- Sawyer Business School

- ADF-181 Ideas of Western Art I

  Credits:
  4.00

  Description:
  This course will survey the major concepts and issues of Western Art, from prehistoric to the Early Renaissance. Architecture, sculpture and paintings will be studied individually for their formal elements and visual importance, and also within their own aesthetic, historic and cultural context. Class discussion and visual analysis of works of art will encourage personal interpretation and critical thinking.

  Term:
  Offered Fall Term

  Type:
  Humanities & History, Humanities Literature Requirement

- ADF-182 Ideas of Western Art II
This course will survey the major concepts and issues of Western Art, from Renaissance to contemporary art. Architecture, sculpture and paintings will be studied individually for their formal elements and visual importance, and also within their own aesthetic, historic and cultural context. Class discussion and visual analysis of works of art will encourage personal interpretation and critical thinking.

Term:
Offered Spring Term

Type:
Humanities & History, Humanities Literature Requirement

ADF-S101 Foundation Drawing I

Credits:
3.00

Description:

This course concentrates on the traditional techniques of observational drawing. Fundamental principles and elements of drawing are introduced in structured lessons and exercises, which are supplemented by additional outside assignments. Foundation Drawing I stresses the development of visual skills as well as the broad use of drawing concepts, vocabulary, techniques and variety of materials.

Term:
Offered Both Fall and Spring

Type:
Arts Admin Minor Elective

ADF-S102 Foundation Drawing II

Prerequisites:
ADF S101

Credits:
3.00

Description:
This course will refine the basic visual skills developed in Foundation Drawing I (ADF S101). The elements of color and mixed media are introduced to expand technical possibilities, while more intensive work with the nude human figure provides exposure to gesture, structure and complex form. As students begin to develop a more sophisticated and personal approach, issues of expression and interpretation will be investigated, focusing on personal style and expression.

Term:
Offered Both Fall and Spring

- ADF-S123 Painting

  Prerequisites:
  ADF S101, ADF S166

  Credits:
  3.00

  Description:
  In this introductory course, students will learn to accurately perceive relationships of shape, form, color and value, and to translate that information through the medium of paint. In a series of in-class and outside projects on canvas, prepared paper and panel, students will explore various approaches to the use of acrylic and oil paint. Emphasis will be placed on the development of disciplined technical skills as well as the exploration of painting's potential as a medium of communication and creative visual expression.

  Term:
  Offered Spring Term

- ADF-S143 Color

  Prerequisites:
Intended for majors only

Credits: 
3.00

Description:

This course features a hands-on approach to the study of color as students create, modify and compare hues, values and strengths through the direct mixing and application of paint. Also explored will be issues of color harmony, chromatic light, space, color assimilation, and color psychology, as well as past and present views on the use of color in art and design. This intensive focus on the specific issues of color gives students experience with and flexibility in the use of color in their work.

Term:

Offered Both Fall and Spring

- ADF-S151 2-Dimensional Design

Credits: 
3.00

Description:

The focus of this course is the fundamental logic and structure of two-dimensional organization. Emphasis will be placed on the essential elements of visual language: line, shape, value and texture. Students will learn to develop dynamic approaches to visual problem solving by combining these elements into a unified whole. Skills will include technical proficiency in a variety of wet and dry media, appropriate presentation of work, and the ability to discuss work critically.

Term:

Offered Both Fall and Spring

- ADF-S152 3-Dimensional Design

Prerequisites:

ADF S151 or ADF S166

Credits:
This course focuses on the fundamental elements of three-dimensional form. Line, plane and volume will be explored as students develop visual analysis and critical thinking skills in the round. The role of scale, proportion, structure, surface, light and display will be addressed, as students create forms that activate space and engage the viewer. The course will proceed from work with simple forms and techniques to more challenging and comprehensive problems addressing both additive and subtractive methods.

Term:
Offered Both Fall and Spring

ADF-S154 Design: Issues & Process

Prerequisites:
ADF S151

Credits:
3.00

Description:
This course involves comprehensive design projects which concern more advanced visual issues, executed in a wide variety of media. Decision-making in the creative process and the development of strong design concepts will be emphasized. Areas of study will include: an investigation of the real world concerns of fine artists and designers, non-Western imagery and culture, and visual social engagement.

Term:
Offered Spring Term

ADF-S156 Imaging

Prerequisites:
ADF S166

Credits:
Digital visual image generation and modification, especially when combined with traditional hand techniques, are essential skills for artists and designers of the 21st century. This course introduces techniques of image capture, manipulation and output. Weekly and longer-length assignments will address creative and innovative idea generation using these approaches.

Term:
Offered Both Fall and Spring

- **ADF-S166 2D/Color**

  Credits:
  3.00

  Description:

  This is an introductory-level course in the basic concepts and practices of two-dimensional design and color theory. The study of color and design is supportive of all studio disciplines and is vital to the understanding of all visual media. This course features an intensive, hands-on approach to color and design as students create, modify and master the three dimensions of color (hue, value, and strength) plus the principles of design (line, shape, value, composition and image). This in-depth study is essential and underlies all of the visual arts as they are practiced today. An understanding of color and design influences all artists’ decisions, affecting the look, meaning and use of visual phenomena.

  Type:

  Arts Admin Minor Elective

- **ADF-S171 CI: Integrated Studio 1**

  Credits:
  3.00

  Description:

  This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in
three spaces; the studio classroom, the digital world and the city at large.

Type:

Creativity and Innovation, Arts Admin Minor Elective

- **ADF-S172 CI: Integrated Studio II**

  Prerequisites:

  ADF S101

  Credits:

  3.00

  Description:

  This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media-including video/sound capture and editing-as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.

  Type:

  Creativity and Innovation

- **ADFA-304 Art and Architecture of the Italian Renaissance**

  Prerequisites:

  ADF-182 and the Fine Art Program Director's consent.

  Credits:

  4.00

  Description:

  This course introduces the students to Italian Renaissance art, artists and culture from the first evidence in the Italian Gothic (around the 1260's) to the Early and High Renaissance, predominantly in Florence and Venice, up to the 1600's. The course will survey the history of painting, sculpture and
architecture as we study the works individually, for their formal elements and visual importance, but also within their aesthetic, historic, political and cultural context. Class discussion and a visual analysis of works of art will encourage personal interpretation and critical thinking. A list of terms related to the Renaissances introduces the language of art. Normally offered during the summer. Offered in Italy only.

Type:

Expanded Classroom Requirement

- **ADFA-306 Art & Culture of Asia, Africa, South America and Oceania**

  Credits:
  4.00

  Description:

  The coursework introduces students to the artistic and visual traditions from South and East Asia, Africa, Oceania and the Americas. In addition to the material culture of the particular region under study, the coursework will consider socio-political ideals, religious belief systems, and cultural principles that 'shaped' or informed the work and the ideology of civilizations beyond the Western hemisphere. Comparative analysis among non-western and western traditions will be used to critically analyze the salient points of influence, rejection and modifications of aesthetic affinities. Class lectures will be supplemented with museum seminars specifically the rich non-western collections at the MFA, Boston. Guided field trips to the museum will allow students to formally analyze the works of art discussed in lecture and text material.

  Term:

  Occasional

  Type:

  Cultural Diversity Opt B,Cultural Diversity BFA,Asian Studies,Humanities & History,Expanded Classroom

- **ADFA-344 Islamic Spain: Art and Architecture**

  Credits:
  4.00

  Description:
This course examines the Islamic influence in Spain through its art and architecture from its formative period in the eighth century through the fourteenth century and beyond to see the continuity and change of the Mozarabic style found locally in Madrid, Cordoba, Seville, and Granada. Students will use formal analytical skills to critically explore works of art and architecture and will cultivate a 'lens' through which they will facilitate their understanding of the classic and contemporary material culture and fabric of Spain. Class meetings will be supplemented with field trips. Offered as needed.

Type:

Humanities Literature Requirement, Humanities & History

- **ADFA-345 Art of India**

Credits: 4.00

Description:

A chronological survey of South Asian art (2300 BCE - 1750 CE) including India, Pakistan, Bangladesh, and Nepal. Examination of art and architecture from their first and still mysterious beginnings in the Indus Valley, through the great masterpieces of Buddhist and Hindu art to the coming of Islam, including the eclectic culture of the Mughal courts and the golden age of miniature paintings. Consideration is given to the multiple aspects of patronage in Indian culture - religious, political, economic - through case studies of individual works of art and architecture. (Formerly HUM 345)

Type:

Humanities & History, Cultural Diversity Opt B, Humanities Literature Requirement, Asian Studies

- **ADFA-346 Art of the Silk Road**

Credits: 4.00

Description:

This course will examine the arts and architecture of the Silk Road, with particular attention to art of Buddhism, Hinduism, and Islam. Historically, Inner Asia was marked by trade routes (the 'Silk Route' or 'Silk Road') which crisscrossed this vast landscape of deserts and mountains between China, India, the Iranian Plateau and the Mediterranean world. In addition to the art of these cultures, we will also look at the records of early Chinese travelers through Central Asia. (Formerly HUM 346) Offered as needed.
- **ADFA-400 Fine Arts Internship**

  **Prerequisites:**
  Restricted to Juniors and Seniors

  **Credits:**
  3.00- 6.00

  **Description:**
  Fine Arts majors are required to complete an internship where they will apply their studio and academic skills in a professional setting. Internships enable students to enrich their perspective of the field by sampling the career paths available to them in the art and culture economy. Student interns work directly with established professional artists or with arts and cultural organizations such as museums, galleries, and arts councils. This experiential learning is critical for career preparation and is intended to foster personal growth, hone professional skills, and provide networking opportunities. The internship experience is paired with a faculty-led seminar that will reinforce new skills and provide a venue for inquiry, sharing, and reflection.

  **Term:**
  Offered Both Fall and Spring

- **ADFA-S201 Drawing: Language of Light**

  **Prerequisites:**
  ADF S102

  **Credits:**
  3.00
Description:

This course is an extensive exploration of the human form and how it is represented in drawing. Refining their drawing skills, students use a variety of dry media (graphite, charcoal, pastel, collage) to articulate figure/plane.

Term:

Offered Fall Term

- **ADFA-S204 Sculptural Thinking**

  Prerequisites:

  Take ADF-S152

  Credits:

  3.00

  Description:

  Art is not just visual. Artists also think with their hands”, understanding that engagement with the physical world is vital to the creative process, and often gives rise to unexpected and fruitful ideas. In this course, students will explore traditional and experimental sculptural processes in a spirit of directed play”, focusing on both intuitive and critical responses to materials.

- **ADFA-S212 Figure Painting: Issues in Contemporary Realism**

  Prerequisites:

  Fine Art Program Director Approval needed

  Credits:

  3.00

  Description:

  This course functions as a lab for students to improve their painting skills. Working directly from the models, beginning and more advanced students will explore technique at their own level. Tri-weekly poses will allow in-depth investigation and complex images to develop. Students can work with the painting medium of their choice. Historical and contemporary painters will be used to further the students progress. Open to majors and non-majors.
Term:
Occasional

- ADFA-S220 Drawing: Shifting Scales

  Prerequisites:
  
  ADF-S102 or ADF-S502; ADF-S151 or ADF-S551;
  
  Credits:
  
  3.00
  
  Description:
  
  We live in a world of great contrasts in scale, where hand held screens can download Google earth and nanotechnologies can change the lives on entire continents. How do these shifts in scale alter our perceptions of space, and therefore change the way we understand and make drawings? This figure-based course uses descriptive observation as the starting point for addressing visual invention. Students will work from a model, using traditional figurative techniques to combine and contrast with digital imaging techniques, graphic novels, and various contemporary drawing approaches. A variety of wet and dry drawing media will be used with more experimental materials.

  Term:
  
  Offered Spring Term

- ADFA-S241 Advanced Painting

  Prerequisites:
  
  ADF S123.
  
  Credits:
  
  3.00
  
  Description:
  
  This course will involve the concepts and techniques of 20th and 21st century painting. Students develop an individual approach to non-objective and objective painted space. Open-ended assignments, lectures, critiques and discussions will clarify the work students produce. Substantial independent studio time allows students to focus on work that responds to contemporary issues in painting.
Term: Offered Spring Term

- **ADFA-S242 Sculpture Studio**

  Prerequisites:
  
  ADF S152

  Credits: 3.00

  Description:

  A focused study on the language of dimensionality in sculpture, students will explore traditional and non-traditional materials. Issues of craft, concept and context will aid students in developing work that responds to currents in contemporary sculpture. This class will also provide students with a substantial grounding in 20th and 21st century sculptural theory and practice.

Term: Offered Spring Term

- **ADFA-S251 Printmaking Studio**

  Credits: 3.00

  Description:

  This course is designed to familiarize students with the printmaking studio and various techniques. Students will gain exposure to a number of techniques including non-toxic processes. Over the course of the semester, students will be expected to develop a portfolio of prints while working in class and independently.

Term: Offered Fall Term
• ADFA-S271 Fine Arts Seminar I

Prerequisites:
ADF S102 ADF S123, and ADF S152

Credits:
3.00

Description:
Fine Arts Seminar is designed as a vehicle for students to develop a personal relationship to contemporary art theory and practice. Questions are posed as a point of departure for the students to generate work. Visiting artists and weekly gallery and museum visits aid in examining aspects of current art making in order to assist students in creating a strong vision for their work. Restricted to Fine Arts Majors only.

Term:
Offered Fall Term

• ADFA-S272 Fine Arts Seminar I

Prerequisites:
ADFA S271

Credits:
3.00

Description:
A continuation of the first semester, this course aids students in recognizing the patterns and questions posed in their own studio practices. A large number of technical approaches to content will be explored.

Term:
Offered Spring Term

• ADFA-S311 Contemporary Trends & Practices
Description:
Contemporary Trends & Practices moves art theory into the studio and the studio out into the world. Students will look at the most significant artists and movements of the past 50 years while examining their social, cultural and political context. Canonized contemporary art categories (postmodernism, appropriation, anti-art and performance art are some examples) are assigned as group projects. Movements, strategy or style of art making is discussed as an expressive problem solving experience, blurring the lines between media. This course conflates contemporary art history with contemporary art practices.

Term:
Offered Fall Term

• ADFA-S342 Advanced Sculpture

Description:
In this course, students will explore contemporary sculptural issues, using a variety of found and generated materials. The process of installation, wall, floor, self-supported pieces and environmental works will be investigated.

Term:
Offered Spring Term

• ADFA-S344 Advanced Drawing Issues
Prerequisites:
Take ADFA-S272;

Credits:
3.00

Description:
This course has students assess their work of the past several years in order to determine current and future goals. Students use the tools they find in the relationship between 2D and 3D in order to define contemporary drawing for themselves.

Term:
Offered Fall Term

• ADFA-S345 Advanced Printmaking

Prerequisites:
ADFA S251 or instructor permission

Credits:
3.00

Description:
In Advanced Printmaking students will explore issues of technique, scale and multiple press runs that are not feasible within the context of the beginning Printmaking course. In this advanced course students will focus on a chosen area of traditional or contemporary print media, ranging from etching, digital imaging, lithography, paper molding, and photocopying, to relief and screen printing. Through the use of theory and developed skill, the course will allow students to create print-based works of an increasingly professional standard in both two and three dimensions. Students will undertake projects both as separate entities and as combined installed pieces, aimed at encouraging an individual, creative and professional approach to printmaking in the context of contemporary art practice.

Term:
Occasional

• ADFA-S361 Figure Studio: 2D
Prerequisites:

ADF S123 AND ADFA S241

Credits:

3.00

Description:

This painting course is designed to provide an in-depth study and practice of two-dimensional contemporary figuration. Basing all students on the Masters and movements of the past, this course focuses on the methodology and effects of four major figurative painters from late-twentieth century through the present.

Term:

Offered Fall Term

- **ADFA-S362 Figure Studio: 3D**

  Prerequisites:

  Take ADF-S152 ADFA-S361;

  Credits:

  3.00

  Description:

  This sculpture course considers the figure in its importance both as a historical element and as a reflection and definition of self. Established an understanding of the figurative form in the space by relating gesture and structure through manipulated form. Weight, mass, plane and volume are considered while working directly from the model.

  Term:

  Offered Spring Term

- **ADFA-S365 Advanced Figure Studio**

  Credits:
Description:

This course is an extension of the Figure Studio 2D & 3D course. The focus will be on advanced figuration in relation to contemporary and historical works. Students will work in any media that pertains to their exploration of depiction and content. Students are expected to work in consultation with the professor in class and in their individual studios.

- **ADFA-S371 Fine Arts Seminar II**

  Prerequisites:

  ADFA S271 and ADFA S272

  Credits:

  3.00

  Description:

  In this third semester of the Seminar sequence, students are responsible for integrating their visual culture influences and references within an expanded body of work.

  Term:

  Offered Fall Term

- **ADFA-S372 Fine Arts Seminar II**

  Prerequisites:

  ADFA S271 and ADFA S272 and ADFA S371

  Credits:

  3.00

  Description:

  During this final Seminar semester, the focused studio practices of students are channeled into the development of their final thesis exhibition. The four-semester Fine Arts Seminar sequence.
Term:
Offered Spring Term

- **ADFA-S380 Advanced Seminar Projects**
  
  Prerequisites:
  
  Take ADFA-S272;

  Credits:
  
  3.00- 6.00

  Description:
  
  This course functions as a bridge between the undergraduate processes of Fine Arts Seminar and the postgraduate environment of the visual arts. Particular attention will be paid to the contexts used by students to define their work in relation to feedback from professional outside reviewers. Individual contracts between faculty and student will be developed at the beginning of each semester. Contracts will assess the priorities for the work and adapt studio practices for the creation of new work. A research component will be attached when awarding 4-6 credits.

  Term:
  
  Occasional

- **ADFA-S410 Senior Thesis**
  
  Prerequisites:
  
  Fine Arts Senior status required.

  Credits:
  
  3.00

  Description:
  
  This senior-level course readies the student for the furtherance of his or her career as a creative artist. Though the development of a written artist's statement, slide and electronic documentation and the charting of their individual artistic lineage, students will begin to place themselves within the context of the contemporary art world. Normally offered Spring semester.
Term:
Offered Spring Term

- **ADFA-S500 Fine Arts Directed Studio**

  Prerequisites:
  Fine Art Program Director Approval needed

  Credits:
  1.00- 6.00

  Description:
  The student completes a directed study project, either studio (ADFA S500) or non-studio (ADFA 500) under the supervision of a full time fine arts faculty member. Please see Directed Study elsewhere in this catalog for details. Independent study forms are available from the Office of the Academic Dean and Registrar. All independent study projects must be approved by the individual faculty member, the Fine Arts Program Director, and the NESADSU Chairman. Normally available every semester.

- **ADFA-S510 Fine Arts Independent Study**

  Prerequisites:
  Fine Art Program Director Approval needed

  Credits:
  1.00- 6.00

  Description:
  The student completes a directed study project, either studio or non-studio under the supervision of a fine arts faculty member. Please see Directed Study elsewhere in this catalog for details. Independent study forms are available from the Office of the Academic Dean and Registrar. All independent study projects must be approved by the individual faculty member, the Fine Arts Program Director, and the NESADSU Chairman.

- **ADG-224 History of Graphic Design**
Credits:

4.00

Description:

The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various-isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

Term:

Offered Fall Term

Type:

Humanities & History, Humanities Literature Requirement, Vis. & Perform Thry & Hst

- ADG-337 Professional Practice

Prerequisites:

Senior BFA status

Credits:

3.00

Description:

This senior-year course is designed to provide final preparation for employment in the field of graphic design. In addition to helping each student develop a professional portfolio, the course will provide students with practical knowledge of the business aspects of graphic design, interviewing skills, resume preparation, personal branding and help students target internship opportunities for the following semester.

Term:

Offered Fall Term

- ADG-400 Graphic Design Internship
Prerequisites:
Senior BFA status.

Credits:
3.00-4.00

Description:
Seniors are required to pursue an internship with a local graphic design firm, whose work is directly related to that student's intended area of professional concentration. Interns will observe and participate in all office procedures permitted by their place of internship and will be required to maintain a notebook of their observations. Required classroom seminars will reinforce new skills, share learning experiences and answer questions or concerns.

Term:
Offered Spring Term

Type:
Expanded Classroom Requirement

- **ADG-500 Graphic Design Directed Study**

  Prerequisites:
  Consent of Program Director required

  Credits:
  3.00

  Description:
  The student completes a directed study project, under the supervision of a graphic design faculty member. All Directed Study request forms must be accompanied by a written proposal and schedule and must be approved by the faculty member, the Graphic Design Program Director, and the department Chair.

- **ADG-510 Graphic Design Undergraduate Independent Study**
Prerequisites:

An independent study form must be submitted to the CAS Dean's Office.

Credits:

1.00-6.00

Description:

An Independent Study provides the student with the opportunity to examine an issue of interest that falls outside the parameters of the existing curricula. The student will work on a one-on-one basis with a full-time faculty member to realize a particular and well-defined goal. All proposals for Independent Study must be approved by the Deans Office in advance of the semester during which the work will be completed.

- ADG-S201 Basic Typography
  
  Prerequisites:

  ADF S151 OR ADF S166

  Credits:

  3.00

  Description:

  This course will introduce students to the creative use of typography in the design process and will provide them with the skills and knowledge necessary to design with type.

  Term:

  Offered Fall Term

- ADG-S202 Computer Typography
  
  Prerequisites:

  ADG S201 and ADG S219

  Credits:
This advanced course focuses on the translation of the historical knowledge and hand skills learned in Basic Typography into a digital format. Students will learn how to produce quality typography, as well as experiment with and explore letterform design and manipulation.

Term:
Offered Spring Term

- **ADG-S204 Design Beyond Design**
  
  **Credits:**
  3.00
  
  **Description:**
  This course focuses on the multi-disciplinary nature of the graphic design profession and the designer as a visual communicator, critical thinker and problem solver. Students will be exposed to a series of outside topics to which they will apply design solutions, mirroring the range of fields in which designers today are employed.

- **ADG-S206 Graphic Design I**
  
  **Prerequisites:**
  ADF S151 OR ADF S166
  
  **Credits:**
  3.00
  
  **Description:**
  Emphasizing the creative process from thumbnail to comprehensive, the course will also introduce the student to the language, tools, and techniques of the professional graphic designer. Attention will be paid to conceptualization, production and presentation in solving design problems. This course will expose students to a series of assignments designed to show step-by-step problem solving from observation and research, to the incorporation of these findings into the design of communication vehicles.
• ADG-S207 Graphic Design II

Prerequisites:

ADG S206 and ADG S219

Credits:

3.00

Description:

A continuation of the skills learned in Graphic Design I, involving projects that are broader in scope, more in-depth, and address societal issues.

Term:

Offered Spring Term

• ADG-S213 Web Design I

Prerequisites:

ADG S219

Credits:

3.00

Description:

This course will introduce basic web site design and creation skills to students in order to prepare them for more advanced study in Web Design II. The class will use a variety of industry standard software to design and create basic working websites. Students will learn HTML, XHTML and CSS, Javascript, Flash and Action Scripting will be discussed and presented as supplemental tools. Information architecture, wire frames, interface design, user experience and web page layouts will be explored. The history, societal context and future of new media will be discussed throughout the semester.

• ADG-S214 Illustration for Designers
Prerequisites:

ADF S102

Credits:

3.00

Description:

This course introduces the skills necessary for meeting clients illustration needs in a variety of media appropriate to their context. Emphasis will be placed on developing the ability to draw real objects and real people while advancing a personal style. Students' development of visual research and photo reference, thumbnailing and rendering skills for a presentation of ideas and concepts while designing the proper environment for their illustration will be required.

Term:

Offered Spring Term

- ADG-S219 Computer Applications in Design

Credits:

3.00

Description:

In this course students will learn the major software applications used by graphic designers, such as Adobe Creative Suite: InDesign, Illustrator, and Photoshop. Through a series of problems, students will learn how and when to use specific software to produce their solutions and prepare portfolio-quality design.

Term:

Offered Fall Term

- ADG-S250 Graphic Design I-II

Prerequisites:

Open to MAGD Accelerated Program Students only.
Description:

Emphasizing the creative process from thumbnail to comprehensive, this course will also introduce students to language, tools and techniques of the professional graphic designer. Attention will be paid to the conception, production, and presentation in solving design problems. This course will expose students to a series of exercises designed to show how to get from observation and research, to the incorporation of these findings into the design of communication vehicles (logos, brochures, posters, ads, etc.) on a variety of scales. As a survey of graphic design, the goal of this course is to deal with typical problems faced by graphic designers in their profession.

Term:

Summer

• ADG-S302 Italian Journal: Painting and Drawing On Paper

Prerequisites:

Instructors Consent

Credits:

3.00

Description:

This faculty-led study abroad course introduces the skills necessary for meeting clients' illustration needs in a variety of media appropriate to context. Florence, Italy and its environs will serve as the subject matter and catalyst in developing the ability to draw objects, i.e. Architecture, people and landscape while advancing a personal style. Study will begin with a pre-departure journal/book binding workshop at Suffolk University and then to the outdoors in and around Florence, Italy, Tuscan hill towns and the Veneto, where students will explore basic illustration styles, methods and techniques.

Term:

Summer

Type:

Expanded Classroom Requirement, Global Engagement Experience
• ADG-S305 Conceptual Typography

   Prerequisites:

   Take ADG-S202

   Credits:

   3.00

   Description:

   This course is designed to build on core typography knowledge and further students' understanding of the conceptual possibilities of using type in design. Advanced typographic problems requiring the implementation of both traditional and alternative methods will facilitate a deeper exploration of modern communication issues including layered hierarchies, type in motion, typographic voice and illustration.

• ADG-S311 Integrated Advertising

   Prerequisites:

   ADG S206 and ADG S219

   Credits:

   3.00

   Description:

   This course will provide instruction towards creatively translating marketing needs into innovative and effective advertising solutions through a series of challenging projects. Students will learn skills applicable to the advertising industry by focusing on creative executions across multiple-media applications including print, direct mail, collateral, outdoor, online, and other media. There will be emphases on idea generation and campaign development with the goal of message communication through the balance of various elements including page design, copywriting, typography, illustration, photography, and visual effects. The history of advertising from the early 20th century to the ever-changing complexity of today's digital landscape will be studied.

   Term:

   Occasional

• ADG-S312 Packaging Design
Prerequisites:

ADG S201 or ADG S601 AND ADG S206 or ADG S606 AND ADG S219 or ADG S619 OR Instructor Permission.

Credits:

3.00

Description:

In this course, students will study the evolution and history of packaging design, discuss philosophies, learn industry terminology and examine contemporary designs. Using case studies, students will analyze the package design process from concept to production and over the course of the semester, develop a line of packaging and supporting marketing materials for one brand. Guest lectures and field trips will supplement readings and in-class discussions, which will address brand extension and consistency, packaging templates, professional procedures, product photography and printing.

Term:

Occasional

• ADG-S316 Interactive Project Development

Prerequisites:

ADG S340 or Instructor's consent.

Credits:

3.00

Description:

This course will allow students to take the skills learned in Web I, Web II and Advanced Topics, and apply them to the kinds of projects they'll see in a professional setting. The class will focus on challenging students to develop a holistic understanding of how the code they write affects their designs, and vice versa, and to think about how all aspects of building a website affect the final user experience. There will also be a strong emphasis on expanding student digital portfolios, with numerous projects based on actual client requests, fully mobile-friendly responsive sites, group projects and more. Students will learn related skills like server management, search engine optimization and how to work as part of a team. This class is intended to prepare students who plan to enter the web and interactive fields upon graduation.

Term:

Occasional
• ADG-S326 Informing Design

Credits:
3.00

Description:
Do you have it in you to try flying a horse? If so, this course is for you. Have you wondered how to create graphics with enough impact to cut through all the visual rubble we experience daily? This course on visualization will teach you to see with your eyes and not with your mind. You will break the boundaries of preconceived notions and employ graphic design as the driver of a new way to think. You will learn to differentiate among subtleties. You will be in the center of communication problems as an enabler of collaborating and experimenting. You will learn to spread collaboration outside the educational environment and into professional practice by thinking design.

• ADG-S330 Motion Graphics

Prerequisites:
ADG S219 OR instructor approval

Credits:
3.00

Description:
Enter the world of motion design and learn how to make movies that incorporate image, type and video. This class will focus on learning to create moving graphics that are geared toward being broadcast on television, web or film. Students will create time-based works such as title sequences, ads, and videos that they art direct. In the very near future, motion design will be a necessary skill for designers to compete in the marketplace. Motion design can be applied to many areas of graphic design from on-screen presentation to environmental design. During the class, students will build their motion design portfolio that will give them an edge above conventional print and web designers.

Term:
Offered Spring Term

• ADG-S334 Publication Design
Prerequisites:
ADG S202 and ADG S207 and ADG S219 or Instructor's Consent.

Credits:
3.00

Description:
This course will focus on the skills necessary to create publications such as books, magazines, annual reports and catalogs. The goals of this course are three-fold: to further enhance the understanding of typography in regard to publications, to provide the skills and knowledge necessary to design publications for either a print or digital environment, and to integrate the students' own art and/or photography in their work.

Term:
Offered Fall Term

• ADG-S340 Web Design II

Prerequisites:
ADG S213 or Instructors permission

Credits:
3.00

Description:
This course is intended as a continuation of the experience gained in Web Design I. The objective of the course is the development of advanced conceptual skills such as prototyping, usability testing, interactive philosophy, accessibility, project and content management. Students will further develop their professional multimedia skills by working with HTML, XHTML, CSS and other industry-standard tools. JavaScript will be discussed and we will use Flash for animation and video. Current techniques for distributions on mobile devices will be explored. Software that will be used during the class will include Dreamweaver, Flash, and other professional level software tools.

• ADG-S343 Advanced Topics in Interactive Design

Prerequisites:
ADG-S340;
This course is designed to follow Web II (ADG S340/ADG S740) and will prepare students for the real-world experiences designers often encounter in the field of interactive media. Students will continue their exploration of interactive design and choose a final project direction that furthers their understanding of interactive media. These topics include designing for and implementing Content Management Systems, designing and production for mobile computing platform uses, cross platform compatibility and concepts of information architecture, and designing with an emphasis on market needs for multimedia.

Term:
Occasional

- **ADG-S344 Graphic Design III**

  Prerequisites:
  
  ADG S202, ADG S207, and ADG S219

  Credits:
  
  3.00

  Description:
  
  This continuation of Graphic Design I and II (ADG S206, 207) will concentrate on increasing sophistication in creative problem-solving abilities. Students will also develop an understanding of prepress terms and operations and the impact of technology on those operations. It will also provide the knowledge and skills necessary to enable students to make appropriate prepress decisions regarding more complex projects. Senior status preferred.

  Term:
  
  Offered Fall Term

- **ADG-S345 Graphic Design IV**

  Prerequisites:
ADG S344

Credits:

3.00

Description:

A continuation of the concepts and skills developed in Graphic Design III and their application to more complex, multi-pieced, in-depth projects.

Term:

Offered Spring Term

• ADG-S354 Advanced Computer Applications

Prerequisites:

ADG S201, ADG S206, and ADG S219

Credits:

3.00

Description:

This course is designed to further explore software applications for specific and experimental effects. It aims to provide students with the knowledge and skills necessary to choose the appropriate software application and to execute the desired design, focusing on the design itself rather than on the limitations of computer programs. The course also focuses on solving the technical and production problems when preparing artwork electronically for printing. Software applications include Adobe Creative Suite: InDesign, Illustrator, and Photoshop.

Term:

Offered Spring Term

• ADG-S360 Corporate Design

Prerequisites:

ADG S202 and ADG S207
This course explores the issues of contemporary branding used to identify, establish and promote the business community. Specific emphasis will be placed on the analysis and development of corporate identity systems including the development of logotypes, stationery, signage systems, marketing collateral/advertising/direct mail campaign development, environmental graphics and websites.

**Term:**
Occasional

- **ADG-S365 Digital Photography**

  **Credits:**
  3.00

  **Description:**
  This course offers students the experience of creating digital and film photographs while studying concepts of art direction and techniques that can enhance their compositions. The primary objective is to generate professional still and motion images for digital media, including the Web. Students will manipulate their photographic images using Photoshop rather than the traditional darkroom. Students will also learn how to photograph their own artwork and use a digital camera. Advanced students will be encouraged to explore independent tracks of study.

  **Term:**
  Occasional

- **ADG-S366 Environmental Graphic Design**

  **Prerequisites:**
  ADG S202, ADG S207 and ADG S219

  **Credits:**
  3.00
A cross disciplinary course bringing together interior design students and graphic design students to collaborate on problem solving in the visual and built environments. In the studio, students will be exposed to design issues and problems, both experiential and graphic. Students will be working in teams bringing new insight to solutions for a variety of client/project types. Field trips to fabricators, professional firms and EGD sites will be included. This is a survey class designed to introduce students to ways of producing three dimensional graphic design projects within the built environment.

Term:
Occasional

- **ADG-S370 Artists' Books**

  Prerequisites:

  Take ADG-S201 ADG-S206 or Instructor's permission.

  Credits:

  3.00

  Description:

  This course will cover traditional book design and construction techniques, as well as contemporary, non-traditional methods. Students will learn to blend design, craftsmanship and content to create books that are themselves works of art. This is a hands-on studio course.

  Term:

  Occasional

- **ADG-S410 Thesis Studio**

  Prerequisites:

  Senior BFA standing required.

  Credits:

  3.00

  Description:
The Thesis Studio involves the application of previously learned studio skills in a detailed investigation of a design project relating to the student's intended professional area of specialization. Normally offered spring semester.

- **ADG-S500 Graphic Design Directed Studio**
  
  Prerequisites:
  
  Consent of Program Director required.
  
  Credits:
  
  1.00-6.00
  
  Description:
  
  The student completes a directed studio project under the supervision of a graphic design faculty member. All Directed Studio request forms must be accompanied by a written proposal and schedule and must be approved by the faculty member, the Graphic Design Program Director, and the department Chair.
  
  Term:
  
  Offered Both Fall and Spring

- **ADG-S510 Graphic Design Independent Study**
  
  Prerequisites:
  
  Consent of Program Director required.
  
  Credits:
  
  1.00-6.00
  
  Description:
  
  In an Independent Studio/Study, the student works in an independent fashion, pursuing an area of study that is outside the scope of existing curricula. Independent Studio/Study courses require CAS Dean's approval in addition to departmental approval.

- **ADI-01 Introduction to Interior Design & Decoration**
This elective course is designed to aid students in determining whether to pursue a career in interior design and decorating. Through both lectures and studio work, students will be shown basic drafting and graphic communication techniques used in presentation of visual ideas, as well as various elements of interior composition, such as space planning, color, furniture, finish and material selection. The final project will be suitable for inclusion in a portfolio. Normally offered each semester.

Term:
Offered Both Fall and Spring

• ADI-221 History of Furniture & Architecture I

  Credits:
  4.00

  Description:
  The goal of this course is the enhancement of the student's critical comprehension of historic styles and the impact they have on contemporary design solutions. The survey begins with the Egyptian period and provides an overview of the history of furniture and architecture through the mid-1700s, including ancient Greece and Rome, the Gothic and Renaissance, Baroque and Rococo periods. Emphasis will be placed on chronological periods, the visual characteristics of each style including regional idiosyncrasies, and the terminology germane to a study of furniture and architecture.

  Term:
  Offered Both Fall and Spring

  Type:
  Humanities & History, Humanities Literature Requirement

• ADI-222 History of Furniture & Architecture II

  Prerequisites:
  ADI 221
Credits:
4.00

Description:
A continuation of History of Furniture & Architecture I, this course will extend the investigation of furniture and architecture into the 20th century, while addressing issues concerning preservation, restoration, rehabilitation, and adaptive re-use. Drawing on the vast resources of the city of Boston and its environs, students will become actively involved in stylistic progression, local living history, and the benefits of preserving our past for future generations. Field trips will include visits to restored Federal, Victorian and Contemporary venues.

Term:
Offered Both Fall and Spring

Type:
Humanities & History, Humanities Literature Requirement

• ADI-234 Introduction to Interior Design Theory & Criticism

Prerequisites:
Taken concurrently with ADI S201

Credits:
3.00

Description:
This course introduces students to the important individuals, ideas and issues that have shaped the direction of contemporary interior design practice in the twentieth century, building upon the historical foundation established by the Ideas of Western Art and History of Furniture and Architecture classes. Intermixing lectures and readings with visits to important local buildings, it discusses the influences of culture, technology, fashion and media upon the work and thinking of the first generation of modern designers, as well as emerging social, moral and environmental imperatives that will form the basis of future practice; cultural identity, interdisciplinary collaboration, sustainability and universal design.

Term:
Offered Fall Term

Type:
• **ADI-242 Interior Codes & Construction**

  Prerequisites:

  Prerequisite: ADI S110 or S510.

  Credits:

  3.00

  Description:

  This course examines various interior construction assemblies of non-load-bearing walls, load-bearing walls, floors, stairs, elevators, fireplaces, ceilings, doors, interior windows, frames, millwork and fire-related construction. Emphasis will be placed on building codes including state, BOCA, Underwriters Laboratory, ASTM, state and federal accessibility codes and construction materials. Students will also be introduced to basic structural concepts and characteristics of structural materials.

  Term:

  Offered Both Fall and Spring

• **ADI-244 Interior Materials & Finishes**

  Prerequisites:

  Intended for majors only

  Credits:

  3.00

  Description:

  Students will study the visual qualities, technical characteristics and applications of the common materials and finishes used in interior installations. These materials include floor coverings, wall coverings, textiles, ceiling and sustainable materials. Related fire, health and safety codes, as well as maintenance and life cycle costs, will be discussed. Class material will be presented in the form of lectures, guest speakers and a tour of the Boston Design Center. Students will learn to analyze, select and specify materials and finishes for the appropriate applications, write specifications, and prepare a resource notebook.
• ADI-254 Lighting
  Prerequisites:
  Prior drafting or CAD experience recommended
  Credits:
  3.00
  Description:
  This course introduces students to the art and technology of lighting and explores the use of lighting as a design element in the interior environment. Class material will be presented as a series of lectures, readings and demonstrations. Students will learn to analyze interior lighting installations, calculate lighting levels for interiors, select appropriate light fixtures and prepare a lighting plan based on one of their studio projects.

• ADI-306 Portfolio
  Prerequisites:
  Senior Status
  Credits:
  3.00
  Description:
  This course teaches students how to develop a professional portfolio. Students will investigate overall development of portfolio content, substance, and design through a variety of hands-on exercises including digital and mock-up layout techniques; methods of documenting and archiving work; presentation formats; design influence investigation, and more.
Offered Both Fall and Spring

- **ADI-333 Linked Generations: Survey of Contemporary Spanish Architecture**

  **Credits:**
  
  3.00

  **Description:**

  This seminar aims to reveal the key elements of contemporary practices by analyzing the relationship between the masters of Spanish architecture of the 20th C. and the generations following. It will focus on such figures as Saenz de Oiza, Fisac and De la Sota, continuing with current masters such as Campo Baeza, Moneo and Navarro Baldeweg, the first generation of Spanish architects to have international recognition. More recent inheritors include Aparicio, Abalo, Herreros, Mansilla & Tùnon, Nieto Sobejano and Miralles, professionals with prominent academic positions worldwide. Attention will also be given to a new generation of promising architects (García Abril, Sanchez, Jaque, Virseda Vila, Fernandez) whose projects are outstanding for the rigor of their construction and sensitivity to their natural and cultural surroundings. Class lectures will be accompanied by site visits to Madrid buildings designed by these architects, as well as to the studio offices where some of them actually work, to familiarize the students with how these small-scale firms develop their projects. Students will individually carry out a conceptual analysis of a prominent building through sketching and diagrammatic modeling of its principal architectural elements, with a final presentation of the results to a panel of critics.

- **ADI-352 Environmental Systems**

  **Prerequisites:**

  ADI 242

  **Credits:**

  3.00

  **Description:**

  This course studies mechanical, electrical, and plumbing technology and systems commonly employed in residential and commercial interiors. It will introduce students to the vocabulary, concepts and basic components of these fields of engineering. This will enable students to integrate these building systems in their design work and communicate ideas effectively with project engineers and contractors. The course will include commonly used heating, ventilating, air conditioning, plumbing piping and fixtures, fire sprinklers, electrical supply and distribution, smoke detection and fire alarm systems. Related mechanical, electrical and plumbing codes will also be discussed.

  **Term:**
• **ADI-384 Interiors Marketing & Contracts**

  **Prerequisites:**

  ADI-S201; Intended for majors only

  **Credits:**

  3.00

  **Description:**

  This course will cover the business aspects of interior design, including firm management, client, and contractor relationships, project management, proposal writing, and market resourcing. In addition, students will be exposed to career planning practices, such as portfolio development, resume preparation and interviewing techniques. Tours of architectural and interior design firms will also be included.

  **Term:**

  Offered Both Fall and Spring

• **ADI-398 Senior Programming & Pre-Design**

  **Prerequisites:**

  ADI S201, ADI S202, ADI S303, ADI S304, ADI S372

  **Credits:**

  3.00

  **Description:**

  This course is designed to be the first part of the BFA Senior Studio in Interior Design. The senior ID project is intended as the culmination of the interior design studio sequence. It is an individual effort, supported by the studio faculty, that is inclusive of the entire design process from the programming phase through final design and documentation. The objective of part one, Senior Programming & Pre-Design, is for individual students to research, develop, and draft a program document which will guide their design work in part two, Senior Studio. Students will explore the possible project types and precedents, select and develop a client profile and program, and research and analyze an architectural site. Written and graphic analysis tools will be employed. The preliminary conceptual (pre-design) phase of work is also introduced.
• ADI-400 Interior Design Internship

Prerequisites:
ADI S202 and ADI S303; senior BFA standing required. This course fulfills the Expanded Classroom Requirement

Credits:
3.00

Description:
With the assistance of the faculty advisor, each student will identify an appropriate internship site with a local interior design firm. All interns are required to complete 120 hours of work/study within the semester, working a minimum of 8 hours per week under the direction of a qualified Interior Designer. Interns are expected to contribute to the host firm at a high level of design interaction. All interns will meet bi-weekly with the faculty advisor. The classroom seminars will reinforce new skills, share learning experiences, and answer questions or concerns. A firm site visit, production of firm profile, and participation in a professional organization are required within the seminar.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

• ADI-500 Interior Design Directed Study

Prerequisites:
Consent of Program Director required.

Credits:
1.00-6.00

Description:
Directed Study/Studio allows students to pursue an in-depth research project in an area of particular interest, directed by a qualified faculty member. Available every semester.

- **ADI-H500 Interior Design Directed Study**
  
  **Prerequisites:**
  
  Consent of Program Director required.
  
  **Credits:**
  
  1.00- 6.00
  
  **Description:**
  
  Directed Study/Studio allows students to pursue an in-depth research project in an area of particular interest, directed by a qualified faculty member. Available every semester.
  
  **Type:**
  
  Honors

- **ADI-S106 Interior Design Communications**
  
  **Prerequisites:**
  
  Take ADF-S101 ADI-S108 OR ADI-S205;
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  Interior Design Communications teaches students how drawing media, observational drawing, perspective theory, color and design graphics can be integrated into the designer's process. In addition to exploring contrast, accent, reflection, shade and shadow, the course underscores the importance of freehand sketching as a tool to foster intellectual inquiry and convey design concepts to a wider audience. The course introduces students to manual and digital methods for composing work for conceptual expression, technical drawing presentation, and portfolio purposes.
  
  **Term:**

- ADI-S108 Perspective Principles

Prerequisites:

Prior or concurrent drawing experience

Credits:

3.00

Description:

This course introduces students to the systems of perspective developed during the Renaissance as a means of creating the illusion of 3-dimensional space on a 2-dimensional surface. Using 1-, 2-, and 3-point perspective, students will learn to effectively represent space. Basic drafting techniques and architectural scale are introduced. Both free-hand sketching and technical drawing methods will be emphasized. Manipulation of drawing through computerized scanning and digital photography included.

Term:

Offered Both Fall and Spring

- ADI-S110 Digital Orthographics

Prerequisites:

Take ADI-S108 OR ADI-S205;

Credits:

3.00

Description:

This course will enable the student to produce, manipulate and print 2-dimensional drawings using digital software including Computer Aided Drafting (CAD). Students will acquire the skills necessary for producing measured architectural plans, elevations and sections as well as isometric and axonometric drawing types. Fundamentals of illustrating drawings in color, light and shadow through digital programs will be introduced.

Term:
• ADI-S201 Interior Design Studio I

Prerequisites:

ADF S152, ADF S143, ADI S110 Prior to or concurrent with ADI 234 Take ADI S106 or ADI S205

Credits:

3.00

Description:

This studio introduces students to basic design principles, design theory and concept development. Emphasis will be placed on design process, problem solving, spatial organization, anthropometrics, universal design awareness, and presentation techniques. Students will be given a series of projects of increasing complexity, utilizing and building upon the skills developed in the Foundation courses. Students will be expected to produce process diagrams, plans, elevations, models, and finish boards.

Term:

Offered Both Fall and Spring

• ADI-S202 Residential Design Studio

Prerequisites:

ADI S201 AND ADF S102

Credits:

3.00

Description:

This course addresses residential interior environments on a large scale. Students will develop client contact and programming skills. Emphasis will be placed on residential precedents, design process, human factors, accessibility, building codes, diagramming, spatial organization, detailing, presentation techniques, furnishings, finishes and lighting.

Term:
• ADI-S264 Advanced Interior Design Communication

Prerequisites:

ADI S106 and ADI S110

Credits:

3.00

Description:

This course is designed to advance and reinforce presentation techniques and graphic technical skills introduced in Interior Design Communications. Students will continue to develop their proficiency in free hand sketching, rendering and perspective, and will learn various three-dimensional rendering software and other digital imaging techniques.

Term:

Offered Both Fall and Spring

• ADI-S303 Contract Design Studio I

Prerequisites:

ADF S102, ADI S201, ADI 242, ADI 244, ADI S264

Credits:

3.00

Description:

This commercial design studio focuses on the design of work environments. Students will develop programming and space planning skills unique to these environments through a series of small- to medium-sized projects. Emphasis will be placed on commercial precedents, programming, design process, human factors, building codes, ADA, spatial organization, detailing, presentation techniques, office furniture systems, equipment, finishes, and lighting.

Term:
• **ADI-S304 Furniture and Detailing Studio**

  **Prerequisites:**
  ADI S201, ADI S264

  **Credits:**
  3.00

  **Description:**
  This course introduces students to the design process as it applies to furniture, addressing furniture ergonomics, materials, construction techniques, manufacturing and design. Students will research selected topics, and design seating, work/service pieces and cabinetry. Emphasis will be placed on furniture precedents, research, design process, human factors, accessibility, detailing, documentation and presentation techniques.

  **Term:**
  Offered Both Fall and Spring

• **ADI-S305 Contract Design Studio II**

  **Prerequisites:**
  ADI S202, ADI 221, ADI S110

  **Credits:**
  3.00

  **Description:**
  This studio focuses on adaptive re-use and renovation of commercial interiors with attention given to historical buildings in the Boston area. Emphasis on creative problem-solving methods and a philosophical approach to medium- and large-scale hospitality and retail design projects. Students will be required to incorporate the skills and knowledge gained throughout their studies to create a comprehensive project, including presentation drawings, models, material and furniture boards, and a set of construction documents and specifications.

  **Term:**
- **ADI-S366 Environmental Graphic Design**

  Prerequisites:
  
  ADI S372

  Credits:
  
  3.00

  Description:
  
  A cross-disciplinary course bringing together interior design students and graphic design students at the senior BFA level to collaborate on problem-solving in the visual and built environments. In the studio, students will be exposed to design issues and problems, both experiential and graphic. Students will be working in teams bringing new insight to solutions for a variety of client/project types. Field trips to fabricators, professional firms and EGD sites will be included. This is a survey class designed to introduce students to ways of producing three-dimensional graphic design projects within the built environment.

  Term:

  Offered Fall Term

- **ADI-S372 Construction Documents**

  Prerequisites:
  
  ADI S110 AND ADI S201

  Credits:
  
  3.00

  Description:
  
  Building on the curriculum of Orthogonal Drawing, this course will explore in more detail the features of CAD and BIM software. Programs will be used as tools to draft, organize, and produce a set of construction documents. Students will complete a full set of contract documents.

  Term:
• **ADI-S401 Senior Studio**

  Prerequisites:

  ADI S201, ADI S202, ADI S303, ADI S304, ADI S305, ADI S372 AND ADI 398

  Credits:

  3.00

  Description:

  This studio course completes the undergraduate studio sequence in Interior Design. This final design studio emphasizes individual competence with respect to the total design process. Students will utilize the research and programming document produced in ADI 398, Senior Programming & Pre-Design, to develop a comprehensive design solution for their individual studio problem through schematics, design development, presentation drawings and specifications.

  Term:

  Offered Spring Term

• **ADIL-224 History of Illustration**

  Credits:

  4.00

  Description:

  The study of how images have been used to illustrate ideas, tell stories, convey information and assist in human communication throughout history. Through presentation, lecture, discussion, research, field trips and selected readings, students explore the historical antecedents and significant trends in illustration before the late 20th century. Important illustration markets and applications are emphasized, and notable artists and artworks are presented in the context of the larger culture. The changing role, employment status and professional practices of the commercial artist are discussed. Attention is given to the impact of reproduction and distribution technologies on the evolution Illustration profession and markets for creative content as well as the impact of economics on intellectual property rights.

  Term:
• ADIL-338 Illustration Professional Practices

Prerequisites:
ADIL-S301

Credits:
3.00

Description:

An introduction to contemporary illustration professional practices within a broad range of specializations and related fields. Students identify personal interests, capabilities, strengths and career priorities and goals that will influence their lives as creative professionals. Contemporary professional issues, marketing and self-promotion are covered in depth. Assignments include logo design and a direct marketing/email promotional piece. Students research professional competitions and organizations as advertising and networking opportunities and identify prospective clients and employers, produce resumes and polish interviewing and presentation skills. Freelance/contractor self-employment issues and entrepreneurial small business practices are thoroughly addressed, including reproduction rights, pricing, licensing, negotiation, contracts, bookkeeping, taxes, insurance and retirement.

• ADIL-400 Illustration Internship

Prerequisites:
Take ADIL-338;

Credits:
3.00

Description:

Illustration Majors may choose to complete an Illustration Internship in substitution for the course Collaboration (ADIL-S402). The Internship is designed to give students experience and exposure to the professional world of illustration or an illustration-related field in order to prepare for employment. Student interns work on a part-time basis, essentially as apprentice employees. Interns maintain a journal of activities and observations. Classroom seminars will provide opportunities for reinforcing new skills, sharing learning experiences and discussing concerns. Before the end of the junior year, students interested in an internship should investigate potential employment directly related to their intended area of professional
concentration. All internships must be approved in advance by the Illustration Program Director and should be completed during the senior year or the prior summer semester.

Type: Expanded Classroom Requirement

- **ADIL-S201 Illustration I: Visual Communication**

  **Prerequisites:**
  
  ADF-S101 and ADF-S166 and ADIL-S223 is recommended (previously or concurrently)

  **Credits:**
  
  3.00

  **Description:**
  
  This course introduces fundamental concepts and principles of visual communication, with emphasis on the expression of ideas and storytelling through pictures. Topics include implied and sequential narrative, theatrical singing, and visual metaphor. Informed by lecture, discussion and examples, students explore these concepts through a series of assignments with defined objectives related to audience and function (description, symbolism, narrative, poetic allusion, etc.) Through preliminary studies and sketches, students are encouraged to explore multiple solutions, carefully considering concept, drawing, composition, and technical approach. Students are encouraged to use media and methods of choice.

  **Term:**
  
  Offered Fall Term

- **ADIL-S202 Illustration II: Process & Practice**

  **Prerequisites:**
  
  ADIL-S201;

  **Credits:**
  
  3.00

  **Description:**
This course expands on concepts introduced in Illustration I, with emphasis on visual problem solving, generation of original ideas, and the process of picture making. Sequenced assignment each address a different set of parameters related to a different target audience, a different illustration genre (editorial, entertainment, institutional, educational, advertising, etc.) Emphasis is placed on the need to preserve spontaneity and authentic vitality in task-based creative work with multiple requirements, time restraints and periodic art direction. Students use traditional or digital media of their choice and are introduced to pre-production, formatting and presentation requirements for effective print and digital reproduction.

Term:

Offered Spring Term

- **ADIL-S214 Illustration for Designers**

  Prerequisites:

  ADF S102

  Credits:

  3.00

  Description:

  This course introduces the skills necessary for meeting clients’ illustration needs in a variety of media appropriate to their context. Emphasis will be placed on developing the ability to draw real objects and real people while advancing a personal style. Development of visual research and photo reference, thumbnailing and rendering skills for ones presentation of ideas and concepts while designing the proper environment for their illustration will be required.

- **ADIL-S223 Traditional Techniques**

  Prerequisites:

  ADF-S166 and ADF-S101

  Credits:

  3.00

  Description:
Students explore a variety of wet and dry medias, surfaces, tools and approaches traditionally used for illustration. Assignments involve observational subject matter, including still life, wildlife, urban and natural landscape, portrait and clothed figure. Media are handled expressively or with precision, and preliminary exercises provide opportunities for experimentation and practice. Final results are evaluated in terms of technical process and proficiency, readability and reproducibility, and successful application of fundamental principles of design and color theory.

Term:

Offered Fall Term

• ADIL-S255 Digital Techniques

Prerequisites:

Take ADF-S101 and ADF-S166;

Credits:

3.00

Description:

Introduction and exploration of applications used for digital drawing, painting, and sculpting, including Adobe Photoshop, Adobe Illustrator, and LightWave 3D modeling software. Similarities, compatibilities, and essential differences between applications are demonstrated. Efficient file management, help menus, online tutorials, scanning, formatting, printing, and presentation procedures are also covered. Assignments are observational (still life, landscape, portrait, and figure) - not invented imagery. Exercises provide opportunities for experimentation and practice. Final results are evaluated in terms of technical process and proficiency, readability and reproducibility, and successful application of fundamental principles of design and color theory.

Term:

Offered Spring Term

• ADIL-S270 3D Modeling

Prerequisites:

ADF S102 and ADF-S166

Credits:
This course addresses basic digital 3D modeling for film and interactive graphics and animation techniques used in computer animation, game development, visual effects and concept and production art. Students will be prepared for more advanced training in modeling, rigging and animation. Using the basic functions and tools of Mudbox, students will be introduced to the fundamentals of polygon modeling and sculpting. They will explore Maya, using components to make objects and images to create skins and map textures with essential training in rendering, exporting, compositing and file management. Students will design simplified figurative characters posed in simple environments, explore basic rigging and 3D manipulation, use photo manipulation to create complex textures, and implement pan, tracking and simple walking animations.

- **ADIL-S301 Illustration III: Style & Substance**

  **Prerequisites:**
  Take ADIL-S202;

  **Credits:**
  3.00

  **Description:**
  This course examines the elements of visual style, the relationship between style and meaning, and the role and impact of stylistic trends in contemporary illustration. Students explore aesthetics and factors that contribute to unique and authentic style. Art buyer choices and public tastes are analyzed. Assignments are approached professionally, as art direction, and within a set of parameters, students are encouraged to take advantage of opportunities for creative freedom. Assignments include an interdisciplinary collaborative project and the integration of text with image. Students practice with their preferred media as they develop awareness of elements that contribute to the characteristic look that identifies their work.

  **Term:**
  Offered Fall Term

- **ADIL-S302 Illustration IV: Originality & Creativity**

  **Prerequisites:**
  Take ADIL-S301;

  **Credits:**
3.00

Description:

This course provides an opportunity for students to consolidate the knowledge and experience from the three previous semesters of Illustration to expand their conceptual and technical skills as they strive for a synthesis of concept, process, technique, and style. Students will explore innovative and personal ways to express visual ideas, while focusing on advanced assignments that address a variety of real world applications and genres. Progressing from instructor-defined to student-defined objectives, assignments provide opportunity for students to develop an efficient and dependable ideation process and technical competence in a preferred medium. In the final weeks, students will be asked to develop a draft Studio Project Proposal Outline for the following semester.

Term:

Offered Spring Term

• ADIL-S305 Figure in Context

Prerequisites:

ADF-S101 AND ADF-S166(OR ADF-S143 and ADF-S151), and ADF-S102 is recommended.(may be taken concurrently)

Credits:

3.00

Description:

Explores the relationship between the human figure and the environment, providing intensive observational drawing and painting practice as preliminary study and visual reference for spatially and compositionally cohesive narrative imagery. Principles of color theory, light logic, and linear and atmospheric perspective are applied to address both 2-dimensional and 3-dimensional concerns (composition, color and the illusion of volume and spatial depth). With attention to theatrical staging, students arrange pose, drapery, clothing, props, and lighting to express specific narrative and emotional context. Camera and dioramas are used for visual reference and students combine reference materials from various sources. Sculptural models are used to explore human skeletal and muscular anatomy.

• ADIL-S307 Visual Development

Prerequisites:

Take ADIL-S201 and ADIL-S255 or ADG-S219;
This studio elective explores the basic components of the pre-production process for animation, computer games, film and television - concept, character design, properties and assets, backgrounds and environments. Using a given story sequence and working as a team, students will produce everything from plot analysis to storyboards, maquettes, dioramas, background layouts and matte painting. Both aesthetic and technical issues will be addressed, with emphasis on effective process, including research and generation of ideas. Theories of dramatic staging, atmospheric and linear perspective and anatomy of visual storytelling will be reviewed with attention to narrative sequence, point of view, action, transitions and editing. Students will work with a variety of traditional 2D and 3D media and computer applications for drawing and painting (Photoshop, Painter, SketchUp, Blender, Maya) and be introduced to professional practices and presentation.

- **ADIL-S401 Studio Project**

  **Prerequisites:**
  
  Take ADIL-S302;

  **Credits:**
  
  3.00

  **Description:**
  
  This semester of rigorous intellectual and creative exploration provides opportunity to research a subject of personal interest with social, cultural, scientific or commercial relevance. Students visually communicate ideas and information from their research and analyze and synthesize information and data to produce original visual works for a particular audience. This studio practice has interdisciplinary focus and may be the spark for ideas to be expanded in Illustration Portfolio or Illustration Collaboration courses. Experience and insights are a higher priority than the tangible results. Students carefully document and evaluate their ideas, research activities and results.

  **Term:**
  
  Offered Fall Term

- **ADIL-S402 Collaboration**

  **Prerequisites:**
ADIL-S302

Credits:
3.00

Description:

Creative collaboration provides a valuable opportunity for Illustration seniors to work with other artists or designers from any discipline - students or practicing professionals (on a pro bono basis), in partnership or groups - on original interdisciplinary creative projects related to theater (set, lighting and costume design), advertising (ads, packaging, signage and exhibitions), creative writing (publishing), journalism (commentary and reportage), medical or environmental science, biology, public service, or entrepreneurial licensed products. Content must derive from an existing source and all text must be previously published and written by someone other than the student illustrator. Collaborators divide tasks and responsibilities to best advantage.

Term:

Offered Spring Term

Type:

Expanded Classroom Requirement

- **ADIL-S410 Portfolio**

  Prerequisites:
  
  TAKE ADIL-S302;

  Credits:
  
  3.00

  Description:

  Concentrated studio practice within a student's preferred illustration-related field, genre, market or subject matter, using the preferred media and format and targeting the preferred audience. Projects may involve existing or self-generated content (creative writing, product design, etc.). Students develop a concise project outline and work independently to create a focused body of artwork to be used to obtain employment or freelance work. Progress is discussed in weekly group seminars and individual instructor critiques. Final artwork is reproduced and assembled in a professional quality print portfolio. Students also present the work on a professional web site and may choose to participate in a solo or group exhibition of the original artwork. Each student invites an outside professional (publisher, art director, licensing agent, artist rep., etc.) to evaluate their portfolio for a final Portfolio Review.
Term:
Offered Fall Term

- **ADIL-S500 Illustration Directed Studio**
  
  Prerequisites:
  Instructor's Approval
  
  Credits:
  3.00
  
  Description:
  The student completes a directed studio project under the supervision of a full-time Illustration faculty member. Directed Studio request forms must be accompanied by a written proposal with a schedule and must be approved by the instructor, the Illustration Program Director, and the Department Chair.
  
  Term:
  Offered Both Fall and Spring

- **ALS-264 Introduction to Law and Legal System**
  
  Credits:
  4.00
  
  Description:
  Introduction to civil, criminal and constitutional law, with special focus on procedural law and the federal and state court systems. Limitations of the courts, forms of remedies, the law of equity and institutional sources of American law will also be studied. Introduction to judicial cases and brief writing. Normally offered each semester.

  Type:
  Social Science
• **ALS-265 Law and Ethics**
  
  **Credits:**
  4.00
  
  **Description:**
  Ethical issues are central in law for lawyers, paralegals, judges, jurors and anyone working within or touched by the legal system. This course examines philosophical questions, practical issues, and social theories of law, primarily through the use of legal materials, to analyze legal ethical theory. The course considers how major theories are characterized within the American legal system, including the presumption of innocence, due process guarantees, the right to counsel, and other fundamental legal concepts. Normally offered alternate years.
  
  **Type:**
  Social Science
  
• **ALS-266 Criminal Law**
  
  **Credits:**
  4.00
  
  **Description:**
  This course examines criminal law in the United States from a broad perspective. It will present the general principles and doctrines that affect the whole criminal law, such as elements of criminal offenses, defenses to crime, and perspectives on crime and criminal law. In addition, students will learn the elements of specific crimes, such as homicide, criminal sexual conduct, terrorism and related crimes, crimes against public morals, and crimes against property. Discussions of the direction of the criminal law and constitutional limitations on government will be presented as preparation for future study.
  
  **Type:**
  Cultural Diversity Opt A
  
• **ALS-360 Fundamentals of Paralegal Practice**
  
  **Credits:**
  4.00
Introduces the student to the responsibilities of paralegals and to the culture of the legal profession. Topics include the development of paralegalism as a profession, the definition of the practice of law, ethical considerations, interviewing techniques, legal research, law office management, and client relationships. Normally offered each semester.

- **ALS-361 Legal Research & Writing I**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  How to use the law library, perform legal research, write legal analysis in memorandum form, and use computers as a research tool. Initial focus is on learning how to find legal materials, including federal and state case law, statutory law, and administrative law. Use of finding tools such as digests, encyclopedias, and CALR will be studied, as will Shepardizing. Focus also on legal writing, from letters through case analysis. Normally offered fall semester. Sophomore Status Required

- **ALS-362 Litigation**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  The Rules of Civil Procedure dictate the steps taken in state and federal lawsuits. This course will acquaint students with rules and the practical requirements of the rules, from filing a complaint to clarifying a judgment and to the duties of paralegals in a litigation office. Normally offered each semester.

  **Type:**
  
  Social Science

- **ALS-363 Law of Contracts**
  
  **Credits:**
The existence and validity of a contract is determined by specific rules. Students will learn about formation through offer and acceptance, contract enforceability, the necessity of consideration, and breach of contract and will draft contract provisions as a paralegal might in a law office. Normally offered each semester. Sophomore status required.

Type:
Social Science

- **ALS-365 Wills and Probate**

  Prerequisites:
  Take ALS-264 or ALS-360 or Instructor's permission

  Credits:
  4.00

  Description:
  State laws affect the disposition of an individual's estate at death, and upon death, the estate must be probated in court. Focus on estate information gathering, drafting of wills, and the probate of estates for those with and without wills. Emphasis on the role of the paralegal in a law office handling wills and probate. Prerequisites: ALS 360 or 363 or permission of instructor. 1 term - 4 credits. Normally offered yearly.

- **ALS-366 Corporate Law**

  Prerequisites:
  Take ALS-264 or ALS-360 or instructor's permission

  Credits:
  4.00

  Description:
Corporations are unique business entities and specialized citizens of the state. This course will examine the special rules for establishing and maintaining a corporation, including the nature of corporations and their legal relationships with governments, individuals, and other business entities. Students will learn about the role of paralegals in corporate law offices, including document management and production, corporate litigation processes, and maintaining corporate compliance. Normally offered alternate years.

- **ALS-368 Real Estate Law**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course will present common law real estate principles and the effect of federal agencies on the buying and selling of real property. Sample forms including leases, purchase and sale agreements, and closing forms are reviewed and drafted. Normally offered alternate years.

- **ALS-369 Family Law**
  
  **Prerequisites:**
  
  Take ALS-264 or ALS-360;
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Family law includes marriage, divorce, support, custody, property division, and abuse prevention petitions. Essentially an area of state law, it is often the backbone of general practice law firms. The role of paralegals in a family law office will be studied. Normally offered yearly.

- **ALS-370 Administrative Law and Worker's Compensation**
  
  **Prerequisites:**
  
  Take ALS-360 or ALS-362
  
  **Credits:**
Federal and state administrative agencies such as FTC, NLRB, and EEOC are extensive sources of law. Familiarity with these agencies is useful in many areas where a paralegal might work. Additionally, Worker's Compensation law is uniquely suited to assist the student in acquiring a practical understanding of the administrative law area, and its legal, administrative, economic, and social foundations will be studied. Normally offered alternate years.

• ALS-373 Education Law

Credits:
4.00

Description:
This course provides a basic overview of key issues in contemporary education law and policy. Relevant local, state, and federal laws will be reviewed as well as education policy issues, including civil rights, student safety and discipline. This course will also cover the core educational entitlements granted to all students with disabilities in the public education system. It will focus on the substantive legal protections designed to ensure that students with disabilities receive a Free and Appropriate Public Education, and on the various procedural protections for students and parents. The course will cover major federal legislation such as the IDEA, ADA and Section 504, as well as major Supreme Court and other important cases. The course will cover fundamental legal issues balancing the interests of the public, schools, students, and parents. Additionally, since paralegals have become an important part of education law enforcement and practice, several assignments will focus on practical paralegal work.

• ALS-374 Torts: Personal Injury Law

Credits:
4.00

Description:
Many civil suits arise when the negligence of an individual creates injury to another. Elements of negligence law and specific types of cases such as automobile accidents and medical malpractice will be studied, with an emphasis on practical aspects of drafting and research for the prospective paralegal. Normally offered yearly.

• ALS-375 Technology and the Law
ALS-362 Prerequisites:
Take ALS-362

Credits:
4.00

Description:
The role of computers and software in the law office as it affects the paralegal. Lectures and hands-on applications will focus on the changing technology of computer hardware through fact scenarios that students will use to track changes from introduction to resolution in litigation. Focus on software applications involving word processing, spreadsheets, billing, diary and scheduling, research, and use of the Internet. Normally offered alternate years.

ALS-377 Pol of Regulation, Product Liability Litigation & Tort Reform

Credits:
4.00

Description:
The law dictates that corporations, arguably the most influential institutions of our time, can have only one goal: to maximize profits for their shareholders. Corporations have no general legal or moral obligation to the well-being of society or individual consumers. This means that, if corporations are to be restrained from maximizing profit by harming the public good, they must be regulated. When regulation fails, and dangerous products make it into the marketplace, consumers who are harmed can bring product liability lawsuits. Despite these facts, massive deregulation has occurred in the U.S. and tort reform threatens the ability of consumers to bring product liability lawsuits. Using the food and tobacco industries as case studies, we will examine the history of deregulation and tort reform and answer the following question: How can law and government be used to protect society and consumers by regulating a system programmed to ignore the welfare of everyone except shareholders?

ALS-378 Advanced Litigation & Trial Practice

Credits:
4.00

Description:

Prerequisites:
ALS 362, or permission of instructor
Building on the skills introduced in ALS 362, Civil Litigation, this course will provide a thorough study of the rules of evidence, the process of discovery, and the preparation of a case for a trial, as well as the roles of arbitration, mediation, and negotiation in litigation and other legal disputes. Theory will be combined with practical applications for prospective paralegals, such as deposition abstracting, gathering and preserving evidence, and techniques on how to prepare a case for ADR. Normally offered yearly.

- **ALS-381 Paralegal Internship**

  **Prerequisites:**
  Senior standing and at least 15 hours of paralegal courses, or instructor's permission.

  **Credits:**
  4.00

  **Description:**
  A one-semester internship in either a law office, a governmental agency, insurance company, or a for-profit or non-profit corporation, depending on the positions available during each semester. Once a week seminars will discuss such topics as ethical considerations in a law office, experiences gained as a paralegal interns, and seeking paralegal employment. For specific placements/information, students must contact the Director of Paralegal Studies prior to the start of each semester. Prerequisites: Senior status and at least 15 hours of Paralegal Studies or permission of instructor. 1 term - 4 credits. Normally offered spring and summer. ECR

  **Type:**
  Expanded Classroom Requirement

- **ALS-383 Immigration Law**

  **Prerequisites:**
  Take ALS-264 or ALS-360;

  **Credits:**
  4.00

  **Description:**
Study of the immigration and nationality laws of the United States focusing on the interplay of the administrative agencies which administer those laws: Justice Department, Labor Department, and State Department. Topics include the immigrant selection system; the issuance of non-immigrant visas; grounds for excluding aliens and waiver of excludability; grounds for removal; change of status, and refugee and asylum status. Special emphasis on the paralegal's role in representing and communicating sensitively with aliens. Normally offered yearly.

- **ALS-384 Intellectual Property**
  
  **Prerequisites:**
  
  Take ALS-264 or ALS-360;
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  A survey of the law of the protection of ideas, trade secrets, inventions, artistic creations, and reputation. The course will briefly review the bases for patent, trademark, copyright and trade secret protection, the distinction among the various forms of intellectual property, and the statutory and common law methods of enforcing rights. Normally offered yearly.

- **ALS-385 Legal Research & Writing II**
  
  **Prerequisites:**
  
  Take ALS-361;
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Building on the skills in ALS 361 - Legal Research & Writing I, this course continues the focus on learning how to find legal materials and how to summarize research results. Writing skills will be strengthened through various exercises and revisions. Skill development in legal analysis, writing legal memoranda, and using computer assisted legal research with Westlaw and Lexis will be emphasized. Normally offered spring semester.

- **ALS-390 Employment & Labor Law**
Prerequisites:
Take ALS-264 or ALS-360; or instructor's permission

Credits:
4.00

Description:
The nature of the employment relationship and an overview of constitutional and federal statutory provisions that affect the employment relationship will be studied. Particular emphasis on the Civil Rights Act, the Age Discrimination in Employment Act, and the Americans with Disabilities Act. Statutory provisions regarding benefits and employment-related entitlements will also be studied. Normally offered yearly.

- ALS-391 Domestic Violence, Abuse & Neglect

   Prerequisites:
   Take ALS-264 or ALS-360; or instructor’s permission

   Credits:
   4.00

   Description:
   An opportunity to learn the history of domestic violence including battering, child abuse and child neglect, and the legal response to it. Focus will be on Massachusetts Law and its response, especially the Abuse Prevention Act, its application and enforcement, and on laws protecting children from abuse and neglect. Filings, law office issues and special issues in dealing with battered women and abused and neglected children will be included with the psychological issues, cultural issues, and advocacy possibilities. Normally offered yearly. Sophomore status required. Cultural Diversity A

Type:
Cultural Diversity Opt A, Diverse Perspectives

- ALS-396 International Law

   Prerequisites:
   Take ALS-264 or ALS-360 or instructor's permission
With the globalization of the world economy, legal professional and business people require knowledge of international law more than ever. This course offers students a survey of selected materials in public international law. Covered will be the practical and theoretical issues of international law, from the Law of the Sea to business implications to definitions of war and international concepts of justice. Normally offered yearly.

Type:
Social Science

**ALS-510 Independent Study**

Prerequisites:
Instructor's consent required

Credits:
1.00-4.00

Description:
Individual program of reading and research on an approved topic under the supervision of a member of the department. Only for qualified juniors or seniors. Offered every semester.

Type:
Social Science

**AMST-111 Defining America and Americans**

Credits:
4.00

Description:
Examines artistic, social, and political imaginings of America and Americans. We will read works by American and foreign observers of the United States to ask how Americans define themselves and how others see them. Course assignments will introduce students to themes, perspectives, and methods in the field of American Studies.

Type:

Humanities & History, Humanities Literature Requirement

- **ARAB-101 Elementary Modern Standard Arabic**

  Credits:

  4.00

  Description:

  Masters Arabic alphabet, learn elementary formal grammar and develop reading, speaking, and writing skills.

  Term:

  Offered Fall Term

  Type:

  BA FOREIGN

- **ARAB-102 Elementary Modern Arabic II**

  Prerequisites:

  ARAB 101 or Instructor's consent

  Credits:

  4.00

  Description:

  Continues to master Arabic alphabet, learn elementary formal grammar and develop reading, speaking, and writing skills.
Offered Spring Term

Type:

BA FOREIGN

- **ARH-101 Art History I**

  Credits:

  4.00

  Description:

  Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

  Term:

  Offered Both Fall and Spring

  Type:

  Humanities Literature Requirement, Vis. & Perform Thry & Hst

- **ARH-102 Art History II**

  Credits:

  4.00

  Description:

  Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

  Term:

  Offered Both Fall and Spring
• **ARH-H102 Honors Art History II**

  Credits:
  4.00

  Description:
  A survey of the art of Europe and America from the Renaissance to the present. Works of painting, sculpture, and architecture are presented in their historical context. Course covers the Renaissance, Baroque, Rococo, Neoclassicism, Romanticism, Realism, Impressionism, Post-Impressionism, Cubism, Surrealism, Abstract Expressionism, Pop, and Post-Modernism.

  Term:
  Offered Both Fall and Spring

  Type:
  Humanities Literature Requirement,Honors

• **ARH-205 Gender, Class and Alterity in Ancient And Medieval Art**

  Credits:
  4.00

  Description:
  Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

  Type:
  Diverse Perspectives,Vis. & Perform Thry & Hst
• ARH-290 Internship in Art History

  Prerequisites:

  ARH-101 and ARH-102 and Instructor consent

  Credits:

  1.00- 4.00

  Description:

  Designed to accompany an internship at a local museum, gallery, archive, or other art institution, this independent study course will carry variable credit depending on the number of hours devoted to the internship and the related academic work done by the student. Interested students should consult the instructor as they are applying for internships.

• ARH-305 Art of Greece and Rome

  Credits:

  4.00

  Description:

  Examines the civic, religious, and domestic art and architecture of the Ancient Mediterranean cultures of Greece and Rome. Considers temples, forums, basilicas, city planning, sculpture, pottery, wall painting, mosaics, and engineering achievements in their cultural contexts.

  Term:

  Occasional

  Type:

Type:

Humanities Literature Requirement, Humanities & History, Arts Admin Minor Elective

- **ARH-404 Seminar in Art History: Caravaggio**
  
  **Prerequisites:**
  
  Permission of instructor required
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Explores the art of Caravaggio within the historical context of the Early Baroque period in Italy. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.

- **ARH-406 Seminar in Art History: Bernini**
  
  **Prerequisites:**
  
  Instructor's consent required.
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Explores the art of Gian Lorenzo Bernini, arguably the most important and influential figure in the world of 17th-century art. Designed for art history majors & minors, the seminar explores Bernini's career within the context of the religious, political, and artistic upheavals of his time; it also helps students develop research skills and provides a foundation that will be valuable for anyone pursuing a career in the world of art and museums.

- **ARH-411 Seminar in Art History: Impressionism**
**Prerequisites:**
Permission of instructor required

**Credits:**
4.00

**Description:**
Explores the Impressionist movement of the late nineteenth-century, including Monet, Renoir, and Pissaro, within its historical context. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.

- **ARH-502 Honors Thesis**

  **Prerequisites:**
  Senior standing & permission of the Dept.Chair.

  **Credits:**
  4.00

  **Description:**
  A major research project completed under the supervision of a regular faculty member.

  **Term:**
  Occasional

  **Type:**
  Humanities & History, Humanities Literature Requirement

- **ARH-510 Independent Study**

  **Prerequisites:**
  An independent study form must be submitted to the CAS Dean's Office.
Credits:
1.00- 4.00

Description:
Students meet with a departmental faculty member to pursue advanced studies in areas of particular interest to them.

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement

- **ART-02 Pre-College**

  Credits:
  0.00

  Description:
  Intended for high school students and recent high school graduates. Normally offered summer semester.

- **ART-S209 Introduction to Drawing and Mixed Media**

  Credits:
  3.00

  Description:
  This course is an introduction to the fundamental principles of drawing using both traditional and experimental techniques. Media includes pencil, charcoal, pastels, oil pastels, image-transfer, and collage. This course is appropriate for beginners as well as more advanced students. Individual attention is given to students at various levels of ability and allows students to progress at their own pace. The lessons will be supplemented by lectures and visits to museums and galleries. Please note: This is a 3-credit studio course.

  Term:
Offered Both Fall and Spring

Type:
Arts Admin Minor Elective

• **ART-S211 Introduction to Painting**

  Credits:
  3.00

  Description:
  This introductory course is designed to encourage students with little or no knowledge of the use of various painting processes. The basic elements of painting are introduced in exercises enhanced by demonstrations and gallery visits. Students can choose to work with various painting mediums including oil, acrylic, or watercolor. Creative work is encouraged in a relaxed atmosphere where individual attention is given to students at various levels of ability. Please note: This is a 3-credit studio course.

  Term:
  Offered Both Fall and Spring

  Type:
  Arts Admin Minor Elective

• **ART-S216 Italy: Image Making**

  Credits:
  3.00

  Description:
  This studio based elective course includes painting from observation, image capture in photography, image manipulation in Photoshop, photo transfer and cross over techniques with hand manipulated materials while giving students a study abroad, create and cultural experience in Italy.

• **AS-100 Introduction to Asian Studies: Culture, People, Ideas**
An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

Term:
Offered Both Fall and Spring

Type:
Asian Studies,Cultural Diversity Opt B,Humanities & History,Humanities Literature Requirement,Divers

**AS-210 Traditional Chinese Society From 1800 to 1949**

Credits:
4.00

Description:
This course focuses on traditional Chinese society from 1800 to 1949, taking up such areas as family and kinship, social mobility, education, economic and social differentiation, community and social life, and popular belief. Examining the practices and ideologies underlying each area will enhance our understanding of the nature of traditional Chinese society, and help explain how elements of Chinese traditional culture contribute to modern Chinese identity and everyday life.

Term:
Occasional

**AS-220 Chinese Food in America**

Credits:
4.00
There are more Chinese restaurants in the U.S. than McDonald's, Burger Kings and KFC'S combined. This course examines the unique American phenomenon of Chinese food from a historical and anthropological viewpoint. Students will gain a better appreciation and understanding of the subject through the course and will probably never look at local Chinese takeout the same way afterwards.

Term:
Offered Spring Term

Type:
Asian Studies

• **AS-500 Asian Studies Internship**

  Credits:
  4.00

  Description:
  Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning.

  Term:
  Offered Both Fall and Spring

  Type:
  Expanded Classroom Requirement, Global Engagement Experience, Diverse Perspectives

• **AS-510 Independent Study**

  Credits:
  1.00-4.00

  Description:
Works directly with a faculty member on an agreed topic related to Asia or an Asian language. Past topics include: intermediate Chinese and Japanese; Asian popular culture.

Term:

Offered Both Fall and Spring

- **AS-511 Professional Development for Asian Studies**

  **Prerequisites:**

  Instructor consent required

  **Credits:**

  1.00

  **Description:**

  Students will reflect on their college career and develop a personal strategy for attaining professional goals. They will understand ethical guidelines and professional conventions by examining the differences between American work culture and Asian work culture; by applying this understanding to a transnational/diverse professional world. Students will understand what the job market and graduate school opportunities are like for Asian Studies graduates.

- **ASL-101 Elementary American Sign Language I**

  **Credits:**

  4.00

  **Description:**

  Introductory course for nonnative signers. Emphasis on receptive skills, vocabulary, and grammar. Introduction to issues important to the Deaf community. One language laboratory session per week.

  **Term:**

  Offered Fall Term

  **Type:**
• ASL-102 Elementary American Sign Language II

  Prerequisites:
  ASL 101

  Credits:
  4.00

  Description:
  Continues to develop receptive skills, vocabulary and grammar. Explores patterns of lexical and grammatical structure. Fosters awareness of issues important to the Deaf community.

  Term:
  Offered Spring Term

• BIO-101 Principles of Biology I

  Prerequisites:
  Must take BIO L101 concurrently

  Credits:
  3.00

  Description:
  An introductory course in basic concepts in cell biology, and genetics. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology. Not recommended for those interested in health careers.

  Term:
• BIO-L101 Principles of Biology I Lab

  Prerequisites:
  Must take BIO 101 concurrently

  Credits:
  1.00

  Description:
  A series of experiments and explanations to study the principles of diffusion, enzyme function, cell division, genetics and evolution. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology.

  Term:
  Offered Fall Term

  Type:
  NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• BIO-102 Principles of Biology II

  Prerequisites:
  BIO L102 must be taken concurrently

  Credits:
  3.00

  Description:
Investigations of relationships among organisms in time and space. Evolution, diversity, and human biology in the context of contemporary society. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology.

Term:
Offered Spring Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• BIO-L102 Principles of Biology II Lab

  Prerequisites:
  BIO 102 must be taken concurrently

  Credits:
  1.00

  Description:
  Exercises and field trips designed to complement and demonstrate the principles developed in the lecture section. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology.

Term:
Offered Spring Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• BIO-104 Environmental Biology

  Prerequisites:
  BIO 101 and BIO L101, can also be taken concurrently BIO L104 must be taken concurrently

  Credits:
Description:

An introduction to basic evolutionary, behavioral and ecological principles. Readings and discussions emphasize the ways that humans are affected by ecological processes and principles as well as how humans and their technology affect ecosystems. May not be taken by Biology majors or minors. This course will not fulfill requirements for a major or a minor in Biology. It is intended for non-biology majors as a follow-up to Biology 101. 3 hours lecture. Days Only. Madrid Campus only.

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR

• BIO-L104 Environmental Bio Lab

Prerequisites:

BIO-104 must be taken concurrently

Credits:

1.00

Description:

Exercises and field trips designed to complement and demonstrate the ecological principles developed in the lecture section. The lab emphasizes the scientific method and employs long term group projects. Madrid Campus only.

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR

• BIO-105 Humans and the Evolutionary Perspective

Prerequisites:

Non Science Majors Only

Credits:

4.00
Description:

Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non-laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

Term:

Occasional

Type:

NATURAL SCIENCE FOR BA BFA & BSJ

- **BIO-109 Plants and People**

  Prerequisites:

  Non Science Majors Only.

  Credits:

  4.00

  Description:

  This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.

  Type:

  NATURAL SCIENCE FOR BA BFA & BSJ

- **BIO-111 Introduction to the Cell**

  Prerequisites:
Must take BIO L111 concurrently

Credits:
3.00

Description:
Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

Term:
Offered Both Fall and Spring

Type:
SCI TECH ENGNR

• BIO-L111 Introduction to the Cell Laboratory

Prerequisites:
Concurrently with BIO 111

Credits:
1.00

Description:
Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

Term:
Offered Both Fall and Spring

Type:
SCI TECH ENGNR
• BIO-114 Organismal Biology

  Prerequisites:

  Must take BIO L114 concurrently.

  Credits:

  3.00

  Description:

  Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

  Term:

  Offered Both Fall and Spring

  Type:

  SCI TECH ENGNR

• BIO-L114 Organismal Biology Laboratory

  Prerequisites:

  Must take BIO 114 concurrently

  Credits:

  1.00

  Description:

  A series of laboratory experiences in evolution, diversity, anatomy and physiology.

  Term:

  Offered Both Fall and Spring

  Type:
SCI TECH ENGNR

• BIO-201 Biology's Big Questions

Prerequisites:
Non Science Majors Only.

Credits:
4.00

Description:
This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

Type:
SCI TECH ENGNR

• BIO-H201 Biology's Big Questions

Prerequisites:
Non Science Majors Only and at least a 3.3 GPA

Credits:
4.00

Description:
This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

Type:
SCI TECH ENGNR,Honors
• **BIO-203 Anatomy and Physiology I**
  
  **Prerequisites:**
  
  BIO L203 MUST BE TAKEN CONCURRENTLY BIO 111, BIO L111.
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  First part of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course emphasizes histology and physiology in the understanding of the integumentary, skeletal, muscular, and nervous systems. Medical terminology will be used.
  
  **Term:**
  
  Offered Fall Term
  
• **BIO-L203 Anatomy & Physiology Lab I**
  
  **Prerequisites:**
  
  BIO 111/L111; Must take BIO-203 concurrently
  
  **Credits:**
  
  1.00
  
  **Description:**
  
  A study of the human skeletal system and a comparative look at other organ systems involving observation of anatomical models and dissection of mammalian specimens. Also includes microscopy and computer simulations of physiological processes.
  
  **Term:**
  
  Offered Fall Term
  
• **BIO-204 Anatomy and Physiology II**
Prerequisites:
BIO 203, BIO L203; BIO L204 must be taken concurrently;

Credits:
3.00

Description:
Conclusion of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course investigates the endocrine, circulatory, respiratory, digestive, urinary, and reproductive systems as well as the physiology of immune responses, nutrition, and acid-base balance. Medical terminology will be used.

Term:
Offered Spring Term

- **BIO-L204 Anatomy & Physiology Lab II**

Prerequisites:
BIO 203/L203 and BIO 204 must be taken concurrently;

Credits:
1.00

Description:
A study of the human viscera using anatomical models and dissection of mammalian specimens. Also includes microscopy of tissues and physiological experiments.

Term:
Offered Spring Term

- **BIO-222 Field Botany**

Prerequisites:
BIO 111 and BIO-L111. This course will fulfill the Expanded Classroom Requirement.

Credits:
4.00

Description:
A three-week camping excursion, during which common tracheotypes, bryophytes, algae, and other photosynthetic organisms characteristic of various habits in Maine will be identified. Emphasis will be on plant ecology including species interactions and habitat requirements. Vertical zonation in mountains, lakes and intertidal areas will be a point of focus. Participants will camp for one week at each of three sites: Baxter State Park, Central Maine (near Augusta), and on Cobscook Bay. Travel will be by van(s) and hiking (up to ten miles a day) over difficult terrain. Sleeping bags and pads required (tents provided). Additional fees: Camping and food est. $525.00. ECR. The three-week camping excursion typically runs from late May (after tradition Spring course finals are over) into June. Taught yearly.

Term:
Offered Spring Term

Type:
Expanded Classroom Requirement

- **BIO-225 Plant Biology**

  Prerequisites:
  
  Bio 111, L111 and Bio 114, L114; Must be taken concurrently with L225.

  Credits:
  3.00

  Description:
  
  Course introduces students to the anatomy, physiology, systematics, ecology, and economic uses of all major groups of plants. Aspects of the biology of nonvascular, non-seed, gymnosperm, and angiosperm plants are explored. An overview of Kingdom Fungi is also covered. Each student is required to do a 10-15 minute presentation to the class highlighting the economic use of a group of plants assigned by the instructor. Normally offered Spring semester.

  Term:
• BIO-L225 Plant Biology Laboratory

Prerequisites:
BIO 111/L111 and BIO 114/L114; BIO 225 concurrently;

Credits:
1.00

Description:
Lab exercises focus on plant anatomy, physiology, and systematics. Instruction in the identification of major plant families and fungal types is covered. Trips to a Boston area herbarium and botanical garden are required.

Term:
Offered Spring Term

• BIO-233 Human Nutrition

Prerequisites:
BIO 111/L111 and BIO 114/L114;

Credits:
4.00

Description:
This interactive introduction to nutrition explores the science of human nutrition and further reviews concepts of how nutrition can promote health and well being. The course will review specific nutrient needs and functions, nutrient digestion, and the role of diet in well being and in the presence of chronic disease. Weekly course work encourages scientific literacy and fosters critical evaluation of nutrition in the news and in social media.

• BIO-240 Introduction to Marine Mammals
Prerequisites:
BIO-111, BIO-L111, BIO-114, and BIO-L114

Credits:
4.00

Description:
This course explores the biology and natural history of marine mammals, including cetaceans, pinnipeds, and sirenians, with a particular focus on species endemic to the North Atlantic. Topics include evolution, anatomy, physiology, behavior, ecology, field identification, the history of whaling and sealing, and contemporary management and conservation issues. Hands-on activities may include the dissection of a small marine mammal and a whale watch in Massachusetts Bay.

- **BIO-254 Marine Biology**

  Prerequisites:
  BIO-111/L111 or BIO-114/L114 or Instructor's consent; BIO-L254 concurrently;

  Credits:
  3.00

  Description:
  Introduction to the marine environment, its organisms and their specific adaptations. Emphasis on marine and estuarine ecology, intertidal habits, trophic relations, and physiology. Human impacts on the sea: fisheries, mariculture, pollution, introduced species, climate change and seawater acidification, and law of the sea. Includes a one week camping excursion into eastern Maine for lab/field exercises and some lectures. ECR. This course typically meets for one week in the third week of August (before typical fall courses begin) and includes a camping fee of ca $250. Taught yearly each fall.

  Term:
  Offered Fall Term

  Type:
  Expanded Classroom Requirement
• **BIO-L254 Marine Biology Lab**

  **Prerequisites:**
  
  BIO-111/L111 or BIO-114/L114 or Instructor's consent; BIO-254 concurrently;

  **Credits:**
  
  1.00

  **Description:**
  
  Field trips to local marine environments; field and laboratory observations of marine organisms. Independent student projects. Taught largely in the field during one week camping excursion to eastern Maine with several lab sessions on campus in Boston during fall semester. ECR.

  **Term:**
  
  Offered Fall Term

  **Type:**
  
  Expanded Classroom Requirement

• **BIO-262 Principles of Cell Culture**

  **Prerequisites:**
  
  BIO 111, L111 and BIO 114, L114 and CHEM 111, L111

  **Credits:**
  
  4.00

  **Description:**
  
  The course is designed as an application base educational experience that will allow students to learn the standard techniques associated with successful cell culture. As such, students are responsible for the maintenance, propagation, isolation, and preservation of their cells. A number of cell types and experimental manipulations of the cultures are investigated throughout the semester.

  **Term:**
  
  Offered Spring Term
• BIO-273 Biostatistics

Prerequisites:
BIO 111/L111

Credits:
4.00

Description:
Introduction to the statistical methods used to evaluate biological problems. Sampling, probability, confidence intervals, hypothesis tests, experimental design, analysis of variance, regression, and correlation are some of the topics offered. Software for data handling, graphics, and analysis will be used.

Term:
Offered Fall Term

Type:
Quantitative Reasoning

• BIO-274 Genetics

Prerequisites:
BIO 111/L111 and BIO 114/L114; BIO L274 concurrently;

Credits:
3.00

Description:
An examination of the basic principles of genetics in eukaryotes and prokaryotes at the level of molecules, cells, and multicellular organisms, including humans. Topics include Mendelian and non-Mendelian inheritance, structure and function of chromosomes and genomes, biological variation resulting from recombination, mutation, and selection, and population genetics.
Term: 
Offered Fall Term 

- **BIO-L274 Genetics Lab**
  
  Prerequisites:
  
  BIO-111, BIO-L111, BIO-114, and BIO-L114. Must be taken concurrently with BIO 274.
  
  Credits:
  
  1.00
  
  Description:
  
  Experiments designed to demonstrate principles presented in lecture, using a range of genetic model organisms that include E. coli, B. subtilis, S. cerevisiae, D. melanogaster, S. fimicola, and C. elegans.

- **BIO-285 Microbiology**
  
  Prerequisites:
  
  BIO-111 and BIO-L111; BIO-L285 concurrently;
  
  Credits:
  
  3.00
  
  Description:
  
  Viruses and bacteria are surveyed in terms of their ecology, biochemistry, taxonomy, molecular biology and control.

Term: 
Offered Spring Term
- **BIO-L285 Microbiology Laboratory**

  **Prerequisites:**
  
  BIO 111/L111; BIO 285 concurrently;

  **Credits:**
  
  1.00

  **Description:**
  
  Introduction to microbiological techniques and their applications to health, research and industry.

  **Term:**
  
  Offered Fall Term

- **BIO-302 Writing for Research**

  **Prerequisites:**
  
  BIO 111/L111 and WRI 101, WRI 102, or WRI-103. BIO and Radiation Therapy majors with junior standing only.

  **Credits:**
  
  4.00

  **Description:**
  
  Development of skills for writing clearly, concisely, and creatively in the style of scientific journals. This course emphasizes the formulation of a research project of the student's choice and leads to a formal manuscript on the topic. Instruction includes literature search methods and software for the graphical presentation of data. Professional development, including the preparation of job application materials and in-person interview skills, is also an integral part of this course. Required of all biology and radiation science majors. Junior standing required.

  **Term:**
  
  Offered Both Fall and Spring

- **BIO-304 Comparative Animal Physiology**
Mechanisms of physiological adaptations to environmental challenges are studied. Examples of gas exchange, osmoregulation, fluid transport, temperature regulation, nervous control, and movement are examined in various animal forms through class lecture and discussion, required readings, and external lectures. Spring semester.

Term:
Offered Spring Term

- **BIO-L304 Comp Animal Physiology Lab**

  Prerequisites:
  
  BIO-114 and BIO-L114. Must take BIO-L304 concurrently.

  Credits:
  
  1.00

  Description:
  
  Selected physiological processes and mechanisms or adaptation in invertebrate and vertebrate animals are examined by observation and controlled experiments.

- **BIO-315 Animal Behavior**

  Prerequisites:
  
  BIO-114/L114

  Credits:
4.00

Description:

Surveys animal behavior in a range of species (invertebrates, birds, fish, mammals including humans) to assess similarities and differences in the evolution of behaviors and their physiological mechanisms by which individual organisms and species adapt to their environments. Topics include: predator evasion; mating systems; parental care; social behavior; and learning.

Term:

Offered Spring Term

- **BIO-333 Ecology**

  Prerequisites:

  BIO-114/L114; BIO-L333 concurrently;

  Credits:

  3.00

  Description:

  Areas of study include but are not limited to basic principles of population biology, community ecology, trophic dynamics, ecosystem structure and function and evolutionary theory.

  Term:

  Offered Fall Term

- **BIO-L333 Ecology Lab**

  Prerequisites:

  BIO-114, BIO-L114, and BIO-333 concurrently

  Credits:

  1.00
Description:
Field and laboratory experiences in techniques and concepts relevant to ecological theory, data collection, statistical analysis, visual representation and report preparation.

Term:
Offered Fall Term

- **BIO-337 Evolution**

Prerequisites:
Take BIO-111 BIO-L111 BIO-114 BIO-L114. BIO 274 recommended.

Credits:
4.00

Description:
A survey of evolutionary theory, exploring processes such as the genetic sources of variation, natural and sexual selection, and evolutionary developmental biology. Using phylogenetic systematics and other tools, we will demonstrate how these mechanisms result in the visible patterns of evolution. This is a reading-and-writing intensive course centered on close reading of Origin of the Species and discussion of recent peer-reviewed literature about evolution.

Term:
Summer

- **BIO-343 Biodiversity & Conservation Biology**

Prerequisites:
BIO-114 and BIO-L114

Credits:
4.00

Description:
This course covers a broad spectrum of aspects of biodiversity and conservation by examining key elements ranging from global patterns in the distribution of life on our planet to the effects our human population is causing on those patterns. Examples from marine and terrestrial animals and plants are used to convey current ideas with a focus on the importance of global biodiversity, and the design of management programs for the conservation of species and ecosystems. 4-credit

- **BIO-345 The Biology of Vector Borne Diseases**

  **Prerequisites:**

  BIO-114/L114;

  **Credits:**

  4.00

  **Description:**

  A survey of the occurrence, life history and pathogenicity of the most important arthropod-borne, human diseases both internationally (malaria, dengue, plague, trypanosomiasis, yellow fever, etc.) and within the United States (Lyme disease, EEE, West Nile Virus, and others). Demographic and environmental factors leading to the re-emergence and spread of these diseases will be considered.

- **BIO-350 Vertebrate Biology**

  **Prerequisites:**

  BIO-111/L111; BIO-114/L114; BIO-L350 concurrently;

  **Credits:**

  3.00

  **Description:**

  This class will focus on the form and function of vertebrate animals from an evolutionary standpoint. The adaptations of major groups will be discussed in light of their phylogenetic history and ecology. A discussion of major adaptive radiations and abiotic factors that influenced these trends will also be highlighted.

  **Term:**

  Occasional
BIO-L350 Vertebrate Biology Lab

Prerequisites:

BIO-111/L111; BIO-114/L114; BIO-350 concurrently;

Credits:

1.00

Description:

This lab will focus on the comparative anatomy of vertebrate animals. In-depth dissections will be the focus of the laboratory exercises. A Squalus shark, a Necturus salamander, a pigeon, and a mink will be examined in detail.

Term:

Occasional

BIO-357 Biology of Fishes

Prerequisites:

BIO 114/L114, and Junior standing. Requires permission from Marine Sciences Coordinator.

Credits:

3.00

Description:

The evolution, systematics, anatomy, physiology and behavior of freshwater, marine and anadromous fishes from temperate to tropical environments. The interactions of fish in their environments, including predator-prey relationships, host-symbiont interactions, and fish as herbivores. Taken with permission from the Marine Science Consortium Coordinator. [This is a Marine Science Consortium Course and enrollment is limited] Evenings only: off campus

Term:

Offered Spring Term
- **BIO-359 Biology of Whales**

  Prerequisites:

  BIO-111, BIO-L111, BIO-114, BIO-L114, and 2 BIO courses at the 200 level or above

  Credits:

  3.00

  Description:

  This course provides a comprehensive review of the biology, ecology, and management of cetaceans. A thorough grounding in cetacean mammalogy and population biology will prepare students to understand conservation problems presented as case histories. Students will also complete an independent research paper on a topic related to cetacean biology. Hands-on activities may include the dissection of a small cetacean and a shore-based whale watch in Cape Cod Bay. This course is part of the Marine Studies Consortium and will be held at the New England Aquarium.

- **BIO-360 Cancer Biology**

  Prerequisites:

  BIO-111, BIO-L111, BIO-114, BIO-L114, BIO-274, and BIO-L274

  Credits:

  4.00

  Description:

  An examination of molecular and cellular mechanisms that lead to the development of cancer. Factors contributing to tumorigenesis, angiogenesis, and metastasis will be discussed; these factors, oncogenes, tumor suppressor genes, and signal transduction networks. In addition, an investigation of current strategies for cancer prevention and treatment will be considered.

- **BIO-374 Genomics**

  Prerequisites:

  BIO 111/L111, CHEM 111/L111, BIO 274/L274 Must take BIO L374 concurrently

  Credits:
What can we learn from genomics? In this course, you will develop an understanding of how cutting edge techniques from biotechnology are changing our views of biology. You will learn how genetic sequencing can be used for everything from tracing evolutionary histories in the tree of life to shedding light on biodiversity patterns of populations. With a focus on human genetics, you will also explore how genes are discovered and linked to phenotypic traits. Finally, you will consider methods of monitoring gene expression and how the resulting genetic networks can help medicine and drug development.

- **BIO-L374 Genomics Laboratory**

  **Prerequisites:**
  BIO 111/L111, CHEM 111/L111, BIO 274/L274 Must take BIO 374 concurrently

  **Credits:**
  1.00

  **Description:**
  In this course, you will develop an understanding of current genomic methods through collection and examination of your own data. In the first part of the lab, you will use sequencing techniques to compare genetic relationships and characterize the microbial biodiversity of a population. In the second part of the lab, you will focus on gene expression and functional genomics. You will determine the actions of a transcription factor through RNA-seq and also determine how a collection of uncharacterized transcription factors affect antibiotic sensitivity. In addition to reading primary literature and keeping a lab notebook, you will also learn how to analyze and present your genomics data.

- **BIO-377 Immunology**

  **Prerequisites:**
  BIO-114/L114; CHEM-211/L211; BIO-L377 concurrently;

  **Credits:**
  3.00

  **Description:**
The concept of immunity, response to infection, structure of the immune system, biochemistry of immunoglobins, antigen-antibody interactions, allergy, immunological injury, lymphocyte subpopulations and cellular immunity, tolerance suppression and enhancement. Taught alternate/even years.

Term:
Offered Spring Term

- **BIO-L377 Immunology Laboratory**
  
  Prerequisites:
  
  BIO-114 and BIO-L114 and CHEM-211 and CHEM-L211. Must take BIO-377 concurrently.
  
  Credits:
  
  1.00
  
  Description:
  
  Anatomy of the immune system, immunoglobin purification, hemagglutination, enzyme immunoassay. Immuno-chemistry, immunoelectrophoresis, gel precipitation assay.
  
  Term:
  
  Occasional

- **BIO-385 Advanced Microbiology**
  
  Prerequisites:
  
  BIO-285 and BIO-L285 BIO L385 must be taken concurrently
  
  Credits:
  
  3.00
  
  Description:
  
  Pathogenesis and host-parasite relationships; epidemiology and public health aspects of pathogenic microorganisms are stressed; molecular biology, applied and industrial microbiology. Current literature reviews. Taught alternate/odd years.
Offered Spring Term

- **BIO-L385 Advanced Microbiology Lab**

  Prerequisites:
  
  BIO 285/L285; BIO 385 must be taken concurrently

  Credits:
  
  1.00

  Description:
  
  Isolation, quantization and cultivation of microorganisms, advanced general and applied microbiology and molecular biology. Experience in media, chemical and culture preparations.

  Term:

  Offered Spring Term

- **BIO-403 Cell Biology**

  Prerequisites:
  
  BIO 111/L111; CHEM-211/L211; BIO-L403 concurrently;

  Credits:
  
  3.00

  Description:
  
  The study of cells, approached through examinations of biochemical mechanisms, the relation between the structure and function of biological molecules and organelles, and the regulation of normal and diseased cells.

  Term:

  Offered Fall Term
• BIO-L403 Cell Biology Lab

Prerequisites:

BIO-111 and BIO-L11 and CHEM-211 and CHEM-L211. Must take BIO-403 concurrently.

Credits:

1.00

Description:

Examination of biological molecules and their role in cell function. Techniques used in these examinations will include enzymatic analyses, gel electrophoresis, immunologic identification, chromatography, and spectroscopy. Students are expected to develop their proficiency in the laboratory techniques used, to analyze their results in a quantitative manner, and to present their findings.

Term:

Offered Fall Term

• BIO-409 Biology Seminar

Prerequisites:

BIO 202, Senior standing

Credits:

1.00

Description:

The purpose of this class is to familiarize all senior biology majors with the process of investigating and implementing novel research in the biological sciences. The centerpiece of the course is a semester long project in which each student selects, researches, and designs an original experiment on the topic of their choice. Two in-class presentations and a full length research proposal are required. Weekly reading assignments and discussions of the primary literature are vital to the investigation piece of the course. Prerequisites: BIO 202 and senior standing. May not be used for credit towards or an elective for the Biology Minor.

Term:
• **BIO-474 Molecular Genetics**

Prerequisites:

CHEM-311 or BIO-274 and BIO-L274 and BIO-L474 concurrently

Credits:

3.00

Description:

An examination of concepts and techniques of modern molecular biology. Topics include the structure and function of DNA, RNA, and proteins, the regulation of gene expression in prokaryotes and eukaryotes at transcriptional and post-transcriptional levels, genetic modification of organisms, and genome analysis. This course will incorporate readings and discussions of primary scientific literature. Spring semester.

Term:

Occasional

• **BIO-L474 Molecular Genetics Lab**

Prerequisites:

Take CHEM-331 or BIO-274 and BIO-L274. BIO-474 must be taken concurrently.

Credits:

1.00

Description:

This upper level laboratory course will consist of a semester-long project in the form of a series of consecutive experiments involving the generation of a genetically modified organism and its subsequent molecular analysis. Techniques employed will include genetic screens, DNA isolation, restriction endonuclease analysis, transformation of bacteria, gel electrophoresis, gene reported assays, RNA isolation, reverse transcription, and quantitative PCR.

Term:
• BIO-475 Developmental Biology

Prerequisites:
BIO-114, L114 and CHEM-211, L211, and BIO-L475 concurrently

Credits:
3.00

Description:
This course focuses on embryonic development in vertebrates. The conceptual focus on evolutionary developmental biology includes comparative developmental mechanisms and Epigenetic processes.

Term:
Offered Fall Term

• BIO-L475 Developmental Biology Lab

Prerequisites:
BIO 114/L114, CHEM 211/L211 BIO 475 must be taken concurrently

Credits:
1.00

Description:
This laboratory course complements the lecture course. Exercises include internet exercises, examination of embryos, biochemical tests, use of developmental models, and student presentations. A number of model organisms are examined.

Term:
Offered Fall Term
• BIO-503 Biology Internship
  Prerequisites:
  BIO111/BIOL111, BIO114/BIOL114. BIO274/BIOL274 may be taken as a corequisite
  Credits:
  4.00
  Description:
  Biology Internship: This course provides students with credit for an unpaid internship completed during the semester when credit is earned. Students must secure an approved internship and provide documentation from the internship’s overseer to a full time faculty member sponsor in order to register for the course. The internship must involve participation in research and/or patient care. Students or their overseers will be required to submit monthly records of internship hours and provide the faculty sponsor with a written summary of internship experiences and accomplishments by the last week of classes. Only one internship may be used as a biology elective. This course is available for variable credit. Prerequisites: An Internship for Credit form must be submitted to the department chair Credits: 1-4

• BIO-510 Independent Study
  Prerequisites:
  An independent study form must be submitted to the CAS Dean's Office.
  Credits:
  1.00-5.00
  Description:
  Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A paper and oral report are required. Only ONE independent study may be used toward biology electives.
  Term:
  Offered Both Fall and Spring

• BLC-AIM Academic Improvement
Suffolk University is introducing the Academic Improvement Program (AIM), a new initiative to assist students who have experienced academic difficulty. Because your cumulative grade point average has fallen below the University's standard of 2.0 and as a condition of your probation status at the University, you will be required to participate in AIM. AIM provides support, strategies, and resources to help students take control of their academic life and succeed. AIM participants meet individually and in a small group format with trained instructors to target common areas in which students have difficulty. In addition, the instructors work with students to identify what areas they need to improve and to develop an individualized plan for success.

- **BLKST-100 Introduction to Black Studies I: Survey of the Discipline**

  Credits:
  
  4.00

  Description:
  
  Introduces students to the basic concepts, literature and interdisciplinary nature of Black Studies. Provides a conceptual framework for the investigation and analysis of black history and culture as well.

  Term:
  
  Occasional

  Type:
  
  Humanities & History, Humanities Literature Requirement

- **BLKST-101 Introduction to Black Studies II Research and Writing**

  Credits:
  
  4.00

  Description:
Introduces students to basic research techniques and methods in Black Studies including library use, identifying resources, project development, documenting sources, and writing research papers.

Term:
Occasional

Type:
Social Science

• **BLKST-250 Haiti, Guadalupe and Martinique**

  Credits:  
  4.00

  Description:  
  This course explores the rich intellectual tradition of Haiti, Guadeloupe, and Martinique by considering historical moments linked to colonialism, the abolition of slavery, the representation of gender, departmentalization, and decolonization through essays, films, poems, novels, and short stories by critics and writers from the 19th-21st centuries.

  Type:  
  Diverse Perspectives

• **BLKST-263 Sabar: Music and Dance**

  Credits:  
  4.00

  Description:  
  Introduces participants to the sabar music and dance tradition of Senegal through a study of music, dance, language and history. Taught by professional practitioners of the sabar tradition, students will develop a sense of how music and dance are used in both traditional and popular contexts. This course will be directed by Prof. Robert A. Bellinger.

  Type:
• BLKST-469 Research Seminar: African American Life in Slavery and Freedom - Reconstruction and the Freedman's Bureau

Credits:
4.00

Description:
Using documents related to the work of the Freedman's Bureau this class provides students with a deeper understanding of the reconstruction era. This course is identical to HST 469.

Term:
Occasional

Type:
Social Science

• CAS-101 Speak Up! Strategies of Success Success

Prerequisites:
CAS students only.

Credits:
1.00

Description:
CAS 101 is a one-credit course that meets once a week and is designed to help you have a successful transition to Suffolk University and our unique urban community. It is also designed to introduce you to the principles and concepts of Oral Communication and Presentation Skills. Through interactive exercises and engaging assignments, you will explore the campus environment and learn about strategies for success as a student. You will present speeches about your research and activities to improve your abilities as a speaker.
• CAS-102 Stand Out! Strategies for Success 11

Prerequisites:
CAS-101 and Instructor consent

Credits:
1.00

Description:
Students will continue to learn about career options and interests through additional research and exploration. They will learn about the different types of interviews (screening/telephone, informational, personal, panel, etc.). They will learn how to prepare for and participate in a one-on-one interview. They will continue to refine and develop their oral and written communication through class presentations and research projects. They will prepare a resume and cover letter.

• CAS-H110 Fixing the World- Energy and Water: The Science of Solutions

Credits:
4.00

Description:
Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

Type:
Honors

• CAS-H112 Decoding Boston: Signs and the City
This interdisciplinary seminar will explore the buildings, monuments, sites, and signs around Boston from the point of view of Visual and Culture Studies. In addition to providing a compelling introduction to the history, major landmarks, and culture of the city, the seminar is specifically intended to improve students' visual literacy: that is, their awareness of their visual environment and their ability to critically analyze the rhetoric of the spaces, buildings, and images with which they are surrounded.

Type:
Honors

**CAS-H113 The Vietnam and Iraq Wars: Polarized Perspectives**

Credits:
4.00

Description:

This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement just? To what extent were the methods used by the United States military during each war just? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit the enemies of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

Type:
Honors

**CAS-201 College to Career: Explore Your Options And Find Your Path**

Credits:
1.00
This course engages students in the early stages of career planning. Students will explore their interests, skills, values, and strengths, which will allow them to begin setting appropriate goals for professional development. Once students understand themselves in relation to the world of work, they will learn how to research careers and employment paths that fit with their goals.

- **CAS-PERSP Used to Fulfill Persp**
  
  Credits:
  
  3.00- 4.00

  Type:

  Diverse Perspectives

- **CAS-VPATH Used to Fulfill Vpath**

  Credits:
  
  3.00- 4.00

  Type:

  Vis. & Perform Thry & Hst

- **CHEM-101 Chemical Concepts Contemporary Issues I**

  Credits:
  
  3.00

  Description:

  Principles of chemistry with illustrations from everyday life. Basic chemical concepts are used to decode consumer product labels and form a basis for understanding contemporary issues. Specifically designed to satisfy the Science requirement when taken with CHEM 102, L101, L102. May not be used by science majors for science credit. Concurrent enrollment in CHEM L101 required. 3 hours lecture. 1 term - 3 credits. Normally offered Fall/Summer I.
- **CHEM-L101 Chemical Concepts Contemporary Issues Lab I**

Prerequisites:

Must be taken concurrently with CHEM 101

Credits:

1.00

Description:

Principles of chemistry and its applications demonstrated through experimentation. Experiments may include field testing and analysis of ocean and river water, testing of household products and sunscreens, determination of calorie content of foods, and molecular modeling with computers. May not be used by science majors for science credit. 2-hour laboratory. Normally offered Fall/Summer I.

- **CHEM-102 Chemical Concepts Contemporary Issues II**

Prerequisites:

It is strongly recommended that students enrolling in this course have some acquaintance of basic chemical principles either on the college or the pre-college level. Must be taken concurrently with CHEM L102

Credits:

3.00

Description:

A continuation of CHEM 101, including topics in organic chemistry, biochemistry, polymer chemistry, ecology, air and water pollution, food and food additives, pharmaceuticals, and forensic science. Basic Chemical concepts are used to decode consumer product labels and form a basis for understanding contemporary issues. Specifically designed to satisfy the science requirement. May not be used by science majors for science credit. Prerequisite: CHEM 101, CHEM 111 or pre-college chemistry. 3 hours lecture. Normally offered Spring/Summer II.
• CHEM-L102 Chemical Concepts Contemporary Issues Lab II

Prerequisites:

It is strongly recommended that students enrolling in this course have some acquaintance of basic chemical principles either on the college or the pre-college level. Must be taken concurrently with CHEM 102

Credits:

1.00

Description:

A continuation of CHEM L101. Experiments may include making plastics and drug products, analyzing food products, making a model of DNA, crime lab analysis procedures, making aspirin, and the study of flavors and fragrances using molecular models. Concurrent enrollment in CHEM 102 required. May not be used by science majors for science credit. Prerequisites: CHEM 101 and CHEM L101. 2-hour Laboratory. 1 term - 1 credit. Normally offered Spring/Summer II.

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• CHEM-103 Chemical Concepts Contemporary Issues IIA

Prerequisites:

It is strongly recommended that students enrolling in this course have some acquaintance of basic chemical principles either on the college or the pre-college level.

Credits:

4.00

Description:

Topics include organic chemistry, biochemistry, polymer chemistry, ecology, air and water pollution, food and food additives, pharmaceuticals, and forensic science, with an emphasis on their application to current issues. Specifically designed to satisfy the non-laboratory science requirement for
the B.A. degree. Science related information searches and writing assignments will be based on current topics from the semester's work. 3 hours lecture. It is strongly recommended that students enrolling in this course have some acquaintance of basic chemical principles either on the college or the pre-college level.

Type:

NATURAL SCIENCE FOR BA BFA & BSJ

• CHEM-105 Chemical New Product Development

Prerequisites:

ENT 101

Credits:

4.00

Description:

This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

Type:

SCI TECH ENGNR

• CHEM-106 Biotechnology & Its Applications in Medicine, Agriculture, Law

Credits:

4.00

Description:
Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.

Type:

SCI TECH ENGNR

- CHEM-111 General Chemistry I

Prerequisites:

Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

Credits:

3.00

Description:

Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

Term:

Offered Fall Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR

- CHEM-L111 General Chemistry I Lab

Prerequisites:

Must be taken concurrently with CHEM 111.

Credits:

1.00
Description:

Introduces the basic principles of chemistry through discovery laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

Term:

Offered Fall Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS, SCI TECH ENGNR

- CHEM-112 General Chemistry II

Prerequisites:

CHEM 111/L111; CHEM-L112 must be taken concurrently.

Credits:

3.00

Description:

This course is a continuation of General Chemistry I. Fundamental principles of chemistry are discussed. Introduces thermochemistry, gases, solution chemistry, chemical kinetics, chemical equilibrium, acid-base systems, and thermodynamics.

Term:

Offered Spring Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- CHEM-L112 General Chemistry II Lab
Prerequisites:
CHEM 112 must be taken concurrently;

Credits:
1.00

Description:
This course is a continuation of General Chemistry I Lab. Apply the basic principles of chemistry through discovery laboratory experiments with an emphasis on quantitative analysis. Execute basic analytical techniques such as gravimetric analysis, the application of Beer's Law, and acid-base titrations. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

Term:
Offered Spring Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- **CHEM-201 Caveman Chemistry**

  Credits:
  4.00

  Description:
  Caveman chemistry explores chemical technologies that have led to modern industrial civilization, with an emphasis on the chemistry we encounter in everyday life. Although this is not a laboratory course, it is very much a course about doing things. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings, through literature and hands-on activities.

  Type:
  SCI TECH ENGNR

- **CHEM-211 Organic Chemistry I**

  Prerequisites:
CHEM 112 and CHEM-L112. CHEM-L211 must be taken concurrently.

Credits:
3.00

Description:
Introduces basic theories of structure, bonding, and chemical reactivity as specifically applied to modern organic chemistry. Includes functional groups, acid/base chemistry, nomenclature, resonance, spectroscopy, and stereochemistry.

Term:
Offered Fall Term

- CHEM-L211 Organic Chemistry Laboratory I

  Prerequisites:
  CHEM-112 and CHEM-L112. Must be taken concurrently with CHEM 211.

  Credits:
  1.00

  Description:
  Introduces synthetic organic chemistry techniques. Includes melting point determination, distillation, crystallization, extraction, chromatographic separations, and infrared spectroscopy. Discusses experimental design within the context of green organic chemistry.

  Term:
  Offered Fall Term

- CHEM-212 Organic Chemistry II

  Prerequisites:
  CHEM 211 and CHEM L211. Must take CHEM-L212 concurrently.

  Credits:
Description:
Builds on the core competencies acquired in Organic Chemistry I. Includes detailed mechanistic discussions of substitution, elimination, and addition reactions. Emphasizes organic synthesis, structure determination, and spectroscopy.

Term:
Offered Spring Term

- **CHEM-L212 Organic Chemistry Laboratory II**
  
  Prerequisites:
  CHEM-211 and CHEM-L211. Must be take CHEM-212 concurrently.

  Credits:
  1.00

  Description:
  Builds on the core competencies acquired in Organic Chemistry Laboratory I. Emphasizes the characterization of organic molecules via nuclear magnetic resonance spectroscopy. Discusses experimental design within the context of green organic chemistry.

  Term:
  Offered Spring Term

- **CHEM-314 Instrumental Analysis**
  
  Prerequisites:
  CHEM 211; CHEM L314 must be taken concurrently.

  Credits:
  3.00

  Description:
Theory and application of analytical instruments: ultraviolet, visible, fluorescence, atomic and emission spectroscopy; chromatographic methods; electrochemical measurements. Prerequisites: CHEM 211; CHEM L314 must be taken concurrently. 3 hour lecture. 1 term - 3 credits. Normally offered Fall/Spring, days.

Term:
Alternates Fall & Spring

- **CHEM-L314 Instrumental Analysis Lab**
  
  Prerequisites:
  
  CHEM L211; CHEM 314 must be taken concurrently
  
  Credits:
  
  1.00
  
  Description:
  
  Laboratory experiments in chemical analysis using instrumental techniques, including spectroscopy and chromatography. Data collection and evaluation includes computer-based methods. Reports are prepared in professional style. Prerequisites: CHEM L112; CHEM 314 must be taken concurrently. 4-hour Laboratory. 1 term - 1 credit. Normally offered Fall/Spring.

  Term:

  Alternates Fall & Spring

- **CHEM-331 Biochemistry I**
  
  Prerequisites:
  
  CHEM 212/L212 or permission of instructor. CHEM L331 must be taken concurrently.
  
  Credits:
  
  3.00
  
  Description:
Explores the foundations of biochemistry, including the structure, organization and behavior of proteins, carbohydrates, lipids, and nucleic acids. Topics include enzyme catalysis, kinetics, and inhibition as well as protein regulation and membrane structure. Introduces the use of biochemical literature and computer-based bioinformatics techniques. Offered every fall.

Term:
Offered Fall Term

- CHEM-L331 Biochemical Techniques I

  Prerequisites:

  Must be taken concurrently with CHEM 331. Take CHEM-212 and CHEM-L212 or permission of instructor.

  Credits:

  1.00

  Description:

  Laboratory course introducing biochemical techniques. Includes buffer preparation, PCR, purification of DNA and proteins, agarose and polyacrylamide gel electrophoresis, protein quantitation and detection, and enzyme kinetic assays. Offered every Fall.

  Term:

  Offered Fall Term

- CHEM-332 Biochemistry II

  Prerequisites:

  CHEM 331

  Credits:

  4.00

  Description:

  This course explores the principles of bioenergetics and metabolism of biological compounds. Coverage includes intermediary metabolism of carbohydrates, lipids, amino acids, oxidative phosphorylation, and synthesis of purines and pyrimidines. Additional topics include the regulation and
integration of metabolism. Lectures will be supplemented with discussions of the biochemical literature. Prerequisites: CHEM 331. 3 hours of lecture and 1 hour of recitation per week. Offered every Spring, days only.

Term:
Offered Spring Term

- **CHEM-L332 Biochemical Techniques II**

  Prerequisites:

  CHEM 331, and CHEM L331. CHEM 332 concurrently made inactive per catalog changes. 03 Feb 2009 03:38pm Crystal White

  Credits:

  2.00

  Description:

  Biochemical techniques emphasizing instrumentation and methods of biochemical experimentation. Biochemical techniques emphasizing instrumentation and methods of biochemical experimentation. The major focus will be on methods used in DNA analysis and characterization. Techniques may include electrophoresis, spectrophotometry, polymerase chain reaction, DNA isolation and purification. Prerequisites: CHEM 331 and CHEM L331; CHEM 332 must be taken concurrently.

- **CHEM-375 Advanced Inorganic Chemistry**

  Prerequisites:

  CHEM 212

  Credits:

  3.00

  Description:

  Topics in inorganic chemistry including bonding theories, chemical structures, symmetry and group theory, kinetics and mechanisms of reactions, and spectroscopy. Advanced topics may include bioinorganic chemistry, organometallics, or materials chemistry. 3 hours lecture. Normally offered spring, even numbered years.
• CHEM-L375 Advanced Inorganic Laboratory

Prerequisites:
CHEM 375 must be taken concurrently

Credits:
1.00

Description:
Laboratory exercises designed to illustrate principles covered by topics in CHEM 375. Prior or concurrent enrollment in CHEM 375 required. 4-hour laboratory. Normally offered spring, even numbered years.

Term:
Alternates Fall & Spring

• CHEM-390 Advanced Organic Chemistry

Prerequisites:
Prerequisite: CHEM 212.

Credits:
3.00

Description:
Expands on topics introduced in Organic Chemistry I and II; depending on student interest, may include in-depth discussions of carbonyl chemistry, industrial organic chemistry, organometallic chemistry and biomolecules. Prerequisite: CHEM 212, concurrent enrollment in CHEM L390 required. 3 hours of lecture per week. Normally offered alternate years.

Term:
Alternates Fall & Spring
• CHEM-411 Physical Chemistry I
  
  Prerequisites:
  
  CHEM 112; MATH 166;
  
  Credits:
  
  3.00
  
  Description:
  
  Principles of thermodynamics and its general applications to physical and chemical change; introduction to the kinetic theory of gases and concepts of statistical mechanics. 3 hours lecture. 3 hour lecture. Normally offered Fall, days.
  
  Term:
  
  Offered Fall Term
  
• CHEM-L411 Physical Chemistry Laboratory I
  
  Prerequisites:
  
  CHEM 411 must be taken concurrently
  
  Credits:
  
  1.00
  
  Description:
  
  Laboratory exercises covering classical experiments in thermodynamic and instrumental measurements. Significant emphasis will be placed on experimental design and data analysis skills in addition to technical writing skills as demonstrated by laboratory reports prepared in the professional style. 4-hour laboratory. Normally offered Fall, days.
  
  Term:
  
  Offered Fall Term
  
• CHEM-412 Physical Chemistry II
Prerequisites:
CHEM 411

Credits:
3.00

Description:
Applications of thermodynamics to solutions, chemical equilibrium and electrochemistry; chemical kinetics will be covered. Quantum chemistry and the application of spectroscopy to molecular structure. 3 hours lecture. Normally offered Spring, days.

Term:
Offered Spring Term

- CHEM-L412 Physical Chemistry Lab II

   Prerequisites:
CHEM L411; CHEM 412 must be taken concurrently.

   Credits:
1.00

   Description:
Laboratory exercises using spectroscopic techniques (optical and electrochemical) to explore kinetic and thermodynamic and quantum mechanical properties of chemical systems. Emphasis will be placed on experimental design and data analysis skills in addition to technical writing skills as demonstrated through reports prepared in the professional style. 4-hour laboratory. Normally offered Spring, days.

   Term:
Offered Spring Term

- CHEM-428 Research & Seminar I

   Prerequisites:
CHEM 212; CHEM L212; Instructor's Consent required

Credits:
1.00- 4.00

Description:

Independent study under the direct supervision of the chemistry faculty. Students are required to attend departmental seminars, write a professional research report, and give an oral presentation on their project for review by the chemistry faculty. Depending on the project undertaken, students may obtain ECR credit. Prerequisites: CHEM 212 and CHEM L212 and by permission of the instructor. 1 terms - 1 to 4 credits. Normally offered every Fall.

Term:
Offered Fall Term

Type:
Expanded Classroom Requirement

- CHEM-429 Research & Seminar II

Prerequisites:

CHEM 212 and CHEM L212 and by permission of the instructor.

Credits:
1.00- 4.00

Description:

Independent study under the direct supervision of the chemistry faculty. Students are required to attend departmental seminars, write a professional research report, and give an oral presentation for review by the chemistry faculty. Depending on the project undertaken, students may obtain ECR credit. Prerequisites: CHEM 212 and CHEM L212 and permission of the instructor. 1 term - 1 to 4 credits. Normally offered every Spring.

Term:
Offered Spring Term

Type:
• CHEM-L432 Advanced Biochemistry Research Laboratory

Prerequisites:

CHEM-331; CHEM-L331

Credits:

3.00

Description:

Laboratory course where students apply the use of biochemical techniques acquired in Biochemical Techniques I (CHEM L331) to conduct novel research. Projects vary from year to year, but may include recombinant DNA techniques, purification and characterization of DNA and proteins, and bioinformatics. Emphasis on experimental design, data interpretation, analysis of the scientific literature, and writing. Includes field trip to local research university or biotechnology/pharmaceutical laboratory.

Term:

Alternates Fall & Spring

Type:

Expanded Classroom Requirement

• CHEM-453 Introduction to Toxicology

Prerequisites:

Prerequisites: CHEM 212 and BIO 111

Credits:

4.00

Description:

The study of toxic actions of chemicals on biological systems, with discussion of general principles, methodology, and selected topics. Topics may include pesticides, neurotoxicants, toxicity of metals, and carcinogenesis/ mutagenesis. Examples will be drawn from forensic toxicology, as well as
environmental and occupational toxicology. CHEM 332 and BIO 403 strongly recommended. Normally offered every other year.

Term:
Occasional

- **CHEM-510 Independent Study**
  
  **Prerequisites:**
  
  An independent study form must be submitted to the CAS Dean's Office.
  
  **Credits:**
  
  1.00- 4.00
  
  **Description:**
  
  Advanced study of a special topic in chemistry, by arrangement with the chemistry faculty.

- **CHIN-101 Elementary Chinese I**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Introduces Modern Standard Chinese (Mandarin) with an emphasis on developing conversational skills by using authentic materials such as video, audio, and various print media that teach fundamental grammatical patterns and vocabulary in functional contexts. Basic reading and writing (in Simplified Characters) are also taught.

  **Term:**
  
  Offered Fall Term

  **Type:**
  
  BA FOREIGN
• CHIN-102 Elementary Chinese II

Prerequisites:

CHIN 101 or Instructor's consent.

Credits:

4.00

Description:

Continues to develop proficiency in reading, writing, and speaking Modern Standard Chinese (Mandarin). Helps to develop listening comprehension skills with the use of authentic materials, such as print media, audio, and video materials. Advanced beginning level of reading and writing of Simplified Chinese characters is taught.

Term:

Offered Spring Term

Type:

BA FOREIGN

• CHIN-201 Intermediate Chinese I

Prerequisites:

CHIN 102 or Instructor's consent.

Credits:

4.00

Description:

Emphasis on improving Chinese skills in the areas of speaking, listening, reading, and writing. Expansion of vocabulary and further study of grammar. Discussion of assigned readings primarily in Chinese.

Term:

Offered Fall Term
• CHIN-202 Intermediate Chinese II

  Prerequisites:
  CHIN 201 or Instructor's consent.

  Credits:
  4.00

  Description:
  Continuation of skills developed in CHIN 201.

• CHIN-211 Survey of Chinese Literature and Culture I

  Credits:
  3.00

  Description:
  This is an introductory and interdisciplinary course on Chinese civilization and traditional Chinese literature. It will provide the student with a brief introduction to the cultural legacy and literature of China from the archaeological origins of Chinese civilization to the present time. The diverse origins of China's civilization are stressed as topics in political, social, and economic history are explored, with a focus on developments in language, literature, and art. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for themes treated in Modern China.
- CHIN-510 Independent Study
  Credits:
  4.00
  Description:
  Various topics can be covered based on student interest. Topics have included study and discussion of Taiwanese and Hong Kong film, and also an in-depth study of Chinese literature from the pre-modern to the modern period. Topics are to be arranged with faculty member.
  Term:
  Occasional
  Type:
  Asian Studies

- CI-101 Process and Epiphany
  Prerequisites:
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
  Credits:
  3.00
  Description:
  Despite its mystical connotations, creative epiphany is the result of a long engagement with the creative process that results in a surprising and unpredictable understanding of a concept or the solution to a problem. In the way that the discoveries of science are guided by the scientific method, the path to creative innovation is through a directed creative process. All creative innovators follow such a directed creative process, whether they are industrial designers or fine artists, performers or inventors, architects or entrepreneurs. This course explores both historical examples of individuals whose creative innovation changed the world, as well as hands-on collaborative, practical problem solving employing the creative process.
  Type:
  Creativity and Innovation
- CI-H101 Honors- Process and Epiphany

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

- CI-102 The End of Global Poverty

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. More than one-third of our global population lives in poverty, earning less than two dollars a day. Governments, businesses, social enterprises, and charitable organizations have tried to solve the global poverty issue with mixed results. What is the solution? Is entrepreneurship the solution, part of the solution, or has no impact whatsoever? In this course, you will gain an understanding of the
power of entrepreneurship (in the context of creativity and innovation), the definition and depth of global poverty (in the context of constraints, such as human, financial and physical resources embedded in local, regional, national and global cultures), and successes and failures of past initiatives to reduce poverty. This is not a course about politics or business, but rather finding a solution to a problem that has eluded mankind since the beginning of time.

Type:

Creativity and Innovation

• CI-H102 The End of Global Poverty

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. CAS and SBS honors students or GPA of 3.5 or above only.

Credits:

• CI-103 Making Inventions: Sticking Your Neck Out

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
This course examines cutting edge technologies, the science behind them, and their practical application and follow-up success or failure. It also provides the students a chance to consider the relevance of identified needed inventions from the 1950s, and whether those projections were correct. The history behind some remarkable inventions will be presented. Finally, working in small teams, students will brainstorm to identify something useful to invent and determine several approaches to implementing it.

Type:
Creativity and Innovation

- CI-104 Historic Mentors: Biographies of the Creative and Innovative

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
This course introduces students to creative and innovative practices as a disciplined approach to problem-solving. Students are presented with diverse individuals and environments, thoughts and actions, challenges and opportunities, approaches and alternatives, successes and failures, and ethical behavior—all within the context of historical biographies of inventors, entrepreneurs, artists, musicians, writers, politicians, leaders—nationally and globally. Mentoring is becoming a lost art form. However, it is crucial for passing down the best of our civilization. This course offers a vicarious mentoring that enables students to critically learn from and assess the experience of others in a vast array of contexts. Thus, students are presented with a cross-section of role models for creative, innovative and ethical success.

Type:
Creativity and Innovation
• CI-106 Failing Successfully

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. Did you know Netscape was the internet browser? What about MySpace, arguably the Facebook of the last decade? What led Apple from being innovative pioneers of the 70's to the verge of extinction in the 80's to the technological giant they are today? Technologies come and go, but what leads to organizations lasting more than 100 years such as IBM, General Electric, etc.? What role does failure play in successful innovation, decision-making, and business viability? In this course, you will learn about innovation that may have been successful and well-executed. You will also learn about innovation that was a viable business opportunity, but poorly executed: one phase of failure. In addition, you will learn about innovation that had no real market viability, but was launched anyway: another phase of failure. Can failure lead to success? If so, how?

Type:

Creativity and Innovation

• CI-107 Going Up: Skyscraper Design in Emerging Economies

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:
The human population is expected to be between 8.5 and 9 billion persons by the mid-21st century. The majority of those individuals will be living in urban communities. With large populations, high real estate costs, and limited land areas, the only way to construct in urban environments is to go up! In this course, students will have an opportunity to look at traditional and novel skyscraper designs, to consider the cultural and economic significance of such structures, and to use their imagination to develop a conceptual design of a skyscraper.

**Type:**
Creativity and Innovation

- **CI-108 Designing the Next Best Thing**

  **Prerequisites:**

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**

  3.00

  **Description:**

  Demystifies the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking.

  **Term:**

  Offered Both Fall and Spring

  **Type:**

  Creativity and Innovation

- **CI-109 Virtual Globe Trekking: an Alternate View of the World**

  **Prerequisites:**

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
This course will examine creativity and innovation through the lens of place. Modern geography is an all-encompassing discipline that seeks to understand the earth and all of its human and natural complexities - not merely where objects are, but how they have changed and come to be. The world is filled with ideas and perspectives. By changing your location, new perspectives emerge. This course will focus on the creative process to understand that each person creates in their own way. The students will test many methods to draw forth creative thought and seek to identify their own best method for calling on their own inner genius. Often this will involve failure and mixed results, yet this is where the students will learn their strengths and weaknesses.

**Type:**

Creativity and Innovation

- **CI-110 The Entrepreneur's Cocktail**

  **Prerequisites:**

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**

  3.00

  **Description:**

  How do you and your story drive business? This course takes an innovative look at human creativity and entrepreneurship. As an entrepreneur needs perseverance and high motivation, we will explore the importance of values, risk taking, problem solving, and the discovery of the market opportunities. In order for you to be creative and essentially create successful ventures, you will discover the nuances between the three factors and explore them further through interactive discussion and debate as well as collaborative group work. You will be encouraged to think in non-conforming ways and apply new concepts and develop your own personal operating principles.

  **Type:**

  Creativity and Innovation
• CI-111 The Future of Boston

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

This course introduces students to creative and innovative thinking based in the field of communication. Students will work in teams to wrestle with the challenges Boston will face in the future and propose feasible strategies to meet them.

Type:

Creativity and Innovation

• CI-112 Creating Problems: a New Solution for Sustainability

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

As the majority of the world population now lives in cities, for the first time in human history, issues of urban sustainability have become more complex and more important than ever before. Presented with case studies of urban efforts to gain a sustainability foothold, students will utilize ideation, critical thinking, and strategic decision making to both identify root problems and to present solutions. This course will lean heavily on ideation processes, teamwork, and logical methods of analysis to pursue actionable solutions for significant problems. The methods of problem identification and solution analysis learned in this class will be readily adaptable to many complex problems, helping the students to make informed and decisive determinations in their careers.

Type:
• CI-113 Revising Reality

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

Reality and perception have been debated and discussed for millennia. Humans see and experience their world in different ways. How do humans determine what is true and good and what advancements are necessary? In this course, students will creatively explore these big questions and revisit knowledge using new and sometimes divergent perspectives. Students will participate in dirty and courageous learning by crafting products, creating visual projects, and coming into original thought via trial and error. Students will also develop their analytical and critical thinking skills, while learning to communicate effectively and honestly.

Type:

Creativity and Innovation

• CI-114 Creating the Dream Team

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

Every successful venture today is based on effective teamwork. Unlike a typical lecture format, Creating the Dream Team is a course that utilizes experiential group learning to provide students with pivotal team-building skills. These essential skills are vital for everyone's future success in the
business world. As team players, students are challenged to think creatively. A collaborative problem-solving process is used to analyze real life business situations. Teamwork involves research, data collection and information analysis to develop creative solutions to typical business problems. Teams will utilize multi-media tools to present their innovative ideas. Classmates will provide peer feedback and review. Through iterations, all students will assume roles as project leaders, keynote speakers and collaborators on a series of Team Challenges. Upon successful completion of this course, all students will have formed working dream teams. As reinforcement and final evaluation, Dream Teams are required to create a multi-media Capstone Event as a course performance measure. This capstone presentation will showcase all of their newly acquired dream team-player skills.

Type:

Creativity and Innovation

- **CI-115 Poetry Out Loud**

  **Prerequisites:**

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**

  3.00

  **Description:**

  Students will develop a deep understanding of two seminal books of 20th century poetry and other key 20th century poems as they plan and execute small-group, end of semester reading performances. Students will write creative response poems to increase their understanding of the texts, and through cooperative decision making strategize effective ways to present their own poems and poems by Bishop or Frost. The class format will foster direct spoken engagement with matters of sound, rhythm, tone, and meaning. Final reading aloud performances will be recorded and added to the Suffolk University Poetry Center Archive.

  Type:

  Creativity and Innovation

- **CI-117 Writing for Stage and Screen**

  **Prerequisites:**

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
Credits:
3.00

Description:

This course will engage students in the process of script writing. Working in groups of four or five they will craft adaptations of stories, create original scenes, or review sketches. By the end of the semester they will produce a complete script. Each alternating week, one group will serve as the executive committee that will approve the final draft of the script of the week. There will be exams based on the textual study of collaborative and adaptation techniques.

Type:
Creativity and Innovation

- **CI-119 Theatre at Work**

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:

Theatre at Work is an introduction to creative practice using live performance as a problem solving tool in an educational environment. Specifically, students will create a performance piece in response to an issue they have uncovered in collaboration with select groups of students in a host Boston Public School. There will be a special focus on normalizing risk-taking and the learning that comes from false starts and failed ideas. Students will be responsible for creating every aspect of their performance testing its feasibility on a limited budget, ensuring that the content meets established criteria, and successfully implementing and evaluating their success both with their peers and their audience.

Type:
Creativity and Innovation, Local Engagement Experience

- **CI-H119 Theatre at Work**
Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. CAS and SBS honors students or GPA of 3.5 or above only.

Credits:

3.00

Type:

Creativity and Innovation, Local Engagement Experience, Honors

• CI-121 Catastrophe Management: From 9/11 to the Boston Marathon Bombings

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

This course will introduce students to the exciting world of emergency management from the perspective of scientists who are often utilized as experts during both small scale adverse events and large scale catastrophes. Students will actively and creatively explore the psychological, economic, and medical dimensions of these events and participate in role play in the classroom and site visits. By the end of the course, students will have a keen appreciation of emergency planning and management on the local and national levels.

Type:

Creativity and Innovation
• CI-123 Comics & Co.

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

Using visual narrative as the means of exploration, students will be led through a series of exercises that challenge their assumptions, broaden their perspectives, and excite their imagination. The relationship between critical, creative and inventive thinking will be the basis for individual and collaborative projects.

Type:

Creativity and Innovation

• CI-125 Boston's Creative History in Perspective

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

Our collective social consciousness is formed by physical space; through a mixture of exploration, discovery, and making, students will delve into the city that surrounds them, developing a sense of ownership and engagement in Boston's public space. During the course of the semester, students will uncover the ways that art and architecture have shaped the souls of cities around the world, using Boston as a template. In a series of local field trips, students will explore Boston through its art and architecture, focusing not only what is, but on what might have been -- designs that were ultimately unrealized. Through interview and visits with local artists and designers, students will also learn about the process of shaping public space, uncovering the myriad of ways that design decisions are political in nature. As a capstone to the course, students will create their own city plan --
identifying and researching a chosen social or physical challenge the city faces, then developing a proposal that would address their chosen issue. These design proposals will then be enacted using augmented reality. Like a layer of invisible ink, these projects will form a phantom city over the physical realities that surround us, displaying the dramatic potential of the imagination.

Type:
Creativity and Innovation

- **CI-127 Visual Perspectives: Coastline, Symmetries and Illusions**

  Prerequisites:
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  Credits:
  3.00

  Description:
  How do you measure the length of a coastline? How much symmetry is possible? What is an impossible object? How did the Mayans measure proportions? In this course, students will delve into these and other questions with a visual theme. While some will be clear-cut, others will be open-ended and require some choices, estimates or assumptions to be made. Throughout, the emphasis will be on creative problem solving.

  Type:
  Creativity and Innovation

- **CI-129 Elements of Attraction- Supply and Demand**

  Prerequisites:
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  Credits:
  3.00

  Description:
The intent of this course is for students to examine and effectively express in writing their ideas on creativity and to inspire undergraduate students to exceed their current levels of learning. Students will learn to meaningfully integrate course content into long term-retained useful skills through applied creative collaborations. This course is based on the idea that exposure and insight development will enable students to better visualize themselves in their desired fields and make informed choices within the variety of options available to them. The focus of the course will help students to assess their personal interests and strengths as they plan for their own educational and professional futures.

Type:
Creativity and Innovation

- **CI-131 Off to the Future: Leadership Through Compromise**

  Prerequisites:

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  Credits:

  3.00

  Description:

  Some past political issues were resolved with great success (the Compromise of 1820), and some resulted in great failures (the US Civil War). In this course, students will study noteworthy political dilemmas of the past, identify the major problem solvers and examine the art of compromise. These investigations will provide guidance and inspiration for students to develop innovative and creative solutions to present day political problems such as climate change, immigration, Social Security, income distribution, higher education affordability, and homelessness. Students will work in teams and propose creative and innovative solutions that will convince the affected interest groups favorably, represented by teams of other students in the class, and result in compromises solving tomorrow's problems today.

  Type:
Creativity and Innovation

- **CI-133 Franklin and the American Experiment**

  Prerequisites:

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
What made Benjamin Franklin such a creative force in American history? We will explore the many facets of Franklin's life (printer, writer, scientist, statesman) and learn about Benjamin Franklin's political and diplomatic ventures, and will recreate some of his scientific experiments.

Type:
Creativity and Innovation

• CI-H133 Franklin and the American Experiment

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. CAS and SBS honors students or GPA of 3.5 or above only.

Credits:
3.00

Description:
What made Benjamin Franklin such a creative force in American history? We will explore the many facets of Franklin's life (printer, writer, scientist, statesman) and learn about Benjamin Franklin's political and diplomatic ventures, and will recreate some of his scientific experiments.

Type:
Creativity and Innovation, Honors

• CI-135 The Design of Everything

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
Description:

This course will explore a selection of the genius personalities and their creative work in 5 distinct areas of human creative endeavor; art, science, nature, technology and the built environment. The course explores the underlying similarities in the process of their discovery, invention and creativity across the disciplines. Studying such names as Newton, Warhol, Hawking, Jobs, Gaudi and Banksy, students will uncover the process of design through research, analysis, synthesis, iteration and error. In class group projects will allow a hands-on opportunity to create.

Type:

Creativity and Innovation

- CI-137 Re-write for Rights: Drafting a New US Constitution

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:

3.00

Description:

The American Constitution is an important document, framing the basis for our lives and the lives of our neighbors. Yet it is also a very old document, which may be seen as lacking when it is compared to newer constitutions from around the world, even places that we may regard as undeveloped. In this class we will study many constitutions and also talk to many people to craft a new constitution that reflects contemporary American society and its values.

Type:

Creativity and Innovation

- CI-139 Creating, Promoting, and Participating in the Literary Arts

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:

With the launch of Boston's new Literary Cultural District, we have renewed cause to celebrate the history and industry of literature in our city. This course will immerse students in the world of literary culture and its many branches: writing, editing, reviewing, and publicity. Students will practice the art of creative writing, and learn how writers find publishing venues, how authors build platforms for their work, and how literature reaches the public through readings, social media, book trailers and other marketing campaigns, authors interviews, and reader reviews. Various industry professionals, authors, editors and publicists will speak to the class about the artistic and business opportunities, trends, and futures of literature and literary publishing. Students will apply their knowledge and interests to a variety of projects, including book reviews, author interviews, social media campaigns, literary events, and other collaborative projects. We will also work as a class to launch a new digital literary journal at Suffolk.

Type:
Creativity and Innovation

- CI-H139 Creating, Promoting, and Participating in the Literary Arts

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. CAS and SBS honors students or GPA of 3.5 or above only.

- **CI-141 Science = Creativity**

  **Prerequisites:**

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**

  3.00

  **Description:**

  This course is focusing on the creative process by introducing students to creative practice as a disciplined approach to problem solving and innovation requiring research, persistence and grit. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original ways, embrace ambiguity and support divergent thinking and risk taking. The course will have an undertone based on science, but it is suitable for non-science majors too!

  **Type:**

  Creativity and Innovation

- **CI-143 Secrets of the Self: Unblock Your Creative Nature**

  **Prerequisites:**

  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**

  3.00

  **Description:**

  What motivates your creative nature? This course will explore converging themes in Art and Psychology in order to give students the tools they need to unblock their creative potential. Collaborative small team activities, assigned readings, large group discussions, and personal reflection exercises
will provide an avenue for students to explore their own creative patterns and how they are influenced by, and perceived within, the world around them. Dreams, mental illness and psychosocial theories of self will also be widely discussed in order to give students context for this inter/intrapersonal exploration.

Type:
Creativity and Innovation

• CI-145 Living and Laughing

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:

This is a course about laughing and living. While it sounds fun, it can also be complex, confusing, complicated, and convoluted. Laughter and humor are also very personal. The things that make you laugh are rooted in family, culture, and personality. We are going to spend the semester getting to know ourselves and each other in an attempt to understand more about why we enjoy what we enjoy.

Type:
Creativity and Innovation

• CI-147 Seeing Double, Printmaking, the Art of Discovery, Experimentation and Process

Prerequisites:

Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
Always wanted to explore a creative side but never had the opportunity to take an art class? Here's your chance! Sync the power of icons/images with ideas and making. We will use cellphone and printmaking technologies in a workshop style environment. Rather than a lecture based class, this class we will play, learn and build new Neurological pathways towards creative thinking. Come to every class excited to learn, make and discover. This course will give you the building blocks for innovative thinking beyond the classroom. Power is in the image. As in the way a dream can grip you, images carry incredible amount of influence and creative potential, when they are seen. Glimpses of these images circulate in media, movies, cell phones, and so on. Learn to develop your own images and understand the broad world of images of human culture.

Type:
Creativity and Innovation

- **CI-204 Prague: Castles to Barbwire**

  Prerequisites:
  At least 24 credits earned.

  Credits:
  3.00

  Description:
  Prague offers students a more recent view into history and will serve as a backdrop to learning Design Thinking. The curriculum will use Czech and Central European cultural features as the inspiration for learning the creative process, skills that can be applied broadly and globally across disciplines. WWII and its fall to Communism left the Czech Republic undamaged. Artists played a vital part in the country’s rise to a Republic during the Velvet Revolution. These dissidents, including writers, actors, artists and musicians were innovators who were the catalyst for change. One could say that creative minds changed this country. This course is designed to demystify the creative process by introducing the creative practice as a disciplined approach to problem solving and innovation requiring research. This one-month study abroad experience will offer a more worldly insight to the significance of developing skills where divergent thinking and risk taking are one of many key tools in learning to generate new ideas. Travel fee covers accommodations, transfers, some meals and cultural visits. Airfare and tuition not included.

  Type:
  Creativity and Innovation, Diverse Perspectives, Global Engagement Experience, Expanded Classroom Requi

- **CJN-101 Introduction to Communication**

  4.00
  Description:
This course examines the important functions performed by human and mediated communication for health care consumers and providers. In particular, the course focuses on the use of communication strategies to inform and influence individual and community decisions regarding health.

Term:
Occasional

- **CJN-441 Risk and Crisis Communication**

  Prerequisites:
  
  CJN-2277(formerly CJN-277)

  Credits:
  
  4.00

  Description:
  Provides students with insight into effective risk and crisis management within organizations, including health organizations. Focuses on the application of theories, strategies, and tactics from a public relations perspective. Students understand how communication can prevent, cause, accelerate, and assist in recovery from a crisis.

  Term:
  Occasional

- **CJN-442 Boston Sports Media**

  Credits:
  
  4.00

  Description:
  The history of Boston sports includes a rich media tradition that has been chronicled in various Boston sports media outlets. This course takes both an historic and contemporary approach to understanding and analyzing Boston sports media and their relationship to Boston college and professional sports.

  Term:
• CJN-443 Advanced Reporting and Feature Writing

  Credits:
  4.00

  Description:
  Principles and techniques of advanced news, features, and investigative reporting are studied and applied, with a focus on enterprise reporting. Students develop, organize and write detailed news and news-feature stories based on original research.

  Term:
  Offered Fall Term

• CJN-444 Advanced Health Communication

  Prerequisites:
  CJN-340

  Credits:
  4.00

  Description:
  Explores theory and research in the development of persuasive health campaigns in many contexts including social marketing. Examines aspects of health campaigns including formative research, audience segmentation, key message tailoring, and communication tools.

  Term:
  Occasional

• CJN-455 Advanced Media Production

  Prerequisites:
CJN 355

Credits:
4.00

Description:
The course focus is on specialized production techniques including advanced lighting, sound recording, cinematography and editing techniques. Students work in teams to create a variety of fiction productions.

Term:
Offered Both Fall and Spring

- **CJN-457 Integrated Marketing Communication**

  Prerequisites:
  
  CJN-2277(formerly CJN-277)

  Credits:
  4.00

  Description:
  Examines the integration of advertising, promotion, public relations and marketing communication in the strategic communication process. By learning the fundamentals of interpersonal and persuasive communication, students have an opportunity to develop an effective communication plan for a brand that includes creative copy.

  Term:
  Offered Both Fall and Spring

  Type:
  Arts Admin Minor Elective

- **CJN-458 Advanced Sports Public Relations**
Prerequisites:
CJN-258

Credits:
4.00

Description:
Focuses on the theory and practice of effective sports public relations management including the development of sport, team, and league public relations campaigns. Also focuses on sports public relations in the context of stakeholder relations in sports.

Term:
Occasional

• CJN-465 Film and Society

Credits:
4.00

Description:
A study of how cinema reflects, and reflects on, the values of the society in which it is produced. The course features films and filmmakers who emphasize political and social issues dealing with race, gender, sexuality, and other important concerns.

Term:
Occasional

• CJN-466 Seminar in Media/Film

Prerequisites:
Senior standing required.

Credits:
4.00
Description:
Functions as a capstone media/film course and merges theoretical and practical knowledge from previous classes. Students revisit concepts and apply them to advanced courses and/or create their own advanced work.

Term:
Offered Spring Term

• CJN-470 Rhetoric and Global Context

  Prerequisites:
  CJN-216

  Credits:
  4.00

  Description:
  Rhetoric is the strategic use of symbols to create meaning. Films, television, music, and new media communicate these meanings. Explores how rhetorical messages shape our personal and cultural identities. Topics include gender, social networking, food, politics, religion, and fashion.

  Term:
  Offered Fall Term

• CJN-477 Public Relations IV: Campaigns

  Prerequisites:
  CJN-277 and CJN-377 and Senior Standing. This course is now being offered as CJN-4477

  Credits:
  4.00

  Description:
Examines case studies and typical public relations problems experienced by profit and not-for-profit organizations. The course provides students with an opportunity to demonstrate their mastery of the skills, techniques, and knowledge of public relations by creating a comprehensive campaign for an actual client. Fulfills ECR requirement.

Term:

Offered Both Fall and Spring

Type:

Expanded Classroom Requirement

- **CJN-H477 Public Relations IV Honors: Campaigns**

  Prerequisites:

  CJN 277 and CJN 377; Over 84 credits and by invitation only;

  Credits:

  4.00

  Description:

  HONORS SECTION. INVITATION ONLY! Examines case studies and typical public relations problems experienced by profit and not-for-profit organizations. The course provides students with an opportunity to demonstrate their mastery of the skills, techniques, and knowledge of public relations by creating a comprehensive campaign for an actual client. Fulfills ECR requirement.

  Type:

  Expanded Classroom Requirement, Honors

- **CJN-479 Environmental Public Relations**

  Credits:

  4.00

  Description:
Examines public issues involving the environment. Focuses on public relations strategies for government agencies, corporations, and other organizations concerned with the environment.

Term:
Occasional

- **CJN-480 Documentary Film Production**

  Credits:
  4.00

  Description:
  Students analyze contemporary documentaries and study documentary history and theory. Working in teams, students produce, write, direct, crew, and edit documentary shorts.

  Term:
  Occasional

- **CJN-481 Making the Short Film**

  Credits:
  4.00

  Description:
  This advanced class works together as a crew to create a short narrative film shot in HD video. Students learn the process of making professional-quality work, and each student is responsible for various crew positions during pre-production and the shooting of the film.

  Term:
  Occasional

- **CJN-482 Cultural Theory and Practice**
Prerequisites:

CJN-216

Credits:

4.00

Description:

In a world of globalization and multiculturalism, communication is critical to understanding. Explores theoretical approaches to communication and applies them to specific contexts. Emerging trends in global, ethical, legal, political and social communication issues are explored.

Term:

Offered Spring Term

- **CJN-483 Suffolk TV News**

  Prerequisites:

  CJN-253 and CJN-2355(formerly CJN-355) and CJN-353 or CJN-361 or instructor's consent

  Credits:

  4.00

  Description:

  Students write, direct, crew, edit, and serve as talent in producing the CJN Department's weekly news program aired on Boston Cable Access. Cannot be taken concurrently with CJN 361 or CJN 353.

  Term:

  Offered Spring Term

- **CJN-L483 Suffolk TV News Lab**

  Prerequisites:

  CJN-253 and CJN-2355(formerly CJN-355) and CJN-353 or CJN-361 or instructor's consent
Credits:

4.00

Description:

Students write, direct, crew, edit, and serve as talent in producing the CJN Department's weekly news program aired on Boston Cable Access. Cannot be taken concurrently with CJN 361 or CJN 353.

Term:

Offered Spring Term

- **CJN-485 Rhetoric of Protest & Reform**
  
  Credits:
  
  4.00
  
  Description:
  
  Examines the persuasive strategies of social reform movements with an emphasis on the civil rights', women's rights, and gay rights movements in the United States.
  
  Term:
  
  Alternates Fall & Spring
  
  Type:
  
  Cultural Diversity Opt A, Humanities & History, BSBA SOCIAL CHANGE, Diverse Perspectives

- **CJN-488 Grant Writing**
  
  Credits:
  
  4.00
  
  Description:
Hands-on course that explores the process of writing and submitting grants to foundations, associations, the government, and other grantors on behalf of nonprofit organizations. Students learn how to identify grant resources through research, compile an effective submission, and write supporting material such as cover letters and appendices. Also covers how grants are reviewed and tips for successful grant submissions.

Term:
Occasional

- **CJN-489 Political Communication**

  Credits:
  4.00

  Description:
  Examination of special circumstances created by politics and their impact on attempts at persuasion. Case studies of famous politicians' political campaigns are combined with discussions of current trends in media and politics.

  Term:
  Occasional

- **CJN-490 Temple Street Project**

  Prerequisites:
  CJN-253 and CJN-2355(formerly CJN-355)

  Credits:
  4.00

  Description:
  Students write, direct, crew, edit, and serve as talent in producing the CJN Department's magazine-format television program aired on Boston Cable Access.

  Term:
  Offered Fall Term
• CJN-491 Special Topics in Communications and Journalism
  Credits:
  4.00
  Description:
  Explores current issues in the field of communication.
  Term:
  Offered Both Fall and Spring

• CJN-492 Special Topics in Public Relations
  Credits:
  4.00
  Description:
  Explores current issues in public relations.
  Term:
  Occasional

• CJN-493 Special Topics in Film
  Credits:
  4.00
  Description:
  Explores film theory, history, criticism, and genre.
  Term:
• CJN-494 Special Topics in Advertising
  Credits:
  4.00
  Description:
  Current issues in the field of advertising. Normally offered every semester.
  Term:
  Occasional

• CJN-503 Experiential Learning in Communication
  Prerequisites:
  16 Hrs of CJN coursework or CJN advisor consent
  Credits:
  1.00-12.00
  Description:
  Internships and practicum in Communication and Journalism are available prior to the start of each semester.
  Term:
  Offered Both Fall and Spring
  Type:
  Expanded Classroom Requirement

• CJN-505 Communication and Journalism Practicum
Prerequisites:

12 hours of CJN coursework and CJN advisor consent

Credits:

1.00-12.00

Description:

Practicum and internship projects are available prior to the start of each semester. Prerequisites: Journalism majors with a minimum of 12 credits of coursework or permission of the Department Chairperson. 1-3 terms : 1-12 credits.

Term:

Offered Both Fall and Spring

Type:

Expanded Classroom Requirement

• CJN-506 Honors Seminar

Prerequisites:

Senior CJN majors with an overall cumulative grade point average of 3.0, and a major GPA of 3.4

Credits:

4.00

Description:

Senior CJN majors meeting requirements for Departmental Honors are invited to participate in this seminar, which entails research and presentation of an approved topic.

Term:

Offered Spring Term

• CJN-510 Independent Study
Prerequisites:
An independent study form must be submitted to the CAS Dean's Office.

Credits:
1.00-12.00

Description:
An independent study experience in Communication and Journalism is available prior to the start of each semester.

Term:
Offered Both Fall and Spring

- **CJN-2277 Public Relations I: Principles**

  Credits:
  4.00

  Description:
  Effective public relations involve an understanding of the history, theory, and practice of public relations including public relations concepts, the role of the practitioner, and the foundations of public relations. This course seeks to provide that foundation as an introduction to the field of public relations. Issues surrounding the history, legality, process, and principles of public relations are explored.

  Term:
  Offered Both Fall and Spring

- **CJN-2355 Production I**

  Prerequisites:
  CJN-152

  Credits:
  4.00
Building on skills acquired in CJN 2355, students use advanced equipment and production techniques to produce complex video projects, including fiction filmmaking. Projects cover various styles and genres, such as music video and film noir.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement

- CJN-3376 Public Relations II: Research

  Prerequisites:
  CJN-2277 (Formerly CJN-277)

  Credits:
  4.00

  Description:
  Examines how research aids the public relations practice. Students learn research methods that address public relations planning and problem-solving. Assignments provide students with hands-on practice using research for a PR project.

  Term:
  Offered Both Fall and Spring

- CJN-3377 Public Relations III: Strategic Writing

  Prerequisites:
  CJN-2277(formerly CJN-277);

  Credits:
  4.00
Focuses on writing principles for public relations including the formulation of clear PR objectives, determining the knowledge of the target audience, and the development of key messages. Students apply these principles to common PR formats, including news releases, pitch letters, biographies, speeches, emails, digital content, and social media posts.

Term:
Offered Both Fall and Spring

- **CJN-3455 Production II**

  Prerequisites:

  CJN-2355(formerly CJN-355)

  Credits:

  4.00

  Description:

  Building on skills acquired in CJN 252, students will use advanced equipment and production techniques to produce complex video projects in a variety of styles and genres, such as music video and film noir.

  Term:

  Offered Both Fall and Spring

- **CJN-4455 Production III**

  Prerequisites:

  CJN-3455(formerly CJN-455)

  Credits:

  4.00

  Description:
Builds on the theories and techniques developed in CJN 3455, focusing on the advanced concepts and skills needed to design and produce professional-level media content for digital distribution. Provides the opportunity to produce high-quality material for student media portfolios in various genres.

Term:
Offered Spring Term

- **CJN-4477 Public Relations IV: Campaigns**

  Prerequisites:
  
  CJN-2277 (formerly CJN-277) and CJN-3377 (formerly CJN-377) and Senior Standing.

  Credits:
  
  4.00

  Description:
  
  Examines typical public relations problems experienced by profit and not-for-profit organizations. Provides students with an opportunity to demonstrate their mastery of the skills, techniques, and knowledge of public relations by creating a comprehensive campaign plan for a community client.

  Term:
  
  Offered Both Fall and Spring

- **CJN-H4477 Public Relations IV Honors: Campaigns**

  Prerequisites:
  
  CJN-2277 (formerly CJN-277) and CJN-377 (formerly CJN-377) and CJN-3376 and by invitation only.

  Credits:
  
  4.00

  Description:
  
  Examines typical public relations problems experienced by profit and not-for-profit organizations. Provides honors students with an opportunity to demonstrate their mastery of the skills, techniques, and knowledge of public relations by creating a comprehensive campaign plan for a community client.
• CMPSC-H107 Ants, Rumors and Gridlocks

Prerequisites:

Math placement level of 2 or above or any MATH course at the level 100 or above and GPA of at least 3.3 or Honors student

Credits:

4.00

Description:

Do viruses and rumors spread like forest fires? How do ants cooperate? Do spoken languages and biological species evolve in a similar way? Ants, Rumors, and Gridlocks exposes students to introductory aspects of computational science by addressing and answering these and many other questions. Students use and modify virtual experiments preprogrammed in the NetLogo programming language to investigate these topics and others in Social Sciences, Biology, and Environmental Science. No prior knowledge of computer programming or NetLogo is required.

Type:

SCI TECH ENGNR, Quantitative Reasoning, Honors

• CMPSC-200 Introduction to Computer Science World

Prerequisites:

Freshman or Sophomore Standing

Credits:

1.00
Computer Science is a dynamic discipline and students are not typically exposed to its many facets during their first years in college while important foundation work is done. This module aims to change that by presenting several areas of recent interest. In this way, students can form an idea of the scope of the vast and rapidly growing subject and career options, and begin to map out steps toward a potential career path. In this team-taught seminar-style course, two or three different professors will introduce students to their research areas and related topics. Some of the areas represented among the faculty include data science, machine learning, social networks, and parallel computing and others. The course is intended to be taken freshman or sophomore year.

• CMPSC-310 Introduction to Data Science

Prerequisites:

CMPSC-F132 and 1 of the following: STATS-240, STATS-250, MATH-134, MATH-165, or MATH-255.

Credits:

4.00

Description:

The field of data science is emerging at the intersection of the fields of social science and statistics, information and computer science and design. Data science involves using automated methods to analyze massive amounts of data and to extract knowledge from them. This course serves as a project-based introduction to data science in Python language, covering data organization and retrieval, statistical data processing and data visualization.

• CMPSC-400 Senior Project in Computer Science

Prerequisites:

Instructor permission required;

Credits:

4.00

Description:

Students specify, design and implement a software system.
• CMPSC-401 Erlang Programming With Applications

Prerequisites:

CMPSC-F132 & Permission of the Instructor

Credits:

1.00

Description:

Erlang is a general-purpose, concurrent, functional programming language. It is designed to support distributed, fault-tolerant, soft-real-time, non-stop applications in the areas of telecommunications, online video games, social networking, high-performance Web development and databases. This course covers the language foundations, as well as intermediate topics such as distributed communications, client-server systems, and working with ETS tables and Mnesia database. Special attention will be paid to recursive and asynchronous programming, which are the two core principles of the language.

• CMPSC-501 Software Development Internship

Prerequisites:

CMPSC-F131, CMPSC-F132, and 1 CMPSC course at 200, 300 or 400 level. Prior to registration, student must submit credit approval form and gain faculty approval.

Credits:

2.00-4.00

Description:

Student works in a qualified software development setting to gain practical experience in modern industrial software development. Student will apply lessons learned in the classroom within a supervised, professional development while developing a greater understanding of the job expectations and organizational culture. Internship may be taken for 2-4 academic credit hours, at 4 hours of company work per week per each credit. Additional academic reports with be required. Students may take more than one internship, but the total number of credits applied toward graduation cannot exceed 12.

Type:

Expanded Classroom Requirement
• CMPSC-510 Computer Science Independent Study

Credits:
1.00- 4.00

Description:
Guided study on a topic at an advanced level.

Type:
Quantitative Reasoning

• CMPSC-511 Launching a Career in Computer Science

Prerequisites:
Junior or Senior standing

Credits:
1.00

Description:
This team-taught course is designed to explore career opportunities in Computer Science in depth. This course focuses on career search, the application process, entry, transition and networking for career success. Alternative options such as graduate school will also be explored. Students articulate and reflect on academic work, and co-curricular experiences from the perspective of professionals entering or advancing their careers. The goal of this course is to help students reach their fullest professional potential following graduation.

• CMPSC-F107 Ants, Rumors and Gridlocks

Prerequisites:
Math placement level of 2 or above or any MATH course at the level 100 or above

Credits:
4.00
Do viruses and rumors spread like forest fires? How do ants cooperate? Do spoken languages and biological species evolve in a similar way? Ants, Rumors, and Gridlocks exposes students to introductory aspects of computational science by addressing and answering these and many other questions. Students use and modify virtual experiments preprogrammed in the NetLogo programming language to investigate these topics and others in Social Sciences, Biology, and Environmental Science. No prior knowledge of computer programming or NetLogo is required.

Type:

SCI TECH ENGNR,Quantitative Reasoning

- **CMPSC-F118 Computing With Words**

  Credits:

  4.00

  Description:

  This course introduces students to aspects of Natural Language Processing involving computer-based analysis and comparison of texts written in natural languages (English and others). In addition to introductory computer programming in Python, the course also covers some basic statistics concepts. Intended for students at all levels.

  Type:

  Quantitative Reasoning

- **CMPSC-F120 Programming for the World Wide Web**

  Credits:

  4.00

  Description:

  This is a hands-on course aimed at non-CS students who want to learn how to build interesting and interactive web pages. We do not use any drag-and-drop software for this purpose. Instead we cover the basics of HTML and PHP and, if time permits, we look at some ways of building web pages that interact with databases. Each student will have, for the duration of the course, an account on a server that permits individuals to have web pages that are visible on the World Wide Web.
• CMPSC-F124 Game Programming

Credits:
4.00

Description:
This course introduces students to computer game development, including, but not limited to, game programming. We use Game Maker, a framework for personal computers that runs equally well on XP, Vista, and Linux. We learn about the foundational concepts of two-dimensional (flat) games: graphics, sound, objects, actions, rooms, scores, levels, multiplayer support, artificial intelligence, and more. Game Maker has an intuitive interface that makes game development approachable for everyone, including those who have never written a single game or a single computer program. All games created by Game Maker can be saved as standalone applications and can be shared freely with classmates, friends, and family. This is not a course in graphics design, audio editing, or scriptwriting. Students are encouraged to use their creativity and imagination to design games and the correctness of game implementation is stressed throughout the course.

Type:
Quantitative Reasoning

• CMPSC-F131 Computer Science I

Credits:
4.00

Description:
This is a rigorous introduction to computer science in Java with an emphasis on problem solving, structured programming, object-oriented programming, and graphical user interfaces. Topics include expressions, input/output, control structures, intrinsic data types, classes and methods, iteration, top-down programming, arrays, graphical user interfaces, and elements of UML. Normally offered each semester.

Type:
Quantitative Reasoning
• CMPSC-F132 Computer Science II

Prerequisites:
CMPSC F131

Credits:
4.00

Description:

Computer Science II (CSII) is the continuation of Computer Science I. The purpose of CSII is to expand students' understanding of Computer Science and computer programming, assuming that they have the basic knowledge of the Java language. The course introduce another programming language - C - and also focuses on the pure Object-Oriented features of Java, such as inheritance, polymorphism, and exceptions, as well as on simple data structures (lists, stacks, and queues) and algorithms (searching and sorting). By the end of the semester students will be able to develop sizable (several pages long) computer programs in the C and Java languages. Efficient C and Java program development requires an Integrated Development Environment (IDE) - a collection of tools that make it possible to edit, compile, and debug C and Java programs. Our IDE of choice is Eclipse. Eclipse is free and available for many operating systems, including Microsoft Windows (all flavors), Linux, Unix, and Mac OS X.

Type:
Quantitative Reasoning

• CMPSC-F265 Data Structures & Algorithms

Prerequisites:
CMPSC F132

Credits:
4.00

Description:

Includes topics such as strings, stacks, queues, lists, trees, graphs, sorting, searching, hashing, dynamic storage allocation, and analysis of algorithms. Most programming will be done in the C language. Normally offered each semester.

Type:
Quantitative Reasoning
• CMPSC-F331 Object Oriented Programming

Prerequisites:

CMPSC-F265

Credits:

4.00

Description:

Object-Oriented Programming in C++ is taught using Trolltech's multi-platform Qt library and other open-source libraries and tools. Emphasis is placed on program design and code re-use. Topics include: encapsulation, inheritance and polymorphism, UML, refactoring, parent-child relationships, properties, event-driven programming, test cases, regular expressions, constraints, XML, design patterns, and graphical user interfaces. We deal with some operating system and programming environment issues and also with code packaging. C++ is a very large language, so we do not attempt to cover it all. Instead we work with a carefully selected subset of language elements that permits students to exploit the powerful Qt libraries and write robust, idiomatic, and interesting code. By the end of the course, the student should have a good command of C++, facility using and building libraries, an understanding and appreciation of the design patterns that we covered, and a well-established discipline of refactoring and code reuse. Prerequisite: CMPSC F265 (which may be taken concurrently). Normally offered each semester.

Type:

Quantitative Reasoning

• CMPSC-F333 Organization of Programming Languages

Prerequisites:

CMPSC F253, F265

Credits:

4.00

Description:

An introduction to functional programming and to the meaning and implementation of various programming language features. The course begins with a brief introduction to the Scheme language, which is then used to write interpreters for small languages that contain features typical of larger, more realistic languages. Normally offered each spring semester.
• **CMPSC-F345 Software Engineering**

  **Credits:**
  
  4.00

  **Description:**
  
  This course introduces the fundamental principles of software engineering. Requirement specification and life cycles are emphasized. Topics include requirements analysis and specification, analysis and design, architecture, implementation, testing and quality, configuration management. Professional ethics considerations will be explored and emphasized throughout the course. Prerequisite: CMPSC F265. 1 term - 4 credits. Normally offered each year.

  **Type:**
  
  Quantitative Reasoning

• **CMPSC-F353 Architecture of Computer Systems**

  **Prerequisites:**
  
  CMPSC F265.

  **Credits:**
  
  4.00

  **Description:**
  
  This course deals with the structure and operation of the major hardware components of a computer. Topics include basic logic design, basic datapath construction, basic pipelining, I/O system design, issues in memory hierarchy and network interface design. Normally offered each fall semester.

  **Type:**
  
  Quantitative Reasoning
CMPSC-F355 Operating Systems

Prerequisites:

CMPSC F353 & CMPSC F265 and Working knowledge of C++.

Credits:

4.00

Description:

This course presents an overview of modern operating systems, from the points of view of an application developer and of a system developer. It covers process management, scheduling, concurrency management, multi-threading, memory management, and file system organization. Intensive programming assignments in the C language and in an assembly language help students to learn the POSIX application programming interface (API) and the low-level organization of a general-purpose operating system. Normally offered each spring.

Type:

Quantitative Reasoning

CMPSC-F363 Intro to Database Systems

Prerequisites:

CMPSC 265 and MATH 285

Credits:

4.00

Description:

This is an introduction to the design and use of database systems --- systems that manage very large amounts of data. Topics covered include Entity-Relationship (E/R) data model, Relational data model, object-oriented model, and the conversion of E/R and relational models. We shall also learn some database languages, both concrete and abstract, including Structured Query Language (SQL), Object Query Language (OQL), relational algebra, etc. We will introduce the semistructured data, such as the popular Extensible Markup Language (XML), and their usage in database systems as well. The course is intended for computer science students who need to have an in-depth understanding of modern database systems. Normally offered each fall semester.

Type:
• CMPSC-F375 Introduction to Computer Networks

Prerequisites:

CMPSC F331 and CMPSC F353

Credits:

4.00

Description:

This course explores the fundamentals of computer networks, protocols and layering, applications and their implications to everyday networking life. Normally offered in spring.

• CMPSC-R120 Programming for WWW Recitation

Credits:

0.00

Description:

Taken simultaneously with CMPSC 120. Students work with lab instructors to do work that enhances the course understanding. Such work can include practice problems, supervised programming time, as well as question-answer time and group project work. The hybrid version of the recitation: Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. On alternate weeks students do individual programming and reading.

• CMPSC-R131 Recitation from Computer Science I

Prerequisites:

Must be taken concurrently with CMPSC F131

Credits:

0.00
Taken simultaneously with CMPSC 131. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems and programming, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do online work such as lecture demonstration of additional examples or homework projects.

- **CMPSC-R132 Recitation for Computer Science II**
  
  **Prerequisites:**
  
  Must be taken concurrently with CMPSC 132
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  Taken simultaneously with CMPSC 132. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems and programming, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do online work such as lecture demonstration of additional examples or homework projects.

- **EC-101 Applied Microeconomics**
  
  **Prerequisites:**
  
  Non CAS majors need to have completed at least 15 credits.
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This course introduces students to foundational principles of microeconomic theory, with an emphasis on applications of concepts to management decision-making in specific industry and market settings. It describes and analyzes the interaction of supply and demand and the behavior of the prices of goods, services. It explains the determinations of costs, output, strategic pricing, and governance by firms under conditions of perfect and
imperfect competition in a global economy. In addition, it describes the supply demand for factors of production and the impact of taxes and government regulation and intervention on firms and consumers.

EC-H101 Honors Principles of Microeconomics

Prerequisites:
Honors Section Only: GPA of 3.3 or higher required.

Credits:
3.00

Description:
Introduction to the organization and operation of a market economy with a focus on how it allocates scarce resources; the analysis of consumer demand and profit maximizing behavior of business; examination of pricing and output decisions under conditions of competition, monopoly and imperfect competition. Analysis of markets for labor and capital. Policy issues include price ceilings and floors, competition and monopoly. Normally offered every semester.

EC-102 Global Macroeconomics

Prerequisites:
Non-CAS majors need to have completed at least 15 credits

Credits:
3.00

Description:
This course examines the workings of the national and the global economy. It will describe the determination of Gross Domestic Product, the problems of unemployment, inflation, and the determination of economic growth. It will also describe and analyze the determination of the country's exchange rate, the balance of payments, and international borrowing and lending. A particular focus will be on understanding economic fluctuations (booms, busts, and recessions) in the domestic economy and its effects on other economies. It will analyze the role of the government and the effects of government spending and taxation on the economy. Furthermore, it will describe and analyze the determination of the quantity of money and interest rates in the economy and the role of the country's central bank. It examines the basis and pattern of international trade and the effects of a country's trade policy on the economy.

Type:

Social Science, BSJ SOCIAL SCIENCE

- **EC-H102 Honors Global Macroeconomics**

  Credits:

  3.00

  Description:

  The measurement of economic growth; introduction to the theory of determination of national income and the price level; unemployment and inflation; theories on economic growth and the role of labor and capital in economic growth; functioning and impact of the monetary system; analysis of monetary and fiscal policies for economic stabilization; international transactions and their influence on the domestic economy. Prerequisites: GPA of 3.2 or higher. Normally offered every year.

  Type:

  Social Science, BSJ SOCIAL SCIENCE, Honors

- **EC-131 Environmental Economics**

  Credits:

  4.00

  Description:

  Identifies the environmental effects of economic activity, including polluted water and air, noise, and radiation, and values their costs and benefits. Analyzes mechanisms, including taxes and permits, for achieving a socially preferable level of pollution. Traces role played by institutions, including common ownership, in affecting environmental decay. Resource depletion (of oil, forests, and fisheries) and appropriate policy responses.
• **EC-141 Development Economics**

  Credits:
  4.00

  Description:

  Why do so many countries remain so poor? Why have some (e.g. the Asian tigers) grown so rapidly? Why have most of the countries of Eastern Europe and the Former Soviet Union been slow to ignite economic growth? These questions are addressed by looking at domestic factors (government policies, resource endowments) as well as the international environment (mobile investors, international financial institutions). Asks what economic choices these countries face now. Normally offered yearly. Cultural Diversity B

  Type:

  Cultural Diversity Opt B, Social Science, Asian Studies, BSJ SOCIAL SCIENCE, Diverse Perspectives

• **EC-151 Economic & Human Geography**

  Credits:
  4.00

  Description:

  The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

  Type:

  Cultural Diversity Opt B, Social Science, BSJ SOCIAL SCIENCE, Asian Studies, Diverse Perspectives
• EC-300 Professional Development in Economics

Prerequisites:

EC-101 and EC-102 and at least 54 credits

Credits:

1.00

Description:

This one-credit course is designed to explore career opportunities in economics in depth. Classroom discussions, writing assignments, and site visits will help prepare students to identify and secure internship and post-graduate employment opportunities. Additional career paths, such as pursuing graduate studies in economics or related fields, and the application process, will also be addressed. The goal of this course is to help students reach their fullest professional potential following graduation. Ordinarily taken during junior year. Offered during the fall semester.

• EC-311 Intermediate Micro Theory

Prerequisites:

EC 101 and EC 102

Credits:

4.00

Description:

Theory of consumer behavior and demand. Theory of production and costs of production. Theory of the firm, and price and output decisions in different market structures, i.e., under perfect competition, monopoly, monopolistic competition and oligopoly. Decisions relating to pricing and employment of various inputs (labor and capital) under perfectly competitive, and less than perfectly competitive, resource markets. Required of all majors in Economics. Normally offered every semester.

Type:

Social Science, BSJ SOCIAL SCIENCE

• EC-312 Intermediate Macro Theory
Prerequisites:
EC-101 and EC-102

Credits:
4.00

Description:
This course covers the neoclassical and Keynesian models of aggregate economic activity. Coverage of the measurement of economic variables, such as aggregate income, the inflation rate, and the unemployment rate. Examines the behavior of the economy under conditions of price flexibility in the long run and price rigidity in the short run under rational and adaptive expectations. Analysis of the effect of changes in taxes and government expenditures, monetary policy and deficits on the economy. Coverage of the sources of economic growth. Required of all majors in Economics. Normally offered every semester.

Type:
Social Science, BSJ SOCIAL SCIENCE

• EC-402 Mathematical Economics

Prerequisites:
EC-101 and MATH-134 or MATH-165

Credits:
4.00

Description:
This course introduces the mathematical basis of economic theory. Emphasis is placed on the mathematical tools that have been developed for various applications, with a focus on applied microeconomic analysis. The techniques of comparative-statics analysis are developed. Univariate and multivariate calculus are then presented in the context of unconstrained and constrained optimization. The course concludes by introducing the foundations of discrete-time and continuous-time dynamic optimization.

Type:
Social Science, BSJ SOCIAL SCIENCE
• EC-420 Special Topics in Economics

  Credits:
  4.00

  Description:
  Special Topics course. Topic varies semester to semester.

  Type:
  Social Science

• EC-421 Public Economics: Tax and Budget

  Prerequisites:
  EC 101 and EC 102

  Credits:
  4.00

  Description:
  The theory of tax policy and tax structure. The effects on economic behavior (including labor supply, saving, risk-taking and investment, charitable giving, and growth) of different taxes (income, sales, value-added, inheritance, wealth, property). Tax equity, efficiency and incidence, in the United States and in comparative perspective. Additional topics include modeling state taxes; social security and pensions; and tax compensation. Normally offered yearly.

  Type:
  Social Science, BSJ SOCIAL SCIENCE

• EC-423 Economics of Regulation

  Prerequisites:
  EC 101 and EC 102
This course examines regulation and analyzes the structure, conduct, and performance of American industry. Monopoly and strategic behavior in oligopoly and monopolistic competition are considered. U.S. antitrust law and the effect of regulatory laws on industrial performance are explored. Regulatory practices, rate setting, deregulation, public-enterprise pricing, and issues in privatization are examined, with an emphasis on case studies and policy analysis. Normally offered every other year.

Type:

Social Science, BSJ SOCIAL SCIENCE

• **EC-430 International Trade Theory & Policy**

  Prerequisites:

  EC 101 and EC 102

  Credits:

  4.00

  Description:

  This course examines theories of international trade. The policy implications of each theory are explored and the effect of trade on the welfare of the nation is examined. Also the development of trade blocs and the political economy of trade are studied. Normally offered every year.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

• **EC-431 History of Economic Thought**

  Prerequisites:

  EC-101 and EC-102

  Credits:
Presents the leading contemporary schools of economic thought as the outcome of theoretical and philosophical controversies that began with the ancient Greeks and that continue today. The course covers the major contributors to economic thought, including Aristotle, Aquinas, the mercantilists, and the contributors to the 18th-century enlightenment, notably Adam Smith and David Hume. Going forward, it considers Marx, the neoclassical school of Jevons, Menger and Walras and the Keynesian school, along with some of the more modern schools such as behaviorism, institutionalism and cognitive economics. The contributions of the economists and philosophers studied in the course are considered in context of the times in which they wrote and lived. Students will acquire a grasp of the principal tenets of contemporary economic theory as well as an understanding of the historical origins of the disputes that still divide economists on major theoretical and philosophic issues.

Type:

BSJ SOCIAL SCIENCE

- **EC-432 Managerial Economics**

  Prerequisites:

  EC-101 and EC-102

  Credits:

  4.00

  Description:

  This is an applied course in microeconomics. The focus is on the application of economic theory and methods to examine how an organization can achieve its objectives most efficiently. Various economic tools that are frequently used in solving managerial problems will be presented. Topics include optimization techniques applied to demand and production functions, linear programming, risk analysis and portfolio theory. Normally offered every year.

  Type:

  Quantitative Reasoning

- **EC-433 Public Choice**

  Prerequisites:
EC-101 and EC-102

Credits:
4.00

Description:

This course considers the degree to which it is possible to explain, predict, and guide political decision through the application of economic analysis. The course is organized around two competing visions of public choice: (1) a traditional organic approach that sees the core problem for public choice as requiring the maximization of social welfare and (2) a newer contractual approach that sees that problem as requiring attention to the institutional framework within which political decisions are made. Topics to be considered include the Arrow paradox and other problems in aggregating individual choices, rent-seeking, the Leviathan hypothesis, and non-market demand-revealing methods.

Type:

Social Science, BSJ SOCIAL SCIENCE

- EC-435 Economics of Energy and Natural Resources

Prerequisites:
Take EC-101;

Credits:
4.00

Description:

This course applies economic analysis to identify the origins, consequences, and policy implications of problems related to renewable and non-renewable natural resources, with particular attention to energy. Resources considered include forests, fisheries, water, minerals, and land. Energy resources covered include oil, gas, coal, nuclear, and alternatives (wind, solar, biomass, hydrogen, etc.), as well as electricity. Concepts examined include externalities, learning-by-doing, peak-load pricing, regulation, sustainability, cost-benefit analysis, and the commons problem.

Type:

BSJ SOCIAL SCIENCE, Social Science

- EC-440 International Financial Economics
Prerequisites:

EC 101 and EC 102

Credits:

4.00

Description:

This course is a combination of International Finance and Corporate Finance and designed to give students a strong foundation in the theory and practice of multinational financial management. Course materials include (a) basics of corporate finance and capital asset pricing, (b) foreign currency futures, (c) derivative securities in foreign exchange markets such as currency futures, options, swaps, (d) exchange risk management for multinational corporations, (e) global capital markets and financial crisis.

Type:

Social Science

- EC-442 International Monetary Economics

  Prerequisites:
  
  EC 101 and EC 102

  Credits:

  4.00

  Description:

  The balance of payments and foreign exchange markets and instruments, and the determination of exchange rates. Balance-of-payments adjustments under alternative exchange-rate systems, international liquidity, international economics policy and open economy macroeconomics.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- EC-445 The Economics of the European Union

  Prerequisites:
EC 101 and EC 102

Credits:
4.00

Description:
An economic analysis of the European Union, the history of European monetary and economic integration, and the creation of the Euro. A survey of the development and evolution of key European policies, such as competition, industry, agriculture, environment, regional, etc. A discussion of economic implications of the enlargement of the European Union, as well as its trade relations with the U.S. and other countries within the context of the World Trade Organization.

Type:
Social Science, BSJ SOCIAL SCIENCE

• EC-450 Applied Econometrics

Prerequisites:

STATS-250 or permission of instructor

Credits:
4.00

Description:
This course begins with a brief review of statistical methods, including probability theory, estimation, and hypothesis testing. This background is used in the construction, estimation, and testing of econometric models. The consequences of a misspecified model, where the assumptions of a classical regression model are violated, are studied and the appropriate remedial measures are suggested. Other topics include dummy variables, binary choice models, and autoregressive models. Emphasis is on applied aspects of econometric modeling. There is extensive use of statistical software for data analyses. Normally offered every year.

Type:
Social Science, BSJ SOCIAL SCIENCE

• EC-460 Game Theory
Prerequisites:

EC 101 and EC 102

Credits:

4.00

Description:

This course introduces students to the foundations of game theory using applications from economics and everyday decision-making. The course examines the common strategic elements of interactions between consumers and producers, governments and citizens, politicians and their constituencies, countries and their trading partners, and various other participants in social relationships. The course provides a theoretical framework for modeling strategic interaction, beginning with the development of the concept of a Nash equilibrium, reputation, signaling, collective-action problems, and voting procedures and strategies. Normally offered every other year.

Type:

Quantitative Reasoning

• EC-483 Money, Banking & Financial Markets

Prerequisites:

EC 101, EC 102

Credits:

4.00

Description:

This course examines the role of depository institutions and the Federal Reserve system in determining the supply of money. The course also explains the financial environment and the role of monetary policy decisions on changes in price, interest rates, money, and economic activity. The course provides the student with both theoretical and applied analysis. Prerequisites: EC 101, EC 102.

Type:

Social Science, BSJ SOCIAL SCIENCE

• EC-490 Senior Seminar in Economics
Prerequisites:
EC-450 or STATS-350 and Senior Standing; Or permission of Undergraduate Director.

Credits:
4.00

Description:
This is a required course for all students majoring in economics, to be taken in the spring semester of their senior year. Students are required to develop an economic thesis project in consultation with the professor for the course and to present it to the class.

Type:
BSJ SOCIAL SCIENCE, Social Science

- **EC-503 Internship in Economics**
  
  Prerequisites:
  Instructor's consent required

  Credits:
  4.00

  Description:
  Approximately 12 hours per week working in a position designed to give the student responsibility and a learning opportunity in economics. Interested students should consult the instructor in advance.

  Type:
  Social Science, BSJ SOCIAL SCIENCE

- **EC-504 Economic Competitiveness: Theory and Practice**
  
  Prerequisites:
  Instructor's consent required
This course examines the concept of economic competitiveness among nations and states and its usefulness to policymakers seeking to improve economic conditions. The emphasis will be on state-based economic competitiveness. We will read the current literature on economic growth and competitiveness and explore the current controversy surrounding the shortcomings of business climate indices. Special attention will be given to Beacon Hill Institute's index which attempts to identify the states with the sets of policies that sustain long-term economic growth and sustainable high incomes for citizens. The student will apply a stress test to the BHI index identifying its strengths and weaknesses. To learn how the index is used by professionals, the student will also compare the index against similar measures and interview at least two practitioners on how their states apply the index. The student will meet regularly with her advisor and submit a research paper and a professional memorandum advising BHI on how best to improve the index.

- EC-510 EC Independent Study

Prerequisites:

An independent study form must be submitted to the CAS Dean's Office.

Credits:

1.00- 5.00

Description:

Independent study in economics

Type:

Social Science,BSJ SOCIAL SCIENCE

- EC-511 Professional Development in Economics

Prerequisites:
CAS-201 and at least 54 credits

Credits:
1.00

Description:
This one-credit course is designed to explore career opportunities in economics in depth. Classroom discussions, writing assignments, and site visits will help prepare students to identify and secure internship and post-graduate employment opportunities. Additional career paths, such as pursuing graduate studies in economics or related fields, and the application process, will also be addressed. The goal of this course is to help students reach their fullest professional potential following graduation.

- **ECE-101 Digital Electronics**

  **Prerequisites:**
  
  ECE L101 MUST BE TAKEN CONCURRENTLY

  **Credits:**
  3.00

  **Description:**
  This course introduces the elements and tools of digital design. The course covers Boolean algebra, Karnaugh maps, Logic gates and digital circuits, analysis and design of combinational and sequential circuits, and timing issues. Adders, decoders, multiplexers, flip-flops, counters, and registers are implemented using TTL or CMOS ICs as well as VHDL-programmed FPGAs. Formerly ECE 203

  **Term:**
  Offered Fall Term

- **ECE-L101 Digital Electronics-Lab**

  **Prerequisites:**
  
  ECE 101 MUST BE TAKEN CONCURRENTLY.

  **Credits:**
Description:

Illustrates the concepts of ECE-101. Exercises in various forms of Combinational and Sequential Logic design. Use of test equipment. Design projects will include a digital security system, use of PSPICE to verify feasibility of some designs. FPGA board citing Xilinx, software development tools from Xilinx and other third parties are introduced. Offered yearly. Formerly ECE L203

Term:

Offered Fall Term

• ECE-105 Circuit Theory I

Prerequisites:

ECE L105 must be taken concurrently; MATH 165 may be taken concurrently

Credits:

3.00

Description:

Basic elements and analysis techniques of DC circuits. Coverage includes resistors, capacitors, inductors, and sensors; independent and dependent sources. Ohm's law, power, energy, and power transfer. Kirchoff's voltage and current laws; Nodal and Loop analyses; Thevenin and Norton equivalents; step and transient responses of first-order systems; time constants. Emphasis on functional circuits. Prerequisite: Must be taken concurrently with ECE L105. Must take MATH 121 (must have a minimum grade of C in preqs.) 1 term - 3 credits.

Term:

Offered Spring Term

• ECE-L105 Circuit Theory Lab I

Prerequisites:

ECE 105 must be taken concurrently

Credits:
Description:
The Circuit Theory Lab I is designed to supplement the Circuit Theory I course.

Term:
Offered Spring Term

- **ECE-205 Circuit Theory II**
  
  **Prerequisites:**
  
  ECE 105 with C or better; MATH 166 & PHYS 152 concurrently

  **Credits:**
  
  3.00

  **Description:**

  **Term:**

  Offered Fall Term

- **ECE-L205 Circuit Theory II Lab**

  **Prerequisites:**

  ECE 205 MUST BE TAKEN CONCURRENTLY

  **Credits:**

  1.00

  **Description:**
Illustrates the concepts of ECE 205. Simulations with PSPICE, LABVIEW, NXT Robotics, INCSYS Power Simulator, Mathematica; construction and design. First order, second order transients, ideal and non-ideal transformer circuits, sinusoidal steady state circuits, power grid simulation. Offered yearly.

Term:
Offered Fall Term

• ECE-206 Solid State Devices and Circuits

Prerequisites:
ECE L206 must be taken concurrently; ECE 205 (must have a minimum grade of C in preqs.)

Credits:
3.00

Description:
Review of Thevenin and Norton Equivalent circuits. Frequency Domain analysis and Bode Plots. Representation of an active device by its Gain, Input and Output Resistance. Thorough coverage of op amps - circuits, applications, and inherent limitations. Introduction to semiconductor physics and the PN junction. Diode circuits, applications, and models. Zener diodes and power supplies. Ripple estimations. The Bipolar Junction Transistor - large and small signal analyses. Active, cutoff, and saturation region characterization. Hybrid Pi and T models. Basic transistor configurations - common collector, common base, and common emitter - along with their characteristics, applications, and tradeoffs. Estimation of bandwidth using open circuit time constants. Prerequisite: ECE 205. Must have at least a C in this. Co-requisite: ECE L206

Term:
Offered Spring Term

• ECE-L206 Solid State Devices & Circuits Lab

Prerequisites:
ECE 206 must be taken concurrently

Credits:
1.00
The Solid State Devices & Circuits Lab is designed to supplement the Solid State Devices & Circuits course.

Term:
Offered Spring Term

**ECE-225 Linear Systems**

Prerequisites:
MATH 166 and ECE 205 with a minimum grade of C; ECE L225 Concurrently.

Credits:
3.00

Description:

Term:
Offered Spring Term

**ECE-L225 Linear Systems Lab**

Prerequisites:
MUST BE TAKEN CONCURRENTLY WITH ECE 225

Credits:
1.00

Description:
The Linear Systems lab is designed to supplement the Linear Systems course. Matlab simulation of linear systems, Hardware Implementation of Analog Filters, measurement of the transfer function.

Term:

Offered Spring Term

- **ECE-288 Measuring the World**

  Credits:

  4.00

  Description:

  The world is addicted to quantifying the essence of everything, from personal IQ, to the speed of a baseball, to our healthiness, or our chances of winning the lottery. Behind most of these numeric values exists a science of measurement. Some of this is referenced to international standards, such as for length, time, weight, or temperature. Others are more arbitrary and subjective, such as ranking Olympic performance in gymnastics, beauty pageants, or popular responses as found in the game show Family Feud. A third category includes controversial areas, such as measuring whether a person is lying when interrogated, or using hype rather than reality to market products. Sometimes statistics are used to predict sports outcomes, such as in the annual March Madness NCAA basketball brackets. Finally, in a world subject to fraud and deception, it can be essential to distinguish legitimate from counterfeit items, such as in money, art, collectibles, and historical documents. Don't get hoodwinked! This course examines all of these, starting with how measurements have been made throughout history, along with a full deck of entertaining terms used during the ages. This may help you sort out your weight, whether given in pounds, kilos, or stones. Often these terms will provide insights into how people lived in different eras. We will also look at some of the technologies currently available to provide these measurements, and unravel the complexities of various sensors that are used. As we consider the meaning of accuracy we may become less naive about how much confidence to ascribe to the results given us. Hovering around all of these measurements should be the question of validity - are they meaningful, useful, or misleading? And the impact they have on society - whether they steer behavior more powerfully than one might originally suspect. Each student will also be given an opportunity to become an expert in an area of measurement of personal interest. By the end o

  Type:

  SCI TECH ENGNR

- **ECE-306 Solid State Devices, Power and Circuits**

  Prerequisites:

  ECE-206 with a minimum grade of C. ECE L306 concurrently
Continuation of Solid State Dev & Circuits I, with emphasis on MOSFET field effect transistors; Physical structure, I-V characteristics, modeling, use as a switch and CMOS inverter, biasing circuits, and basic amplifier configurations - common drain, common gate, and common source. Differential Amplifiers - BJT and MOSFET implementations, along with small and large signal analysis. Multistage circuits, active loads. Design of current source and current mirrors. Internal capacitance and high frequency limitations. Low midband, and high frequency analyses of transistor amplifiers. Miller effect. Open and Short Circuit Time Constants. Cascade and Cascode configurations. Frequency response of amplifiers. Significant circuit design activities. Course tightly coupled to ECE-L306.

Term:
Offered Fall Term

• ECE-L306 Solid State Devices, Power and Circuits Lab

Prerequisites:
ECE 306 must be taken concurrently

Credits:
1.00

Description:
Illustrates the concepts of ECE 306. Exercises that help meld the practical aspects with the theoretical concepts taught in ECE 306. Biasing and design of MOSFET amplifiers. Construction of differential and multistage amplifiers. Investigation of different current source implementations. Simulation of bandwidth improvement using Cascode structures. Course concludes with a multistage design challenge using MOSFETs to reach a specified gain, output impedance and bandwidth objective provided by the instructor.

Term:
Offered Spring Term

• ECE-307 Electric Power Systems - Analysis and Design
Prerequisites:

MA166; ECE 205; ECE 206 and ECE 403 helpful, but not required

Credits:

4.00

Description:

This course is a first course in understanding the components that compose the high power grid. Generation of power; transmission line characteristics, load impacts. Real and reactive power along with compensation techniques. Transformers. Synchronous generators and motors. Power flow. Power quality. Transient and dynamic stability issues. Handling faults, overvoltage and surge protection. Electronic control by high power devices such as thyristors, relays, and circuit breakers. HVDC examined. Recent developments and opportunities in the Power field. A strong emphasis placed on problems solving and representative exercises.

- **ECE-308 Electric Power Systems II**

  Prerequisites:

  ECE-307

  Credits:

  3.00

  Description:

  Course will further pursue issues started in ECE 307. This will include motors and generators, entire system modeling, symmetrical and non-symmetrical fault analysis and correction, design of power converter divides, and recent developments in the power industry. Simulation tools will be used to model different aspects of a complete electric power system. Essentially this course will cover the second half of the Grainger and Stevenson text introduced in ECE 307.

- **ECE-309 Labview and Electric Circuits and Machines**

  Prerequisites:

  ECE-206 and ECE-L309 must be taken concurrently

  Credits:
The purpose of this course is twofold: to give students facility in programming and data acquisition in Labview, and to use Labview to learn about power concepts such as three-phase, power corrections, per units, Star (Wye) and Delta connections, magnetic circuits, power electronic circuits, electric machines. Lab component reinforces concept taught in course.

**ECE-L309 Labview and Electric Circuits and Machines Lab**

**Prerequisites:**

ECE-206 and ECE-309 must be taken concurrently.

**Credits:**

1.00

**Description:**

The purpose of this course is twofold: to give students facility in programming and data acquisition in Labview, and to use Labview to learn about power concepts such as three-phase, power connections, per units, Star (Wye) and Delta connections, magnetic circuits, power electronic circuits, electric machines. Lab component reinforces concept taught in course.

**ECE-310 Special Topics in Engineering**

**Prerequisites:**

ECE 206 and MATH 166, or instructors' approval. 1 term - 4 credits. Minimum grade of C in prerequisites.
• ECE-311 Embedded Systems

Prerequisites:

ECE-203 and ECE-206 with a minimum grade of C and ENS-333 OR CMPSC-F131 with a minimum grade of C and ECE-L311 concurrently

Credits:

3.00

Description:

This course will introduce the fundamentals of embedded micro controllers for system level applications: fundamental elements - sensors or transducers, microcontrollers, and the interfacing to external components. Procedural methods for design of the complete embedded system are developed. Programming using assembly, and C languages is utilized. Must take ECE L311 concurrently. Prerequisites: ECE 203 AND ECE 206, AND ENS-333 or CMPSC F131 (minimum grade of C in prereqs.) 1 term - 3 credits.

Term:

Offered Spring Term

• ECE-L311 Embedded Systems Lab

Prerequisites:

Must take ECE 311 concurrently

Credits:

1.00

Description:

The Embedded Systems Lab is designed to supplement the Embedded Systems course.

Term:

Offered Spring Term

• ECE-325 Statistics for Engineering and Science
Prerequisites:

MATH 166 with a minimum grade of C; Must take ECE L325 concurrently

Credits:

3.00

Description:

Understanding the fundamentals of probability and statistics of experimental data. Measures of central tendency, variation, probability, events, Bayes Rule, discrete and continuous random variables, discrete and continuous distributions including the binomial distribution, normal distribution, chi-square distribution and student distribution, covariance, central limit theorem, hypothesis testing, linear regression, signal processing statistics (EE students), categorical data analysis (non-EE students). Use of Mathematica's statistical packages central to this course. Final project is a project with Biology measuring rat whisker resonance.

Term:

Offered Spring Term

- **ECE-L325 Statistics for Engineering and Science Lab**
  
  Prerequisites:
  
  ECE L325 MUST BE TAKEN WITH ECE 325
  
  Credits:
  
  1.00
  
  Description:
  
  The Engineering Statistics and Probability lab is designed to supplement the Engineering Statistics and Probability course.

  Term:

  Offered Spring Term

- **ECE-335 Control Systems**
  
  Prerequisites:
ECE 225; Min Grade of C in Prereq. ECE L335 Concurrently.

Credits:
3.00

Description:
Introduction to feedback control systems; control system characteristics (stability, sensitivity, disturbance rejection, steady-state accuracy, transient response); stability analysis; root-locus analysis and design; frequency-response analysis and design; analysis and design of digital control systems. Normally offered bi-yearly.

- ECE-L335 Control Systems Lab

  Prerequisites:
  ECE 335 MUST BE TAKEN CONCURRENTLY.

  Credits:
  1.00

  Description:
  The Control Systems lab is designed to supplement the Control Systems course.

- ECE-390 Data & Computer Communications Lab

  Prerequisites:
  ECE 225 with a minimum grade of C;

  Credits:
  3.00

  Description:
  Basic principles and topics in data communication, local area networks, wide area networks, communication architectures and protocols. Data transmission, encoding, multiplexing, circuit switching, packet switching, frame relays, and asynchronous transfer mode are also discussed. The
TCP/IP protocol suite is studied and a project involving configuring, implementing, and installing a network is carried out during the semester. Prerequisite: ECE 225 or instructor's approval. 1 term - 3 credits. Must be taken concurrently with ECE L390.

Term:
Offered Fall Term

- **ECE-L390 Data & Computer Communications Lab**

  Prerequisites:
  
  Must be taken concurrently with ECE 390

  Credits:
  
  1.00

  Description:
  
  The Data and Computer Communications lab is designed to supplement the Data and Computer Communications course.

  Term:

  Offered Fall Term

- **ECE-403 Applied Electromagnetics**

  Prerequisites:
  
  ECE 205 and MATH 265 with a minimum grade of C; ECE L403 must be taken concurrently

  Credits:
  
  3.00

  Description:
  
  Electrostatics and magnetostatics, including Coulomb's law, Gauss's law, Biot-Savart law and Ampere's law, vector operations in rectangular, cylindrical, and spherical coordinates, divergence theorem and Stokes theorem, electric fields in materials, Lorentz force, magnetic torque, Faraday's law, Maxwell's equation, wave propagation, transmission lines with Smith charts, rectangular waveguides, Hertzian dipole antenna; examples related to power when applicable.
• ECE-L403 Applied Electromagnetics Lab

Prerequisites:
Must be taken concurrently with ECE 403

Credits:
1.00

Description:
The Applied Electromagnetics Lab is designed to supplement the Applied Electromagnetics course.

• ECE-406 Solid State Devices & Circuits III

Prerequisites:
ECE-205 and ECE-206 with a minimum grade of C and ECE-L406 concurrently and at least a 3.0 GPA

Credits:
3.00

Description:
- **ECE-L406 Solid State Devices & Circuit III Lab**

  Prerequisites:

  Must be taken concurrently with ECE-406

  Credits:

  1.00

  Description:

  Utilizes the concepts of ECE 406. Simulating Dependent sources. PSPICE confirmation of feedback circuit simplification and linearization. Output gain stages and cross-over distortion. Vbe multipliers. Oscillator design. Final project includes design, simulation, and implementation (using discrete parts) of either a voltage or current mode op amp with unity gain stability and determination of band width. Normally offered biyearly.

- **ECE-410 Communication Systems**

  Prerequisites:

  ECE 206, ECE 225 and MATH 265 with a minimum grade of C; L410 concurrently

  Credits:

  3.00

  Description:

- **ECE-L410 Communications Systems Lab**

  Prerequisites:

  ECE 410 must be taken concurrently
Illustrates the concepts of ECE 410. Exercises will focus both on communication system components and in the construction of a complete communication system. Introduction to FSK, DTMF, Phase lock loops, AM and FM modulation, oscillators, A/D and D/A conversion and the Nyquist rate. Wireless transmissions. Troubleshooting of non-working systems. Students have flexibility in the design and construction of a full communication system which includes digitization, rearrangement in parallel and serial formats, transmission over a distance, and reconstruction back to its original analog form.

- **ECE-411 Senior Project I**

  **Prerequisites:**

  ECE 205, ECE 306, ECE 225, MATH 265; permission of the instructor may be required.

  **Credits:**

  4.00

  **Description:**

  The Senior Project provides a significant opportunity for students to direct all of their previous training and learning towards one major endeavor. It has been modified from previous years to extend over two semesters (instead of one) to facilitate a more comprehensive effort in both the planning and execution of the project. Although resources and guidance are provided for each student, this course still requires them to take full responsibility to plan their time, manage, and implement their project. In Part I the student creates their project proposal. Over a fourteen-week period the student is subjected to the practical stress of completing and delivering in professional fashion a project of their own choosing (with endorsement from an appropriate faculty advisor or industrial mentor). This period includes the following objectives: selection and careful definition of a project; a review of background information; a selection of the desired approach with justification; identification of resources needed; an outline of the project implementation timetable with desired milestones; a delineation of how the completed project performance might be evaluated. Weekly progress reports and meeting with their advisor are required. A formal proposal document is reviewed by department members (and possibly Industrial constituents) and may go through numerous iterations to be deemed 'acceptable'. Along the way informal oral presentations of both the 'general' and 'technical' aspects of their project will be presented to the rest of their peer group. A formal presentation of the project proposal is made to an audience of peers, faculty, and outside advisors. **Prerequisites:** ECE 205, ECE 306, ECE 225, MA265; permission of the instructor may be required.

  **Type:**

  Expanded Classroom Requirement
• ECE-412 Senior Project II

Prerequisites:

ECE 411

Credits:

4.00

Description:

In Part II the student implements, documents, and presents their completed project. Having defined their project, students gather the resources necessary and proceed to execute their designs. This period will include the construction, testing, troubleshooting, refinement, and evaluation of their project. A formal presentation of the project is made. A professional caliber documentation of the project is also required, and may go through numerous iterations of review. The final project report must consider most of the following: environmental impact, sustainability, manufacturability, ethics, health and safety issues, and political concerns. Time management, prioritization of process, formal communication, overcoming obstacles and meeting deadlines are monitored by the project advisor. Weekly reports and meetings are expected. The advisor also serves as a resource for the student. However, full responsibility for the success of the project rests on the student. Cross-disciplinary projects are encouraged. ECR

Type:

Expanded Classroom Requirement

• ECE-414 Senior Project Proposal

Prerequisites:

Take ECE-101, ECE-206, MATH-165;

Credits:

1.00

Description:

The aim of this course is for students to generate a thoughtful and well-written senior project proposal. This course will provide guidelines and critiquing for that purpose. By the end of the course, students will have narrowly identified their project, performed a review of current available related technology, and selected the approach they will pursue. They will also establish a parts list, timetable, set of milestones, and basis or procedure for determining an answer to the question how good is it? At the end of the course they will formally present their project and write a comprehensive
project proposal document. Once accepted, they are permitted to take ENS 415 Senior Project. Note that this course is focused on the process of creating a viable proposal. Enough flexibility exists that students may either implement the project they documented in this course when they take ENS 415, or may pursue an alternative project if desired. Also note that this course replaces ECE 411 for the graduating class of 2016.

- **ECE-415 Senior Project**
  
  Prerequisites:
  
  Take ECE-414;
  
  Credits:
  
  4.00
  
  Description:
  
  For the senior project the student implements, documents, and presents their completed project of the proposal generated in ENS 414. Having defined their project, students gather the resources necessary and proceed to execute their designs. This period will include the construction, testing, troubleshooting, refinement, and evaluation of their project. A formal presentation of the project is made. A professional caliber documentation of the project is also required, and may go through numerous iterations of review. The final project report must consider most of the following: environmental impact, sustainability, manufacturability, ethics, health and safety issues, and political concerns. Time management, prioritization of process, formal communication, overcoming obstacles and meeting deadlines are monitored by the project advisor. Weekly reports and meetings are expected. The advisor also serves as a resource for the student. However, full responsibility for the success of the project rests on the student. Cross-disciplinary projects are encouraged. Note: Replaces ECE 412 for the graduating class of 2016.
  
  Type:
  
  Expanded Classroom Requirement

- **ECE-430 Digital Signal Processing**
  
  Prerequisites:
  
  ECE 225, ECE 203 with minimum grade of C; ECE L430 concurrently
  
  Credits:
  
  3.00
  
  Description:
Discrete signals and systems, digital simulation of analog systems, Z transforms, recursion equations, finite-order systems, Fourier transforms, line spectra and Fourier series, discrete Fourier series and Fast Fourier Transforms (FTT), sampling and interpolation, mean-square approximations, non-recursive and recursive filters, selected topics on algorithms, design and applications of digital signal processing. There will be an end-of-semester design project that will involve students' creativity, design of open ended projects, formulation of alternative solutions, detailed system description, realistic constraints (economic factors, safety, reliability, aesthetics ethics, and social impact).

Term:
Offered Fall Term

- **ECE-L430 Digital Signal Processing Lab**

  Prerequisites:

  ECE 430 must be taken concurrently

  Credits:

  1.00

  Description:

  Illustrates the concepts of ECE 430. This laboratory course uses MATLAB, Simulink, and the Texas Instruments 6713 DPS board to design, test and implement various projects. The students will also learn how to use FPGA boards to design and implement various DSP systems. There will be a design project at the end of the course designed to synthesize what the students have learned.

  Term:

  Offered Fall Term

- **ECE-510 Independent Study**

  Prerequisites:

  An independent study form must be submitted to the CAS Dean's Office.

  Credits:

  1.00- 6.00

  Description:
This is an independent study in electrical and computer engineering. Topics will vary.

- **EDUC-110 Introduction to Education**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Working with children and adolescents is a facet of many professions. This course will introduce students to the study of education occurring in formal and informal settings. This course focuses on the relationships among, and between, teachers, discourse, and community. Students will glean insight into the relationship of school and society as well as power and control in American Education. Required of all education minors. Five hours of field work required.
  
  **Term:**
  
  Offered Both Fall and Spring
  
  **Type:**
  
  Social Science

- **EDUC-202 Educational Psychology**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Examines the nature and development of human abilities and the teaching-learning process. Considers the facts and generalizations of child and adolescent growth and development, working with diverse cultures, and special needs children in school settings. Ten hours of field work.
  
  **Term:**
  
  Offered Both Fall and Spring
  
  **Type:**
  
  Social Science
• EDUC-203 Service Learning: Pre-K Outreach and Tutoring

Credits:
4.00

Description:
Students complete a minimum of 35 hours of tutoring in an educational setting, or community organization, in conjunction with a weekly seminar on campus. Open to all majors. No previous experience required.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement, Social Science

• EDUC-205 Service Learning: Community Tutoring Project

Prerequisites:
This class fulfills the Expanded Classroom Requirement

Credits:
4.00-8.00

Description:
Students complete 35 hours per semester of educational tutoring in a local school (K-5), in conjunction with a weekly seminar on campus. Open to all majors. No previous experience required.

Term:
Offered Both Fall and Spring

Type:
- **EDUC-208 Service Learning: College Access**

  **Credits:**
  4.00

  **Description:**
  Students complete a minimum of 35 hours of tutoring and coaching in an educational setting, or a community organization in conjunction with a weekly seminar on campus. Programs include COACH, Connections to College, and others. Open to all majors. No previous experience required.

  **Term:**
  Offered Both Fall and Spring

  **Type:**
  Expanded Classroom Requirement, Social Science

- **EDUC-209 Reading and Writing in the Classroom**

  **Credits:**
  4.00

  **Description:**
  Students will become knowledgeable about the various approaches to teaching reading and writing in the content areas. This course is designed for teaching the necessary literacy skills in both Middle School and High School. Topics include: formal and informal assessment techniques, differentiation of instruction, diagnosing problems and integrating reading and writing into curriculum and instruction.

  **Type:**
  Social Science

- **EDUC-210 Service Learning: Alternative Spring Break**
Prerequisites:
Open to all majors, Instructor's signature required

Credits:
4.00

Description:
Students complete all research, travel, and reporting requirements in conjunction with Suffolk University's Alternative Spring Break. Open to all majors. No previous experience required.

Term:
Offered Spring Term

Type:
Social Science

- EDUC-214 Introduction to Teaching
  
  Credits:
  4.00

  Description:
  This course introduces students to the basic competencies of school teaching. Topics include: lesson planning, classroom management, grouping for instruction, effective pedagogical practices, assessment methods, requirements for licensure in Massachusetts, and discipline specific curriculum development using the curriculum frameworks/common core state standards. Field observations (25 hours) required.

- EDUC-215 Service Learning Jumpstart Community Literacies
  
  Credits:
  4.00

  Description:
This course is designed for Jumpstart Corps members to develop competencies in teaching strategies for reading and writing. The course introduces theoretical and instructional issues in the development of literacy skills. Students will be engaged in reflective, critical consideration of students’ diverse needs in the acquisition of literacy.

- **EDUC-310 Culturally Responsive Education**

  **Credits:**
  4.00

  **Description:**
  The relationship between cultural diversity and schooling is explored by examining impediments to academic achievement and advancement by minority students, non-native English speaking students, and other under-represented groups. Topics include: standardized testing, identification of inequities, legal and ethical responsibilities of teachers, and promoting equity. Ten pre-practicum observation hours required for teacher candidates.

  **Term:**
  Offered Fall Term

  **Type:**
  Cultural Diversity Opt A, Social Science, Diverse Perspectives

- **EDUC-312 Curriculum and Pedagogy: Middle and Secondary School**

  **Prerequisites:**
  This course fulfills the Expanded Classroom Requirement

  **Credits:**
  4.00

  **Description:**
  Introduces students to the basic competencies of Middle and Secondary school teaching. Topics include: behavioral problems, classroom management, grouping for instruction, motivation and reward systems, individualized instruction, IEP's, requirements for licensure in Massachusetts, and discipline specific curriculum development using the curriculum frameworks developed by the Massachusetts Department of Education. Field
observations and experiences are grounded in theoretical discussion as students begin to develop their personal philosophies of education. Field observations (40 hours) required. Required prior to student teaching.

Term:
Offered Fall Term

Type:
Expanded Classroom Requirement, Social Science

- **EDUC-313 Classroom Communication**

  Credits:
  
  4.00

  Description:

  Examines communication between and among teachers and students in the classroom setting. Topics include: communication apprehension, building oral fluency, use of media technology to enhance student learning, cooperative learning, and related professional and legal responsibilities of teachers. Ten pre-practicum observation hours required for Teacher Candidates.

  Term:

  Offered Spring Term

  Type:

  Social Science

- **EDUC-315 Strategies for Emerging English Learners**

  Credits:

  4.00

  Description:

  This course examines the specific needs and challenges of the various language and cultural groups in schools. Topics include: theories of 1st and 2nd language acquisition, strategies for teaching academic content, modifying instruction in the mainstream classroom, creating classroom cultures...
that invite all students into learning, the role of advocacy and professional collaboration in ESL, and analysis of policies related to assessment and placement of English Language Learners.

Type:
Diverse Perspectives,Social Science

• EDUC-402 History & Philosophy of American Education

Credits:
4.00

Description:
Explores the evolution of schooling in the United States from The English High School to present. Theorists include: Mann, Franklin, Dewey, Sizer, and others.

Term:
Offered Spring Term

Type:
Social Science

• EDUC-408 Youth Programming

Credits:
4.00

Description:
This course focuses on the exploration and understanding of issues, strategies and frameworks related to developing and implementing youth programs. Students will be exposed to developmental theories, and various components of effective youth programmatic planning. Topics include: conducting needs assessments, developing goals and objectives, logistics planning, recruitment and training, and program evaluation.

Type:
Social Science
• EDUC-414 Urban Schooling

  Credits:

  4.00

  Description:

  This course is an in-depth investigation of policies effecting urban schools; topics include: demographic influence on education, influences of national and state regulations on urban schools, sociological factors unique to urban schools, and in-depth analysis of equity and achievement.

  Term:

  Occasional

  Type:

  Social Science

• EDUC-415 Practicum: Middle School Teaching

  Prerequisites:

  Coordinator of Student Teaching or Program Director’s Consent

  Credits:

  8.00

  Description:

  A 12-week practicum experience as a student teacher in a middle school. See regulations regarding student teaching.

  Term:

  Offered Spring Term

  Type:

  Social Science
• EDUC-416 Practicum: Secondary School Teaching

  Prerequisites:

  Instructor's or Program Director's Consent

  Credits:

  8.00

  Description:

  A 12-week practicum experience as a student teacher in a secondary school. See regulations regarding student teaching.

  Term:

  Offered Spring Term

  Type:

  Social Science

• EDUC-417 Assessment Theory and Practice

  Credits:

  4.00

  Description:

  This course examines the development of formative, summative, authentic, and alternative assessment in education. Seminal works by Archbald, Baron, Bloom, Kleinsasser, Schwab, and others comprise the theoretical component. The second half of the course is dedicated to the selection, application, and integration of formal and informal assessment strategies and tools. A final project requires students to design an assessment tool appropriate for their academic area and age level. Instructional strategies include case studies, class discussions, student presentations, and research reviews.

  Term:

  Offered Fall Term
• EDUC-424 Global Issues and Trends in American Education

  Credits:
  4.00

  Description:
  Examines major current issues of educational policy against the background of demographic trends, technological innovations, standardized testing, and curricular shifts.

  Term:
  Occasional

• EDUC-510 Independent Study

  Prerequisites:
  An independent study form must be submitted to the CAS Dean's Office.

  Credits:
  1.00-4.00

  Description:
  Members of the Department will meet with students to direct their research in areas of special interest to them. Projects of this sort will be authorized only in unusual circumstances upon the recommendations of the Department Chairperson and with the approval of the Dean. Offered by arrangement only.

  Type:
• **ELI-004 Academic Presentation Skills Pronunciation Skills**

   **Prerequisites:**

   ELI Students only

   **Credits:**

   0.00

   **Description:**

   An introduction to the processes of professional communication, with an emphasis on oral presentations, effective listening, and interpersonal communication. Students acquire skills in oral and physical delivery, organization, persuasion, critical thinking, and the use of support media. Through lectures, text, and practical applications; students will learn how to select a topic, tailor a presentation to a specific audience, research, design, and structure an oral presentation, collaborate with a team of colleagues, utilize visual aids, and critique professional / rhetorical situations.

• **ELI-005 Academic Presentation Skills Pronunciation Skills**

   **Prerequisites:**

   ELI Students only

   **Credits:**

   0.00

   **Description:**

   An introduction to the processes of professional communication, with an emphasis on oral presentations, effective listening, and interpersonal communication. Students acquire skills in oral and physical delivery, organization, persuasion, critical thinking, and the use of support media. Through lectures, text, and practical applications; students will learn how to select a topic, tailor a presentation to a specific audience, research, design, and structure an oral presentation, collaborate with a team of colleagues, utilize visual aids, and critique professional / rhetorical situations.

• **ELI-006 Academic Presentation Skills Pronunciation Skills**

   **Prerequisites:**
ELI Students only

Credits:
0.00

Description:
An introduction to the processes of professional communication, with an emphasis on oral presentations, effective listening, and interpersonal communication. Students acquire skills in oral and physical delivery, organization, persuasion, critical thinking, and the use of support media. Through lectures, text, and practical applications; students will learn how to select a topic, tailor a presentation to a specific audience, research, design, and structure an oral presentation, collaborate with a team of colleagues, utilize visual aids, and critique professional / rhetorical situations.

- **ELI-041 High Intermediate Listening/Speaking/ Pronunciation Skills**
  
  Prerequisites:
  
  ELI Students only
  
  Credits:
  0.00
  
  Description:
  For non-native speakers assessed to be at the high intermediate level (450-475/110-133 CBT TOEFL/2.8-3.3 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening comprehension, speaking and pronunciation. The course meets for six hours a week. College credit is not awarded. Co-Requisite courses: ELI 042, ELI 043, ELI 044

- **ELI-042 High Intermediate Reading/Writing/ Grammar Skills**
  
  Credits:
  0.00
  
  Description:
  For non-native English speakers assessed to be at high intermediate level intermediate level (450-475/110-133 CBT TOEFL/2.8-3.3 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.
• **ELI-043 High Intermediate Eli American Culture**
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  For non-native English speakers assessed to be at a high intermediate level (450-475/133-153) CBT TOEFL / 2.8-3.3 TWE) who need to acquire academic fluency in American English. The focus is on American culture, values, and institutions, giving students a content driven opportunity to practice the English language skills introduced in the other ELI courses. The course meets for five hours a week.

• **ELI-044 High Intermediate English - Academic Skills Lab**
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  For non-native English speakers assessed to be at a high intermediate level (450-475/133-153 CBT TOEFL / 2.8-3.3 TWE) who need to acquire academic writing skills. The focus is on research skills needed to be a successful student at an American college. The course meets for five hours a week. College credit is not awarded.

• **ELI-051 Low Advanced Listening/Speaking/ Pronunciation Skills**
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  For non-native English speakers assessed to be at low advanced level (475-500/3.0-3.5 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening, comprehension, speaking and pronunciation. The course meets or six hours a week. College credit is not awarded.

• **ELI-052 Low Advanced Reading/Writing/Grammar Skills**
ELI students only

Credits: 0.00

Description:

For non-native English speakers assessed to be at a low advanced level (475-500/153-173 CBT TOEFL /3.0-3.5 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.

- **ELI-053 Low Advanced American Culture Skills**

  Prerequisites:
  
  ELI students only

  Credits: 0.00

  Description:

  For non-native English speakers assessed to be at a low advanced level (475-500/153-173 CBT TOEFL /3.0-3.5 TWE) who need to acquire communicative fluency in American English. The focus is on American culture, values, and institutions, giving students a content driven opportunity to practice the English skills introduced in the other ELI courses. The course meets for five hours a week. College credit is not awarded.

- **ELI-054 Low Advanced Research Skills**

  Prerequisites:
  
  ELI students only

  Credits: 0.00

  Description:
For non-native English speakers assessed to be at a low advanced level (475-500/153-173 CBT TOEFL/ 3.0-3.5 TWE) who need to acquire academic writing skills in American English. The focus is on research skills needed to be a successful student at an American college. The course meets for five hours a week. College credit is not awarded. The course meets five hours a week. College credit is not awarded.

- **ELI-061 High Advanced Listening/Speaking/ Pronunciation Skills**
  
  **Prerequisites:**
  
  ELI students only
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  For non-native English speakers assessed to be at a high advanced level (500-525/173-193 CBT TOEFL / 3.5-4.0 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening comprehension, speaking, and pronunciation. The course meets for six hours a week. College credit is not awarded.

- **ELI-062 High Advanced Reading/Writing/Grammar Skills**
  
  **Prerequisites:**
  
  ELI students only
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  For non-native English speakers assessed to be at a high advanced level (500-525/173-193 CBT TOEFL / 3.5-4.0 TWE) who need to acquire written fluency in American English for an academic setting. The focus is on intensive practice in reading, writing, and English grammar. The course meets for six hours a week. College credit is not awarded.

- **ELI-063 High Advanced American Culture Skills**
  
  **Prerequisites:**
ELI students only

Credits:
0.00

Description:
For non-native English speakers assessed to be at a high advanced level (500-525/173-193 CBT TOEFL / 3.5-4.0 TWE) who need to acquire academic fluency in American English. The focus is on American culture, values, and institutions, giving students a content driven opportunity to practice the English language skills introduced in the other ELI courses. The course meets for five hours a week. College credit is not awarded.

- **ELI-064 High Advanced Research Skills**

Prerequisites:

ELI students only

Credits:
0.00

Description:
For non-native English speakers assessed to be at a high advanced level (500-525/173-193 CBT TOEFL / 3.5-4.0 TWE) who need to acquire academic writing skills in American English. The focus is on research skills needed to be a successful student at an American college. The course meets for five hours a week. College credit is not awarded.

- **ELI-071 Special Advanced Listening/Speaking/ Pronunciation Skills**

Prerequisites:

ELI students only

Credits:
0.00

Description:
For graduate level, non-native English speakers assessed to be at a high advanced level (525-550/190-200 CBT TOEFL / 4.0-4.5 TWE) who need to acquire aural fluency in American English. The focus is on intensive practice in listening comprehension, speaking, and pronunciation; the content is derived from Harvard Business School Case Studies. The course meets for six hours a week.

- **ELI-072 Special Advanced Reading/Writing/Grammar Skills**

  **Prerequisites:**
  ELI students only

  **Credits:**
  0.00

  **Description:**
  For graduate level, non-native English speakers assessed to be at a high advanced level (525-550/190-200 CBT TOEFL / 4.0-4.5 TWE) who need to acquire written fluency in American English. The focus is on intensive practice in reading, writing, and English grammar; the content is derived from business texts and Harvard Business School Case Studies. The course meets for six hours a week.

- **ELI-073 Spec Adv Amer Culture Lab**

  **Credits:**
  0.00

  **Description:**
  A course for graduate level, non-native English speakers assessed to be at a high advanced level of proficiency (525 - 550 PBT/ 193 - 213 CBT/ 70 - 79 IBT/ 3.5 - 4.0 TWE), who need to acquire communicative fluency in American English. The focus is on American culture, values, and institutions, giving students a content driven opportunity to practice the English skills introduced in the other ELI courses. The course meets for four hours a week. College credit is not awarded.

- **ELI-074 Spec Adv Research Skills**

  **Credits:**
  0.00
A course for graduate level, non-native English speakers assessed to be at a high advanced level of proficiency (525 - 550 PBT/ 193 - 213 CBT/ 70 - 79 IBT/ 3.5 - 4.0 TWE), who need to master graduate-level academic skills such as library research, evaluation of sources, quoting, paraphrasing and citation methods, and TOEFL preparation. The course meets four hours a week. College credit is not awarded.

- **ELI-077 Academic Presentation Skills Pronunciation Skills**
  
  **Prerequisites:**
  
  ELI Students only
  
  **Credits:**
  
  0.00
  
  **Description:**
  
  An introduction to the processes of professional communication, with an emphasis on oral presentations, effective listening, and interpersonal communication. Students acquire skills in oral and physical delivery, organization, persuasion, critical thinking, and the use of support media. Through lectures, text, and practical applications; students will learn how to select a topic, tailor a presentation to a specific audience, research, design, and structure an oral presentation, collaborate with a team of colleagues, utilize visual aids, and critique professional / rhetorical situations.

- **ENG-095 Developmental English Skills I**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course is appropriate for native English speakers as well as non-native English speakers with a high level of oral fluency, but a need to improve English reading and writing skills for an academic setting. The course provides students with opportunities for and guidance in the development of Academic English writing. Class activities focus on aiding students in improving their academic English reading and writing skills to the proficiency levels required by the University. Particular emphasis is placed on the importance of planning, organizing and revising essays, as well as learning how to analyze, summarize, and cite an author’s ideas and words. Offered in the Fall, Spring, and Summer Session I semesters. Course is enrolled by placement or instructor consent only.

- **ENG-096 Developmental English Skills II**
A continuation of ENG 095, this course provides opportunities to both native and non-native English speakers for further development of Academic English proficiency. Class activities focus on aiding students in improving their academic English reading and writing skills to the proficiency levels required by the University. Particular emphasis is placed on the importance of planning, organizing and revising essays, as well as learning how to analyze, summarize, and cite an author's ideas and words. Offered on the Madrid Campus only.

- ENG-098 ESL Reading/Writing I

Credits:

4.00

Description:

Utilizing a freshman-level English textbook and materials from the content courses, this course furnishes students with active reading strategies and the conventions of academic writing that will be applicable to their collegiate course work. Students will develop the analytical skills necessary for academic success by producing in-class and take-home essays, participating in debates, and giving oral presentations. Students will be required to work with a course management program and to utilize technology effectively in their writing. The skills obtained in these courses will allow students to participate comfortably in their mainstream college classes.

- ENG-099 ESL Reading/Writing II

Credits:

4.00

Description:

A continuation of ENG 098, this course further furnishes students with active reading strategies and the conventions of academic writing that will be applicable to their collegiate course work. Students will develop the analytical skills necessary for academic success by producing in-class and take-home essays, participating in debates, and giving oral presentations. Students will be required to work with a course management program and to utilize technology effectively in their writing. The skills obtained in these courses will allow students to participate comfortably in their mainstream college classes.
• ENG-101 Freshman English I

Credits:

4.00

Description:

This course studies persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. Offered every semester.

Term:

Offered Both Fall and Spring

• ENG-L101 Developmental English 101 Lab

Credits:

0.00

Description:

A course for students enrolled in Developmental English or Freshman Composition to aid them in improving their control of the writing process, English mechanics, and fluency of expression.

• ENG-102 Freshman English II

Prerequisites:

- **ENG-125 Young Adult Literature**

  Prerequisites:

  WRI-101

  Credits:

  4.00

  Description:

  Young Adult Literature's recent explosion in popularity raises important questions about the stories it tells, the values it promotes, and the audiences it seeks. This course approaches the YA phenomenon as one with deep historical roots as well as contemporary cultural relevance. From nineteenth century classics to current series favorites, literary works focused on young people reframe perennially fresh narratives about coming of age, negotiating personal identity, and navigating a complex moral universe. This course also considers YA literature as part of an evolving network of writers, readers, publishers, critics and filmmakers.

- **ENG-130 Introduction to Literature**

ENG-392 Readings in Post-Colonial Literature

Prerequisites:
WRI-102 or WRI-H103

Credits:
4.00

Description:
An Exploration of Post-colonial literature and how the empire writes back following the collapse of European colonialism. Special emphasis will be placed on the legacy of British Colonial rule and the contemporary use of literature and the English Language to both resist and problematize Eurocentric cultural assumptions. Authors studied will include E.M. Foster, Salman Rushdie, J.M. Coetzee, Anita Desai, Hanif Kureishi, and Zadie Smith, among others. Students will be introduced to Post-colonial critical theory and view film adaptations of literary texts.

Term:
Occasional

Type:
**ENG-394 Critical Prose**

Prerequisites:

WRI-102 or WRI-H103 with a minimum grade of B+

Credits:

4.00

Description:

This course studies both the literary and rhetorical modes of expository essay writing. Readings will focus on the craft of writing, the art of revision and reflections on the reader-writer relationship. Students will be asked to analyze prose passages, compose critical essays and work in peer groups. Normally offered alternate years.

Term:

Occasional

**ENG-395 Rhetoric and Memoir**

Prerequisites:

WRI-102 or WRI-H103

Credits:

4.00

Description:

This course examines the rhetoric of memoirs written primarily by international figures who seek to use personal stories to shape readers' perspectives on political issues. After a brief introduction to rhetorical theory and to the genre of memoir, this course will examine contemporary memoirs that address such issues as racism, sexism, religious extremism, war, and genocide.

Term:

Occasional
- **ENG-396 Varieties of Workplace Writing**
  
  **Prerequisites:**
  
  WRI-102 or WRI-H103
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course studies a variety of workplace writing including summaries, memos, letters, directions, descriptions, reports and other technical and professional documents. Students may be required to complete certain assignments in collaborative teams. Document design and layout will also be emphasized. Normally offered alternate years
  
  **Term:**

Credits:

4.00

Description:

This class will engage with the major novels and selected literary writings of two of the twentieth century's most important modernist voices, Virginia Woolf and E.M. Forster. We will approach their writings within the intellectual framework of British modernism and the cultural context of the Bloomsbury Group out of which they emerged. Special attention will be paid to their theoretical writings on fiction as well as their respective contributions to feminism and queer theory. The class will also view cinematic adaptations of certain novels and discuss how these films have contributed to the enduring appeal and status of these texts as classics of twentieth-century fiction.

Term:

Occasional

ENG-410 From Pagan Reason to Christian Revelation
Prerequisites:
WRI-102 or WRI-H103

Credits:
4.00

Description:
A survey of major works of literature and thought crucial to the transformation of pagan models of reason to Christian systems of belief, including works by Plato and Plotinus, St. Augustine and Dante. Of central concern is the changing conception of love, from Eros to Agape. Cross-listed with History 336.

Term:
Occasional

- **ENG-421 Special Topics in Group 1: Approaches To English Studies**

  Prerequisites:
  ENG 213, ENG 214, ENG 215, ENG 216, ENG 217, or ENG 218

  Credits:
  4.00

  Description:
  A course that fits Group 1 of the English major requirements with varying subject matter.

  Term:
  Occasional

- **ENG-422 Special Topics in Group 2: Genre and Backgrounds**

  Prerequisites:
  Any 200-level English course
- **ENG-424 Special Topics in Group 4: Literary History II: 1700-1900, American or British**

  **Prerequisites:**
  Any 200-level English course

  **Credits:**
  4.00

  **Description:**
  A course that fits Group 4 of the English major requirements with varying subject matter. An interdisciplinary offering that features the writing of three of the late 19th century's greatest minds: Henry, the novelist who wrote *The Portrait of a Lady*, *Daisy Miller*, and *The Turn of the Screw*; William, the philosopher and psychologist who wrote *Principles of Psychology* (1890) and *Varieties of Religious Experience* (1902); and Alice, their sister, who became a feminist icon through her remarkable diary. A selection of these works will be explored alongside a James family biography.

  **Term:**
  Occasional

- **ENG-425 Special Topics in Group 5: Literary History III: 1900- Present American, British, Or World**

  **Prerequisites:**
  Any 200-level English course

  **Credits:**
  4.00
4.00

Description:
A course that fits Group 5 of the English major requirements with varying subject matter.

Term:
Occasional

- **ENG-427 The Georgics of Virgil**
  
  Prerequisites:
  Any 200-level English course

  Credits:
  1.00

  Description:
  A study of these poems by the Roman poet with a focus on the issues of translation.

- **ENG-428 Virgil's Aeneid: First Three Books**

  Prerequisites:
  Any 200-level English course

  Credits:
  1.00

  Description:
  A week by week reading of the Mesopotamian Epic that predates the Iliad by one thousand years, and is a masterpiece of heroic endurance and tragic insight. Discussions will be led by David Ferry, whose beautiful translation the class will use as text.

- **ENG-429 Classic Literature of the Underworld**
Prerequisites:
WRI-102 or WRI-H103

Credits:
4.00

Description:
This course will conduct close reading and discussion of selections from classical Greek and Roman texts, as well as from ancient Mesopotamian texts, highlighting passages that trace the descent to the underworld. Some of these readings include: the realm of the shades in Gilgamesh, the myth of Orpheus and Eurydice in Virgil, Homer's Odysseus and Achilles in Hades, the source of the River Styx in Pausanias.

- ENG-430 Literature of the Vietnam War and the Post 9/11 Wars
  Prerequisites:
  WRI-102 or WRI-H103
  Credits:
  4.00
  Description:
  This course will examine some of the fiction, non-fiction, and poetry produced in response to the Vietnam War and the most recent war in Iraq. In addition to comparing the literature that has emerged from these two very different wars, these texts will also be examined in relation to peace studies, a field in which there is an emerging consensus that literature and the arts must play a central role in examining questions of war and peace.
  
  Term:
  Occasional

- ENG-431 Studies in Postmodern Fiction
  Prerequisites:
  WRI-102 or WRI-H103
  Credits:
4.00

Description:

This course introduces students to the innovations that have re-defined fiction following the modern period. Novelists will include significant writers (3 Nobel Laureates among them) of the 20th/21st century, including Borges, Kundera, Calvino, Saramago, Garcia Marquez, Vargas Llosa.

- **ENG-432 Classical Greek and Roman Poetry**

  **Prerequisites:**
  
  Any 200 level ENG course.

  **Credits:**
  
  1.00

  **Description:**

  Readings from major poems by the Greek and Roman poets of the ancient and classical periods. Works include: Sappho's lyric poems, Pindar's Odes, Horace's Odes, Virgil's Eclogues and Georgics, selections from the Aeneid and the Iliad.

- **ENG-440 The Odes of Horace**

  **Prerequisites:**

  Any 200-level English course

  **Credits:**

  1.00

  **Description:**

  This course represents a journey through the poetry of Horace, contemporary of Virgil and celebrated poet of the Pax Romana. Discussions will be led by David Ferry, whose beautiful translation of Horace's poetry the class will use as text.

- **ENG-470 Fiction Workshop II**
Prerequisites:
Any 200-level English course

Credits:
4.00

Description:
An intensive practical examination of plot, narrative, characterization, and style in the writing of fiction and/or creative non-fiction. Particular attention will be devoted to group discussion of weekly student writing assignments. Normally offered alternate years.

Term:
Alternates Fall & Spring

• **ENG-471 Advanced Nonfiction Workshop**

  Prerequisites:
  Any 200-level English course

  Credits:
  4.00

  Description:
  An advanced course in non-fiction writing that focuses intensively on developing non-fiction through weekly group discussions of student writing. Particular attention will be devoted toward deepening and expanding the range of possibilities available to non-fiction writers. Topics can include childhood, place, sexuality, religion, work, the nature of memory. The focus will be on the writing process, with students presenting work-in-progress to the class for discussion and revision. Normally offered annually.

• **ENG-475 Poetry Workshop II**

  Prerequisites:
  Any 200-level English course

  Credits:
Description:

An intensive workshop course in which the student will be required to write original poetry for each class meeting. The focus of the course will be on both the quantity and quality of the student's own work. There will also be specific assignments in the many formal elements of the art. Written self-evaluations will also be required. Normally offered in alternate years.

Term:

Offered Spring Term

- ENG-480 Fiction Writing Workshop III

  Prerequisites:

  Any 200-level English course

  Credits:

  4.00

  Description:

  An advanced course in fiction writing that focuses intensively on developing fiction through weekly group discussions of student writing. Particular attention will be devoted toward deepening and expanding the range of possibilities available to fiction writers.

- ENG-490 Imperial Rome

  Prerequisites:

  WRI-102 or WRI-H103

  Credits:

  4.00

  Description:

  This course offers an introduction to the Golden Age of Roman culture and power. Close readings of selections from major historians, poets, political thinkers, and philosophers will be examined in the context of Augustan Rome. Topics such as pietas, virtus, and gravitas, as well as the competing
claims of public duty and private devotion, stoic maxim and erotic love lyric, will be discussed from the perspectives of writers such as Virgil, Livy, Tacitus, Horace, Catullus, and Lucretius. Note: This course is identical to HUM 304. Normally offered in alternate years.

Type:

Humanities & History

- ENG-510 Independent Study

  Prerequisites:

  WRI-102 or WRI-H103

  Credits:

  1.00- 4.00

  Description:

  By special arrangement, a junior or senior may pursue an independent research project under the supervision of a faculty member. Consent of instructor and chairperson required. Offered every semester.

  Term:

  Offered Both Fall and Spring

- ENG-514 Internship in English

  Prerequisites:

  WRI-102 or WRI-H103

  Credits:

  2.00

  Description:

  Individualized guidance in a career-related activity. Upper-class English majors may gain academic credit for work preparing them for an English-related career, provided that the work is monitored by a member of the English faculty. Department approval is required.
ENG-515 Salamander Internship

Prerequisites:
WRI-102 or WRI-H103

Credits:
1.00

Description:
A semester-long internship working with the Editor and Managing Editor of Salamander Literary Magazine. Students will gain experience in editing, layout, and production of one of two annual editions of Salamander.

ENG-H523 Honors Seminar in Group 3: Literary History I: Medieval to Renaissance

Prerequisites:
ENG 213, 214, 215, 216, 217 OR 218 Admission By Invitation Only

Credits:
4.00

Description:
Honors seminar that fulfills Group 3 of the English major.
- **ENG-H524 Honors Seminar in Group 4: Literary History II: 1700 - 1900, American Or British**

  Prerequisites:
  ENG-213, 214, 215, 216, 217 OR ENG 218 Admission by invitation only

  Credits:
  4.00

  Description:
  Honors seminar that fulfills Group I of the English major.

  Type:
  Honors

- **ENG-H525 Honors Seminar in Group 5 Literary History III: 1900 - Present American, British, Or World.**

  Prerequisites:
  ENG 213, 214, 215, 216, 217, or ENG 218; Invitation only

  Credits:
  4.00

  Description:
  Honors seminar that fulfills Group I of the English major.

  Type:
  Honors
• **ENG-Po99 ESL Reading/Writing II Portfolio**

  Prerequisites:

  To be taken concurrently with ENG-099

  Credits:

  0.00

  Description:

  Portfolio course for ENG-099

• **ENS-103 Introduction to Engineering**

  Prerequisites:

  ENS L103 MUST BE TAKEN CONCURRENTLY.

  Credits:

  3.00

  Description:

  This course provides exposure to engineering practice, with particular focus on electrical engineering components such as circuit elements and systems. It seeks to go beyond the mathematics and provide an intuitive appreciation of functional devices. Examples taken from a broad swath of technological history illustrate significant crossroads, decisions, and inventiveness. Emphasis is placed on learning to think as an engineer - assessment of problems, candidate solution tradeoffs, and implementations. Frequent exercises in creative engineering design will be used. Students will be required to design several elementary devices, such as a magnet, a capacitor, a timing device, and a motor, which they will enter in a competition for overall strength, compactness, accuracy, or speed. Sometimes assignments relate to "survival on an island" concerns, such as communication or drinking water. Students also learn about reverse engineering by selecting, building, troubleshooting, and presenting an electronic kit of their choice. A term paper determining the engineering behind a topic of their choice will also be written and presented. On occasion (see ENS L103) there will be team competitions between various smaller groups in the class.

  Term:

  Offered Fall Term

  Type:
• ENS-L103 Intro to Engineering Lab

Prerequisites:

Must be taken Concurrently w/ ENS-103

Credits:

1.00

Description:

The Lab is designed to provide opportunities to gain familiarity with engineering tools. Students will be introduced to parts (e.g. learn the resistor color code), test equipment (multimeters, prototyping trainers, signal generators, and oscilloscopes), and construction techniques (wiring, soldering, troubleshooting). Although it varies from year to year, Class Projects can be built during the Lab sessions. In the past these have included a 25 Watt electric generator, various door lock systems (both mechanical and electronic), and an AM transmitter and receiver (all projects made from scratch). It is likely that 2010-2011 may introduce some robotic creations for a competition. Electronic kits and motors can also be built and serviced in the Lab. There is an adjoining machine shop, which can be utilized (with supervision), for fabricating items. Individual creativity is encouraged, and informal problem solving sessions occasionally occupy lab time. However, the lab is accessible outside of the traditional scheduled time.

Term:

Offered Fall Term

Type:

SCI TECH ENGNR

• ENS-201 Engineering Mechanics

Prerequisites:

PHYS 151

Credits:

4.00

Description:
Forces, statics, and dynamics of rigid bodies, stress and strain analysis, kinematics, computer aided analysis. Focus on professional standards in practice for design of structures.

- **ENS-L202 Technical Communication**

  **Prerequisites:**
  
  WRI-102, PHYS 152 AND L152;

  **Credits:**
  
  4.00

  **Description:**
  
  Emphasis on clarity, precision, accuracy, and conciseness in scientific writing. Assignments include a team-based design-contest proposal, an oral presentation on current scientific topics, a team-based design of an experiment with a write-up and an oral presentation, a paper on engineering ethics concerning the Challenger and an instruction manual. Memo writing, summary writing, and resumes are also included.

  **Term:**
  
  Offered Fall Term

- **ENS-220 Design and Design Tools**

  **Prerequisites:**
  
  Take ENVE-104 and PHYS-151;

  **Credits:**
  
  4.00

  **Description:**
  
  This course applies design tools (AutoCAD primarily and others as necessary for specified design problems) to design problems specified by the instructor.

- **ENS-333 Programming for Engineers**
This course will introduce programming concepts in the context of solving engineering problems. Emphasis will be placed on applying the high-level programming skills learned to particular platforms such as embedded systems. Students will implement various microcontroller programming exercises as well as an end of the semester project.
An interdisciplinary course that focuses on the social science and humanities disciplines as they are related to the natural environment. Students will study texts from those disciplines to acquire a deeper understanding of the values and beliefs that underlie environmental issues. The course will also investigate the policy-making processes and institutions through which those issues are decided, and the social inequalities in the distribution of environmental problems. Texts to be studied will range from literature, philosophy and film to policy statements, impact reports, community advocacy materials, and investigative journalism.

- **ENST-301 Issues in Environmental Justice**

  **Credits:**
  
  4.00

  **Description:**
  
  Environmental justice is the fair treatment and meaningful involvement of all people regardless of race or income regarding the development, implementation, and enforcement of environmental laws, regulations, and policies. In this course, students will learn about the background of environmental justice, its basis in law, leaders in the movement, and key topics pertaining to environmental and health disparities, such as air quality, public transportation, access to healthy food, facility siting and clean-up, land use, and climate. Material will draw heavily upon local examples and readings from a wide range of fields. Students will learn about community organizing and advocacy, and how these skills can be applied to shape decision-making. We will also discuss sustainable practices that can be integrated into daily life to create healthy communities and equity. One term, 4 semester hours, normally offered once a year, no prerequisites.

- **ENST-310 The Civilian Conservation Corps and the American Landscape**

  **Prerequisites:**
  
  Class will meet for 75 minutes a week and then travel over spring break. Instructor's consent is required

  **Credits:**
  
  4.00

  **Description:**
  
  This course will focus on the history and lasting affect of the Civilian Conservation Corps (CCC) on the physical and political landscape of the United States. From 1933 to 1942 more than 3 million men served in the CCC, and this course will track the progression of their work from the planting of billions of trees to the development of recreational opportunities on federal and state lands. Over time, CCC work progressed from the conservation of natural resources to the conservation of human resources and promotion of recreation on public lands. As the CCC changed over time, so too did public opinion concerning the CCC's work and mission. This class will explore opposition to CCC projects by significant figures in America's environmental movement such as Aldo Leopold and Bob Marshall, and the resulting influence on the environmental movement in America. We will
also look at the role the CCC played in redefining conservation and creating a mainstream environmental movement. In addition, this class will consider the affect that the CCC had on New Deal politics. Finally, this class will study the lasting legacy that the CCC left on the American landscape through the development of other conservation corps programs. Students will also read first hand accounts, view films, and possibly hear directly from a CCC veteran. As a class connected with an Alternative Spring Break trip, this experiential education offering will allow students to experience and complete similar work to that completed by CCC members. During Alternative Spring Break, students will visit important CCC history sites such as the first CCC camp in the country and a major national park development project. During the course, assignments will challenge students to identify CCC sites in Massachusetts or their home states. Local site visits are a possibility for this class. Other assignments will challenge students to identify modern environmental organizations who can trace their origins to the

Type:

Expanded Classroom Requirement, Local Engagement Experience

- **ENST-315 Foundations of Environmental Education**

  **Credits:**

  4.00

  **Description:**

  This course will provide an overview of Environmental Education (EE) by looking at how EE has been defined, how the field has changed over time, and how our own connections with the environment can inform our understanding and practice of this work. Students will consider the goals of EE and the variety of approaches utilized in the field to reach those goals. Age appropriate environmental education, place-based education, and urban environmental education will also be studied.

- **ENST-321 Introduction to Permaculture**

  **Credits:**

  4.00

  **Description:**

  Permaculture is the design of food systems and social structures to provide for human needs while restoring ecosystem health. Examining the interconnections between environmental, social and economic components, Permaculture is informed by the disciplines of systems ecology, ecological design and ethno-ecology.

- **ENST-325 Environmental History of US**
This course will utilize history to explore the American environment. Through the works classical environmental texts it will explore how Americans have understood their environment. It will also look at how historians understand environmental history, how the environment has changed from precolonial to the present, and how we understand that change. By using both primary and secondary materials we will try to integrate the environmental understanding of historians with the process of historical understanding. The course will provide the opportunity to develop critical thinking skills of identifying differing understandings of an historical problem and presenting arguments from different intellectual traditions. It will also work on understanding different sources and the validity of different sources both primary and secondary. It will engage the student in identifying a research question and the appropriate primary and secondary courses of significance to that topic. It will also require the students to communicate their analysis in two extended persuasive essays and one long primary-based research paper.

ENST-401 Environmental Studies Capstone Course

Credits:

4.00

Description:

A course examining a contemporary environmental issue from various disciplinary perspectives. Using a case-study approach, students will develop a proposal to address the identified issue from the perspectives of policy, ethics, justice, science and culture. As appropriate, the proposal will be field tested, demonstrated, or presented to the local community. Possible topics include sustainable development, urban air pollution, sustainable farming, or water conservation.

ENST-402 Environmental Studies Capstone II

Credits:

4.00

Description:

A continuation of ENST 401

ENST-403 Environmental Studies Practicum
Prerequisites:

This class fulfills the Expanded Classroom Requirement. Junior standing or above required or consent of the instructor.

Credits:

4.00

Description:

This course combines a practicum placement of at least 10 hours a week for 12 weeks in a position that offered the student significant opportunity to learn about environmental problems as the basis for reflection, analysis, and skill development through appropriate reading, writing, and oral presentation assignments. Specific learning objectives will be tailored to the student's placement. Interested students should consult instructor in advance. ECR. 4 credits. Prerequisite: junior standing, limited to Environmental Studies majors and minors.

Type:

Expanded Classroom Requirement

- **ENST-420 German Greens and Environmentalism**

  Credits:

  4.00

  Description:

  The rise of the Green Party, from its grass-roots beginnings to participation in the federal government. Background on the development of green consciousness in Germany and Europe since the early 20th century. Present governmental policies and programs (e.g., alternative energy sources, organic farming, recycling, dismantling of nuclear power). Cross-listed GER 420 and GVT 420

- **ENST-450 Lobbying, Media, and Public Policy**

  Credits:

  4.00

  Description:

  As a result of new environmental and energy concerns championed by the media, politicians and the public government regulators in the US and around the world are being forced to rethink their priorities and react to these outside influences rather than rely on the process they have used for
decades. But as we shift to notions such as the precautionary principle and embrace renewable power as a solution to climate change, is this reactionary approach relying too much on what the media and others say and too little on the facts? Are government agencies equipped to analyze these issues and disagree with rising public opinion? Is this a good way to develop public policy? Through discussion and analysis, we will critically examine all sides of these and other current issues and get behind the headlines using real world examples to try to separate fact from hype. We'll also probe the roles that politicians, lobbyists, and the media have in framing the debate.

Type:
Social Science

- ENST-555 Senior Thesis

Prerequisites:

Grade point average 3.0 overall, 3.4 in major; completion of a minimum of 8 credits in courses that are part of the Environmental Studies major at Suffolk University; consent of instructor.

Credits:

4.00

Description:

Individual program of reading, research, writing on an approved topic under the supervision of a member of the Committee on Environmental Studies, for Environmental Studies majors who are candidates for honors in Environmental Studies and who wish to prepare a thesis for submission to the honors committee. Must normally be taken in the first semester of the senior year. Prerequisites: Grade point average 3.0 overall, 3.4 in major; completion of a minimum of 8 credits in courses that are part of the Environmental Studies major at Suffolk University; consent of instructor. 1 term - 4 credits. Normally offered every fall.

- ENVE-220 Design and Design Tools

Prerequisites:

ENVE-104; PHYS-151

Credits:

4.00

Description:
This course applies design tools (AutoCAD primarily and others as necessary for specified design problems) to design problems specified by the instructor.

- **ENVE-271 Air Quality and Air Pollution Control**
  - **Prerequisites:**
    - ENVE 104, MATH 166 AND PHYS 152
  - **Credits:**
    - 4.00
  - **Description:**
    - The focus of this course is on relative source contribution, regulatory standards, known health effects, and measurement techniques for criteria pollutants and specific air toxics. An emphasis on regulatory control strategies and the design of engineering controls is provided. Engineering Elective.

- **ENVE-325 Geographical Information Science**
  - **Prerequisites:**
    - Approved computer programming course or permission of instructor.
  - **Credits:**
    - 3.00
  - **Description:**
    - This course provides the fundamentals of geographic information science (GIS) including the history of automated mapping. A review of the necessary hardware and software elements used in GIS is presented. Hands-on exercises with computerized mapping software are required.

- **ENVE-L325 Geographic Information Science Lab**
  - **Prerequisites:**
    - concurrently with ENVE 325
Required companion computer laboratory to be taken concurrently with ENVE 325. Prerequisite: Approved computer programming course or permission of instructor.

**ENVE-361 Fluid Mechanics**

**Prerequisites:**

ENVE-104 AND MATH-265 AND PHYS-152

**Credits:**

4.00

**Description:**

The basic equations of fluid statics and dynamics are covered in this course. Course topics include Archimedes' principle, Bernoulli's equation, and their applications; fluid kinematics, Eulerian and Lagrangian flow descriptions, and Three-dimensional flows; Reynolds transport theorem, finite control volumes, and differential analysis and modeling; and viscous flow in pipes, flow over immersed bodies, and open channel flow.

**ENVE-365 Hydrology**

**Prerequisites:**

ENVE 104 AND MATH 166 and ENVE 361.

**Credits:**

4.00

**Description:**

The following topics are considered in this course: the hydrologic cycle, precipitation processes, soil moisture, infiltration, groundwater, rainfall-runoff processes, utilization of water resources, and frequency analysis. Engineering Elective.
ENVE-375 Heat and Thermodynamics

Prerequisites:
MATH-265 and PHYS-152

Credits:
4.00

Description:
This course covers the elements of thermodynamic systems, the laws of thermodynamics, the parameters and concepts of thermodynamic analyses (heat, work, internal energy, enthalpy, entropy, reversibility, more), and their application to ideal gases and heat engines. Topics include statistical mechanics, phase transitions, chemical equilibrium, Gibb's equation, the Nernst equation, and heterogeneous systems.

ENVE-410 Water and Wastewater Systems

Prerequisites:
Take CHEM-112; Take ENVE-226, CHEM-355, OR Chem-211; Take ENVE-361; or permission of the instructor.

Credits:
4.00

Description:
This course considers the design of water and wastewater unit operations in treatment systems. Topics include water supply, water transmission and distribution systems, drinking water treatment, wastewater collection, and wastewater treatment.

ENVE-415 Green Engineering

Prerequisites:
Take ENVE-361 and ENVE-375,CHEM 211 or ENVE 226

Credits:
4.00
This course presents the principles of green engineering and their application to process engineering, building design. Sustainable and renewable energy systems are a particular emphasis of the course. Topics include risk concepts, evaluating exposures, green chemistry, life cycle analysis, industrial ecology, and environmental sensors. Prerequisites: Organic Chemistry Option, ENVE 361, ENVE 375. CHEM 211 or ENVE 226 Engineering Electives. 1 term - 4 credits.

- **ENVE-510 Environmental Engineering Independent Study**
  
  **Cred:**
  
  1.00- 6.00
  
  **Description:**
  
  This is an independent study in environmental engineering. Topics will vary.

- **ENVS-111 Majors' Environmental Science**
  
  **Prerequisites:**
  
  Open to Environmental Science and Environmental Studies majors, or by permission of instructor. Must be taken concurrently with ENVS L111
  
  **Cred:**
  
  3.00
  
  **Description:**
  
  Applies the fundamentals of science to environmental issues. Topics include population dynamics and resources, environmental degradation, ecosystems, geologic processes, deforestation, biodiversity, climate change, air, soil, and water resource management, and pollution and risks to health. This course is open to all environmental science and environmental studies majors and minors. Other students will be admitted by permission of the instructor. Must be taken concurrently with ENVS L111. 3 hours lecture. 1 term. 3 credits. Normally offered fall evenings.
  
  **Term:**
  
  Offered Fall Term

**Type:**

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR
ENVS-L111 Majors' Environmental Science Lab

Prerequisites:

Open to Environmental Science and Environmental Studies majors, or by permission of instructor. Must be taken concurrently with ENVS 111

Credits:

1.00

Description:

Laboratory exercises are used to illustrate topics covered in ENVS 111. Field testing and analysis of environmental samples. Field trips are required. This course is required for all environmental science and environmental studies majors and minors. Concurrent enrollment in ENVS 111 is required. 3 hour laboratory. Normally offered fall.

Term:

Offered Fall Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR

ENVS-112 Majors' Environmental Science II

Credits:

3.00

Description:

Topics introduced in ENVS 111 are further developed to focus on how environmental conditions affect human, animal and ecological health. Areas may include control of environmental contaminants; public health and infectious disease control; antibiotic resistance; health issues associated with food production; contained animal feeding operations; the effects of industrialization on the environment; and the impact of disasters on environmental health. This course is open to environmental science and studies majors and minors or by permission from the instructor. 3 credits. Normally offered spring evenings. Must be taken concurrently with ENVS L112

Term:
Offered Spring Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- **ENVS-L112 Majors' Environmental Science II Lab**

  Credits:

  1.00

  Description:

  Laboratory exercises are used to illustrate topics covered ENVS 112. Exercises may include analysis of environmental samples for heavy metal contamination and evidence of sewage contamination or air samples for criteria pollutants. Field trips are required. This course is required for Environmental studies majors and minors. 1 credit Normally offered in spring semester evenings. requisite: enrollment in ENVS 112

  Term:

  Offered Spring Term

  Type:

  NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- **ENVS-436 Environmental Science Practicum**

  Prerequisites:

  This class fulfills the Expanded Classroom Requirement

  Credits:

  4.00

  Description:

  Application of the principles and techniques of environmental science to a specific environmental problem through a practicum placement of at least 10 hours per week for 12 weeks. Typically, this experience will include literature research, classroom meetings, and field work in an off-campus
ENVS-510 Independent Study

Prerequisites:
An independent study form must be submitted to the CAS Dean's Office.

Credits:
1.00- 4.00

Description:
This is an independent study in environmental studies. Topics will vary.

Term:
Offered Both Fall and Spring

FR-101 Elementary French I

Credits:
4.00

Description:
Develops reading, writing, speaking, and listening skills. Explores audio-visual and textual materials based on French and Francophone cultural themes.

Term:
Offered Fall Term
Type:
BA FOREIGN

- **FR-102 Elementary French II**

  Prerequisites:
  
  Instructor's consent

  Credits:
  
  4.00

  Description:
  
  Continues to develop reading, writing, speaking, and listening skills. Explores audio-visual and textual materials based on French and Francophone cultural themes.

  Term:
  
  Offered Spring Term

  Type:
  
  BA FOREIGN

- **FR-201 Intermediate French I**

  Prerequisites:
  
  Instructor's consent

  Credits:
  
  4.00

  Description:
Reviews grammar, practice speaking, and continues to explore authentic cultural and literary texts in this writing-intensive course. Examines short readings, films, and print media.

Term:
Offered Fall Term

Type:
BA FOREIGN

- **FR-202 Intermediate French II**

  Prerequisites:
  Take FR-201 or Instructor's consent

  Credits:
  4.00

  Description:
  Continues to review grammar, practice speaking, and explore authentic cultural and literary texts in this writing-intensive course. Examines short readings, films, and print media.

  Term:
  Offered Spring Term

  Type:
  BA FOREIGN, Diverse Perspectives

- **FR-205 The Francophone World**

  Prerequisites:
  FR 202 or Instructor's consent

  Credits:
Description:

Explores the francophone world through the study of short stories, print media, and film, by engaging with the rich textured and diverse francophone literary canon. Teaches advance notions of French grammar, write compositions, and the art of conversation related to cultural themes.

Term:

  FR 201-202 or permission of instructor
  
  Credits:
  
  4.00-8.00
  
  Description:
  
  Provides an immersion program in Vichy, France through a partnership with CAVILAM. Students are housed with families, participate in excursions and take classes that are conducted entirely in French.

  Term:
  
  Summer
  
  Type:
  
  Expanded Classroom Requirement, BA FOREIGN

- **FR-422 Sejour Linguistique au CCFS-Sorbonne**

  Prerequisites:
  
  FR 201 and FR 202 or Instructor's Consent. Can take course for 1 term for 16 credits or 2 terms for 32 credits.
  
  Credits:
Description:
Provides an immersion program in Vichy, France through a partnership with CCFS-Sorbonne, l'Universite de Paris IV. Students are housed with families, participate in excursions and take classes that are conducted entirely in French.

Term:
Offered Both Fall and Spring

Type:
Expanded Classroom Requirement, BA FOREIGN

- **FR-502 Honors Senior Thesis in French**

  Prerequisites:
  Senior Standing and permission of Dept. Chair.

  Credits:
  4.00

  Description:
  Undertakes a major research project completed under the supervision of a regular faculty member offered every fall semester.

  Term:
  Offered Fall Term

  Type:
  BA FOREIGN

- **FR-510 Independent Study**

  Prerequisites:
An independent study form must be submitted to the CAS Dean's Office.

Credits:
4.00

Description:
Pursues advanced studies in an area of particular interest under the supervision of a faculty member.

Term:
Occasional

Type:
BA FOREIGN

- **FRST-319 Marie Antoinette: What Not to Wear**
  
  Credits:
  4.00
  
  Description:
  Explores the French Enlightenment and its culture leading up to the French revolution through a focus on one significant figure: Marie-Antoinette. Examines the relationship of female image and the body politic of eighteenth-century France. Considers the legacy of Marie-Antoinette as martyr and fetish object in the nineteenth and twentieth centuries, and focuses on her continuing relevance today. Topics include: women & power; fashion and self-representation; motherhood and domesticity; and revolution and gender iconography. All work in English.

- **FRST-320 French and Francophone Cinema**
  
  Credits:
  4.00
  
  Description:
  A survey of French and Francophone cinema from the late 19th century to the early 21st century. We will explore early works from France by the Lumiere brothers and George Melies, as well as contemporary films from France and French-speaking countries, such as Algeria, Burkina Faso,
Canada, Haiti, Senegal. Class meetings will be held jointly with FR 320. All written assignments and class meetings are in English. Bi-monthly discussion sessions are in English. Normally offered alternate years. Cultural Diversity B.

- **FS-103 Introduction to Forensic Science**

  **Prerequisites:**
  
  FS-L103
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall/Spring. Does not satisfy University Natural Science requirement.

  **Term:**
  
  Offered Both Fall and Spring
  
  **Type:**
  
  SCI TECH ENGNR

- **FS-L103 Introduction to Forensic Science Lab**

  **Prerequisites:**
  
  FS 103 concurrently
  
  **Credits:**
  
  1.00
  
  **Description:**
  
  Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall/Spring.
Term:
Offered Both Fall and Spring

Type:
SCI TECH ENGNR

- **FS-303 Introduction to Forensic Science**
  
  Credits:
  3.00

  Description:
  Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall/Spring Does not satisfy University Natural Science requirement.

  Term:
  Offered Both Fall and Spring

- **FS-L303 Introduction to Forensic Science Lab**
  
  Prerequisites:
  FS 303 concurrently and instructor's permission

  Credits:
  1.00

  Description:
  Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall/Spring.
• FS-428 Criminalistics Practicum

Prerequisites:

Instructor's permission is required for registration

Credits:

1.00-4.00

Description:

The practicum involves participation in government crime laboratories, private forensic laboratories, private analytical chemical laboratories (including biomedical laboratories), a forensic science project at Suffolk University or other laboratories where the student can demonstrate that he or she can acquire skills applicable to forensic analysis. Students are encouraged to seek a practicum sponsor that suits his/her skills and interests; assistance may be provided by the Forensic Science Program faculty. However, the Forensic Science faculty member teaching FS 436 must approve any outside practicum sponsor for this course, and if a suitable outside sponsor is not found, the student will fulfill this requirement through a forensic science project at Suffolk University. Participation at the laboratories is subject to requirements of the particular laboratory and will be open only to those students approved by the Forensic Science Committee. Ten contact hours per week, or 140 hours total, a project plan, regular project reports, and a final written and oral report are required. This course replaces CHEM-428. Normally offered Fall/Spring/Summer. ECR approved.

Term:

Offered Both Fall and Spring

Type:

Expanded Classroom Requirement

• FS-429 Criminalistics Practicum II

Prerequisites:

Instructor's permission is required for registration

Credits:

1.00-4.00

  Ger-101 or instructor's permission
Continuation of skills development from 101. One language laboratory session per week.

Term:
Offered Spring Term

Type:
BA FOREIGN

**GER-201 Intermediate German I**

Prerequisites:
GER 102 or instructor's consent

Credits:
4.00

Description:
Four-skills approach (speaking, listening, reading, writing) utilizing authentic texts, recordings, and visual media. Grammar review, vocabulary expansion, and intensive practice. One language laboratory session per week.

Term:
Offered Fall Term

Type:
BA FOREIGN

**GER-202 Intermediate German II**
Prerequisites:

GER 201 or Instructor's consent

Credits:

4.00

Description:

Continuation of skills development from 201. One language laboratory session per week.

Term:

Offered Spring Term

Type:

BA FOREIGN

- GER-216 Masters of German Literature in English Translation Masterpieces

Credits:

4.00

Description:

Discussion of works by major authors from the 18th century to the present. Drama, fiction, and poetry. The specifically German contributions as related to the European context. Lessing, Goethe, Schiller, Heine, Buchner, Schnitzler, Kafka, T. Mann, Hesse, Brecht, Seghers, Grass, Boll, Wolf and/or others.

Term:

Occasional

Type:

Humanities Literature Requirement

- GER-301 German Civilization I
Prerequisites:
GER 202 or instructor consent

Credits:
4.00

Description:
A survey of civilization in the German-speaking countries from the Reformation to German unification (1871). Major figures, movements, and periods. Art, literature, music, and philosophy in the context of political and economic developments. Normally offered alternate years.

Type:
Humanities & History, Humanities Literature Requirement, BA FOREIGN

• GER-303 Advanced Conversation

Prerequisites:
GER 202, or Instructors consent

Credits:
4.00

Description:
Further development of speaking ability in various contexts (e.g., informal conversation, debate, discussion of current events in the German-speaking countries). Short texts and audio-visual materials as a basis for classroom activities.

Term:
Occasional

Type:
BA FOREIGN

• GER-304 Advanced Composition
Prerequisites:

GER 202 or consent of the instructor

Credits:

4.00

Description:

Additional training in writing German. Practice in various modes (e.g., essay, poetry, dramas, short fiction). Some translation into English. Special attention paid to grammatical points where needed.

Term:

Occasional

Type:

BA FOREIGN

• GER-306 German Cinema

Credits:

4.00

Description:

A survey of films produced in the German speaking countries from the 1920's to the present. Includes the Weimar republic, the Nazi period, postwar production from both East and West Germany, and new trends since reunification. Film esthetics and socio-historical context. All films shown in German with English subtitles.

Term:

Occasional

Type:

Humanities & History, Humanities Literature Requirement
• GER-412 Contemporary Germany

Credits:

4.00

Description:

A survey of German culture, politics, and society from the end of World War II to the present day. Discussion of such topics as the post-fascist mentality, economic efficiency, re-education, Americanization, division and its legacy, high culture, entertainment for the masses, environmental movements, pacifism, and multiculturalism. Taught in English.

Term:

Occasional

Type:

Humanities & History, Humanities Literature Requirement

• GER-419 East Germany and the Cold War

Credits:

4.00

Description:

When the German Democratic Republic was founded in 1949, observers in the West viewed it as an artificial construct created to serve the needs of the Soviet empire. The self-image of the GDR as created by its leadership revolved around the idea of an anti-fascist German state designed as a bulwark against any revival of National Socialism. Over a generation after the fall of the Berlin Wall, it is possible to undertake a dispassionate analysis of the forty-year history of the 'other' German state as manifested in its cultural identity and political role during the Cold War.

Term:

Occasional

Type:

Social Science
• GER-420 The Greens and Environmentalism

Credits:
4.00

Description:
The rise of the Green Party, from its grass-roots beginnings to participation in the federal government. Background on the development of green consciousness in Germany and Europe since the early 20th century. Present governmental policies and programs (e.g. alternative energy sources, organic farming, recycling, dismantling of nuclear power).

Term:
Offered Spring Term

Type:
Humanities & History, Humanities Literature Requirement

• GER-502 Honors Thesis

Prerequisites:
Permission of the Dept. Chair.

Credits:
4.00

Description:
A major research project completed under the supervision of a regular faculty member.

Term:
Offered Fall Term

Type:
BA FOREIGN
- GER-510 German Independent Study

  Prerequisites:
  
  An independent study form must be submitted to the CAS Dean's Office.

  Credits:
  
  4.00

  Description:
  
  Students meet with a departmental faculty member to pursue advanced studies in areas of particular interest to them.

  Type:

  BA FOREIGN

- GR-101 Elementary Ancient Greek

  Credits:
  
  4.00

  Description:
  
  An introduction to the basic syntax and vocabulary of Ancient Greek with an emphasis on reading some modified passages from genuine Ancient Greek texts as soon as possible. No background in grammar or Greek is assumed.

  Term:

  Offered Fall Term

  Type:

  BA FOREIGN

- GR-102 Ancient Greek II

  Prerequisites:
GR-101
Credits: 4.00
Description: A continuation of GR 101. During the semester we will complete our introduction to Ancient Greek and begin to read continuously a classic work of poetry, history, or philosophy in the original.
Term: Offered Spring Term
Type: BA FOREIGN

GVT-005 Summer Campaign Lab
Prerequisites: Instructor consent required
Credits: 0.00
Description:
This non-credit, two-week intensive certificate will combine in-depth training on building and running a successful campaign, with site visits to leading political strategy and non-profit agencies. Students will broaden their network meeting leaders in government, public policy, and non-profits by participating in evening speaker series and networking events. Evening teamwork will culminate in a final campaign plan to be presented on the final day of the program.

GVT-110 Introduction to American Democracy
Credits: 4.00
An introduction to the American political system and constitutional framework. Focus will be on the interplay of various institutions (the Presidency, Congress and the Judiciary) in creating public policies. Contemporary public issues will be discussed, as will the role of political theory in shaping American democracy. Attention will be given to the role of the news media, public opinion, political ideology, political parties and interest groups in the American system.

Type:
Social Science, BSJ SOCIAL SCIENCE

- **GVT-H110 Honors Intro to American Democracy**

  Credits:
  4.00

  Description:
  Special honors section of GVT 110. Offered every fall.

  Type:
  Social Science, BSJ SOCIAL SCIENCE, Honors

- **GVT-115 Evolution of the Global System**

  Credits:
  4.00

  Description:
  The goal of this course is to introduce the student to the main actors, social facts and processes that shaped the international system in the nineteenth and twentieth centuries. By analyzing the spread of industrialization, the race for colonies, the thrust of imperialism, and the rapid growth of nationalism, among other factors, this course explains the contradictory and simultaneous trends of unprecedented levels of prosperity and violence in Europe and beyond. While the course examines the role of the United States in the international system, particularly in light of its dominant role since the early twentieth century, it also emphasizes the developments taking place in other regions such as Asia, Africa and Latin America. This will allow students to understand the global arena as a space of complex interconnections involving varieties of forms of production, national political cultures and idiosyncratic traditions. This course sets the foundations for other courses in International Relations and Regional Studies.
• **GVT-120 Research Methods**

  **Credits:**
  4.00

  **Description:**

  Students will learn how to read and analyze political science research. Focus will be on the use of the scientific method for research on politics and government. Students will learn how to effectively access information for research in political science and learn the steps in writing a research paper, including developing the research question, writing a literature review, selecting a research design, and how to properly cite sources. Students will develop an understanding of approaches to researching and measuring political phenomena.

• **GVT-H120 Honors Research Methods**

  **Credits:**
  4.00

  **Description:**

  A special honors section of Research Methods. Students will be introduced to the subfields of political science and learn to analyze political writings. Focus will be on the use of the scientific method for research on politics and government. Students will learn the steps in writing a research paper, including developing the research question and selecting a research design. Attention will be given to the use of statistical analysis and public opinion polling in political research.

• **GVT-201 Statistics for Political Science**
Prerequisites:
Sophomore Standing GVT 110 and 120 and Math 128 or higher.

Credits:
4.00

Description:
This course is an introduction to statistics and empirical research methods generally used in political science. The course will emphasize the use of statistics and its value in substantive political science research. Statistics is a tool for drawing conclusions and making inferences from observable evidence. As well, the specification of conditions under which evidence is observed affects the conclusions and arguments that political scientists draw about how social and political processes work. The purpose of this course is to equip students with tools to interpret and conduct original data analysis, critique and make an argument based on data, and provide a view into the process of political science research and how political scientists use statistical methods and research design to answer substantive questions about politics. Since most applied data analysis utilizes data management software, students will learn how to use SPSS as a tool for conducting data analysis. Prerequisites: Sophomore Standing, GVT 110 and 120 and Math 130 or instructor's consent. 1 term - 4 credits.

Type:
Quantitative Reasoning

- GVT-204 Women in American Politics

Credits:
4.00

Description:
An examination of women's place in the Constitution; policy concerns; and political participation. Attention will be given to women's societal roles and attitudes towards women of different classes and races and the ways in which these roles and attitudes influence women's political participation. Attention will also be given to the theories and perspectives of the current women's movement as they influence policy considerations. Cultural Diversity A

Type:
Cultural Diversity Opt A, Social Science, BSJ SOCIAL SCIENCE, BSBA SOCIAL CHANGE
• GVT-208 Politics / Religion

Credits:
4.00

Description:
This course explores what major religions say about the status and responsibilities of the state and how, in turn, selective states have, in theory and practice, structured the place of religions in political life. Particular attention is given to issues of politics and religion in the United States. Cultural Diversity A

Type:
Cultural Diversity Opt A, Social Science, BSJ SOCIAL SCIENCE, Diverse Perspectives

• GVT-223 American Politics & Institutions

Prerequisites:
GVT 110 or GVT 120 or instructor's permission

Credits:
4.00

Description:
This course will provide an examination of the institutions that are involved in the American policy-making process. The student will learn about the presidential, (as opposed to the parliamentary) system that exists in the United States. The course will focus on a relationship between the President and Congress and how that relationship impedes or facilitates the public policy process, including the budgetary process. The course will include a discussion of the president's role as head of the executive branch, and the implementation of congressional policies. Attention will be given to the role of the judiciary in the policy process. Normally offered every year.

Type:
Social Science, BSJ SOCIAL SCIENCE

• GVT-224 Introduction to Public Policy
Prerequisites:

GVT 110 and GVT 120 or instructor's permission

Credits:

4.00

Description:

An introduction to the process by which public policies are made in the United States. The class will focus on agenda-setting and policy formulation at the federal level, and will include a discussion of the various actors in governmental institutions that impact public policy. Several policy issues will be used as examples to illustrate the process. Some comparisons will be made to state and local policymaking. Normally offered every year.

Type:

Social Science, BSJ SOCIAL SCIENCE

- **GVT-225 U.S. Constitutional Law & Civil Liberties**

  Credits:

  4.00

  Description:

  This course examines a range of contemporary issues introducing students to the U.S. Constitution and the fundamental concepts of constitutional law. Students discuss and analyze topics including separation of powers, federalism, freedom of speech, the death penalty, gun control, and civil rights. We will explore current constitutional challenges and their relationship to law and society.

  Type:

  BSJ SOCIAL SCIENCE, Social Science

- **GVT-243 American Constitutional Law**

  Prerequisites:

  not open to freshmen

  Credits:
4.00

Description:

The growth of Constitutional law and the role of the Supreme Court is examined by analysis of court decisions dealing with Judicial Review, Federalism, Presidential and Congressional powers. Normally offered every year.

Type:

Social Science, BSJ SOCIAL SCIENCE

- GVT-244 Civil Liberties

Prerequisites:

Not open to Freshmen

Credits:

4.00

Description:

Analysis of Supreme Court decisions in regard to political and civil rights including freedom of speech, press, assembly and religion, obscenity, race and sex discrimination, and criminal procedure. Normally offered every year.

Type:

Social Science, BSJ SOCIAL SCIENCE

- GVT-245 Courts, Public Policy, and Legal Research

Credits:

4.00

Description:

This course examines the public policy-making role of the court system and examines questions such as whether and how courts can spur political and social reform. The direct and secondary effects of key court decisions will be examined. Case studies may focus on issues like civil rights and pro-choice court cases and political activism. The course will also examine the basics of policy-related legal research.
• GVT-247 Intellectual Property- Authors, Investors, & Brands

Prerequisites:
GPA at least 3.3

Credits:
4.00

Description:

Are Neanderthal genes patentable? May a fan write Harry Potter 8? Could Amazon.com shut down Amazon Books, a women's bookstore? Is there copyright in a student's class paper? Why does so much copyrighted stuff stay up on YouTube? Can a video game company own its employees' ideas? This friendly, interactive introduction to intellectual property gives the lay of the land, covering the fundamental pillars of copyrights, patents, trademarks, and trade secret, and more far-reaching topics like international and internet intellectual property, and indigenous people and IP. The course is open to all majors, because it is relevant to anyone who deals with creative works, inventions, discoveries, or business. This undergraduate course will be taught at the Suffolk Law School by a member of its faculty. To register students must have a GPA of 3.3 or permission of the instructor. There will be several quizzes and a final exam.

Type:
Arts Admin Minor Elective

• GVT-253 State and Local Government

Prerequisites:
GVT 110/120 OR INSTRUCTOR'S CONSENT

Credits:
4.00

Description:
The development, structure and functions of state governments with emphasis on the government of Massachusetts; the various forms of local government in cities and towns; analysis of the relationships between local, state and federal governments. Normally offered alternate years.

Type:

Social Science, BSJ SOCIAL SCIENCE

- **GVT-261 Theory & Practice of International Relations**

  Prerequisites:

  GVT 110, and GVT 120 or consent of instructor.

  Credits:

  4.00

  Description:

  Review of major approaches to the study of international relations. Definition of concepts such as power, nationalism, imperialism, and dependency. Special attention to the use of force and conflict resolution. Special class project. Normally offered every year.

  Type:

  Social Science

- **GVT-H261 Honors Theory & Practical International Relations**

  Prerequisites:

  GVT 110, and GVT 120 or consent of instructor.

  Credits:

  4.00

  Description:

  Review of major approaches to the study of international relations. Definition of concepts such as power, nationalism, imperialism, and dependency. Special attention to the use of force and conflict resolution. Special class project. Normally offered every year.
- **GVT-275 Ancient & Medieval Political Theory**

  **Credits:**  
  4.00  

  **Description:**  
  This course examines the political ideas of major thinkers of Western civilization, beginning with the ancient Greek philosophers and continuing through the 14th Century. Theorists studied (in English translation) include, among others, Plato, Aristotle, Thucydides, Cicero, Augustine, Thomas Aquinas, and Christine de Pizan. One term, 4 semester hours.

- **GVT-276 Modern Political Theory**

  **Prerequisites:**  
  Sophomore standing  

  **Credits:**  
  4.00  

  **Description:**  
  This course examines the political ideas of the major thinkers of Western civilization from the time of Machiavelli to the present. Theorists studied (in English translation) include, among others, Machiavelli, Bodin, Hobbes, Locke, Rousseau, Kant, Mill, Marx, Wollstonecraft, Beauvoir, and Dewey. One term, 4 semester hours. No Prerequisites.
• GVT-278 Literature & Politics

Credits:
4.00

Description:
This course will examine novels with an expressed political theme introduced by the author. The theme may be either a central part of the plot, or secondary to the main plot. The class will focus on American as well as foreign works. The class is open to non-majors. Normally offered alternate years.

Type:
Social Science, BSJ SOCIAL SCIENCE

• GVT-279 Minority Politics in the United States

Prerequisites:
Sophomore Status Required

Credits:
4.00

Description:
This course is designed to provide an intensive survey of minority politics in the political development of the United States. We will focus on the historical and contemporary experiences of several groups in American politics. In particular, the course will look at four groups that, for reasons of race, have been subjected to systematic discrimination and political subordination in U.S. history: American Indians, African Americans, Latino Americans, and Asian/Pacific Americans. In this course we will work toward an understanding of American politics from the point of view of politically active and engaged persons of color. This course will also take a close look at the future of race and ethnicity in American politics. It is a fundamental premise of this course that an understanding of race and minority politics is necessary to comprehensively understand American political development and many important issues in contemporary American politics. Type:
Cultural Diversity Opt A, Social Science, BSJ SOCIAL SCIENCE
• GVT-281 Intro to Comparative Politics

Prerequisites:

GVT 110 and GVT 120 or consent of instructor.

Credits:

4.00

Description:

This course examines various methods of comparing political systems. Institutions such as executive departments, legislatures, court systems and local governmental systems are examined comparatively. It includes analysis of the impact of different economic systems on political/governmental institutions, and on economic circumstances that impact government. It also looks at political socialization both in terms of process and comparative content. An effort is made to include countries from all regions of the world. Normally offered every year.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-H281 Honors Intro to Comparative Politics

Prerequisites:

• GVT-283 Challenges to Development in the Global South

Credits:
4.00

Description:
Theories dealing with the process of political change in countries of the Third World: the impact of the military, traditional culture and institutions, economic problems, strong personalities and other factors on political life and institutions. Prerequisite: Not open to freshmen. 1 term - 4 credits. Normally offered alternate years. Cultural Diversity B

Type:
Cultural Diversity Opt B, Social Science

• GVT-284 Intro to Peace & Conflict: Horn of Africa & International Security

Credits:
4.00

Description:
This course analyzes both ongoing and potential conflicts as well as conflict fault-lines in the Horn of Africa region and their implication to International Security. It inquires into the nature of regional conflicts and security complexes and explores ways of resolving them in a peaceful manner. In so doing, it examines such international security threats as state failure, Islamic terrorism, and piracy in the light of the dynamics and evolution of the debates on International Security as well as the transformations in the main global, continental, and regional security institutions such as UN, AU, and IGAD. Based upon International Relations perspectives, it analyzes the traditional definitions of security at the national, regional and international levels of analysis since 1945. Likewise, it studies how states and international institutions have revisited the concepts, policies and strategies of security in the post Cold War and post 9/11 world, from realist perspectives to the Copenhagen School of security studies.

Type:
Social Science

• GVT-306 Women & Public Policy

Credits:
This hybrid course will examine the political leadership and influence of women within political institutions and on public policy. The course is divided into two parts: Part 1 will examine women in politics, with particular attention given to the intersectional realities of race, class, gender identity, and ideological orientation. Specific policy areas, including reproductive choice, housing, pay equity, and domestic relations, will be discussed in Part 2. Prerequisite: Open to non-majors; not open to freshmen. Normally offered alternate years. Cultural Diversity A

- **GVT-307 Globalization of Gender Politics**
  
  **Prerequisites:**
  
  Not open to freshmen

  **Credits:**
  
  4.00

  **Description:**
  
  This course examines the interaction between gender and globalization. It discusses the centrality of gender in international development by focusing on gender as one of the most critical factors that affect the success or the failure of globalization. Critically reviewing general theories of globalization, the course presents a historical overview of gender and development. It then explores selected topics: global restructuring and feminization of the labor force, gender in multinational corporations, gender and international migration, sex-tourism, AIDS, and the impact of the state, religion, and culture in creating social dislocations and inequalities. Finally, we will consider strategies of change and diverse forms of resistance by women. Offered as needed. Cultural Diversity B

  **Type:**
  
  Social Science,Cultural Diversity Opt B,BSJ SOCIAL SCIENCE

- **GVT-308 International Security**
  
  **Prerequisites:**
GVT 281 and GVT 261

Credits:
4.00

Description:
This course examines the dynamic evolution of the debates on International Security as well as the transformations in the main global and regional security institutions such as UN and NATO. Based upon International Relations perspectives, it analyzes the traditional definitions of security at the national, regional and international levels of analysis since 1945. Likewise, it studies how states and international institutions have revisited the concepts, policies and strategies of security since the end of the Cold War and after the September 11 events, from realist perspectives to the Copenhagen School of security studies. Offered every year.

Type:
Social Science

- GVT-310 Global Political Economy

Prerequisites:
GVT 281 and GVT 261 or instructors consent

Credits:
4.00

Description:
This course explores the main premises and approaches to study Global Political Economy. After analyzing the history and development of the international system, it studies how states and markets are interconnected in the creation and reform of economic and political international institutions in the globalization process. It also focuses on the most acute problems of the current international system in the area of IPE, namely, environmental degradation, external debt, poverty, increasing gap between rich and poor countries, and trade conflicts. Offered every year.

Type:
Social Science

- GVT-311 Politics of the Arab-Israeli Conflict
Prerequisites:
Open to Juniors and Seniors

Credits:
4.00

Description:
An analysis of the origins and the local, regional, and international dimensions of the Palestinian-Israeli-Arab conflict, this course will examine the conflict through the eyes of the major protagonists and the roles played by them from the early twentieth century to the present: Zionists/Israelis, Palestinians and other Arabs, British, Americans, Soviets. We will also explore the questions of why this conflict has captured the world's attention and why it has gone unresolved since World War II. Finally, we will examine the possibilities and attempts for resolution of what appears to be an intractable human tragedy.

Type:
Social Science

• GVT-314 Media, Chaos, and Culture That Changed America

Credits:
4.00

Description:
The overall goal of this course is to understand why 1968 is considered one of the most tumultuous years in the 20th century as regards the news media; music and theater; television and film censorship; and in the shift in culture and mores of an entire subset of the population. The course will focus on specific touchstones that elucidate the communication to both the mainstream public, know broadly as the Silent Majority, and the new emerging 'boomers', whose values and attitudes still drive the media ten years into the 21st century. Students will learn how a single year of media can change forever how one part of a culture views itself, while at the same time discovering how another part of that same culture continues to resist those changes 40 years later. Students will learn how many of the seeds of ideas they take for granted in 2011, including educational and sports equality (Title 9) for women; environmental sensitivity, and gay rights were planted in the print, films and music of 1968, but didn't bloom until the years which followed. Guest speakers, films and lectures will be used to reinforce material from the texts.

Type:
BSJ SOCIAL SCIENCE, Social Science
• GVT-323 Political Survey Research

Prerequisites:

OPEN TO JUNIORS & SENIORS

Credits:

4.00

Description:

Everything needed to design, carry out, and interpret a political survey. Topics covered will include questionnaire design, sampling, interviewing, coding data, and univariate and bivariate analysis of the results. Multivariate analysis will be discussed but not studied in-depth. An actual survey will be conducted as a class project. Normally offered every year.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-334 Law, Food, Tobacco, Politics & Corporations

Credits:

4.00

Description:

Corporations, which are one of the dominant institutions of the early 21st century, are driven not by the public good, but by the profit motive. Decisions made by two industries dominated by corporations, the food industry and the tobacco industry, have a tremendous negative impact on America's public health. What, if anything, can be done to counteract the harm caused by Fast Food & Big Tobacco?

• GVT-335 Law, Politics and Public Health

Credits:

4.00

Description:
Law is one of the primary tools used to protect public health in the United States. This course will use various case studies (tobacco industry, food industry, health care policy, etc.) to explore innovative uses of the law in diverse areas related to public health. Students will learn about the ways in which attorneys, public officials, politicians, and public health practitioners work together to make public health policy. Normally offered alternate years.

Type:
Social Science, BSJ SOCIAL SCIENCE

- **GVT-337 Public Policy & Business**

  Prerequisites:

  Not open to freshmen

  Credits:

  4.00

  Description:

  Public policy-makers' interests in formulating and implementing policy in the areas of environmental protection, consumer protection, equal employment opportunity, health care, taxation and competition with a focus on business responsibility will be critically analyzed. Costs and benefits to the public and business will be evaluated. Prerequisite: Open to non-majors; not open to freshmen. Normally offered alternate years.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-339 Community Advocacy**

  Prerequisites:

  GVT 110 OR GVT 120

  Credits:

  4.00

  Description:
This course represents a unique opportunity for students to develop a general understanding of the relationship between politics and the community; a systematic and holistic way of viewing and analyzing the impact of community-based, community-wide organizations and efforts. Normally offered alternate years.

Type:

Social Science, BSJ SOCIAL SCIENCE

- **GVT-340 Moot Court**

  Credits:
  
  4.00

  Description:

  Moot Court consists of simulated arguments in front of the Supreme Court of the United States. Students brief approximately 20 Supreme Court cases and apply them to a hypothetical case before the Court. Students form written and oral arguments based on two constitutional questions in the hypothetical. Two person teams will develop legal oral arguments in favor of their clients. Students learn how to compose written briefs, develop a knowledge of case law, learn how to effectively respond to questioning, and develop forensic skills, and courtroom demeanor. Moot Court is a great preparation course for undergraduate students planning to attend law school.

  Type:

  Social Science

- **GVT-343 State Court Process & Policy**

  Prerequisites:

  Junior status or above

  Credits:

  4.00

  Description:

  Contemporary state court processes, progress and problems including trial and appellate court practice, procedure and participants; plea bargaining, alternative dispute resolution; policy making. Normally offered alternate years.
• **GVT-345 Public Policy Writing**

  **Credits:**
  4.00

  **Description:**
  This course provides an introduction to the importance of written communication in the public discourse and in public decision-making. The course will examine some of the tools for producing relevant, useful material in the professional public policy analysis arena. The course will also study the various kinds of written communication the policy makers and advocates regularly utilize. The course also provides an introduction to the constraints that surround effective communication in public policymaking. Students will engage in drafting several different kinds of public policy analyses.

• **GVT-347 Legislative Politics**

  **Prerequisites:**
  GVT 110 and GVT 120 or instructor's consent

  **Credits:**
  4.00

  **Description:**
  The structure and functioning of legislatures. Particular emphasis on the U.S. Congress, how it works and how it compares with other legislatures. The role of legislatures in a democracy. Normally offered alternate years.
• GVT-355 American Parties & Politics

Prerequisites:

GVT 110 AND GVT 120, or instructor's consent

Credits:

4.00

Description:

Historical overview of party development in the U.S. and of ideological and political trends as reflected in voting behavior. Recent developments in party structure, electoral strategies and political style. The party crisis vs. the art of political campaigning. Normally offered alternate years.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-357 Power & Politics in America's Cities

Prerequisites:

GVT 110/120 OR INSTRUCTOR'S PERMISSION Junior status or above

Credits:

4.00

Description:

This online course is uniquely designed to examine the power dynamics and struggles that characterize the urban political landscape. Mayor leadership and corruption, community engagement and apathy, and resource and public service expansion and retraction will be critically examined as key elements that can help some cities grow and hasten the decline of others. Within an online environment we will study the dynamic cities of New York City, Chicago, Atlanta, Boston, Cleveland, Detroit, and New Orleans. Additionally, we will examine broader trends that emerge from and examination of cities by size and region.

Type:

Social Science, BSJ SOCIAL SCIENCE
• GVT-359 Hockey, International Development & Politics

Credits:
4.00

Description:
This class examines the way in which national identity, global and regional economics and international development intersect. It uses the professionalization of the sport of hockey and its subsequent spread around the globe as its case. It will look at the rise of the pro game, the way in which it shapes national identity in the Canadian case, the way in which the pro business model has changed in response to broad socio-economic changes in North America and geo-political shifts around the globe, especially in Eastern Europe and the Former Soviet Union.

Type:
Social Science, Diverse Perspectives

• GVT-360 Elections and Voting

Credits:
4.00

Description:
How are elections administered in the United States? Do Americans have confidence in the electoral process? Should they? Why or why not? This course will examine elections in the United States in detail -- from how they are funded to how they are administered to how voters behave. Students will have a choice of either serving as poll workers during the November election or organizing and conducting research of potential voters. Students will gain hands-on experience in actual research design, election administration, and non-partisan get-out-the-vote activities. In addition, students will gain a deeper understanding of the relationship between attitudes, opinion, and voting behavior in American politics and institutions. ECR

Type:
Humanities & History, Social Science, BSJ SOCIAL SCIENCE, Diverse Perspectives

• GVT-361 Voting Rights and Election Law

Credits:
4.00
How do laws governing the political process affect and impact political power relationships? This course investigates topics including redistricting, the right to vote, voter turnout and mobilization, election administration, the Voting Rights Act, and political parties. Students will have a choice of either serving as poll workers during the November election or organizing and conducting research of potential voters. Students will gain hands-on experience in actual research design, election administration, and non-partisan get-out-the-vote activities. In addition, students will gain a deeper understanding of the relationship between attitudes, opinion, and voting behavior in American politics and institutions.

- **GVT-363 American Foreign Policy**

  **Prerequisites:**
  
  GVT 281 and GVT 261

  **Credits:**
  
  4.00

  **Description:**
  
  A decision-making approach to understanding the domestic and institutional context of U.S. foreign policy. Includes analysis of continuity and change since WWII using case studies of critical decisions, e.g., Korea, Cuba, Vietnam, etc. Not open to freshmen. Prerequisites: GVT 110, GVT 120, GVT 261 or instructor's consent. 1 term - 4 credits. Normally offered every year.

  **Type:**
  
  Social Science, BSJ SOCIAL SCIENCE

- **GVT-365 IP & Public Domain: Intro to Law & Policy**

  **Prerequisites:**
  
  54 credits earned and GPA of 3.3 or higher

  **Credits:**
  
  4.00

  **Description:**
  
  [Text for description not provided in this excerpt]
This introduction to legal study explores law as it is practiced (the law on the books and their application) and as it is experienced in society by everyday people, clients and citizens. The goal of this course will be two-fold: (1) to introduce undergraduate students to the study of law as it is taught in law school, with an emphasis on reading cases, making arguments as lawyers do, and learning about the intersection of legal application and policymaking; and (2) study intellectual property law (e.g., copyright, patent, trademark and trade secrets) as they have evolved over the 20th century with an emphasis on the importance of the public domain in the digital age. The course will be team taught by professors from the law school.

Type:

Arts Admin Minor Elective

- **GVT-367 Politics of Spain**
  
  Credits:
  
  4.00
  
  Description:
  
  This course is designed to provide students with a basic grounding in political institutions and processes in contemporary Spain. Political developments are presented in their socio-economic context, with special emphasis on the Spanish transition from a dictatorship to a democracy. Attention is also given to the issue of the Basque and Catalan nationalism, as well as the process of European integration. Prerequisite: GVT 281 or instructor's consent. 1 term - 4 credits. Normally offered alternate years at the Madrid Campus.

• **GVT-372 Coastal Zone Management**

  **Prerequisites:**
  Instructor's Consent

  **Credits:**
  4.00

  **Description:**
  This course presents a survey of a coastal environment, its physical characteristics, natural systems, economic uses, and development pressures. Lectures examine strategies formulated in the U.S. for land and water resource management in the coastal zone. The roles of federal, state and local government, environmental groups and resource users are also explored. Finally, by comparing coastal zone management problems in the U.S. to those elsewhere in the world, students gain a global perspective. Normally offered every years. The course available through the Marine Studies Consortium and will be taught on the campus of one of the Consortium's member institutions.

  Social Science, BSJ SOCIAL SCIENCE

• **GVT-381 The Politics of the Republic of Ireland And the United Kingdom**

  **Credits:**
  4.00

  **Description:**
  This class will examine the political systems of the Republic of Ireland and the United Kingdom. It will look at the development of the Republic of Ireland from 1916 until the present paying particular attention to the role that the Irish Government has played in fostering economic development and social stability. It will further look at the country's relationships with the European Union and United States of America. The class will present Northern Ireland and the efforts to resolve the troubles there in as the nexus between these foreign relations, domestic politics in both countries and the relationship between the two of them. A key part of the class will be examining the way in which the British political system functions and is organized,
paying particular attention to the multicultural and devolutionary policies that the UK government has enacted in the recent past. The impact that these changes in policy have had in resolving the conflict in Northern Ireland will be examined in depth.

- **GVT-382 Crisis and Integration in Europe**

  **Prerequisites:**
  
  Junior status or above

  **Credits:**
  
  4.00

  **Description:**
  
  Why did 17 European countries surrender the sovereign control of their currency and create the Euro? Will Turkey become a member of the European Union? Will Europeans continue free riding the security protection of the United States? Is the integration process another layer of bureaucracy or an institutional instrument to deal with the permanent crises in Europe? There are some of the questions guiding the discussions in the class.

  **Type:**
  
  Social Science

- **GVT-383 African Politics**

  **Prerequisites:**
  
  GVT 110 and GVT 120

  **Credits:**
  
  4.00

  **Description:**
  
  The political development of Africa in colonial and post-colonial periods. Analysis of the evolution of governmental institutions includes economic, social and personal factors; political forces at work in present day Africa. Not open to freshmen. Normally offered alternate years. Cultural Diversity B

  **Type:**
  
  Cultural Diversity Opt B, Social Science
• GVT-384 The U.S. and the International Relations of the Middle East

Credits:
4.00

Description:
This course will explore the role played by the United States in the Middle East in the twentieth century, with emphasis on the period since World War II. Our study will begin with a decision-making approach to understanding the domestic and institutional context of America's policy toward the region, followed by an examination of that policy as it confronted radical nationalist, socialist, and Islamic movements, Soviet influence, and specific contemporary problems - the Arab-Israeli conflict, the Lebanese civil war, the Iranian revolution, the Iran-Iraq War, and the Gulf War. Open to non-majors, not open to freshmen. Normally offered alternate years.

Type:
Social Science, BSJ SOCIAL SCIENCE

• GVT-385 South Asian Politics

Prerequisites:
Not open to freshmen.

Credits:
4.00

Description:
The main goal of the course is to provide an overview of the main political, economic, and social processes taking place in this region. This course explains the strategies that the eight South Asian countries are implementing in order to deal with the globalization process. The primary focus of the course will be to provide students with the understanding of the main regional trends, but it also has case studies of some of the political systems in the region. Students will analyze and evaluate the concepts learned in basic courses in international relations, political science, and other disciplines in social sciences as they apply to South Asia. Normally offered alternate years.

Type:
Social Science
• GVT-387 Conflict & Development in Asia Service Abroad

Prerequisites:

GVT 281 or instructor's consent. Junior status or above

Credits:

4.00

Description:

current political trends in the Caribbean and in selected Central American nations. Emphasis will be placed on comparative analysis of public policies in the region, as well as on external factors which impact on politics in the Caribbean and Central America. Students will use academic sources in their analysis, as well as novels and other literary sources for the background of their analysis. Not open to freshmen. Normally offered every third year. Cultural Diversity B

Type:

• GVT-389 Politics of China

Prerequisites:

Junior status or above

Credits:

4.00

Description:

Emphasis on a particular approach to the problems of economic modernization and political development. Historical background; the revolutionary movement; present political structures and current issues. Cultural Diversity B

Type:

Cultural Diversity Opt B, Social Science, Asian Studies

• GVT-390 Global Politics of Resistance
Utilizing the theoretical frameworks of Comparative Politics and International Relations, this course will focus on a critical analysis of contemporary forms of resistance politics, such as those culminating in popular struggles for peace, democracy, human rights, economic justice, gender equality, environment, and the rights of indigenous peoples.

Type:
Social Science

- **GVT-391 Canada: Multicultural Politics**

  Prerequisites:

  GVT 110/120 or Instructor's permission

  Credits:

  4.00

  Description:

  This course examines the Canadian model of incorporating diverse communities into its constitutional and political framework, including the founding British North American Act of 1867, the 1982 Constitution Act, and two later attempts at constitutional reform. Canada's role in balancing two official languages, English and French, is discussed, as is its recognition of a First Nations native-governed territory in the Arctic. This course introduces students to the Canadian polity and compares its parliamentary system with the U.S. separation of powers system. Prerequisites: GVT 110, GVT 120 or instructor's consent. Normally offered alternate years. Cultural Diversity B

  Type:

  Cultural Diversity Opt B, Social Science, BSJ SOCIAL SCIENCE, Diverse Perspectives

- **GVT-393 Latin American Politics Today**

  Prerequisites:

  GVT 281 or instructor consent
This course examines the evolution of Latin America in the context of globalization. The first part analyzes the main political and economic trends of Latin America as a region, while the second presents the main challenges Mexico is facing today in the area of security. The third part moves forward into the detailed explanation of the transformations of the largest South American countries such as Colombia, Argentina, Chile and Venezuela, among others. The final section looks at the relationship between Latin America and the United States.

Type:
Cultural Diversity Opt B,Social Science

- **GVT-398 Terrorism and Extremism in South and Central Asia**

  Prerequisites:
  Junior status or above

  Credits:
  4.00

  Description:
  This course discusses terrorism and extremism in South and Central Asia as forms of political violence and its effects on the security of the region and the world. Students will develop a working definition of terrorism and extremism and analyze tenets of states security policies. They will study the history of origin, political, economic and social causes of terrorism, the nature of Islamist terrorist organizations, their strategic goals, motivations, and the threats they pose to peace and development from the point of view of international relations and comparative politics. On the base of case studies and class discussions, students examine theories and instances of ideological, religious, and political extremism as a foundation for terrorism. Through thorough investigation of different cases students will acquire unique knowledge of the Al-Qaeda threat in Pakistan, Afghanistan and Central Asia, as well as activities of groups as the Islamic Movement of Uzbekistan, Lashkar-e-Taiba and others.

  Type:
  Social Science

- **GVT-399 Ethnic Conflict, National Bldg. & International Intervention**
Prerequisites:
SOPH STANDING REQUIRED

Credits:
4.00

Description:
The course focuses on the role of ethnic conflict and international intervention in nation building in the post-Cold War period. To understand fully these forces, theories such as colonialism, neo- and post-colonialism, and humanitarian intervention, along with social/economic conditions will be examined. Different case studies will be selected each time the course is offered. Open to non-majors.

Type:
Social Science,BSJ SOCIAL SCIENCE

- **GVT-401 Political Marketing**

  Prerequisites:
  Junior status or above

  Credits:
  4.00

  Description:
  This class will examine the techniques used to market political candidates, parties, issues, interest groups and think tanks in the modern American polity, as well as in Canada and the EU. The class will examine the causes and impact of the change that many observers have seen in the American polity from a civil to a consumptive political culture and question the extent to which this is a U.S. based versus more global phenomenon. At the same time, the class will aim to provide the student will a hands-on understanding of the way in which various marketing techniques are employed to sell politics. The techniques will include message development, branding, micro-targeting, and political marketing campaign strategy by looking at a series of cases from around the world. Cases examined will include the Barack Obama, Hillary Clinton and John McCain campaigns from 2008, the effort to brand the Conservative Party and New Labour in the United Kingdom.

  Type:
  Social Science,BSJ SOCIAL SCIENCE
• GVT-404 International Political Marketing

Prerequisites:
At least 84 credits required.

Credits:
4.00

Description:
This class will examine the ways in which political marketing is conducted across the globe. It will look at a variety of political systems and cultures in an effort to discern which techniques work best with which political systems and political cultures. The cases will be drawn from all 7 continents and a wide diversity of socio-political cultures. Cases are likely to include Canada, New Zealand, India, Japan, Ireland, the United Kingdom, Argentina, Russia and many others. By the end of the class, students should have a strong sense of how political marketing is done globally and which techniques work best with which systems.

• GVT-410 Politics of Korea

Credits:
4.00

Description:
Study of the government and politics of North and South Korea, including the political systems of the two countries and relationship between them, including issues of reunification, nuclear weapons, and democratization. Offered alternate years.

Type:

Social Science, Asian Studies

• GVT-411 Politics of North and South East Asia

Credits:
4.00

Description:
This course examines the cultural background and political systems mainly of China, Korea and Japan, also touching upon the small tiger states in South-East Asia. It elucidates the historical origins, evolution and current trajectory of these states with a particular concentration on North Korea. One further concentration is the interplay of domestic and foreign policy in the relations of these states, regional stability and cooperation. Topics include history, social structure, the interplay of culture and ideology, political economy, humanitarian issues, security, and the politics of North Korean domestic and foreign policy. We will spend considerable time analyzing China's and North Korea's relationship with regional and world powers and examining the origins, history, and implications of the North Korean nuclear weapons program. Students will be expected to demonstrate the ability to apply theoretical and historical knowledge toward analyzing the rapidly evolving landscape of contemporary issues related to East Asia.

Type:
Social Science, Asian Studies

- **GVT-420 German Greens and Environmentalism**

  Credits:

  4.00

  Description:

  The rise of the Green Party, from its grass-roots beginnings to participation in the federal government. Background on the development of green consciousness in Germany and Europe since the early 20th century. Present governmental policies and programs (e.g., alternative energy sources, organic farming, recycling, dismantling of nuclear power). Cross-listed GER 420 and ENST 420

  Type:

  Social Science, BSBA SOCIAL CHANGE

- **GVT-428 Congressional Parties, Leadership, & Public Policy**

  Prerequisites:

  Junior status or above

  Credits:

  4.00

  Description:
This course focuses on the Congressional leadership, parties in Congress and their impact on political interactions, and public policy. The course will examine the relationship between the leadership in the Congress and the powerful elements in the House and Senate such as committee chairmen and the party caucuses as well as the media and lobbyists. Emphasis is on the decades long trend toward greater political polarization and its impact on the ability of the institution to respond effectively current national problems.

Type:
Social Science

- **GVT-434 Immigration Policy and Politics**

  Credits:

  4.00

  Description:

  This course examines how American governmental institutions, political actors, and processes have both shaped and responded to one of the most significant and complex issues of public policy facing the nation: immigration to the United States. This class will explore a number of intriguing and difficult policy topics related to the almost unprecedented level of immigration that the U.S. has been experiencing. The focus of the class will include the following: admissions, citizenship, deportation and detention (including that of suspected terrorists), refugee/asylum law, and highly contested issues of today, such as definitions of citizenship, immigrant rights, and border enforcement. A major objective of this course is to provide students with the opportunity to conduct their own original research in American politics by delving into some aspect of immigration as a public policy issue.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-435 Race and Public Policy**

  Prerequisites:

  GVT 110 OR GVT 120 OR GVT 223 OR GVT 224

  Credits:

  4.00

  Description:
Public policy's impact on Blacks Chicano's, Native Americans Puerto Ricans, and other minority groups; how public policy has contributed to racial oppression; policies for attaining racial equality; political strategies of minority groups. Cultural Diversity A

Type:

Cultural Diversity Opt A, Social Science, BSJ SOCIAL SCIENCE, BSBA SOCIAL CHANGE

- **GVT-438 Environmental Policy & Politic**

  Prerequisites:

  This course will have a service learning component Sophomore Status required

  Credits:

  4.00

  Description:

  From Rio to the Boston Harbor Project, this course examines the policies and politics of the environment. It examines the origins of the environmental movement in the United States focusing on the development and present function of government and non-government organizations responsible for the development and implementation of global, national, state and local environmental policies.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-439 Global Environmental Threat**

  Credits:

  4.00

  Description:

  In the 20th century the general public became aware of the need for following a sustainable lifestyle. Non-governmental organizations, governmental institutions and individuals began to study environmental problems and issues to enhance the concept of conservation of nature and the protection of the planet's biodiversity among other important concepts. However, as we enter the 21st century, we are finding ourselves involved in new environmental threats such as increasingly disturbing natural disasters, eco-terrorism and endless extreme poverty. This course is aimed at learning the basic environmental aspects that affect society and nature as a whole, along with the new issues that are arising and leading scientists to continue
new lines of research in the field of environmental conservation and awareness, knowing also that the key to hope lies in the field of environmental education. Offered on the Madrid Campus only.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-H439 Honors Global Environmental Threat

Credits:

4.00

Description:

Social Science, BSJ SOCIAL SCIENCE, Honors

• GVT-441 Ready, Set, Run!

Credits:

2.00

Description:

Designed to introduce students to the nuts and bolts of preparing to run for office or guiding a candidate through the process. Students learn how to file nomination papers, develop a field team, and create a general branding strategy.

Type:
• GVT-442 Candidate Definition

Credits:

1.00

Description:

Students learn the basics of how candidates successfully introduce their candidacy to the public. From announcing the campaign to conducting meet and greets to producing candidate photos, this course guides to through the process of effectively defining the candidate.

Type:

Social Science

• GVT-443 Candidate Media Strategy 101

Prerequisites:

Over 54 credits required.

Credits:

1.00

Description:

Students learn the fundamentals of how to maximize positive media coverage with attention paid to generating endorsements, developing non-paid media, and persuading voters.

Type:

Social Science

• GVT-444 Campaign Issues: Taking a Stand

Prerequisites:
Over 54 credits required.

Credits:

1.00

Description:

In this highly interactive course, students learn how to develop position papers, conduct opposition research, and ultimately use their knowledge to convey information effectively in political speeches and debates. Attention paid to message development.

Type:

Social Science

- **GVT-446 Getting Out the Vote**

  Credits:

  1.00

  Description:

  Learn the cutting edge techniques to help register new voters, identify voters, and effectively manage election-day operations to increase turnout for your candidacy. Learn how to successfully recruit and retain volunteers.

  Type:

  Social Science

- **GVT-447 Race, Gender, and Sexual Orientation on Campaigns**

  Prerequisites:

  Need to have completed at least 54 credits

  Credits:

  1.00

  Description:
This course will examine the role that race, gender and sexual orientation fill on political campaigns. We will explore the challenges and opportunities that women, people of color, and LGBT individuals face as candidates, the consequences of diversity (or lack thereof) on campaign teams, and how race, gender, and sexual orientation are mobilized by campaigns to reinforce messages, target voters and raise money.

Type:

Social Science

• GVT-450 Lobbying, the Media and Public Policy Opinion, and Politics

Prerequisites:

Junior status or above

Credits:

4.00

Description:

This class will examine the role of lobbyists and the media in influencing state and national decision makers and public policy. Focusing primarily on current issues relating to energy and environmental policy, we will discuss and critically examine all sides of today’s hot topics—renewable power, climate change, sustainability and others. The goal is not to determine who is right and who is wrong, but rather to get behind the headlines and separate fact from hype and discuss how and why certain policy decisions are made and how policy makers are influenced. You’ll gain an appreciation as to how public opinion, lobbyists and the media (even celebrities!) can actually change government priorities— and not always for the better, as rising public opinion and political pressure often collides with well established scientific evidence.

Type:

Social Science, BSJ SOCIAL SCIENCE

• GVT-452 Boston's Future: Local Politics in a Global Context

Credits:

4.00

Description:
This year, Boston's longest-serving mayor of 20 years, Thomas Menino, announced he would not seek re-election. Twelve candidates are now vying to be mayor of Boston. Boston is among the most educated cities and is an epicenter for research and development, building an innovation economy of engagement, community networks, and collaboration. Yet it faces a variety of challenges. Boston also counts itself as third most unequal cities in the United States in terms of income inequality. Can Boston sustain its success while also lifting more of its population out of poverty? This course examines these questions by focusing attention on the 2013 mayoral election. What prescriptions for success and visions for the future of Boston do the various candidates offer? What constituencies vote? How will the successful candidate craft a winning coalition? Guest speakers, including candidates, local media analysts, and policy makers will highlight key aspects of the urban issues we will examine. Neighborhood visits and a variety of readings will round out the course. For any student interested in the interplay between politics, local government and the global economy, this course is for you.

Type:

Social Science

- **GVT-462 Debates on Conflicting Ideas in U.S. Foreign Policy**

  **Prerequisites:**

  GVT 261. Junior status or above

  **Credits:**

  4.00

  **Description:**

  In order to understand the change and continuity in U.S. foreign policy, it is crucial to examine the debate among those who inform the ideas put forward by U.S. foreign policy experts, policymakers, and the group—whether political parties or NGOs—with which they are allies. This course will explore the importance of ideas in U.S. foreign policy from the early days of the republic with an emphasis on the post-World War II period. Prerequisite: GVT 281 or instructor's consent. Open only to Juniors and Seniors. 1 term - 4 credits.

  **Type:**

  Social Science

- **GVT-463 International Legal Systems**

  **Prerequisites:**

  Junior status or above
This course explains the main components of the international legal system. It begins by exploring the rules, principles and norms that govern the relationship among states, the different cultural and philosophical legal perspectives and the history of the international legal system. The second part of the course covers the study of the sources and subjects of the international law, the jurisdiction of states, the peaceful settlement of disputes, the use of force and the legal personality of international actors. The third part of the course addresses a number of significant topics derived from the process of globalization legal norms: human rights, humanitarian intervention, law of the sea, environmental law, and economic relations.

GVT-465 International and Transnational Organizations

Prerequisites:
GVT-261

Credits:
4.00

Description:

This course explores the institutional structures, political processes, and impact of international governmental and nongovernmental organizations. It analyzes their increasingly prominent role in efforts to resolve a wide range of global problems and contribution to strengthen the current system of global governance. While the course covers the problems of international security, global distribution of wealth, deterioration of the environmental system, and threats to social welfare, it focuses on the interaction between the United Nations System and regional organizations, on the one hand, and the role of non-governmental organizations in cooperating or competing to solve specific problems in the area of international relations.

Type:
Social Science, BSJ SOCIAL SCIENCE, BSBA SOCIAL CHANGE

GVT-466 Governance & Regional Political Economy
This course examines the intertwined nature of the globalization and regionalization processes from the perspective of global political economy. The first part of the course provides the basic elements and indicators to understand the main challenges the international economy is facing such as crisis, protectionism, and underdevelopment, inter alia. The second part presents the evolution of globalization and regionalism in the past decades. The third and final section compares how the distinct regions in the world are dealing with local and global problems; particularly attention is paid to the European Union, NAFTA, Mercosur and APEC.

Type:
Social Science

- **GVT-467 Comparative Social Movements**

  Prerequisites:
  Junior status

  Credits:
  4.00

  Description:
  This class examines the political ramifications of social movements primarily but not exclusively within the United States. It looks at ideology, beliefs and mechanisms of mobilization. Another important focus is an analysis of non-white social movements in this country and their impact on domestic politics. Among the movements to be examined are: the Pan-African movement 1919-1939 which will, to some extent, take us outside this country; the U.S. Civil Rights Movement 1955 to 1969 which covers the rise of the Black Power movement; and the U.S. Labor Movement 1900 to 1955 in terms of non-white influence on its programmatic goals. Normally offered alternate years. Cultural Diversity B

  Type:
  Cultural Diversity Opt B, Social Science, BSJ SOCIAL SCIENCE, BSBA SOCIAL CHANGE, Diverse Perspectives
- **GVT-469 International Human Rights**

  Prerequisites:
  
  GVT 261 Junior status or above

  Credits:
  
  4.00

  Description:

  An examination of human rights at the end of the 20th century. Attention will be given to the origin and expansion of the concept of human rights in different political systems, the links between culture and human rights and the means and mechanisms for safeguarding human rights with particular reference to the United Nations system.

  Type:

  Social Science, BSJ SOCIAL SCIENCE

- **GVT-471 Topics in Democracy**

  Prerequisites:
  
  take gvt-110, gvt-120, or instructor's consent for non majors. Junior status or above

  Credits:
  
  4.00

  Description:

  In this course, students will have an opportunity to examine the basic foundations of the democratic theory and practice. Specifically, this course will focus on building blocks of a democratic relationship between people and government, including transparency, accountability, accessibility, and opportunities for effective advocacy and participation. Both classical and modern authors who have weighed in on these issues will be discussed. Normally offered alternate years.

  Type:

  Social Science, BSJ SOCIAL SCIENCE
• GVT-472 East Germany and the Cold War  
  Credits:  
  4.00  
  Description:  
  When the German Democratic Republic was founded in 1949, observers in the West viewed it as an artificial construct created to serve the needs of the Soviet empire. The self-image of the GDR as created by its leadership revolved around the idea of an anti-fascist German state designed as a bulwark against any revival of National Socialism. Over a generation after the fall of the Berlin Wall, it is possible to undertake a dispassionate analysis of the forty-year history of the "other" German state as manifested in its cultural identity and political role during the Cold War.  
  Type:  
  Social Science  

• GVT-473 American Political Thought  
  Prerequisites:  
  open to juniors and seniors only  
  Credits:  
  4.00  
  Description:  
  Reading and discussion of original works by significant American political thinkers. Readings vary, but might include The Federalist and works by Paine, Jefferson, Calhoun, Thoreau, Sumner, Reed, Dewey, Lippman, Goodman, King, Malcolm X, Carmichael, Hamilton, Friedan and Dillinger. Offered every year.  
  Type:  
  Social Science, BSJ SOCIAL SCIENCE  

• GVT-475 Radical & Revolutionary Political Thought  
  Prerequisites:
Open to Juniors and Seniors only.

Credits:
4.00

Description:
This course focuses on those political thinkers, such as socialists, feminists, anarchists, pacifists, and ecologists, who have opposed established order and sought to change it. Topics covered include utopian visions (e.g., Owen, Morris, Bellamy, Gilman), criticism of existing institutions (Wollstonecraft, Marx, Fanon, de Beauvoir) and strategies for change (Goldman, Malcolm, Lenin, Cabral). The emphasis is on reading original theoretical works, with several writings assignments. Normally offered every third year.

Type:
Social Science

- GVT-485 Politics of the Middle East
  Prerequisites:
  TAKE GVT-281 OR INSTRUCTOR'S CONSENT
  Credits:
  4.00
  Description:
  Interlocking themes making the contemporary Middle East an area of chronic conflict: Big Power rivalries; social and political change within individual countries; unity and Arab rivalry involved in Arab nationalism; the Palestinian-Israeli-Arab dispute. Normally offered alternate years. Cultural Diversity B
  Type:
  Cultural Diversity Opt B, Social Science

Normally offered alternate years. Cultural Diversity B

Type:
Cultural Diversity Opt B, Social Science, Honors

- **GVT-501 Senior Seminar**

  Prerequisites:
  Senior status

  Credits:
  1.00

  Description:
  This course is designed to provide all Government degree-seeking students with a team-taught capstone experience. In this course, we will collectively discuss and consider career, professional and academic experience for the Government major, including learning more about the fields of public policy, public service, law, nonprofit management, international development, and nongovernmental organization management. This course focuses on career entry and transition, networking for career success, impression management concept and skills, and related life-long learning skills. Students articulate and reflect on academic, work, and co-curricular experiences from the perspective of professionals entering or advancing their careers. Pre-requisite: Senior standing.

  Type:
  Social Science

- **GVT-503 Washington Academic Seminar I**
Prerequisites:

This course fulfills the Expanded Classroom Requirement. Instructor's consent is required.

Credits:

4.00

Description:

An intensive off-campus experience, normally of two-weeks duration, arranged through a qualified agency in Washington, D.C. Topics vary. Students will be graded by both an on-site evaluator and an assigned Government Department faculty member. Students are normally required to keep a journal of the off-campus experience and to write a significant research paper based on the topic of the academic seminar upon their return.

Type:

Social Science,Expanded Classroom Requirement

- GVT-505 Washington Seminar on National Security

Prerequisites:

Instructor's consent required

Credits:

4.00

Description:

A two-week intensive seminar in Washington DC; the first week will focus on a look inside the defense and intelligence community in the US government; the second week will examine issues, threats, and challenges in global society. The seminar, carried out in partnership with The Washington Center for Internships and Academic Seminars, will include briefing sessions with security officials, site visits, small group meetings, keeping a journal, and academic papers. There will also be some further academic work after you return to Suffolk. Prerequisites: Registration in this course requires advance application. The seminar is offered in May, and applications are due by March 1. Interested students should consult the instructor for further details.

Type:

Social Science
• **GVT-506 Political Convention Program**

  **Credits:**
  
  6.00

  **Description:**
  
  An opportunity to do an internship through the Washington Center at either the Republican National Convention or the Democratic National Convention. College students will learn what goes on behind the scenes and interact with important public figures that are influential in setting public policy at various levels of government. They spend a week prior to the convention studying the electoral process, familiarizing themselves with conventions operations and preparing for their convention fieldwork assignments. In addition, they hear from a wide variety of speakers, including members of the media, party officials, and other political personalities. Students are then assigned as volunteers to assist with the work of the convention during the second week.

  **Type:**

  Social Science

• **GVT-507 GVT Study Trip**

  **Prerequisites:**

  INSTRUCTOR'S PERMISSION This course fulfills the Expanded Classroom Requirement

  **Credits:**

  4.00

  **Description:**

  APPROVAL OF DEPT. CHAIRPERSON. Specially arranged study trip to a foreign country for the purpose of obtaining knowledge through direct experience and observation. Includes prearranged site visits, meetings, required reading and written assignments. ECR

  **Type:**

  Social Science, Expanded Classroom Requirement

• **GVT-509 United Nations Seminar**
Prerequisites:
Instructor's consent

Credits:
4.00

Description:
This course provides an introduction to the study of the role of the United Nations System in the globalization era. The course is divided in two main sections. The first is based on a series of readings, lectures and discussion on the rules, principles and norms which govern the relationship among states and the UN system; it also covers traditional topics such as the sources and subjects of international law, the jurisdiction of states, the peaceful settlement of disputes, the use of force and the legal personality of international actors, human rights, humanitarian intervention, global environment, used of armed forces, as well as economic relations. The second part of the course is based on a required study trip to the UN headquarters in order to experience a direct contact with policy-makers within the UN system in a diversity of areas such as security, aid and peacekeeping areas.

Type:
Social Science, Expanded Classroom Requirement, Global Engagement Experience

- GVT-510 Independent Study
  Prerequisites:
  Instructor's consent required
  
  Credits:
  1.00 - 4.00
  
  Description:
  Individual program of reading and research on an approved topic under the supervision of a member of the department. Only for qualified juniors or seniors. Offered every semester.
  
  Type:
  Social Science

- GVT-513 The Presidency, Congress & Media
Prerequisites:

Junior status or above

Credits:

4.00

Description:

This course is fast-paced, highly interactive, multi-media and thought provoking. We apply the traditional academic requirements at The Washington Center, while adding the unique elements that allow you to connect with students at other universities. This course offers interesting guests, lively discussions, thoughtful debates, historic video from C-SPAN and the National Archives. As we examine and analyze the political, legislative and social issues facing our country, we will take an in-depth look at the issues and events shaping the agenda for next Congress & the next round of elections. Our focus will also include the historical process of public policy making, as well as an intense examination on the changing role of media, especially social media, in shaping public opinion.

Type:

Social Science

• GVT-515 Senior Seminar

Credits:

1.00

Description:

This course is designed to provide all Government degree-seeking students with a team-taught capstone experience. In this course, we will collectively discuss and consider career, professional and academic experience for the Government major, including learning more about the fields of public policy, public service, law, nonprofit management, international development, and nongovernmental organization management. This course focuses on career entry and transition, networking for career success, impression management concept and skills, and related life-long learning skills. Students articulate and reflect on academic, work, and co-curricular experiences from the perspective of professionals entering or advancing their careers. Pre-requisite: Senior standing.

Type:

Social Science
• GVT-521 Internship in Government

Prerequisites:

Junior standing

Credits:

4.00

Description:

This course uses an internship placement of at least 10 hours a week for 12 weeks in a position that offers the student significant opportunity to learn about politics and/or government as the basis for reflection, analysis, and skill development. Specific learning objectives will be tailored to the student's placement. Interested students should consult instructor in advance. ECR

HST-150 Empires & Globalization in World History II

Credits:
4.00

Description:
This is the second of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include state-making, wars, and the rivalry among early modern empires, economic development, the Industrial Revolution and the formation of the global trade system. The specific topics may change every year due to new academic developments and publications. Cultural Diversity B

Term:
HST-181 American Society, Politics, and Culture: Through the Civil War

Credits: 4.00

Description:
Surveys American history from European colonization up through the era of the Civil War. Topics include interactions with Native Americans; slavery; the American Revolution; the founding of a new republic; social and economic developments in the early nineteenth century; expansion; party politics; sectional conflict; the Civil War and Reconstruction.

HST-182 American Society, Politics, and Culture: Civil War to the Present

Credits: 4.00

Description:
Surveys American history from the 1870s to the present. Topics include the new industrial order; farmer and worker protests; progressivism; America's emergence as a world power; the two World Wars; the Great Depression; the New Deal; the Cold War; post-World War II American society; the Civil rights movement; Vietnam; dissent and counterculture in the 1960s; the women's movement; economic, social, and political changes in the late-twentieth century; America's relationship to a globalized world.
Offered Spring Term

Type:

Humanities & History, Humanities Literature Requirement

- **HST-200 Gateway to the Past: The Historian's Craft**

  Credits:

  4.00

  Description:

  Explores history as an evolving academic discipline, a method of inquiry into the past, and a profession. Students learn historical thinking and research skills that enable them to frame a research question, identify and retrieve required sources, and make an argument about the ideas and actions of past peoples and societies. Required for history majors. Offered annually during Fall term.

- **HST-210 Traditional Chinese Society from 1800 to 1949**

  Credits:

  4.00

  Description:

  Type:

  Humanities & History
HST-216 The Thousand Year Reich: the Holy Roman Empire, 800-1806

Credits:
4.00

Description:
Examines the purposes, ideology, structure, institutions, context, and historical evolution of Europe's most enduring, most important, most influential, and (before the European Union) most inclusive political formation, the Holy Roman Empire, during its thousand-year history from the coronation of Charlemagne in 800 to its dissolution in the Napoleonic Europe of 1806.

HST-218 History of the Mongols

Credits:
4.00

Description:
The history of the Mongol Empire, from the emergence of unified Mongol federation at the beginning of 13th century to its dismemberment into independent territories in Mongolia, China, Transoxiana, Iran, and Kipchak Khanate. We will discuss the topological and geographical features of the Mongolian homeland; and the social, economic, and ideological aspects of their lives. The life and the military and political achievements of Genghis Khan will be highlighted, as well as the Mongols' rule over conquered realms. We will also explore through critical discussions the most important historical approaches to the Mongols.

HST-234 History of Sports in Boston and the World

Credits:
4.00

Description:
Explore the modern Winter Olympics and the development of athletic events such as the Boston Marathon; as well as the history of basketball (invented in Massachusetts) and baseball and their importance to Boston's history. Examine some of the iconic sports figures of Boston, and the statues and monuments made to them.
• HST-235 History of Sport and the Olympic Games

Credits:
4.00

Description:
Explore the History of Boston and around the world through sports, with special focus on American football, association football (soccer) and the World Cup; the development of the NCAA, Title IX and college athletics; the Olympic Games--ancient, revival and modern. Students will also analyze how athletics and athletic events have been commemorated by statues and memorials in and around Boston.

• HST-237 Medieval Iran under the Nomadic Dynasties

Credits:
4.00

Description:
Revolutionary changes through three crucial centuries of Iran’s history (12th-15th), as Iran withstood two destructive invasions by nomadic leaders, including Genghis Khan and Tamerlane. Examines the social and economic changes Iran experienced, and the rise of Shi’ism and mysticism, which all resulted in the emergence of the Safavid dynasty. A multilateral perspective--political, cultural social, and economic--to conceptualize the different aspects of this important period.

Type:
Asian Studies

• HST-238 Reemergence of Iran and Its Medieval & Early Modern History

Credits:
4.00

Description:
Examines many different aspects of political, social, economic, and cultural history of Iran in the two centuries (1501-1722) of the Safavid dynasty. The Safavids raised Iran's culture and civilization to a high level which had never been in its Islamic period. But the Safavids also traumatized the unity of the Islamic world, preventing the Ottomans from prosecuting their military victories over the western world.

- **HST-246 History of Modern Iran**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Examines the contemporary history of Persia (Iran) from the time of its independence in the beginning of the sixteenth century to the present with special concentration on geographical/historical background; social structure, ethnic, religious, and linguistic diversities; Safavid and Qajar dynasties; Anglo-Russian interventions and occupations; constitutional revolution and reform; centralization, secularization and modernization under Pahlavi dynasty; opposition to westernization and Islamic revolution.
  
  **Type:**
  
  Humanities & History, Diverse Perspectives

- **HST-247 History of Modern Middle East**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Explores the broad historical forces, conflicts and major events that have shaped the contemporary nations of the modern Middle East. Topic include: the emergence of the modern Middle East from the empires of the sixteenth and seventeenth centuries; the age of colonialism; the rise of nationalism; socialism, capitalism; the impact of Israeli and Palestinian conflict on the region; oil, the Islamic Revolution in Iran and the rise of Islamic fundamentalist movements; U.S. policy; and Saddam Hussein's Iraq.
  
  **Term:**
  
  Offered Fall Term

  **Type:**
- **HST-248 Peaceful Coexistence: Muslims, Christians, and Jews in Medieval Iberia**

  Credits:
  
  4.00

  Description:

  Surveys Muslim and Christian occupied territories on the Iberian Peninsula (modern-day Spain and Portugal), focusing on principal events and broad trends, 711-1492. Special emphasis will be placed on tolerance as manifested in the toleration of religious minorities, cultural and scientific interaction, translation and peaceful coexistence (convivencia); and on intolerance as manifested through warfare (jihad, crusade), frontier mentality, massacres, forced conversions, the setting up of the Inquisition and the final expulsion of the Jews in 1492 and of the descendants of the converted Muslims or moriscos in 1609 and 1814.

  Type:

  Global Engagement Experience, Humanities & History

- **HST-251 Modern East Asia**

  Credits:
  
  4.00

  Description:

  China, Japan, and Korea - East Asia's critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

  Type:

  Humanities & History

- **HST-255 Films and Contemporary China**

  Credits:
4.00

Description:
Uses a series of films to demonstrate the changes in people's lives in contemporary China. It focuses on the Reform Era between 1980 and present. The topics include Chinese politics, economic growth, social change, and popular cultures.

Term:
Occasional

Type:

  Credits:
  4.00

  Description:
  Compares and analyzes the history of race and politics in South Africa and the United States from the 17th century to the present. Examines how race as a social and ideological construct influenced and informed political conflicts over land, labor, and social relations in the two countries including slavery, segregation, apartheid, and the struggle to create racial democracies.

  Term:
  Offered Fall Term

  Type:
  Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement, BSBA SOCIAL CHANGE, D

- **HST-265 Comparative Slavery**

  Credits:
  4.00

  Description:
This lecture-discussion course compares the institution of slavery over time and across space. Beginning with its emergence and articulation in the Ancient World, the institution of slavery was evident on all of the continents and played a dynamic role in defining humanity and in forming social, economic, cultural, and political formations up to the Modern Era. The course examines the institution of slavery in its many manifestations from nomadic societies to sedentary ones, from kinship-based states to territorial-based ones, from tribal societies to advanced civilizations, from pre-capitalist economies to capitalist ones.

Type:

Humanities & History

- **HST-266 Crime and Punishment in Early Modern Europe: 1500-1800**

  Credits:

  4.00

  Description:

  Explores crime, law and punishment in Europe in the early modern era (1500-1800). Topics include: the nature of crime in early modern Europe; the purposes and roles of law (criminal, civil, and others); forms of punishment and what law, crime, and punishment tell us about early modern European society.

  Type:

  Humanities & History

- **HST-268 History of the Mediterranean**

  Credits:

  4.00

  Description:

  Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

  Term:

  Occasional
HST-269 Early Modern France

Credits:
4.00

Description:
Examines early modern France (1400-1789), emphasizing the development of religious, political, and legal institutions. Topics include: the emergence of France as an absolute monarchy; the Protestant and Catholic Reformations in France; the religious wars of the sixteenth century; France's role overseas; war and diplomacy with other European countries; the Enlightenment; the French Revolution; and the rise of Napoleon.

Term:
Occasional

Type:

  Offered Spring Term

  Type:
  
  Humanities & History, Humanities Literature Requirement

- **HST-363 Naval History: U.S.S. Constitution**

  Prerequisites:

  03 Feb 2010 02:57pm Eric A Hatch

  Credits: 4.00

  Description:

  In 1794 Boston's citizens watched the largest ship built here up to that time come together at the water's edge. Students will explore the 203-year story of Constitution by learning how craftsmen built this massive ship without electric tools; by following her two hundred years of naval service to the nation; by examining life at sea for the 450 sailors and officers who lived on board for voyages lasting several months; and by surveying the ways Americans have adopted Constitution as a national symbol, using her image to adorn decorative as well as utilitarian objects. Meets at the USS CONSTITUTION Museum and the USS CONSTITUTION.

  Type:

  Humanities & History, Humanities Literature Requirement
• HST-368 Boston's Historic Houses

Credits:
4.00

Description:

Working with historic houses in Boston, students will learn that art of interpreting history. Using collections, archives, and other repositories, students will research the houses and the people who lived in them. Many of these houses have existed from colonial times and had various uses. Formerly: HST 368 Introduction to Historical Interpretation.

Term:

Occasional

Type:

Humanities & History, Expanded Classroom Requirement, Humanities Literature Requirement

• HST-369 American Objects: Materials, Meaning and History

Credits:
4.00

Description:

Explores American history through material objects - from colonial silver teapots to 1960s lava lamps. Students will investigate an object's purpose, how it was made and who made it, and interpret the object's cultural meanings for American history. Topics covered will include the decorative arts, vernacular architecture, archaeology, industrial design, ethnicity and gender, visual culture, and landscapes. Lectures and discussions will be complemented with visits to museums, historic houses, and other sites. Students will learn how to research and write about material cultures, placing objects or spaces in their historical context.

Type:

Humanities & History
• HST-370 Workers in America

Credits:

4.00

Description:

Examines how ordinary Americans shaped and have been shaped by the experience of work in a capitalist economic order. Surveys the world of work and workers, free and unfree, from 1800 to the present. Topics include changing conceptions of work, formation of workers' consciousness and communities, working-class cultures, movements for labor reform, and the impact of race, ethnicity, and gender on labor markets, workplace dynamics, and working-class families and communities. Explores workers' experiences of industrialization and technological innovation, immigration and migration, consumerism and globalization.

Term:

Occasional

Type:

Cultural Diversity Opt A, Humanities & History

• HST-371 U.S. Women's History Colonial to 1865

Credits:

4.00

Description:

Traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism legal status, labor activism and popular culture. With attention to ethnicity, race, class, age, region of residence, disability and sexual orientation, the course focuses primarily on the everyday lives of ordinary women.

Term:

Offered Fall Term

Type:

Cultural Diversity Opt A, Humanities & History, Humanities Literature Requirement, Diverse Perspectives
HST-372 U.S. Women's History: 1865-present

Credits:
4.00

Description:
Examines the social and cultural history of women in the United States from the close of the Civil War to the present. Using not only gender but also race, ethnicity, class, age, disability, region of residence, and sexual orientation as important categories of analysis, this course focuses on women's private and public lives. Topics include the family, work, religion, education, health care, private lives, motherhood, sexuality, social and political activism, legal status, labor activism, and popular culture.

Term:
Offered Spring Term

Type:
Cultural Diversity Opt A, Humanities & History, Humanities Literature Requirement, BSBA SOCIAL CHANGE, D

HST-377 Caribbean and Latin-American Diaspora

Credits:
4.00

Description:
A look at the migration of people, along with their culture, to and from the Caribbean and Latin America. The first half of the course looks at how European, Asian and African diasporas settled in the region, assimilated and contributed to the ethnic and cultural base of Caribbean and Latin America countries in the colonial period. The second half offers insight into how and why people from the Caribbean and Latin America would later form diasporas of their own in countries like the United States in the twentieth century. Students taking this course will get a sense of the struggles, accomplishments and culture of Caribbean and Latin American peoples in the United States. Formerly HST 286.

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement
• **HST-381 American Colonial History**

  Credits:
  4.00

  Description:
  Explores the founding and settlement of North America; the social, economic, and political development of European colonies and their interactions with Native People; the social religious, and cultural world of early America; witchcraft, slavery, and warfare; the British-French struggle for control of the North American continent; and the background and causes of the American Revolution.

  Term:
  Occasional

  Type:
  Humanities & History, Humanities Literature Requirement

• **HST-383 Boston: Heritage of a City**

  Prerequisites:
  One History course

  Credits:
  4.00

  Description:
  Boston from its foundation in 1630 to its development as a 21st century metropolis. From the Massachusetts Bay Colony, to cradle of the American Revolution, to a Yankee merchant capital, Brahmin cultural center, and immigrant melting pot. When offered in the hybrid format, this course will meet at the regularly-scheduled time, but lectures and other course materials will be available on the course Blackboard site in case you cannot attend.

  Term:
  Offered Fall Term
- **HST-384 History of Boston and Suffolk University**

  Credits:  
  4.00  
  
  Description:  
  Numerous walking tours will highlight an overview of Boston's history (its foundation in 1630 as part of the Massachusetts Bay Colony; as cradle of the American Revolution; as a Yankee merchant capital, Brahmin cultural center, and immigrant melting pot; and as a modern metropolis) leading to a consideration of the history of Suffolk University, as product and contributor to Boston history and culture, as well as to its immediate urban neighborhood.

- **HST-389 American Constitutional History I**

  Prerequisites:  
  Sophomore Standing Required  
  
  Credits:  
  4.00  
  
  Description:  
  Investigates the development of American constitutional government, from the political crisis of the 1780s to the Civil War. The problems of individual liberty versus government power; state rights; race and slavery; war powers; pluralism.

  Term:  
  Occasional  

  Type:  
  Humanities & History, Humanities Literature Requirement
- **HST-392 American Civil War and Reconstruction**
  
  **Credits:**
  4.00
  
  **Description:**
  Examines the biggest war in American History; from the antebellum reform and expansion movements, slavery and the deepening sectional crisis of the 1850s. Analyzes violent war and Reconstruction to 1877.
  
  **Term:**
  Occasional
  
  **Type:**
  Humanities & History, Humanities Literature Requirement

- **HST-394 Slavery in Film, Literature and History**
  
  **Credits:**
  4.00
  
  **Description:**
  A seminar on slavery in the United States as depicted in history, literature, and film. Topics may include resistance to slavery, honor, the attack on slavery, the cultural and social worlds of masters and enslaved people, the thought of masters and enslaved people, women and slavery, and/or slavery as an economic institution.

  **Type:**
  Cultural Diversity Opt A, Humanities & History

- **HST-396 The African Diaspora**
  
  **Credits:**
  4.00
Examines the global dispersion of African people outside of the African continent. The history and culture of African descendant people and their communities in the Americas, Europe, and Asia will be included.

Term:
Occasional

Type:
Cultural Diversity Opt B, Humanities & History, Cultural Diversity Opt A

- **HST-407 German History 1517 - 1871**

  Credits:
  4.00

  Description:
  Explores the social, political and cultural development of the German-speaking population of central Europe from the beginning of the Reformation to the proclamation of the Second Reich, with major attention to the Wars of Religion, the emergence of Prussia and its competition with Austria, and the development of German nationalism.

  Term:
  Offered Spring Term

  Type:
  Humanities & History, Humanities Literature Requirement

- **HST-412 Europe in the 20th Century**

  Credits:
  4.00

  Description:
Examines the political, economic, social and cultural developments of the principal European states since 1900. Topics include: World War I; the social and economic dislocations of the 1920s and 1930s; the rise of Fascism and National Socialism; World War II; the remains of colonialism; modernization and Americanization since the 1960s; the European Union; Europe after the Cold War; and throughout the twentieth century, the importance of class and class conflict, nationalism, and war in shaping the European experience.

Term:
Occasional
Type:
Humanities & History, Humanities Literature Requirement

- **HST-414 Nazi Germany**

  Credits:
  4.00

  Description:
  Examines German and European preconditions; the Versailles Treaty and the failure of the Weimar Republic; Hitler's ideas, collaborators and institutions; Nazi foreign and domestic policy; World War II and the concentration camps.

  Term:
  Occasional

  Type:
  Humanities & History, Humanities Literature Requirement, BSBA SOCIAL CHANGE

- **HST-415 Ireland: Celts to Present**

  Credits:
  4.00

  Description:
Examines Irish origins and medieval background; Anglo-Irish history from the Tudor invasion of Ireland in 1534 to the present will be explored with emphasis on the interrelationship between developments in the two nations.

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement

- **HST-426 Politics and Culture in Europe 1919-1939**

  Credits:
  4.00

  Description:
  Explores the social and political development of European society between the two world wars, primarily through the literature, art, and films of the period. Topics include: the dissolution of pre-1914 middle class society; deviance and sexuality in the 1920s; the role of decadence in art and the Fascist response to deviance in life and art; women, workers, and the new technology; the rise of Fascism; political engagement and polarization throughout European society in the face of economic and social crisis.

  Term:
  Occasional

  Type:
  Humanities & History, Humanities Literature Requirement

- **HST-452 Ancient China Seminar**

  Credits:
  4.00

  Description:
Discusses the emergence of early Chinese states, feudalism during Chinese antiquity, the emergence of Confucianism and other competing political ideologies, and the consolidation of the imperial power.

Term:
Occasional

Type:
Humanities & History, Asian Studies

- **HST-469 Research Seminar: African American Life in Slavery and Freedom- Reconstruction and the Freedman's Bureau**

  Credits:
  4.00

  Description:
  Using documents related to the work of the Freedman's Bureau this class provides students with a deeper understanding of the reconstruction era. This course is identical to BLKST 469.

  Term:
  Occasional

  Type:
  Humanities & History, Humanities Literature Requirement

- **HST-471 Self, Body, & Sexuality- U.S. History**

  Credits:
  4.00

  Description:
  This course examines American debates over the natures, capacities, and responsibilities of men and women from settlement of the New World through the present. Emphasis is given to three elements of the self: social and civic personhood, the body, and sexuality. We will focus on
representations of womanhood and masculinity - across racial, ethnic, and class lines - and their effects on men and women in society, politics, and law. Course readings will also examine concepts of human nature and the interplay among mind, body, and sexuality.

Term: Occasional

Type:

Humanities & History, Humanities Literature Requirement

- HST-483 Death, Disease, Healing- US HST

Credits: 
4.00

Description:
Investigates how Americans have understood and responded to health, illness, and death from the eighteenth century to the present. Examine interactions among patients, healers (orthodox and heterodox), the medical and scientific professions, business, and government. Explore the effects of scientific and technological advancements, industrialization, urbanization, immigration, war, and social movements on the nation's moral and political economies of health, and on evolving ideas about bodily integrity and autonomy, linked to historical relations of gender, race, class, and sexuality.

Type:

Cultural Diversity Opt A, Humanities & History

- HST-H483 Death, Disease, Healing- U.S. History

Prerequisites:
Permission of the instructor required.

Credits: 
4.00

Description:
Investigates how Americans have understood and responded to health, illness, and death from the eighteenth century to the present. Examines interactions among patients, healers (orthodox and heterodox), the medical and scientific professions, business, and government. Explores the effects of scientific and technological advancements, industrialization, urbanization, immigration, war, and social movements on the nation's moral and political economies of health, and on evolving ideas about bodily integrity and autonomy, linked to historical relations of gender, race, class, and sexuality. This is an honors-level course.

Term:
Occasional

Type:

Humanities & History, Humanities Literature Requirement, Cultural Diversity Opt A, Honors

- **HST-484 History of the Emotions**

  Credits:

  4.00

  Description:

  Explores ideas about emotional life from the fields of history, anthropology, sociology, and psychology as well as the evolution of emotion rules and prescriptions, focusing on western Europe and the United States since 1700. In the eighteenth century, emotions were seen as a positive influence on politics and public life, especially during the French Revolution. After the fall of Robespierre, the emotions were banished to the private sphere - so we will read both primary sources and recent scholarship on 19th- and 20th-century ideas about masculinity and femininity, romantic love and marriage, childrearing, and about what parents and children are supposed feel toward each other, how ideas about these subjects have changed over time, and whether our feelings change with them.

  Term:

  Occasional

  Type:

  Humanities & History, Humanities Literature Requirement, Cultural Diversity Opt A, Diverse Perspectives

- **HST-494 Politics and Protest**

  Credits:
Description:

Examines the impact of organized reform movements on American history from the 1800s to the twenty first century. In each era presented, students will explore the various dynamics that impact reform.

Term:

Occasional

Type:

Humanities & History, Humanities Literature Requirement, BSBA SOCIAL CHANGE

- **HST-510 Independent Study**

  Prerequisites:

  An Independent Study form must be submitted to the CAS Dean's Office.

  Credits:

  1.00- 4.00

  Description:

  By special arrangement, members of the History department will schedule seminars or individual discussion sessions with students interested in directed reading and research. Open to Juniors and Seniors with the permission of the instructor.

  Term:

  Offered Both Fall and Spring

- **HST-522 History Internship**

  Prerequisites:

  Permission of instructor required.

  Credits:
4.00

Description:

Require approximately 12 hours of work per week in a history-related position, at a museum, historical society, or archive. Designed to introduce the student to the professional opportunities and responsibilities in the fields of public history or historic preservation. Interested students should consult the instructor in advance. Prerequisite: Permission of instructor is required.

Term:

Offered Both Fall and Spring

Type:

Humanities & History, Humanities Literature Requirement, Expanded Classroom Requirement

- HST-H555 Senior Honors Thesis

Credits:

4.00

Description:

An individual program of reading, research, and writing on an approved topic, under the supervision of a History faculty member. The completed thesis will be at least 20-25 pages reflecting original research. The qualifying student must have a 3.5 overall grade point average, and a 3.7 grade point average in History classes, must be recommended by two History faculty members, and must submit a writing sample of at least 5 pages to the Department chair by the end of their junior year. Must be taken in the Fall of the Senior year.

Type:

Humanities & History, Humanities Literature Requirement, Honors

- HUM-502 Honors Thesis

Prerequisites:

Permission of the Department Chair.

Credits:
4.00

Description:
A major research project completed under the supervision of a regular faculty member.

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement

- **IMGD-490 Project in Game Implementation and Integration**

  Prerequisites:
  
  IMGD-480

  Credits:
  4.00

  Description:
  This course is part 2 of a 2-semester sequence devoted to developing and implementing a fully playable video game. In Part II students concentrating both in VGD and VGP will work collaboratively to implement the game designed in IMGD-480 including software development, artwork, sound and music, usability study, and testing of the complete game.

- **IMGD-510 Independent Study**

  Credits:
  3.00

  Description:
  An Independent Study provides the student with the opportunity to examine an issue of interest that falls outside the parameters of the existing curricula. The student will work on a one to one basis with a Full Time faculty member to realize a particular and well defined goal. All proposals for
Independent Study must be approved by the Interactive Media and Game Design committee and Dean's office in advance of the beginning of the semester during which the work will be completed.

- **ITAL-101 Elementary Italian I**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Practices and develops oral and written language skills. Explores the culture and language of Italy through audio-visual and textual materials.
  
  **Term:**
  
  Offered Fall Term
  
  **Type:**
  
  BA FOREIGN

- **ITAL-102 Elementary Italian II**
  
  **Prerequisites:**
  
  ITAL-101 or instructor's permission
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Continues to practice oral and written language skills. Explores the culture and language of Italy through audio-visual and textual materials.
  
  **Term:**
  
  Offered Spring Term
  
  **Type:**
• JPN-101 Elementary Japanese I

Credits:

4.00

Description:

For students with no previous knowledge. An introduction to features of spoken and written Japanese. Stresses grammar, oral performance and simple characters.

Term:

Offered Fall Term

Type:

BA FOREIGN

• JPN-102 Elementary Japanese II

Prerequisites:

JPN-101 or Instructor's consent

Credits:

4.00

Description:

Continues to develop proficiency in reading, writing, and speaking Japanese. Helps to further develop listening skills with the use of authentic materials, such as print media and audio files.

Term:

Offered Spring Term

Type:
- **JPN-510 Independent Study**

  **Prerequisites:**

  Instructor's Permission required.

  **Credits:**

  4.00

  **Description:**

  Various topics can be covered based on student interest. Topics have included intensive upper-level reading comprehension and grammar study. Topics are to be arranged with faculty member.

- **LACS-408 Latin America Cinema**

  **Credits:**

  4.00

  **Description:**

  A survey of films from Argentina, Mexico, Cuba, and other Latin American countries. Occasionally the course includes films produced in the United States that are directed by Hispanic filmmakers or that illustrate the significance of Hispanic culture in North America. Films in Spanish with English subtitles. All written assignments and class meetings are in English. Cultural Diversity B. Prerequisite: None. ENG102 or 103 are strongly recommended. Normally offered alternate years.

  **Type:**

  Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement

- **LACS-416 Border Crossings: The Latino Experience USA**

  **Prerequisites:**

  ENG-102 or ENG-103 or Instructor's consent.
The myth of a singular Latino experience in the United States will be examined through a variety of genres including: prose, poetry music, film, and theatre. Issues of gender, racial, ethnic and social identity will be addressed as we study mainstream and marginal voices within the U.S. Latino Community. Among the writers read will be Sandra Cisneros, Junot Diaz, Julia Alvarez, Tato Laviera, and Esmeralda Santiago. All written assignments and class meetings are in English. Cultural Diversity A. Normally offered alternate years.

- **MATH-000 Mathshop - Bridge to College Math**

  Credits:
  
  0.00

  Description:

  A NON-CREDIT, full semester workshop designed for students who need substantial review before starting MATH 104, MATH 106, OR MATH 121. Similar to a course, MATHSHOP meets three hours per week throughout the semester. Topics covered are tailored to the needs of students and include basic math material, basic algebra, graphing use of calculators, ways of dealing with math fears and study methods. Several sections normally offered each semester.

- **MATH-075 Review of Math Concepts for Calculus**

  Credits:
  
  0.00

  Description:

  The purpose of this non-credit course is to help engineering students review basic math contents and topics that will be used frequently in their major engineering courses. The course will cover basic algebra (for example, order of operations, exponents, simplifying algebraic expressions, combinations of operations and complex fractions), functions and graphs (including linear, polynomial, and rational, exponential and logarithmic functions) and basic knowledge in trigonometric functions (for example angles and radian measures, right triangle trigonometry, graphs of Sine and Cosine functions)

- **MATH-104 Precalculus for Management & Social Sciences**
Prerequisites:

MATH level 2 or Mathshop

Credits:

4.00

Description:

A selection of topics in algebra and elementary analytic geometry including, (but not restricted to): properties of real numbers, linear equations and inequalities, absolute value equations and inequalities, polynomials, rational expressions, exponents and radicals, quadratic equations, functions, linear, quadratic and polynomial models, rational, exponential and logarithmic functions. Applications and graphs are stressed throughout the course. This course is intended to prepare students who have only had one year of high school algebra to take MATH 134. Students may not use this course alone to satisfy the C.A.S. math requirement. Qualifying math placement exam score required. Students who are not prepared for this course should take MATHSHOP. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students. This course cannot be taken for credit by a student who already has credit for a more advanced course.

- **MATH-121 Precalculus With Elements of Calculus**

  Prerequisites:

  MATH-104 with a minimum grade of B or MATH level 4

  Credits:

  4.00

  Description:

  A review of topics in algebra, trigonometry and analytic geometry intended for students needing one additional semester of preparation before taking MATH 165. Students may not use this course alone to satisfy the CAS math requirement. Prerequisites: MATH 104 with B or MATH 108 with B or higher or qualifying placement exam score indicating solid grounding in intermediate algebra. 4 lecture hours plus 1 recitation session per week. Normally offered every semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students. This course cannot be taken for credit by a student who already has credit for a more advanced course.

- **MATH-128 Math for the Modern World**

  Prerequisites:
MATH level 2, or Mathshop, or MATH-104

Credits:
4.00

Description:
From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem solving in contemporary life and work. It uses a minimal amount of algebra and focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)

• MATH-130 Topics in Finite Mathematics

Prerequisites:
MATH-104, or MATH-121, or MATH level 3

Credits:
4.00

Description:
Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments, Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

• MATH-132 Math-Art, Tool and Human Side

Prerequisites:
MATH-000 or appropriate Math Placement Exam score. Course does not fulfill math requirement for SBS majors.

Credits:
Mathematics is both an art and a tool. It has been used in many ways in contemporary and ancient society. The common bond is a way of thinking and a way of using reason to solve problems and describe things of all sorts. The course is designed to cultivate an appreciation of the significance of mathematics in daily life and develop students' mathematical reasoning. Topics will vary from section to section. Examples of topics that might be included are: the real meaning of a newspaper graph, methods to tally votes, fair division, routes and networks, consumer mathematics, the 'real' cost of a house, shapes and patterns, fractals, soap film surfaces, prime numbers and encryption, new discoveries in mathematics.

- **MATH-134 Calculus for Management & Social Sciences**
  
  **Prerequisites:**
  MATH-104, MATH-121 or MATH level 4
  
  **Credits:**
  4.00
  
  **Description:**
  A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, linear regression, limits and continuity, derivatives, differentiation rules, implicit differentiation, related rates, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.*

- **MATH-165 Calculus I**
  
  **Prerequisites:**
  MATH-121 with a minimum grade of C, MATH-075, or MATH level 5
  
  **Credits:**
  4.00
Functions, limits and continuity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; applications (curve sketching, limits at infinity, optimization, differentials); other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); anti-derivatives; indefinite integrals; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

• MATH-166 Calculus II

Prerequisites:

MATH 165 with grade of C or better

Credits:

4.00

Description:

Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (by parts, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series (computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

• MATH-200 Modern Mathematics and Career Exploration

Prerequisites:

Freshman or Sophomore Status

Credits:

1.00

Description:

This one credit course aims to help freshmen and sophomore students form an idea of the scope of the vast and rapidly growing field of mathematics and the many career options, and begin to map out steps toward a potential career path. Mathematics is a diverse discipline that is constantly evolving. It ranges from applied mathematics (tailored to specific real world problems), to mathematical physics (which crafts the mathematical basis
for the understanding of physical phenomena), to pure mathematics (which is studied for its intrinsic interest). As the study of such varied concepts as quantity, structure, space and change, mathematics has something for everyone; and valuable applications to many other fields, from business and finance to meteorology, chemistry, ecology and biology, among many others. This module aims to move beyond the foundational math generally taught in freshmen and sophomore year by presenting several areas of recent development and application. In this team-taught seminar-style course, two or three different professors will introduce students to their research areas and related topics. Some of the areas represented among the faculty include fractal geometry, number theory, algebraic geometry, and probability. Students will also be introduced to resources provided by national mathematical communities on mathematical career paths and backgrounds needed.

- **MATH-255 Probability and Statistics**

  Prerequisites:

  MATH-165 with a grade of C or better

  Credits:

  4.00

  Description:

  Topics include: random variable and distribution; expectation and variance; special discrete/continuous distributions (uniform, binomial, negative binomial, geometric, hypergeometric, Poisson, normal, and exponential distributions); joint distribution, marginal distribution and conditional distribution; covariance; limit theorems (law of large numbers and central limit theorem); introduction to confidence interval and hypothesis testing; regression analysis. Offered as needed.

- **MATH-256 Statistics With R**

  Prerequisites:

  MATH 255 or permission of instructor

  Credits:

  1.00

  Description:

  The course uses free software R to introduce key concepts in statistics. Topics include Descriptive statistics and graphics, One- and two-sample tests, Regression and correlation, and Analysis of variance. Data from financial markets or computer networks will be used for homework assignments and projects. We will focus on hands on experiences with R rather than theoretical details about statistical analysis.
• MATH-265 Calculus III
  Prerequisites:
  MATH 166 with grade of C or better
  Credits:
  4.00
  Description:
  Parametric equations and polar coordinates (curves, areas, conic sections); vectors and the geometry of space (the dot product, vector arithmetic, lines and planes in 3-space, the cross product, cylinders and quadratic surfaces); vector functions (limits, derivatives and integrals, motion in space); partial derivatives (functions of several variables, limits and continuity, tangent planes and differentials, chain rule, directional derivatives, gradient, extrema, Lagrange multipliers); multiple integrals (double integrals, applications); vector calculus (vector fields, line integrals, fundamental theorem for line integrals, Green's Theorem, curl and divergence, parametric surfaces, surface integrals). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

• MATH-285 Discrete Mathematics
  Prerequisites:
  MATH-165 with a grade of C or better
  Credits:
  4.00
  Description:
  Topics mostly selected from the following list: Logic and set theory, elementary number theory, relations and functions and their properties (equivalence relations, partial order relations, recurrence relations and their solutions); computational complexity of algorithms (big O notation); graphs and their properties (isomorphisms of graphs, Euler and Hamilton paths, shortest path problem, graph coloring) trees (tree traversal, minimum spanning trees); finite state machines; methods of proof (proof by induction, proof by contradiction). Prerequisite: MATH 220 or permission of instructor. 1 term - 4 credits (4 lecture hours per week). Normally offered at least once each year.

• MATH-290 Financial Mathematics I
Prerequisites:

MATH-166 with a grade of C or better

Credits:

4.00

Description:

This course is mainly designed for students who are interested in financial mathematics and/or actuarial sciences, especially if they plan to take the second actuarial exam, and/or if they plan to study more in financial mathematics. The materials covered include time value of money, annuities, loans, bonds, cash flows and portfolios, general derivatives, options, hedging and investment strategies, forwards and futures, and swaps.

Type:

Expanded Classroom Requirement

- **MATH-331 Introduction to Abstract Math**

  Prerequisites:

  MATH-165 and MATH-166 with a grade of C or better

  Credits:

  4.00

  Description:

  This course is intended to provide a firm foundation for and a taste of the study of advanced mathematics. While the course content varies somewhat, it is designed to give students a deeper understanding of the algebraic and analytical structure of the integers, the rational numbers and the real numbers and how they act as a building block to a variety of fields of mathematics. Students are introduced to the process of mathematical discovery and the language of mathematics. Exercises and projects are designed to illustrate the need for proof and to further refine the student's ability to analyze, conjecture and write mathematical proofs. This course is a prerequisite for most upper level mathematics courses and, after completing it a student will be in a position to determine realistically if he or she ought to major or minor in mathematics.

- **MATH-373 Ordinary Differential Equations**

  Prerequisites:
MATH-265 (may be taken concurrently)

Credits:
4.00

Description:
A first course in differential equations. Topics generally include separable, homogenous, exact, and linear first order differential equations; variations of parameters, differential operators, the Laplace transform, inverse transforms, systems of differential equations, power series solutions, Fourier series, and applications.

- MATH-400 Senior Project in Mathematics

Prerequisites:
Instructor permission required.

Credits:
4.00

Description:
Students study a particular topic in mathematics and demonstrate their results in a final project.

- MATH-431 Linear Algebra

Prerequisites:
Math 331 must have grade C or higher

Credits:
4.00

Description:
System of linear equations, Gaussian elimination, matrices and their algebra, inverse of a matrix, determinants, cofactor expansion, Cramer's rule, vectors in and their algebra, abstract vector spaces, subspaces, linear independence, basis and dimension, linear transformations, isomorphism of
- **MATH-432 Abstract Algebra**

  **Prerequisites:**
  MATH 431

  **Credits:**
  4.00

  **Description:**
  An introduction to elementary group theory, including properties of groups, subgroups, first isomorphism theorem for groups, normal subgroups, finite group classification; elementary properties of rings, such as homomorphisms of rings, ideals, fields, Euclidean algorithm, rings of polynomials, factorization theory, integral domains, associates, primes and units in domains, and other topics in number theory. Prerequisite: MATH 431 with a grade of C or higher.

- **MATH-462 Real Analysis**

  **Prerequisites:**
  MATH 331 with at least a grade of C

  **Credits:**
  4.00

  **Description:**
  A detailed treatment of the basic concepts of analysis including the real numbers; completeness and its equivalence to other properties of the reals such as monotone convergence, Archimedean property, Bolzano-Weierstrass theorem; the topology of Euclidean spaces, compactness and the Heine-Borel theorem, connectedness, continuity and uniform continuity and uniform continuity, pointwise and uniform convergence of functions, and an introduction to metric spaces.

- **MATH-481 Complex Analysis I**
Prerequisites:
MATH 462

Credits:
4.00

Description:
Construction and properties of complex numbers, calculus in the complex plane, analytic functions, contour integrals and the basics of Cauchy theory, power series representations. Prerequisite: MATH 331 or instructor's consent.

- **MATH-510 Independent Study**

  Credits:
  4.00

  Description:
  Members of the department will hold conference hours with students and will direct their readings and study of topics in mathematics which may be of interest to them. Prerequisite: Consent of instructor. 1 term - credits to be arranged.

- **MATH-511 Launching a Career in Mathematics**

  Prerequisites:
  Junior or Senior standing

  Credits:
  1.00

  Description:
  This team-taught course is designed to explore career opportunities in Mathematics in depth. This course focuses on career search, the application process, entry, transition and networking for career success. Alternative options such as graduate school will also be explored. Students articulate and reflect on academic work, and co-curricular experiences from the perspective of professionals entering or advancing their careers. The goal of this course is to help students reach their fullest professional potential following graduation.
• MATH-R104 Recitation for Pre-Calculus for Management and Social Sciences

Prerequisites:

Appropriate Math Placement Exam score. Must be taken concurrently with MATH 104

Credits:

0.00

Description:

Taken simultaneously with Math 104. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do online work such as lecture demonstration of additional examples or homework projects.

• MATH-R128 Recitation for Math for the Modern World

Prerequisites:

MATH-000 or appropriate Math Placement Exam score. Must be taken concurrently with MATH 128. This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

Credits:

0.00

Description:

Hands on problem solving, discussion and examples of Math for the Modern World.

• MATH-R130 Recitation for Finite Mathematics

Prerequisites:

MATH 104 or appropriate math placement score. Must be taken concurrently with MATH 130

Credits:
Description:

Taken simultaneously with Math 130. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do online work such as lecture demonstration of additional examples or homework projects.

- **MATH-R132 Recitation for Math-Art, Tool and Humanside**

  Prerequisites:

  MATH-000 or appropriate Math Placement Exam score. Must be taken concurrently with MATH 132. This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

  Credits:

  0.00

  Description:

  Taken simultaneously with Math 132. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do online work such as lecture demonstration of additional examples or homework projects.

- **MATH-R134 Recitation for Calculus for Management And Social Sciences**

  Prerequisites:

  MATH 104 or appropriate math placement score. Must be taken concurrently with MATH 134.

  Credits:

  0.00

  Description:
Taken simultaneously with Math 134. The recitation is a hybrid course. Once every two weeks students meet with an instructor to do work that enhances understanding of the course material. Such work can include practice problems, homework problems and sometimes quizzes on a laptop as well as question-answer time and group project work. On alternate weeks students do on line work such as lecture demonstration of additional examples or homework projects.

- **MS-301 Clinical Radiation I**

  **Prerequisites:**
  
  BIO 204 and MS 200

  **Credits:**
  
  3.00

  **Description:**
  
  Through a systems-based approach, this course will review anatomy and physiology while teaching medical terminology. This course will also discuss the major cancers associated with each anatomical system and introduce the student to radiation therapy treatment techniques and procedures.

  **Term:**
  
  Offered Spring Term

- **MS-L301 Clinical Radiation Lab I**

  **Prerequisites:**
  
  MS 301 concurrently

  **Credits:**
  
  1.00

  **Description:**
  
  Provides the necessary clinical experience to become a radiation therapist. All labs are conducted at our clinical affiliates. Under the supervision of licensed radiation therapists, the students will become increasingly proficient in the manipulation of treatment equipment, will gain a thorough understanding of radiation treatment plans, will deliver a prescribed radiation dose to cancer patients, and will acquire knowledge of all relevant aspects of patient care. These labs are available only to students enrolled in the clinical track.
Term:

Offered Spring Term

- **MS-L303 Clinical Radiation III Lab**

  Prerequisites:
  
  MS 303 concurrent
  
  Credits:
  
  1.00

  Provides the necessary clinical experience to become a radiation therapist. All labs are conducted at our clinical affiliates. Under the supervision of licensed radiation therapists, the students will become increasingly proficient in the manipulation of treatment equipment, will gain a thorough understanding of radiation treatment plans, will deliver a prescribed radiation dose to cancer patients, and will acquire knowledge of all relevant aspects of patient care. These labs are available only to students enrolled in the clinical track.

  Term:

  Offered Spring Term

- **MS-L304 Clinical Practicum for Radiation Therapy**

  Prerequisites:
  
  Take MS-301 MS-L301;
  
  Credits:
  
  1.00
  
  Description:
  
  Student radiation therapists will spend 12 weeks (full-time, 40 hrs/wk) gaining hands on patient care experience in the department of radiation oncology at our clinical affiliates. Under constant supervision by licensed therapists, the student will be guided toward the application of theory in the real world of cancer treatment.
Term:
Summer
Type:
Expanded Classroom Requirement

- **MS-L311 Clinical Dosimetry Rotation I**
  Prerequisites:
  MS-L111 and take MS-301 concurrently
  Credits:
  1.00
  Description:
  Under the supervision of a Certified Medical Dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Two, 8-hour days per week, TTH.

  Term:
  Offered Spring Term

- **MS-L313 Clinical Dosimetry Rotation III**
  Prerequisites:
  MS-L312 and MS-303 concurrently
  Credits:
  1.00
  Description:
  Under the supervision of a Certified Medical Dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Three, 8-hour days per week, MWF.
• MS-L314 Clinical Practicum for Dosimetry

Prerequisites:
Take MS-301 and MS-L311;

Credits:
1.00

Description:
Student dosimetrists will spend 12 weeks (full-time, 40 hrs/wk) gaining hands on treatment planning experience in the department of radiation oncology at our clinical affiliates. Under constant supervision of certified medical dosimetrists, the student will be guided toward the application of theory in the real world of cancer treatment planning.

Term:
Summer

Type:
Expanded Classroom Requirement

• MS-317 Radiation Physics II

Prerequisites:
MS 315

Credits:
4.00

Description:
This course is intended to expand on the concepts and theories presented in Radiation Physics I. It will provide a detailed analysis of the treatment units used in external beam radiation therapy, their beam geometry, basic dose calculations and dose distributions. This course will also cover the principles, theories, and uses of brachytherapy. This course was previously MS 412

Term:
Offered Spring Term

• **MS-415 Clinical Dosimetry**

  Prerequisites:
  
  MS 315; MSL415 concurrently

  Credits:
  
  3.00

  Description:
  
  This course will discuss the factors that influence treatment planning and govern the clinical aspects of patient treatment. Topics to be covered include treatment planning with 3-D CT and MRI beams, isodose plan descriptions, clinical applications of treatment beams and advanced dosimetric calculations. This course will also contrast new emerging technologies with conventional radiation therapy techniques (SRT, SRS, IMRT, Image Guided Therapy, Respiratory Gating).

  Term:
  
  Offered Spring Term

• **MS-L415 Clinical Dosimetry Lab**

  Prerequisites:
  
  MS 315, MS L315, MS 415 concurrently

  Credits:
  
  1.00

  Description:
This lab will provide the student with the opportunity to apply clinical dosimetry principles and theories learned in the classroom to actual treatment planning situations within the clinic. Through hands-on lab exercises the student will demonstrate the use of the treatment planning instruments and interpret information they compute.

**Term:**

Offered Spring Term

- **MS-416 Radiation Biology**

  **Prerequisites:**

  Take BIO 403, MS 315 and MS L315.

  **Credits:**

  4.00

  **Description:**

  Topics covered include: physio-chemical aspects of energy absorption, the sequence of events after irradiation occurring on the molecular, cellular and organized tissue levels, radiation response and repair of eukaryotic cells, effects of radiation quality, dose rate, environmental conditions, cell cycle kinetics, tumor and normal cell population dynamics, radiation-induced carcinogenesis and mutagenesis, tumor pathophysiology and radiobiology, and recent advances in experimental radiation oncology.

  **Term:**

  Offered Spring Term

- **MS-435 Brachytherapy**

  **Prerequisites:**

  MS-417;

  **Credits:**

  4.00

  **Description:**
Topics in this course will include radioactive sources, calibration, instrumentation, factors affecting dose calculations, definitions of LDR, MDR and HDR, treatment planning and clinical dose calculation, implantation techniques, implant localization/verification, regulations, radiation safety, storage and QA. Detailed coverage of prostate brachytherapy including LDR and HDR will be emphasized.

Term:

Offered Spring Term

- **MS-450 Dosimetry Systems and Networking**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course is designed for the medical dosimetry student, to include a general overview of computer systems and networking in the field of radiation oncology. A historical view of computers will be covered as well as the intricate uses in the medical field today. Oncology information systems such as MOSAIC and ARIA, as well as radiation therapy software used for imaging, contouring, treatment planning, and patient charting applications will be covered. Data and system security will also be addressed.

  Term:

  Offered Spring Term

- **MS-455 Advanced Radiation Treatment Techniques**
  
  **Prerequisites:**
  
  MS 302 & RT Clinical Student
  
  **Credits:**
  
  1.00
  
  **Description:**
  
  For the senior radiation therapy student, this course will emphasize advanced radiation treatment techniques, including patient simulation, immobilization, contouring, beam modification, as well as special procedures.
• MS-465 Senior Seminar for Medical Sciences

  Prerequisites:

  Senior status

  Credits:

  4.00

  Description:

  This course will be available to senior students enrolled in the Radiation Therapy and Medical Dosimetry programs. This seminar style course will serve a number of purposes; one will be to prepare our graduating students for board certification in their respective disciplines (AART for Radiation Therapy and MDCB for Medical Dosimetry). Exam preparation will include the use of lectures, student teaching, online teaching tools, mini mock exams, and a full-length mock exam. The seminar will also assist students with the preparation of their professional resumes including discussions regarding the skills necessary to make job interviews successful.

• MUH-101 History of Music I

  Credits:

  4.00

  Description:

  Surveys Western music from CE800-1800, from Gregorian to Beethoven; selected major composers, representative masterworks, and the musical styles of the Medieval, Renaissance, Baroque, and Classical periods; links the music to some of the major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.

  Term:

  Offered Fall Term

  Type:

  Humanities & History, Humanities Literature Requirement, Vis. & Perform Thry & Hst

• MUH-102 History of Music II
Surveys Western art music from 1800-present, from Schubert to Jennifer Higdon; selected major composers, representative masterworks, and the musical styles of Romantic, Contemporary, and post-Modern periods; links the music to some of the major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.

Term:
Offered Spring Term

Type:
Humanities Literature Requirement, Vis. & Perform Thry & Hst

**MUH-211 Music of the United States**

Credits:
4.00

Description:

Surveys American music from Colonial times to the present; various attempts to create an indigenous musical style; vernacular and art music genres including folk, concert, and religious music, jazz and musical theatre; includes music of Billings, Amy Beach, Ives, Copland, Bernstein, and Libby Larsen. Normally offered yearly.

Term:
Alternates Fall & Spring

Type:
Humanities Literature Requirement, Vis. & Perform Thry & Hst

**MUH-212 Popular Music in the United States**

Credits:
MUH-221 History of Women in Music

Credits:
4.00

Description:

Surveys music in the lives of women, including composers, performers, producers, mothers, and educators from the Middle Ages to the present; examines issues of gender and control, perspective in historical narrative, and religious and secular traditions that impact the cross-cultural reception of women’s music. Normally offered every year.

Term:
Alternates Fall & Spring

Type:
Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement

MUH-223 World Music

Credits:
4.00
Covers topics in folk, traditional, and modern music of Africa, the Middle East, Asia, and Europe in the context of the cultures and lives of the indigenous peoples of those regions; examines how music interacts with the issues of race, gender, class, religion, politics, and social movements. Normally offered every other year.

Term:
Occasional

Type:
Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement, Diverse Perspectives

- **MUH-227 Jazz and Blues**

  Credits:

  4.00

  Description:

  Follows the evolution of jazz from blues and ragtime through Dixieland, Swing, Bebop, Cool, Latin, Modern, Free, Fusion, and Avant-Garde to Post-modern expressions of the present; the contributions of major soloists, arrangers, composers, leaders, and bands. Normally offered every year.

  Term:

  Occasional

  Type:

  Cultural Diversity Opt A, Humanities & History, Humanities Literature Requirement

- **MUH-290 Internship in Music**

  Prerequisites:

  ARH-101, ARH-102, and Permission of Instructor

  Credits:
1.00- 4.00

Description:

Designed to accompany an internship at a local museum, library, school, booking agency, or other music organization or institution, this independent study course will carry variable credit depending on the number of hours devoted to the internship and the related academic work done by the student.

- **MUH-331 Music in Film**

  **Credits:**
  
  4.00

  **Description:**

  Studies the history and development of film music in Hollywood through its major composers and styles, the techniques of film scoring, and how music and its relationship to film have changed over the last century; critical listening to movie music while viewing films. Normally offered every other year.

  **Term:**

  Occasional

  **Type:**

  Humanities & History, Humanities Literature Requirement

- **MUH-502 Honors Thesis in Music History**

  **Prerequisites:**

  Senior standing & permission of the Dept.Chair.

  **Credits:**

  4.00

  **Description:**

  A major research project completed under the supervision of a regular faculty member.

  **Type:**
• **MUH-510 Independent Study**

  **Credits:**
  
  1.00 - 4.00

  **Description:**
  
  Substantive reading/research in area of special interest directed by a faculty member.

• **MUH-511 Advanced Professional Development**

  **Prerequisites:**
  
  Instructor's Permission required

  **Credits:**
  
  1.00

  **Description:**
  
  Students explore and prepare for career options in the field of Music.

• **NEUR-101 Intro to Neuroscience**

  **Credits:**
  
  4.00

  **Description:**
  
  Introduces the field of neuroscience, the study of the organization and function of the nervous system of humans and other animals. Neuroscientists examine how individual neurons function as signaling devices, how groups of neurons operate as circuits to produce fundamental units of behavior, and how much larger systems in the brain subserve complex functions such as memory and consciousness. Topics include the neuron and neural transmission, the overall function and organization of the nervous system, the development of the brain, neural plasticity, sleep, memory and other higher cognitive functions. Normally offered alternate years.
• P.ED-134 Theory & Practice of Athletics

  Credits:
  3.00

  Description:

  Term:
  Offered Spring Term

• PHIL-113 Critical Thinking and Argumentation

  Credits:
  4.00

  Description:
  An introduction to non-formal methods of analyzing and formulating arguments, including treatment of such concepts/topics as: the nature of argument, induction, deduction, validity, soundness, aspects of language which tend to interfere with logical thought, definition, role of emotion, types of disagreement, and fallacies. The course also emphasizes the practical application of sound reasoning in both evaluating arguments and making arguments of one's own about matters of issues facing society. 1 term - 4 credits. Normally offered every year.

  Term:
  Offered Both Fall and Spring

  Type:
  Humanities & History, Humanities Literature Requirement
• PHIL-115 Introduction to Philosophy

Credits:

4.00

Description:

A general introduction to the nature of philosophical analysis. Lectures, readings, and discussions will focus on representative issues and thinkers from the main areas of philosophy (such the nature of truth, reality, morality, politics, and religion). 1 term - 4 credits. Normally offered every year.

Term:

Offered Both Fall and Spring

Type:

Humanities & History, Humanities Literature Requirement

• PHIL-H115 Honors Introduction to Philosophy

Credits:

4.00

Description:

A general introduction to the nature of philosophical analysis. Lectures, readings, and discussions will focus on representative issues and thinkers from the main areas of philosophy (such the nature of truth, reality, morality, politics, and religion). 1 term - 4 credits. Normally offered every year.

Term:

Offered Both Fall and Spring

Type:

Humanities & History, Humanities Literature Requirement, Honors

• PHIL-119 Ethics

Credits:
Description:

A systematic introduction to the major thinkers and their positions on the main issues of ethics, such as: What is morality? What are moral values? How should we live our lives? Are there objective, universal, absolute moral standards? If so, what are they, and what is their basis? 1 term - credits. Normally offered every year.

Term:

Offered Both Fall and Spring

**PHIL-H119 Honors Ethics**

Credits:

4.00

Description:

A systematic introduction to the major thinkers and their positions on the main issues of ethics, such as: What is morality? What are moral values? How should we live our lives? Are there objective, universal, absolute moral standards? If so, what are they, and what is their basis? Prerequisite: Philosophy majors, minors, or honor students only. 1 term - 4 credits.

Term:

Occasional

Type:

Honors

**PHIL-E119 Service Learning Component**

Prerequisites:

PHIL-119 concurrently and Instructor consent

Credits:

0.00
PHIL-120 Ethics and Civic Life

Credits: 4.00

Description:
In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.

Type: Diverse Perspectives

PHIL-123 Social Ethics: The Good Life

Credits: 4.00

Description:
An examination of contemporary Western society, particularly in the United States, in relation to philosophical attempts to define the good life. Current books that exhibit a philosophical approach towards important contemporary social issues will be discussed, as well as classics in philosophy. Topics may include: civic virtue, consumerism, current events, economic justice, popular culture (film, music, television), religion and secularism, etc. 1 term - 4 credits. Normally offered every year.

Term:
Offered Both Fall and Spring
• PHIL-E123 Service Learning Component

Prerequisites:

PHIL-123 concurrently and Instructor consent

Credits:

0.00

Description:

Service Learning Component

Type:

Expanded Classroom Requirement, Local Engagement Experience

• PHIL-H123 Honors Social Ethics: The Good Life

Credits:

4.00

Description:

An examination of contemporary Western society, particularly in the United States, in relation to philosophical attempts to define the good life. Current books that exhibit a philosophical approach towards important contemporary social issues will be discussed, as well as classics in philosophy. Topics may include: civic virtue, consumerism, current events, economic justice, popular culture (film, music, television), religion and secularism, etc. Prerequisite: Philosophy majors, minors, or honor students only. 1 term -4 credits.

Term:

Occasional

Type:

Honors

• PHIL-127 Contemporary Moral Issues
PHIL-H127 Honors Contemporary Moral Issues

Credits:
4.00

Description:
A critical examination of a number of contemporary moral issues such as: abortion, affirmative action, animal rights, capital punishment, cloning, drug legalization, environmental ethics, euthanasia, genetic engineering, gun control, pornography, same-sex marriage, suicide, war and terrorism, etc. 1 term - 4 credits. Normally offered every year.

Term:

Offered Both Fall and Spring

PHIL-E127 Service Learning Component

Prerequisites:
PHIL-127 concurrently and Instructor consent

Credits:
PHIL-210 History of Ancient & Medieval Philosophy

Credits:
4.00

Description:
The study of philosophical thought from the period of the ancient Greek philosophers through the Medieval thinkers, including such philosophers as Socrates, Plato, Aristotle, Epicurus, Zeno, Parmenides, Pythagoras, Protagoras, Augustine, Aquinas, Anselm, and Abelard. An introductory course designed to equip the student with a well grounded understanding and appreciation of Philosophy. 1 term - 4 credits. Normally offered every year.

Term:
Offered Fall Term

PHIL-211 History of Modern Philosophy

Credits:
4.00

Description:
A study of the prominent modern thinkers, such as Descartes, Leibniz, Spinoza, Locke, Berkeley, Hume, and Kant. The course is an historical survey of the key concepts, problems and developments in modern philosophy including rationalism, empiricism, and skepticism. The following themes
central to Modern philosophy will be addressed: the nature of reality; the limits of human knowledge; self and self-identity; mind and body; freedom in theory and practice; reason vs. sentiment in ethics. 1 term - 4 credits. Normally offered every year.

Term:
Offered Spring Term

Type:

Humanities & History, Humanities Literature Requirement

- **PHIL-212 Formal Logic**

  Credits:

  4.00

  Description:

  An introduction to formal (or semi-formal) study of the basic types of deductive arguments (propositional and syllogistic logic). 1 term - 4 credits. Normally offered every year.

  Term:

  Occasional

  Type:

  Quantitative Reasoning

- **PHIL-219 Philosophy of Art**

  Credits:

  4.00

  Description:

  What counts as art? What is beauty? Are there objective standards of beauty? This course examines the nature of aesthetic experience, art, beauty, and creativity. Through the classic and contemporary readings, the students will be introduced to philosophical issues concerning the meaning of art,
artistic representation, perceptions of art, interpretation, and criticism. Students will be encouraged to reflect on their own experience of art and explore the relationships among the artist, the audience, the artwork, and the world. 1 term - 4 credits. Normally offered every third year.

Type:

Humanities & History, Humanities Literature Requirement, Vis. & Perform Thry & Hst

- **PHIL-228 Feminist Philosophy**

  **Credits:**
  
  4.00

  **Description:**
  
  This course is an introduction to the philosophy of feminist thought. Feminist theories of epistemology, metaphysics and morality will be examined as critiques of traditional philosophy. Feminist perspectives and methodologies include radical, liberal, postmodern, as well as more recent trends in ecofeminism. Special emphasis will be placed on explicit and implicit practices of alienation and exclusion as they have unfolded in the gendering of thought, truth, and reality. 1 term - 4 credits. Normally offered every third year. C b

  **Term:**
  
  Occasional

  **Type:**
  
  Cultural Diversity Opt A, Cultural Diversity BFA, Diverse Perspectives

- **PHIL-229 Eco-Feminism**

  **Prerequisites:**
  
  PHIL 119, or PHIL 123, or PHIL 127

  **Credits:**
  
  4.00

  **Description:**
Examines the political, social, and ecological problems facing us as a global community. Having its roots in feminist theory and deep-ecology, eco-feminism provides a critical framework for ecological responsibility and accountability. Writings from eco-feminist thinkers and environmental activists around the world will be used to highlight the philosophical and political conflicts and challenges, including globalization and loss of biodiversity, global warming, international human rights, the relationship of gender and nature, and modes of redress for eco-justice and sustainable development.

Type:
Diverse Perspectives

- **PHIL-235 The Meaning of Life**

  Credits:
  4.00

  Description:
  The question about the meaning of life is among the oldest and most perplexing questions of humanity. What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our own destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? While our main focus will be philosophical, students will also explore the multiplicity of perspectives on life-meaning through the works of artists, poets, theologians, and psychologists. We will approach the question of the meaning of life both as an exciting intellectual endeavor and an existential challenge of great practical importance.

- **PHIL-250 Social & Political Philosophy**

  Credits:
  4.00

  Description:
  An examination of persistent debates in political and social philosophy, such as the meaning of property and welfare, the tensions between liberty and equality, censorship and freedom of expression, the relation of church and state, the possibility of political education and civic virtue, legitimacy of the state and revolution, war and problems of end and means, addressing historic injustice, such as racism, genocide, or sexism, among other topics. The class will focus on no more than two such themes. Students will read both classic and contemporary writings to address both the historical roots and the contemporary treatment of these questions. 1 term - 4 credits. Normally offered every year.

  Term:
  Occasional
• PHIL-251 Philosophy of Race & Gender

Credits:

4.00

Description:

Prejudice of many kinds, such as racism and sexism, is so embedded in our social institutions, and is so traditional and pervasive that we often fail to notice it. In this course, we will deal with the history and nature of racism and sexism, as well as with possible solutions to these problems, including affirmative action and busing. Also to be discussed will be homosexuality, pornography and sex roles. 1 term - 4 credits. Normally offered alternate years.

Term:

Occasional

Type:

Cultural Diversity Opt A

• PHIL-255 Science, Myth, and Society

Credits:

4.00

Description:

Both mythology and science arise from the human need to explain the world, to understand its laws, and give an account of its origin. This course focuses on the controversial relationship between myth and science and explores their historical roots, their social influence and their respective views of reality, human nature, and origin of the universe. Both historical controversies and contemporary debates, such as evolution vs. intelligent design, will be considered. Topics in the philosophy of science, such as the nature and scope of the scientific method, will also be addressed. 1 term - 4 credits. Normally offered alternate years.

Term:
• PHIL-260 Philosophy of Religion

Credits:
4.00

Description:

This course analyzes and interprets fundamental religious concepts and beliefs, examines the rational support for religious faith, and addresses the relation between religion and society. Fundamental questions concerning the nature and existence of God, salvation, and immortality will be explored, and for this the primary focus will be Western religious conceptions but may broaden to include other world religions. Other topics may include: whether all religions can be equally valid and true; the relation of religion and the state; the status of miracles; the history and psychology of religion; the conflict between religion and science. 1 term - 4 credits. Normally offered alternate years.

Term:
Occasional

Type:

Humanities & History, Humanities Literature Requirement

• PHIL-261 Eastern Philosophy

Credits:
4.00

Description:

The exposition and critical evaluation of Hinduism, Buddhism, Confucianism, Taoism, and Islam. Special attention is given to foundation principles as well as to the similarities and differences of each of these philosophies to basic ideas in Western philosophy. 1 term - 4 credits. Normally offered alternate years. C b

Term:
• PHIL-263 Native American Religion

Credits:

4.00

Description:

This course is an examination of Native American (Indian) religious experience, both the similarities and differences among the myths and rituals of the major tribes which comprise the background of our nation's history of Western migration and settlement. The emphasis will be on understanding how life was experienced by these peoples through a close look at the philosophical meanings of their mythology and ethics. 1 term - 4 credits. Normally offered alternate years. C a

Term:

Occasional

Type:

Cultural Diversity Opt A

• PHIL-265 Women in Spirituality

Credits:

4.00

Description:

An exploration into the various dimensions and ideologies concerning the role of the feminine in relation to the Divine. Belief systems, myths and archetypes from ancient Goddess worship to 20th century feminist theology will be examined in terms of the philosophical content and psychological consequences. Special emphasis will be placed on feminist metaphysical structures for understanding consciousness and Reality. Classes will be conducted by means of lectures, primary and secondary texts and class discussions. Normally offered alternate years. Cultural Diversity A

Term:
- **PHIL-266 African Philosophy**

  Credits:

  4.00

  Description:

  An introduction to both traditional and modern philosophy from the African continent. Topics include: the intellectual dimensions of oral-traditional cultures within Africa; the impact of colonialism on African belief systems; philosophical responses to colonization; contributions of modern and contemporary African thinkers to the fields of social, political, moral and aesthetic philosophy.

- **PHIL-267 Chinese Philosophy**

  Credits:

  4.00

  Description:

  A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course then considers Zen Buddhism, which is called Ch'an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.
- **PHIL-309 Philosophy of Freedom**

  Prerequisites:

  Prerequisite: One Philosophy course or consent of instructor.

  Credits:

  4.00

  Description:

  Focuses on the paradoxical relationship between freedom and responsibility and how that affects our thinking about freedom in the individual, social and political sphere. Both classical and contemporary thinkers will be considered. Prerequisite: One course in Philosophy or consent of instructor. 1 term - 4 credits. Normally offered every other year.

  Term:

  Offered Spring Term

- **PHIL-E309 Service Learning Component**

  Credits:

  0.00

  Description:

  Service Learning Component

  Type:

  Expanded Classroom Requirement

- **PHIL-316 Existentialism**

  Prerequisites:

  Prerequisite: One course in Philosophy or consent of instructor.

  Credits:
Description:

An overview of the existentialist tradition. Primary focus on issues and problems arising from the existentialist reaction to classical philosophy. Topics include: paradoxes and contradictions of human nature and human condition; radical freedom, commitment, and responsibility; existential anxiety, meaninglessness and the rejection of God; authenticity and self-deception; individuality and community. Philosophers to be discussed will include Kierkegaard, Nietzsche, Sartre, Camus, Dostoevsky, and Heidegger. Prerequisite: One course in Philosophy or consent of instructor. 1 term - 4 credits. Normally offered every other year.

Term:

Occasional

- PHIL-317 Independent Research

Prerequisites:

Prerequisite: Consent of instructor.

Credits:

1.00- 4.00

Description:

This course focuses on philosophical research and writing. It is designed as an independent research course to allow students the opportunity to focus on a topic of their choice and develop critical skills in writing and research methods. Students will be required to produce a research paper of a length commensurate with the number of credits in the course, complete with abstract, thesis, outline, bibliography, and primary and secondary sources. Students will be expected to follow MLA guidelines. Prerequisite: Consent of instructor. 1 term -1-4 credits (variable). Normally offered on an as-needed basis.

Term:

Occasional

- PHIL-318 Philosophy of Law

Prerequisites:
Prerequisite: One course in Philosophy or Instructor's consent

Credits: 4.00

Description:

Readings may include a range of classical authors, such as Plato and Aquinas, as well as the works of such 20th-century legal philosophers as H.L.A. Hart, Dworkin and Rawls. Also included may be leading jurists such as Oliver Wendell Holmes and Learned Hand. Issues discussed may include the nature of law, its relation to justice, and how the legal system should operate to arrive at just decisions. Prerequisite: One course in Philosophy or consent of instructor. 1 term - 4 credits. Normally offered every third year.

Term:

Occasional

• PHIL-319 Topics in Applied Ethics
  
  Prerequisites:

  PHIL-119, PHIL-123, PHIL-127 or PHIL-120

  Credits: 4.00

  Description:

  This course will address in depth one or more specific issues in applied ethics. Topics will vary and may range from applied issues in political thought, such as just war theory or transitional justice, to specific questions in professional ethics or social policy, such as end-of-life care, economic justice, or the role of technology in the human future. Prerequisite: PHIL 119, or 123, or 127. 1 term - 4 credits. Normally offered every other year.

  Term:

  Occasional

  Type:

  Cultural Diversity Opt B
• PHIL-362 Environmental Ethics

Prerequisites:

PHIL-119, PHIL-123, PHIL-127 or PHIL-120

Credits:

4.00

Description:

An examination of the moral issues involved in the interaction of humans with their natural environment. Topics include: the environmental crisis, human-centered vs. nature-centered ethics, intrinsic value in nature, obligations to future generations, the importance of preserving endangered species and wilderness, radical ecology, eco-feminism, and the role of social justice in environmental issues. Prerequisite: PHIL 119, or 123, or 127. 1 term -4 credits. Normally offered every year.

Term:

Occasional

• PHIL-363 Bio and Medical Ethics

Prerequisites:

Prerequisite: Phil 119, or 123, or 127.

Credits:

4.00

Description:

An examination of the moral problems facing health-care practitioners, their patients, and others involved with the practice of medicine in today's society. Issues include euthanasia, the ethics of medical experimentation, the use of reproductive technologies, genetic counseling and genetic engineering, truth-telling and confidentiality in doctor-patient relationships, the cost and availability of medical care. Normally offered every third year.

Term:

Occasional
• PHIL-364 Business Ethics

Prerequisites:

PHIL-119, PHIL-123, PHIL-127 or PHIL-120

Credits:

4.00

Description:

An examination of the ethical questions in the working life and policies of the business and professional sectors of society. The focus will vary, but common themes will include: the role of commerce in civil society; the relation of business to conceptions of economic and social justice; the meaning and application of codes of ethics; obligations of corporations and professional organizations to shareholders and stakeholders; responsibilities to clients and colleagues; workplace conduct; the nature of success and conflicts between legal and moral obligations; the impact of globalization. The course will employ a variety of readings, including ethical theory and specific case studies. Prerequisite: PHIL 119, or 123, or 127. 1 term -4 credits. Normally offered every other year.

Term:

Occasional

• PHIL-401 History of Ethics and Political Philosophy 1: Ancient and Medieval

Prerequisites:

PHIL-210, PHIL-211, 4 credits of a 400-level PHIL course, and Instructor consent

Credits:

4.00

Description:

A survey of major works and themes of moral and political philosophy from ancient Greece to the late medieval period. Topics covered will include the nature of moral duties, the connection between happiness and morality, citizenship and virtue, the meaning of a good life, the attractions and limitations of moral relativism, the foundations of legitimate government, arguments for and against democracy, realism and idealism in statecraft, and the relationship between law and ethics. Authors may include the Pre-Socratic thinkers, Plato, Aristotle, Cicero, Augustine, and Aquinas, among others. Prerequisite: Consent of instructor. 1 term -4 credits. Normally offered every year in the fall.

Term:
• PHIL-402 History of Ethics & Political Philosophy II

Prerequisites:

PHIL-210, PHIL-211, 1 400-level PHIL course, and Instructor consent

Credits:

4.00

Description:

A continuation of PHIL 401, covering the early modern era to the dawn of the 20th century. Authors may include Machiavelli, Hobbes, Locke, Rousseau, Kant, Hegel, Mill, Marx, and Nietzsche, among others. Prerequisite: Consent of instructor. 1 term -4 credits. Normally offered every year in the spring.

Term:

Offered Spring Term

• PHIL-414 Topics in Philosophy

Credits:

4.00

Description:

A detailed exposition and evaluation of a specific topic or of the views of one major philosophical thinker or group of thinkers. Readings from both primary and secondary sources. Prerequisite: PHIL 210 or 211 or consent of instructor. 1 term - 4 credits. Normally offered every year.

Term:

Offered Both Fall and Spring

• PHIL-416 Plato: Profiles in Philosophy
Prerequisites:

Prerequisite: PHIL 210 or consent of instructor.

Credits:

4.00

Description:

A detailed study of Platonic texts and issues. Works studied will vary but will often include dialogues such as the Apology, Euthyphro, Phaedo, Republic, and Symposium. Themes may include, among others: the nature of philosophy and its relation to society; the dialogue form and the character of Socrates; the difference between truth and opinion; the meaning of virtue; justice and the ideal regime; the theory of forms and the nature of reality; love, death, and transcendence. Prerequisite: PHIL 210 or consent of instructor. 1 term - 4 credits. Normally offered every third year.

- PHIL-418 Kant: Profiles in Philosophy

  Prerequisites:

  PHIL 211

  Credits:

  4.00

  Description:

  An examination of Kant's ethics and theory of knowledge, including the following topics: structures of our knowledge of nature and the empirical world; the limits of rationality; the possibility of any knowledge of God, the soul and other metaphysical entities; the antinomies (paradoxes) of pure reason; Kant's theory of unconditional morality based on duty; the idea of the categorical imperative; autonomy and universal moral law; the problem of evil. Selections from Kant's political writings will also be introduced. Prerequisite: PHIL 211 or consent of instructor. 1 term - 4 credits. Normally offered every third year.

  Term:

  Occasional

- PHIL-423 Advanced Formal Logic

  Prerequisites:
Prerequisite: PHIL 212 or consent of instructor.

Credits: 4.00

Description:

In this course, students will put to work the logical theory developed in Formal Logic (Phil 212). In particular, students will use First-Order Logic to investigate computability and computation theory. Goedel's First and Second Incompleteness Theorems are a particular focus in the course. Prerequisite: PHIL 212 or consent of instructor. 1 term -4 credits. Normally offered alternate years.

Term:

Occasional

- **PHIL-510 Independent Study**
  
  Prerequisites:
  
  Prerequisite: PHIL 210 and 211 and consent of instructor.
  
  Credits: 1.00-4.00
  
  Description:
  
  Students meet with a department member to pursue advanced studies in areas of particular interest to them.
  
  Term:
  
  Offered Both Fall and Spring

- **PHIL-513 Internship in Applied Ethics**
  
  Prerequisites:
  
  PHIL-119, PHIL-123, PHIL-127 or PHIL-120 and consent of instructor
  
  Credits:
Description:

Students in this course will serve as interns in a department-approved position with a service provider, professional organization, government agency, or non-governmental organization whose work is relevant to issues in applied ethics. A faculty mentor will meet with students regularly to develop individually designed programs of readings and to discuss this material and its relation to the internship experience. In addition to the substantial time commitment to the internship, course requirements will usually include a journal and a research project. PHIL 119 or 123 or 127 and consent of instructor. 1 term - 4 credits. Normally offered every year.

Term:

Offered Both Fall and Spring

Type:

Expanded Classroom Requirement

**PHIL-515 Senior Symposium**

Prerequisites:

Prerequisite: PHIL 210 and 211 and consent of instructor.

Credits:

4.00

Description:

This is a required course for all students in the major, to be taken in the Spring Semester of their senior year. Students will prepare a portfolio of their previous coursework, collaborate with the faculty symposium leader on a selection of texts to read in common with other seniors, and prepare one paper for delivery at the Senior Symposium, usually held in late April. Students seeking Honors in Philosophy must take this course to complete the senior thesis. PHIL 210 and 211 and consent of instructor. 1 term - 4 credits. Normally offered Spring Semester every year.

Term:

Offered Spring Term

**PHIL-HE123 Service Learning Component**
PHIL-HE127 Service Learning Component

Credits:
0.00

Description:
Service Learning Component

Type:
Expanded Classroom Requirement, Local Engagement Experience, Honors

PHYS-111 College Physics I

Prerequisites:
Take MATH-121 or MATH-134 or permission of Physics department chair; PHYS L111 taken concurrently

Credits:
3.00

Description:
Introduction to the fundamental principles of physics. Study of vectors, Newton's laws, rotations, rigid body statics and dynamics, simple harmonic motion, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.
PHYS-L111 College Physics Lab I

Prerequisites:
PHYS 111 concurrently

Credits:
1.00

Description:
Introduction to the fundamental principles of physics. Study of vectors, Newton's laws, rotations, rigid body statics and dynamics, simple harmonic motion, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks and formal reports required.

PHYS-112 College Physics II

Prerequisites:
PHYS-111 and PHYS-L11. Must be taken concurrently with PHYS-L112.

Credits:
3.00
Description:
Continuation of the fundamental principles of physics. Study of electric forces and fields, electric potential, DC circuits, electromagnetic induction, magnetic fields, AC circuits, introduction to optics, introduction to atomic, nuclear and particle physics.

Term:
Offered Spring Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **PHYS-L112 College Physics Lab II**

  Prerequisites:
  
  PHYS 111 and PHYS L111; PHYS 112 must be taken concurrently

  Credits:
  
  1.00

  Description:
  
  Continuation of the fundamental principles of physics. Study of electric forces and fields, electric potential, DC circuits, electromagnetic induction, magnetic fields, AC circuits, introduction to optics, introduction to atomic, nuclear and particle physics. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

  Term:
  
  Offered Spring Term

  Type:

  NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **PHYS-151 University Physics I**

  Prerequisites:
Take MATH-121 or MATH 165. PHYS L151 concurrently

Credits:

3.00

Description:

Introduction to the fundamental principles of physics using calculus. The course includes the study of vectors, Newton's laws, rotations, rigid body statics and dynamics, simple harmonic motion, heat and temperature.

Term:

Offered Both Fall and Spring

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR

- PHYS-L151 University Physics Lab I

Prerequisites:

PHYS 151 concurrently

Credits:

1.00

Description:

The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton's laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

Term:

Offered Both Fall and Spring

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR
• PHYS-152 University Physics II

Prerequisites:

PHYS-151 and PHYS-L151. Must be taken concurrently with PHYS-L152.

Credits:

3.00

Description:

This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss' law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday's law and AC circuits are discussed. This is followed by Maxwell's equations, electromagnetic waves, and properties of light.

Term:

Offered Both Fall and Spring

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR

• PHYS-L152 University Physics Lab II

Prerequisites:

PHYS 151 and L151 and PHYS 152 must be taken concurrently

Credits:

1.00

Description:

The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday's law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.
• PHYS-153 University Physics III

Prerequisites:
Take MATH-121 or MATH-165;

Credits:
3.00

Description:
This calculus-based course is the introduction of the topics of modern physics. It begins with special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom. Then Schrodinger's equation is introduced with use of wave functions, particle box, barrier penetration, quantum mechanical tunneling, the Pauli Exclusion principle, the development of the periodic table, and the X-ray spectra. Development of solid state physics with bonding in molecules, band theory of solids and semiconductor behavior. The final topics cover nuclear physics, radioactivity, half-life, nuclear fission and fusion, medical uses of radiation, elementary particle physics and introduction to astrophysics.

Term:
Offered Fall Term

Type:
SCI TECH ENGNR

• PHYS-L153 University Physics III Lab

Credits:
1.00
The laboratory consists of experiments to illustrate the basic concepts of special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom.

Type:

SCI TECH ENGNR

**PHYS-205 Introduction to Astrophysics**

Prerequisites:

Prerequisite: PHYS 151-152

Credits:

4.00

Description:

An introduction to the concepts and methods of astrophysics; including a history of astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors, space programs, science and technology in society. Astronomy of the cosmos; sun, stars, interstellar materials, galaxies, pulsars, quasars, black holes; nature of time relativity, cosmology.

Term:

Offered Fall Term

**PHYS-206 Introduction to Radiation Oncology**

Prerequisites:

Radiation Therapy (Major or Certificate) or Medical Dosimetry Students Only

Credits:

4.00

Description:
This course will serve as an introduction to the role of the radiation therapist and medical dosimetrist in a Radiation Oncology department. Through a combination of detailed lectures, discussions, role-playing, case studies, and hands-on laboratory exercises, students will be introduced to the professional and clinical aspects of their respective professions. Additional topics include radiation safety, patient rights, infection control, communication for the clinic, patient assessment, and psychosocial aspects of cancer including death and dying.

**Term:**
Offered Fall Term

- **PHYS-213 Introduction to Earth & Planetary Interiors**

  **Prerequisites:**
  CHEM-111 and CHEM-112 OR PHYS-111 and PHYS-112

  **Credits:**
  4.00

  **Description:**
  This course introduces science majors to the constitution, composition, and energetics of the Earth's interior. It includes several important topics in Earth and planetary sciences, such as the geomagnetic field and the geodynamo, concepts of seismic exploration, geophysical fluid dynamics, and applications of geophysical methods in exploration of energy resources. It also relates the inner dynamics of planets to their surface and atmospheric effects by including topics such as evolution of planetary tectonics using seismology, gravity, geodesy, magnetics, and heat flow; dynamics of water and carbon cycles; and the origin of water on Earth and Mars. This course welcomes basic science, environmental science, engineering, and math majors.

- **PHYS-215 Nanomaterials and the Energy Problem**

  **Prerequisites:**
  CHEM 111-112 or PHYS 111-112 Or Permission of Instructor

  **Credits:**
  4.00

  **Description:**
This course is designed as an introduction to nanotechnology and some of its important uses. It is aimed at science majors who have taken basic courses in physics or chemistry. The course will cover the properties and uses of carbon-nanotubes, nanocomposites, and other nanomaterials that are being fabricated in labs and industries around the world. It will serve as an introduction to the important role of nanomaterials in solving modern-day energy problems.

Term:
Occasional

- **PHYS-301 Clinical Radiation I**

  Prerequisites:

  PHYS 206; Radiation Therapy & Medical Dosimetry Students Only

  Credits:

  3.00

  Description:

  Through a systems-based approach, this course will review anatomy and physiology while teaching medical terminology. This course will also discuss the major cancers associated with each anatomical system and introduce the student to radiation therapy treatment techniques and procedures.

  Term:

  Offered Spring Term

- **PHYS-L301 Radiation Therapy Rotation I**

  Prerequisites:

  Radiation Therapy Students Only

  Credits:

  1.00

  Description:
Provides the necessary clinical experience to become a radiation therapist. All labs are conducted at our clinical affiliates. Under the supervision of licensed radiation therapists, the students will become increasingly proficient in the manipulation of treatment equipment, will gain a thorough understanding of radiation treatment plans, will deliver a prescribed radiation dose to cancer patients, and will acquire knowledge of all relevant aspects of patient care. These labs are available only to students enrolled in the clinical track.

Term:
Offered Spring Term

- **PHYS-302 Clinical Radiation II**
  
  **Prerequisites:**
  
  Radiation Therapy (Major or Certificate) or Medical Dosimetry Students Only
  
  **Credits:**
  
  3.00
  
  **Description:**
  
  This course is a continuation of MS 301. Through the same didactic approach, the course will cover all of the anatomical systems and their related medical terminology NOT covered in MS 301.

  **Term:**
  
  Offered Fall Term

- **PHYS-L302 Radiation Therapy Rotation II**
  
  **Prerequisites:**
  
  Radiation Therapy (Major or Certificate) Students Only
  
  **Credits:**
  
  1.00

  Term:

  Offered Spring Term

- **PHYS-L304 Radiation Therapy Practicum**
  
  **Prerequisites:**
  
  Take PHYS-301 PHYS-L301;*Course fulfills the following: Expanded Classroom Requirement.
  
  **Credits:**
  
  1.00
  
  **Description:**
Student radiation therapists will spend 12 weeks (full-time, 40 hrs/wk) gaining hands on patient care experience in the department of radiation oncology at our clinical affiliates. Under constant supervision by licensed therapists, the student will be guided toward the application of theory in the real world of cancer treatment.

Term:
Summer

Type:
Expanded Classroom Requirement

- **PHYS-L311 Medical Dosimetry Rotation I**
  
  Prerequisites:
  Medical Dosimetry Students Only

  Credits:
  1.00

  Description:
  Under the supervision of a Certified Medical Dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Two, 8-hour days per week, TTH.

  Term:
  Offered Spring Term

- **PHYS-L312 Medical Dosimetry Rotation II**
  
  Prerequisites:
  Medical Dosimetry Students Only

  Credits:
  1.00
Under the supervision of a certified medical dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Three 8-hour days per week, MWF.

Term:
Offered Fall Term

• PHYS-L313 Medical Dosimetry Rotation III

Prerequisites:

PHYS L312, Medical Dosimetry Students Only

Credits:

1.00

Description:

Under the supervision of a Certified Medical Dosimetrist, students will gain hands on treatment planning experience in a clinical setting. Three, 8-hour days per week, MWF.

Term:
Offered Spring Term

• PHYS-L314 Medical Dosimetry Practicum

Prerequisites:

Take PHYS-301 and PHYS-L311; *Course fulfills the following: Expanded Classroom Requirement.

Credits:

1.00

Description:
Student dosimetrists will spend 12 weeks (full-time, 40 hrs/wk) gaining hands on treatment planning experience in the department of radiation oncology at our clinical affiliates. Under constant supervision of certified medical dosimetrists, the student will be guided toward the application of theory in the real world of cancer treatment planning.

Term:
Summer
Type:
Expanded Classroom Requirement

- **PHYS-315 Radiation Physics I**
  
  Prerequisites:
  
  PHYS L315 concurrently; Radiation Biology, Radiation Science, Radiation Therapy (Major or Certificate), or Medical Dosimetry Students Only

  Credits:
  
  3.00

  Description:

  Content is designed to establish a thorough knowledge of the radiation physics used in radiation therapy treatments. Topics to be covered in this course include a review of basic physics (energy, mass, matter, SI units), structure of matter, types of radiations, nuclear transformations, radioactive decay, the fundamentals of x-ray generators and x-ray production, interactions of x and gamma rays with matter, absorbed dose, measurements of dose, principles of and practical use of ionization chambers and electrometers, Geiger counters and other survey meters, principles and practical use of TLDs, film, calorimetry, scintillation detectors, radiation protection and quality assurance.

  Term:
  
  Offered Fall Term

- **PHYS-L315 Radiation Physics I Lab**

  Prerequisites:

  PHYS 315 concurrently

  Credits:
This lab will cover a broad range of experiments associated with the Department of Radiation Oncology at Massachusetts General Hospital. Topics include: Quality assurance measurements for radiation therapy, calibration of radiation teletherapy unit using ionization chambers, measurements of dose distribution via film, measurements of dose in a phantom via TLDs, radiation protection survey of therapy installation and brachytherapy sources, and radiation biology.

Term:
Offered Fall Term

Type:
Expanded Classroom Requirement

• PHYS-317 Radiation Physics II

Prerequisites:
PHYS 315; Radiation Science, Radiation Therapy and Medical Dosimetry Students Only

Credits:
4.00

Description:
This course is intended to expand on the concepts and theories presented in Radiation Physics I. It will provide a detailed analysis of the treatment units used in external beam radiation therapy, their beam geometry, basic dose calculations and dose distributions. This course will also cover the principles, theories, and uses of brachytherapy. This course was previously MS 412

Term:
Offered Spring Term

• PHYS-333 Math Methods of Physics

Prerequisites:
Take ECE-225 and ECE-L225;

Credits:
4.00

Description:
Applications of specific mathematical methods to problems in physics. Topics include complex analysis, integral transforms, eigenvalue problems, partial differential equations and group theory. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

Term:
Offered Fall Term

- **PHYS-350 Planetary Materials**

  Prerequisites:
  
  PHYS-213

  Credits:
  
  4.00

  Description:
  This course provides an overview of the chemical and physical properties of the material constituents of the Earth and terrestrial planets, including minerals, rocks, lavas, and supercritical water. Topics include mineral structure and composition, bonding, optical properties, x-ray diffraction, phase transformations, and surface properties. The physics and chemistry of energy materials, synthetic nanomaterials will be included with emphasis/focus on energy resources, environmental impact, and geopolitical implications. There are no mandatory prerequisites for this course, but students who have taken introductory chemistry and/or physics will be familiar with some concepts discussed, and will find the going easier. Some background in Earth science is assumed (at the level of PHYS-213), and competence in basic chemistry is expected (some review will be provided where appropriate). The course is not mathematically intensive, but an appreciation of the fundamentals of calculus is important.

- **PHYS-360 Topics in Astrobiology and Life in Extreme Environments**
The discovery of extreme environments and new insights into evolution, emergence and sustenance of life has expanded the view of life into a broader feasibility outside Earth. Discovery of exoplanets has opened up serious scientific exploration towards search for life in other planets. This upper-level course will introduce the scientific principles that underlie this newly evolving science of astrobiology. Discussion will include unique perspectives in life at extreme environments within Earth and their implication to the concepts of evolution and origins of life that form the basis for better understanding the habitability within our planet as well as any possibility of life in other planets.

- **PHYS-361 Classical Mechanics I**
  
  **Prerequisites:**
  
  PHYS 152 ; MATH 265 which may be taken concurrently
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Newton's laws of motion, projectiles, momentum, energy, conservation laws, oscillations, Lagrange equations, generalized momenta, central forces, orbits. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).
  
  **Term:**
  
  Offered Fall Term

- **PHYS-362 Classical Mechanics II**
Prerequisites:

PHYS 361

Credits:

4.00

Description:

Mechanics in non-inertial frames, rotational motion of rigid bodies, coupled oscillations, nonlinear mechanics and chaos, Hamiltonian mechanics, collision theory, continuum mechanics. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

Term:

Offered Spring Term

- **PHYS-381 Observational Astronomy**

  Prerequisites:

  PHYS 151 AND PHYS 152 OR PHYS 153.

  Credits:

  2.00-3.00

  Description:

  The topics covered include theoretical foundations of observational astronomy, designs of telescopes, instrumentation for telescopes, data acquisition and management, as well as practical problems in observational astronomy. Offered together with the laboratory component PHYS L381.

- **PHYS-L381 Laboratory Research Assistantship III**

  Prerequisites:

  Permission of Dept. Chair Required
Description:

This is a laboratory based research experience which involves teams of students assisting faculty in Physics/Astronomy research projects. Students will participate in an intensive laboratory training period in the Canary Islands and will follow through with research work in consultation with faculty based in the Madrid and Boston campuses. A final paper and presentation is required. Permission of department chair is required for registration and determination of course credits.

- **PHYS-411 Physics Senior Project**
  
  Prerequisites:
  
  Senior Standing
  
  Credits:
  
  4.00
  
  Description:

  The senior project is the capstone research experience of the undergraduate Physics Major. This one semester course requires students to work one on one with faculty in an area of mutually agreed upon research. In general, the effort will involve the use of mathematical and programming skills, laboratory techniques, and possibly field work. The end result will be both a paper and a formal presentation to both faculty and students.

  Term:

  Offered Spring Term

- **PHYS-415 Dosimetry I**

  Prerequisites:

  PHYS 315; PHYS L415 concurrently; Radiation Therapy & Medical Dosimetry Students Only

  Credits:

  3.00
This course will discuss the factors that influence treatment planning and govern the clinical aspects of patient treatment. Topics to be covered include treatment planning with 3-D CT and MRI beams, isodose plan descriptions, clinical applications of treatment beams and advanced dosimetric calculations. This course will also contrast new emerging technologies with conventional radiation therapy techniques (SRT, SRS, IMRT, Image Guided Therapy, Respiratory Gating).

Term:
Offered Spring Term

- **PHYS-L415 Dosimetry I Lab**

  Prerequisites:
  
  PHYS 415 concurrently; Radiation Therapy & Medical Dosimetry Students Only

  Credits:
  
  1.00

  Description:
  
  This lab will provide the student with the opportunity to apply clinical dosimetry principles and theories learned in the classroom to actual treatment planning situations within the clinic. Through hands-on lab exercises the student will demonstrate the use of the treatment planning instruments and interpret information they compute.

  Term:
  
  Offered Spring Term

- **PHYS-416 Radiation Biology**

  Prerequisites:
  
  PHYS 315;

  Credits:
  
  4.00
Topics covered include: physio-chemical aspects of energy absorption, the sequence of events after irradiation occurring on the molecular, cellular and organized tissue levels, radiation response and repair of eukaryotic cells, effects of radiation quality, dose rate, environmental conditions, cell cycle kinetics, tumor and normal cell population dynamics, radiation-induced carcinogenesis and mutagenesis, tumor pathophysiology and radiobiology, and recent advances in experimental radiation oncology.

Term:

Offered Spring Term

• PHYS-417 Dosimetry II

  Prerequisites:

  Medical Dosimetry Students Only

  Credits:

  4.00

  Description:

  This course is a continuation of Clinical Dosimetry I and will focus on advanced treatment planning techniques including intensity modulated radiation therapy (IMRT), arc therapy, stereotactic treatment planning, and proton therapy. The advantages of each technique/modality over conventional 3D-treatment planning will be discussed. This will also be contrasted against the specific challenges presented by each technique such as the need for better immobilization, need for 4D CT scanning and daily IGRT (kV matching and/or CBCT).

  Term:

  Offered Fall Term

• PHYS-420 Radiation Oncology & Pathology

  Prerequisites:

  Radiation Therapy (Major or Certificate) or Medical Dosimetry Students Only

  Credits:

  4.00
This course, taught by Massachusetts General Hospital physicians will review cancer epidemiology, etiology, detection, diagnosis and prevention, lymphatic drainage, and treatment. The pathology(s) of each cancer will be presented in detail including the rationale for each preferred modality of treatment.

Term:
Offered Fall Term

**PHYS-422 Radiology**

Prerequisites:
Radiation Therapy (Major or Certificate) or Medical Dosimetry Students Only

Credits:
4.00

Description:

This course will begin with an introduction to radiology, reviewing x-ray production and discussing basic radiation physics, image formation (Kv, mA) and distortion (blur, magnification), conventional processing and digital imaging. The above-mentioned radiographic imaging concepts will be presented with conventional lectures as well as with several imaging laboratories. In addition, the basic principles of each imaging modality, including mammography, CT, MRI, Nuc Med, and Ultra Sound, will be presented. With the use of departmental tours and guest lecturers, the use, benefits and limitations of each will be discussed. Building upon the information previously presented, radiographic anatomy will also be covered with an emphasis on cross sectional anatomy. Students will review basic anatomy viewed in sectional planes (axial/transverse) of the body. Using CT and MRI images, the topographic relationship between internal organs and surface anatomy will be interpreted and discussed.

Term:
Offered Fall Term

**PHYS-431 Undergraduate Research in Physics**

Credits:
4.00
This course provides a mechanism for students to receive academic credit for engaging in research. A faculty member in the physics department will serve as the research advisor for each student. This faculty advisor will have the primary responsibility for overseeing each individual student's work and will decide the grade for the course. The research project may be initiated by the student or by a faculty member.

Term:
Offered Spring Term

- **PHYS-435 Brachytherapy**

  Prerequisites:
  Medical Dosimetry Students Only

  Credits:
  4.00

  Description:
  Topics in this course will include, radioactive sources, calibration, instrumentation, factors affecting dose calculations, definitions of LDR, MDR and HDR, treatment planning and clinical dose calculation, implantation techniques, implant localization/verification, regulations, radiation safety, storage and QA. Detailed coverage of prostate brachytherapy including LDR and HDR will be emphasized.

  Term:
  Offered Spring Term

- **PHYS-450 Dosimetry Systems and Networking and Quality Assurance**

  Prerequisites:
  Senior Status; Medical Dosimetry Students Only

  Credits:
  4.00

  Description:
This course is designed for the medical dosimetry student, to include a general overview of computer systems and networking in the field of radiation oncology. A historical view of computers will be covered as well as the intricate uses in the medical field today. Oncology information systems such as MOSAIC and ARIA, as well as radiation therapy software used for imaging, contouring, treatment planning, and patient charting applications will be covered. Data and system security will also be addressed.

Term:
Offered Spring Term

- **PHYS-451 Modern Physics I**
  
  Prerequisites:
  
  PHYS 152
  
  Credits:
  
  4.00
  
  Description:
  
  Atoms and elementary particles, atomic, molecular and nuclear systems. Quantum states and probability amplitude, wave mechanics, and thermal properties of matter. Atomic spectra and structure, and molecular systems. Nuclear reactions, alpha and beta decay, and high energy physics.

- **PHYS-453 Modern Physics**
  
  Prerequisites:
  
  PHYS-153;
  
  Credits:
  
  4.00
  
  Description:
  
  Topics include atoms and elementary particles, atomic, molecular and nuclear systems. Quantum states and probability amplitude, wave mechanics and thermal properties of matter. Atomic spectra and structure, and molecular systems. Nuclear reactions, alpha and beta decay, and high energy physics. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to
test students’ currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

Term:
Offered Fall Term

- **PHYS-L455 Advanced Laboratory**

  **Prerequisites:**
  
  PHYS 451 and PHYS 452 or equivalent.

  **Credits:**
  
  2.00

  **Description:**
  
  Classical and modern experiments in physics; Experiments may include Frank Hertz experiment, Hall effect, nuclear magnetic resonance, quantum dots, detection of muons, x-ray spectroscopy, ellipsometry, physics of timbre of musical instruments, data acquisition.

  **Term:**
  
  Offered Fall Term

- **PHYS-461 Quantum Mechanics I**

  **Prerequisites:**
  
  PHYS-361

  **Credits:**
  
  4.00

  **Description:**
  
  Non-relativistic study of particle systems, wave mechanical treatment, development of the concepts of observables, state vectors, operators and matrix representations. Hilbert space, angular momenta, coupling, symmetries, scattering, and perturbation theory. Harmonic oscillator and Hydrogen
• PHYS-462 Quantum Mechanics II

Prerequisites:

PHYS 461, PHYS 361 and PHYS 362.

Credits:

4.00

Description:

Non-relativistic study of particle systems, wave mechanical treatment, development of the concepts of observables, state vectors, operators and matrix representations. Hilbert space, angular momenta, coupling, symmetries, scattering, and perturbation theory. Harmonic oscillator and Hydrogen atom. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

Term:

Offered Fall Term

• PHYS-463 Stellar Astrophysics

Prerequisites:

Prerequisite: PHYS 451-452, PHYS 461-462 1 term - 4 credits
Description:

Term:

Summer

- **PHYS-464 Statistical Physics**

  Prerequisites:

  PHYS-361, PHYS-151, PHYS-L151, PHYS-152, PHYS-L152, PHYS-153 and PHYS-L153

  Credits:

  4.00

  Description:

  Macroscopic objects are made up of huge numbers of fundamental particles whose interactions are well understood. Physical properties that emerge from these interactions are, however, not simply related to these fundamental interactions. In this course we will develop the tools of statistical physics, which will allow us to predict emergent cooperative phenomena. We will apply those tools to a wide variety of physical questions, including the behavior of glasses, polymers, heat engines, magnets, and electrons in solids. Computer simulations will be extensively used to aid visualization and provide concrete realization of models in order to impart deeper understanding of statistical physics.

- **PHYS-470 Radiation Science Internship**

  Prerequisites:

  Radiation Science Majors with 54 credits only

  Credits:

  1.00- 4.00

  Description:
Enables opportunity for students to participate in career-related experiential internship. Assists students in preparing for Radiation Science-related career and provides exposure to potential career option. Promotes development of necessary professional skills.

- **PHYS-475 Senior Seminar for Radiation Therapy**

  **Prerequisites:**

  Senior status, Radiation Therapy & Medical Dosimetry Students Only

  **Credits:**

  4.00

  **Description:**

  This course will be available to senior students enrolled in the Radiation Therapy and Medical Dosimetry programs. This seminar style course will serve a number of purposes; one will be to prepare our graduating students for board certification in their respective disciplines (AART for Radiation Therapy and MDCB for Medical Dosimetry). Exam preparation will include the use of lectures, student teaching, online teaching tools, mini mock exams, and a full-length mock exam. The seminar will also assist students with the preparation of their professional resumes including discussions regarding the skills necessary to make job interviews successful.

- **PHYS-476 Senior Seminar for Medical Dosimetry**

  **Prerequisites:**

  Senior Status, Radiation Therapy & Medical Dosimetry Students Only

  **Credits:**

  4.00

  **Description:**

  This course will be available to second year clinical students enrolled in the Medical Dosimetry program. This seminar style course will serve a number of purposes; one will be to prepare our graduating students for board certification in MDCB for Medical Dosimetry. Exam preparation will include the use of lectures, online teaching tools, mini mock exams, and a full-length mock exam. The seminar will also assist students with the preparation of their professional resumes including discussions regarding the skills necessary to make job interviews successful.

- **PHYS-477 Electricity and Magnetism**
Electrostatic field energy, methods for solution of boundary value problems. The magnetostatic field and magnetic circuits. Electromagnetic field energy, plane waves, wave guides and cavity resonators. Interaction of charge particles with electromagnetic fields. This course is available in a hybrid/online format where all lectures are online and meetings with the instructor are required once per week. These meetings are for the purpose of helping students with homework problems, points in the video lectures they did not understand, or quizzes to test students' currency with the online material. These meetings are typically scheduled in a classroom but it is possible for a small number of students abroad to make special arrangements with the instructor so that the weekly meetings are held using online technology which supports voice and equation writing (such as the virtual classroom in Blackboard collaboration).

Term:

Offered Fall Term

- PHYS-510 Independent Study

  Credits:
  
  4.00

  Description:

  Directed reading, lectures, seminar and research in selected areas of special interest.

  Term:

  Occasional

- PHYS-570 Internship in Physics

  Prerequisites:

  At least 54 credits

  Credits:

  2.00-4.00
Those students who intend to complete an internship must secure their own internship position prior to the start of the semester. A list of potential internship sites and their descriptions are available for students in the department's front office.

Type:

Expanded Classroom Requirement

- **PPE-401 Political Economy**

  Prerequisites:

  PHIL-119, PHIL-123, PHIL-127, or PHIL-120 and 2 of the following courses: GVT-110 GVT-225 EC-101 EC-102 PHIL-250 STATS-240 STATS-250 GVT-201 PHIL-212

  Credits:

  4.00

  Description:

  This interdisciplinary class brings together the fields of politics, philosophy, and economics at a high academic level. You will be confronted with hard questions about the sources, ends, and limits of government; the usefulness and troubles of free markets; the proper distribution of economic advantages in society; and what works best for building a just and efficient system of economic institutions.

- **PPE-510 Independent Study**

  Credits:

  1.00-4.00

  Description:

  Independent Study

- **PSYCH-114 General Psychology**

  Credits:
PSYCH-H114 General Psychology

Credits:

4.00

Description:

Surveys core theoretical concepts and contemporary empirical research from the major sub-fields of psychology: physiology; perception; cognition; learning; emotion; motivation; development; personality; psychopathology; psychotherapy; and social behavior. Required for psychology majors. Offered every semester.

Term:

Offered Both Fall and Spring

Type:

Social Science, Honors

PSYCH-215 Behavioral Statistics

Prerequisites:

PSYCH 114; Restricted to majors only unless with permission of instructor.
Introduces the use of statistics as tools for description and decision-making, including hypothesis testing. Prepares students for the analysis, interpretation, and evaluation of psychological research. Required for psychology majors; should be taken before the junior year. Offered every semester.

Term:
Offered Both Fall and Spring

Type:
Quantitative Reasoning

- **PSYCH-216 Research Methods and Design**

  Prerequisites:

  PSYCH 114 and PSYCH 215

  Credits:

  4.00

  Description:

  First provides an overview of the historical background and conceptual foundation of psychology as a science before introducing students to research methods employed in psychology including naturalistic observation, qualitative, correlational, quasi-experimental, and experimental designs. The experimental method and principles of experimental design are emphasized. The laboratory component of the class helps familiarize students with practical issues that arise when implementing an empirical research study. Required for psychology majors; should be taken before the junior year. Offered every semester.

  Term:

  Offered Both Fall and Spring

  Type:
• **PSYCH-219 Psychology of Trauma**

  Credits:

  4.00

  Description:

  Examines trauma from a historical, feminist, sociocultural and developmental perspective. This course will consider contemporary ways of conceptualizing, assessing, and treating psychological consequences resulting from exposure to traumatic stress. Classic and current reading materials will introduce students to leading theoretical models. Topics include war, natural disasters, child abuse, and rape. Prerequisite: PSYCH 114. 1 term - 3 semester hours. Normally offered alternate years.

  Type:

  Social Science

• **PSYCH-222 Human Sexuality**

  Credits:

  4.00

  Description:

  Examines the field of human sexuality across the life span. Topics include: sexual anatomy and physiology, sexual development, typical and atypical sexual behavior, sexual dysfunctions, current research on human sexuality, and relationship issues as they relate to sexuality and intimacy. Normally offered yearly.

  Term:

  Offered Both Fall and Spring

  Type:

  Social Science
• PSYCH-226 Theories of Personality

Prerequisites:

PSYCH 114

Credits:

4.00

Description:

Surveys the major theoretical approaches to personality including representative theorists from the psychoanalytic, trait, cognitive, behavioral, and humanistic perspectives. Topics include personality dynamics, personality development, and the study of individual differences. Normally offered yearly.

Term:

Offered Fall Term

Type:

Social Science

• PSYCH-233 Child Development

Prerequisites:

PSYCH 114

Credits:

4.00

Description:

Examines physical, cognitive, emotional, and social development in youth (i.e., from conception through adolescence). Surveys major developmental approaches including biological, learning, and contextual/environmental theories. Major focus is on normal development. Normally offered every semester.

Term:
• **PSYCH-236 Psychology of the Family**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Focuses on the various forms and structures of families and family life over time and across cultures, with emphasis on the psychological impact of such forms. The complex relationship among individual psychology, family relationships, and the larger social context is addressed. Topics include marriage, parenting, and divorce. Normally offered every semester.
  
  **Term:**
  
  Offered Both Fall and Spring
  
  **Type:**
  
  Social Science

• **PSYCH-241 Social Psychology**
  
  **Prerequisites:**
  
  PSYCH 114
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Studies the social determinants of the behavior of individuals in relation to groups and surveys current research findings in such major content areas as attribution, prejudice, conformity, obedience, social cognition, interpersonal attraction, altruism, and aggression. Normally offered every semester.
PSYCH-243 Organizational Psychology

Prerequisites:
Take PSYCH-114;

Credits:
4.00

Description:
Focuses on diversity concerns in various aspects of the psychology of the workforce. This includes job analysis, recruitment, selection, evaluation, training, retention, and termination. Employee morale, well-being, stress, and hardiness are considered.

Type:
Cultural Diversity Opt A, Social Science, Diverse Perspectives

PSYCH-245 Consumer Psychology

Credits:
4.00

Description:
Investigates the perceptual and motivational bases of consumer decision making in relation to advertising, packaging, brand loyalty, and other marketing considerations. Prior familiarity with psychological principles helpful but not essential. Normally offered alternate years.

Term:
Offered Fall Term
• **PSYCH-247 Asian Perspectives on Health and Work**

  Credits:
  4.00

  Description:
  Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants. Students critically analyze similarities and differences between Asian and Western psychological perspectives of health and work through didactic and experiential learning components. This course fulfills the Cultural Diversity Requirement and may fulfill the Expanded Classroom Requirement. Normally offered alternate years.

  Term:
  Offered Spring Term

  Type:
  Social Science, Asian Studies, Cultural Diversity Opt A, Diverse Perspectives

• **PSYCH-312 Cognitive Neuroscience**

  Prerequisites:
  PSYCH 114, PSYCH 215, PSYCH 216 and sophomore standing.

  Credits:
  4.00

  Description:
  Examines theory and research on a number of human cognitive processes, including topics of attention, perception, learning, memory, language processing, problem solving, social cognition, emotion, and reasoning. The field of cognition integrates knowledge from the multiple disciplines of
• PSYCH-313 Physiological Psychology

Prerequisites:

PSYCH 114, PSYCH 215 and PSYCH 216.

Credits:
4.00

Description:

Explores the organic basis for human and animal behavior. Topics include nervous system structure and function as well as neurological contributions to motivation, emotion, stress, and abnormal functioning. Normally offered yearly.

Term:
Offered Fall Term

Type:
Social Science

• PSYCH-314 Learning & Reinforcement

Prerequisites:

PSYCH 114 and Sophomore standing

Credits:
Description:

Examines the process of the storage of information, including its affective coloration and the role of incentives and rewards. Topics include: principles of classical and operant conditioning; verbal and episodic learning; and traditional and contemporary theory. Normally offered alternate years.

Term:

Offered Fall Term

Type:

Social Science

- PSYCH-315 Neuropsychological Syndromes

Prerequisites:

Take PSYCH-215 PSYCH-216;

Credits:

4.00

Description:

Provides students with a neuropsychological perspective on common neuropsychological disorders, including attention-deficit hyperactivity disorder (ADHD), learning disabilities, autistic spectrum disorders, seizure disorders, traumatic brain injury (TBI), multiple sclerosis, HIV, and various dementias. Normal aging will also be considered.

Term:

Offered Fall Term

Type:

Social Science

- PSYCH-317 Psychology of Addictions
Prerequisites:
PSYCH 114 and Sophomore standing

Credits:
4.00

Description:
Examines patterns of addictive behavior with an emphasis on physiological etiology. Social, historical, and other psychological perspectives are also discussed. Populations at high risk, the consequences of addiction, and research on interventions and treatment will also be addressed. Normally offered yearly.

Term:
Offered Spring Term

Type:
Social Science

• PSYCH-321 Introduction to Counseling Skills

  Prerequisites:
  PSYCH 114 and Sophomore standing

  Credits:
  4.00

  Description:
  Explores and examines basic models of helping and provides supervised practice of helping skills. Format includes lecture, discussion, role play, and video feedback. Normally offered yearly.

  Term:
  Offered Fall Term

  Type:
• PSYCH-324 Psychology of Identity and the Self

Prerequisites:

PSYCH 114 and Sophomore Standing.

Credits:

4.00

Description:

Focuses on the processes by which self-knowledge, self-awareness, self-conceptions, self-esteem, self-consciousness, and self-blame are developed and maintained. May also include consideration of: identity and the life story; biography, narrative, and lives; cognition and personality; cultural conceptions of self; and self psychology. Normally offered alternate years.

Term:

Offered Spring Term

Type:

Social Science

• PSYCH-325 Health Psychology

Prerequisites:

PSYCH 114 and Sophomore Standing

Credits:

4.00

Description:

Surveys theory and research in health psychology and behavioral medicine. Examines the bidirectional effects of social and behavioral processes on physical health and functioning, including topics such as HIV/AIDS, cancer, and cardiovascular disease. Psychological and physiological perspectives on stress and coping are a primary focus throughout the semester. Normally offered yearly.
• **PSYCH-326 Abnormal Psychology**

  **Prerequisites:**

  PSYCH 114, and Sophomore standing or permission of the instructor

  **Credits:**

  4.00

  **Description:**

  Introduces the concepts of psychological disorder and focuses on description and etiology of various mental health problems from a variety of different theoretical perspectives. Students develop familiarity with the DSM classification system and major disorders described within it, including mood and anxiety disorders, thought disorders, and personality disorders. Normally offered each semester.

  **Term:**

  Offered Both Fall and Spring

  **Type:**

  Social Science

• **PSYCH-333 Adult Development & Aging**

  **Prerequisites:**

  PSYCH 114 and Sophomore Standing.

  **Credits:**

  4.00
Surveys theory and research about the physical, mental, and psychological aspects of life-span development. Age-related changes in mental health, personality, self-image, sexual relations, friendships, career development and spirituality are explored. Aging may also be explored as a global, demographic and cross-cultural issue. Research surrounding death and dying, bereavement, and hospice/nursing home care is also presented. Normally offered alternate years.

Term:
Offered Both Fall and Spring

Type:
Social Science

- **PSYCH-334 Adolescent Development**

  Prerequisites:

  PSYCH-114 and sophomore standing

  Credits:

  4.00

  Description:

  Examines the physical, cognitive, emotional and social aspects of adolescence. Attention is given to identity, parent-adolescent relationships, values, sexuality, and career development as well as psychopathology, drug use and abuse, delinquency, and alienation. Normally offered yearly.

  Term:

  Offered Fall Term

  Type:

  Social Science

- **PSYCH-336 Developmental Psychopathology**

  Prerequisites:
PSYCH 114 and sophomore standing

Credits:

4.00

Description:

Examines the etiology and symptoms of disorders of childhood and adolescence, as well as current therapeutic approaches. Developmental changes in the incidence of externalizing disorders, such as conduct disorder and attention deficit disorder, and internalizing disorders, such as depression and eating disorders, are addressed. Disorders that affect both behavioral and mental functioning such as Fetal Alcohol Syndrome and autism may also be included. The role of development in the understanding and treatment of the childhood disorders is reviewed. Normally offered yearly.

Term:

Offered Fall Term

Type:

Social Science

- **PSYCH-340 Professional Development in Psychology**

  Prerequisites:

  PSYCH-114; Psychology majors with 32 or more credits;

  Credits:

  1.00

  Description:

  Professional Development in Psychology is a one-credit hybrid course designed to enhance your understanding of career options that are available to psychology majors and provide you with the skills and knowledge needed to secure an internship. Through class discussions, readings, and engaging assignments, students will learn about multiple career paths open to psychology majors, develop internship and job search skills, discover on and off-campus resources related to career development, and gain knowledge aimed at maximizing their opportunities for success post-graduation.

  Type:

  Social Science
• PSYCH-346 Community Psychology

Prerequisites:

PSYCH-114 and Junior standing

Credits:

4.00

Description:

Explores the efforts of psychologists to enhance the well-being of groups and communities. Complementing clinical approaches, community approaches have implications for both theory (e.g., environmental and/or person-environment theories) and practice (e.g., prevention-oriented paradigms targeted to groups and social systems). Students will be expected to attend weekly two-hour lectures to examine key concepts within the field (e.g., competence building, empowerment) as well as to engage in weekly community service activity. Normally offered every semester. This course fulfills the Expanded Classroom Requirement.

Term:

Offered Both Fall and Spring

Type:

Social Science, Expanded Classroom Requirement, Local Engagement Experience

• PSYCH-348 Introduction to Forensic Psychology

Prerequisites:

PSYCH 114. 54 credits or more only.

Credits:

4.00

Description:

The interface of psychology and the law will be examined in the context of forensic psychological evaluations performed for courts, attorneys and related agencies or facilities. Topics ranging from the role of psychologists in the courtroom, standards of practice, the detection of deception, civil commitment, and ethical issues in forensic psychology will be discussed. Legal standards and the assessment of competence to stand trial, insanity defenses, child abuse and neglect, and child custody/visitation will be explored. This course will review the theoretical and conceptual aspects of the
psycho-legal issues in question as well as the practical applications of the skills and knowledge domains needed to perform forensic psychological evaluations. The study of relevant laws and regulations as applied to the interface of psychology and the law will be considered. Discussion will include specialized forensic topics such as expert testimony, the evaluation of sexual offenders, violence risk assessment, and forensic psychological testing.

Type:

Social Science

- **PSYCH-350 Psychology Internship**

  Prerequisites:

  PSYCH-340 and Junior Standing. Restricted to majors only unless permission of instructor. This course fulfills the Expanded Classroom Requirement

  Credits:

  4.00

  Description:

  Provides majors the opportunity to gain a meaningful field experience in a professional setting that is consistent with their academic background and career goals. Students are on site a minimum of 6 hours a week and must accrue at least 60 hours of field experience. Seminar discussions focus on career exploration, the integration of academic knowledge with the demands of the workplace, and professional issues, including ethics, self-reflection, and cultural sensitivity. Students are required to secure an internship before the course begins. Normally offered every semester.

  Term:

  Offered Both Fall and Spring

  Type:

  Social Science, Expanded Classroom Requirement

- **PSYCH-408 Senior Capstone: History & Systems Of Psychology**

  Prerequisites:

  PSYCH 114, PSYCH 215, PSYCH 216 and senior standing

  Credits:
Description:

Presents the historical context for the development of core ideas, theoretical positions, and research in the field of Psychology. The interconnections between systematic orientations and domains of psychology are examined along with their relation to contemporary concepts and issues in the field of psychology. Offered every semester.

Term:

Offered Both Fall and Spring

Type:

Social Science

• **PSYCH-422 Groups in Schools**

  Prerequisites:

  Senior status and permission of department chair required.

  Credits:

  4.00

  Description:

  An overview of the various group counseling formats utilized in schools, and related theories. Issues related to the development and implementation of small counseling groups (e.g., group dynamics and processes for group member selection) and larger educational and prevention-based groups (e.g., fostering positive mental health, career-related programming, anti-bullying) will be explored and discussed.

  Type:

  Social Science

• **PSYCH-428 Honors Capstone: History & Systems Of Psychology**

  Prerequisites:

  PSYCH 114, PSYCH 215 & 216; Senior standing and admission by invitation only.
Credits:
4.00

Description:
Examines both historical and contemporary theories in the field, along with current empirical research. Emphasizes the reading of primary source material, critical thinking, and seminar discussion. Assessment and measurement issues emphasized, along with substantive writing, typically in the form of an empirical research proposal or a critical review of the theory and research in a focused domain. Admission by invitation only. Normally offered yearly.

Term:
Offered Fall Term

Type:
Social Science

- PSYCH-510 Independent Study

Prerequisites:
JR or SR status; Majors Only; Department chair consent.

Credits:
1.00-4.00

Description:
Substantive reading/research in area of special interest directed by a faculty member.

Term:
Offered Both Fall and Spring

Type:
Social Science
• RS-111 Introduction to World Religions: Western Traditions

Credits:
4.00

Description:
This course will explore the comparative history and structure of Western religious traditions, broadly understood, and their impact on other world religions, while attempting to recognize the similarities and the differences among them. Traditions to be studied include Greek and Roman religion, the monotheistic faiths (Judaism, Christianity, and Islam, as well as Zoroastrianism, Sikhism and Bahaism). We will also explore the impact of the Western religions on indigenous traditions, such as African religion, Native American religion, and Pacific Island religion. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. 1 term - 4 credits. Normally offered every year.

Type:
Diverse Perspectives

• RS-112 Introduction to World Religions: Eastern Traditions

Credits:
4.00

Description:
This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting to recognize the similarities and the differences among them. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. Normally offered every year. Cultural Diversity B

Type:
Cultural Diversity Opt B, Asian Studies, Diverse Perspectives

• SCI-101 Physical Science I

Prerequisites:
One course of MATH 104, 121, 128(formerly 132), 130, 134, or 165; SCI L101 taken concurrently

Credits:
3.00

Description:
Topics in the physical sciences treated at a level appropriate for non-science majors. Newton's laws, circular motion, heat, electricity and magnetism, optics, and atomic physics are discussed with problem sets required to illustrate the concepts.

Term:
Offered Fall Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

- SCI-L101 Physical Science Lab I

Prerequisites:
SCI 101 concurrently

Credits:
1.00

Description:
Laboratory experiments and exercises to illustrate the principles covered in Science 101. On-time attendance is mandatory for pre-lab lectures. Weekly lab write-ups completed during the lab.

Term:
Offered Fall Term

Type:
NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS
• SCI-102 Intro to Physical Science II

  Prerequisites:
  
  One course of MATH 104 OR MATH 121 OR MATH 130 OR MATH 132 OR MATH 134 OR MATH 165. SCI L102 Must be taken concurrently

  Credits:
  
  3.00

  Description:
  
  Continuation of topics in the physical sciences for nonscience majors. Nuclear physics, chemical reactions, organic compounds, latitude and longitude, study of the solar system, astronomy, and cosmology are all covered.

  Term:
  
  Offered Spring Term

  Type:
  
  NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

• SCI-L102 Physical Science Lab II

  Prerequisites:
  
  SCI 102 concurrently

  Credits:
  
  1.00

  Description:
  
  Laboratory experiments and exercises to illustrate the principles covered in Science 102. On-time attendance is mandatory for pre-lab lectures. Weekly lab write-ups completed during the lab.

  Term:
  
  Offered Spring Term
• SCI-103 Environmental Science

   Prerequisites:
   SCI-L103 must be taken concurrently

   Credits:
   3.00

   Description:
   Case study approach to the fundamentals of science applied to environmental degradation, ecosystems, geological processes, population dynamics, deforestation and biodiversity, climate change, ozone depletion, air soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment.

   Term:
   Offered Fall Term

• SCI-L103 Environmental Science Lab

   Prerequisites:
   Must take SCI-103 concurrently

   Credits:
   1.00

   Description:
   Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.
Term: Offered Fall Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS

- **SCI-L105 Composite Science Lab**
  
  **Prerequisites:**
  
  Permission of the department, transfer student status- 2 credits

  **Credits:**
  
  2.00

  **Description:**
  
  Combination of lecture and lab involving subject matter in the Physical Sciences (not Life Sciences). This is intended for transfer students who have received course credit in the physical sciences from another school and who still need to satisfy a two credit laboratory requirement.

  **Term:**
  
  Offered Both Fall and Spring

- **SCI-L106 Composite Science Lab**
  
  **Prerequisites:**
  
  Permission of the department, transfer student status- 1 credit

  **Credits:**
  
  1.00

  **Description:**
  
  Combination of lecture and lab involving subject matter in the Physical Sciences (not Life Sciences). This is intended for transfer students only who have received course credit in the physical sciences from another school and who still need to satisfy a one credit laboratory requirement.
• **SCI-108 Introduction to Cancer Care**

  **Credits:**

  4.00

  **Description:**

  This course will introduce the students to the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be described. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants. The goals and objectives of the course will be met through the use of various teaching tools including but not limited to: PowerPoint presentations, videos, guest lectures, and a poster project with a presentation component. Cognitive assessment of the students will be accomplished through homework, quizzes, exams, and a group poster and oral presentation. Students with any type of academic background are welcome.

  **Term:**

  Offered Fall Term

• **SCI-111 Astronomy I**

  **Prerequisites:**

  MATH-128 or higher and SCI-L11 must be taken concurrently.

  **Credits:**

  3.00

  **Description:**
History of Astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors; space programs, science and technology in society. For non-science majors.

Term:
Occasional

Type:

NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR

- **SCI-L111 Astronomy Lab I**

  Prerequisites:
  
  SCI 111 concurrently

  Credits:
  
  1.00

  Description:
  
  Laboratory experiments and exercises to illustrate the principles discussed in science 111. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations.

  Term:
  
  Occasional

  Type:
  
  NATURAL SCIENCE FOR BA BFA & BSJ,NATURAL SCIENCE FOR BS,SCI TECH ENGNR

- **SCI-112 Astronomy II**

  Prerequisites:
  
  MATH-128 or higher and SCI-L112 concurrently

  Credits:
Description:
Astronomy of the cosmos; sun, stars, interstellar materials, galaxies, pulsars, quasars, black holes; nature of time relativity, cosmology. For non-science majors.

Term:
Occasional

Type:
NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS, SCI TECH ENGNR

- SCI-L112 Astronomy Lab II

Prerequisites:
SCI 112 concurrently

Credits:
1.00

Description:
Laboratory experiments and exercises to illustrate the principles discussed in Science 112. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations.

Term:
Occasional

Type:
NATURAL SCIENCE FOR BA BFA & BSJ, SCI TECH ENGNR, NATURAL SCIENCE FOR BS

- SCI-113 A Habitable Earth Within the Solar System

Credits:
This course introduces non-science majors to concepts that are central to making our planet habitable. It presents Earth in context of the solar system with a broad view of global climate change and energy resources in a quest to better understand the workings of our planet. This course on Earth and Planetary Science is suitable for students who may have taken their last science and math course several years ago, or are just curious about knowing facts on major issues that pertain to the future of our planet. Together with a reading component, this course aims to give students a flavor of how researchers think, investigate and develop conclusions that directly affect our political and economic future. Topics covered in this course range from the solar system to the study of search for other habitable Earth-like planets, search for extraterrestrial life, and evolution of life on Earth. Other characteristics of this course are heavy use of audio-visual materials often including computer animations and simulations, in-class experiment demonstration, and intensive use of INTERNET-based resources.

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, SCI TECH ENGNR

- SCI-161 Physical Science

Prerequisites:

One course from MATH 104 OR MATH 121 OR MATH 130 OR MATH 134 OR MATH 165 or permission of Dept. Chair. Students who have taken SCI 101/L101 or SCI 102/L102 are not eligible to take SCI 161.

Credits:

4.00

Description:

This is a one-semester, non-lab introduction to the physical sciences. The student will obtain a good understanding of a wide variety of topics covered in selected chapters of the text (measurements, Newton's laws, energy, heat and global warming, wave motion, electricity and magnetism, atomic physics, nuclear physics, chemical reactions, and astronomy) and will be able to solve problems illustrating the most important concepts. Students who have taken SCI 101/L101 or SCI 102/L102 are not eligible to take SCI 161.

Term:

Offered Both Fall and Spring

Type:

NATURAL SCIENCE FOR BA BFA & BSJ
SCI-165 Inner Workings of Physics Universe

Credits:
4.00

Description:

About 15 billion years ago, (data indicate) the big bang occurred and the universe was born. With it came physical laws and a spectacular array of consequences that lead to the universe as we know it. This non-lab, 4 credit course explores the inner workings of the physical universe in terms of the scientific inquiry which lead to Newton's laws, an understanding of energy, waves, light, electricity, atomic structure, chemical reactions, nuclear physics, particle physics, relativity, and the big bang theory. During the course, students will learn to make use of modern resources to access scientific and technical literature to research a scientific topic. They will learn to distinguish between science and technology (e.g. quantum mechanics and nanotechnology, the discovery of the Higgs boson and the large hadron collider that made it possible, etc.) and to understand how the science, technology, and engineering disciplines play a crucial role in recognizing and solving problems of society and the world that we share.

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS, SCI TECH ENGNR

SCI-171 The Built World: How Humans Engineer Environments

Credits:
4.00

Description:

The most basic needs of humans have not changed - water, food, and shelter - but the means of meeting these needs has. In this course, we will examine how technology-driven societies operate by studying how cities are built and how they function. Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design), and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.

Term:

Offered Both Fall and Spring
SCI-H171 The Built World: How Humans Engineer Environments- Honors

Prerequisites:
Honors students or at least a 3.3 GPA only

Credits:
4.00

Description:

Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design), and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.

Term:
Offered Both Fall and Spring

Prerequisites:
SCI L173 Must be taken concurrently Knowledge of Windows type Application

Credits:
3.00
Description:

Geographic Information Science (GIS) link information (number of fire hydrants on a block) to features on a map (e.g., a point representing street address) that has a designated geographic location (as designated by global coordinates). Unlike paper maps, GIS software allows the production of interactive maps that allows the user to layer data, to indicate spatial patterns, to analyze trends, and to combine different features of the mapped area in novel ways. For example, a business person may wish to use GIS to determine the optimum location of retail outlet (based on the mapped demographics of a neighborhood), while an environmental engineer may use GIS to describe the location of outfalls to see how they correlate to areas of stream pollution. In this course, students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

Term:

Offered Both Fall and Spring

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS, SCI TECH ENGNR

SCI-L173 GIS Lab

Prerequisites:

Must be taken concurrently with SCI-173

Credits:

1.00

Description:

This laboratory illustrates concepts and methods taught in SCI 173. In this lab students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

Term:

Offered Both Fall and Spring

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS, SCI TECH ENGNR
• SCI-181 Science and Life in the 21st Century
  Credits:
  4.00
  Description:
  This is a four credit, non-lab, science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.
  Term:
  Offered Both Fall and Spring
  Type:
  NATURAL SCIENCE FOR BA BFA & BSJ,SCI TECH ENGNR

• SCI-184 Contemporary Science and Innovation
  Credits:
  4.00
  Description:
  This is a 4 credit, project based science course that examines the central scientific problems confronting the 21st century. The course consists of lectures, class discussions, field trips, and in-class hands-on activities designed to familiarize the student with different concepts of the lectures. The current focus is on sustainable energy production. A final team project related to the course topics will be given. This is the version of SCI 183 without a separate lab component. Students who have taken SCI 183, L183 are not allowed to take this course.
  Term:
  Offered Both Fall and Spring
  Type:
  NATURAL SCIENCE FOR BA BFA & BSJ,SCI TECH ENGNR,NATURAL SCIENCE FOR BS
• SCI-201 Physics for Future Presidents

Credits:

4.00

Description:

This course presents a topical introduction to the key principles and concepts of physics in the context of the world events and natural phenomena that confront world leaders and that require informed decisions and responses. Energy, health, counter-terrorism, remote sensing, space programs, nuclear proliferation, and a host of other modern challenges have technological and scientific dimensions, the understanding of which is essential to avoiding disastrous policy decisions. This course considers the application of physics to these societal challenges. The material is covered at a level and pace that a future world leader should be able to handle; the emphasis is on the development of physical reasoning skills, and not on detailed, mathematical problem solving.

Type:

SCI TECH ENGNR

• SCI-210 Earth and Planetary Crystals

Credits:

4.00

Description:

This course will provide undergraduate students of various disciplines with an introduction to gems and crystals using interactive, evidence-based teaching approaches. Crystalline forms of matter are critical to our existence. Using innovative teaching strategies of in-class hands-on demonstration, supplemented with visuals of crystal details, the course provides students insights into the formation, alteration and unique properties that make crystals invaluable. Topics range from the study of proteins and nucleic acids to the interior of planets. The in-class lectures will provide a basic guide that will serve as a platform for individually catered in-depth study. Therefore, the course is open to advanced students as well, who can pick up higher level of information for discussion and class projects.

Type:

NATURAL SCIENCE FOR BS,NATURAL SCIENCE FOR BA BFA & BSJ,SCI TECH ENGNR

• SCI-251 Intro to Coastal Geology
Prerequisites:

Intro Math and must take SCI-L251 concurrently

Credits:

3.00

Description:

Coastal environments will be analyzed with an emphasis on the important environmental characteristics of these areas. Management and environmental problems within the coastal and offshore areas such as beach erosion, beach access, and oil spills will be considered. One required field trip.

Term:

Offered Spring Term

Type:

NATURAL SCIENCE FOR BA BFA & BSJ, NATURAL SCIENCE FOR BS

SCI-L251 Intro Coastal Geology I Lab

Prerequisites:

SCI 251 must be taken concurrently

Credits:

1.00

Description:

An introduction to laboratory and field techniques used in the geological study of coastal environments. Field trips will be taken to local coastal areas.

Term:

Offered Spring Term

Type:
• SF-101 Fixing the World- Energy and Water: The Science of Solutions

Credits:

4.00

Description:

Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

• SF-H101 Fixing the World- Energy and Water: The Science of Solutions

water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-102 Economics and the Environment**

  **Credits:**
  
  4.00

  **Description:**
  
  This seminar will establish a clear link between the environment and the macroeconomy. We will examine how environmental decisions are also economic decisions that affect output and employment, among other things. We will also establish that environmental issues are global in nature and have political and economic effects beyond our borders. Students will do a significant amount of research and writing and will engage in group discussions.

- **SF-105 Voices in Conflict**

  **Credits:**
  
  4.00

  **Description:**
  
  Why are conflicts so hard to resolve? How do myths about conflict affect communication? What is the role of power in conflicts? How can we use language and listening skills to engage in healthy conflict resolution? Course examines conflict within and across issues of gender, sexuality, race, class, religion, and ethnicity. Explores attempts to negotiate meaning and power within and across socio-cultural conflicts and how this is revealed through language.

  **Type:**

  Expanded Classroom Requirement

- **SF-116 Enlightened Insanity**

  **Credits:**
  
  4.00
Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

- SF-121 The Challenge of the Cradle to Prison Pipeline

  Credits:
This course explores the process through which youth in urban areas are funneled into criminal careers and lives in prison. The focus is on the experience of young men who face the prospect of spending significant portions of their lives incarcerated. Three segments of the life-course for this population are explored - before, during, and after prison. The course is developed as a Service Learning Course, offering students opportunities to learn about and work in communities with programs that target criminogenic factors and are designed to prevent youth from ending up in prison. The community component of the course requires 15 contact hours in community service settings such as group meetings, agency hearings, courts, intervention programs, etc. The course utilizes a life story approach to learn more about individuals, families, and communities at risk. Other activities include a prison visit, reviews of programs in prison and class visits with former offenders.

**SF-126 The Boston Theatre Scene: the Inside Experience**

**Credits:**

4.00

**Description:**

Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston's many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

• SF-132 The Beatles: Here, There & Everywhere

Credits:
4.00

Description:
This seminar will investigate the impact and legacy of the Beatles. The Fab Four deserve our scholarly attention as musical innovators and as cultural avatars of the 1960s, an era that still exerts influence today. We will examine the many ways in which the Beatles rocked the establishment and became defining figures in post-war youth culture. We will also discuss other media (the visual arts, film, fashion, style) and fields of study (mass media, marketing, recording technology, copyright law, English history) using the Beatles as our guides.

• SF-143 Between Myth & Reality: Representations Of Spain

Credits:
4.00

Description:
Using excerpted readings from travel texts, histories, and essays from the nineteenth and twentieth centuries, this course will explore the varying descriptions and interpretations of Spain as seen by those traveling through and/or living within its boundaries. From Richard Wright’s thought-provoking insights into Franco’s Spain’s racial issues to Giles Tremlett’s straightforward depictions of contemporary Spain, the readings will provide differing filters through which to consider the many contradictions that make up the Spanish experience.

• SF-151 Getting Over It: Dealing With the Aftermath of Group Conflict/Mass Atrocity

Credits:
4.00

Description:
Once violent conflict between two groups has ended, what is the best way to transition back to normality coming to terms with the past or simply moving on? To answer these questions we will examine the debates surrounding war crime tribunals, truth commissions, lustration policies, and reparations in the second half of the 20th century. Case studies will include post-apartheid South Africa, post-WWII Germany, and the
Israeli/Palestinian conflict. We will discuss the philosophical problems raised by each of these instruments, as well as on the political, legal, and practical difficulties their implementation present.

Type:

Cultural Diversity Opt B

- **SF-156 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life**

  Credits:
  4.00

  Description:

  The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.

- **SF-161 Passion, Knowledge, and the Morality of Great Minds**

  Credits:
  4.00

  Description:

  What motivates and inspires great minds? How do they gain and develop knowledge? How do they construct and define moral imperatives? This course will examine selected works of great minds whose lives and works continue to represent an enduring source of critical consciousness, courage, and commitment to humanity. We will review the works of Sophocles, William Shakespeare, Mahatma Gandhi, Simone Weil, and Martin Luther King, Jr., among others.

- **SF-164 The End of the World**

  Credits:
  4.00
Using materials drawn from several disciplines, this seminar examines ends (of culture, eras, and innocence) as well as scientific speculation regarding the end of the world. The course stresses writing and learning strategies, critical literacy, and academic survival skills, as well as exposure to great works and ideas.

- **SF-173 Crime in American Society**

  **Credits:**
  4.00

  **Description:**
  Popular beliefs about crime are often inspired by the media and by specific criminological theories. These theories about and media images of crime will be examined in detail, including the hits and misses.

- **SF-174 Tragedy and Literature**

  **Credits:**
  4.00

  **Description:**
  This course will focus on classic works of ancient and modern literature that examine the human condition from a tragic perspective. We will concentrate on close readings from the following texts: Homer's Iliad, Sophocles' Antigone, The Bhagavad-Gita, Shakespeare's Othello, Chekhov's short stories, and Joyce's Dubliners.

- **SF-175 War and Apocalypse in Science Fiction**

  **Credits:**
  4.00

  **Description:**
  This seminar will examine science fiction literature, film, and television from 1940 through 1970: A time when science fiction moved from the era of pulp magazine to the large and small screens.
SF-177 Language, Culture, and Identity in Globalization

Credits:
4.00

Description:
Language is a living thing. It grows and changes with each generations usage, and dies when no longer needed. Language is also a key component of cultural identity. People who share a language can communicate about issues, rituals, and ideas that are important to them, and thus can participate in the same culture. People who do not understand the language of the culture they are living in become isolated and marginalized. Throughout history, travelers and traders have visited other cultures and learned their languages. This has allowed them to communicate, trade and prosper. Technology and rapid transportation, hallmarks of modern globalization, have provided more opportunities for people from different cultures to interact and share. Still, one complication to these interactions is language. There is a perceived need for a common language in order to facilitate improved communication, trade, and exchange of ideas. However, the promotion of a common language, increasingly English, leads to concerns about loss of native languages, cultural knowledge, and the ties that bind communities. The youth of the 21st century are in a challenging position; they must strive to be both the agents of change, and keepers of their national and cultural identity. This course provides a framework for students to examine these challenges and consider the value of bilingualism, language preservation, and global communication.

SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream

Credits:
4.00

Description:
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

Type:
Cultural Diversity Opt A
SF-181 The Psychology of the American Teenager: Integrating Nature and

American adolescence is relatively a short-lived age period but it has a long lasting effects. What is it about American adolescence that makes it so important? To answer this question, we will examine adolescence from several different perspectives. For example, we will explore how and why the period of adolescence has grown longer over the past 100 years. We also will look at some of the unique biological and psychological aspects of adolescents. Finally, we will examine societal expectations, how adolescents function in school, their leisure activities, and some of the unique psychological problems associated with this period of life.

SF-182 Heroes, Antiheroes and Outsiders: Reading the Graphic Novel

SF-182 Heroes, Antiheroes and Outsiders: Reading the Graphic Novel
How is it that comics, a genre often viewed as entertainment for children and adolescents, has become one of the most exciting forms of narrative and visual art? To answer this question, this seminar will examine a range of graphic novels, from those that celebrate their origins in superhero comics, such as Alan Moore's Watchmen, to those that treat subjects not usually considered proper to the comics genre, such as Art Spiegelman's Maus, about the Holocaust, and Alison Bechdel's Fun Home, about the complexities of sexual identity. As we read these works, we will look at how the combination of words and still images makes the graphic novel a unique storytelling form, as well as how artists and writers push the envelope to create new styles and challenge our expectations. In addition to class discussions and writing assignments, we will take a field trip to the Museum of Fine Arts and create a collaborative group graphic novel step-by-step over the course of the semester (all abilities welcome).

SF-H182 Heroes, Antiheroes and Outsiders: Reading the Graphic Novel

Prerequisites:

CAS Honors students only

Credits:

4.00

Description:

SF-183 Politics, Power and the Media

Credits:

4.00

Description:

Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of
power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of big government", and the concept of a liberal media.

- SF-189 American Gothic: Edgar Allan Poe, Flannery O'Connor and Annie Proulx

    Credits:
    4.00

    Description:
    This literature seminar will study and compare the short stories of Edgar Allan Poe, Flannery O'Connor, and Annie Proulx. Beginning with Poe as the father of the short story genre in America and exploring his critical theory of the grotesque and arabesque", the class will examine the emergence of the gothic literary idiom as a classic American genre. Critical essays on the gothic aesthetic will be analyzed and film adaptations and documentaries will be viewed.

- SF-190 Asia in America Fiction and Fact

    Credits:
    4.00
With a focus on some selected ethnic groups from Asia, Asia in America studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted home as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

- SF-191 Film Adaptation Film Adaptation

  Credits:

  4.00

  Description:

  Why did they change the ending of the book? The novel is so much better! We will explore the concept and industry of film adaptation. Students will read novels and watch respective film adaptations to explore how the written word is adapted to the screen; both fiction and non-fiction works will be considered. Also, field trips to past film locations in Boston will be taken to explore why specific settings were chosen for respective situations. Additionally, students will create their own written adaptations of source materials, putting into practice the concepts studied in class.

- **SF-197 Sustainability, Energy, and Technology At Suffolk University**

  Credits:

  4.00

  Description:

  In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

• SF-199 Unfolding the European Union
  
  Credits:
  
  4.00
  
  Description:
  
  The EU is a powerful political, economic and cultural block that is meant to play a major role, together with the USA and China, in the creation of a new post-crisis world order. The seminar is intended to cover, at a basic but reachable level, the history, the politics, the culture and the functions of
the EU in the beginning of the Twentieth Century. An extraordinary experiment of sociopolitical engineering, comparable to that of the United States of America, the EU has been changing the life of an increasing number of Europeans for over 50 years. No American student could afford to ignore the inner structure as well as the particular peculiarities of such inclusive supranational organization in today's world. Issues as institutional functioning, problems derived from individual state sovereignty, economic coordination to face common challenges, cultural integration, future enlargement, etc. are all indispensable to understand the way in which Europe is changing. But also much more day-to-day issues, such as travel mobility, education exchange programs, citizen's participation, supranational networks of people in the arts or in business, unified labor market, gender participation, human rights, consumer's protection, etc. are all in the process of developing a more robust and functional European Citizenship.

- SF-1105 Contemporary Urban Challenges

  Credits:

  4.00

  Description:

  The increasing rate of urbanization has been accompanied by dramatic changes in almost every aspect of urban life, creating new challenges and opportunities for urban dwellers, planner, and policymakers. This course is designed to examine the demographic, economic, and environmental
realities and challenges facing contemporary cities. Specific issues that will be discussed include affordable housing, employment rates, civic engagement, environmental justice, access to transportation, impacts of gentrification, urban renewal strategies, and access to education. The city of Boston will be the primary context through which concepts, theories, and findings presented in the lectures and readings will be explored and evaluated. We will have site visits and evaluate local policies and plans. The objective of this course is to provide students with an understanding of the role of government, institutions, organizations, and citizens in identifying and addressing contemporary urban challenges.

- **SF-1110 Decoding Boston: Signs and the City**

  Credits:

  4.00

  Description:

  This interdisciplinary seminar will explore the buildings, monuments, sites, and signs around Boston from the point of view of Visual and Culture Studies. In addition to providing a compelling introduction to the history, major landmarks, and culture of the city, the seminar is specifically intended to improve students' visual literacy: that is, their awareness of their visual environment and their ability to critically analyze the rhetoric of the spaces, buildings, and images with which they are surrounded.

  Type:

  Local Engagement Experience

- **SF-1118 Pageantry: Competitive Beauty**

  Credits:

  4.00

  Description:

  In this seminar, we will explore the history and mystique of pageantry in our country. We will study the roots of these programs (such as Miss America) and look for lessons learned about women as we follow the progression of competitive beauty through to the crowning of a young woman students may come to see as someone not too different from themselves. This exercise in exploration and examination of the American beauty queen should intrigue all her peers, and challenge supporters and critics of pageants alike to redefine their opinions of the modern pageant woman.

- **SF-1122 The Ethics of Peace and War: From The Ancient World to the Present**

  Credits:
This course will explore historical, ethical and political issues concerned with matters of peace and war. We will examine a variety of different texts: religious, historical, philosophical and literary, but the main emphasis will be philosophical justifications for war and philosophical visions of just peace, with an eye to contemporary questions in the War on Terror. To the extent that we use non-philosophical texts, this will be in the service of focusing the imagination on the philosophical issues and applying theoretical frameworks to historical events.

- **SF-1126 Prosperity: the Nature, Sources, and Ethics of Wealth Creation**
  - **Credits:** 4.00
  - **Description:**
    The aim of this course is to provide the students with the philosophical tools for understanding the current crisis of capitalism and the debate about what principles we should use as we decide where to go next. The course explores three closely related questions: What is wealth? What are the institutions that are conducive to the creation of wealth? And, by what principles of justice should we regulate the distribution of wealth amongst the members of society?

- **SF-1127 The Vietnam and Iraq Wars: Polarized Perspectives**
  - **Credits:** 4.00
  - **Description:**
    This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement just? To what extent were the methods used by the United States military during each war just? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit the enemies of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

- **SF-1128 Sustainable Media**
Contrary to a popular perception that information, communication and entertainment technologies are clean, ecologically benign and paperless, the reality of an increasingly digital life is that our fascination with the next best thing in mobile phones, video game consoles, personal computers, digital cameras, tablets, etc., has devastating impacts on our environment. These media devices are manufactured using toxic ingredients in poisonous working condition, require an abundance of energy to operate, and create hazardous waste when disposed. Media technology companies and the advertising industry that markets their wares have successfully persuaded consumers to accept rapid obsolescence and to highly anticipate the latest upgrade. But some consumers, electronics manufacturers, policy makers, and environmental groups are working to change the culture of consumption in favor of sustainable media practices that lessen the environmental footprint of the digital devices we use everyday. The purpose of this course is to understand the problem of unsustainable media, and the possible solutions for a sustainable media system.

• SF-1129 Beacon Hill: Fact, Fiction, and Fantasy

Credits:
4.00

Description:

The course will explore the physical geography, history, and image in literature, film, and pop culture of Suffolk University's Beacon Hill neighborhood. The purpose and objective of the course is to provide students with a deep knowledge, understanding, and appreciation of Beacon Hill through examination of written and visual sources, and feet-on and eyes-on experience of the public parts of the Hill.

Type:
Local Engagement Experience

• SF-1130 Lincoln and the Law

Credits:
4.00

Description:
This course will examine Abraham Lincoln's relationship to and enduring impact upon the law by exploring 1) his legal career and life as an attorney in Illinois; 2) his views on race and slavery; 3) the effort to pass the Thirteenth Amendment; 4) his views of and other actions related to the Constitution (the suspension of habeas corpus, the right of states to secede from the Union, the President's War Powers, etc.); and 5) the code he commissioned to set out the rules of war. We will take an expansive look at Lincoln's legal mind and cover diverse topics such as Lincoln's legal writing, ethics, the Constitution, and international law. The subjects discussed will then be related to the current practice of law in the United States. The course will be designed to introduce students to the theoretical underpinnings and practice of law, the Constitution, Civil Rights, Civil Liberties, the War Powers of the presidency, and the rules of war through the lens of Lincoln's relationship to and impact upon the law.

- **SF-1131 Focusing the Scientific Lens**

  **Credits:**
  4.00

  **Description:**
  How do we learn about the natural world? By performing research about the ingredients of everything (the elements) and the tree of life (evolution) we will practice how scientists create knowledge by developing our own research projects in chemistry and biology, and communicate results to a wider audience. We will discuss historical transitions of these topics and explore commonalities in the processes of doing science across disciplines.

- **SF-H1132 American Enlightenment: Humanism & Humanistic Politics in America**

  **Prerequisites:**
  CAS honors students only.

  **Credits:**
  4.00

  **Description:**
  This course will examine 1) the demographics of the religiously unaffiliated in America and their impact on American politics; 2) the problem of belief without evidence, religious extremism, and the connection of radical religion to terrorism and violence; 3) the history of enlightenment thought in America; 4) freedom of religion in America and the secular framework created under the U.S. Constitution; 5) the philosophy of humanism and the phenomenon of humanist communities and chaplaincies being created on college campuses; 6) the philosophy of naturalism and the philosophical uses of the epic of evolution; and 7) the philosophy of Humanistic Religious Naturalism, which is a synthesis of humanism and naturalism. The course will also examine whether skeptics can reap the benefits of religious practice by engaging in secular alternatives to traditional religious practices.

  **Type:**

SF-1133 Problems and Solutions in Early American History

Credits:
4.00

Description:
This course will examine four major problems in the early American republic: forming a government; bridging vast distances on the American continent; slavery; international relations. We will explore the various proposed solutions to these problems. Some of the solutions worked well, others were more disastrous than the initial problem. We will read primary documents pertaining to these issues, and try to imagine how men and women considering the problems might have responded to them. What solutions could be proposed? What solutions would work? What were the political, economic, or social difficulties generated by the problem and by the proposed solutions? In considering the problems, we will also learn how to use the various archives close at hand: the Sawyer Library, the Boston Public Library, the Massachusetts Historical Society, and the Massachusetts State Archives. Students will also post their findings on a class blog, and present their work to one another in class.

SF-1134 The Meaning of Life

Credits:
4.00

Description:
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity's Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

• SF-1135 Women Warriors: Stories of Captivity, Conversion, and Confession

Credits:
4.00

Description:

Since the beginning of time, women have been doing battle to themselves, while men have gone to battle against others. Whether it is through converting to Christ, yielding to captors in order to survive, or carrying a baby, this course introduces students to the many ways in which, whatever battles they face, women are warriors; they survive. Utilizing an array of captivity, conversion, and confession narratives by women, and pairing them across the centuries, students will make connections and draw conclusions between early-and mid-19th-century-American and contemporary women. Students will connect, for example, the trials of the 17th-century Puritan captive, Mary Rowlandson, and contemporary hostage, Elizabeth Smart, to explore how women (no matter how different they seem) draw upon unique inner resources to survive.

- SF-1136 Varieties of Religious Experiences

Credits:
4.00

Description:

This course is designed as an exploration into the various depths, dimensions, and meanings of religious thought and practice. World religions and belief systems will be presented in terms of their underlying experiential, psychology and spiritual significance in our ordinary thinking. The ancient wisdom teachings of world religions, philosophy and myth will be examined as metaphysical claims about the nature of the universe and our understanding of it. Special emphasis will be placed on challenging current traditions concerning the role of consciousness and religious experience. Students will be required to actively participate in exploring other/alternative religions and religious centers in the greater Boston area. Classes will be conducted by means of lecture, primary texts in translation and meditation exercises.

- SF-1138 Malevolent Or Misunderstood?: Monsters of Mythology

Credits:
4.00

Description:

This course will critically engage with folk and pop-cultural representations of monsters. Students will read from diverse areas relating to the topic, including psychology, anthropology, history, and cultural studies. This course will explore the changes in monster figures from early history to the internet age. The main purpose of this course is to teach students to write academically and to think critically. This course aims to give students the tools to engage in academic inquiry, to think beyond what they believe they already know and to question. This course will give students the freedom to develop their own ideas about the subjects discussed.
SF-1140 Mercy Mercy Me: the Intersections of Art, Science, and the Environment

Credits:
4.00

Description:

In this course, we will examine global environmental issues through both artistic and scientific lenses. We will look at and listen to the way our world situation is described by artists, engineers, and scientists. We will examine the rise of consumer culture post World War II, the growth of environmental concern in the 1970s, the environmental impacts of consumer culture, and the global projections for what future holds in 2050. We will examine how art contemplates the beauty of the natural world and reflects both hope and anxiety about our global future—and how science and engineering do the same! We will be using sources from art, science, and engineering in our investigations. No extensive science background is presumed for this course, but an interest in how the physical world works and how we describe it to ourselves is.

SF-1141 Classical Civilizations: Pathways to Wisdom

Credits:
4.00

Description:

How is it that the knowledge, intelligence, wisdom and values of the Greeks and Romans still educate and edify the world by providing venues towards leading fulfilling and dignified lives? The guiding principles of their respective civilizations rested upon eight pillars: - Humanism: It was recognized that humans have the potential to master their world and live life to the fullest. - The Pursuit of Excellence: To imagine the highest good and strive to attain it. - Self Knowledge: It is imperative to know oneself before seeking to know the world. - Rationalism: Always question, reason and discern truth from falsehood and never consider any matter superficially. - Restless Curiosity: Often the resolution of one issue leads to the revelations of others mysteries and pursuits which compels further investigation. The wise individual makes this a lifelong endeavor. - Love of Freedom: As long as one brings no harm to others, one must be free to live and discover as much as possible. - Individualism: All are unique and, therefore, must recognize individual strengths and identity. - The Practice of Moderation: The prudence of avoiding extremes in personal and social conduct. In this course, students will read two (brief) texts on the Greek and Roman contributions to the world and then will proceed with specific readings which illuminate the eight principles above for achieving the good life.

SF-1143 In the First-Person: Storytelling in the 21st Century

Credits:
4.00
This section of the Seminar for Freshmen will consider the forms, venues, and impacts of narrative nonfiction in contemporary culture. From the exploding popularity of personal essays in the digital age to the living, evolving essays we create on social media, we are constantly narrating and archiving our lives, shaping their content for specific audiences. In doing so, we shape what our experiences mean and represent. In order to analyze the power of narrative nonfiction, we will look at a variety of multimodal texts: essays, podcasts, Instagram and Twitter feeds, stand-up comedy, and storytelling slams, as well historical texts such as the essays of Michel de Montaigne and historical artifacts at the National Archives in Boston. We will also write our own narrative nonfiction, and adapt our first-person stories for listening and viewing audiences, such as the MassMouth story slam and podcasts like This American Life. Additionally, we will practice narrative nonfiction for professional audiences, using storytelling as a way to showcase personal strengths to employers, internship coordinators, and the like.

**SF-1144 Native Americans: Walking in Two Worlds?**

**Credits:**

4.00

**Description:**

Native Americans are often described as walking in two worlds, as they attempt to navigate the process of maintaining their tribal identity and heritage while living in mainstream America. In recent years there has been a shift towards tradition and heritage, and a rejection of Western values and norms in both the US and Canada. In this course we will look at how Native people live in the US and Canada today, and examine the extent to which they are either trying to walk in two worlds or perhaps rejecting the two worlds model. To help us answer this question, we will read about reservation life, the Idle No More Movement, Indigenous History, and current events. We will also watch videos and explore indigenous culture.

**SF-1145 Emergence of Southeast Asia**

**Credits:**

4.00

**Description:**

Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

**Type:**

Diverse Perspectives

- SF-1146 Fido the Friendly Wolf: A Natural History of Dogs
  
  Credits:
  
  4.00
  
  Description:
  
  This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

- SF-1147 Global (In) Security: From ISIS to Ebola
  
  Credits:
  
  4.00
  
  Description:
  
  This course reviews the principal features of global and national security as it is currently practiced by tracing the evolution of theories, policies and circumstances whereby current international security is developed. Students will evaluate the nature and origins of war, arms proliferation, military instability, terrorism, genocide, health threats and natural resources depletion.
• SF-1148 Brave New Worlds

Credits:

4.00

Description:

Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

• SF-H1148 Brave New Worlds

Prerequisites:

Restricted to CAS Honors students

Credits:

4.00

Description:

Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

• SF-1150 Religion in Contemporary Society

Credits:

4.00

Description:

This course is designed to provide students with an overview of the social settings and cultural meanings of religion in the contemporary world. Topics that will be covered in reading and discussions include the rise of religious fundamentalism, religion and violence, women's and men's religious experiences, new religions, and portrayals of religion in popular films. In addition to the readings, students will observe and experience religious
expressions and activities through fieldwork assignments. The emphasis on films and fieldwork reflects my belief that religion is made up of lived experiences of actual individuals and communities. In order to understand religion in contemporary society we will make every effort to see (in person or in film) a wide range of religious activities. The films we will see include some of the following: Leap of Faith, Devil's Playground, Kadosh, Women of Hizballah, Singing Stream, A Still Small Voice.

- **SF-1151 Reproduction and Society**

  **Credits:**
  4.00

  **Description:**

  This course explores relationships between reproductive health and rights both nationally and internationally. Many of our topics fit into two broad areas: conflicts over the control of childbearing (sterilization abuse, birth control, and abortion) and conflicts over who deserves to be a mother, especially when the mothers in question face social stigma and lack political power. Other topics include safe birth and maternal mortality, breastfeeding, infertility and reproductive technology. We also examine the politics of women's sexual and reproductive autonomy, including the policies that shape women's choices to prevent, achieve, abort, or carry to term a pregnancy. Throughout, we are guided by the following questions: Why is reproduction an important site through which to understand society? How do statuses such as race, class, gender, sexuality and ability influence people's reproductive possibilities? What is the role of the state in shaping these experiences? How have communities supported or resisted efforts at reproductive control? Why is reproductive justice central to these answers?

- **SF-1152 The Idea of America: Past, Present, Future**

  **Credits:**
  4.00

  **Description:**

  A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation's history, from the struggle over slavery to America's contemporary role in the world. Because this course intends to apply theoretical understanding to real life, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation's philosophical and historical currents.

- **SF-H1152 The Idea of America: Past, Present, Future**
Description:

A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation's history, from the struggle over slavery to America's contemporary role in the world. Because this course intends to apply theoretical understanding to real life, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation's philosophical and historical currents.

Type:

Honors

- **SF-1153 Law, Disease, and Public Health**

  Credits:

  4.00

  Description:

  This course is about public health law, which is the study of the legal powers and duties of the various systems of government in the United States (federal, state, and local) in collaboration with their partners (e.g., health care, business, the community, the media, and academe), to ensure the conditions for people to be healthy (to identify, prevent, and ameliorate risks to health in the population), and of the limitations on the power of these systems of government to constrain for the common good the autonomy, privacy, liberty, proprietary, and other legally protected interests of individuals. The prime objective of public health law is to pursue the highest possible level of physical and mental health in the population, consistent with the values of social justice. The course will focus especially on public health law in the area of epidemic disease. Case studies will be made of the Great Influenza of 1918 and the origins and spread of the Ebola virus, culminating in an examination of outbreaks of Ebola in the United States.

- **SF-1154 Introduction to Visual Studies**

  Credits:

  4.00

  Description:
This seminar provides an introduction to Visual Studies, a relatively new interdisciplinary field that examines how images communicate and the roles that they play in society. Students will apply the concepts and techniques of Visual Studies to analyze sites and signs around Boston, such as advertisements, street signs, fashions, newspaper photographs, buildings, and public spaces. Class projects will increase students' awareness of their visual environment and their ability to critically analyze the visual rhetoric that surrounds us and is often used to manipulate us.

Type:

Local Engagement Experience

- **SF-1155 The Boston Olympics**

  Credits:

  4.00

  Description:

  This class will teach students about the key role that sporting events can play in building a city, building its brand and the politics surrounding the process of these things occurring. Topics may include: urban development in general and the transformation of the industrial to the post-industrial Boston; the way in which cities use events like the Olympics to build their place brands; the way an effort like the Olympics can be used to encourage large scale public investment in longer term infrastructure projects that otherwise might not be justifiable; and the way government works with interest and community groups to try to shape public policy.

- **SF-1156 Thinking About the Insanity Defense**

  Credits:

  4.00

  Description:

  This course examines sixteen case examples providing a clear and compelling introduction to one of the most important topics in the relation between public policy and law. This course addresses: the history of the insanity defense; the effects of different standards for determining insanity; the arguments for its retention; abolition, and revision; media and other responses to it; and the controversies around pre and post conviction commitment. The case examples illustrates a variety of outcomes and include individuals who were found not guilty by reason of insanity; found guilty even though mentally ill; and not charged because of mental illness.

- **SF-1157 Germany in Film and History, 1945-2015**
Since 1945, Germany has had a lot of history to reckon with- and 21st century Germany history through film, newsreels and other archival footage, radio and TV shows, war memorials and museums built since 1945, novels, published diaries, and memoirs. We will also read recent historical scholarship to put these cultural texts in context. Topics include the representation, in film and other texts; of: post-war rebuilding, the German Economic Miracle; the building of the Berlin Wall; radical politics of the 1960s and 1970s; coming to terms since 1945 with Germany's Nazi past and the Holocaust; coming to terms since 1990 with the Stasi and East German past; Ostalgie (nostalgia in the 21st century for some aspects of East German socialism); the multicultural society that is Germany today, with new Turkish, Greek, Russian, Arab, and even Israeli communities.

• SF-1158 Global Climate Change

Conversation about the weather is considered to be the universal icebreaker. Yesterday's sweltering heat, the storm predicted for this weekend, even long-term climate shifts find their way in our daily conversation. Today, however, such casual conversations have an edge to them, because we are realizing that humans play a role in determining the climate shift. In fact, understanding the human fingerprint in the Arctic tundra melting, or a devastating hurricane, has gone well-beyond small talk to become one of the most important challenges our society faces today, and on that is wedded to geopolitics. To meaningfully participate in any dialogue that addresses this challenge people have to be aware of certain key ideas of Physics and Planetary Science. The aim of this course is to provide you with some of the essential facts and pieces of science underlying such questions. This course will enable you to grasp many of the issues that dominate today's political discourse and to develop an informed opinion (your, not our!) for which you can rationally argue.

• SOC-113 Introduction to Sociology

An introduction to the sociological understanding of human interaction, group process and social structures. Students are introduced to basic concepts, theories and methods of sociological investigation. Majors and minors must pass with a grade of C or better.
• SOC-116 Social Justice

Credits:
4.00

Description:
An examination of traditional and contemporary problems associated with major social institutions such as the family, economics, government and education. Social forces related to ethnicity, social class, health and welfare, and urbanization are also included. Alternative remedial measures based on behavioral science theories are discussed. Majors and minors must pass with a grade of C or better.

Term:
Offered Both Fall and Spring

Type:
Social Science

• SOC-209 Youth in American Society

Credits:
4.00

Description:
The goal of the course is to provide a broad overview of children and youth and their place in American society. Particular attention is paid to (1) the impact of geographical location, social class, gender, race, sexuality, popular culture, mass media, and technology; (2) the intersection of youth cultures and mainstream society; and (3) the contention that some youth cultures are deviant.
- **SOC-210 Juvenile Justice and the Law**

  Credits:
  
  4.00

  Description:
  
  Considers the problems surrounding the legal definition and handling of juveniles who confront the law as offenders, clients and victims. Attention is devoted to the study of the special legal categories and procedures established for juveniles, the problems facing professionals providing juvenile services and the most significant directions of legal and social change affecting youth in our society. Normally offered every year. Fulfills the Sociology Department’s Social Policy requirement.

- **SOC-211 Corrections and Punishment**

  Prerequisites:
  
  Take SOC-234 or SOC-333;

  Credits:
  
  4.00

  Description:
  
  A sociological exploration of coercive and incapacitative responses to crime. Attention is given to the origins and patterning of segregative controls, the correctional claims of prison systems, alternatives to incarceration and relationships between types of crime, and criminals and varieties of punitive response.

  Term:
  
  Occasional

- **SOC-212 Statistics for Sociology**

  Prerequisites:
  
  SOC-113 OR SOC-116 and MATH-128 or higher

  Credits:
Description:

In this course, students will be introduced to descriptive and basic inferential statistical techniques. The course will provide information on the following topics: Description - measures of central tendency (mean, median, mode) and measures of dispersion (range, standard deviation); logic of statistical inference, including normal curve and sampling distribution; hypothesis testing with one sample and two samples; measures of association between two variables (bivariate analysis), including chi-square, regression, and correlation; and introduction to multivariate regression. Students will utilize SPSS (Statistical Package for the Social Sciences) software to input and analyze data. The goals of the course are for students to appreciate the need for statistical methods in the broad field of sociology and to gain basic statistical literacy.

Term:

Offered Both Fall and Spring

Type:

Quantitative Reasoning

• SOC-214 Research Methods in Sociology

Prerequisites:

SOC 113 or 116 with C or better & one other SOC course. Cannot be taken concurrently with SOC 310,315,or 333.

Credits:

4.00

Description:

How sociologists decide what to study, how they select a research design, sample and collect data, analyze results, interpret findings, and write up reports. Students are introduced to the techniques most frequently used by sociologists and undertake their own small research project. Required for all Sociology majors.

Term:

Offered Both Fall and Spring

• SOC-217 Sociology of Urban Life
Prerequisites:

Fulfills ECR requirement

Credits:

4.00

Description:

An examination of the effects of the city on human life in its broadest as well as its most specific aspects. Greater Boston and similar communities across the nation will be studied as ecological settings, as producers and shapers of change, and as special contexts for understanding sociological ideas. Comparisons will be made among urban places in the U.S. and in other countries.

Term:

Occasional

Type:

Social Science, Cultural Diversity Opt A, Expanded Classroom Requirement

- SOC-218 Crime and Law in Indian Country

Credits:

4.00

Description:

What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.

Term:

Occasional

Type:

Cultural Diversity Opt A, Diverse Perspectives
• SOC-220 Childhood and Adolescence in Contemporary Society

Credits:
4.00

Description:
This course examines the development of children and adolescents from biological, psychological, and sociological perspectives. Major themes and changes associated with each developmental stage are discussed. The course explores practical implications of theory and research (parenting, juvenile justice, etc.), and current topics in child and adolescent development. Class format includes lectures discussion, debates and direct observation of children.

Term:
Occasional

• SOC-221 Environment and Society

Credits:
4.00

Description:
The history of the American Environmental Movement and eco-feminism will be examined as well as issues of pollution and depletion. Sustainable technologies and other current progressive programs will be addressed.

• SOC-222 Women in Struggle on Film

Credits:
4.00

Description:
Women's struggles in arenas from war to labor disputes will be examined through films and writings. Societal, historical and cultural contexts of women's roles in films are discussed drawing on film criticism and sociological analyses.
• SOC-223 Families in Contemporary Society

Credits:
4.00

Description:
An exploration of the diversity of contemporary families. Comparisons are made between the cultural myths of the ideal family and the lived realities. Challenges confronting contemporary families and their implications for social policy are examined in such areas as work/family conflicts, gay and lesbian families, welfare, family violence.

• SOC-224 Families in Contemporary Society (Spain)

Credits:
4.00

Description:
Spain has experienced major socio-demographic changes since the mid 1970s. These transformations mainly arise from the new role of women in society and, in particular, women's higher levels of education, work experience, and labor market attachment. The changes in women's labor force participation have occurred in conjunction with a progressive postponement of main family events, such as leaving the parental home, forming a partnership and having children, as well as with a reduction in the family size. Spain is, indeed, characterized as having one of the lowest low fertility levels within Western industrialized countries, a pattern that is exacerbating the ongoing process of population aging. This picture partly reflects the conflicting relationship that currently exists between women's labor force participation and the accommodation of family responsibilities: the so-called work/family balance. Ongoing differences among countries have been accounted for by different explanatory factors that involve socio-economic,
cultural and social policy dimensions. From a comparative perspective, the course is intended to cover recent debates, controversies, and research on family formation and family dilemmas in contemporary Spain.

Type:
Social Science

- **SOC-225 Sociology of Romance**
  
  **Credits:**
  4.00
  
  **Description:**
  The meaning of romance and courtship today and its social consequences in marriage, homogamy, stratification and divorce. The historical origins of romanticism and the sources of romance in socialization, books and magazines, television and movies, popular music and peer group membership are also considered.
  
  **Term:**
  Occasional

- **SOC-226 Religion in Contemporary Society**
  
  **Prerequisites:**
  This course fulfills the ECR requirement.
  
  **Credits:**
  4.00
  
  **Description:**
  An examination of the fundamental purpose and functions of religion in society. Major religious systems in America are analyzed in terms of basic values and structure. The impact of changes in religious organizations upon clergy, laity and society are discussed. This class fulfills the ECR requirement.
  
  **Term:**
SOC-227 Race in American Society

Credits: 4.00

Description:

Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

Term:

Occasional

Type:

Cultural Diversity Opt A,Diverse Perspectives,Cultural Diversity Opt B

SOC-228 Cultural, Global and Social Perspectives

Credits: 4.00

Description:

Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.
Term: Occasional
Type: Cultural Diversity Opt A, Diverse Perspectives

- **SOC-229 Social Class and Inequality**

  Credits:
  4.00

  Description:
  This course examines the difference between the life experience of those who are rich, poor and middle class. Topics include: the elite in Boston, theories of inequality; blue collar neighborhoods, the hard living poor, and ethnic and sexual stratification.

  Term: Occasional

- **SOC-230 Bad Girls**

  Credits:
  4.00

  Description:
  This class explores the images of the traditional bad girl in films. The course examines the idea of moving beyond merely the delinquent, many images in film suggest that girls and women who break with the socially condoned role of femininity are somehow bad. Girls and women who have power or challenge authority are often portrayed in films as deviant and therefore bad. Girls and women who are frigid are just as bad as their sexually promiscuous silver-screen opposites. This course further focuses on the impact of these images on real life social roles for girls and women as well as the symbiotic relationship between fact and fiction.

  Term: Occasional
• **SOC-232 Street Gangs**

  Credits:
  
  4.00

  Description:
  
  This course provides an overview of youth gangs and their sociological underpinnings, which are rooted in poverty and racism. Topical areas are discussed in relation to these key factors. Study topics include the history of gangs, theories about gang formation and individual membership, gangs and criminal behavior, socio-cultural importance of gangs, and strategies to control gang behavior. The course will utilize current gang issues in the US generally and in Massachusetts in particular as a basis to better understand the nuances of youth gangs.

• **SOC-234 Crime and Justice in American Society**

  Credits:
  
  4.00

  Description:
  
  An overview of issues and social variables involved in the pre-arrest and arrest stages followed by a more in-depth analysis of pre-trial, trial, sentencing, and correctional phases. Sociological and criminal justice models are examined and compared with the actual processes and purported functions of criminal justice agencies. Required for all majors in the Crime and Justice Concentration.

  Term:

  Offered Both Fall and Spring

• **SOC-236 Deviance and Social Control**
Who and what is deviant? How shall the society respond? The course examines a range of deviance theories and associated social policies. A number of case studies will be used to evaluate these theories, such as body piercing, witchcraft, gay and lesbian sexuality, corporate crime, disability, prostitution, violence against women, racism, anti-Semitism, and gangs.

Term:

Offered Both Fall and Spring

Type:

Social Science

• SOC-237 School to Prison Pipeline

Credits:

4.00

Description:

This course will examine the mechanisms through which U.S. social institutions, particularly schools, facilitate youth involvement in the juvenile and criminal justice systems. These mechanisms include: inequity, disability tracking, zero-tolerance policies, push-out, and the criminalization of adolescent behavior. Students will engage in activities aimed at analyzing these processes and developing methods to disrupt them at the social, political, educational, and instructional levels.

• SOC-238 Cops & Robbers: Crime on Film

Credits:

4.00

Description:

An examination of images of crime and justice portrayed in the American cinema. Special attention is paid to the social and historical forces that have shaped popular representations of good and evil during the modern era.
**SOC-239 Men and Violence**

**Credits:**
4.00

**Description:**
An exploration of the nature of masculinity and its connection to interpersonal and collective violence in American society. The course focuses on the emotional, spiritual, social and cultural roots of the crisis of boyhood and masculinity as a context for and consequence of violence.

**SOC-242 Law, Health & Human Rights**

**Credits:**
4.00

**Description:**
This course will look at the special opportunities and obligations of those in the health and legal professions to protect human rights. There will be an overview of human rights doctrine and key documents. Students will learn to apply human rights principles to particular occupations in the health and legal professions.
• SOC-253 Sociology of Health and Illness

Credits:

4.00

Description:

This course provides students with an introduction to how social norms, structures, and practices shape experiences of illness and health. Among the topics that will be covered are: health and the environment, the reasons some groups of people are less healthy than others, living with chronic illness and disabilities, and public debates surrounding issues such as performance enhancing drugs and sports, Attention Deficit Disorder and the HPV vaccine. Required for all students in the health, Medicine and the Body Concentration.

Term:

Occasional

• SOC-254 U.S. Health Care Landscapes

Prerequisites:

This course fulfills the ECR requirement.

Credits:

4.00

Description:

In this course, students will learn about how the U.S. health care system works. We will study the politics and economics of the health care system and discuss the key health care policy issues of this decade. Using the theoretical perspectives provided by sociology, we will look at issues of power, hierarchy, race, and gender vis-a-vis the health care system. Reading for this course centers on first person narratives by people working in the health care system. This course fulfills the ECR requirement.

Term:

Occasional

Type:

Expanded Classroom Requirement
• SOC-256 Sociology of Aging

Credits:
4.00

Description:
Consideration of the physiological, psychological and social factors associated with the aging process. Contemporary American values toward the elderly are compared and contrasted with historical and cross-cultural studies. Current opportunities and techniques enabling the elderly to enrich and expand their societal roles are explored.

Term:
Occasional

• SOC-264 Social Media and Society

Credits:
4.00

Description:
An examination of the ways in which social structures and processes influence and are affected by modern ideas, needs and social practice techniques in technologically advanced societies is considered in conjunction with changes in the way in which we understand the world, the nature of work and leisure, the processing of information and the character of social institutions. Normally offered alternate years. Fulfills the Social Science Option. Fulfills the Sociology Department's Social Policy requirement.

Type:
Social Science

• SOC-273 Women in Contemporary Society

Credits:
4.00

Description:
A critical analysis of theory and research related to the socialization, roles and social participation of women in contemporary society.

Term:
Occasional

- **SOC-275 Women and Crime**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  This course examines the complex relationships between women and crime today. This focus will include women as criminal offenders; women as victims of crime; and women as both offenders and victims. Course materials draw from recent feminist scholarship on these issues in the social sciences. Topics include the causes of women's crime women, drugs, and crime; child abuse and trauma; prostitution and sex trafficking; race, gender and victimization; and feminist social movements against violence. Crimes of violence against women are a central focus in the course.

  Term:
  Occasional

  **Type:**
  Cultural Diversity Opt A

- **SOC-276 Sex and Society**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  An examination of human sexuality as experience and institution. Sexuality is considered in relationship to power, love, religion, family, race, gender, sexual orientation, violence and courtship.

  Term:
  Occasional
• SOC-286 Women and Work

Credits:
4.00

Description:
An exploration of the relationship between gender roles, work environments, and careers in American society. The problems and prospects faced by women in the world of work are considered with special attention to power and sexism in the workplace, domestic vs. organizational work, role conflicts for working women, and the relationship between changing images of women and changing patterns of female employment. Policy requirement.

Term:
Occasional

Type:
Cultural Diversity Opt A

• SOC-301 Sociology of Law

Credits:
4.00

Description:
Law and legal systems are examined in contemporary society. Emphasis is placed on the manner in which legal structures and processes interact with other social arrangements and are transformed over time.

• SOC-303 How Pocahontas Lives: the Health of Native American Women and Girls

Credits:
4.00

Description:
Native American women and girls experience many threats to their well-being: polluted environments, violence, and the continuation of colonial practices mean that their lives are at risk. Dominant political, economic, and cultural norms do little to protect them. Yet Native American women and girls can and do assert their right to well-being as they choose to define it, achieving health and self-determination. This class will examine the indigenous women and girls of the United States, to consider the continued impact of colonialism on women's health and the role of self determination in creating opportunities for the improvement of Native American women's health.

- **SOC-304 Hot, Polluted, and Hungry**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  In this course we will explore our natural environment and human interaction with it. We will study how the environment is impacting human life, exposure to environmental harms, and our foods which we may forget come from the earth. We will study the hidden ways that humans shape and are shaped by the environment. We will have an exciting and challenging time together trying to make sense of the ways our natural environment and our lives are evolving.

- **SOC-305 Crime and Mental Illness In Contemporary US**
  
  **Credits:**
  
  4.00
  
  **Description:**
  
  Incarcerated and criminalized Americans suffer from extraordinarily high rates of physical and mental illnesses ranging from Hepatitis C, tuberculosis and HIV/AIDS to bipolar disorder, PTSD, substance abuse, and schizophrenia. This course explores connections between illness and involvement with the correctional system from the perspective of the individual offender as well as in terms of broader American cultural and political patterns.

- **SOC-306 Population and Society**
  
  **Credits:**
  
  4.00
  
  **Description:**
An introduction to demography or the study of population and its size, structure, and the ways it changes over time. Demographers study love, death and adventures, or the different patterns of fertility, mortality, and migration across the globe. The social causes and consequences of high mortality and fertility in sub-Saharan Africa, rapid fertility decline in China, and low fertility and mortality in western Europe are examined. Demographic approaches to social problems like world famine, teen pregnancy, HIV/AIDS pandemic, and social security system budget deficits are also considered.

- **SOC-308 Sociology of Education**
  
  **Credits:**
  4.00
  
  **Description:**
  
  Education is key in a democracy in which students need to develop themselves into knowledgeable people, with a strong sense of self, able to think critically with a developed ability to question others and to feel and act as empowered, active citizens. This is a tall order given the varieties of pressures on schools these days. But it is extremely important for these skills to be developed. With the shift in the economy, schools are going to be the critical factor in enabling students to compete in a globalized workplace and world.

- **SOC-312 Sex Offenders**
  
  **Credits:**
  4.00
  
  **Description:**
  
  This course presents an overview of the policy issues related to sex offenders. Focusing on the current scholastic research on sex offenders, students will discuss myths about sexual offenders as well as the consequences of myths on policy. The course will additionally cover the history of sex offender policies and moral panics, explanations, treatment and prevention of sex offending and victimization.

- **SOC-315 Social Conflict and Social Change**
  
  **Prerequisites:**
  SOC 113 or 116 with a grade of C or better and one other SOC course; CANNOT be taken concurrently with SOC 214;
  
  **Credits:**
  4.00
Description:

An examination and comparison of the origin, development and structure of the major theoretical approaches in contemporary sociology. Contributions of different branches of sociology to theory are explored with special attention to the relevance of sociological explanations for society and the social process. Students must have taken SOC 113 or SOC 116 and passed with a C or better and one other course from the sociology department. Normally offered every semester.

Term:

Occasional

• **SOC-321 Identity, Self and Society**

  Credits:

  4.00

  Description:

  This course explores the emergence of the self as an intersection of biography, history and social structure. Emphasis is on modern, Western societies. Conceptually, we will take a life course approach which emphasizes processes of psychosocial, moral, intellectual, and spiritual development for contemporary men and women. This course is designed in part as a workshop where students will develop the skills and insights essential for conducting life history research and biographical studies that are sociological in focus.

  Term:

  Occasional

• **SOC-322 Tough Guise**

  Credits:

  4.00

  Description:

  Representations of masculinity in contemporary societies are examined in terms of their social sources and consequences. Images and scripts for doing masculinity are explored through case studies of film, television, sports, advertising, comic books, video games, music and other media that define what it means to be a man.
SOC-325 Popular Culture in America

Prerequisites:
Prerequisite: SOC 113 or SOC 116.

Credits:
4.00

Description:
An investigation of the images of life provided by mass communications, the educational system and official culture. Topics include: the growth of the youth culture since the 1950s; images of working people; women, minorities and advertising; changing ideas of success; consciousness-raising and contra-cultures.

SOC-327 Special Topics: General Sociology

Credits:
4.00

Description:
A course with special interest topics in sociology which changes depending on the professor.
• SOC-329 Sociology of Globalization

Prerequisites:

Prerequisite: SOC 113 or SOC 116.

Credits:

4.00

Description:

Globalization is shrinking the world. How and why did this happen? This course will explore global change and the global processes which effect key social institutions: culture, the economy and politics. Students will study the processes of globalization and its impact on our lives and people around the globe.

Term:

Occasional

Type:

Cultural Diversity Opt B,Diverse Perspectives

• SOC-331 Violence Against Women

Credits:

4.00

Description:

This course focuses on the many forms of violence against women, with particular attention to child sexual abuse, rape, and violence and abuse in intimate relationships. These crimes have been the subject of intense political organizing, cultural controversy, and criminal-legal reform over the past 40 years. Together these issues account for a significant portion of the work of the police and the courts. They are also major issues in women's health over the life span. This course will address these issues from psychological, sociological, political, and criminal-legal perspectives.

• SOC-332 Restorative Justice
The purpose of this course is to introduce students to the principles of restorative justice and to examine the programs, practices and policies within schools, juvenile justice and the adult criminal justice system which implement a restorative practices. Restorative justice is a different philosophy of responding to harm which provides new roles for the victim, offender, community and professionals. We will compare a restorative approach to crime with the traditional system of discipline and crime control and critique the shortcomings of an adversarial or retributive response to criminal behavior. We will explore the theoretical and historical origins of traditional justice systems and restorative approaches. We will also examine how these ideas are being applied in practical partnerships between the justice system and the community here in the United States and around the world.

Type:

Expanded Classroom Requirement

- **SOC-333 Sociology of Crime**
  
  Prerequisites:
  
  SOC-113 or SOC-116 with a minimum grade of C and 1 additional SOC course. Cannot be taken concurrently with SOC-214
  
  Credits:
  
  4.00
  
  Description:
  
  The question Why is there crime? lies at the heart of this course. This class will address what we mean by crime, who gets to define what crime is, how crime can be explained and how it can be reduced. Making sense of crime is essential if we are to respond effectively to victims and offenders. This course offers an in-depth examination of the many different theories of crime. These include biological, psychological, and sociological theories of victimization and offending. The course will study these theories in the context of many different kinds of criminal offending. By the end of the course, students will have a deep understanding of where these theories came from; what their strengths and weaknesses are; whether they are supported by research findings; and what implications these theories have for stopping crime.

- **SOC-334 Sociology of Policing**
  
  Prerequisites:
SOC 333 or SOC 234

Credits:
4.00

Description:

An investigation of the emergence, organization, and structure of police systems. The course focuses on the conditions surrounding the relationship between the police and policed in different historical, cultural, political, and economic contexts.

Term:
Occasional

- **SOC-336 Probation and Parole**

  Prerequisites:
  SOC-234 or SOC-333;

  Credits:
  4.00

  Description:

  Correctional theories are reviewed along with the historical development of probation and parole. Current research and analytical perspectives reflecting on administrative problems, innovative policies and the internal philosophical inconsistencies of these systems are examined.

- **SOC-337 Juvenile Justice and the Law**

  Credits:
  4.00

  Description:

  Considers the problems surrounding the legal definition and handling of juveniles who confront the law as offenders, clients and victims. Attention is devoted to the study of the special legal categories and procedures established for juveniles, the problems facing professionals providing juvenile
services and the most significant directions of legal and social change affecting youth in our society. Normally offered every year. Fulfills the Sociology Department's Social Policy requirement.

- **SOC-338 White Collar Crime**
  
  Credits:  
  4.00  
  
  Description:  
  An examination of the relationship between crime, business activity, and technology with special attention to the crimes of the powerful and the changing relationship between economic development and criminal activity.  
  
  Term:  
  Occasional

- **SOC-340 Licit/Lethal: America's Drug Problem**
  
  Credits:  
  4.00  
  
  Description:  
  Most Americans think of prohibited substances such as marijuana, cocaine or heroin when they hear the word drug. This course will provide an in-depth examination of legal drug use in American society. A broad conceptual framework will be presented that illustrates how history, politics, society and economics all have played a key role in defining certain substances as permissible in America. Fulfills the Sociology Department Social Policy and Globalization requirements.  
  
  Term:  
  Offered Fall Term

- **SOC-341 International Drug Control Policy**
  
  Credits:
Description:

Relying on a simplistic demand or supply explanation of why Americans use/abuse drugs obscures the reality of America's drug problem, is ineffective as a guide to public policy and has unforeseen, often negative consequences. Drug use is a complex and multi-faceted issue. There are no easy answers. To comprehend the complexity of America's drug problem one needs an understanding of the geography, history, religion, law, economics and international politics of the Middle and Far East, Eastern Europe, Africa, Mexico, and Central and South America. This class will provide this basic understanding without losing sight that the problem we seek to remedy is our own.

Term:

Offered Spring Term

Type:

Cultural Diversity Opt B

- **SOC-342 Law, Health & Human Rights**

  Credits:

  4.00

  Description:

  This course will look at the special opportunities and obligations of those in the health and legal professions to protect human rights. There will be an overview of human rights doctrine and key documents. Students will learn to apply human rights principles to particular occupations in the health and legal professions.

- **SOC-343 Child Welfare Services**

  Credits:

  4.00

  Description:

  A survey of the historical development and current composition of services for children, including income maintenance, daycare, foster and institutional care and the adoption process.
• SOC-344 Community Organization

Credits:
4.00

Description:
A study of the different types and functions of communities. Through identifying community needs, resources, and structure, students learn effective ways to organize for change.

• SOC-347 Immigration Law and Policy

Prerequisites:
Prerequisite: SOC 113 or SOC 116 OR Instructor's consent

Credits:
4.00

Description:
This course examines U.S. Immigration legislation and policies, focusing on how and why various immigration laws and policies have been established and implemented throughout history. We will address the intersection between immigration policy and race, ethnicity, nationality and socioeconomic status, as well as explore the effects that immigration laws have had on various immigrant groups and society in general.

Term:
Occasional

Type:
Cultural Diversity Opt A
• SOC-354 Death and Dying
  Credits:
  4.00
  Description:
  An examination of changing definitions of life and death, social factors affecting causes and rates of death, care of the dying and their families, institutionalization, the funeral industry, suicide, crisis intervention, and the impact of technology on the dying process.
  Term:
  Occasional
  Type:
  Diverse Perspectives

• SOC-355 Women and Health
  Credits:
  4.00
  Description:
  An exploration of topics that relate particularly to women as providers and consumers in the health care system. The course will consider historical and current information on issues of reproduction, technology, health and illness.
  Term:
  Occasional

• SOC-357 Global Health and Healing
  Credits:
  4.00
  Description:
An examination of how different cultures understand health and illness. Healing approaches from Asia, Africa and the Americas will be explored.

Term:
Occasional
Type:
Cultural Diversity Opt B,Diverse Perspectives

• **SOC-379 Anthropological Perspectives in Spain**
  
  Credits:
  4.00
  
  Description:
  The recent changes in both Spain and Portugal are only the latest in a series of important transformations which these two countries have undergone over the past fifty years or so. In that time, they have both gone from being predominantly rural societies where the majority of the population live and work on the land to becoming industrial societies not unlike those of northern Europe and North America. Yet the underlying cultural heterogeneity of the peoples of the Iberian Peninsula has meant that different regions have often had very distinct actions to the various pressures toward political, economic, and social change. This seminar will examine the ethnographic diversity of the Iberian Peninsula in its regional manifestations, using a specifically anthropological approach in order to better comprehend present-day Spain and Portugal. Offered on Madrid Campus only. 1 term - 4 credits
  
  Type:
  Global Engagement Experience

• **SOC-H379 Honors Anthropological Perspectives in Spain**
  
  Credits:
  4.00

- **SOC-380 Special Topics in Sociology: Peer Tutoring**

  Prerequisites:
  Instructor's consent; ECR

  Credits:
  4.00

  Description:
  Specialized topics based on peer tutoring research and development. Content, prerequisites and hours to be announced.

  Term:
  Offered Both Fall and Spring

  Type:
  Expanded Classroom Requirement

- **SOC-390 The Prison Experience, Literature and Film**

  Credits:
  4.00

  Description:
An examination of prison writings, films, and the actual experience of prison life from literary and sociological perspectives. Students will have an opportunity to examine their own perspectives of the prison as a symbol and shadow in American Society and compare these impressions with the actual experience of inmates, correctional officers and others who have lived in the prison nation.

Term:
Occasional

**SOC-406 The Immigrant Experience**

**Prerequisites:**
SOC-113 or SOC-116 and 4 credits of a SOC course at the 200 level or above

**Credits:**
4.00

**Description:**
The United States of America: A land of immigrants; The Great Melting Pot. This country has indeed attracted immigrants from all over the world. However, not all have been welcomed or treated equally. This course will investigate the reasons various immigrant groups (past and present) have come to the United States. We will also examine their experiences and the impact race, ethnicity, gender, class and social structures have had on them. During Spring Break the class will visit Ellis Island and the Tenement Museum in New York and the Lowell National Historical Park in Lowell. The class will also visit various sites in Boston throughout the semester.

**Type:**
Cultural Diversity Opt A, Expanded Classroom Requirement, Local Engagement Experience

**SOC-433 Senior Seminar**

**Prerequisites:**
SOC 113 or 116 (with a grade of C or better) SOC 214, and SOC 315 or 333. Seniors only. Required of all majors.

**Credits:**
4.00

**Description:**
This course explores contemporary topics in crime and justice, interrelating empirical and theoretical analyses. Topical areas vary by semester and by instructor. Students engage in a substantial research project to demonstrate mastery. Required for all students in the Crime and Justice Concentration.

- **SOC-453 Seminar in Sociology**

  Prerequisites:

  SOC 113 or SOC 116 with a minimum grade of a C; SOC 214; SOC 310, SOC 315, or SOC 333; Seniors only.

  Credits:

  4.00

  Description:

  This course will explore topics in sociology, requiring students to synthesize their learning in sociology to analyze research and develop their own study plans. The purpose of this course is to summarize and refine accumulated knowledge in sociology. Students will demonstrate knowledge by engaging in a significant research project.

  Term:

  Occasional

- **SOC-483 Internship in Sociology I**

  Prerequisites:

  Students must be Sociology majors with at least a 3.0 GPA; must have at least sophomore status at the time of application; must have one full day free each week to work an internship. Applications for the Internship in Sociology I course must be approved by the Instructor.

  Credits:

  4.00

  Description:

  Students are provided with the opportunity to apply academic learning in a supervised internship consistent with their personal career goals or academic interest. The course covers such topics as career exploration and development, resume and cover letter writing, job fairs, and networking,
and graduate school applications. In addition to the course assignments, students are required to complete a minimum full day internship each per week during the entire semester.

Term:

Offered Both Fall and Spring

Type:

Expanded Classroom Requirement

- **SOC-484 Internship in Sociology II**

  Prerequisites:

  SOC 483. Students must be Sociology majors with at least a 3.0 GPA; must have at least sophomore status at the time of application; must have one full day free each week to work an internship. Applications for the Internship in Sociology I course must be approved by the Instructor.

  Credits:

  4.00

  Description:

  Students are provided an opportunity to intensify or extend their internship experience. The course covers such topics as mock interviewing, informational interviewing, and job fairs.

  Term:

  Offered Both Fall and Spring

  Type:

  Expanded Classroom Requirement

- **SOC-510 Independent Study**

  Credits:

  4.00
Members of the department hold special meetings with students and direct them in investigating topics of interest in sociology. Arrangements for independent study must be approved by the supervising instructor and the Department Chairperson.

Term:
Offered Both Fall and Spring

- **SPAN-101 Elementary Spanish I**

  Credits:
  4.00

  Description:
  Practice in both oral and written language skills. Class activities are organized around cultural themes that reflect the diversity of the Hispanic world and its interconnectedness with the rest of the world. Weekly laboratory sessions required.

  Term:
  Offered Fall Term

  Type:
  BA FOREIGN

- **SPAN-102 Elementary Spanish II**

  Prerequisites:
  SPAN 101 or Instructor's consent

  Credits:
  4.00

  Description:
  Continues skills development from 101. Weekly laboratory sessions required.
• SPAN-105 Overview of Spanish Culture

Credits:
1.00

Description:
This course, open only to students from Maryville University of St. Louis, offers a broad survey of Spanish history and culture. It focuses principally on key elements of geography, history, sociology, politics and traditions. The course will place special emphasis on Spanish culture and its problematic modernization, which is an issue with very important consequences for the intellectual productivity of this country.

• SPAN-201 Intermediate Spanish I

Prerequisites:
SPAN 102 or Instructor's consent

Credits:
4.00

Description:
Reviews Spanish grammar and examines Spanish through authentic materials of cultural interest. Students develop written and oral skills through compositions and audio-visual materials. Weekly laboratory sessions required.
• SPAN-H201 Honors Intermediate Spanish I

Prerequisites:

SPAN 102 or Instructor's consent

Credits:

4.00

Description:

A systematic review of Spanish grammar and study of Spanish through materials of cultural interest. Development of written and oral skills through compositions and audio-visual materials. Weekly laboratory sessions required.

Term:

Offered Fall Term

Type:

BA FOREIGN, Honors

• SPAN-202 Intermediate Spanish II

Prerequisites:

SPAN 201 or Instructor's consent.

Credits:

4.00

Description:

Continues skills development from 201. Students read a collection of short stories, write compositions, develop cultural insights through comparative and contrastive assignments, and practice listening and speaking skills in weekly conversation sessions.

Term:
Offered Spring Term

Type:

BA FOREIGN, Diverse Perspectives

- **SPAN-H202 Honors Intermediate Spanish II**

  Prerequisites:

  SPAN 201 or Instructor's consent.

  Credits:

  4.00

  Description:

  A continuation of skills development from 201. Weekly laboratory sessions required.

- **SPAN-203 Intensive Intermediate Spanish**

  Prerequisites:

  SPAN 201 or Instructor's consent

  Credits:

  4.00

  Description:
A writing and reading intensive course for students who are thinking about minoring and possibly majoring in Spanish. There will be a brief review of grammar, but the primary materials will come from the textbook, LAZOS, with ancillary materials from the print media and audio-visual sources. A weekly tertulia will be required instead of language lab.

Term:
Alternates Fall & Spring
Type:
BA FOREIGN

- **SPAN-205 Intensive Intermediate Spanish**

  Prerequisites:
  SPAN 201 or Instructor's consent

  Credits:
  4.00

- **SPAN-210 Spanish in the Workplace**

  Credits:
  4.00
This course is designed for students who have successfully completed Spanish (201) at Suffolk or its equivalent elsewhere. Through a systematic review of grammar, a diversity of readings, and oral as well as written work, students will increase their lexical and grammatical knowledge of Spanish language specific to the workplace in order to communicate more easily and comfortably. Students will also be better prepared to deal with the specific themes related to business introduced in the course. (This course is not for Spanish minors or majors, but may be taken as a free elective.)

- **SPAN-290 Advanced Composition & Conversation**

  **Prerequisites:**
  
  Prerequisite: Spanish 202, 203 or 250 or Instructor's consent

  **Credits:**
  
  4.00

  **Description:**
  
  Develops written and oral skills in various contexts and registers. Emphasis on strengthening written skills and learning to speak clearly and persuasively in Spanish. Short texts and audio-visual materials provide the basis for classroom activities which include regularly assigned essays, group discussions and debates.

  **Term:**
  
  Offered Fall Term

  **Type:**
  
  BA FOREIGN,Diverse Perspectives

- **SPAN-295 Spanish in the Workplace**

  **Credits:**
  
  4.00

  **Description:**
  
  This course is designed for students who have successfully completed Spanish (201) at Suffolk or its equivalent elsewhere. Through a systematic review of grammar, a diversity of readings, and oral as well as written work, students will increase their lexical and grammatical knowledge of Spanish
language specific to the workplace in order to communicate more easily and comfortably. Students will also be better prepared to deal with the specific themes related to business introduced in the course. (This course is not for Spanish minors or majors, but may be taken as a free elective.)

**SPAN-299 Translation Workshop**

**Prerequisites:**
SPAN 290 or SPAN 300 or Instructor's consent

**Credits:**
4.00

**Description:**
This course aims to introduce students to translation techniques through direct practice and to consider what makes a good translation. Material will be selected from a wide variety of sources and will increase in difficulty as the course goes on. The emphasis will be on translation from Spanish into English, but some work will be done on translation into Spanish. Students will be expected to complete regular homework assignments for which grades will be given. (Madrid campus only)

**SPAN-H299 Honors Translation Workshop**

**Prerequisites:**
SPAN 290 or SPAN 300 or Instructor's consent

**Credits:**
4.00

• **SPAN-300 Intro to Cultural Texts**

  Prerequisites:

  Spanish 202, 203, 250 or Instructor's consent.

  Credits:

  4.00

  Description:

  Explores a selection of Peninsular and Latin American cultural materials. Primarily examines texts from different literary genres (narrative, drama, essay, and poetry). Develops critical skills required in more advanced Spanish courses, through close readings and textual analysis. Activities include regularly assigned essays, group discussions, and short scene work.

  Term:

  Offered Spring Term

  Type:

  Humanities Literature Requirement, BA FOREIGN

• **SPAN-301 Spanish Culture and Civilization**

  Prerequisites:

  Spanish 202, 203 or 250. Spanish 290 or 300 are strongly recommended

  Credits:

  4.00

  Description:

  Examines the civilization and culture of Spain highlighting its historical development and cultural manifestations from pre-historic times to the nineteenth century. Students improve their four skills through activities that include discussions, oral presentations, and writing assignments based on reading and films.

  Term:
• **SPAN-302 Indigenous and Colonial Latin America**

   **Prerequisites:**
   
   Spanish 202, 203 or 250 or Instructor's consent. Span 290 or 300 strongly recommended.

   **Credits:**
   
   4.00

   **Description:**
   
   Introduces students to the complexity Latin America by examining its roots in pre-Columbian America and the impact of Spanish exploration and colonization. Places emphasis on cultural, economic, historical, philosophical, political and religious patterns that define the region. Includes class discussions, oral presentations, and writing assignments based on reading and audio-visual material.

   **Term:**
   
   Alternates Fall & Spring

• **SPAN-303 Modern and Contemporary Latin America**

   **Prerequisites:**
   
   SPAN 202 or 203 or Instructor's consent. SPAN 290 or 300 strongly recommended.

   **Credits:**
   
   4.00

   **Description:**
Examines the path taken by Latin American and Caribbean countries to build independent nations out of colonial territories highlighting the 19th, 20th, and 21st centuries, ethnic plurality, and cultural complexity in areas such as politics, religion, sociology, economics, customs, music & film. The cultural contributions of Spanish-speaking minorities in the United States are also addressed. Includes class discussions, oral presentations, and writing assignments based on readings and audio-visual material.

Type:
Diverse Perspectives

• SPAN-305 Living in Translation

Prerequisites:
SPAN 250, 290, or 300 or Instructor's consent.

Credits:
4.00

Description:
Examines the process and theory of translation. Materials are drawn from the literary world, the mass media (i.e. advertising, marketing, news, entertainment), and professional sources. Students gain further insights about the linguistic, cultural, and ethical dimensions of the field. Additional grammar review provided as needed.

Term:
Occasional

• SPAN-315 Business Spanish

Prerequisites:
SPAN 290 or SPAN 300 or Instructor's consent.

Credits:
4.00

Description:
Integrates language learning with culture via business context of the Hispanic world. Spanish for banking and finance, marketing and advertising, and international commerce are highlighted. Students increase their cross-cultural understanding and written and oral proficiency in business Spanish through a wide range of assignments.

Type:
Diverse Perspectives

- **SPAN-340 Hispanic Culture Today: Trans-Atlantic Perspective**

  Prerequisites:
  Take SPAN 290 or SPAN 300 or Instructor's consent.

  Credits:
  4.00

  Description:
  An examination of key issues in Hispanic culture today through the study of literature, film, music and TV. The purpose of the course is twofold: To introduce the students to major themes in recent Hispanic society and culture and, to develop the necessary skills to read and analyze literary texts and other cultural forms. Topics to be discussed include dictatorship and democracy, women and representation, political and domestic violence, national identity, immigration, and mass culture. The selected materials will include texts by authors like Manuel Rivas, Mario Vargas Llosa, Carlos Fuentes, Cristina Peri Rossi, Rosa Montero, Carlos Monsivais, and Roberto Bolano among others. (Madrid campus only)

  Type:
  BA FOREIGN

- **SPAN-350 Spanish Cultural Studies**

  Credits:
  4.00

  Description:
  This is an interdisciplinary course that will examine the historical and socio-economic causes of contemporary Spanish culture. Material will be drawn from a variety of sources including: history, sociology, gender studies, literature and philosophy. Extensive reference will be made to the non-Western
cultures which have made Spain what it is today. (Usually taught in English). (Madrid campus only)

• **SPAN-360 Madrid Cosmopolitan City**

  Prerequisites:
  
  SPAN-290 or SPAN-300 or Instructor's consent
  
  Credits:
  
  4.00
  
  Description:
  
  This course is designed to provide students with a basic knowledge of the city of Madrid in terms of its historical, cultural, and social development. Contemporary aspects of the city such as its rise to prominence amongst the capitals of Europe and the phenomenon of recent immigration patterns will also be discussed. All classes will be conducted in Spanish. Specific grammar points will be reviewed as needed. (Madrid campus only)
  
  Type:
  
  BA FOREIGN, Global Engagement Experience

• **SPAN-390 Introduction to Latin American and Caribbean Literature**

  Prerequisites:
  
  SPAN 300; SPAN 302 is strongly recommended
  
  Credits:
  
  4.00
  
  Description:
  
  Examines authors from Latin America and the Caribbean in their historical and cultural contexts. Reading and class discussions consider the relationship between the writer and society by covering such topics as colonialism, the oral tradition, modernism and the emergence of new narratives in the twentieth century. The Inca Garcilaso, Sor Juana, Carlos Fuentes, Rigoberta Menchu, and Pablo Neruda are among some writers studied.
  
  Term:
  
  Occasional
• SPAN-405 Women's Voices in Latin America

Prerequisites:
SPAN-300; Spanish 302 or its equivalent is strongly recommended

Credits:
4.00

Description:
Examines the changing roles of women in Mexico, the Caribbean, Central and South America through fiction, non-fiction, drama, poetry and film. Special focus is placed on the impact that changes in social ideology and culture have had on their identity and writings. Texts available in English.

Term:
Occasional

Type:
Cultural Diversity Opt B, Humanities Literature Requirement, BA FOREIGN, Diverse Perspectives

• SPAN-407 Latin American Short Narrative

Prerequisites:
Spanish 300; or Instructor's consent; Spanish 302 is strongly recommended

Credits:
4.00

Description:
Explores some of the major trends in the twentieth century Latin American story telling. Readings reflect the vast array of voices and styles, beginning with fantastic literature of the 1930's, the birth of magical realism and the more contemporary, socio-political narratives. Authors include Isabel Allende,
Julio Cortazar, Rosario Castellanos, Gabriel García Márquez, Juan Rulfo, Luisa Valenzuela, among others.

Term:
Occasional

Type:
Humanities & History, Humanities Literature Requirement, BA FOREIGN

- **SPAN-408 Latin American Cinema**

  **Prerequisites:**

  Take ENG-102 or ENG-103 or Instructor's consent. Span 302 is strongly recommended for Spanish and Latin American & Caribbean Studies majors and minors.

  **Credits:**

  4.00

  **Description:**

  Begins with the Cuban revolution as a point of departure and examines films from Argentina, Chile, Colombia, Mexico, and other Latin American countries. Students explore the relationship between film & society and consider how knowledge of a culture and its history is influenced and shaped by what is seen on the screen. Films in Spanish with English subtitles.

  **Term:**

  Occasional

  **Type:**

  Cultural Diversity Opt B, Humanities & History, Humanities Literature Requirement

- **SPAN-410 Representation and Reality in Spanish Cinema**

  **Credits:**

  4.00
This course offers the students a panoramic view of the most representative Spanish films from the 1950's until today, with special emphasis on its social, political, artistic and cultural context. Films will be viewed in Spanish with English subtitles. Conducted in English, the course will be open to both non-majors in Spanish as well as to advanced-level Spanish majors and minors, with the latter carrying out their written work and individual meetings with the instructor in Spanish.

- **SPAN-416 Border Crossings the Latino Experience in the USA**

  **Prerequisites:**
  
  ENG-102 or ENG-103 or Instructor's consent. Span 302 is strongly recommended for Spanish and Latin American & Caribbean Studies majors and minors.

  **Credits:**
  
  4.00

  **Description:**
  
  Examines the myth of a singular Latino experience in the United States through a variety of genres and authors. Issues relating to culture, language, family, and religion are among some of the topics explored. Authors include Sandra Cisneros, House on Mango Street, Junot Diaz, The Brief Wondrous Life of Oscar Wao, Julia Alvarez, How the Garcia Girls Lost Their Accents, Tato Laviera, and American.

  **Term:**
  
  Occasional

  **Type:**
  
  Cultural Diversity Opt A, Humanities Literature Requirement

- **SPAN-417 Changes in Social Values in Spain 1975 - 2005**

  **Prerequisites:**
  
  Take SPAN 290 or SPAN 300 or Instructor's consent. SPAN 350 is strongly recommended.

  **Credits:**
  
  4.00
In this course we will study the transition of Spain from dictatorship to democracy from an interdisciplinary perspective based mostly on the analysis of literary works, film, visual arts and music besides relevant theoretical articles by major Spanish and international intellectuals. Youth culture (sex, drugs and rock and roll), the feminist movement, nationalistic demands, and Spain's subsequent incorporation into the European Union will be highlighted. (Madrid campus only)

Type:

BA FOREIGN

**SPAN-427 U.S. Mexican Border in the New Millennium**

Prerequisites:

SPAN 290 or 300 or Instructor's consent

Credits:

4.00

Description:

Explores the literature, culture, and history of the United States-Mexico Border, and analyzes the profound changes that the gain/loss of territories created by the Treaty of Guadalupe Hidalgo caused for the citizens in the region. Emphasis is on contemporary border theatre and film. Students read works of Salcedo, Galindo, Mijares, Rascon Banda, among others, and examine contemporary films and documentaries such as Senorita Extraviada, Victoria para Chino, and Crossing Arizona.

Term:

Occasional

Type:

BA FOREIGN

**SPAN-502 Honors Thesis**

Prerequisites:

Senior standing & permission of the Dept. Chair
Credits:
4.00

Description:
A major research project completed under the supervision of a regular faculty member.

Term:
Offered Fall Term

Type:
BA FOREIGN

- SPAN-510 Independent Study

Prerequisites:
Instructor consent required.

Credits:
1.00-4.00

Description:
Students meet with a department member to pursue advanced studies in areas of particular interest to them.

Term:
Occasional

Type:
BA FOREIGN

- SPAN-I295 Spanish in the Workplace Internship

Credits:
Description:

Internship in Madrid, Spain. At least 12 hours a week working for an organization. Designed to give students an international professional learning opportunity. It takes place concurrently with SPAN 295.

**SPAN-T301 Business Spanish Tutorial**

Prerequisites:

Instructor's consent.

Credits:

1.00

Description:

Tutorial studies of the terminology, organization and practice of business in the Spanish-speaking world.

Term:

Alternates Fall & Spring

**STATS-240 Introduction to Statistics**

Prerequisites:

Math 128 or higher. REMINDER: STATS 240 is a required prerequisite MKT 220, FIN 200 and ISOM 201 (prerequisite for ISOM 319)

Credits:

4.00

Description:

Topics include: data presentation, measures of central locations and dispersion, probability and probability distributions, estimation, hypothesis testing, simple and multiple regression models. The use of Excel and SPSS will be emphasized throughout the course. 1 term - 4 credits (4 hours per week). Normally offered each semester. STATS 240 satisfies the same requirements as STATS 250
• STATS-250 Applied Statistics

Prerequisites:

MATH 128 or higher. REMINDER: STATS 250 is a required prerequisite MKT 220, FIN 200 and ISOM 201 (prerequisite for ISOM 319)

Credits:

4.00

Description:

Application of statistical analysis to real-world business and economic problems. Topics include data presentation, descriptive statistics including measures of location and dispersion, introduction to probability, discrete and continuous random variables, probability distributions including binomial and normal distributions, sampling and sampling distributions, statistical inference including estimation and hypothesis testing, simple and multiple regression analysis. The use of computers is emphasized throughout the course. Normally offered each semester.

• STATS-H250 Honors Applied Statistics

Prerequisites:

MATH-128, MATH 130, 134, 146, or 165 and Honors Course; GPA of 3.3

Credits:

4.00

Description:

Application of statistical analysis to real-world business and economic problems. Topics include data presentation, descriptive statistics including measures of location and dispersion, introduction to probability, discrete and continuous random variables, probability distributions including binomial and normal distributions, sampling and sampling distributions, statistical inference including estimation and hypothesis testing, simple and multiple
regression analyses. The use of computers is emphasized throughout the course. Prerequisite: MATH 130, MATH 134, MATH 146, or MATH 165 Honors Course GPA of 3.2 or higher required. 1 term - 4 credits Normally offered every year.

Type:
Quantitative Reasoning,Honors

• STATS-350 Applied Statistical Methods

Prerequisites:

STATS 250

Credits:

4.00

Description:

This application-oriented course is designed to go beyond the topics covered in STATS 250. It includes topics like Analysis of Variance (ANOVA), special topics in regression analysis and index numbers. Further, time series data, which consist of values corresponding to different time intervals, are analyzed. The objective is to examine past time series values to forecast, or predict future values. Seasonal variations are also incorporated in the forecasts. The course will provide useful computer skills involving various statistical packages and is an excellent preparation for graduate work in business and social sciences.

**Type:**
Expanded Classroom Requirement

• **THETR-221 Voice and Movement for Actors**

**Credits:**
4.00

**Description:**
Professional actors engage in rigorous voice and movement training throughout their careers. This course provides students with the theory and practical training to free and develop their natural voices for the stage. They will also explore physical acting through improvisation and a series of exercises that will expand their ability to respond reflexively and organically to their instincts. Wear comfortable clothing.

Term:
Alternates Fall & Spring

- **THETR-224 Intro to Improv**

  Credits:
  
  4.00

  Description:

  This course serves as an introduction to scenic improvisation and it's application toward short-form, long-form and as a tool to develop written material. Students will begin classes with various improvisational exercises and transition to creating improvised scenes focusing on agreement, relationship, game and heightening concepts. Particular emphasis is placed on creative collaboration with scene partners and as part of an ensemble. This class will benefit anyone who wants to develop tools to think on their feet and participate in creative collaborations.

- **THETR-227 Introduction to Theatre Arts III**

  Credits:
  
  4.00

  Description:

  This course provides a formal introduction to the theories and practices strategically used by American theatre artists after the Second World War. Special emphasis is placed on theatre artists exploring issues of cultural identity including works by GLBT, African-American, Asian-American, and Latin American playwrights. These playwrights may include Tony Kushner, Paula Vogel, Suzan-Lori Parks, Adrienne Kennedy, August Wilson, David Henry Hwang, Philip Kan Gotanda, Eduardo Machado, and Melinda Lopez. The course will also provide an introduction to trends in post-modern theatre practices related to emerging work of the auteur director, solo performers, and interdisciplinary collectives. Satisfies a core requirement for Theatre majors. Normally offered alternate years.

  Term:

  Occasional
- **THETR-229 Acting I**

  **Credits:**
  4.00

  **Description:**
  This introduction to acting prepares students for work in production and develops skills in all forms of communication. The first part of the course uses improvisational exercises based on the Stanislavski method to teach fundamental acting techniques. The second half of the course applies those techniques to scene work from major 20th century plays. This course is a core requirement for all Theatre Majors.

  **Term:**
  Offered Both Fall and Spring

- **THETR-232 Acting for the Camera**

  **Prerequisites:**
  THETR-229 or instructor's consent

  **Credits:**
  4.00

  **Description:**
  This course gives students an understanding of the acting challenges unique to film, television, and commercial acting and helps them develop an effective process for on-camera performance. The material in this class is drawn from various media as well as from students' own research and writing. Class exercises and presentations are video taped, viewed, and critiqued by the students and the instructor as students grow and learn. Students also become familiar with the language and demands of professional production as well as how the technical process affects their performance.

  Offered Fall Term
• THETR-233 Introduction to Singing for the Stage: Classic Musical Comedies

Credits:
4.00

Description:

Focusing on classic musical comedies from 1910-1950 e.g. Anything Goes, Kiss Me Kate, and Guys and Dolls this skills-based studio course introduces students to an integrated approach to singing and stage performance. Students will learn the fundamentals of vocal technique which includes targeted vocal warm-ups and relaxation exercises in addition to the basics of breath support, placement, and phrasing. Students will also learn how to analyze musicals for their dramatic potential in order to make their performances more believable to an audience. Several classes will be devoted to audition preparation. Private vocal coaching and acting coaching will be scheduled outside of class. Students will work on assigned songs, duets, and choreographed group numbers which will be presented at the end of the term for an invited audience.

Term:
Occasional

• THETR-234 Acting the Song

Credits:
4.00

Description:

This studio course will focus on techniques to develop fresh, organic interpretations of musical theatre songs that illuminate not only the nuances of the music and lyric but the character singing as well. Working with classic musicals from the 1920s - 1940s, students engage in musical and dramatic analysis of the libretto and score and the historical and theatrical contexts of the musical. They are provided regular in-class performance opportunities and private vocal coaching outside of class. At the end of the term students present scenes and songs in a recital for an invited audience. Normally offered alternate years.

Term:
Occasional

• THETR-240 Dance Essentials I
Credits:
4.00

Description:
This is a course for the student who always wanted to learn the basics of dance as well as the student returning to dance. Class work includes centering, attention to placement, and the development of strength, flexibility, and musicality. Students will learn to think and write critically about the form. Dance attire is required.

Term:
Occasional

- THETR-241 Jazz

Credits:
4.00

Description:
This largely experiential course with a written component introduces students to the fundamentals of jazz. Classes will consist of a warm-up followed by floor exercises and sequences. Students will choreograph their own dances individually or in groups to be performed at the end of the semester. Students are expected to dress in dance attire. No dance experience is required. Normally offered every year

- THETR-243 Sabar: Music and Dance of Senegal

Credits:
4.00

Description:
This course explores the history and practice of music and dance in Senegal, West Africa taught through lectures, readings, and studio classes which are accompanied by live African drumming. Proper dance attire is required.

Term:
Offered Spring Term
- **THETR-249 Modern Dance I**

  Credits: 4.00

  Description:

  This course explores the history and techniques of modern dance, a uniquely American form. Classes will be comprised of warm-ups, floor work, and choreographed combinations. Students will learn to think and write critically about the form. The course will culminate with a presentation of modern dance choreographed by the instructor for an invited audience. Dance attire is required.

  Term:

  Offered Fall Term

- **THETR-250 Introduction to Stagecraft**

  Credits: 4.00

  Description:

  This rigorous survey class will give students the fundamental concepts, vocabulary, and skill to implement basic scenery, lighting, costuming, props and sound. - THETR-281 Arts Administration I

Credits:
4.00
The expansive world of arts administration provides a wealth of rewarding career opportunities. This course will provide a fundamental overview of the managing, marketing, fundraising, and financial management functions of the performing and visual arts organizations. Using Suffolk's Modern Theatre as a laboratory, as well as site visits to some of Boston’s greatest arts and culture institutions, we will investigate real world successes and challenges and discover what special talents each individual student can bring to the management mix. This course is a core requirement for Suffolk’s new interdisciplinary Arts Administration minor.

- **THETR-289 Managing the Start-Up Arts Organization**

  **Credits:**
  
  4.00

  **Description:**

  Managing a start-up arts organization requires not only the financial, programming, development and interpersonal skills of day-to-day arts management, but the additional creative and imaginative abilities to attract and manage stakeholders, brand the organization, and create governance and hierarchical structures. Using Suffolk's new Modern Theatre as a laboratory, we will investigate the process of starting-up, how it differs from organization to organization, and what special talents each individual student can bring to the management mix. Reading and writing are required for the course, as well as specific work projects either at the Modern or at a local start-up.

- **THETR-323 Audition Training**

  Credits:
  4.00

  Description:
  Learning how to prepare for effective auditions is essential training for anyone who wishes to be cast in theatre productions. This studio course will provide practical guidelines and useful strategies to help students be at their best during the always competitive audition process. Over the course of the term students will not only prepare to participate confidently in professional and non-professional auditions, but learn to enjoy the journey as well.

Term:
Offered Fall Term

- **THETR-329 Acting II**

  Prerequisites:
  THETR 229 or THETR-129 or instructor's consent

  Credits:
  4.00

  Description:
  A continuation of Acting I with special emphasis on verse and heightened language. Students will explore acting Shakespeare and other classical plays and will rehearse and perform short projects. Students will also learn to think, read and write about classical performance.

Term:
Offered Fall Term
• THETR-333 Singing for the Stage: Rock, Pop, & Progressive

Credits:
4.00

Description:

Focusing on classic rock, pop, and progressive musicals from the 1970s-1990s, e.g. A Chorus Line, Chicago, and Into the Woods this studio course provides students with an integrated approach to singing and stage performance. Students will learn the fundamentals of vocal technique which includes targeted vocal warm-ups and relaxation exercises in addition to the basics of breath support, placement, and phrasing. Students will learn how to analyze musicals for their dramatic potential in order to make their performances more believable to an audience. They will also be introduced to basic music theory and how to plunk out notes on a piano - skills that will make them more independent and confident performers. Several classes will be devoted to audition preparation. Private vocal coaching and acting coaching will be scheduled outside of class. Assigned solos and choreographed group numbers will be presented weekly in class and at the end of the term in a recital for an invited audience.

Term:
Occasional

• THETR-334 Singing for the Stage: Musicals From the Golden Age

Credits:
4.00

Description:

Focusing on classic musicals from 1950-1970 e.g., Pajama Game, Fiddler on the Roof, and Cabaret, this skills-based studio course exposes students to an integrated approach to singing and stage performance. Students will learn the fundamentals of vocal technique which includes targeted vocal warm-ups and relaxation exercises in addition to the basics of breath support, placement, and phrasing. Students will also learn how to analyze musicals for their dramatic potential in order to make their performances more believable to an audience. Several classes will be devoted to audition preparation. Private vocal coaching and acting coaching will be scheduled outside of class. All students will work on assigned songs and choreographed group numbers which will be presented at the end of the term for an invited audience.

- THETR-347 The Art and Artistry of Calling a Show
  Prerequisites:
  THETR-237 or instructor's consent
  Credits:
  4.00
  Description:
  In calling a show the stage manager cues all technicians to effect changes in lighting, sound, flying elements and special effects during performances. A well-called show is an artistic achievement no less than a well-acted, directed or designed show. Building on the ability to make a complete and accurate stage manager’s book learned in Intro to Stage Management, this course will teach calling skills for theatre, opera, dance and performance art. The course will demonstrate the construction of cues and how they promote the artistic vision of the production. In-class work will utilize the Studio Theatre and give students real-time opportunities for calling cues, and will include play reading and analysis. Outside class work will include attending and writing analyses of professional performances.
  Term:
  Occasional

- THETR-351 Set Design
  Prerequisites:
Take THETR-237 THETR-250 or THETR-251; or instructor's consent

Credits:
4.00

Description:
This is a studio course exploring the process of interpreting dramatic scripts in visual, three-dimensional ways. Projects will include abstract visual responses, group installations, enacting texts, visual research and textual analyses as well as ground plans and models for sets. Students will need a variety of painting and drawing supplies and equipment. A willingness to think beyond the box set to discover vital ways to shape a production is essential.

Term:
Offered Spring Term

Type:
Humanities & History, Humanities Literature Requirement

- **THETR-356 Introduction to Costume Design**
  
  Prerequisites:
  
  THETR 250 OR THETR 251 or by instructor's permission.
  
  Credits:
  4.00
  
  Description:
  This is a comprehensive studio course with a written component. The course explores many aspects of the design process including concept, research, collaboration, and full renderings. Normally offered alternate years.

- **THETR-359 Lighting Design**
  
  Prerequisites:
  
  Take THETR-187 THETR-152 or THETR-151; or instructor's consent
Credits:
4.00

Description:

Students will explore the basic process of lighting design for the theatre through hands-on, practical experience, conceptual work, and a study of the history of lighting design. The course will focus on common vocabularies, descriptions of imageries from text, physical forms of design expression and general approach. In addition, students will learn basic skills in electrics to support the design process. Sample assignments might include written critiques of local productions, design approach statements with lighting research, lighted one act plays in the Studio Theatre, and lighting set models. Normally offered alternate years.

Term:
Occasional

• THETR-361 Combat, Clown and Characters

Prerequisites:
THETR-201 OR THETR-229 or instructor's consent

Credits:
4.00

Description:

Students compliment their practical theatre training with a wide range of physical and vocal skills. This three part class focuses on the art of creating a clown, the ability to safely build and execute a stage fight, and special work on creating a three dimensional character for the stage. Normally offered alternate years.

Term:
Occasional

• THETR-362 Women on Stage

Credits:
4.00
How do playwrights of different backgrounds and genders interpret female-ness? This class explores some of the great heroines of dramatic literature, as well as female playwrights and performers. Students will be encouraged to indulge their taste for drama, as well as ask deeper questions about how women on stage are presented, perceived, and constructed. Students will read, write and discuss plays in terms of their structure, plot, theme, and characterizations. Class activities may include watching videos and attending live theatrical productions.

Term:
Occasional

Type:
Cultural Diversity Opt A

- **THETR-364 Dramaturgy**

  Prerequisites:

  THETR-225, THETR-226, THETR-227, THETR-310, THETR-307, THETR-405, THETR-450, THETR-455, THETR-460, THETR-489, THETR-507 or THETR-510 or instructor's consent

  Credits:

  4.00

  Description:

  This course will explore the fundamentals of dramatic structure and investigate the various roles of the contemporary dramaturg. Through the in-depth analysis of texts, students will follow Aristotle's example in The Poetics and attempt to figure out what makes great plays tick. Weekly reading and writing assignments will be supplemented by live theatrical performances.

  Term:

  Occasional

- **THETR-375 Directing I**

  Credits:

  4.00
This conservatory-style course provides students with fundamental directing skills through lectures, readings, and weekly projects that explore composition, staging, text analysis, and directorial communication skills. Students in this course become eligible to propose their own projects to the Theatre Department for production consideration. Directing students are also encouraged to stage manage and assistant direct faculty productions both in and outside of the Department.

Term:
Offered Fall Term

Type:
Arts Admin Minor Elective

- **THETR-377 Playwriting**

  Credits:
  4.00

  Description:

  An introduction to playwriting, students will be required to submit weekly assignments which explore and refine fundamental components of the dramatist's craft including plot, character, conflict, voice, dialogue, rhythm, point of view, surprise, structure, and style. Students are encouraged to participate in Play Day!, an annual reading of new student-written plays. Normally offered every year.

- **THETR-384 The Art and Artistry of Calling a Show**

  Prerequisites:
  THETR-237 or instructor's consent

  Credits:
  4.00

  Description:

  In calling a show the stage manager cues all technicians to effect changes in lighting, sound, flying elements and special effects during performances. A well-called show is an artistic achievement no less than a well-acted, directed or designed show. Building on the ability to make a complete and
accurate stage manager's book learned in Intro to Stage Management, this course will teach calling skills for theatre, opera, dance and performance
art. The course will demonstrate the construction of cues and how they promote the artistic vision of the production. In-class work will utilize the Studio
Theatre and give students real-time opportunities for calling cues, and will include play reading and analysis. Outside class work will include attending
and writing analyses of professional performances.

Term:

Occasional

- **THETR-402 Vocal Coaching III**

  Prerequisites:

  Instructor's consent required

  Credits:

  4.00

  Description:

  A rigorous, fast-paced studio course for motivated students with demonstrated proficiency in musical theatre performance. Building on basic music
  and acting theory explored in Vocal Coaching I and II and Acting the Song I and II, students will be expected to analyze and perform challenging new
  and known songs representing a wide range of styles and periods. Students will also be expected to write and think critically about musical theatre
  performance and prepare for at least one professional musical theatre audition outside the university. The class will culminate in a recital for an invited
  audience.

  Term:

  Occasional

- **THETR-403 Solo Performance**

  Prerequisites:

  THETR-229 or THETR-425 or instructor's consent

  Credits:

  4.00
This advanced level acting course introduces students to the world of performance art utilizing research, writing and performance techniques. Source material may be fictional, historical, personal or contemporary figures of particular interest to the student. Students will research and create their own pieces to be performed at the end of the term for an invited audience.

Term:
Offered Spring Term

- **THETR-407 Playwriting II**

  **Prerequisites:**
  
  THETR-307 or instructor's consent

  **Credits:**
  
  4.00

  **Description:**
  
  Playwriting II is a continuation, deepening and thickening of the principles learned in Playwriting I. A course designed for dedicated writers, students are expected to explore a wide variety of playwriting challenges, skills and techniques. Student works will be regularly shared and discussed in class. Students will also be assigned plays by recognized playwrights to discuss and analyze in class. Playwriting II students are encouraged to participate in PlayDay!®, an annual reading of new student-written plays. Normally offered alternate years.

  **Term:**
  
  Occasional

- **THETR-421 Combat, Clown and Characters**

  **Prerequisites:**
  
  THETR-201 OR THETR-229 or instructor's consent

  **Credits:**
  
  4.00
Students complement their practical theatre training with a wide range of physical and vocal skills. This three part class focuses on the art of creating a clown, the ability to safely build and execute a stage fight, and special work on creating a three dimensional character for the stage. Normally offered alternate years.

Term:
Occasional

**THETR-422 Acting for the Camera II**

**Prerequisites:**
Take THETR-232 or Instructor's consent

**Credits:**
4.00

**Description:**
Applying skills introduced in Acting for the Camera I, students produce and perform in a showcase video with more demanding material. Included in this course is a focus on the business of film and television work as it affects an acting career. From auditioning skills to on-set work ethics, students will work in class and on film locations to experience the realities of the film and television industries and learn to think and write critically about on camera performance. Each student will have the opportunity to put together a demo reel showcasing their acting work prepared for class.

**Term:**
Offered Spring Term

**THETR-427 Acting Styles**

**Prerequisites:**
THETR 229 AND THETR 329

**Credits:**
4.00
This studio course offers an advanced study of classic and poetic texts. Each week students prepare and present monologues, scenes, and sonnets for class discussion. Normally offered alternate years.

- **THETR-429 Theatre on the Go: Site-Specific Theatre**

  Prerequisites:
  
  THETR-129

  Credits:
  
  4.00

  Description:
  
  This project-based performance class explores the unique, specially adapted acting experience found working in unusual and sometimes public settings. Through improvisation and socio-drama exploration, students will write, produce and direct their own interactive and non-interactive performance pieces. This innovative team-building class will challenge your ideas of what and where theatre lives through discussion and performance. The semester will conclude with a group project to be performed publicly.

- **THETR-433 Advanced Singing for the Stage: Broadway Musicals Today**

  Prerequisites:
  
  Instructor's consent required

  Credits:
  
  4.00

  Description:
  
  Focusing on musicals written from the 1990-the present e.g. Next to Normal, The Last Five Years, and Spring Awakening, this advanced studio course provides students with an integrated approach to singing and stage performance. The fast-paced tempo of the class will encourage students to build on their previous training and experience and to become increasingly independent as they prepare for auditions and performance work beyond the university. Private vocal coaching and acting coaching will be scheduled outside of class. Students will be expected to prepare selected solos or duets and learn additional choreographed group numbers which will be presented at the end of the term for a public performance.
THETR-444 Choreography I

Credits:
4.00

Description:
This course encourages students to develop a broad palette of choreographic tools drawn from the work of early modern choreographers and theorists and post-modern techniques. The process of the class will include structured improvisations, analysis of historical and contemporary dance works, the development of a critical response process, journaling, and the creation of original solo and group work. Additionally, students will attend two dance concerts throughout the semester and submit written critiques of each performance. The class will culminate in the performance of self-selected compositions for an invited audience. Proper dance attire is required.

THETR-451 Set Design II

Prerequisites:
THETR 331 or Instructor's Consent

Credits:
4.00

Description:
Taking up where THETR 331 left off, Set Design II is a studio course exploring the process of interpreting dramatic scripts in visual, three-dimensional ways at a much higher level of project realization. In addition to class work, students will develop advanced skills in model building, drafting and painting through independent studio work and individual meetings with the professor outside of class. Students will need a variety of painting and drawing supplies and equipment. Meets concurrently with Set Design I.

Term:
Occasional
THETR-460 A House for Words to Live In

Prerequisites:

Prerequisites: THETR225 or THETR226, or THETR227 and THETR250 or THETR251 or THETR237 (or permission of the instructor)

Credits:

4.00

Description:

An upper level course, of interest to directors and dramaturges as well as designers, about a remarkable period in American theatre history, explored within the context of four stage designers and the playwrights with whom they collaborated. Scripts by O'Neil, Williams, Miller, and Odets will be studied in conjunction with their revelatory original designs, which have become as iconic as the plays themselves. The designer's process, the collaborative nature of theatrical production, and the advances in theatre technology will also be explored. The course will have a seminar format, require independent reading and research, and be writing intensive, culminating with a final term paper presented to the class.

Term:

Occasional

THETR-461 Play Analysis

Credits:

4.00

Description:

This seminar course examines Shakespeare's plays and their modern correlatives. (i.e. Hamlet and The Seagull, King Lear and Endgame) Students read the texts out loud in class examining the meaning, action, objective, and philosophical and historical contexts with the professor. The goal is to get closer to the original intentions of the author and determine not only the basic theme and character relationships, but the kind of mind that could create such a play. In analyzing a modern play students also examine the impact of Shakespeare's mind on future playwrights. There will be a midterm paper and a final exam.

Term:

Offered Fall Term

Type:
• THETR-465 The American Resident Theatre

Credits:

4.00

Description:

This course will examine some of the principal art theatres in this country beginning with the early days of the Provincetown Players and continuing up to the present day. By examining material about their histories, often written by their founding directors, students will determine when these theatres fed off each other's ideas and ideals, and when they set off in entirely new directions. The course will also explore the viability of not-for-profit institutions in a corporate society.

Term:

Occasional

• THETR-469 Performance Studies

Credits:

4.00

Description:

This course provides an overview of the modern concept of performance and how it has evolved in a variety of interdisciplinary fields. Encompassing the areas of dance, music, theatre, installation work, 'happenings' and spectacles, students will explore the ways performance is understood by ethnographers, anthropologists, linguists, cultural theorists, social scientists, and artists Using the theoretical base covered during the semester, students will conceive, develop, and present a final performance piece appropriate to their chosen discipline.

Term:

Occasional

Type:

Humanities & History, Humanities Literature Requirement
• THETR-475 Directing II

Prerequisites:

THETR-375 or instructor's consent

Credits:

4.00

Description:

Directing II focuses on the development of an individual directorial point of view and explores a variety of theoretical and applied approaches to cultivating interpretive skills. The course also examines how the director reconciles traditional theatrical conventions and techniques with the ability to create fresh, innovative and personal results. Students will stage weekly theatrical responses to class readings in addition to creating a fully-realized final directing project.

Term:

Offered Spring Term

• THETR-477 Playwriting II

Prerequisites:

THETR-377 or instructor's consent

Credits:

4.00

Description:

Playwriting II is a continuation, deepening and thickening of the principles learned in Playwriting I. A course designed for dedicated writers, students are expected to explore a wide variety of playwriting challenges, skills and techniques. Student works will be regularly shared and discussed in class. Students will also be assigned plays by recognized playwrights to discuss and analyze in class. Playwriting II students are encouraged to participate in PlayDay!*, an annual reading of new student-written plays. Normally offered alternate years.

Term:

Occasional
- **THETR-481 Arts Administration II**

  Prerequisites:
  
  THETR 491

  Credits:
  
  4.00

  Description:
  
  In this course, we will see how the administrative functions discussed in Arts Administration I work in different kinds of arts organizations. Using actual cases from the world of performing and visual arts, we will explore the operations for profit and non-profit arts producers and presenters, art service organizations, and many kinds of funding institutions. We will also discuss various approaches to arts administration in an international context. The course may include an internship with an arts organization in Boston.

- **THETR-487 Stage Management II**

  Credits:
  
  4.00

  Description:
  
  Building on the skills learned in Stage Management I, Stage Management II will provide an in-depth study of how to support and manage rehearsals and performances of diverse genres such as opera, dance, and theatre. Special attention will be paid to anticipating a wide range of needs from professional artists, union regulations, cueing and calling shows; and to further develop student's communication skills. Internships with professional arts organizations may be arranged. Normally offered every other year.

  Term:
  
  Occasional

- **THETR-488 Professional Internships**

  Prerequisites:
  
  instructor's consent and internship availability required
Description:

This course provides students with the opportunity to receive credit for their work on an approved internship assignment in the professional performing and visual art world. At the successful completion of the internship, students will be required to submit a written analysis of their experience as well as a journal documenting the daily events of their project. Professional internships are difficult to secure. Interested students are advised to contact members of the Theatre Department faculty at least one semester in advance to facilitate this opportunity.

Term:

Offered Both Fall and Spring

- THETR-489 Performance Studies

  Credits:

  4.00

  Description:

  This course provides an overview of the modern concept of performance and how it has evolved in a variety of interdisciplinary fields. Encompassing the areas of dance, music, theatre, installation work, 'happenings' and spectacles, students will explore the ways performance is understood by ethnographers, anthropologists, linguists, cultural theorists, social scientists, and artists. - THETR-507 Senior Thesis Project

  Prerequisites:

  Instructor's consent required
Theatre majors who have demonstrated academic excellence as well as involvement in department productions have the opportunity to work with a faculty advisor during their senior year to focus intensively on a specific area of interest. An extensive reading list will be determined early in the fall semester and regular meetings with the advisor will be scheduled to guide this course of study. The Senior Honors Project may also include a production project related to the topic. Successful completion of this course confers departmental honors to graduating Theatre majors.

Term:
Offered Both Fall and Spring

- **THETR-508 Capstone Experience**
  
  **Credits:**
  
  0.00- 4.00
  
  **Description:**
  
  The capstone experience demonstrates a student's high level of practical and/or academic facility and prepares them for their transition into the world of professional theatre and graduate school. Upper Level production activities within the theatre department that may fulfill this requirement are directing, designing, stage managing, acting a major role, playwriting, or some special approved project. Students may also fulfill this requirement by completing a Senior Honors Thesis.

- **THETR-510 Independent Study**
  
  **Prerequisites:**
  
  Instructor's consent required
  
  **Credits:**
  
  1.00- 8.00
  
  **Description:**
Variable credits for approved projects outside the classroom. Since all independent studies must be approved by the Dean's Office, all interested students must be able to persuasively articulate their proposal in writing and include both an annotated reading list and a schedule of meetings with faculty supervisors.

Term:

Offered Both Fall and Spring

- **THETR-511 Professional Development**

  Prerequisites:

  Theatre majors or minors only.

  Credits:

  1.00

  Description:

  This course is designed to give you the tools to plan for and support your career path after graduation. Activities include audition/resume/ cover-letter workshops; interviewing techniques; dressing for success; networking; identifying your personal brand; professional internships; and deciding whether graduate school is right for you. Master classes with professional theatre artists and field trips to professional theatres will also be included.

- **WGS-111 Women, History, & Culture**

  Credits:

  4.00

  Description:

  Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

Term:
- **WGS-H111 Women, History, & Culture**

  **Prerequisites:**
  
  At least a 3.3 GPA required.

  **Credits:**
  
  4.00

- **WGS-115 Introduction to Gender Studies**

  Credits:
  4.00

  Description:
  Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women's studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

  Term:
  Occasional

  Type:
  Cultural Diversity Opt A,Diverse Perspectives

- **WGS-211 Heroines, Hotties & Hubris: Adolescent Girl's Books**

  Credits:
  4.00
Explores what we can learn from the books that teenage girls read. In addition to a wide array of interesting and complex Young Adult novels targeted to young female readers, students will be exposed to theories of adolescent development, literary criticism, and social theory. Topics include how the dilemmas of girlhood have changed or stayed constant and the urge, so common in books for children and teens, to teach kids how to think and behave.

Term:
Occasional

Type:
Cultural Diversity Opt A

- **WGS-220 Other Worlds, Other Genders: Women and Science Fiction**
  
  Credits:
  
  4.00
  
  Description:
  
  Examines through both classic and contemporary science fiction a variety of possibilities for world-reimagining in the realms of gender, sexuality, race, and other forms of difference. Draws on theories of utopian and dystopian discourse, engages with questions of biology and reproduction, and explores colonialism through first-contact and space empire narratives.

- **WGS-230 Bad Boys: Representations of Masculinity In Popular Culture**
  
  Credits:
  
  4.00
  
  Description:
  
  Examines the social, moral, and political construction of masculinity through an analysis of film and other expressions of popular culture. Using case studies, explores the specific ways in which boys are impacted, stigmatized, and made bad in institutional arenas such as schools, sports, politics, family systems, the military, the workplace, and the criminal justice system.
WGS-311 Engendering Entertainment: Feminism and Popular Culture

Credits:
4.00

Description:
Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

Type:
Cultural Diversity Opt A

WGS-315 Feminist Thought

Credits:
4.00

Description:
Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldúa, and Judith Butler.

Type:
Cultural Diversity Opt A

WGS-325 Global Women's Fiction

Credits:
WGS-H325 Global Women's Fiction

Prerequisites:
CAS or SBS Honors Students only or at least 3.3 GPA

Credits:
4.00

Description:
Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

Term:
Occasional

Humanities Literature Requirement,Cultural Diversity Opt B,Diverse Perspectives,Honors
- **WGS-335 Queer Narratives**

  **Credits:**
  4.00

  **Description:**
  Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, *Paris Is Burning*, Frank Ocean's 2012 album, *Channel Orange*, and Janet Mock's recent memoir, *Redefining Realness*, as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

- **WRI-101 First Year Writing I**

  **Credits:**
  4.00

  **Description:**
  Study and practice of the writing process and revision in terms of expository writing modes for an academic audience.

- **WRI-L101 Developmental Writing 101 Lab**

  **Credits:**
  0.00

  **Description:**
  A non credit course for students enrolled in Freshman Composition who need to improve their control of the writing process, English mechanics, and fluency of expression. WRI L101 is a hybrid course that combines online grammar and writing practice with face-to-face support from English instructors.

- **WRI-102 First Year Writing II**

  **Prerequisites:**
WRI 101.

Credits:
4.00

Description:
Study and practice of argumentative and research writing through further work with writing process and revision and the critical reading of a variety of texts.

- WRI-H103 Advanced First Year Writing

Prerequisites:
By Invitation Only.

Credits:
4.00

Description:
This course is by invitation only and reserved for incoming Suffolk students with high admission scores. Advanced study and practice of writing process, revision, and research, based on close readings of a variety of texts. Fall semester only.

Type:
Honors
