fuel the literary imagination by uprooting the mind from its familiar ground. We will encounter the New World with European explorers
(Shakespeare's The Tempest), journey to Europe with journalists, tourists, and students (Margaret Fuller, E. M. Forster, and Woody Allen's Vicky Cristina Barcelona), map new imaginative geographies in poetry (Elizabeth Bishop), and laugh with master travel writers as they experience culture shock (Bill Bryson). Finally, we will return to Boston to see our home city through the new eyes of immigrants to the United States (Mary Antin and Jhumpa Lahiri).

• SF-189 American Gothic: Edgar Allan Poe, Flannery O'Connor and Annie Proulx

Credits: 4.00

Description:
This literature seminar will study and compare the short stories of Edgar Allan Poe, Flannery O'Connor, and Annie Proulx. Beginning with Poe as the father of the short story genre in America and exploring his critical theory of the grotesque and arabesque”, the class will examine the emergence of the gothic literary idiom as a classic American genre. Critical essays on the gothic aesthetic will be analyzed and film adaptations and documentaries will be viewed.

• SF-190 Asia in America Fiction and Fact

Credits: 4.00

Description:
Through selected readings, movies, and a field trip to Chinatown, we will study important socio-cultural events related to Asian immigrants throughout American history. This seminar will help students gain a better understanding of racial and cultural relations and appreciate the dynamics of cultural interactions in the twenty-first century.

Type:
Cultural Diversity Opt A

• SF-191 Film Adaptation Film Adaptation

Credits: 4.00
Why did they change the ending of the book? The novel is so much better! We will explore the concept and industry of film adaptation. Students will read novels and watch respective film adaptations to explore how the written word is adapted to the screen; both fiction and non-fiction works will be considered. Also, field trips to past film locations in Boston will be taken to explore why specific settings were chosen for respective situations. Additionally, students will create their own written adaptations of source materials, putting into practice the concepts studied in class.

- **SF-194 The Rebirth of Tragedy: Rock Music 1968-1972**

  **Credits:**
  
  4.00

  **Description:**

  Writhing, screaming, howling, moaning, androgynous, chemically-altered youths cavorting to pulsating music. Does this describe the Woodstock concert or an ancient Dionysian festival? Friedrich Nietzsche's book The Birth of Tragedy will provide a key for interpreting Bob Dylan, Mick Jagger, Janis Joplin, Jimi Hendrix, and Jim Morrison (and many others) in this intellectual analysis of the music of rock's golden age and the culture surrounding it.

- **SF-195 German Divisions**

  **Credits:**
  
  4.00

  **Description:**

  How unified is Germany? How German is Austria? We will examine the cultural history of a people that has produced military and musical geniuses, the Reformation and the Reich, the Autobahn and the welfare state, wind power stations, and world football (i.e., soccer) champions. Case studies from art, film, literature, and music.

- **SF-197 Sustainability, Energy, and Technology At Suffolk University**

  **Credits:**
  
  4.00

  **Description:**
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donohue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

- **SF-198 Music and the Brain**
  
  **Credits:**
  4.00

  **Description:**
  What accounts for the power of music to move us so profoundly? This course explores how our brains and music evolved together: What music can teach us about the brain, what the brain can teach us about music, and what both can teach us about ourselves.

- **SF-199 Unfolding the European Union**
  
  **Credits:**
  4.00

  **Description:**
  The EU is a powerful political, economic and cultural block that is meant to play a major role, together with the USA and China, in the creation of a new post-crisis world order. The seminar is intended to cover, at a basic but reachable level, the history, the politics, the culture and the functions of the EU in the beginning of the Twentieth Century. An extraordinary experiment of sociopolitical engineering, comparable to that of the United States of America, the EU has been changing the life of an increasing number of Europeans for over 50 years. No American student could afford to ignore the inner structure as well as the particular peculiarities of such inclusive supranational organization in today's world. Issues as institutional functioning, problems derived from individual state sovereignty, economic coordination to face common challenges, cultural integration, future enlargement, etc. are all indispensable to understand the way in which Europe is changing. But also much more day-to-day issues, such as travel mobility, education exchange programs, citizen's participation, supranational networks of people in the arts or in business, unified labor market, gender participation, human rights, consumer's protection, etc. are all in the process of developing a more robust and functional European Citizenship.

- **SF-1101 Hearts of Whiteness/Hearts of Darkness**
  
  **Credits:**
  4.00
There is a long tradition in the western world of viewing Africa as a place of savagery, primitiveness, and violence, and yet Europeans and descendents of Europeans have historically committed numerous acts of violence against African peoples. This class will examine two such instances: the crimes against humanity that took place in what are now the Democratic Republic of the Congo and South Africa. The course will begin with an examination of the brutal Belgian colonization of the Congo in the 1880's, depicted famously in Joseph Conrad's Heart of Darkness. The second unit of this course will examine South African apartheid, a system of racial segregation that began in 1948 and which was imposed and enforced with massive levels of violence. The course will also examine the resistance to these abuses. Adam Hochshild describes the campaign against Belgian colonialism in the Congo as the first great international human rights movement of the twentieth century. In terms of resistance to apartheid, we will examine the roles played by Nelson Mandela, Steve Biko, the African National Congress, and the international apartheid movement, which successfully mobilized governments around the world to exert pressure on the South African regime.

**SF-1104 HIV/AIDS and Society**

**Credits:**

4.00

**Description:**

Students will examine the HIV/AIDS epidemic from a variety of perspectives, including historical, cultural, biological, political, legal, social, and psychological. We will predominantly focus on the U.S. epidemic but will look to other parts of the world (Haiti, Africa) for comparison. For each of the content areas, we will reflect on the role of race, gender, sexual orientation, and socioeconomic status, as well as the tension between scientific knowledge, popular understanding, and political/legal doctrine.

**SF-1105 Contemporary Urban Challenges**

**Credits:**

4.00

**Description:**

The increasing rate of urbanization has been accompanied by dramatic changes in almost every aspect of urban life, creating new challenges and opportunities for urban dwellers, planner, and policymakers. This course is designed to examine the demographic, economic, and environmental realities and challenges facing contemporary cities. Specific issues that will be discussed include affordable housing, employment rates, civic
engagement, environmental justice, access to transportation, impacts of gentrification, urban renewal strategies, and access to education. The city of Boston will be the primary context through which concepts, theories, and findings presented in the lectures and readings will be explored and evaluated. We will have site visits and evaluate local policies and plans. The objective of this course is to provide students with an understanding of the role of government, institutions, organizations, and citizens in identifying and addressing contemporary urban challenges.

- **SF-1106 EU and US Responses to Globalization**

  **Credits:**
  4.00

  **Description:**

  This interdisciplinary course focuses on the political, economic and security aspects of the American-European relationship since 1945. Within the context of broader international developments from the end of WW II to the age of globalization, the course will explore the patterns of cooperation, competition and conflict that have characterized the transatlantic relationship in the past seven decades. The course is divided in three main sections. The first presents the historical background of the transatlantic relation before 1945, emphasizing the particular role of France and the United Kingdom. The second section explains how Europe has evolved from a region of war to the integration process sublimated in the European Union and speculates the effects on the transatlantic relations. The third part of the course analyzes the changing nature of the hegemonic power of the United States. The final section presents the interrelations between Europe and the United States in the political, economic and security areas and aims to answer a simple question: Has the transatlantic relationship been weakened or strengthened in the era of globalization?

- **SF-1107 Vertebrate Fossils and Evolution**

  **Credits:**
  4.00

  **Description:**

  An introduction to vertebrate history using the fossil record. The pattern of vertebrate evolution shows great changes in anatomical structure that reflect natural selection toward new ecological opportunities. After an introduction to paleontological methods, the course develops a foundation of anatomical knowledge and phylogenetic relationships among the groups of living and extinct vertebrates. This foundational knowledge is then applied to the discussion of changes in locomotion, defense, and feeding adaptations in vertebrates, as well as an understanding of the way of life of the various groups, especially early tetrapods, dinosaurs, and mammals. The class will also be able to critique scientific arguments about areas of active debate in vertebrate paleontology. Early in the semester, the group makes a required weekend trip to study the evidence of prehistoric life and geologic change in Western Massachusetts.

  **Type:**
Expanded Classroom Requirement

- **SF-1109 Ancient to Modern Law**
  - Credits: 4.00
  - Description:
    This course will examine the major topics, trends, and controversies in the study of ancient Greek law and its influences on the American legal system. This course will focus on law and order in the Athenian courts, judicial review, implementing the neighborhood grand jury and social norms in the Athenian courts. Special emphasis will focus on the law in action and its daily life best mirrored in its usages and customs, which constitute the laws ordinary transactions. Special emphasis will be given to argument and rhetoric, civic and professional actors in the court system, the modalities of justice as well as the foundation of the Courts.

- **SF-1110 Decoding Boston: Signs and the City**
  - Credits: 4.00
  - Description:
    This interdisciplinary seminar will explore the buildings, monuments, sites, and signs around Boston from the point of view of Visual and Culture Studies. In addition to providing a compelling introduction to the history, major landmarks, and culture of the city, the seminar is specifically intended to improve students' visual literacy: that is, their awareness of their visual environment and their ability to critically analyze the rhetoric of the spaces, buildings, and images with which they are surrounded.

- **SF-1111 Logo Police: the Crime & Culture of Trademark Counterfeiting**
  - Credits: 4.00
  - Description:
    Counterfeit goods have simultaneously become a financial drain on rightful brand owners, and a funding source for organized crime, including terrorism. However, counterfeiting, dubbed the crime of the 21st century," has also become a consumer and tourist activity - shopping for fake purses,
watches, and clothing - that many view as a victimless crime. In this seminar, we will discuss the legal, financial, and social implications of the counterfeiting phenomenon. Students will explore the link between a seemingly harmless activity (purchasing a fake) and the exceedingly harmful activity that might result. The curriculum for this seminar will include readings, television news reports, discussion of first-hand experiences, and guest speakers with expertise on the topic.

- SF-1113 Get Thee to the Mall

Credits:
4.00

Description:
This seminar will examine America's preoccupation with materialism. It seems we have been a nation of 'conspicuous consumers' for a very long time. The seminar will compare us to the rest of the world through our ecological footprint. We will also examine the rest of the world's inclination to follow the American model, some nations more than others. The seminar borrows heavily from economics, psychology, sociology, and environmental science. One focus of the seminar will be to examine whether bigger is really better and if materialism leads to happiness.

- SF-1114 Memoirs of Development

Credits:
4.00

Description:
The purpose of this course will be to help students gain a greater understanding of psychological development through the process of reading, writing, and discussing literary memoirs. Poetry and prose will augment a more nuanced understanding of memoir writers' experiences in growing up in their families and in confronting the larger world. Students will begin to consider the impact of race, class, gender, culture, and family on individual lives. Writers from Suffolk and the larger Boston community will be invited to the class to discuss their creative process, influences on their writing and developmental markers. Videotape interviews and/or screenplays will also be shown.

- SF-1115 Boiling Mad: the Tea Party and the Battle Over History & the Constitution

Credits:
4.00

Description:
This course will seek to examine the roots, funding and ideology of the Tea Party movement. The course will explore whether the movement's central claim - that lower taxes plus less government equals more freedom - is true in the modern era of multinational corporations. The course will then examine two of the movement's central concerns: 1) strictly adhering to the original intent of the framers of the United States Constitution; and 2) that America was founded as a Christian nation," and that church and state should not, therefore, be divided by a wall of separation - have any merit. The course will involve students in the reading and discussion of original sources related to the Constitution and to the Founding Fathers' religion and their views on liberty of religious conscience. We will also examine and discuss modern works - both pro and con - that analyze the Tea Party movement.

- **SF-1117 The Libertarianism**

  **Credits:**
  4.00

  **Description:**

  This course will explore the philosophical and economic underpinnings of modern libertarian beliefs and will consider the historical roots of these ideas. The course will focus mostly, though not exclusively, on the Anglo-American tradition of these ideas. We will trace the development of through from Locke and the Scottish Enlightenment to the ideas of the founding fathers of the United States. We will explore the individualist traditions of the 19th century American thinkers. Finally we will explore the revival and expansion of libertarian thought following WWII and particularly since the early 1970s. The course will not cover the history of the libertarian political party, or any other political movement, but will instead focus on the underlying economic theories and moral philosophies that underpin these ideas and how to apply these ideas to current popular issues.

- **SF-1118 Pageantry: Competitive Beauty**

  **Credits:**
  4.00

  **Description:**

  In this seminar, we will explore the history and mystique of pageantry in our country. We will study the roots of these programs (such as Miss America) and look for lessons learned about women as we follow the progression of competitive beauty through to the crowning of a young woman students may come to see as someone not too different from themselves. This exercise in exploration and examination of the American beauty queen should intrigue all her peers, and challenge supporters and critics of pageants alike to redefine their opinions of the modern pageant woman.

- **SF-1121 The War to End All Wars: World War I In History, Literature, Art, and Film**

  **Credits:**
To commemorate the approaching 100th anniversary of World War I (1914-1918), this seminar will explore the war as presented in historical documents, literature, film, and art. Texts will include World War I poems (English, but also German, French, and Russian), novels such as All Quiet on the Western Front, A Farewell to Arms, The Good Soldier Svejk, and Dr. Zhivago, art (including works by Picasso, John Singer Sargent, Otto Dix, and George Grosz), plays (What Price Glory), films such as All Quiet on the Western Front (1930 version) and Grand Illusion, and memoirs such as Robert Graves' Goodbye to All That. We will also draw on many online resources produced by, among others, the BBC, UNESCO, and the U.S. Army.

- **SF-1122 The Ethics of Peace and War: From The Ancient World to the Present**

  **Credits:**

  4.00

  **Description:**

  This course will explore historical, ethical and political issues concerned with matters of peace and war. We will examine a variety of different texts: religious, historical, philosophical and literary, but the main emphasis will be philosophical justifications for war and philosophical visions of just peace, with an eye to contemporary questions in the War on Terror. To the extent that we use non-philosophical texts, this will be in the service of focusing the imagination on the philosophical issues and applying theoretical frameworks to historical events.

- **SF-1126 Prosperity: the Nature, Sources, and Ethics of Wealth Creation**

  **Credits:**

  4.00

  **Description:**

  The aim of this course is to provide the students with the philosophical tools for understanding the current crisis of capitalism and the debate about what principles we should use as we decide where to go next. The course explores three closely related questions: What is wealth? What are the institutions that are conducive to the creation of wealth? And, by what principles of justice should we regulate the distribution of wealth amongst the members of society?

- **SF-1127 The Vietnam and Iraq Wars: Polarized Perspectives**

  **Credits:**
This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement just? To what extent were the methods used by the United States military during each war just? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit the enemies of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

- **SF-1128 Sustainable Media**

  **Credits:**

  4.00

  **Description:**

  Contrary to a popular perception that information, communication and entertainment technologies are clean, ecologically benign and paperless, the reality of an increasingly digital life is that our fascination with the next best thing in mobile phones, video game consoles, personal computers, digital cameras, tablets, etc., has devastating impacts on our environment. These media devices are manufactured using toxic ingredients in poisonous working condition, require an abundance of energy to operate, and create hazardous waste when disposed. Media technology companies and the advertising industry that markets their wares have successfully persuaded consumers to accept rapid obsolescence and to highly anticipate the latest upgrade. But some consumers, electronics manufacturers, policy makers, and environmental groups are working to change the culture of consumption in favor of sustainable media practices that lessen the environmental footprint of the digital devices we use everyday. The purpose of this course is to understand the problem of unsustainable media, and the possible solutions for a sustainable media system.

- **SF-1129 Beacon Hill: Fact, Fiction, and Fantasy**

  **Credits:**

  4.00

  **Description:**

  The course will explore the physical geography, history, and image in literature, film, and pop culture of Suffolk University's Beacon Hill neighborhood. The purpose and objective of the course is to provide students with a deep knowledge, understanding, and appreciation of Beacon Hill through examination of written and visual sources, and feet-on and eyes-on experience of the public parts of the Hill.
• SF-1130 Lincoln and the Law

Credits:
4.00

Description:
This course will examine Abraham Lincoln's relationship to and enduring impact upon the law by exploring 1) his legal career and life as an attorney in Illinois; 2) his views on race and slavery; 3) the effort to pass the Thirteenth Amendment; 4) his views of and other actions related to the Constitution (the suspension of habeas corpus, the right of states to secede from the Union, the President's War Powers, etc.); and 5) the code he commissioned to set out the rules of war. We will take an expansive look at Lincoln's legal mind and cover diverse topics such as Lincoln's legal writing, ethics, the Constitution, and international law. The subjects discussed will then be related to the current practice of law in the United States. The course will be designed to introduce students to the theoretical underpinnings and practice of law, the Constitution, Civil Rights, Civil Liberties, the War Powers of the presidency, and the rules of war through the lens of Lincoln's relationship to and impact upon the law.

• SF-1131 Focusing the Scientific Lens

Credits:
4.00

Description:
How do we learn about the natural world? By performing research about the ingredients of everything (the elements) and the tree of life (evolution) we will practice how scientists create knowledge by developing our own research projects in chemistry and biology, and communicate results to a wider audience. We will discuss historical transitions of these topics and explore commonalities in the processes of doing science across disciplines.

• SF-1132 American Enlightenment: Humanism & Humanistic Politics in America

Credits:
4.00

Description:
This course will examine 1) the demographics of the religiously unaffiliated in America and their impact on American politics; 2) the problem of belief without evidence, religious extremism, and the connection of radical religion to terrorism and violence; 3) the history of enlightenment thought in America; 4) freedom of religion in America and the secular framework created under the U.S. Constitution; 5) the philosophy of humanism and the phenomenon of humanist communities and chaplaincies being created on college campuses; 6) the philosophy of naturalism and the philosophical
uses of the epic of evolution; and 7) the philosophy of Humanistic Religious Naturalism, which is a synthesis of humanism and naturalism. The course will also examine whether skeptics can reap the benefits of religious practice by engaging in secular alternatives to traditional religious practices.

- **SF-1133 Problems and Solutions in Early American History**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course will examine four major problems in the early American republic: forming a government; bridging vast distances on the American continent; slavery; international relations. We will explore the various proposed solutions to these problems. Some of the solutions worked well, others were more disastrous than the initial problem. We will read primary documents pertaining to these issues, and try to imagine how men and women considering the problems might have responded to them. What solutions could be proposed? What solutions would work? What were the political, economic, or social difficulties generated by the problem and by the proposed solutions? In considering the problems, we will also learn how to use the various archives close at hand: the Sawyer Library, the Boston Public Library, the Massachusetts Historical Society, and the Massachusetts State Archives. Students will also post their findings on a class blog, and present their work to one another in class.

- **SF-1134 The Meaning of Life**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity's Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

- **SF-1135 Women Warriors: Stories of Captivity, Conversion, and Confession**
  
  **Credits:**
Description:

Since the beginning of time, women have been doing battle to themselves, while men have gone to battle against others. Whether it is through converting to Christ, yielding to captors in order to survive, or carrying a baby, this course introduces students to the many ways in which, whatever battles they face, women are warriors; they survive. Utilizing an array of captivity, conversion, and confession narratives by women, and pairing them across the centuries, students will make connections and draw conclusions between early- and mid-19th-century-American and contemporary women. Students will connect, for example, the trials of the 17th-century Puritan captive, Mary Rowlandson, and contemporary hostage, Elizabeth Smart, to explore how women (no matter how different they seem) draw upon unique inner resources to survive.

SF-1136 Varieties of Religious Experiences

Credits:

4.00

Description:

This course is designed as an exploration into the various depths, dimensions, and meanings of religious thought and practice. World religions and belief systems will be presented in terms of their underlying experiential, psychology and spiritual significance in our ordinary thinking. The ancient wisdom teachings of world religions, philosophy and myth will be examined as metaphysical claims about the nature of the universe and our understanding of it. Special emphasis will be placed on challenging current traditions concerning the role of consciousness and religious experience. Students will be required to actively participate in exploring other/alternative religions and religious centers in the greater Boston area. Classes will be conducted by means of lecture, primary texts in translation and meditation exercises.

SF-1137 Urban Geography: the Story of North American Cities

Credits:

4.00

Description:

This course examines the history and contemporary processes of urbanization, primarily in the North American context. In particular, we are concerned with the geography of these processes, resulting in differentiation of space and the creation of distinct places. Urban geography requires a spatial approach: understanding and explaining why something is where it is, and the overall spatial patterns of a city, or a system of cities. This course covers a range of topics relevant to cities, including historical development, governance, social patterns, economic roles, planning, contemporary problems, and the linkages among all of these. We will examine the geography of urbanization at several scales, ranging from the development of the North American urban system to the experiences of neighborhoods within cities.
• SF-D164 The End of the World

Prerequisites:
FSL or EF-CAPS students only.

Credits:
4.00

Description:
This cohort-restricted seminar uses materials drawn from several disciplines to examines ends (of culture, eras, and innocence) as well as scientific speculation regarding the end of the world. The course stresses writing and learning strategies, critical literacy, and academic survival skills, as well as exposure to great works and ideas.

• SOC-113 Introduction to Sociology

Credits:
4.00

Description:
An introduction to the sociological understanding of human interaction, group process and social structures. Students are introduced to basic concepts, theories and methods of sociological investigation. Majors and minors must pass with a grade of C or better.

Term:
Offered Both Fall and Spring

Type:
Social Science

• SOC-116 Social Problems

Credits:
**Description:**

An examination of traditional and contemporary problems associated with major social institutions such as the family, economics, government and education. Social forces related to ethnicity, social class, health and welfare, and urbanization are also included. Alternative remedial measures based on behavioral science theories are discussed. Majors and minors must pass with a grade of C or better.

**Term:**

Offered Both Fall and Spring

**Type:**

Social Science

- **SOC-210 Juvenile Justice and the Law**

  **Credits:**

  4.00

  **Description:**

  Considers the problems surrounding the legal definition and handling of juveniles who confront the law as offenders, clients and victims. Attention is devoted to the study of the special legal categories and procedures established for juveniles, the problems facing professionals providing juvenile services and the most significant directions of legal and social change affecting youth in our society. Normally offered every year. Fulfills the Sociology Department's Social Policy requirement.

- **SOC-211 Corrections and Punishment**

  **Prerequisites:**

  Take SOC-234 or SOC-333;

  **Credits:**

  4.00

  **Description:**
A sociological exploration of coercive and incapacitative responses to crime. Attention is given to the origins and patterning of segregative controls, the correctional claims of prison systems, alternatives to incarceration and relationships between types of crime, and criminals and varieties of punitive response.

Term:

Occasional

• SOC-212 Statistics for Sociology

Prerequisites:
SOC 113 or 116; and MATH 130 or higher

Credits:
4.00

Description:
In this course, students will be introduced to descriptive and basic inferential statistical techniques. The course will provide information on the following topics: Description - measures of central tendency (mean, median, mode) and measures of dispersion (range, standard deviation); logic of statistical inference, including normal curve and sampling distribution; hypothesis testing with one sample and two samples; measures of association between two variables (bivariate analysis), including chi-square, regression, and correlation; and introduction to multivariate regression. Students will utilize SPSS (Statistical Package for the Social Sciences) software to input and analyze data. The goals of the course are for students to appreciate the need for statistical methods in the broad field of sociology and to gain basic statistical literacy.

Term:

Offered Both Fall and Spring

Type:

Quantitative Reasoning

• SOC-214 Research Methods in Sociology

Prerequisites:
SOC 113 or 116 with C or better & one other SOC course. Cannot be taken concurrently with SOC 310,315, or 333.
How sociologists decide what to study, how they select a research design, sample and collect data, analyze results, interpret findings, and write up reports. Students are introduced to the techniques most frequently used by sociologists and undertake their own small research project. Required for all Sociology majors.

Term:
Offered Both Fall and Spring

**SOC-217 Sociology of Urban Life**

Credits:
4.00

Description:
An examination of the effects of the city on human life in its broadest as well as its most specific aspects. Greater Boston and similar communities across the nation will be studied as ecological settings, as producers and shapers of change, and as special contexts for understanding sociological ideas. Comparisons will be made among urban places in the U.S. and in other countries.

Term:
Occasional

Type:
Social Science, Cultural Diversity Opt A

**SOC-218 Crime and Law in Indian Country**

Credits:
4.00

Description:
What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.

Term:
Occasional

Type:
Cultural Diversity Opt A

- SOC-H218 Honors Crime and Law in Indian Country

Credits:
4.00

Description:
What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.

Type:
Cultural Diversity Opt A

- SOC-220 Childhood and Adolescence in Contemporary Society

Credits:
4.00

Description:
This course examines the development of children and adolescents from biological, psychological, and sociological perspectives. Major themes and changes associated with each developmental stage are discussed. The course explores practical implications of theory and research (parenting,
juvenile justice, etc.), and current topics in child and adolescent development. Class format includes lectures, discussion, debates, and direct observation of children.

Term:
Occasional

- SOC-222 Women in Struggle on Film

Credits:
4.00

Description:
Women's struggles in arenas from war to labor disputes will be examined through films and writings. Societal, historical and cultural contexts of women's roles in films are discussed, drawing on film criticism and sociological analyses.

Term:
Occasional

- SOC-223 Families in Contemporary Society

Credits:
4.00

Description:
An exploration of the diversity of contemporary families. Comparisons are made between the cultural myths of the ideal family and the lived realities. Challenges confronting contemporary families and their implications for social policy are examined in such areas as work/family conflicts, gay and lesbian families, welfare, family violence.

Term:
Occasional

Type:
Social Science
• SOC-224 Families in Contemporary Society (Spain)
  Credits:
  4.00

  Description:
  Spain has experienced major socio-demographic changes since the mid 1970s. These transformations mainly arise from the new role of women in society and, in particular, women's higher levels of education, work experience, and labor market attachment. The changes in women's labor force participation have occurred in conjunction with a progressive postponement of main family events, such as leaving the parental home, forming a partnership and having children, as well as with a reduction in the family size. Spain is, indeed, characterized as having one of the lowest low fertility levels within Western industrialized countries, a pattern that is exacerbating the ongoing process of population aging. This picture partly reflects the conflicting relationship that currently exists between women's labor force participation and the accommodation of family responsibilities: the so-called work/family balance. Ongoing differences among countries have been accounted for by different explanatory factors that involve socio-economic, cultural and social policy dimensions. From a comparative perspective, the course is intended to cover recent debates, controversies, and research on family formation and family dilemmas in contemporary Spain.

  Type:
  Social Science

• SOC-225 Sociology of Romance
  Credits:
  4.00

  Description:
  The meaning of romance and courtship today and its social consequences in marriage, homogamy, stratification and divorce. The historical origins of romanticism and the sources of romance in socialization, books and magazines, television and movies, popular music and peer group membership are also considered.

  Term:
  Occasional
• SOC-226 Religion in Contemporary Society

Prerequisites:

This course fulfills the ECR requirement.

Credits:

4.00

Description:

An examination of the fundamental purpose and functions of religion in society. Major religious systems in America are analyzed in terms of basic values and structure. The impact of changes in religious organizations upon clergy, laity and society are discussed. This class fulfills the ECR requirement.

Term:

Occasional

Type:

Expanded Classroom Requirement

• SOC-227 Race in American Society

Credits:

4.00

Description:

Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

Term:

Occasional
• **SOC-228 Culture Diversity & Human Need**

  Credits: 4.00

  Description:

  Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.

  Term: Occasional

  Type: Cultural Diversity Opt A

• **SOC-229 Social Class and Inequality**

  Credits: 4.00

  Description:

  This course examines the difference between the life experience of those who are rich, poor and middle class. Topics include: the elite in Boston, theories of inequality; blue collar neighborhoods, the hard living poor, and ethnic and sexual stratification.

  Term: Occasional
• SOC-230 Bad Girls

Credits:
4.00

Description:
This class explores the images of the traditional bad girl in films. The course examines the idea of moving beyond merely the delinquent; many images in film suggest that girls and women who break with the socially condoned role of femininity are somehow bad. Girls and women who have power or challenge authority are often portrayed in films as deviant and therefore bad. Girls and women who are frigid are just as bad as their sexually promiscuous silver-screen opposites. This course further focuses on the impact of these images on real life social roles for girls and women as well as the symbiotic relationship between fact and fiction.

Term:
Occasional

Type:
Cultural Diversity Opt A

• SOC-231 Victims of Crime

Credits:
4.00

Description:
In recent years, public attention to victims of crime has grown enormously. The reasons for this are complex. They include the effects of political organizing by crime victims; increased media attention to crime (often driven by crime stories as entertainment and advertising vehicles); the exploitation of crime victims by the politicians; and long-standing community frustrations with the criminal justice system. This course will examine the rise of public attention to crime, the response of the criminal justice system to victims, and the problems and possibilities regarding new responses to victims of crime. New developments in restorative justice will be presented as an emerging alternative to problems victims have reported with the criminal justice system.

Term:
Occasional
• SOC-232 Street Gangs

Credits:

4.00

Description:

This course provides an overview of youth gangs and their sociological underpinnings, which are rooted in poverty and racism. Topical areas are discussed in relation to these key factors. Study topics include the history of gangs, theories about gang formation and individual membership, gangs and criminal behavior, socio-cultural importance of gangs, and strategies to control gang behavior. The course will utilize current gang issues in the US generally and in Massachusetts in particular as a basis to better understand the nuances of youth gangs.

Type:

Cultural Diversity Opt A

• SOC-234 Criminal Justice Systems

Credits:

4.00

Description:

An overview of issues and social variables involved in the pre-arrest and arrest stages followed by a more in-depth analysis of pre-trial, trial, sentencing, and correctional phases. Sociological and criminal justice models are examined and compared with the actual processes and purported functions of criminal justice agencies. Required for all majors in the Crime and Justice Concentration.

Term:

Offered Both Fall and Spring

• SOC-236 Deviance and Social Control

Credits:

4.00

Description:
Who and what is deviant? How shall the society respond? The course examines a range of deviance theories and associated social policies. A number of case studies will be used to evaluate these theories, such as body piercing, witchcraft, gay and lesbian sexuality, corporate crime, disability, prostitution, violence against women, racism, anti-Semitism, and gangs.

Term:
Offered Both Fall and Spring
Type:
Social Science

- **SOC-238 Cops & Robbers: Crime on Film**

  Credits:

  4.00

  Description:

  An examination of images of crime and justice portrayed in the American cinema. Special attention is paid to the social and historical forces that have shaped popular representations of good and evil during the modern era.

  Term:

• SOC-242 Law, Health & Human Rights

Credits: 4.00

Description:
This course will look at the special opportunities and obligations of those in the health and legal professions to protect human rights. There will be an overview of human rights doctrine and key documents. Students will learn to apply human rights principles to particular occupations in the health and legal professions.

Term: Occasional

• SOC-243 Introduction to Health & Human Services

Credits: 4.00

Description:
A survey of the fundamental values, organization and methods of practice of the major health and human services delivery systems. Problems associated with resource allocation and client base needs in the context of economic and political priorities are discussed. Alternative role models for professional workers in public and private settings are also evaluated.

Term: Occasional

• SOC-244 Social Work With Families

Credits:
4.00

Description:
This course will provide an in-depth analysis of family dynamics as well as some beginning skills in counseling families. Using a systems approach, students will learn about family roles, sibling constellations and different types of families. The importance of ethnicity and culture in shaping family values and organization will be emphasized. Students will be encouraged to study their own families of origin so they might better understand how families change.

Term:
Occasional

• SOC-253 Sociology of Health and Illness
  Credits:
  4.00
  Description:
  This course provides students with an introduction to how social norms, structures, and practices shape experiences of illness and health. Among the topics that will be covered are: health and the environment, the reasons some groups of people are less healthy than others, living with chronic illness and disabilities, and public debates surrounding issues such as performance enhancing drugs and sports, Attention Deficit Disorder and the HPV vaccine. Required for all students in the health, Medicine and the Body Concentration.
  
  Term:
  Occasional

• SOC-254 U.S. Health Care Landscapes
  Prerequisites:
  This course fulfills the ECR requirement.
  Credits:
  4.00
  Description:
In this course, students will learn about how the U.S. health care system works. We will study the politics and economics of the health care system and discuss the key health care policy issues of this decade. Using the theoretical perspectives provided by sociology, we will look at issues of power, hierarchy, race, and gender vis-a-vis the health care system. Reading for this course centers on first person narratives by people working in the health care system. This course fulfills the ECR requirement.

Term:
Occasional

Type:
Expanded Classroom Requirement

- **SOC-256 Sociology of Aging**

  Credits: 4.00

  Description:

  Consideration of the physiological, psychological and social factors associated with the aging process. Contemporary American values toward the elderly are compared and contrasted with historical and cross-cultural studies. Current opportunities and techniques enabling the elderly to enrich and expand their societal roles are explored.

  Term:

  Occasional

- **SOC-264 Technology and Society**

  Credits: 4.00

  Description:

  An examination of the ways in which social structures and processes influence and are affected by modern ideas, needs and social practice techniques in technologically advanced societies is considered in conjunction with changes in the way in which we understand the world, the nature of
work and leisure, the processing of information and the character of social institutions. Normally offered alternate years. Fulfills the Social Science Option. Fulfills the Sociology Department's Social Policy requirement.

Type:
Cultural Diversity Opt B

**SOC-333 Sociology of Crime**
Prerequisites:
Take SOC-113 or SOC-116 with a minimum grade of C; Take one additional SOC course. Cannot be taken concurrently with SOC-214;

Credits:
4.00

Description:
The question Why is there crime? lies at the heart of this course. This class will address what we mean by crime, who gets to define what crime is, how crime can be explained and how it can be reduced. Making sense of crime is essential if we are to respond effectively to victims and offenders. This course offers an in-depth examination of the many different theories of crime. These include biological, psychological, and sociological theories of victimization and offending. The course will study these theories in the context of many different kinds of criminal offending. By the end of the course, students will have a deep understanding of where these theories came from; what their strengths and weaknesses are; whether they are supported by research findings; and what implications these theories have for stopping crime.

• SOC-334 Sociology of Policing

  Prerequisites:
  SOC 333 or SOC 234

  Credits:
  4.00

  Description:
  An investigation of the emergence, organization, and structure of police systems. The course focuses on the conditions surrounding the relationship between the police and policed in different historical, cultural, political, and economic contexts.

  Term:
  Occasional

• SOC-336 Probation and Parole

  Prerequisites:
  SOC-234 or SOC-333;
Correctional theories are reviewed along with the historical development of probation and parole. Current research and analytical perspectives reflecting on administrative problems, innovative policies and the internal philosophical inconsistencies of these systems are examined.

- **SOC-337 Juvenile Justice and the Law**

  Credits:
  
  4.00

  Description:
  
  Considers the problems surrounding the legal definition and handling of juveniles who confront the law as offenders, clients and victims. Attention is devoted to the study of the special legal categories and procedures established for juveniles, the problems facing professionals providing juvenile services and the most significant directions of legal and social change affecting youth in our society. Normally offered every year. Fulfills the Sociology Department's Social Policy requirement.

- **SOC-338 White Collar Crime**

  Credits:
  
  4.00

  Description:
  
  An examination of the relationship between crime, business activity, and technology with special attention to the crimes of the powerful and the changing relationship between economic development and criminal activity.

  Term:
  
  Occasional

- **SOC-339 Sociology of Violence**

Social, political, and personal violence will be examined and an attempt will be made to develop some theoretical orientations that may be used to both explain and prevent violence.

Term:
Occasional

- **SOC-340 Licit/Lethal: America's Drug Problem**

  Credits:
  4.00

  Description:
  
  Most Americans think of prohibited substances such as marijuana, cocaine or heroin when they hear the word drug. This course will provide an in-depth examination of legal drug use in American society. A broad conceptual framework will be presented that illustrates how history, politics, society and economics all have played a key role in defining certain substances as permissible in America. Fulfills the Sociology Department Social Policy and Globalization requirements.

  Term:
  Offered Fall Term

- **SOC-341 International Drug Control Policy**

  Credits:
  4.00

  Description:
  
  Relying on a simplistic demand or supply explanation of why Americans use/abuse drugs obscures the reality of America's drug problem, is ineffective as a guide to public policy and has unforeseen, often negative consequences. Drug use is a complex and multi-faceted issue. There are no easy
answers. To comprehend the complexity of America's drug problem one needs an understanding of the geography, history, religion, law, economics and international politics of the Middle and Far East, Eastern Europe, Africa, Mexico, and Central and South America. This class will provide this basic understanding without losing sight that the problem we seek to remedy is our own.

**Term:**
Offered Spring Term

**Type:**
Cultural Diversity Opt A, Cultural Diversity Opt B

- **SOC-343 Child Welfare Services**

  **Credits:**
  4.00

  **Description:**
  A survey of the historical development and current composition of services for children, including income maintenance, daycare, foster and institutional care and the adoption process.

  **Term:**
  Occasional

- **SOC-345 Get a Job: Welfare and Welfare Reform**

  **Prerequisites:**
  SOC 113 or SOC 116

  **Credits:**
  4.00

  **Description:**
  In 1996, Congress passed the Personal Responsibility and Work Opportunity Act (PRWORA), which requires states to reduce welfare caseloads by requiring recipients to work and limiting the number of years a family can receive benefits. This course will explore the history of welfare in the United
States and the various efforts to reform it. Students will examine social, economic, and political forces that have driven recent reforms as well as exploring the interaction between race, gender, and poverty as they relate to welfare dependency and reform.

- **SOC-347 Immigration Law and Policy**
  
  **Prerequisites:**
  
  Prerequisite: SOC 113 or SOC 116 OR Instructor's consent
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course examines U.S. Immigration legislation and policies, focusing on how and why various immigration laws and policies have been established and implemented throughout history. We will address the intersection between immigration policy and race, ethnicity, nationality and socioeconomic status, as well as explore the effects that immigration laws have had on various immigrant groups and society in general.

• SOC-374 Diversity Among Women

Credits:
4.00
An exploration of the diverse experiences of womanhood as shaped by race, ethnicity, class, sexuality, age and physical ability. The course examines the commonalities women share and considers what women's differences suggest about an agenda for change. Issues such as workplace equality, family, policy, violence against women, sexuality are studied. How do diverse women, along with men allies, build alliances and work together for social transformation? Cultural Diversity A

- **SOC-379 Anthropological Perspectives in Spain**

  **Credits:**
  4.00

  **Description:**
  The recent changes in both Spain and Portugal are only the latest in a series of important transformations which these two countries have undergone over the past fifty years or so. In that time, they have both gone from being predominantly rural societies where the majority of the population live and work on the land to becoming industrial societies not unlike those of northern Europe and North America. Yet the underlying cultural heterogeneity of the peoples of the Iberian Peninsula has meant that different regions have often had very distinct actions to the various pressures toward political, economic, and social change. This seminar will examine the ethnographic diversity of the Iberian Peninsula in its regional manifestations, using a specifically anthropological approach in order to better comprehend present-day Spain and Portugal. Offered on Madrid Campus only. 1 term - 4 credits

- **SOC-380 Special Topics in Sociology: Peer Tutoring**

  **Prerequisites:**
  Instructor's consent; ECR

  **Credits:**
  4.00

Expanded Classroom Requirement

• SOC-390 The Prison Experience, Literature and Film

Credits:
4.00

Description:
An examination of prison writings, films, and the actual experience of prison life from literary and sociological perspectives. Students will have an opportunity to examine their own perspectives of the prison as a symbol and shadow in American Society and compare these impressions with the actual experience of inmates, correctional officers and others who have lived in the prison nation.

Term:
Occasional

• SOC-406 The Immigrant Experience

Prerequisites:
Take SOC 113 or SOC 116 and one 200 level or above SOC course.

Credits:
4.00

Description:
The United States of America: A land of immigrants; The Great Melting Pot. This country has indeed attracted immigrants from all over the world. However, not all have been welcomed or treated equally. This course will investigate the reasons various immigrant groups (past and present) have come to the United States. We will also examine their experiences and the impact race, ethnicity, gender, class and social structures have had on them. During Spring Break the class will visit Ellis Island and the Tenement Museum in New York and the Lowell National Historical Park in Lowell. The class will also visit various sites in Boston throughout the semester.

Type:
Cultural Diversity Opt A,Expanded Classroom Requirement

- **SOC-433 Senior Seminar**
  
  Prerequisites:
  SOC 113 or 116(with a grade of C or better)and SOC-214; Seniors Only; Required for all Crime and Justice Concentration Majors.

**SPAN-105 Overview of Spanish Culture**

Credits:
1.00

Description:
This course, open only to students from Maryville University of St. Louis, offers a broad survey of Spanish history and culture. It focuses principally on key elements of geography, history, sociology, politics and traditions. The course will place special emphasis on Spanish culture and its problematic modernization, which is an issue with very important consequences for the intellectual productivity of this country.

**SPAN-201 Intermediate Spanish I**

Prerequisites:
SPAN 102 or Instructor's consent

Credits:
4.00

Description:
A systematic review of Spanish grammar and study of Spanish through materials of cultural interest. Development of written and oral skills through compositions and audio-visual materials. Weekly laboratory sessions required.

Term:
Offered Fall Term
- **SPAN-202 Intermediate Spanish II**

  Prerequisites:
  
  SPAN 201 or Instructor's consent.

  Credits:
  
  4.00

  Description:
  
  A continuation of skills development from 201. Weekly laboratory sessions required.

- **SPAN-203 Intensive Intermediate Spanish**

  Prerequisites:
  
  SPAN 201 or Instructor's consent

  Credits:
  
  4.00

  Description:
  
  A writing and reading intensive course for students who are thinking about minoring and possibly majoring in Spanish. There will be a brief review of grammar, but the primary materials will come from the textbook, LAZOS, with ancillary materials from the print media and audio-visual sources. A weekly tertulia will be required instead of language lab.
• **SPAN-210 Spanish in the Workplace**

**Credits:**

4.00

**Description:**

This course is designed for students who have successfully completed Spanish (201) at Suffolk or its equivalent elsewhere. Through a systematic review of grammar, a diversity of readings, and oral as well as written work, students will increase their lexical and grammatical knowledge of Spanish language specific to the workplace in order to communicate more easily and comfortably. Students will also be better prepared to deal with the specific themes related to business introduced in the course. (This course is not for Spanish minors or majors, but may be taken as a free elective.)

• **SPAN-290 Advanced Composition & Conversation**

**Prerequisites:**

Prerequisite: Spanish 202, 203 or 250 or Instructor's consent

**Credits:**

4.00

**Description:**

Further development of written and oral skills in various contexts. Emphasis on strengthening written skills and learning to speak clearly and persuasively in Spanish. Short texts and audio-visual materials provide the basis for classroom activities which will include regularly assigned essays, group discussions and debates.

**Term:**

Offered Fall Term
• SPAN-299 Translation Workshop

Prerequisites:
SPAN 290 or SPAN 300 or Instructor's consent

Credits:
4.00

Description:
This course aims to introduce students to translation techniques through direct practice and to consider what makes a good translation. Material will be selected from a wide variety of sources and will increase in difficulty as the course goes on. The emphasis will be on translation from Spanish into English, but some work will be done on translation into Spanish. Students will be expected to complete regular homework assignments for which grades will be given. (Madrid campus only)

• SPAN-300 Intro to Cultural Texts

Prerequisites:
Spanish 202, 203, 250 or Instructor's consent.

Credits:
4.00

Description:
An exploration of some key Peninsular and Latin American cultural materials: works in four different literary genres (narrative, drama, essay and poetry), films, and songs. Development of specialized vocabulary and critical skills required in more advanced Spanish courses, through close readings and textual analysis.

Term:
Offered Spring Term
• SPAN-301 Spanish Culture and Civilization

Prerequisites:
Spanish 202, 203 or 250. Spanish 290 or 300 are strongly recommended.

Credits:
4.00

Description:
A survey of Hispanic Civilization emphasizing the contributions of Spanish-speaking peoples to the Western tradition in art, thought and letters. Concentration on the Iberian Peninsula, with an emphasis on the contributions of Christian, Jewish and Moslem cultures in Spain.

Term:
Alternates Fall & Spring

Type:
Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement, BA FOREIGN

- **SPAN-350 Spanish Cultural Studies**

  Credits:

  4.00

  Description:

  This is an interdisciplinary course that will examine the historical and socio-economic causes of contemporary Spanish culture. Material will be drawn from a variety of sources including: history, sociology, gender studies, literature and philosophy. Extensive reference will be made to the non-Western cultures which have made Spain what it is today. (Usually taught in English). (Madrid campus only)

- **SPAN-360 Madrid Cosmopolitan City**

  Prerequisites:

  SPAN-290 or SPAN-300 or Instructor's consent

  Credits:

  4.00

  Description:

  This course is designed to provide students with a basic knowledge of the city of Madrid in terms of its historical, cultural, and social development. Contemporary aspects of the city such as its rise to prominence amongst the capitals of Europe and the phenomenon of recent immigration patterns will also be discussed. All classes will be conducted in Spanish. Specific grammar points will be reviewed as needed. (Madrid campus only)
• **SPAN-370 Jewish, Islamic, & Christian Spain**

Prerequisites:

Take SPAN 290 or SPAN 300 or Instructor's consent. SPAN 350 is strongly recommended

Credits:

4.00

Description:

An exploration of the diverse facets of Jewish-Muslim-Christian convivencia (dwelling together, coexistence). The course focuses on religious, cultural, economic and psychological aspects of contemporary Spain which owe their very existence to the history of multiculturalism in Spain. Visits to significant cities such as Toledo, will offer the student the possibility of experiencing first-hand the rich and diverse cultural heritage of present-day Spain. The primary goal of this course is to offer examples of peaceful and fruitful cooperation among the three major religions of the world and to prove that such an ideal is not a utopia. (Madrid campus only)

  Type:

  Quantitative Reasoning

- **STATS-350 Applied Statistical Methods**

  Prerequisites:
  
  STATS 250

  Credits:
This application-oriented course is designed to go beyond the topics covered in STATS 250. It includes topics like Analysis of Variance (ANOVA), special topics in regression analysis and index numbers. Further, time series data, which consist of values corresponding to different time intervals, are analyzed. The objective is to examine past time series values to forecast, or predict future values. Seasonal variations are also incorporated in the forecasts. The course will provide useful computer skills involving various statistical packages and is an excellent preparation for graduate work in business and social sciences.

**Type:**

**Social Science**

- **STATS-R240 Statistics Recitation**

  **Credits:**
  
  0.00

  **Description:**

  This course is taken as a co-requisite to Stats240. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. On alternate weeks students work on individual and group homework.

- **SU-101 Freshman Year Experience**

  **Credits:**
  
  1.00

  **Description:**

  SU 101 is designed to assist in a successful transition at Suffolk University and our unique urban community. Through interactive exercises and engaging assignments, the class will discuss a variety of topics, including academic success strategies, personal goals and self-awareness, and additional areas of relevance for new students. Students will develop the insights, skills and attitudes necessary for becoming a successful student.

- **SU-102 Academic, Personal, and Professional Success!**
Prerequisites:
UAP students only

Credits:
1.00

Description:
Designed to promote critical thinking and analysis, SU102 is comprised of three seminars, each four weeks in length. All seminars will include a faculty or guest presenter. The seminars will focus on the psychology of learning, career exploration and understanding the value and cost of earning a college degree.

- THETR-100 Theatre Practicum: Performance

Credits:
0.00

Description:
A non-credit course to satisfy the Theatre practicum requirement for theatre majors and minors. Students should register for this course when participating in Theatre Department performance activities such as acting, directing, playwriting, dramaturgy, choreography, or stage management may. May be taken more than once.

Term:
Offered Both Fall and Spring

- THETR-102 Theatre Practicum: Production

Credits:
0.00

Description:
A non-credit course to satisfy the Theatre practicum requirement for theatre majors and minors. Students should register for this course when participating in Theatre Department production activities such as design or assistant design, load-in or run crews, board operators, carpenters, electricians, stitchers and painters. May be taken more than once.
- **THETR-120 Theatre Practicum**

  **Credits:**
  
  0.00

  **Description:**
  
  Non-credit course to satisfy the Theatre practicum requirement for theatre majors and minors. Students should register for section A for performance activities such as acting, directing, and writing, and section B for production related activities such as tech crew, design, and running shows. Stage management may fulfill either category. May be taken more than once.

- **THETR-127 Dynamic Speaking Techniques**

  **Credits:**
  
  4.00

  **Description:**
  
  Dynamic Speaking Techniques provides students with an essential foundation to help ensure the safe and effective use of the voice for use in spoken presentation. Topics will include vocal health and anatomy, posture and alignment, relaxation, breath support, placement, resonance, and the care and protection of the voice under normal and stressful situations. Students will learn a disciplined approach to writing and executing dynamic spoken presentations. This is a studio course with a written component.

- **THETR-129 Acting**

  **Credits:**
  
  4.00
This introduction to acting prepares students for work in production and develops skills in all forms of communication. The first part of the course uses improvisational exercises based on the Stanislavski method to teach fundamental acting techniques. The second half of the course applies those techniques to scene work from major 20th century plays. This course is a core requirement for all Theatre Majors.

**Term:**

Offered Both Fall and Spring

- **THETR-139 Vocal Technique**
  
  **Credits:**

  4.00

  **Description:**

  Vocal Technique provides students with an essential foundation to help ensure the safe and effective use of the speaking and singing voice. Topics will include alignment, relaxation, breath support, placement, resonance, vocal anatomy, and the care and protection of the voice under normal and stressful situations. Students will do oral presentations and have the option of singing in a master class setting. This is a studio course with a written component.

  **Term:**

  Offered Both Fall and Spring

- **THETR-140 Dance: Jazz I**
  
  **Credits:**

  4.00

  **Description:**

  This largely experiential course with a written component introduces students to the fundamentals of jazz. Classes will consist of a warm-up followed by floor exercises and sequences. Students will choreograph their own dances individually or in groups to be performed at the end of the semester. Students are expected to dress in dance attire. No dance experience is required. Normally offered every year.
• THETR-144 Dance Essentials I

Credits:
4.00

Description:
This is a course for the student who always wanted to learn the basics of dance as well as the student returning to dance. Class work includes centering, attention to placement, and the development of strength, flexibility, and musicality. Students will learn to think and write critically about the form. Dance attire is required.

Term:
Occasional

• THETR-150 Dance: Jazz II

Credits:
4.00

Description:
An exploration of jazz technique and style with students at the beginner to intermediate level. This is a largely experiential course with a written component. Classes will consist of a warm-up followed by more challenging floor exercises and sequences. Students are expected to dress in dance attire. Students will choreograph their own dances individually or in groups to be performed at the end of the semester. Some dance experience is required.

• THETR-151 Introduction to Design

Credits:
4.00

Description:
This rigorous class will give students the fundamental concepts, vocabulary and skills used to design for the stage such as: color, line, composition, research and script analysis. The class has a written component and is intended to prepare students to design workshop productions in the Studio Theatre. Students will be expected to complete a minimum of ten hours of production work for Theatre Department productions.
- **THETR-152 Introduction to Stagecraft**

  Credits: 4.00

  **Description:**

  This rigorous survey class will give students the fundamental concepts, vocabulary, and skill to implement basic scenery, lighting, costuming, props and sound. The class is intended to prepare students as technical support for workshop productions in the Studio Theatre. There is a written component and students will be expected to complete a minimum of ten hours of technical work on Theatre Department productions.

- **THETR-187 Intro to Stage Management**

  Credits: 4.00

  **Description:**

  This course will teach both the methods and principles behind stage management demonstrating how to support a production while facilitating the work of directors, designers, and actors. In addition to teaching the specific technical skills necessary to each part of the production process, this course will also address the more subtle intellectual and managerial skills that make stage management an art. Satisfies a core requirement for Theatre majors.

- **THETR-200 Theatre Practicum: Performance**
Prerequisites:
Theatre majors or minors or instructor’s consent

Credits:
1.00- 8.00

Description:
This course offers flexible credit for a wide range of production work in the Theatre Department determined by the challenge and time commitment of the assignment. Students should register for this course when participating in Theatre Department performance activities such as acting, directing, playwriting, dramaturgy, choreography, or stage management may. Written work includes a production log signed by the supervisor and a narrative journal. This course also satisfies the Theatre requirement for Theatre majors and minors. May be taken more than once. ECR

Term:
Offered Both Fall and Spring

• THETR-232 Acting for the Camera

  Prerequisites:
  THETR-229 or instructor's consent

  Credits:
  4.00

  Description:
  This course gives students an understanding of the acting challenges unique to film, television, and commercial acting and helps them develop an effective process for on-camera performance. The material in this class is drawn from various media as well as from students' own research and writing. Class exercises and presentations are video taped, viewed, and critiqued by the students and the instructor as students grow and learn. Students also become familiar with the language and demands of professional production as well as how the technical process affects their performance.

  Term:
  Offered Fall Term

• THETR-233 Vocal Coaching I

  Credits:
  4.00

  Description:
  Focusing on classic musicals from 1980 to 1995, this studio course provides the technical tools and practical experience to significantly increase confidence and expressiveness in musical theatre performance. Students study the fundamentals of music theory to strengthen their musical literacy,
sharpen their analytical skills, and stimulate their growing independence as an artist. The course also helps students to more fully appreciate the organic and symbiotic nature of music and drama. Students are encouraged to perform regularly in class and to take advantage of private coaching sessions outside of class. Students will learn to think and write critically about the form. At the end of the term students perform in a musical theatre performance for an invited audience. Normally offered alternate years.

Term:
Occasional

• THETR-234 Acting the Song

Credits:
4.00

Description:
This studio course will focus on techniques to develop fresh, organic interpretations of musical theatre songs that illuminate not only the nuances of the music and lyric but the character singing as well. Working with classic musicals from the 1920s - 1940s, students engage in musical and dramatic analysis of the libretto and score and the historical and theatrical contexts of the musical. They are provided regular in-class performance opportunities and private vocal coaching outside of class. At the end of the term students present scenes and songs in a recital for an invited audience. Normally offered alternate years.

This rigorous survey class will give students the fundamental concepts, vocabulary, and skill to implement basic scenery, lighting, costuming, props and sound. The class is intended to prepare students as technical support for workshop productions in the Studio Theatre. There is a written component and students will be expected to complete a minimum of ten hours of technical work on Theatre Department productions.

Term:
Offered Fall Term

• THETR-251 Introduction to Design

Credits:
4.00

Description:
This rigorous class will give students the fundamental concepts, vocabulary and skills used to design for the stage such as: color, line, composition, research and script analysis. The class has a written component and is intended to prepare students to design workshop productions in the Studio Theatre. Students will be expected to complete a minimum of ten hours of production work for Theatre Department productions.

Term:
Offered Spring Term

• THETR-253 Modern Dance II

Credits:
4.00
This course is designed to be a continuation of Modern Dance I with more challenging choreography. The writing component of this class will focus on post-1950s choreographers as well as special topics and current events in the modern dance world. Proper dance attire required.

**THETR-260 Broadway Musicals**

**Credits:**
4.00

**Description:**

This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

**Term:**
Offered Fall Term

**Type:**
Humanities & History, Cultural Diversity Opt A, Humanities Literature Requirement

**THETR-263 Sabar: Music and Dance of Senegal**

**Credits:**
4.00

**Description:**

This course explores the history and practice of music and dance in Senegal, West Africa taught through lectures, readings, and studio classes which are accompanied by live African drumming. Proper dance attire is required.

**Term:**
Offered Spring Term
• THETR-265 Introduction to Theatre: Prehistory to Melodrama

Credits:
4.00

Description:
This survey course provides students with an historical, philosophical, and aesthetic overview of theatre practices from the Golden Age of Greek drama to 19th-century melodrama and early experiments in realism. Through readings, lectures, and discussions, the class will explore the theatre's persistent capacity to mirror the societies that produce it. Satisfies a core requirement for Theatre majors and the Humanities requirement. Normally offered alternate years.

Term:
Occasional

Type:
Cultural Diversity Opt B

Humanities & History

Humanities Literature Requirement

• THETR-H266 Intro to Theatre: Twentieth Century

Credits:
4.00

Description:
Picking up chronologically where THETR 225 leaves off, this survey course is designed to provide students with an understanding of modern Western theatre. Beginning with a melodrama, plays will include representative works of realism, naturalism, expressionism, epic theatre, theatre of cruelty, theatre of the absurd, and metatheatricality. Lectures and class discussions will explore how these concepts translate to acting and production techniques as well as what they imply as artistic responses to a modern and post-modern world. Satisfies a core requirement for Theatre Majors.

• THETR-267 Introduction to Theatre Arts III
This course provides a formal introduction to the theories and practices strategically used by American theatre artists after the Second World War. Special emphasis is placed on theatre artists exploring issues of cultural identity including works by GLBT, African-American, Asian-American, and Latin American playwrights. These playwrights may include Tony Kushner, Paula Vogel, Suzan-Lori Parks, Adrienne Kennedy, August Wilson, David Henry Hwang, Philip Kan Gotanda, Eduardo Machado, and Melinda Lopez. The course will also provide an introduction to trends in post-modern theatre practices related to emerging work of the auteur director, solo performers, and interdisciplinary collectives. Satisfies a core requirement for Theatre majors. Normally offered alternate years.

- **THETR-273 Audition Training**

  Credits:
  4.00

  Description:
  Learning how to prepare for effective auditions is essential training for anyone who wishes to be cast in theatre productions. This studio course will provide practical guidelines and useful strategies to help students be at their best during the always competitive audition process. Over the course of the term students will not only prepare to participate confidently in professional and non-professional auditions, but learn to enjoy the journey as well.

  Term:
  Offered Fall Term

- **THETR-281 Arts Administration I**

  Credits:
4.00

Description:
The last twenty-five years have seen extraordinary growth in the number of performing and visual arts organizations. As a result, skilled and dedicated personnel are in short supply. This survey course will provide a fundamental overview of the managing, marketing, fundraising, and financial management functions of both performing and visual arts organizations.

• THETR-289 Managing the Start-Up Arts Organization

Credits:
4.00

Description:
Managing a start-up arts organization requires not only the financial, programming, development and interpersonal skills of day-to-day arts management, but the additional creative and imaginative abilities to attract and manage stakeholders, brand the organization, and create governance and hierarchical structures. Using Suffolk’s new Modern Theatre as a laboratory, we will investigate the process of starting-up, how it differs from organization to organization, and what special talents each individual student can bring to the management mix. Reading and writing are required for the course, as well as specific work projects either at the Modern or at a local start-up.

Term:
Occasional

• THETR-299 Vocal Technique

Credits:
4.00

Description:
Vocal Technique provides students with an essential foundation to help ensure the safe and effective use of the speaking and singing voice. Topics will include alignment, relaxation, breath support, placement, resonance, vocal anatomy, and the care and protection of the voice under normal and stressful situations. Students will do oral presentations and have the option of singing in a master class setting. This is a studio course with a written component.

Term:
• **THETR-301 Acting the Song I**

  Credits:
  
  4.00

  Description:
  
  This studio course will focus on techniques to develop fresh, organic interpretations of musical theatre songs that illuminate not only the nuances of the music and lyric but the character singing as well. Working with classic musicals from the 1920s - 1940s, students engage in musical and dramatic analysis of the libretto and score and the historical and theatrical contexts of the musical. They are provided regular in-class performance opportunities and private vocal coaching outside of class. At the end of the term students present scenes and songs in a recital for an invited audience. Normally offered alternate years.

  Term:
  
  Occasional

• **THETR-302 Acting the Song II**

  Credits:
  
  4.00

  Description:
  
  A continuation of Acting the Song I, focusing on classical musical theatre repertoire from the 1950s-1970s. Normally offered alternate years.

  Term:
  
  Occasional

• **THETR-303 Vocal Coaching I**

  Credits:
  
  4.00
Focusing on classic musicals from 1980 to 1995, this studio course provides the technical tools and practical experience to significantly increase confidence and expressiveness in musical theatre performance. Students study the fundamentals of music theory to strengthen their musical literacy, sharpen their analytical skills, and stimulate their growing independence as an artist. The course also helps students to more fully appreciate the organic and symbiotic nature of music and drama. Students are encouraged to perform regularly in class and to take advantage of private coaching sessions outside of class. Students will learn to think and write critically about the form. At the end of the term students perform in a musical theatre performance for an invited audience. Normally offered alternate years.

Term:
Occasional

- THETR-304 Vocal Coaching II

Credits:
4.00

Description:

This course is a continuation of Vocal Coaching I focusing on the music of living composers from 1996 to the present. Students may sign up for private coaching sessions as part of their weekly preparation for the course. Students will learn to think and write critically about the form. Normally offered alternate years.

Term:
Occasional

- THETR-307 Playwriting I

Credits:
4.00

Description:

An introduction to playwriting, students will be required to submit weekly assignments which explore and refine fundamental components of the dramatist's craft including plot, character, conflict, voice, dialogue, rhythm, point of view, surprise, structure, and style. Students are encouraged to participate in both Play Day!, an annual reading of new student-written plays, and the American College Theatre Festival.
• THETR-309 Managing the Start-Up Arts Organization

Credits:
4.00

Description:
Managing a start-up arts organization requires not only the financial, programming, development and interpersonal skills of day-to-day arts management, but the additional creative and imaginative abilities to attract and manage stakeholders, brand the organization, and create governance and hierarchical structures. Using Suffolk’s new Modern Theatre as a laboratory, we will investigate the process of starting-up, how it differs from organization to organization, and what special talents each individual student can bring to the management mix. • THETR-319 Study Abroad: Flamenco in Madrid

Prerequisites:

Permission of Instructor

Credits:

4.00

Description:

This is a three week, four credit, faculty led intensive course in Flamenco dance. The study of Flamenco immerses students in the rich cultural heritage of Spain's most popular and passionate art form. This unique program blends studio classes in the heart of Madrid with a study of the vibrant history and culture of Spain. Students interested in study abroad are encouraged to take language courses in the Humanities Department.

Term:

Occasional

Type:

Expanded Classroom Requirement, Cultural Diversity Opt B

• THETR-322 Acting for the Camera

Prerequisites:

THETR-129 or instructor's consent

Credits:

4.00

Description:

This course gives students an understanding of the acting challenges unique to film, television, and commercial acting and helps them develop an effective process for on-camera performance. The material in this class is drawn from various media as well as from students' own research and writing. Class exercises and presentations are video taped, viewed, and critiqued by the students and the instructor as students grow and learn.
Students also become familiar with the language and demands of professional production as well as how the technical process affects their performance.

Term:

Offered Fall Term

- **THETR-323 Audition Training**

  Credits:
  4.00

  Description:
  Learning how to prepare for effective auditions is essential training for anyone who wishes to be cast in theatre productions. This studio course will provide practical guidelines and useful strategies to help students be at their best during the always competitive audition process. Over the course of the term students will not only prepare to participate confidently in professional and non-professional auditions, but learn to enjoy the journey as well.

Term:

Offered Fall Term

- **THETR-325 Women on Stage**

  Credits:
  4.00

  Description:
  How do playwrights of different backgrounds and genders interpret female-ness? This class explores some of the great heroines of dramatic literature, as well as female playwrights and performers. Students will be encouraged to indulge their taste for drama, as well as ask deeper questions about how women on stage are presented, perceived, and constructed. Students will read, write and discuss plays in terms of their structure, plot, theme, and characterizations. Class activities may include watching videos and attending live theatrical productions.

Term:

Occasional

Type:
• THETR-329 Acting II

Prerequisites:

THETR 229 or instructor's consent

Credits:

4.00

Description:

A continuation of Acting I with special emphasis on verse and heightened language. Students will explore acting Shakespeare and other classical plays and will rehearse and perform short projects. Students will also learn to think, read and write about classical performance.

Term:

Offered Fall Term

• THETR-331 Set Design

Prerequisites:

Take THETR-237 THETR-250 or THETR-251; or instructor's consent

Credits:

4.00

Description:

This is a studio course exploring the process of interpreting dramatic scripts in visual, three-dimensional ways. Projects will include abstract visual responses, group installations, enacting texts, visual research and textual analyses as well as ground plans and models for sets. Students will need a variety of painting and drawing supplies and equipment. A willingness to think beyond the box set to discover vital ways to shape a production is essential.

Term:

Offered Spring Term
- THETR-332 Acting for the Camera II

Prerequisites:
Take THETR-232 or Instructor's consent

Credits:
4.00

Description:
Applying skills introduced in Acting for the Camera I, students produce and perform in a showcase video with more demanding material. Included in this course is a focus on the business of film and television work as it affects an acting career. From auditioning skills to on-set work ethics, students will work in class and on film locations to experience the realities of the film and television industries and learn to think and write critically about on camera performance. Each student will have the opportunity to put together a demo reel showcasing their acting work prepared for class.

Term:
Offered Spring Term

- THETR-333 Singing for the Stage: Rock, Pop, & Progressive

Credits:
4.00

Description:
Focusing on classic rock, pop, and progressive musicals from the 1970s-1990s, this studio course provides students with an integrated approach to singing through sound vocal and acting technique. Students will learn the discipline of vocal warm-ups, music and dramatic analysis, and phrasing in order to make them more effective performers and they will be introduced to elementary music theory, sight singing, and how to identify notes on a piano to make them more independent and confident performers. Assigned solos and choreographed group numbers will be presented weekly in class and at the end of the term in a recital for an invited audience.

Term:
- **THETR-334 Singing for the Stage: Acting the Song II**

  Credits: 4.00

  Description:

  A continuation of Acting the Song I, focusing on classical musical theatre repertoire from the 1950s-1970s. Normally offered alternate years.

  Term:

  Occasional

- **THETR-335 Graphic Skills for the Theatre**

  Credits: 4.00

  Description:

  A skills course concentrating on sketching and drafting for the theatre. The course builds on knowledge introduced in Introduction to Stagecraft and Introduction to Design and supports three areas of design training: set design, costume design and lighting design. Although intended for design and technical students, other students, such as stage managers and directors, could draw valuable information and insights from the course, as well. Normally offered alternate years.

  Term:

  Occasional

- **THETR-337 Stage Management II**

  Credits: 4.00
Building on the skills learned in Stage Management I, Stage Management II will provide an in-depth study of how to support and manage rehearsals and performances of diverse genres such as opera, dance, and theatre. Special attention will be paid to anticipating a wide range of needs from professional artists, union regulations, cueing and calling shows; and to further develop student's communication skills. Internships with professional arts organizations may be arranged. Normally offered every other year.

Term:
Occasional

• THETR-339 Lighting Design

Prerequisites:
Take THETR-237 THETR-250 or THETR-251; or instructor's consent

Credits:
4.00

Description:
Students will explore the basic process of lighting design for the theatre through hands-on, practical experience, conceptual work, and a study of the history of lighting design. The course will focus on common vocabularies, descriptions of imageries from text, physical forms of design expression and general approach. In addition, students will learn basic skills in electrics to support the design process. Sample assignments might include written critiques of local productions, design approach statements with lighting research, lighted one act plays in the Studio Theatre, and lighting set models. Normally offered alternate years.

Term:
Occasional

• THETR-345 Broadway Dance

Credits:
4.00

Description:
Grounded in the fundamentals of dance, this course will focus on the rigors and vitality of dances created for the Broadway musical. Students will learn about the history of Broadway dance and will present choreography developed in class at the end of the semester for an invited audience. Students will learn to think and write critically about the form. Dance attire is required.

Term: Occasional

THETR-347 The Art and Artistry of Calling a Show

Prerequisites:

THETR-237 or instructor's consent

Credits: 4.00

Description:

In calling a show the stage manager cues all technicians to effect changes in lighting, sound, flying elements and special effects during performances. A well-called show is an artistic achievement no less than a well-acted, directed or designed show. Building on the ability to make a complete and accurate stage manager's book learned in Intro to Stage Management, this course will teach calling skills for theatre, opera, dance and performance art. The course will demonstrate the construction of cues and how they promote the artistic vision of the production. In-class work will utilize the Studio Theatre and give students real-time opportunities for calling cues, and will include play reading and analysis. Outside class work will include attending and writing analyses of professional performances.

Term: Occasional

THETR-356 Introduction to Costume Design

Prerequisites:

THETR 250 OR THETR 251 or by instructors permission

Credits: 4.00
This is a comprehensive studio course with a written component. The course explores many aspects of the design process including concept, research, collaboration, and full renderings. Normally offered alternate years.

**THETR-359 Lighting Design**

**Prerequisites:**
Take THETR-187 THETR-152 or THETR-151; or instructor's consent

**Credits:**
4.00

**Description:**
Students will explore the basic process of lighting design for the theatre through hands-on, practical experience, conceptual work, and a study of the history of lighting design. The course will focus on common vocabularies, descriptions of imageries from text, physical forms of design expression and general approach. In addition, students will learn basic skills in electrics to support the design process. Sample assignments might include written critiques of local productions, design approach statements with lighting research, lighted one act plays in the Studio Theatre, and lighting set models. Normally offered alternate years.

**Term:**
Occasional

**THETR-361 Combat, Clown and Characters**

**Prerequisites:**
THETR-201 OR THETR-229 or instructor's consent

**Credits:**
4.00

**Description:**
Students compliment their practical theatre training with a wide range of physical and vocal skills. This three part class focuses on the art of creating a clown, the ability to safely build and execute a stage fight, and special work on creating a three dimensional character for the stage. Normally offered
• THETR-362 Women on Stage

Credits:

4.00

Description:

How do playwrights of different backgrounds and genders interpret female-ness? This class explores some of the great heroines of dramatic literature, as well as female playwrights and performers. Students will be encouraged to indulge their taste for drama, as well as ask deeper questions about how women on stage are presented, perceived, and constructed. - **THETR-400 Playwriting I**

  Credits:
  4.00

  Description:

  An introduction to playwriting, students will be required to submit weekly assignments which explore and refine fundamental components of the dramatist's craft including plot, character, conflict, voice, dialogue, rhythm, point of view, surprise, structure, and style. Students are encouraged to participate in Play Day!, an annual reading of new student-written plays. Normally offered every year.

- **THETR-401 Playwriting II**

  Credits:
  4.00

  Description:
A course designed for serious writers. Each week students will share works-in-progress to be read and discussed. Students will also be assigned short plays to analyze in class. All Playwriting II students will be expected to bring a sample of their work to the first class. Students are encouraged to participate in Play Day!, an annual reading of new student-written plays. Prerequisite: Playwriting I or by permission of the instructor 1 Term - 4 Credits Normally offered alternate years.

- THETR-402 Vocal Coaching III
  
  Prerequisites:
  
  Instructor's consent required
  
  Credits:
  
  4.00
  
  Description:
  
  A rigorous, fast-paced studio course for motivated students with demonstrated proficiency in musical theatre performance. Building on basic music and acting theory explored in Vocal Coaching I and II and Acting the Song I and II, students will be expected to analyze and perform challenging new and known songs representing a wide range of styles and periods. Students will also be expected to write and think critically about musical theatre performance and prepare for at least one professional musical theatre audition outside the university. The class will culminate in a recital for an invited audience.
  
  Term:

- THETR-403 Solo Performance
  
  Prerequisites:
  
  THETR-229 or THETR-425 or instructor's consent
  
  Credits:
  
  4.00
  
  Description:
This advanced level acting course introduces students to the world of performance art utilizing research, writing and performance techniques. Source material may be fictional, historical, personal or contemporary figures of particular interest to the student. Students will research and create their own pieces to be performed at the end of the term for an invited audience.

Term:

Offered Spring Term

- THETR-405 Play Analysis

Credits:

4.00

Description:

This seminar course examines Shakespeare's plays and their modern correlatives. (i.e. Hamlet and The Seagull, King Lear and Endgame) Students read the texts out loud in class examining the meaning, action, objective, and philosophical and historical contexts with the professor. The goal is to get closer to the original intentions of the author and determine not only the basic theme and character relationships, but the kind of mind that could create such a play. In analyzing a modern play students also examine the impact of Shakespeare's mind on future playwrights. There will be a midterm paper and a final exam.

Term:

Offered Fall Term

- THETR-407 Playwriting II

Prerequisites:

THETR-307 or instructor's consent

Credits:

4.00

Description:

Playwriting II is a continuation, deepening and thickening of the principles learned in Playwriting I. A course designed for dedicated writers, students are expected to explore a wide variety of playwriting challenges, skills and techniques. Student works will be regularly shared and discussed in class.
Students will also be assigned plays by recognized playwrights to discuss and analyze in class. Playwriting II students are encouraged to participate in "PlayDay!", an annual reading of new student-written plays. Normally offered alternate years.

Term:
Occasional

- **THETR-411 Experimental Theatre Ensemble**

  **Prerequisites:**
  By invitation by Professor Savick.

  **Credits:**
  8.00

  **Description:**
  This course is intended to serve as a professional internship for students who have demonstrated superior dedication and ability in their work within the Theatre Department. In 2004, Professor Wesley Savick launched a theatre company whose mission is to create original, experimental, political theatre in Boston. The company is comprised exclusively of Suffolk University students and was conceived to provide select students with a transitional opportunity between their undergraduate experience and the professional world. Students may apply by submitting a letter of interest to the Theatre Department by the end of the Fall term.

- **THETR-417 Senior Thesis Project**

  **Prerequisites:**
  Instructor's consent required

  **Credits:**
  4.00-8.00

  **Description:**
  Theatre majors who have demonstrated academic excellence as well as involvement in department productions have the opportunity to work with a faculty advisor during their senior year to focus intensively on a specific area of interest. An extensive reading list will be determined early in the fall
semester and regular meetings with the advisor will be scheduled to guide this course of study. The Senior Honors Project may also include a production project related to the topic. Successful completion of this course confers departmental honors to graduating Theatre majors.

Term:
Offered Both Fall and Spring

- **THETR-418 Professional Internships**
  
  Prerequisites:
  
instructor's consent and internship availability required
  
  Credits:
  
  1.00- 4.00
  
  Description:
  
  This course provides students with the opportunity to receive credit for their work on an approved internship assignment in the professional performing and visual art world. At the successful completion of the internship, students will be required to submit a written analysis of their experience as well as a journal documenting the daily events of their project. Professional internships are difficult to secure. Interested students are advised to contact members of the Theatre Department faculty at least one semester in advance to facilitate this opportunity.
  
  Term:
  
  Offered Both Fall and Spring

- **THETR-421 Combat, Clown and Characters**
  
  Prerequisites:
  
  THETR-201 OR THETR-229 or instructor's consent
  
  Credits:
  
  4.00
  
  Description:
Students compliment their practical theatre training with a wide range of physical and vocal skills. This three part class focuses on the art of creating a clown, the ability to safely build and execute a stage fight, and special work on creating a three dimensional character for the stage. Normally offered alternate years.

- **THETR-444 Choreography I**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course encourages students to develop a broad palette of choreographic tools drawn from the work of early modern choreographers and theorists and post-modern techniques. The process of the class will include structured improvisations, analysis of historical and contemporary dance works, the development of a critical response process, journaling, and the creation of original solo and group work. Additionally, students will attend two dance concerts throughout the semester and submit written critiques of each performance. The class will culminate in the performance of self-selected compositions for an invited audience. Proper dance attire is required.

- **THETR-450 Special Topics in Theatre**
  
  **Prerequisites:**
  
  Instructor's consent required.
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course is designed by the Theatre Department to serve as an intensive exploration of a special topic in theatre and/or performance studies.

- **THETR-451 Set Design II**
  
  **Prerequisites:**
  
  THETR 331 or Instructor's Consent
  
  **Credits:**
  
  4.00
  
  **Description:**
Taking up where THETR 331 left off, Set Design II is a studio course exploring the process of interpreting dramatic scripts in visual, three-dimensional ways at a much higher level of project realization. In addition to class work, students will develop advanced skills in model building, drafting and painting through independent studio work and individual meetings with the professor outside of class. Students will need a variety of painting and drawing supplies and equipment. Meets concurrently with Set Design I.

Occasional

**THETR-455 The American Resident Theatre**

Credits:
4.00

Description:
This course will examine some of the principal art theatres in this country beginning with the early days of the Provincetown Players and continuing up to the present day. By examining material about their histories, often written by their founding directors, students will determine when these theatres fed off each other's ideas and ideals, and when they set off in entirely new directions. The course will also explore the viability of not-for-profit institutions in a corporate society.

Term:
Occasional

**THETR-460 A House for Words to Live In**

Prerequisites:

Prerequisites: THETR225 or THETR226, or THETR227 and THETR250 or THETR251 or THETR237 (or permission of the instructor)

Credits:
4.00

Description:
An upper level course, of interest to directors and dramaturges as well as designers, about a remarkable period in American theatre history, explored within the context of four stage designers and the playwrights with whom they collaborated. Scripts by O'Neil, Williams, Miller, and Odets will be
studied in conjunction with their revelatory original designs, which have become as iconic as the plays themselves. The designer’s process, the collaborative nature of theatrical production, and the advances in theatre technology will also be explored. The course will have a seminar format, require independent reading and research, and be writing intensive, culminating with a final term paper presented to the class.

Term:

Occasional

- **THETR-461 Play Analysis**

  Credits:

  4.00

  Description:

  This seminar course examines Shakespeare's plays and their modern correlatives. (i.e. Hamlet and The Seagull, King Lear and Endgame) Students read the texts out loud in class examining the meaning, action, objective, and philosophical and historical contexts with the professor. The goal is to get closer to the original intentions of the author and determine not only the basic theme and character relationships, but the kind of mind that could create such a play. In analyzing a modern play students also examine the impact of Shakespeare's mind on future playwrights. There will be a midterm paper and a final exam.

• THETR-475 Directing II
Directing II focuses on the development of an individual directorial point of view and explores a variety of theoretical and applied approaches to cultivating interpretive skills. The course also examines how the director reconciles traditional theatrical conventions and techniques with the ability to create fresh, innovative and personal results. Students will stage weekly theatrical responses to class readings in addition to creating a fully-realized final directing project.

Term:

Offered Spring Term

• THETR-477 Playwriting II

Prerequisites:

THETR-377 or instructor's consent

Credits:

4.00

Description:

Playwriting II is a continuation, deepening and thickening of the principles learned in Playwriting I. A course designed for dedicated writers, students are expected to explore a wide variety of playwriting challenges, skills and techniques. Student works will be regularly shared and discussed in class. Students will also be assigned plays by recognized playwrights to discuss and analyze in class. Playwriting II students are encouraged to participate in PlayDay!, an annual reading of new student-written plays. Normally offered alternate years.

Term:

Occasional

• THETR-481 Arts Administration II
Prerequisites:

THETR 491

Credits:

4.00

Description:

In this course, we will see how the administrative functions discussed in Arts Administration I work in different kinds of arts organizations. Using actual cases from the world of performing and visual arts, we will explore the operations for profit and non-profit arts producers and presenters, art service organizations, and many kinds of funding institutions. We will also discuss various approaches to arts administration in an international context. The course may include an internship with an arts organization in Boston.

- THETR-487 Stage Management II

Credits:

4.00

Description:

Building on the skills learned in Stage Management I, Stage Management II will provide an in-depth study of how to support and manage rehearsals and performances of diverse genres such as opera, dance, and theatre. Special attention will be paid to anticipating a wide range of needs from professional artists, union regulations, cueing and calling shows; and to further develop student's communication skills. Internships with professional arts organizations may be arranged. Normally offered every other year.

Term:

Occasional

- THETR-488 Professional Internships

Prerequisites:

instructor's consent and internship availability required

Credits:

1.00- 4.00
This course provides students with the opportunity to receive credit for their work on an approved internship assignment in the professional performing and visual art world. At the successful completion of the internship, students will be required to submit a written analysis of their experience as well as a journal documenting the daily events of their project. Professional internships are difficult to secure. Interested students are advised to contact members of the Theatre Department faculty at least one semester in advance to facilitate this opportunity.

Term:

Offered Both Fall and Spring

- **THETR-507 Senior Thesis Project**

  Prerequisites:

  Instructor's consent required

  Credits:

  4.00-8.00
Theatre majors who have demonstrated academic excellence as well as involvement in department productions have the opportunity to work with a faculty advisor during their senior year to focus intensively on a specific area of interest. An extensive reading list will be determined early in the fall semester and regular meetings with the advisor will be scheduled to guide this course of study. The Senior Honors Project may also include a production project related to the topic. Successful completion of this course confers departmental honors to graduating Theatre majors.

- **THETR-509 Study Abroad: Flamenco in Madrid**
  
  **Prerequisites:**
  
  Permission of Instructor
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This is a three week, four credit, faculty led intensive course in Flamenco dance. The study of Flamenco immerses students in the rich cultural heritage of Spain's most popular and passionate art form. This unique program blends studio classes in the heart of Madrid with a study of the vibrant history and culture of Spain. Students interested in study abroad are encouraged to take language courses in the Humanities Department.

- **THETR-510 Independent Study**
  
  **Prerequisites:**
  
  Instructor's consent required
Variable credits for approved projects outside the classroom. Since all independent studies must be approved by the Dean's Office, all interested students must be able to persuasively articulate their proposal in writing and include both an annotated reading list and a schedule of meetings with faculty supervisors.

Term:

Offered Both Fall and Spring

- **WGS-111 Women, History, & Culture**

  Credits:

  4.00

  Description:

  This interdisciplinary course explores the roles and images of women in Western culture. Through class discussion and a close reading of texts from literature, film, history, art, psychology, and recent feminist scholarship, we will examine the realities of women's everyday lives and analyze gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics will include the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science. • WGS-115 Introduction to Gender Studies

Credits:

4.00

Description:

This interdisciplinary course provides an introduction to the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women's studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, we will examine the pervasive influence of gender on the structure of society and our everyday experiences. What role does gender play in our understanding of love, friendship, sexuality, and even violence? Topics will include biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

Cultural Diversity Opt A
**WGS-211 Heroines, Hotties & Hubris: Adolescent Girl's Books**

Credits: 4.00

Description:

What can we learn from the books that teenage girls read? Our fondest memories of reading are often also memories of our earliest encounters with books - particularly those so mesmerizing that we would read them under our desks or by flashlight long after bedtime. This class will introduce students to some of the most interesting and complex Young Adult books targeted to young female readers. In addition to a wide array of novels, students will be exposed to theories of adolescent development, literary criticism, and social theory. We will consider how the dilemmas of girlhood have changed or stay constant. We'll also investigate the urge, so common in books for children and teens, to teach kids how to think and behave - what do we want teenage girls to know, and when would we rather keep them childlike and unaware?

Term:
Occasional

Type:
Cultural Diversity Opt A

**WGS-311 Engendering Entertainment: Feminism and Popular Culture**

Credits: 4.00

Description:

This course will investigate the complex intersections between feminism and popular culture through several different lenses. We will start by exploring some of the ways that feminists make arguments about popular culture. We will continue by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy. We will also look at a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How to Be a Woman, among others. Along the way we will be asking questions such as: what makes a work of art feminist? How does modern media contribute to or distract us from a variety of political debates in the realm of female equality? How can we, as individuals, use modern media to create and advance smart, feminist arguments? How can we create media that reflects a broader array of women's experiences and perspectives?

Type:
• WGS-315 Feminist Thought

Credits:
4.00

Description:
What is feminist thought? How have feminists - both today and in history - understood inequality and difference, and what have they seen as the best ways to address these issues and bring about social justice? How do feminist theories help us to understand how gender and other social categories, such as race, class, sexuality, disability, age, and nationality, are constructed within and through each other? Students will read classic critical texts by authors including Mary Wollstonecraft, Anna Julia Cooper, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldúa, and Judith Butler. The course will analyze feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory. It will also consider anti-feminist arguments.

Type:
Cultural Diversity Opt A

• WGS-320 Writing Autobiography

Credits:
4.00

Description:
This interdisciplinary course explores autobiographies by African American, Hispanic, and Afro-Caribbean writers such as June Jordan, Edwidge Danticat, and Cornelius Eady. Other writers include David Sedaris and Lucy Grealy. Students will analyze these texts in terms of language, writing craft and story line. Students will also write their own autobiographies during the course of the semester by focusing on childhood memories, high school, and family life. Critical attention will be paid to the role race, class, ethnicity, gender and sexuality play in narrative identity. Students will learn creative writing techniques such as linear and nonlinear storytelling, dialogue, fantasy, showing verses telling, and monologue.

Term:
Occasional

Type:
• WGS-325 Global Women's Fiction

Credits: 4.00

Description:
An exploration of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic. A central theme of the course will be the analysis of the notions of female culture and image in an international and interdisciplinary context.

Term: Occasional

Type: Humanities Literature Requirement, Cultural Diversity Opt B

• WGS-510 Independent Study

Prerequisites:
An Independent Study form must be submitted to the CAS Dean's Office.

Credits: 4.00

Description:
Substantive reading/research in an area of special interest in Women's and Gender Studies, directed by a faculty member in the appropriate academic discipline. Open to Juniors and Seniors by special arrangement with the relevant faculty member and the Director of Women's and Gender Studies. Instructor's permission required.

Type:
