CREDITS ARCHIVE 2018-2019

In this Section

Credit Hour Definition Archive 2018-2019
Suffolk University Follows the Federal Government’s Definition of a Credit Hour:

“...as an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutional established equivalence that reasonably approximates not less than -

(1) One hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or

(2) At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.”

Class Hours Archive 2018-2019
Classes typically meet during several standard course times: Monday, Wednesday, and Friday for 50 minutes, twice a week Monday and Wednesday or Tuesday and Thursday for 75 minutes, and for 2 hours, 40 minutes once a week. The period between 12:05PM and 01:15PM on Tuesday and Thursday is reserved for student activities, faculty meetings, guest lectures, and cultural events. No undergraduate classes are held during this time period.

CLEP Archive 2018-2019
CLEP (/academics/advising-student-services/academic-success-services/placement-tests/clep) examinations provide undergraduate students the
opportunity to gain college credit in specific areas of study. The Suffolk University Center for Learning and Academic Success (/academics/advising-student-services/academic-success-services) administers the CLEP program.

- **Class Standing Archive 2018-2019**
  The classification of students is determined by the number of credit hours completed. Freshman standing is assigned to students with 1 through 23 completed credit hours; sophomore standing, to those with 24 through 53 completed credit hours; junior standing, to those with 54 through 83 completed credit hours; senior standing, to those with 84 completed credit hours or more.

- **Course Loads Archive 2018-2019**
  Federal financial aid regulations stipulate a student must be enrolled in at least 12 credits per semester to be considered full-time, between 9-11 credits per semester to be considered three-quarter time, and at least 6 credits per semester to be considered half-time. During the summer semester, which is subdivided into modules, full-time, three-quarter time, and half-time status is determined based on the number of credits enrolled throughout the entirety of the term. Graduating students in their last semester are considered full-time (except for financial aid purposes) if they are registered for all remaining degree requirements, even if they are registered for less than full-time status.

All international students are required to complete at least 12 credits each fall and spring semester.

Enrollment statuses for fall, spring, and summer terms are listed in the table below:

<table>
<thead>
<tr>
<th>Full Time</th>
<th>Three-Quarter Time</th>
<th>Half-Time</th>
<th>Less than Half-Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>12-17 credits</td>
<td>9-11 credits</td>
<td>6-8 credits</td>
<td>&lt;6 credits</td>
</tr>
</tbody>
</table>

Restrictions: English Language Institute (ELI) students can only take 0 credit courses.

- **Courses at Other Institutions Archive 2018-2019**
  Once matriculated into a degree program at Suffolk, students are expected to complete all of their coursework at the University. Exceptions are made for international study or where academic hardship merits consideration. A student must be in good academic standing (2.0 GPA or better with no Incomplete grades)
and have transferred fewer than 63 outside credit hours into Suffolk. If approved for a course at another institution, a student must attain a grade of “C” or higher in order to receive transfer credit. It is expected that students will complete their final 30 credit hours at Suffolk University. New students in their first semester without final grades may not be approved for outside courses. Courses taken at other institutions may affect student eligibility for graduation honors.

Students who feel their situation warrants an exception must apply through the Undergraduate Academic Advising Center.

— **Excess Courses Archive 2018-2019**

Twelve to 17 credits constitutes a normal full-time schedule. Students who meet the following criteria can register for 18 credits (fall and spring term):

- Student has been in attendance at Suffolk University for two full semesters excluding summer sessions

- Student has a minimum GPA of 3.0 or higher

Students who do not meet the above criteria or who wish to enroll in more than 18 credits in either the fall or spring term or more than 8 credits per summer module must petition ([academics/advising-student-services/undergraduate-academic-advising-center/policies-and-procedures/excess-course-petition](https://www.suffolk.edu/academics/advising-student-services/undergraduate-academic-advising-center/policies-and-procedures/excess-course-petition)) the Undergraduate Academic Advising Center.

Students registered for more than 17 credits will be charged an excess credit rate ([undergraduate-admission/undergraduate-tuition-aid/tuition-fees](https://www.suffolk.edu/undergraduate-admission/undergraduate-tuition-aid/)) during the fall and spring terms. Students are charged per credit hour during the summer sessions. Students should NOT assume financial aid will cover excess course charges.

— **Independent Study Archive 2018-2019**

The purpose of an independent study is to provide students with unique study opportunities with an individual faculty member. The guidelines with respect to independent studies are as follows:
• Students must gain authorization prior to registration by developing a robust and rigorous proposal. A description of the independent study project must be approved by the individual faculty member, by the department chair, and the dean’s office of the respective school.

CAS: Independent Study Form [PDF]
(https://www.suffolk.edu/documents/Registrar/Independent_Study_Proposal_F_SBS_-_FINAL.pdf)

• Adjunct faculty are not eligible to supervise an independent study.
• Independent studies may be taken for variable credit; a single independent study cannot be taken for more than 4 credits in CAS and 3 credits in SBS.

Additional guidelines for BSBA students:

• Only juniors and seniors with a GPA of 3.0 or higher are eligible.
• Independent Studies cannot replace a required course or duplicate an existing course. They allow students to research and study an area of interest not covered by Suffolk courses.
• The deadline to turn in a proposal to the Dean’s Office is the first three days of the semester in which you plan to complete an Independent Study. If the proposal is denied, this leaves sufficient time for students to revise and resubmit to the faculty, department chair, and Dean’s Office.

— Transfer Credit Archive 2018-2019
Transfer applicants are considered for admission based on work completed at a regionally accredited two- or four-year college or at international institutions approved by the Ministry of Education in the country where the institution resides. In some cases, transfer applicants with less than one year of college completion are also considered based on the results of the high school transcript and test scores. Credit is generally transferable provided that such coursework is successfully completed and equivalent to that offered at Suffolk University.
In the Sawyer Business School, transfer credit is awarded only for courses equivalent to freshman/sophomore years. Courses not required at Suffolk University until the junior/senior years may qualify for validation credit. Students admitted to the Sawyer Business School are required to complete at least 50 percent of business credit hours at Suffolk University.

A minimum of 45 hours in any bachelor degree program must be earned at Suffolk University, including all major and general education requirements. Requirements for specific degrees are listed by major in the undergraduate degree section. In all cases, students must complete all major and University requirements to qualify for a bachelor degree. This may necessitate completing more than the required hours for graduation. In addition, the final 30 credits of any degree must be completed at Suffolk University.

Part-time degree applicants are expected to meet the same requirements as full-time degree students.

In the College of Arts & Sciences, a two-course residency requirement must be satisfied for completion of a minor and a four-course residency requirement must be satisfied for the completion of a major.

In the Sawyer Business School not more than two courses may be transferred in toward any major and no more than one course may be transferred in toward any minor. Capstone requirements may never be transferred into the Business School. All upper level business courses being considered for transfer must be approved by the Sawyer Business School Dean's Office.

---

**Transcripts Archive 2018-2019**

A transcript is an academic document or electronic image maintained by the Office of the Registrar reflecting the unabridged student academic history at Suffolk University. Transcripts include course work from other institutions whose credits are awarded at the time of entrance or approved transfer credit after the student enrolls at the University.

The University reserves the right to refuse to issue a transcript of any student who has not fulfilled all financial obligations due to the University. A financial hold will be placed on a student record if the student is either delinquent or has defaulted on
loans and/or has not completed required financial exit interviews or counseling.

Transcript requests (/about/directory/registrarsoffice/undergraduate-resources-services/transcript-requests) must be submitted online or in writing to the (https://www.suffolk.edu/explore/58765.php)Office of the Registrar (/about/directory/registrarsoffice).

- **Validation Credit: Sawyer Business School Archive 2018-2019**

Selected business courses taken elsewhere at the freshman or sophomore level, but offered by Suffolk University at the junior or senior level, require validation in order to be eligible for transfer of credit. In order to validate a course, students must have:

- Earned a grade of “C” or better in the course to be validated; and
- Successfully completed, with a grade of “C” or better at Suffolk University, an advanced course in the subject field for which the transfer course is a foundation.

Upon completion of the advanced course, a student must complete a Validation of Transfer Credit Form in the Registrar’s Office. The course(s) which may be validated will be listed on the student’s Suffolk University transcript and Credit Evaluation. The Credit Evaluation is the student’s original document of transfer credit provided by the Undergraduate Admission Office when the student was first admitted to the University. If a student has taken a junior/senior level course that is not required at Suffolk University, it cannot be validated.

Learning goals and objectives reflect the educational outcomes achieved by students through the completion of this program. These transferable skills prepare Suffolk students for success in the workplace, in graduate school, and in their local and global communities.

**Students May Validate:** By Successful Completion (minimum grade of "C") of:

<table>
<thead>
<tr>
<th>ACCT 321</th>
<th>ACCT 322</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 315</td>
<td>FIN 413</td>
</tr>
<tr>
<td>ISOM 310</td>
<td>ISOM 313</td>
</tr>
<tr>
<td>Students May Validate:</td>
<td>By Successful Completion (minimum grade of &quot;C&quot;) of:</td>
</tr>
<tr>
<td>-----------------------</td>
<td>---------------------------------------------------</td>
</tr>
<tr>
<td>ISOM 313</td>
<td>ISOM 423</td>
</tr>
<tr>
<td>ISOM 423</td>
<td>ISOM 424</td>
</tr>
</tbody>
</table>

When validating, no more than two transfer courses may be applied toward your major requirements.

Questions regarding transfer credit and validation procedures should be referred to the Undergraduate Academic Advising Center, 617-573-8345.
GRADING ARCHIVE 2018-2019

In this Section

- Grading System Archive 2018-2019
The following grading system applies to all undergraduate students.

Letter Grade Honor Point Equivalent per Credit
A 4.0
A- 3.7
B+ 3.3
B 3.0
B- 2.7
C+ 2.3
C 2.0
C- 1.7
D+ 1.3
D 1.0
D- 0.7
F 0.0

"B - ," "C+," and "C" represent satisfactory work.

"C - ," "D+," "D," and "D - " represent passing but unsatisfactory work.

"F" is a failing grade. It indicates that the student has not completed all course requirements in a satisfactory manner. Students who stop attending a course without having complied with the official withdrawal procedure can anticipate receiving a grade of "F." The "F" grade becomes a permanent part of a student's
record and cannot be expunged even if the course is successfully retaken. An undergraduate student who violates the academic honesty policy is subject to an automatic grade of "F."

"I" (Incomplete) indicates a student has done passing work in a course but has not yet submitted all the outstanding work required for a formal evaluation. The "I" is awarded at the instructor's discretion, only if the student has completed at least half of the course requirements satisfactorily at the end of the semester, and there is a reasonable expectation that all course requirements can be completed in one academic year. An "I" must be formally re-evaluated by the instructor within one academic year, resulting in an evaluation grade or an extension of the "I," or it automatically converts to an "F*.

Students must complete coursework with the original instructor. The change in the "I" grade must be made by the original instructor, and in his or her absence, by the department chair. If this is not possible, arrangements must be made through the department chair in concurrence with an assigned instructor.

"F*" indicates that the student has not completed all the course requirements in a satisfactory manner in a course where they originally received an Incomplete grade. Incomplete grades expire to an "F*" grade one year after the Incomplete grade was assigned. An "F**" grade operates in the same manner as an "F" grade.

"IP" (In Progress) can be issued where by nature of the course content the course may not be complete by the end of the term. IP grades automatically convert to an "F*" after one academic year.

"W" signifies official withdrawal from a course. A "W" is assigned administratively if a student:

1. Drops a course, following proper university procedure, between the end of the drop/add period and the withdrawal deadline of the semester, or
2. Drops a course or withdraws from school after the deadline of the semester with the written approval of the Students Affairs office. Permission is given only for valid cause such as debilitating illness, relocation, serious family crisis or other circumstances beyond the student's control.
"AU" (Audit): In an audited course, a student will not receive credit or honor points; however, a student must pay the same tuition as if taking the course for credit. Under no circumstances may a student change from the evaluative letter grade system to audit or vice versa after the first two weeks of classes.

A student who audits a course is responsible for attending classes and completing required coursework.

"P" (Pass): A Pass-Fail option is available to students in lieu of a traditional letter grade subject to the following limitations and regulations:

Eligibility is restricted to students in good academic standing who have completed a minimum of 15 semester hours of coursework at Suffolk University. This option is limited to 12 credits per student. The pass/fail option is only applicable to electives and cannot be used for courses that fulfill specific degree, core, major or minor requirements. Students who are unsure as to whether a course is an elective for their specific program should check with the Undergraduate Academic Advising Center.

Students will designate courses as Pass-Fail after registration, but before the end of the course change period, by completing a Pass/Fail Declaration Request form. No changes from the designation of Pass-Fail to the letter grade system or vice versa are permitted after the course change period has elapsed at the opening of any semester or summer session. A Pass may be applied toward fulfilling degree credits, but may not be applied toward the quality point average.

Students planning to attend law school or other graduate schools should be aware that many professional and graduate schools prefer students to submit traditional letter grades.

"PC" (Pass/Credit) is awarded in courses successfully completed with a grade of "C" or better at an affiliated study abroad program or approved course work at a consortium institution after matriculation at Suffolk University. "PC" grades may be applied toward fulfilling degree credits, but they may not be applied toward the quality point average.

"NP" (No Pass) is awarded in courses unsuccessfully completed at an affiliated
study abroad program or approved course work at a consortium institution after matriculation at Suffolk University. "NP" grades do not earn academic credit and are not applied toward the quality grade point average.

Courses officially dropped during the add/drop period will not appear on the student's record.

--- Grievances - Academic Archive 2018-2019

Academic Complaints

A student who has a complaint about a grade on a single assignment or exam or concerning the faculty member teaching a course should first speak with or email the faculty member. If the complaint is not resolved, then the student should bring the matter to the attention of the department chair or program director. If the complaint remains unresolved, then the matter should be brought to the attention of the academic dean's office of the school in which the course is offered.

Grade Grievances

There is a formal process for grieving a final course grade.

Within two weeks of the grade being assigned, the student should speak with or email the faculty member.

If, after communicating with the faculty member, the student believes that the grade had no basis in fact or was arbitrary, the student may then petition the department chair or program director in writing (or by email).

Students should keep copies of correspondence for their own records.

If the grievance is not addressed or resolved equitably after meeting with the department chair or program director, the student has 10 business days to file a formal grievance with the academic dean (or dean's designee) of the school in which the course is offered.

The academic dean (or dean's designee) will inform the student of a decision within 15 business days of receiving the formal grievance. The student may appeal this decision to the provost (or provost's designee), whose decision shall be final. It is
the responsibility of the provost (or provost's designee) to come to a resolution of the grade dispute within 15 business days of receiving the formal grievance from the student.

A graduating student must initiate the grade grievance process no later than three days prior to commencement by emailing the faculty member and copying the department chair or program director.

Graduating students should be mindful that the grade grievance process may impact the awarding of Latin honors and may delay the date of degree conferral.

**Grievances Related to Academic Accommodations for Students Registered with Disability Services**

Students with disabilities who believe they have received inappropriate treatment or inadequate service from the University pertaining to their granted accommodations have the right to file a grievance with Director of Disability Services. The grievance must be submitted in writing to disabilityservices@suffolk.edu and should include a detailed description of the inappropriate or inadequate service and supporting documentation (when appropriate). Students with disabilities must indicate the resolution they are seeking.

Students with disabilities who are unsatisfied with the response from the Director of Disability Services may submit an appeal within 5 business days to the ADA Coordinator, Dr. Ann Coyne, Dean of Students, Student Affairs Office, 12th floor 73 Tremont Street, Boston, MA 02108,617-573-8239, TDD:617-557-4875 or acoyne@suffolk.edu. Students with disabilities must state the resolution they are seeking. The decision of the appeal by the Dean of Students is final.

---

**Academic Misconduct Archive 2018-2019**

Suffolk University expects all students to be responsible individuals with high standards of conduct. Students are expected to practice ethical behavior in all learning environments and scenarios, including classrooms and laboratories, internships and practica, and study groups and academic teams. Cheating, plagiarism, unauthorized collaboration, use of unauthorized electronic devices, self-plagiarism, fabrication or falsification of data, and other types of academic misconduct are treated as serious offenses that initiate a formal process of inquiry, one that may lead to disciplinary sanctions.
Resolving Incidents of Academic Misconduct

A faculty member suspecting academic misconduct will contact the student using the Suffolk email address to schedule a meeting and will make all effort to do so within five business days of detecting the incident. During the meeting, the faculty member will present the documentation that led to suspected academic misconduct. If the faculty member reaches the conclusion that academic misconduct has occurred, he or she may impose limited sanctions that are meant to acknowledge the behavior in the context of providing remediation and addressing skill development. These sanctions involve grade reductions to student work that constitutes up to 25% of the course grade (e.g., homework; short papers; quizzes) and frequently include some form of remediation.

When the suspected academic misconduct involves student work that constitutes more than 25% of the course grade, or if an F grade (0 credit) on the assignment is recommended as a sanction, the faculty member will consult with the department chair (or program director) prior to imposing the sanction. If the faculty member and chair agree on a determination of academic misconduct, the sanction may be imposed.

If a determination of academic misconduct is made and a sanction is imposed, the faculty member must complete the Academic Misconduct Incident Form (available online) and submit it electronically to the AMC coordinator who will document the incident, along with the written documentation of misconduct, in the AMC internal record. A student may appeal the determination of academic misconduct, but not the sanction, by requesting a hearing before the full AMC. Appeals should be filed with the AMC coordinator within ten business days of receiving the sanction.

If the suspected academic misconduct involves actions that the faculty member and chair believe warrant an F grade in the course, or if there is disagreement between the faculty member and chair on the appropriate sanction, then the incident must be forwarded directly to the AMC for committee review. Examples include, but are not limited to, the following: cheating on exams; group cheating; submitting purchased term papers or term papers with extensive copying or use of external sources without citation; and fabrication or falsification of research data. If the faculty member and chair suspect an incident of this type, they must file an incident report form with the AMC coordinator to initiate a full committee review. The AMC coordinator will schedule a hearing at the next standing meeting of the AMC, generally within ten business days of receipt of the incident form. The faculty member will submit all documentation to the AMC coordinator who will email the
student (using Suffolk email) a notice to appear for a hearing. At the hearing, a
determination is made by the committee, regardless of whether or not the student
is in attendance; imposition of sanctions is made by committee vote. A
determination letter is then sent to the student, the faculty member, and the chair.

A full review by the AMC, as described above, will also occur if multiple incident
reports for a single student are detected in the AMC internal record.

AMC hearings are not open to the public. Therefore, members of the Suffolk
University community who are not directly involved in the allegation and friends,
parents, partners, siblings, legal counsel, and others are not permitted in the room
where the AMC hearing takes place but may wait nearby for support purposes.
Formal rules of process, procedure, or evidence such as those applied in civil or
criminal courts are not used in the AMC. Members of the AMC will recuse
themselves from a case when appropriate. Student conduct that warrants sanctions
may result in forfeiture of all Suffolk scholarships, financial aid, or monies paid.

Sanctions imposed by the AMC may include but are not limited to a reprimand; a
remediation plan; a grade of F in a course; probation; and/or dismissal. A sanction
grade of F in a course will be factored into the overall grade point average
regardless of whether or not the course is successfully repeated. A student found
responsible for academic misconduct and sanctioned by the AMC may file one
appeal to the provost (or designee) by sending a written letter of appeal within ten
business days. (A graduating student must initiate the appeal process no later than
three days prior to commencement.) Appeals are considered only if there is
additional information not available at the time of the hearing or a procedural error
that calls into question the determination of academic misconduct. Students must
include a statement of why the additional information should be considered and
why it was not presented at the time of the original hearing. The decision of the
provost is final.

**Grading Students under Review for Academic Misconduct**

Faculty, department chairs, program directors, and the AMC will work diligently to
ensure timely review and closure of cases of academic misconduct. In some cases,
however, it may not be possible to reach a determination or impose a sanction prior
to the deadline for submitting course grades. In this case, the faculty member will
not submit a grade for the student, but will leave the grade field blank. Once a
determination has been made, the faculty member will complete a change of grade form, with an explanation of the grade change that includes a brief statement of how the sanction impacted the final course grade.

**Membership of the Academic Misconduct Committee**

The AMC hears cases of alleged academic misconduct involving students in the College of Arts and Sciences (CAS) and the Sawyer Business School (SBS). The committee consists of two CAS faculty members, appointed by the CAS dean; two SBS faculty members, appointed by the SBS dean; the CAS and SBS assistant deans who convene the Academic Standing Committees in their respective schools; and a non-voting dean from Student Affairs. At the start of the academic year, AMC members elect a committee chair; the chair casts the deciding vote in the case of a tie.

All full-time CAS and SBS faculty are eligible to serve on the committee with the exception of non-tenured, tenure-track faculty. Associate deans from the two schools may be asked to attend as ex officio members when particular background or expertise is requested by the committee.

---

**Early Alert Archive 2018-2019**

The Early Alert (/academics/advising-student-services/academic-success-services/coaching-academic-success-programs/early-alert) process identifies students who may be academically at risk, before week five of the semester. The Faculty alert students who are at risk of failing a course if they are struggling with course content, not completing assignments, not attending classes regularly, or if they have second language issues or deficiencies. University staff outreach to all alerted students and connect them with the appropriate support services to help them achieve success.

---

**Final Examinations Archive 2018-2019**

Final exam dates are posted in the academic calendar (/academics/current-student-resources/academic-calendar). Individual course final exams display in the online course search (https://waprod.suffolk.edu/WebAdvisor/WebAdvisor?TOKENIDX=proxyTarget&SS=3&APP=ST&CONSTITUENCY=WBAP).

---

**Grades Archive 2018-2019**

Grades are available online (https://my.suffolk.edu) soon after the conclusion of each semester.
Students are solely responsible for their academic progress and should confer immediately with their academic advisor in the event their performance becomes substandard. Failure to maintain satisfactory progress can lead to loss of financial aid, academic probation, or dismissal, or other equally serious consequences.

Honor Points Archive 2018-2019
Scholastic averages are computed by multiplying the credit hours by the honor point equivalent. For example, a 4 credit course evaluated as "A" will be counted as 16 honor points (4 credits multiplied by 4.0 = 16). Grades of "I," "W," "P," "IP," "AU," "NC," and "PC" are not computed in determining Honor Points, and have no impact on a student’s scholastic average.

A cumulative average of 2.0 (C) and an average of 2.0 (C) or better in one’s major, minor, and/or certificate program are required for graduation. Students are required to monitor their average in their major and minor. If students are at risk of falling below the required average, the Academic Standing Committee will notify the academic department of their major.

Repeating a Course Archive 2018-2019
Students may retake any course for credit by paying the appropriate tuition. When a student repeats a course, all grades will appear on a student’s transcript; however, only the best evaluative course grade will be used to compute the cumulative grade point average. Grades of "P," "I," "W," "NC," and "PC" issued in repeat courses are excluded in calculating the new GPA. When repeating courses, only one course may be used for credit to fulfill degree requirements. In the event a student who fails a course also fails the retake course, one F grade is calculated into the GPA. Students receiving federal financial aid should refer to Satisfactory Academic Progress (/student-financial-services/eligibility/satisfactory-academic-progress) regulations for financial aid eligibility when repeating a course.
Students are awarded honors for outstanding academic achievement.

- **Academic Honors**

  **Dean’s List**

  A student shall be eligible for the Dean’s List in any semester in which his or her grade point average is 3.50 or above, and provided he or she receives no grade of "D," "F," or "I," and has earned a minimum of 12 semester-hour credits.

**Graduation Honors**

**Latin Honors**

To be eligible to graduate with Latin Honors, an undergraduate student must have completed at least 60 semester hours of work at Suffolk University. (Courses for which a student receives credit through CLEP examinations may not be counted toward this minimum of 60 semester hours.)

- Summa Cum Laude: You must have a cumulative GPA of 3.85, and have no grades of F or I
- Magna Cum Laude: You must have a cumulative GPA of 3.7, and have no grades of F or I.
- Cum Laude: You must have a cumulative GPA of at least 3.3, and have no more than one grade of F or I.

**Recognition Day Honors**

**Highest Class Honors**

In the spring of each year, both the College of Arts & Sciences and the Sawyer Business School present Outstanding Student Awards to the individuals (in their respective schools) with the highest cumulative grade point average in the
sophomore, junior and senior classes. To be eligible for consideration, a student must have accrued the following minimum credit hours while in attendance at Suffolk University. A grade of "D," "F," or "I" disqualifies a student, regardless of GPA.

Class Minimum Earned Credit Hours at Suffolk University:

- Sophomore 42
- Junior 70
- Senior 106

**Major Honors and Awards**

In the spring of each year, both the College of Arts & Sciences and the Sawyer Business School present students awards of achievement in their major. Each award is defined and determined by the individual academic departments upon review of their junior and senior majors each spring semester.
UNDERGRADUATE ACADEMIC POLICIES ARCHIVE 2018-2019

All students are expected to abide by all policies included in the Suffolk University Academic Catalog.

University Policies are presented in the context where they are considered to be most applicable. In addition to the policies contained in this Academic Catalog, policies and procedures are located in:

- The Student Handbook, which contains policies and procedures that govern student conduct and other aspects of campus life at Suffolk University
- Policies and Procedures, a partial summary with links to selected policies
- School-specific Academic Policies for the College of Arts & Sciences
- Academic departments.
ACADEMIC STANDING ARCHIVE 2018-2019

At the conclusion of each semester, students failing to make satisfactory progress are reviewed by the Academic Standing Committee of their respective school. Suffolk University expects students to maintain an overall grade point average of 2.0 and a grade point average of 2.0 in the major field of study, as well as a 2.0 grade point average in the minor. Failure to maintain these degree requirements may result in academic probation or dismissal. Students are notified in writing of any actions taken by the Academic Standing Committees. Actions may include the following:

Warning and Major Probation Archive 2018-2019
Students will receive a warning when their overall GPA is above 2.0, but fail to achieve a semester GPA of 2.0; or when they fail to make satisfactory progress towards degree completion.

Students who earn a GPA below 2.0 in their major, even if only one course has been completed, are alerted to minimum GPA requirements and referred to their major for advising. Students with at least two courses in their major and a GPA in their major under 2.0, will be placed on probation for not making progress in their major. If students do not meet the probationary conditions the following semester they may be dismissed from their major.

Students who earn excess grades of "I" and/or "W" are sent a warning and may have their records frozen for advising.
Students are sent a warning if any single grade of “F” is earned.

**Academic Probation Archive 2018-2019**

Students who fail to make satisfactory progress towards degree completion, or fail to achieve a cumulative GPA of 2.0 are placed on probation and informed of conditions (to be met in the next semester enrolled) for continued matriculation.

In the semester following the first probationary period:

- If conditions are met and the cumulative GPA is at least 2.0, then the student is removed from probationary status.
- If conditions are met and the cumulative GPA is less than 2.0, then the student is placed on a probation extension.
- If conditions are not met, the student may be dismissed from the University.

Typically, students placed on probation are put on a reduced course load and are instructed to improve their grade point average by the next committee review. Students who are demonstrating academic improvement may have their probation extended until they return to good academic standing. Those failing to demonstrate improvement are in imminent danger of dismissal.

Extracurricular: No student on academic probation shall be eligible to participate in athletics, hold elected or appointed office, or represent the University in extracurricular or intercollegiate activities. However, a student on academic probation may continue membership in extracurricular activities such as clubs or fraternities, and may write for, but not be a member of, the staff of campus publications. In the event a student's average does not improve, the Academic Standing Committee may require further curtailment of extracurricular activities as a condition of continued academic probation at Suffolk University.

Financial Aid: Academic standing review is an academic process independent of federal guidelines managing access to student aid. It is possible to be allowed to continue at the University academically but be denied financial aid eligibility. ALL students who have financial aid and find themselves in academic difficulty should meet with their financial aid advisor to understand their personal situation.

**Academic Dismissal Archive 2018-2019**
Continued failure to make satisfactory progress toward a degree will inevitably result in dismissal from the University. Low grade point average, unexplained semester absences, refusal to complete prescribed remedial coursework, unwillingness to honor the recommendations of the Academic Standing Committee and/or other specific conditions are but a few of the situations that can undermine satisfactory progress and constitute legitimate grounds for dismissal.

Once dismissed for scholastic failure, a student is ineligible to enroll in further courses at the University until s/he is readmitted by the Academic Standing Committee. Dismissal does not suspend a student’s responsibility to meet prior course commitments. Consequently, all Incomplete “I” grades will convert to “F” grades unless attended to within one academic year.

— Applying to Return to the University Archive 2018-2019
Returning from Academic Dismissal

Students who have been academically dismissed may apply for readmission after two semesters (summer counts as one semester) by providing the appropriate committee with a written letter of petition. The filing deadline for petitioning is August 1 for fall re-admission and December 1 for spring re-admission. Please address the letter to: "The Academic Standing Committee."

This letter should contain three main sections:

1. Address the difficulties you had while you were enrolled at Suffolk University.
2. Describe what steps you have taken while away from Suffolk University to improve your personal situation (such as academic performance, personal issues, medical conditions, financial hardship). Be sure to attach any supporting documentation (such as transcripts from other institutions, letters from a doctor or current faculty member).
3. Create an action plan for your return (if reinstated) and describe what you would do to succeed in the future.

Letters should include your personal contact information for mail, email and phone.

If dismissed from the College of Arts & Sciences, send letters to:
Sharon Lenzie, Assistant Dean
College of Arts & Sciences
373 Tremont Street
Boston, MA 02108-2770
Phone: 617-573-8268
slenzie@suffolk.edu (mailto:slenzie@suffolk.edu)

If dismissed from the Sawyer Business School, send letters to:

Kim Larkin, Assistant Dean
Undergraduate Programs
Sawyer Business School
73 Tremont Street
Boston, MA 02108-2770
Phone: 617-573-8375
klarkin@suffolk.edu (mailto:klarkin@suffolk.edu)

Fresh Start
A student dismissed for academic reasons, who is seeking readmission after an absence of five or more years from the University, may petition the Academic Standing Committee to grant him/her grade amnesty for all grades below C under the Fresh Start Program.

If approved, all Suffolk work completed prior to readmission will be reevaluated for relevance and currency, as all students readmitted under this policy are subject to the academic requirements for graduation at the time of readmission. Only coursework with a C or better earned prior to reinstatement and coursework attempted after reinstatement is calculated into the GPA and applied to the degree.

Normally, a student readmitted through the Fresh Start Program is not eligible for scholastic honors. All prior grades are used to compute the student’s academic progress for financial aid evaluation.

Returning after Being Administratively Withdrawn for Non-Attendance
Students who have been administratively withdrawn for non-attendance or are attempting to return after an unauthorized absence may apply for reentry to Suffolk through the Office of Undergraduate Admission. If approved, all students readmitted under this policy are subject to the academic requirements for graduation at the time of readmission.

Applicable courses taken eight or more years prior to readmission, whether taken at Suffolk or elsewhere, will be reviewed by the Dean's Office for relevance and currency. If a course is deemed ineligible, students may be required to complete the current course designed to satisfy that particular academic requirement.

### Satisfactory Progress Archive 2018-2019

Federal regulations require students to demonstrate satisfactory academic progress (/student-financial-services/eligibility/satisfactory-academic-progress) (SAP) in their educational program in order to maintain eligibility for financial aid. SAP is established and reviewed by the Office of Student Financial Services for the College of Arts & Sciences and Sawyer Business School. While it is possible to continue at the University but be denied financial aid eligibility, all students who seek financial aid and find themselves in academic difficulty should meet with their financial aid advisor to understand their personal situation.

GRADUATION ARCHIVE 2018-2019

In this Section

- **Eligibility for Degree**

  In order to be eligible to receive a bachelor’s degree from the University, a student must:

  - Earn at least 126 semester hours in the College of Arts & Sciences; 124 semester hours in the Sawyer Business School; or 124 semester hours in the New England School of Art and Design
  - Achieve not less than a 2.0 cumulative grade point average and earn a minimum 2.0 grade point average or higher in the major
  - Achieve a minimum 2.0 grade point average or higher in the minor, if applicable
  - Meet all the academic requirements for his/her particular degree (eight years is the normal limit for completion of a part-time or an interrupted degree program)
  - Complete a minimum of 45 semester hours at Suffolk
  - Complete major residency requirement
  - Complete minor residency requirement, if applicable
  - Complete the final 30 semester hours at Suffolk
  - Complete at least 30 semester hours of business coursework at Suffolk (Sawyer Business School students only)
  - Complete at least 60 semester hours of coursework at Suffolk in order to be considered for scholastic honors

- **Application for Degree**

  Students are required to submit an application for degree to the Registrar’s Office by the published deadline. It is expected that all obligations to the University, both academic and financial, will be completed at the close of that semester. Failure to
comply with this requirement will delay graduation and participation in commencement to some future time.

- **Commencement Exercise Eligibility**
  In addition to those students who have completed in quality and quantity the requirements for their respective degrees, students may participate in commencement if they have officially applied as a September candidate, are enrolled in their remaining requirements in the subsequent summer sessions, have satisfied all other degree requirements, and have fulfilled all financial obligations to the University.

  September degree candidates petitioning to participate in the May commencement ceremony must apply and be enrolled in all outstanding requirements in the subsequent summer sessions by the dates established by the Office of the Registrar ([/about/directory/registrars-office](https://www.suffolk.edu/about/directory/registrars-office)). Approval of the petition is contingent upon satisfying the conditions listed above.

- **Graduation with Honors**
  See [Academic Honors](https://www.suffolk.edu/academics/academic-catalogs/undergraduate-academic-policies/academic-honors).

- **Substitutions and Waivers**
  **Major & Minor:**
  Students may file a petition for a major or minor requirement substitution with their academic advisor and major department chair. The academic department chair and appropriate Dean’s Office must approve major and minor requirement substitutions.

  **Core & Degree Requirement:**
  Students may file a petition for core and/or Degree requirement substitutions and waivers only with the appropriate Dean’s Office for their degree.

- **Diplomas**
  Suffolk University diplomas diplomas include the degree and appropriate graduation honors awarded. A diploma does not include student major, minor or concentration. Suffolk University transcripts include information related to the student’s identity and academic history at the university including major, minor and concentration.
INTERNERSHIPS ARCHIVE 2018-2019

In this Section

- Internships Archive 2018-2019
  Students can only receive credit for an internship during the semester in which registered for the internship course. You cannot receive credit for an internship completed in a previous or future semester. In order to receive credit, you must be registered for the appropriate course prior to the add/drop date for that semester.
REGISTRATION & ATTENDANCE ARCHIVE 2018-2019

Registration and Attendance

- **Registration Archive 2018-2019**
  Registration materials (program evaluations, transcripts, course schedules, etc.) are available to all students [online](https://my.suffolk.edu) prior to faculty advising at the beginning of each term’s pre-registration.

- **Late Registration Archive 2018-2019**
  Registration is closed after the first full week of classes in any semester.

- **Add/Drop or Change of Course Archive 2018-2019**
  Students may add, drop, or change courses online based upon availability and eligibility during the first week of the term. Refer to the [academic calendar](/about/directory/registrar-office/undergraduate-resources-services/academic-calendar-key-dates) for add and drop dates.

- **Pass/Fail Archive 2018-2019**

- **Auditing a Course Archive 2018-2019**
In an audited course, a student will not receive credit or honor points; however, a student must pay the same tuition as if taking the course for credit. Under no circumstances may a student change from the evaluative letter grade system to audit or vice versa after the first two weeks of classes.

A student who audits a course is responsible for attending classes and completing required coursework.

---

**Attendance Archive 2018-2019**

Federal regulations require universities receiving federal funding to implement a policy monitoring student attendance in class.

Instructors are responsible for establishing the requirements for attendance and participation in each of their classes and for informing students of these requirements at the beginning of each course.

The Office of Health & Wellness Services does not excuse student absences. The student, when absent from class, has the responsibility of obtaining knowledge of materials covered in classes missed, including information about announced tests, papers, or other assignments.

---

**Leave of Absence and Withdrawal from the University Archive 2018-2019**

See [Withdrawing from All Courses, Leaves of Absence & Withdrawing from the University](http://student-life/student-services/student-handbook/university-policies-for-students-cas-sbs/withdrawing) for students in the College of Arts and Sciences and Sawyer Business School in the Student Handbook.

This policy pertains to students in the College of Arts and Sciences and Sawyer Business School.

---

**Administrative Withdrawal**

Students who are not on an official leave of absence and have been away for more than two semesters will be administratively withdrawn from the University. Students who have been administratively withdrawn must complete the [re-entry application](https://www.suffolk.edu/undergraduate-admission/information-for/previous-applicants-deferred-enrollment-re-entry/re-entry-application) with admissions to re-enroll at the University.
STUDENT RECORD ARCHIVE 2018-2019

In this Section

- **Change of Address/Name**
  Students are required to notify the Registrar of any change of home or local address within 48 hours of the effective change date, parent or guardian, or any change of legal name. Suffolk University requires a student's legal name be used on academic records and other official University documents.

  All Suffolk University students are required to submit (or confirm) current [emergency contact information](https://www.suffolk.edu/student-life/student-services/student-handbook/residence-life-policies/emergencies) each semester and when such information changes.

- **Academic Record Status Archive 2018-2019**
  Student academic records are sealed at the time the degree is conferred. After this date, changes cannot be made to majors and minors, academic honors, removal of incompletes, grade changes, or other changes to an academic record.
Visiting or Non-Degree Students (CAPS) Archive 2018-2019

1. CAPS students may take courses in all College of Arts & Sciences and the Sawyer Business School if they have completed all necessary prerequisites.

2. CAPS students may only take up to 30 credits at the non-degree level. Those wishing to take more than 30 credits must apply as a degree-seeking student.
ASSOCIATE OF ARTS DEGREE (ARCHIVE 2018-2019)

- **Studies in Literature:** 1 course, 4 credits Archive 2018-2019
- **Human Behavior and Societies:** 1 course, 4 credits Archive 2018-2019
- **Modern Language:** 0-2 courses, 0-8 credits Archive 2018-2019

**Minimum Total Credits Required for Degree Conferral:** 64 credits Archive 2018-2019
Core Requirements: 13-15 courses, 47-56 credits
Archive 2018-2019

First Year Experience: 1 course, 1 credit Archive 2018-2019

Students with 15+ transfer credits of college or university work are exempt.

Choose one of the following to be completed during the first semester of matriculation:

- **CAS-101 Strategies of Success**

  **Prerequisites:**
  CAS students only. SBS students by special permission.

  **Credits:**
  1.00

  **Description:**
  CAS 101 is a one-credit course that meets once a week and is designed to help you have a successful transition to Suffolk University and our unique urban community. It is also designed to introduce you to the principles and concepts of Oral Communication and Presentation Skills. Through interactive exercises and engaging assignments, you will explore the campus environment and learn about strategies for success as a student. You will present speeches about your research and activities to improve your abilities as a speaker.

- **ADPR-102 Professional Development**

  **Prerequisites:**
  ADPR 101

  **Credits:**
  1.00

  **Description:**
In this hands-on experiential course, students examine potential career paths in Advertising, Public Relations, and Social Media, become oriented to the university and the surrounding Boston area, and identify professional resources in Boston that foster career development.

**Seminar for Freshmen: 1 course, 4 credits Archive 2018-2019**

Students with 15+ transfer credits of college or university work are exempt.

Please note that not all courses are offered each semester. Students should contact their advisor to learn about current course offerings.

Choose one Seminar for Freshmen course from those listed below:

- **SF-101 Fixing the World- Energy and Water: The Science of Solutions**
  
  **Credits:** 4.00
  
  **Description:**
  Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs?
Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

— SF-116 Enlightened Insanity  
**Credits:**  
4.00

**Description:**  
Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

— SF-126 The Boston Theatre Scene: the Inside Experience  
**Credits:**  
4.00

**Description:**  
Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston's many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

— SF-132 The Beatles: Here, There & Everywhere  
**Credits:**  
4.00
**Description:**
This seminar will investigate the impact and legacy of the Beatles. The Fab Four deserve our scholarly attention as musical innovators and as cultural avatars of the 1960s, an era that still exerts influence today. We will examine the many ways in which the Beatles rocked the establishment and became defining figures in post-war youth culture. We will also discuss other media (the visual arts, film, fashion, style) and fields of study (mass media, marketing, recording technology, copyright law, English history) using the Beatles as our guides.

**SF-156 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life**

**Credits:**
4.00

**Description:**
The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.

**SF-173 Crime in American Society**

**Credits:**
4.00

**Description:**
Popular beliefs about crime are often inspired by the media and by specific criminological theories. These theories about and media images of crime will be examined in detail, including the "hits" and "misses".

**SF-174 Tragedy and Literature**

**Credits:**
4.00

**Description:**
This course will focus on classic works of ancient and modern literature that examine the human condition from a tragic perspective. We will concentrate on close readings from the following texts: Homer's Iliad, Sophocles' Antigone, The Bhagavad-Gita, Shakespeare’s Othello, Chekhov's short stories, and Joyce's Dubliners.

---

**SF-175 War and Apocalypse in Science Fiction**

**Credits:**

4.00

**Description:**

From some of the earliest examples of what we call science fiction to today's cutting edge writers, artists, and videographers, the devastation of war and other disasters and their aftermath have loomed large in how the future (and alternative versions of the present) plays out. This course will look at some of the more important issues of future war and post-apocalyptic literature, with a dash of television and film and a soupçon of art.

---

**SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**

**Credits:**

4.00

**Description:**

This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

---

**SF-183 Politics, Power and the Media**

**Credits:**

4.00
Description:
Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of "big government", and the concept of a liberal media.

- SF-190 Asia in America Fiction and Fact
Credits:
4.00

Description:
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

- SF-191 Film Adaptation
Credits:
4.00
**Description:**
"Why did they change the ending of the book? The novel is so much better!" We will explore the concept and industry of film adaptation. Students will read novels and watch respective film adaptations to explore how the written word is adapted to the screen; both fiction and non-fiction works will be considered. Also, field trips to past film locations in Boston will be taken to explore why specific settings were chosen for respective situations. Additionally, students will create their own written adaptations of source materials, putting into practice the concepts studied in class.

<td><strong>Sustainability, Energy, and Technology At Suffolk University</strong></td>
<td>4.00</td>
</tr>
</tbody>
</table>

**Description:**
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

<td>SF-199</td>
<td><strong>Unfolding the European Union</strong></td>
<td>4.00</td>
</tr>
</tbody>
</table>
**Description:**
The EU is a powerful political, economic and cultural block that is meant to play a major role, together with the USA and China, in the creation of a new post-crisis world order. The seminar is intended to cover, at a basic but reachable level, the history, the politics, the culture and the functions of the EU in the beginning of the Twentieth Century. An extraordinary experiment of sociopolitical engineering, comparable to that of the United States of America, the EU has been changing the life of an increasing number of Europeans for over 50 years. No American student could afford to ignore the inner structure as well as the particular peculiarities of such inclusive supranational organization in today's world. Issues as institutional functioning, problems derived from individual state sovereignty, economic coordination to face common challenges, cultural integration, future enlargement, etc. are all indispensable to understand the way in which Europe is changing. But also much more day-to-day issues, such as travel mobility, education exchange programs, citizen's participation, supranational networks of people in the arts or in business, unified labor market, gender participation, human rights, consumer's protection, etc. are all in the process of developing a more robust and functional European Citizenship.

- **SF-1127 The Vietnam and Iraq Wars: Polarized Perspectives**

  **Credits:**
  4.00

  **Description:**
  This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement "just"? To what extent were the methods used by the United States military during each war "just"? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit "the enemies" of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

- **SF-1129 Beacon Hill: Fact, Fiction, and Fantasy**

  **Credits:**
  4.00
Description:
The course will explore the physical geography, history, and image in literature, film, and pop culture of Suffolk University’s Beacon Hill neighborhood. The purpose and objective of the course is to provide students with a deep knowledge, understanding, and appreciation of Beacon Hill through examination of written and visual sources, and feet-on and eyes-on experience of the public parts of the Hill.

- SF-1133 Problems and Solutions in Early American History

Credits: 4.00

Description:
This course will examine four major problems in the early American republic: forming a government; bridging vast distances on the American continent; slavery; international relations. We will explore the various proposed solutions to these problems. Some of the solutions worked well, others were more disastrous than the initial problem. We will read primary documents pertaining to these issues, and try to imagine how men and women considering the problems might have responded to them. What solutions could be proposed? What solutions would work? What were the political, economic, or social difficulties generated by the problem and by the proposed solutions? In considering the problems, we will also learn how to use the various archives close at hand: the Sawyer Library, the Boston Public Library, the Massachusetts Historical Society, and the Massachusetts State Archives. Students will also post their findings on a class blog, and present their work to one another in class.

- SF-1134 The Meaning of Life

Credits: 4.00

Description:
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these
questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity’s Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity’s Discontents, discusses the disillusionment leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

- **SF-1135 Women Warriors: Stories of Captivity, Conversion, and Confession**

**Credits:**

4.00

**Description:**

Since the beginning of time, women have been "doing battle" to themselves, while men have gone to battle against others. Whether it is through converting to Christ, yielding to captors in order to survive, or carrying a baby, this course introduces students to the many ways in which, whatever battles they face, women are warriors; they survive. Utilizing an array of captivity, conversion, and confession narratives by women, and pairing them across the centuries, students will make connections and draw conclusions between early-and mid-19th-century-American and contemporary women. Students will connect, for example, the trials of the 17th-century Puritan captive, Mary Rowlandson, and contemporary hostage, Elizabeth Smart, to explore how women (no matter how different they seem) draw upon unique inner resources to survive.

- **SF-1141 Classical Civilizations: Pathways to Wisdom**

**Credits:**

4.00

**Description:**

How is it that the knowledge, intelligence, wisdom and values of the Greeks and Romans still educate and edify the world by providing venues towards leading fulfilling and dignified lives? The guiding principles of their respective civilizations rested upon eight pillars: -Humanism: It was recognized that humans have the potential to master their world and live life to the fullest. -The Pursuit of Excellence: To imagine the highest good and strive to attain it. -Self Knowledge: It is imperative
to know oneself before seeking to know the world. -Rationalism: Always question, reason and discern truth from falsehood and never consider any matter superficially. -Restless Curiosity: Often the resolution of one issue leads to the revelations of others mysteries and pursuits which compels further investigation. The wise individual makes this a lifelong endeavor. -Love of Freedom: As long as one brings no harm to others, one must be free to live and discover as much as possible. -Individualism: All are unique and, therefore, must recognize individual strengths and identity. -The Practice of Moderation: The prudence of avoiding extremes in personal and social conduct. In this course, students will read two (brief) texts on the Greek and Roman contributions to the world and then will proceed with specific readings which illuminate the eight principles above for achieving the good life.

− SF-1143 In the First-Person: Storytelling in the 21st Century

**Credits:**

4.00

**Description:**

This section of the Seminar for Freshmen will consider the forms, venues, and impacts of narrative nonfiction in contemporary culture. From the exploding popularity of personal essays in the digital age to the living, evolving essays we create on social media, we are constantly narrating and archiving our lives, shaping their content for specific audiences. In doing so, we shape what our experiences mean and represent. In order to analyze the power of narrative nonfiction, we will look at a variety of multimodal texts: essays, podcasts, Instagram and Twitter feeds, stand-up comedy, and storytelling slams, as well historical texts such as the essays of Michel de Montaigne and historical artifacts at the National Archives in Boston. We will also write our own narrative nonfiction, and adapt our first-person stories for listening and viewing audiences, such as the MassMouth story slam and podcasts like This American Life. Additionally, we will practice narrative nonfiction for professional audiences, using storytelling as a way to showcase personal strengths to employers, internship coordinators, and the like.

− SF-1145 Emergence of Southeast Asia

**Credits:**

4.00

**Description:**
Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

– **SF-1146 Fido the Friendly Wolf: A Natural History of Dogs**
  
  **Credits:**
  4.00
  
  **Description:**
  This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

– **SF-1147 Global (In) Security: From ISIS to Ebola**
  
  **Credits:**
  4.00
  
  **Description:**
  This course reviews the principal features of global and national security as it is currently practiced by tracing the evolution of theories, policies and circumstances whereby current international security is developed. Students will evaluate the nature and origins of war, arms proliferation, military instability, terrorism, genocide, health threats and natural resources depletion.

– **SF-1148 Brave New Worlds**
  
  **Credits:**
  4.00
  
  **Description:**
  Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of
cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

- **SF-1150 Religion in Contemporary Society**
  **Credits:**
  4.00

  **Description:**
  This course is designed to provide students with an overview of the social settings and cultural meanings of religion in the contemporary world. Topics that will be covered in reading and discussions include the rise of religious fundamentalism, religion and violence, women's and men's religious experiences, new religions, and portrayals of religion in popular films. In addition to the readings, students will observe and experience religious expressions and activities through fieldwork assignments. The emphasis on films and fieldwork reflects my belief that religion is made up of “lived experiences” of actual individuals and communities. In order to understand religion in contemporary society, we will make every effort to see (in person or in film) a wide range of religious activities. The films we will see include some of the following: Leap of Faith, Devil's Playground, Kadosh, Women of Hezbollah, Singing Stream, A Still Small Voice.

- **SF-1151 Reproduction and Society**
  **Credits:**
  4.00

  **Description:**
  This course explores relationships between reproductive health and rights both nationally and internationally. Many of our topics fit into two broad areas: conflicts over the control of childbearing (sterilization abuse, birth control, and abortion) and conflicts over who deserves to be a mother, especially when the mothers in question face social stigma and lack political power. Other topics include safe birth and maternal mortality, breastfeeding, infertility and reproductive technology. We also examine the politics of women’s sexual and reproductive autonomy, including the policies that shape women’s choices to prevent, achieve, abort, or carry to term a pregnancy. Throughout, we are guided by the following questions: Why is reproduction an important site through which to understand society? How do statuses such as race, class, gender, sexuality and ability influence people’s
reproductive possibilities? What is the role of the state in shaping these experiences? How have communities supported or resisted efforts at reproductive control? Why is reproductive justice central to these answers?

– SF-1152 The Idea of America: Past, Present, Future
  Credits:
  4.00
  Description:
  A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation’s history, from the struggle over slavery to America’s contemporary role in the world. Because this course intends to apply theoretical understanding to real life, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation's philosophical and historical currents.

– SF-1154 Introduction to Visual Studies
  Credits:
  4.00
  Description:
  This seminar provides an introduction to Visual Studies, a relatively new interdisciplinary field that examines how images communicate and the roles that they play in society. Students will apply the concepts and techniques of Visual Studies to analyze sites and signs around Boston, such as advertisements, street signs, fashions, newspaper photographs, buildings, and public spaces. Class projects will increase students' awareness of their visual environment and their ability to critically analyze the visual rhetoric that surrounds us and is often used to manipulate us.

– SF-1156 Thinking About the Insanity Defense
  Credits:
4.00

**Description:**
This course examines sixteen case examples providing a clear and compelling introduction to one of the most important topics in the relation between public policy and law. This course addresses: the history of the insanity defense; the effects of different standards for determining insanity; the arguments for its retention; abolition, and revision; media and other responses to it; and the controversies around pre and post conviction commitment. The case examples illustrates a variety of outcomes and include individuals who were found not guilty by reason of insanity; found guilty even though mentally ill; and not charged because of mental illness.

- **SF-1158 Global Climate Change**

**Credits:**
4.00

**Description:**
Conversation about the weather is considered to be the universal icebreaker. Yesterday's sweltering heat, the storm predicted for this weekend, even long-term climate shifts find their way in our daily conversation. Today, however, such casual conversations have an edge to them, because we are realizing that humans play a role in determining the climate shift. In fact, understanding the human fingerprint in the Arctic tundra melting, or a devastating hurricane, has gone well-beyond small talk to become one of the most important challenges our society faces today, and on that is wedded to geopolitics. To meaningfully participate in any dialogue that addresses this challenge people have to be aware of certain key ideas of Physics and Planetary Science. The aim of this course is to provide you with some of the essential facts and pieces of science underlying such questions. This course will enable you to grasp many of the issues that dominate today's political discourse and to develop an informed opinion (your, not our!) for which you can rationally argue.

- **SF-1160 Individuals and Society in the Zombie Apocalypse**

**Credits:**
4.00
**Description:**
"The Walking Dead" tells viewers that life in the zombie apocalypse requires people to "fight the dead, fear the living." Sociologists want to know why we should fear the living. How do individuals come together and try to recreate society for themselves: either to build community or fight other groups? What role do morals and values have in a society? How does all of this determine life, death, and the struggles people must face? Questions like these will give our class a new view of "The Walking Dead" and can help us to learn more about the society that we live in where so far the dead have remained in the ground.

---

**SF-1161 The Playwright and the Stage**

**Credits:**
4.00

**Description:**
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

---

**SF-1162 Space Missions: From Moon to Mars and Beyond**

**Credits:**
4.00

**Description:**
It is hard to believe that only 60 years ago, our only close-up view of a planetary body was that of Earth. We are truly living in the Golden Age of Space Exploration, when a new mission every few years brings us spectacular images from either a neighbor in the solar system or galaxies at the edge of the universe. This course will describe the dozen space missions that changed our view of the universe, ranging from our solar system to the most distant galaxies.
- SF-1163 Spellbound! Witches, Wizards and Spirits In American Literature

**Credits:**
4.00

**Description:**
Since the beginning of time and across cultures, people have been interested in the supernatural, the paranormal, and the otherworldly. Often, these phenomena have appeared in the form of witches, wizards, and spirits, whether good or bad, wicked or wonderful. Women who have not fulfilled traditional gender roles have historically been cast as witches or, to use Shakespeare's phrase, as "weird sisters", or, in Donald Trump's recent election parlance, as "nasty women." Men in turn appear as wizards, usually more positively than female witches. Men and women alike also can take the form of spirits or ghosts; even houses can be possessed. What lies beneath the great fascination with the supernatural and the paranormal, with the haunted, the possessed, and the spellbinding? What accounts for the different manifestations of spirits? This course takes students on a tour of witches, wizards, and otherworldly spirits throughout American literary history. Tropes of the witch and the wizard have appeared in literature from the time of Shakespeare (see Macbeth) to the contemporary best-selling Harry Potter series, and hits every century in between, such as in Anne Hutchinson's Puritan accounts form the 1600s, Nathaniel Hawthorne and Edgar Allan Poe's in the 1800s, The Wizard of Oz in 1900, and John Updike's The Witches of Eastwick in the 20th century. The course offers readings across genre lines-poetry, fiction, non-fiction, young adult fantasy, and drama-and includes excerpts from film and television shows based upon wizards and witches (such as Bewitched, Buffy the Vampire Slayer, and The Vampire Diaries). The course may include a field trip to Salem, MA, as well as possibly the opportunity to see Wicked at the Boston Opera House (if it is renewed through the fall season, 2017).

- SF-1164 Reinventing Europe: Beyond Brexit and Secular Stagnation

**Credits:**
4.00

**Description:**
While newspaper headlines focus on the multiple problems Europe is facing today, the evolving adaptation of European nation states and the integration process receive less attention. Brexit and economic crises seem to be synonymous of Europe today, but facts such as the European Union accepting five new members in
the coming five years or Europe being the most advance environmental actor or the main international provider of official aid are often ignored by public opinion. This Seminar for Freshman examines the dynamic evolution of the integration process in Europe in the context of globalization. Three sections articulate the main debates and tensions in the interplay between national and supranational institutions and policies. The first part analyzes how eight European countries have forged their national preferences to delineate their level of immersion in the integration process; it later proceeds with the examination of the main historical events in the history of the integration process. The second part explores the functioning of the EU institutions in order to grasp the essence of the complex policy-making in the Europe of 28 members. The third and final section presents the analysis of the main areas of the EU policy making such as agriculture, monetary and economic issues, among others, and observes the main developments in the area of EU external relations.

- **SF-1165 History of Boston**
  **Credits:**
  4.00

  **Description:**
  This semester we will explore Boston’s history. We will read books, visit historical sites, and you will learn how to do historical research on your own. This course meets the requirement of Humanities and History.

- **SF-1166 Cinema-Monde: Global Challenges on Film**
  **Credits:**
  4.00

  **Description:**
  This course focuses on French-language films - with subtitles! - that address pressing social issues of the 20th and 21st centuries, such as hunger, female genital mutilation, immigration, racism, economic inequality, genocide, gender, sexuality, colonialism and post-colonialism.

- **SF-1167 Fantasy Fiction: Imaginary Worlds**
  **Credits:**
  4.00
Description:
Readers lining up at midnight for the newest Harry Potter book, hundreds of thousands of viewers crashing HBO’s website in their eagerness to watch Game of Thrones: examples of fantasy’s recent popularity are everywhere. This course explores the genre of contemporary fantasy through a historical and critical lens, from the work of J.R.R. Tolkien to the 2015 Nebula Award Winner, Uprooted. We will begin by reading selections from medieval literary texts, including Arthurian legend and Anglo-Saxon epic, to understand the roots of the fantasy genre and consider how these early works have inspired and informed the world-building efforts of later authors. We will also explore fantasy's newest manifestations across different kinds of media, from big-budget film adaptations to internet fan fictions. Critical questions will include: How do works of fantasy deal with the ethical questions surrounding the categories of "good" and "evil", "monstrosity" and "otherness" How do common fantasy plots such as coming-of-age or quest narratives work to aid in fictional character development and build suspense? How are contemporary anxieties about issues such as gender, race and class explored through the genre of fantasy?

SF-1168 The Real Thing: the Pursuit and Problems Of Authenticity

Credits:
4.00

Description:
This course will focus on the concept of authenticity in American culture, from its origins in the early 19th century to the present. When the advertising gurus of Coca-Cola branded it as "The Real Thing," they were exploiting something powerful: the idea of something real, stripped of any falsity or illusion. Humans have always desired to know the world and others "as they really are," but this desire is particularly strong in the modern world: witness the eagerness to discover one’s "true self," cut through the B.S., obtain the genuine article, and "live authentically." In this course we will interrogate this pursuit of the Real Thing. In various ways, the texts we study both embrace authenticity as an ideal and also question its goodness, usefulness, or even its very possibility. We will thus confront a number of interrelated questions: Where does this desire for authenticity come from? What counts as "authenticity," in life and in art? Is authenticity really a virtue to live by? How does it shape artistic and literary expression? Is there even such a thing as "the real you"? This course will be divided into three units. In the first unit, "Counterfeiters and Self-Made Men," we will study how a commitment to authenticity arises in antebellum American literature and culture during a time of rapid national
expansion and invention. Readings will include texts by Henry David Thoreau, Ralph Waldo Emerson, Herman Melville, and P.T. Barnum. In the second unit, "Authenticity and Contamination," we will consider two major ways in which authenticity becomes idealized around the turn of the 20th century: as artistic ideal set against fears of mass cultural production, and as a cultural ideal set against fears of racial and cultural mixing. Readings will include texts by Ernest Hemingway, Nella Larsen, Jean Toomer, and William Carlos Williams. In Unit Three, "Buying and Selling Authenticity," we will examine how authenticity becomes commodified (associated with products and "lifestyles") in post-WWII American culture. Texts will include works by Andy Warhol, David Foster Wallace, George Saunders, Banksy, and the TV series Mad Men. Final projects will ask students to consider authenticity today: how is the pursuit of the Real Thing affected by technologies of reproduction, by commodification, and by the increasingly virtual world of the 21st century?

- **SF-1169 Immortality: Real and Imagined**

  **Credits:**
  4.00

  **Description:**
  Most of the world's religious traditions have as a part of their doctrines some notion of immortality, rendered both in scriptures as well as iconographically. What precisely is entailed by immortality and why does it constitute such a significant element of so many religious traditions? What can we learn about immortality by investigating various conceptions of the afterlife? Is immortality truly a desirable thing? These questions among others will be examined from the perspectives of philosophy, religion, psychology, anthropology, and biology. Besides being cross-disciplinary, the course will be multi-media in nature. In addition to reading philosophical and religious texts concerning the nature of immortality, students will study various accounts of immortality and the afterlife, examine how the afterlife has been dealt with in (visual) art, literature, and film, and investigate current research into life prolongation (biomedical gerontology).

- **SF-1170 From Philia to Facebook: the Meaning of Friendship**

  **Credits:**
  4.00

  **Description:**
The thematic focus of this seminar will be friendship. Friendship is one of the most important of human relationships; one that every student in this seminar has already participated in for many years. It shapes who we are and helps determine who we may become. And while it is a universal phenomenon, it has been practiced quite differently at various times and places in human history. And while we all have an intimate, personal and practical knowledge of friendship through our own experiences, sometimes things that are so close and so obvious to us can be hard to see. Over the course of the semester we will inquire into friendship from many different angles, trying to gain both a broader and a deeper understanding than our own individual experience allows. We will look at friendship first through the lens of philosophy, particularly through the foundational text of Aristotle, The Nicomachean Ethics. We will look at other views of friendship from the ancient world, starting in the past to help us see that friendship has not always been thought of the way we think of it now. After this initial foundation is laid, we will examine other writers and thinkers and take up additional topics like friendship in different cultures, friendship and gender, friendship in and through the arts and include an examination of friendship through the lenses of many different academic disciplines to see how other systematic thinkers conceive of friendship. All along we will be comparing and contrasting with our own personal experiences and considering what modern technology, such as social networking sites, has done to influence friendship, in the way we practice it and the way we conceive it. It is the aim of this class that students not just study different academic points of view, but that that they take up the questions and challenges that these thinkers present to them and fully engage with them on a meaningful personal level.

- SF-1171 Living on and Beyond the Hyphen/Latino Writers in the USA

Credits:
4.00

Description:
Hyphenated-Americans of Latino origin come from many places and backgrounds. Often perceived as a divide, an either/or that separates and distinguishes one ethnic group from another, the hyphen can also be viewed as a link that connects, integrates and facilitates the formation of “new” cultural spaces. Through films and written narratives by and about U.S.A. Latino(a)(x)-Americans, students will examine how individuals who live on the threshold between two languages and cultures embrace the challenge of preserving their own identity and moving beyond stereotypes. Each of the Latino/a/x authors that we will read in this course will describe his/her own experiences living in the U.S.A. By examining their views
through our own filtered lens we shall try to answer questions like the following: 1. What role does language have in our definition/understanding of cultural identity? 2. How do individuals move beyond the hyphen and stop seeing themselves as hybrids? 3. How can an individual who does not belong to a marginalized group (i.e. one considered less powerful and secondary) understand and empathize with those who do? 4. How does globalization affect the dichotomies that arise in bi-cultural and multi-cultural communities?

— SF-1172 The United States Mexican Border

**Credits:**
4.00

**Description:**
One hundred and sixty nine years have passed since the Treaty of Guadalupe Hidalgo was signed. It is only fitting to analyze the profound changes that the gain/loss of these territories caused for the citizens of both sides of the border. This course will explore the literature, culture, and history of the United States-Mexican Border and the most pressing problems pertaining to the region. Emphasis will be on contemporary border theater and film. The works of Salcedo, Galindo, Lopez and others will be studied as well as contemporary films and documentaries such as Alambrista, Senorita Extraviada, The Gatekeeper, Sin Nombre, Wetback: the Undocumented Documentary, Victoria para Chino, Which Way Home, and much more. There are no prerequisites for this course. Though the course in conducted in English, parallel readings in Spanish will be made available to those who wish to read and/or compare the original texts.

— SF-1173 Understanding the Vast Sweep of Chinese Culture

**Credits:**
4.00

**Description:**
This course is an introduction to both ancient and modern Chinese civilization with a focus on its literature, arts, and 4000 year cultural history. We will see China at its earliest stages through its archaeology and progress to the heights of literary splendor in the Tang and Song Dynasties. Study of select early plays from the Mongol Yuan period will clearly tie into the development of Ming and Qing period fiction. With the fall of imperial China in 1911, the focus of literature changed drastically and we will study how many modern authors were able to draw from a
massive wealth of literary resources to help create a new Chinese literature and culture. We will watch several films that will provide a rich visual portrait of the culture. We will read quite a few representative literary and historical works in English translation that will give a great deal of insight into modern China and how we can both relate to and interact with this complex and amazing country. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for students in all majors that wish to gain a deeper understanding of Asian culture.

— **SF-1176 What Is a Fact?**

**Credits:**

4.00

**Description:**

What makes a fact a fact? What makes a fact true? At one time, these questions were only asked by epistemologists and postmodernists, but with the rise of fake news and the discourses surrounding it, these questions are relevant to everyone. Understanding facts is also essential to college students, who must learn to use reliable sources in order to create credible work. In this class, we will examine works of literature, art, science, and history that interrogate how facts are created and how we determine their truth value. Texts will include podcasts, novels and book-length studies of memory and theory of mind (the study of how we understand what others are thinking). We will also utilize the resources of Boston and Suffolk University; we will visit the WBUR NPR newsroom, a local museum, and learn about the legal definition of "truth" from a representative of the law school. By analyzing these texts, participating in these experiences, and completing a series of assignments that ask students to think critically and creatively, this class seeks to understand how we create facts, and why we need them.

— **SF-1177 Revolutions in Thought**

**Credits:**

4.00

**Description:**

The course will consider major changes in thought that revolutionized the cultures and societies in which they were embedded. Topics include the rise of monotheistic religions; the American Revolution; the recognition of slavery as a moral evil; the idea of women's equality; Freudianism; Darwinism; Marxism; as well as Einstein and
the Theory of Relativity. We will enrich the readings and classroom conversations with visits to museums, churches, historic sites and other locations that reflect some aspect of the revolutionary changes that are our focus.

Students in the CAS Honors Program should choose one Seminar for Freshmen course from those listed below:

- **SF-H101 Fixing the World- Energy and Water: The Science of Solutions**
  **Prerequisites:**
  CAS Honors students only
  **Credits:**
  4.00
  **Description:**
  Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-H116 Enlightened Insanity**
  **Prerequisites:**
  CAS Honors students only.
<table>
<thead>
<tr>
<th>Credits:</th>
<th>4.00</th>

<tbody>
<tr>
<td>Description:</td>
<td>Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.</td>

4.00

**Description:**
How is it that "comics", a genre often viewed as entertainment for children and adolescents, has become one of the most exciting forms of narrative and visual art? To answer this question, this seminar will examine a range of graphic novels, from those that celebrate their origins in superhero comics, such as Alan Moore’s Watchmen, to those that treat subjects not usually considered proper to the comics genre, such as Art Spiegelman's Maus, about the Holocaust, and Alison Bechdel's Fun Home, about the complexities of sexual identity. As we read these works, we will look at how the combination of words and still images makes the graphic novel a unique storytelling form, as well as how artists and writers push the envelope to create new styles and challenge our expectations. In addition to class discussions and writing assignments, we will take a field trip to the Museum of Fine Arts and create a collaborative group graphic novel step-by-step over the course of the semester (all abilities welcome).

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

**Prerequisites:**
CAS honors students only.

---

SF-H197 Sustainability, Energy, and Technology At Suffolk University

SF-H1134 The Meaning of Life
Credits: 4.00

Description: What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity's Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

---

SF-H1146 Fido the Friendly Wolf: A Natural History of Dogs

Prerequisites: CAS Honors students only

Credits: 4.00

Description: This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

---

SF-H1148 Brave New Worlds

Prerequisites: Restricted to CAS Honors students

Credits: 4.00
**Description:**
Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

**First-Year Writing: 2 courses, 8 credits Archive 2018-2019**

**Description:**

- **WRI-101 First Year Writing I**
  
  **Credits:**
  4.00
Study and practice of the writing process and revision in terms of expository writing modes for an academic audience.

- **WRI-102 First Year Writing II**
  **Prerequisites:**
  WRI-101 or ENG-099 with at least a B and ENG-P099 with a P or WRI-H103

  **Credits:**
  4.00

  **Description:**
  Study and practice of argumentative and research writing through further work with writing process and revision and the critical reading of a variety of texts.

A student may be assigned to other writing courses or may be invited to take WRI-H103. Students not eligible for direct entry into WRI-101 will be required to complete one additional pathway course. Depending on eligibility, students who are assigned one additional pathway course must either complete WRI-100 or WRI-100+ prior to enrolling in WRI-101.

- **WRI-100 Developmental Writing I**
  **Credits:**
  4.00

  **Description:**
  This course affords students extended practice with persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. Students who are placed into WRI-100 must complete the course with a C in order to continue on to WRI-101.

- **WRI-100+ Developmental Writing - Tutorial Section**
  **Credits:**
  4.00
**Description:**
This course affords students extended practice with persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. WRI-100+ sections require students to meet with their instructors once per week for a thirty-minute, one-to-one tutorial session, to be scheduled by the instructor with each individual student.

— **WRI-H103 Advanced First Year Writing**

**Prerequisites:**
By Invitation Only.

**Credits:**
4.00

**Description:**
This course is by invitation only and reserved for incoming Suffolk students with high admission scores. Advanced study and practice of writing process, revision, and research, based on close readings of a variety of texts. Fall semester only.

---

**Creativity & Innovation: 1 course, 3 credits Archive 2018-2019**

In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk and support divergent thinking. In the process, they will become more confident life-long learners.

Choose one Creativity & Innovation course from those listed below:

— **ADF-S171 CI: Integrated Studio 1**

**Prerequisites:**
Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

---

ADF-S172 CI: Integrated Studio II

**Prerequisites:**
ADF S101; Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.

---

CI-102 The End of Global Poverty

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. More than one-third of our global population lives in poverty, earning less than two dollars a day. Governments, businesses, social enterprises, and charitable organizations have tried to solve the global poverty issue with mixed results. What is the solution? Is entrepreneurship the solution, part of the solution, or has no impact whatsoever? In this course, you will gain an understanding of the power of entrepreneurship (in the context of creativity and innovation), the definition and depth of global poverty (in the context of constraints, such as human, financial and physical resources embedded in local, regional, national and global cultures), and successes and failures of past initiatives to reduce poverty. This is not a course about politics or business, but rather finding a solution to a problem that has eluded mankind since the beginning of time.

---

**CI-H102 The End of Global Poverty**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only

- **CI-103 Sticking Your Neck Out- Inventing for Non-Engineers**
  
  **Credits:**
  
  3.00

**Description:**
This course examines cutting edge technologies, the science behind them, and their practical application and follow-up success or failure. It also provides the students a chance to consider the relevance of identified "needed" inventions from the 1950s, and whether those projections were correct. The history behind some remarkable inventions will be presented. Finally, working in small teams, students will brainstorm to identify something useful to invent and determine several approaches to implementing it.

- **CI-106 Failing Successfully**
  
  **Credits:**
  
  3.00

**Description:**
This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. Did you know Netscape was the internet browser? What about MySpace, arguably the Facebook of the last decade? What led Apple from being innovative pioneers of the 70's to the verge of extinction in the 80's to the technological giant they are today? Technologies come and go, but what leads to organizations lasting more than 100 years such as IBM, General Electric, etc.? What role does failure play in successful innovation, decision-making, and business viability? In this course, you will learn about innovation that may have been successful and well-executed. You will also learn about innovation that was a viable business opportunity, but poorly
executed: one phase of failure. In addition, you will learn about innovation that had no real market viability, but was launched anyway: another phase of failure. Can failure lead to success? If so, how?

— **CI-H106 Failing Successfully**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

---

- **CI-110 The Entrepreneur’s Cocktail**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
How do you and your story drive business? This course takes an innovative look at human creativity and entrepreneurship. As an entrepreneur needs perseverance and high motivation, we will explore the importance of values, risk taking, problem solving, and the discovery of the market opportunities. In order for you to be creative and essentially create successful ventures, you will discover the nuances between the three factors and explore them further through interactive discussion and debate as well as collaborative group work. You will be encouraged to think in non-conforming ways and apply new concepts and develop your own personal operating principles.

---

- **CI-112 Creating Problems: a New Solution for Sustainability**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00
Description:
As the majority of the world population now lives in cities, for the first time in human history, issues of urban sustainability have become more complex and more important than ever before. Presented with case studies of urban efforts to gain a sustainability foothold, students will utilize ideation, critical thinking, and strategic decision making to both identify root problems and to present solutions. This course will lean heavily on ideation processes, teamwork, and logical methods of analysis to pursue actionable solutions for significant problems. The methods of problem identification and solution analysis learned in this class will be readily adaptable to many complex problems, helping the students to make informed and decisive determinations in their careers.

— CI-114 Creating the Dream Team
Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
Every successful venture today is based on effective teamwork. Unlike a typical lecture format, Creating the Dream Team is a course that utilizes experiential group learning to provide students with pivotal team-building skills. These essential skills are vital for everyone's future success in the business world. As team players, students are challenged to think creatively. A collaborative problem-solving process is used to analyze "real life" business situations. Teamwork involves research, data collection and information analysis to develop creative solutions to typical business problems. Teams will utilize multi-media tools to present their innovative ideas. Classmates will provide peer feedback and review. Through iterations, all students will assume roles as project leaders, keynote speakers and collaborators on a series of Team Challenges. Upon successful completion of this course, all students will have formed working "dream teams". As reinforcement and final evaluation, Dream Teams are required to create a multi-media Capstone Event as a course performance measure. This capstone presentation will "showcase" all of their newly acquired "dream" team-player skills.
CI-116 Good to Great: Design YOUR Portal to the World

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk, and support divergent thinking. In the process, they will become more confident life-long learners.

CI-H119 SL-Honors Theatre at Work

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

Credits:
3.00

Description:
In this course, students meet community needs by engaging in service-learning outside the classroom. Theatre at Work is an introduction to creative practice using live performance as a problem solving tool in an educational environment. Specifically, students will create a performance piece in response to an issue they have uncovered in collaboration with select groups of students in a host Boston Public School. There will be a special focus on normalizing risk-taking and the learning that comes from false starts and failed ideas. Students will be responsible for creating every aspect of their performance testing its feasibility on a limited budget, ensuring that the content meets established criteria, and successfully implementing and evaluating their success both with their peers and their audience.
- **CI-129 Art & Innovation Practices**
  
  **Credits:**
  3.00

  **Description:**
  The intent of this course is for students to examine and effectively express in writing their ideas on creativity and to inspire undergraduate students to exceed their current levels of learning. Students will learn to meaningfully integrate course content into long term-retained useful skills through applied creative collaborations. This course is based on the idea that exposure and insight development will enable students to better visualize themselves in their desired fields and make informed choices within the variety of options available to them. The focus of the course will help students to assess their personal interests and strengths as they plan for their own educational and professional futures.

- **CI-131 Off to the Future: Leadership Through Compromise**

  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  Some past political issues were resolved with great success (the Compromise of 1820), and some resulted in great failures (the US Civil War). In this course, students will study noteworthy political dilemmas of the past, identify the major problem solvers and examine the art of compromise. These investigations will provide guidance and inspiration for students to develop innovative and creative solutions to present day political problems such as climate change, immigration, Social Security, income distribution, higher education affordability, and homelessness. Students will work in teams and propose creative and innovative solutions that will convince the affected interest groups favorably, represented by teams of other students in the class, and result in compromises solving tomorrow's problems today.
- **CI-H133 Honors Franklin and the American Experiment**
  
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

  **Credits:**
  3.00

  **Description:**
  What made Benjamin Franklin such a creative force in American history? We will explore the many facets of Franklin's life (printer, writer, scientist, statesman) and learn about Benjamin Franklin's political and diplomatic ventures, and will recreate some of his scientific experiments.

- **CI-135 The Design of Everything**
  
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  This course will explore a selection of the genius personalities and their creative work in 5 distinct areas of human creative endeavor; art, science, nature, technology and the built environment. The course explores the underlying similarities in the process of their discovery, invention and creativity across the disciplines. Studying such names as Newton, Warhol, Hawking, Jobs, Gaudi and Banksy, students will uncover the process of design through research, analysis, synthesis, iteration and error. In class group projects will allow a hands-on opportunity to create.

- **CI-H139 Creating, Promoting, and Participating in the Literary Arts**
  
  **Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. CAS and SBS honors students or GPA of 3.5 or above only.

**Credits:**
3.00

**Description:**
With the launch of Boston’s new Literary Cultural District, we have renewed cause to celebrate the history and industry of literature in our city. This course will immerse students in the world of literary culture and its many branches: writing, editing, reviewing, and publicity. Students will practice the art of creative writing, and learn how writers find publishing venues, how authors build platforms for their work, and how literature reaches the public through readings, social media, book trailers and other marketing campaigns, authors interviews, and reader reviews. Various industry professionals, authors, editors and publicists will speak to the class about the artistic and business opportunities, trends, and futures of literature and literary publishing. Students will apply their knowledge and interests to a variety of projects, including book reviews, author interviews, social media campaigns, literary events, and other collaborative projects. We will also work as a class to launch a new digital literary journal at Suffolk.

---

**CI-141 The Creative Approach to Learning**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
This course is focusing on the creative process by introducing students to creative practice as a disciplined approach to problem solving and innovation requiring research, persistence and grit. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original ways, embrace ambiguity and support divergent thinking and risk taking. The course will have an undertone based on science, but it is suitable for non-science majors too!
- **CI-143 Dreams, Demons, and Dynamic Artists Creative Nature**
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  What motivates your creative nature? This course will explore converging themes in Art and Psychology in order to give students the tools they need to unblock their creative potential. Collaborative small team activities, assigned readings, large group discussions, and personal reflection exercises will provide an avenue for students to explore their own creative patterns and how they are influenced by, and perceived within, the world around them. Dreams, mental illness and psychosocial theories of self will also be widely discussed in order to give students context for this inter/intrapersonal exploration.

- **CI-147 Seeing Double, Printmaking, the Art of Discovery, Experimentation and Process**
  **Credits:**
  3.00

  **Description:**
  Always wanted to explore a creative side but never had the opportunity to take an art class? Here's your chance! Sync the power of icons/ images with ideas and making. We will use cellphone and printmaking technologies in a workshop style environment. Rather then a lecture based class, this class we will play, learn and build new Neurological pathways towards creative thinking. Come to every class excited to learn, make and discover. This course will give you the building blocks for innovative thinking beyond the classroom. Power is in the image. As in the way a dream can grip you, images carry incredible amount of influence and creative potential, when they are "seen." Glimpses of these images circulate in media, movies, cell phones, and so on. Learn to develop your own images and understand the broad world of images of human culture.
CI-149 SL-Creative Writing and Literacy

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
In this course, students meet community needs by engaging in service-learning outside the classroom. This course will explore the value of creativity and play in developing reading and writing skills and the habits of lifelong learning, both in our own lives and in the lives of young people in Boston. In this course, we will work closely with the non-profit literacy organization 826 Boston, which works with students ages 6-18 on reading and writing skills through playful, creative workshops, as well as tutoring and other kinds of support. Students will learn about the work of 826 Boston by volunteering with the organization, and by the end of the semester you will conceive, plan, and run creative writing workshops of your own at 826 Boston.

CI-H149 SL-Creative Writing and Literacy

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

- **CI-157 Mindful Journal**
  
  **Credits:**
  
  3.00

  **Description:**
  
  To keep a journal is to make an investment, often long before we understand the value. A journal is a personal database of snapshots in time, good ideas and bad, observational doodles and unfiltered emotions. On any given page a journal may appear inconsequential but within the rigor of filling a whole notebook (and another, and another) an individual viewpoint emerges. This class will facilitate a student’s ability to draw from his or her own lived experience and discover unique springboards into universal issues by making mindful connections. An entire lifetime of images, stories and details resides within each of our minds but the ability to explore that richness requires dedication to documentation. Mindful Journal is a process class fostering focus through mindfulness practices, content generation and meaning making.

- **CI-159 Building a Better T**
  
  **Prerequisites:**
  
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  
  3.00

  **Description:**
  
  If any set of problems could use creative and innovative thinking, it's the myriad of problems facing the T. The Boston Globe is filled with stories about financial and organizational problems in the system, and you only have to spend a few minutes on the green line to feel the effects of those issues. Still, millions depend on it every day - it is the circulatory system of our city, and it is more than a way to get around: the T increases accessibility and functions as a democratizing force. That is, when
it's running. In this class we will study the MBTA and other mass transit systems in order to propose creative solutions to the T's most pressing problems. We will read articles about the T and other transit systems, we will look at interactive maps that express different kinds of data, and we will visit local stations. In addition, we will study the process of creative thinking, in order to apply those skills to the issues at hand. You will be asked to create both stand-alone short writing assignments and visual representations of your ideas, accompanied by short, written explanations, both alone and in group projects.

---

**CI-161 Making History: Public Memory in the Digital Age**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
You live in Boston now. At least for a while. Perhaps you've noticed that it has its own ways of remembering things. Consider The Boston Literary District, The Freedom Trail, and all the many events and festivals devoted to history, culture, and identity. From guided tours and colonial cosplay to images and written texts to monuments, memorials, and museums, this city tells stories about itself today in the ways it tells stories about its past. In this class, you're going to tell more stories about Boston. You're going to help it find other things to remember, and other ways of remembering them. You'll likely need to focus on parts of the real events that Boston doesn't prefer to include in its stories, emphasizing issues of race, socioeconomic class, nationality, colonialism, gender, sexuality, and other stories of unequal power and how that manifests in real people's lives and in the culture of this city.

---

**CI-H161 Making History: Public Memory in the Digital Age**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.
Credits: 3.00

Description: You live in Boston now. At least for a while. Perhaps you’ve noticed that it has its own ways of remembering things. CI-163 A Course on Skepticism and Rationality

Prerequisites: Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits: 3.00

Description: Magician James "The Amazing" Randi reminds us that "No matter how smart or how well educated you are, you can be deceived." In an age fraught with deception and misinformation, students need tactics and strategies in order to separate truth from falsity. This course encourages its participants to act as skeptics - not cynics, necessarily - by requiring evidence and proof before believing or accepting claims. Students are urged to identify the most-likely-to occur opportunities for deception in their major fields and draw from the tenets of classical rhetoric, logic, and the scientific method in order to develop safeguards. Frequent collaboration with classmates will allow for dynamic solutions to small and large-scale contemporary problems ranging from the personal (e.g. used car prices and avoiding fraud) to the universal (e.g. "fake news" and God).
- **CI-165 Chemistry Is Everywhere: Zig-Zagging to Success**
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  We will be discovering the process of becoming more creative. The emphasis is on understanding the creative process and applying effective teamwork strategies towards a shared goal. Students will use scientific inquiry to explore topics in chemistry that they find interesting. Each team of 3-4 students will choose a project and develop it during the semester with the goal of raising awareness about chemistry or designing innovative and engaging ways of teaching chemistry.

- **CI-169 Riddles of Identity**
  **Credits:**
  3.00

  **Description:**
  In this course, we will be exploring the often puzzling question of personal identity from a creative perspective, learning about creativity by exploring questions of personal identity. What exactly constitutes our identities? How much control - if any - do we have in determining what our identities are? By wrestling with these among other important questions from a wide-range of perspectives and with creative confidence - the firm belief that each of us can and must explore these questions creatively - we will arrive at a better understanding of ourselves, our personal identities, as well as acquire a greater appreciation of the identities of others. Our course is a genuinely collaborative one, given the significant role others can play in providing us with a perspective on our identities unavailable to us as individuals.

- **CI-171 What Is the Moral of This Story?**
  **Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course, the idea of embodiment refers to the integration of the expressiveness of our bodies as a vehicle for the art of speaking and communicating. The meaning of embodiment employed here is both a style and philosophy of engagement and will be examined and practiced as an ongoing pedagogy for connecting with stories at various levels of discourse and apperception.

---

**CI-173 Imagining the Other**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course we will explore how to enter into new ways of thinking and adopt new perspectives, by reading, discussing and imitating a range of texts (from poems, hybrid-genre pieces, and song lyrics, to photographs, dreams, and ethnographies). Trying to transcend ordinary modes of interpreting the world, trying to imagine what it is like to be someone or something else entirely, immersing ourselves and describing/translation the new experiences, we will then share the writing (and other texts) we produce, workshopping them as a group, and producing a final presentation and collective portfolio.

---

**CI-175 Creating Social Change: From Theory to Activism**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits: 3.00

Description:
Social change doesn't just happen because something is "in the air" or because of some kind of mystical zeitgeist. Social change happens because engaged citizens find creative and innovative ways to frame social conversations and push on the levers of power. In this course we will examine some of the foundational figures and texts called on by those hoping to enact social change. We will study previous social movements in order to understand how they constructed and supported their arguments in favor of change, and how activists used creativity to overcome entrenched thinking and change the social conversation. We will work in small groups to collaboratively develop achievable but ambitious plans to engage the public and enact change in our own communities.

—

CI-179 Myths of Self-Making

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits: 3.00

Description:
In this course, students examine and engage with one of the major mythological figures of the American imagination: the "self-made man." The idea of the enterprising person who "pulls himself (or herself) up by the bootstraps" is distinctively American. But where and why does it arise? How did it come to prominence in American culture, politics, and economics? And, by gaining understanding of both the limits and the potential of this cultural ideal, what can we draw from it in our own careers and lives? Students will practice skills of close reading, analysis, and argumentation in the first half of the semester, prior to moving onto more complex and interpersonal forms of scholarly creativity and
problem-solving in teams and in the community. Course content will follow a similar trajectory. In the first half of the semester, we will focus on how the myth of the self-made man originates and develops, and consider some critiques of it as an ideal. After spring break, we will apply the concepts we have studied to a robust analysis of issues in contemporary politics and economics including financial speculation, entitlement reform, technological disruption, and the gig economy. This contemporary focus will culminate in a Group Project & Final Presentation in which students aim for an innovative approach to a current question in light of the works we have studied.

– CI-181 Creating Change: Perspective Matters

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Reality and perception have been debated and discussed for millennia. Humans see and experience their world in different ways. How do humans determine appropriate solutions for challenging social and economic problems? Why do most accept the current structures or status quo in regards to challenging problems? How do we gain a different perspective to find the vision and resources to erect new structures and thus challenge the status quo? Students will creatively explore these big questions through readings and presentations, studying examples of individuals and movements that have led to new and divergent perspectives. Students will participate by crafting products, creating visual projects, and coming into original thought via trial and error. Students will also develop their analytical and critical thinking skills, while learning to communicate effectively and honestly.

Note: Students with 30+ transfer credits are exempt from this requirement.
Math: 1 course, 4 credits Archive 2018-2019

Choose one Math course from those listed below:

- MATH-128 Math for the Modern World
  Prerequisites:
  MATH level 2, or Mathshop, or MATH-104
  
  Credits:
  4.00
  
  Description:
  From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem solving in contemporary life and work. It uses a minimal amount of algebra and focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)

- MATH-130 Topics in Finite Mathematics
  Prerequisites:
  MATH-104, or MATH-121, or MATH level 3
  
  Credits:
  4.00
  
  Description:
Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments, Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

---

**MATH-134 Calculus for Management & Social Sciences**

**Prerequisites:**
MATH-104, MATH-121 or MATH level 4

**Credits:**
4.00

**Description:**
A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, limits and continuity, derivatives, differentiation rules, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, and area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester.

---

**MATH-164 Calculus 1 Bridge With Trigonometry**

**Prerequisites:**
Permission of Instructor

**Credits:**
4.00

**Description:**
This course provides an alternative to MATH 165 (Calculus I) for those students who have taken MATH 134 (Calculus for Management and Social Sciences) but who do not have the trigonometric precalculus prerequisite (such as MATH 121) for MATH 165. In other words, the sequence MATH 134 / MATH 164 serves as an alternative to the sequence MATH 121 / MATH 165, and similarly prepares students to take MATH 166 (Calculus II). The course includes a thorough review of trigonometry and other precalculus topics. Aspects of limits and differentiation which students have already seen in MATH 134 are presented briefly, but in most cases with more emphasis on conceptual understanding, and often illustrated using more complicated examples. New calculus topics (i.e. not covered in MATH 134) include one-sided limits, special trigonometric limits, differentiability, derivatives of trigonometric functions and their inverses, derivatives of general inverse functions, logarithmic and implicit differentiation, related rates, L'Hopital's rule, intermediate values theorem, Rolle's theorem, mean values theorem, Newton's method, and linearization. 4 lecture hours plus 1 recitation session each week. Normally offered in fall.

MATH-165 Calculus I

Prerequisites:
MATH-121 with a minimum grade of C, MATH-075, or MATH level 5

Credits:
4.00

Description:
Functions, limits and continuity, squeeze theorem, limits at infinity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; derivatives of other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); applications of the derivative (implicit differentiation, related rates, optimization, differentials, curve sketching, L'Hopital's rule); anti-derivatives; indefinite integrals; Fundamental Theorem; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

MATH-166 Calculus II

Prerequisites:
MATH-164 or MATH-165 with a minimum grade of C
Credits:
4.00

Description:
Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (substitution, by parts, trig integrals, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); improper integrals; infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series (computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

Social, Cultural, & Global Perspectives: 1 course, 3-4 credits Archive 2018-2019

Courses that fulfill the Creativity and Innovation, Humanities/History, Language, Literature, Quantitative Reasoning, Seminar for Freshmen, Social Science, or VPATH requirements may double count to fulfill the Social, Cultural, and Global Perspectives (SCGP) requirement.

Choose one SCGP course from those listed below:

- **ADPR-217 Gay and Lesbian Studies**
  Credits:
  4.00
  Description:
  Examines the portrayal of homosexuality in political, social, and cultural discourse. Analyzes the role of media and symbolic construction in the shaping of public values, opinions, and social movements.

- **ADPR-219 Rhetoric of Protest and Reform**
**Credits:**  
4.00

**Description:**  
Examines the persuasive strategies of social reform movements with special emphasis on the civil rights', women's rights, and gay rights movements in the United States.

---

- **ARH-203 Arts of Asia**
  
  **Credits:**  
  4.00

  **Description:**  
  Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

---

- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**
  
  **Credits:**  
  4.00

  **Description:**  
  Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

---

- **ARH-321 Women, Art and Society**
  
  **Credits:**  
  4.00

  **Description:**  
  Surveys women artists from the sixteenth century to the present and examines new direction in art-historical scholarship developed by feminist art historians during recent decades.

<tr>
<td>AS-100</td>
<td>Introduction to Asian Studies: Culture, People, Ideas</td>
<td>4.00</td>
<td></td>
<td><strong>Description:</strong> An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.</td>
</tr>
<tr>
<td>AS-500</td>
<td>Asian Studies Internship</td>
<td>4.00</td>
<td></td>
<td><strong>Description:</strong> Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)</td>
</tr>
<tr>
<td>BLE-325</td>
<td>Global Business Ethics</td>
<td>3.00</td>
<td>BLE-215, PHIL-119, PHIL-120, PHIL-123 or PHIL-127</td>
<td><strong>Description:</strong> Surveys business ethics as they transcend the diverse perspectives of global business. Explores current global ethics standards and values, ethical challenges, controversies, convergence and trends. Students explore famous global business cases through films, websites and independent research. Emphasizes identification of ethical dilemmas and their resolution in a global context.</td>

and resolution of global business ethical issues within the context of ethical decision-making and sustainability. Analyzes corporate social responsibility; hence, transforming global business ethics through business.

---

**CI-204 Prague: Castles to Barbwire**

**Prerequisites:**
At least 24 credits earned.

**Credits:**
3.00

**Description:**
Prague offers students a more recent view into history and will serve as a backdrop to learning "Design Thinking." The curriculum will use Czech and Central European cultural features as the inspiration for learning the creative process, skills that can be applied broadly and globally across disciplines. WWII and its fall to Communism left the Czech Republic undamaged. Artists played a vital part in the country's rise to a Republic during the Velvet Revolution. These dissidents, including writers, actors, artists and musicians were innovators who were the catalyst for change. One could say that creative minds changed this country. This course is designed to demystify the creative process by introducing the creative practice as a disciplined approach to problem solving and innovation requiring research. This one-month study abroad experience will offer a more worldly insight to the significance of developing skills where divergent thinking and risk taking are one of many key tools in learning to generate new ideas. Travel fee covers accommodations, transfers, some meals and cultural visits. Airfare and tuition not included.

---

**CJN-216 Intercultural Communication**

**Credits:**
4.00

**Description:**
An examination of communication variations and cultural viewpoints and their impact on cross-cultural communication. A special emphasis is placed on rituals and message patterns in non-Western cultures.
- **CJN-225 World Cinema**
  **Credits:**
  4.00

  **Description:**
  An introductory course in film studies with a focus on foreign films. Movies studied include masterpieces of cinema from Europe, Asia, the Middle East, and other nations (Films have subtitles).

- **CJN-281 Asian Popular Culture**
  **Credits:**
  4.00

  **Description:**
  Students critically analyze Asian popular culture since the 1980s using a cultural ethnographic approach. Students apply the lenses of gender, identity, globalization, and business strategies to examine pop phenomena such as Korean Wave, Cool Japan, and Cantonese popular music.

- **CJN-293 Hong Kong Cinema**
  **Credits:**
  4.00

  **Description:**
  By examining the film texts of Hong Kong auteurs such as John Woo, Wong Kar-wai, Tsui Hark, Andrew Lau, and Alan Mak, the course examines issues such as film genres, colonization/decolonization, transnational political economy, the Greater Chinese media market, and the diaspora.

- **CJN-301 Documentary Film and the Image of Conflict in the Middle East**
  **Credits:**
  4.00

  **Description:**
The course focus is on some of the divisions and conflicts within Israeli society. Students analyze and compare mainstream media discourse to alternative representations in documentary film. Analysis also covers media representation of the Israeli-Palestinian conflict.

- **CJN-385 Globalization of Media and Telecommunications**
  **Credits:** 4.00
  **Description:** A critique of the circulation of media goods and ideologies from both a cultural and political/economic perspective. Topics include global Hollywood, the images of Muslim women in transnational media, the information society, and global social movements.

- **EC-141 Development Economics**
  **Credits:** 4.00
  **Description:** Why do so many countries remain so poor? Why have some (e.g. the Asian "tigers") grown so rapidly? Why have most of the countries of Eastern Europe and the Former Soviet Union been slow to ignite economic growth? These questions are addressed by looking at domestic factors (government policies, resource endowments) as well as the international environment (mobile investors, international financial institutions). Asks what economic choices these countries face now. Normally offered yearly. Cultural Diversity B

- **EC-151 Economic & Human Geography**
  **Credits:** 4.00
  **Description:** The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections,
and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

---

**EDUC-310 Culturally Responsive Education**

**Credits:**

4.00

**Description:**

The relationship between cultural diversity and schooling is explored by examining impediments to academic achievement and advancement by minority students, non-native English speaking students, and other under-represented groups. Topics include: standardized testing, identification of inequities, legal and ethical responsibilities of teachers, and promoting equity. Ten pre-practicum observation hours required for teacher candidates.

---

**EDUC-315 Strategies for Working With English Learners**

**Credits:**

4.00

**Description:**

This course examines the specific needs and challenges of the various language and cultural groups in schools. Topics include: theories of 1st and 2nd language acquisition, strategies for teaching academic content, modifying instruction in the mainstream classroom, creating classroom cultures that invite all students into learning, the role of advocacy and professional collaboration in ESL, and analysis of policies related to assessment and placement of English Language Learners.

---

**ENG-123 Great Books of the World I**

**Credits:**

4.00

**Description:**
 Literary masterpieces from ancient times to the Renaissance, including: Homer’s Odyssey, Sophocles’ Oedipus, Virgil’s Aeneid, selections from the Hebrew Bible and the Gospels, and Dante’s Divine Comedy. List may vary at the discretion of the instructor.

- ENG-124 Great Books of the World II

**Credits:**

4.00

**Description:**

This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptomist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

- ENG-135 World Literature in English

**Credits:**

4.00

**Description:**

A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

- ENG-216 World Literature in English

**Prerequisites:**

WRI-102 or WRI-103

**Credits:**

4.00
**Description:**
A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester. Cultural Diversity B

**ENG-362 Asian-American Literature**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

**FR-205 The Francophone World**

**Prerequisites:**
FR 202 or Instructor’s consent

**Credits:**
4.00

**Description:**
Explores the francophone world through the study of short stories, print media, and film, by engaging with the rich textured and diverse francophone literary canon. Teaches advance notions of French grammar, write compositions, and the art of conversation related to cultural themes.

**FR-216 Masterpieces of French and Francophone Literature in English Translation**

**Credits:**
4.00
Description:
Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

- **GVT-115 Evolution of the Global System**

**Credits:**
4.00

**Description:**
Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.

- **GVT-208 Politics / Religion**

**Credits:**
4.00

**Description:**
This course explores the relationship between politics & religion in the United States. How and why does religion influence politics in the U.S? What does freedom of religion mean in the U.S.? Why do some groups today erroneously claim that the U.S. was founded as a "Christian nation"? This course also examines what major world religions say about the status and responsibilities of the state and the roles that minority religious groups (Buddhism, Islam, etc.) play in U.S. politics.

- **GVT-281 Intro to Comparative Politics**

**Prerequisites:**
GVT 110, GVT 115, and GVT 120 or consent of instructor; Sophomore status or higher

Credits:
4.00

Description:
Introduces various approaches of comparative politics, such as institutionalism, structuralism, political culture, corporatism, state-society relationship, political economy, etc. Applies the different approaches to explain how various factors affect government institutions, sociopolitical and economic development in different societies. An effort is made to include countries from all regions of the world. Normally offered every semester.

— GVT-359 Hockey, International Development & Politics

Credits:
4.00

Description:
This class examines the way in which national identity, global and regional economics and international development intersect. It uses the professionalization of the sport of hockey and its subsequent spread around the globe as its case. It will look at the rise of the pro game, the way in which it shapes national identity in the Canadian case, the way in which the pro business model has changed in response to broad socio-economic changes in North America and geo-political shifts around the globe, especially in Eastern Europe and the Former Soviet Union.

— GVT-467 Comparative Social Movements

Prerequisites:
Junior status

Credits:
4.00

Description:
How do we explain the appearance or absence of social movements? What social or individual factors explain their development and decline? Who joins social movements? Who does not? Why? What ideas or ideals animate those who do
participate? What is it like to be part of a social movement? What effect do they or have they had on politics, power and efforts at social change? These are some of the questions that have traditionally shaped debates over social movements, both domestically and internationally. They will form the analytical core of the work in this course. By critically evaluating several competing schools of thought in social movement theory and history we will attempt to highlight the social forces that have, at varying points in times, facilitated, maintained, as well as blocked the development of social movements in the US and beyond.

- **HST-100 Introduction to Asian Studies: Culture, People, Ideas**
  **Credits:** 4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, the Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **HST-103 Cultures and Social Transformations in Asia**
  **Credits:** 4.00

  **Description:**
  Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

- **HST-247 History of Modern Middle East**
  **Credits:** 4.00
Description:
Explores the broad historical forces, conflicts and major events that have shaped the contemporary nations of the modern Middle East. Topic include: the emergence of the modern Middle East from the empires of the sixteenth and seventeenth centuries; the age of colonialism; the rise of nationalism; socialism, capitalism; the impact of Israeli and Palestinian conflict on the region; oil, the Islamic Revolution in Iran and the rise of Islamic fundamentalist movements; U.S. policy; and Saddam Hussein's Iraq.

- HST-250 A History of Martial Arts in Movies
Credits:
4.00

Description:
Outlines the history of Chinese martial arts in five movies, highlighting Chinese views of violence, personal loyalty, government, and justice.

- HST-251 Modern East Asia
Credits:
4.00

Description:
China, Japan, and Korea - East Asia's critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

- HST-252 The Rise of China: Through Films, Media, and History
Credits:
4.00

Description:
Discusses the rise of China as the world's largest economy and its impact on our life through films, media, and history.
- **HST-263 Comparative Race Relations**

  **Credits:**
  4.00

  **Description:**
  Compares and analyzes the history of race and politics in South Africa and the United States from the 17th century to the present. Examines how race as a social and ideological construct influenced and informed political conflicts over land, labor, and social relations in the two countries including slavery, segregation, apartheid, and the struggle to create racial democracies.

- **HST-268 History of the Mediterranean**

  **Credits:**
  4.00

  **Description:**
  Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

- **HST-274 Women in 19th-Century Europe**

  **Credits:**
  4.00

  **Description:**
  Explores the condition of European women from 1800 to 1914. Readings focus primarily on women's experiences in France and Great Britain. Topics include: the effects of industrialization on the lives of working-class women; working and middle-class women's negotiation of marriage, work, and family life; the rise of feminism, women's greater participation in the public sphere, and conservative reaction to these changes in women's place in society; women and crime; Victorian ideas about female sexuality; the politics of class and gender in nineteenth-century European society.

- **HST-275 Women in 20th-Century Europe**
### Credits:
4.00

### Description:
Examines the changing place of women in European society since 1900. Topics include: women's suffrage and the political advances of the 1920s and 1930s; the revolution in sexual mores, birth control, and the rise of companionate marriage; women and the consumer economy; the anti-woman policies of Fascist Italy and Germany under National Socialism; liberation of women and retrenchment in the Soviet Union; World War II; feminism, sexual liberation, and women's political engagement since the 1960s; and, throughout the twentieth century, women's continuing negotiation of work and family responsibilities.

---

- **HST-321 History of Islam**

  **Credits:**
  4.00

  **Description:**
  Presents a coherent account of the origin and history of Islam since its foundation in Arabia in the seventh century A.D. to the present. Analyzes the terms, events, characteristics, developments, movements, and institutions that have been part of the shaping of Islam. Ideological challenges and impact of Islam in the world today from both spiritual and political perspectives are examined.

---

- **HST-371 U.S. Women's History Colonial to 1865**

  **Credits:**
  4.00

  **Description:**
  Traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism, legal status, labor activism and popular culture. With attention to ethnicity, race, class, age, region of residence, disability and sexual orientation, the course focuses primarily on the everyday lives of ordinary women.
- **HST-484 History of the Emotions**

**Credits:**
4.00

**Description:**
Explores ideas about emotional life from the fields of history, anthropology, sociology, and psychology as well as the evolution of emotion rules and prescriptions, focusing on western Europe and the United States since 1700. In the eighteenth century, emotions were seen as a positive influence on politics and public life, especially during the French Revolution. After the fall of Robespierre, the emotions were banished to the private sphere - so we will read both primary sources and recent scholarship on 19th- and 20th- century ideas about masculinity and femininity, romantic love and marriage, childrearing, and about what parents and children are supposed feel toward each other, how ideas about these subjects have changed over time, and whether our feelings change with them.

- **MUH-223 World Music**

**Credits:**
4.00

**Description:**
Covers topics in folk, traditional, and modern music of Africa, the Middle East, Asia, and Europe in the context of the cultures and lives of the indigenous peoples of those regions; examines how music interacts with the issues of race, gender, class, religion, politics, and social movements. Normally offered every other year.

- **P.AD-201 Social Change**

**Credits:**
3.00

**Description:**
This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women's movement, environmentalism, and the gay and lesbian movement.

</table>
### Description:
Examines the political, social, and ecological problems facing us as a global community. Having its roots in feminist theory and deep-ecology, eco-feminism provides a critical framework for ecological responsibility and accountability. Writings from eco-feminist thinkers and environmental activists around the world will be used to highlight the philosophical and political conflicts and challenges, including globalization and loss of biodiversity, global warming, international human rights, the relationship of gender and nature, and modes of redress for eco-justice and sustainable development.

**PHIL-261 Eastern Philosophy**

**Credits:**

4.00

**Description:**
The exposition and critical evaluation of Hinduism, Buddhism, Confucianism, Taoism, and Islam. Special attention is given to foundation principles as well as to the similarities and differences of each of these philosophies to basic ideas in Western philosophy. 1 term - 4 credits. Normally offered alternate years. C b

---

**PHIL-262 Buddhism**

**Credits:**

4.00

**Description:**
An historical survey of Buddhist philosophy. We will explore Buddhist origins, central teachings, devotional and meditational practices, ritual and institutions as developed from classical to modern times. Special attention given to the philosophical diversity of the Buddhist world view. 1 term - 4 credits. Normally offered alternate years. C b
4.00

Description:
An exploration into the various dimensions and ideologies concerning the role of the feminine in relation to the Divine. Belief systems, myths and archetypes from ancient Goddess worship to 20th century feminist theology will be examined in terms of the philosophical content and psychological consequences. Special emphasis will be placed on feminist metaphysical structures for understanding consciousness and Reality. Classes will be conducted by means of lectures, primary and secondary texts and class discussions. Normally offered alternate years.
Cultural Diversity A

- PHIL-267 Chinese Philosophy

Credits:
4.00

Description:
A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course then considers Zen Buddhism, which is called Ch'an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.

- PSYCH-243 Organizational Psychology

Prerequisites:
Take PSYCH-114;

Credits:
4.00

Description:
Explores the application of psychological theories and principles to organizations and the workplace with attention to the role of culture and context. Topics includes job analysis, recruitment, selection, evaluation, training, retention, and termination. Employee morale, well-being, stress, and hardiness are considered.
- **PSYCH-247 Asian Perspectives on Health and Work**
  
  **Credits:**
  4.00
  
  **Description:**
  Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants.

- **RS-111 Introduction to World Religions: Western Traditions**
  
  **Credits:**
  4.00
  
  **Description:**
  This course will explore the comparative history and structure of Western religious traditions, broadly understood, and their impact on other world religions, while attempting to recognize the similarities and the differences among them. Traditions to be studied include Greek and Roman religion, the monotheistic faiths (Judaism, Christianity, and Islam, as well as Zoroastrianism, Sikhism and Bahaiism). We will also explore the impact of the Western religions on indigenous traditions, such as African religion, Native American religion, and Pacific Island religion. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. 1 term - 4 credits. Normally offered every year.

- **RS-112 Introduction to World Religions: Eastern Traditions**
  
  **Credits:**
  4.00
  
  **Description:**
This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting to recognize the similarities and the differences among them. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. Normally offered every year. Cultural Diversity B

SIB-550 Global Travel Seminar
Prerequisites:
Please email Hillary Sabbagh at hsabbagh@suffolk.edu to register for a travel seminar.

Credits:
3.00

Description:
An in-depth analysis of timely special issues in international business. Specific topics are announced when the course is scheduled.

SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream
Credits:
4.00

Description:
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.
- **SF-190 Asia in America Fiction and Fact**

  **Credits:**
  4.00

  **Description:**
  With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

- **SF-1145 Emergence of Southeast Asia**

  **Credits:**
  4.00

  **Description:**
  Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SOC-218 Crime and Law in Indian Country**

  **Credits:**
  4.00

  **Description:**
What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.

**SOC-227 Race in American Society**

**Credits:**

4.00

**Description:**
Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

**SOC-228 Cultural, Global and Social Perspectives**

**Credits:**

4.00

**Description:**
Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.
− SOC-275 Women and Crime

Credits: 4.00

Description:
This course examines the complex relationships between women and crime today. This focus will include women as criminal offenders; women as victims of crime; and women as both offenders and victims. Course materials draw from recent feminist scholarship on these issues in the social sciences. Topics include the causes of women's crime women, drugs, and crime; child abuse and trauma; prostitution and sex trafficking; race, gender and victimization; and feminist social movements against violence. Crimes of violence against women are a central focus in the course.

− SOC-329 Sociology of Globalization

Prerequisites:
Prerequisite: SOC 113 or SOC 116.

Credits: 4.00

Description:
Globalization is shrinking the world. How and why did this happen? This course will explore global change and the global processes which effect key social institutions: culture, the economy and politics. Students will study the processes of globalization and its impact on our lives and people around the globe.

− SOC-341 International Drug Control Policy

Credits: 4.00

Description:
Relying on a simplistic demand or supply explanation of why Americans use/abuse drugs obscures the reality of America’s drug problem, is ineffective as a guide to public policy and has unforeseen, often negative consequences. Drug use is a complex and multi-faceted issue. There are no easy answers. To comprehend the complexity of America's drug problem one needs an understanding of the
geography, history, religion, law, economics and international politics of the Middle and Far East, Eastern Europe, Africa, Mexico, and Central and South America. This class will provide this basic understanding without losing sight that the problem we seek to remedy is our own.

SOC-354 Death and Dying

Credits:
4.00

Description:
An examination of changing definitions of life and death, social factors affecting causes and rates of death, care of the dying and their families, institutionalization, the funeral industry, suicide, crisis intervention, and the impact of technology on the dying process.

SOC-357 Global Health and Healing

Credits:
4.00

Description:
An examination of how different cultures understand health and illness. Healing approaches from Asia, Africa and the Americas will be explored.

SPAN-202 Intermediate Spanish II

Prerequisites:
SPAN 201 or Instructor’s consent.

Credits:
4.00

Description:
Continues skills development from 201. Students read a collection of short stories, write compositions, develop cultural insights through comparative and contrastive assignments, and practice listening and speaking skills in weekly conversation sessions.
SPAN-290 Advanced Composition & Conversation

**Prerequisites:**
Prerequisite: Spanish 202, 203 or 250 or Instructor’s consent

**Credits:**
4.00

**Description:**
Develops written and oral skills in various contexts and registers. Emphasis on strengthening written skills and learning to speak clearly and persuasively in Spanish. Short texts and audio-visual materials provide the basis for classroom activities which include regularly assigned essays, group discussions and debates.

SPAN-300 Intro to Cultural Texts

**Prerequisites:**
Spanish 202, 203, 250 or Instructor’s consent.

**Credits:**
4.00

**Description:**
Explores a selection of Peninsular and Latin American cultural materials. Primarily examines texts from different literary genres (narrative, drama, essay, and poetry). Develops critical skills required in more advanced Spanish courses, through close readings and textual analysis. Activities include regularly assigned essays, group discussions, and short scene work.

SPAN-301 Spanish Culture and Civilization

**Prerequisites:**
Spanish 202, 203 or 250. Spanish 290 or 300 are strongly recommended

**Credits:**
4.00

**Description:**
Examines the civilization and culture of Spain highlighting its historical development and cultural manifestations from pre-historic times to the nineteenth century. Students improve their four skills through activities that include discussions, oral presentations, and writing assignments based on reading and films.

- **SPAN-302 Indigenous and Colonial Latin America**

**Prerequisites:**
Spanish 202, 203 or 250 or Instructor's consent. Span 290 or 300 strongly recommended.

**Credits:**
4.00

**Description:**
Introduces students to the complexity Latin America by examining its roots in pre-Columbian America and the impact of Spanish exploration and colonization. Places emphasis on cultural, economic, historical, philosophical, political and religious patterns that define the region. Includes class discussions, oral presentations, and writing assignments based on reading and audio-visual material.

- **SPAN-303 Modern and Contemporary Latin America**

**Prerequisites:**
SPAN 202 or 203 or Instructor's consent. SPAN 290 or 300 strongly recommended.

**Credits:**
4.00

**Description:**
Examines the path taken by Latin American and Caribbean countries to build independent nations out of colonial territories highlighting the 19th, 20th, and 21st centuries, ethnic plurality, and cultural complexity in areas such as politics, religion, sociology, economics, customs, music & film. The cultural contributions of Spanish-speaking minorities in the United States are also addressed. Includes class discussions, oral presentations, and writing assignments based on readings and audio-visual material.
- **SPAN-315 Spanish for the Professions**
  
  **Prerequisites:**
  SPAN 290 or SPAN 300 or Instructor's consent.

  **Credits:**
  4.00

  **Description:**
  Integrates language learning with culture via business context of the Hispanic world. Spanish for banking and finance, marketing and advertising, and international commerce are highlighted. Students increase their cross-cultural understanding and written and oral proficiency in business Spanish through a wide range of assignments.

- **SPAN-390 Introduction to Latin American and Caribbean Literature**
  
  **Prerequisites:**
  SPAN 300; SPAN 302 is strongly recommended

  **Credits:**
  4.00

  **Description:**
  Examines authors from Latin America and the Caribbean in their historical and cultural contexts. Reading and class discussions consider the relationship between the writer and society by covering such topics as colonialism, the oral tradition, modernism and the emergence of new narratives in the twentieth century. The Inca Garcilaso, Sor Juana, Carlos Fuentes, Rigoberta Menchu, and Pablo Neruda are among some writers studied.

- **THETR-260 Broadway Musicals**
  
  **Credits:**
  4.00

  **Description:**
  This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students
will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

---

**THETR-267 Introduction to Theatre: Contemporary American**

**Credits:**

4.00

**Description:**

This course provides a formal introduction to the theories and practices strategically used by American theatre artists after the Second World War. Special emphasis is placed on theatre artists exploring issues of cultural identity including works by GLBT, African-American, Asian-American, and Latin American playwrights. These playwrights may include Tony Kushner, Paula Vogel, Suzan-Lori Parks, Adrienne Kennedy, August Wilson, David Henry Hwang, Philip Kan Gotanda, Eduardo Machado, and Melinda Lopez. The course will also provide an introduction to trends in post-modern theatre practices related to emerging work of the auteur director, solo performers, and interdisciplinary collectives. Satisfies a core requirement for Theatre majors. Normally offered alternate years.

---

**WGS-111 Women, History, and Culture**

**Credits:**

4.00

**Description:**

Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.
- **WGS-H111 Women, History, & Culture**

  **Prerequisites:**
  At least a 3.3 GPA required.

  **Credits:**
  4.00

  **Description:**
  Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-113 Women, Science, and Society**

  **Credits:**
  4.00

  **Description:**
  Explores women's lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the female body and eating disorders; women's health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

- **WGS-115 Introduction to Gender Studies**

  **Credits:**
  4.00
Description:
Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women’s studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

WGS-235 Gender and Sexuality in Visual Culture
Credits: 4.00

Description:
Explores how gender and sexuality are depicted, constructed, and interrogated across a variety of visual mediums, including film, television, and photography. We will pair foundational readings in queer and feminist thought with representations in order to consider how theory and popular culture engage in a constant dialogue. Topics include: the maintenance of norms regarding gender and sexuality; how race, class, and ability complicate our understanding of gender and sexuality; the ways in which sexuality intertwines with other social and political formations; imagining alternative theories and practices in representing gender and sexuality in contemporary media culture. Possible texts include theoretical work by Sigmund Freud, Judith Butler, Rosemarie Garland-Thomson, and David Halperin and media such as The Shape of Water (2017), Blade Runner (1982), Queer Eye for the Straight Guy (2003-2007), and Jess Dugan’s To Survive on This Shore (2018).

WGS-311 Engendering Entertainment: Feminism and Popular Culture
Credits: 4.00

Description:
Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today’s popular culture, including figures such as Lady Gaga and Katy Perry and television
shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

– WGS-315 Feminist Thought

Credits:
4.00

Description:
Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldua, and Judith Butler.

– WGS-325 Global Women's Fiction

Credits:
4.00

Description:
Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.
- **WGS-335 Queer Narratives**  
  **Credits:** 4.00  

**Description:**  
Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's recent memoir, "Redefining Realness", as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

- **WGS-340 Women on Stage**  
  **Credits:** 4.00  

**Description:**  
Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht's alienation effect, and the distinction between performance and the performative.

**Science, Technology, & Engineering (STE): 2 courses and corresponding laboratories where applicable, 8 credits Archive 2018-2019**
Choose two STE courses (and corresponding laboratory where applicable) from those listed below. Courses do not need to be in a sequence. In the case of a course that is a lecture plus a lab, the student must complete both components to earn credit for the STE requirement.

**Biology**

---

**BIO-105 Humans and the Evolutionary Perspective**

**Prerequisites:**
Non Science Majors Only

**Credits:**
4.00

**Description:**
Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

---

**BIO-109 Plants and People**

**Prerequisites:**
Non Science Majors Only.

**Credits:**
4.00

**Description:**
This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also
touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.

- **BIO-111 Introduction to the Cell**

  **Prerequisites:**
  Must take BIO L111 concurrently

  **Credits:**
  3.00

  **Description:**
  Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

- **BIO-L111 Introduction to the Cell Laboratory**

  **Prerequisites:**
  Concurrently with BIO 111

  **Credits:**
  1.00

  **Description:**
  Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

- **BIO-114 Organismal Biology**

  **Prerequisites:**
  Must take BIO L114 concurrently.

  **Credits:**
  3.00
**Description:**
Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

---

- **BIO-L114 Organismal Biology Laboratory**

**Prerequisites:**
Must take BIO 114 concurrently

**Credits:**
1.00

**Description:**
A series of laboratory experiences in evolution, diversity, anatomy and physiology.

---

- **BIO-201 Biology’s Big Questions**

**Prerequisites:**
Non Science Majors Only.

**Credits:**
4.00

**Description:**
This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

---

**Chemistry**

- **CHEM-105 Chemical New Product Development**

**Prerequisites:**
ENT 101
Credits: 4.00

Description:
This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

- **CHEM-106 Biotechnology & Its Applications in Medicine, Agriculture, Law**

Credits: 4.00

Description:
Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, short documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.

- **CHEM-111 General Chemistry I**

Prerequisites:
Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

Credits: 3.00

Description:
Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

---

**CHEM-L111 General Chemistry Laboratory I**

**Prerequisites:**
MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATH-111M1 MATH-111M2 or MATH-111M3. Must be taken concurrently with CHEM 111.

**Credits:**
1.00

**Description:**
Introduces the basic principles of chemistry through "discovery" laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

### Computer Science

---

**CMPSC-F107 Ants, Rumors and Gridlocks**

**Prerequisites:**
Math placement level of 2 or above or any MATH course at the level 100 or above

**Credits:**
4.00

**Description:**
Do viruses and rumors spread like forest fires? How do ants cooperate? Do spoken languages and biological species evolve in a similar way? "Ants, Rumors, and Gridlocks" exposes students to introductory aspects of computational science by addressing and answering these and many other questions. Students use and modify virtual experiments preprogrammed in the NetLogo programming language to investigate these topics and others in Social Sciences, Biology, and Environmental Science. No prior knowledge of computer programming or NetLogo is required.

**Electrical Engineering**

- **ECE-288 Measuring the World**

**Credits:**

4.00

**Description:**

The world is addicted to quantifying the essence of everything, from personal IQ, to the speed of a baseball, to our healthiness, or our chances of winning the lottery. Behind most of these numeric values exists a science of measurement. Some of this is referenced to international standards, such as for length, time, weight, or temperature. Others are more arbitrary and subjective, such as ranking Olympic performance in gymnastics, beauty pageants, or popular responses as found in the game show "Family Feud." A third category includes controversial areas, such as measuring whether a person is lying when interrogated, or using hype rather than reality to market products. Sometimes statistics are used to predict sports outcomes, such as in the annual March Madness NCAA basketball brackets. Finally, in a world subject to fraud and deception, it can be essential to distinguish legitimate from counterfeit items, such as in money, art, collectibles, and historical documents. Don't get hoodwinked! This course examines all of these, starting with how measurements have been made throughout history, along with a full deck of entertaining terms used during the ages. This may help you sort out your weight, whether given in pounds, kilos, or stones. Often these terms will provide insights into how people lived in different eras. We will also look at some of the technologies currently available to provide these measurements, and unravel the complexities of various sensors that are used. As we consider the meaning of "accuracy" we may become less naive about how much confidence to ascribe to the results given us. Hovering around all of these measurements should be the question
of validity - are they meaningful, useful, or misleading? And the impact they have on society - whether they steer behavior more powerfully than one might originally suspect. Each student will also be given an opportunity to become an "expert" in an area of measurement of personal interest. By the end of the course all students should have gained greater insight into how the world around them is quantified, and whether numbers can provide accurate predictors for our future. Algebra helpful. Basic science background helpful. Curiosity essential!

**Engineering Science**

- **ENS-103 Introduction to Engineering**

  **Prerequisites:**
  ENS L103 MUST BE TAKEN CONCURRENTLY.

  **Credits:**
  3.00

  **Description:**
  "This course provides exposure to engineering practice, with particular focus on electrical engineering components such as circuit elements and systems. It seeks to go beyond the mathematics and provide an intuitive appreciation of functional devices. Examples taken from a broad swath of technological history illustrate significant crossroads, decisions, and inventiveness. Emphasis is placed on learning to think as an engineer - assessment of problems, candidate solution tradeoffs, and implementations. Frequent exercises in creative engineering design will be used. Students will be required to design several elementary devices, such as a magnet, a capacitor, a timing device, and a motor, which they will enter in a competition for overall strength, compactness, accuracy, or speed. Sometimes assignments relate to ""survival on an island"" concerns, such as communication or drinking water. Students also learn about reverse engineering by selecting, building, troubleshooting, and presenting an electronic kit of their choice. A term paper determining the engineering behind a topic of their choice will also be written and presented. On occasion (see ENS L103) there will be team competitions between various smaller groups in the class."
**Prerequisites:**
Must be taken Concurrently w/ ENS-103

**Credits:**
1.00

**Description:**
The Lab is designed to provide opportunities to gain familiarity with engineering tools. Students will be introduced to parts (e.g. learn the resistor color code), test equipment (multimeters, prototyping trainers, signal generators, and oscilloscopes), and construction techniques (wiring, soldering, troubleshooting). Although it varies from year to year, Class Projects can be built during the Lab sessions. In the past these have included a 25 Watt electric generator, various door lock systems (both mechanical and electronic), and an AM transmitter and receiver (all projects made from scratch). It is likely that 2010-2011 may introduce some robotic creations for a competition. Electronic kits and motors can also be built and serviced in the Lab. There is an adjoining machine shop, which can be utilized (with supervision), for fabricating items. Individual creativity is encouraged, and informal problem solving sessions occasionally occupy lab time. However, the lab is accessible outside of the traditional scheduled time.

---

**Environmental Science**

- **UES-107 Introduction to Drones**

**Prerequisites:**
UES-L107 must be taken concurrently.

**Credits:**
3.00

**Description:**
Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities...
Inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration’s Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

UES-L107 Introduction to Drones Lab
Prerequisites:
UES-107 must be taken concurrently.

Credits:
1.00

Description:
Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration’s Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

UES-111 Environmental Science
Prerequisites:
Take UES-L111 concurrently

Credits:
### Description:
Applies the fundamentals of science to environmental issues. Topics include population dynamics and resources, environmental degradation, ecosystems, geologic processes, deforestation, biodiversity, climate change, air, soil, and water resource management, and pollution and risks to health.

</tbody>
</table>
**Credits:**
1.00

**Description:**
Provides hands-on work with pigments, dyes, and other art materials using the basic principles of science and technology. Students will conduct laboratory experiments that produce art objects and other consumer products. Instruction in safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables, graphs, and graphics. Practice in synthesizing compounds like paints and finishes and in evaluating methods of art conservation.

UES-225 Geographical Information Science

**Prerequisites:**
Take UES-L225 concurrently

**Credits:**
3.00

**Description:**
Provides the fundamentals of geographic information science (GIS) including the history of automated mapping. A review of the necessary hardware and software elements used in GIS is presented. Hands-on exercises with computerized mapping software are required.

UES-L225 Geographic Information Science Lab

**Prerequisites:**
Take UES-225 concurrently

**Credits:**
1.00

**Description:**
Required companion computer laboratory to be taken concurrently with UES 225.

UES-270 SL-Understanding Wetlands Through Citizen Science
Credits:
4.00

Description:
In this course students meet community needs by engaging in service-learning outside the classroom. Develops students’ awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps. The beginning of the semester is devoted to understanding of how these vital ecosystems function with topics including wetland hydrology, biogeochemistry, management, and restoration. The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner.

UES-H270 Honors SL Understanding Wetlands Through Citizen Science

Prerequisites:
Honors student or at least 3.3 GPA

Credits:
4.00

Description:
In this course students meet community needs by engaging in service-learning outside the classroom. Students’ awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps will be developed through exploration of these vital ecosystems (topics include wetland biology, management, and restoration). The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner where students will be going into the field three times over the course of the semester via pre-arranged private transportation.

Forensic Science

FS-103 Introduction to Forensic Science

Prerequisites:
FS-L103 concurrently

Credits:
3.00

Description:
Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall

- FS-L103 Introduction to Forensic Science Lab

Prerequisites:
FS-103 concurrently

Credits:
1.00

Description:
Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall

Neuroscience

- NEUR-101 Intro to Neuroscience

Credits:
4.00

Description:
Introduces the field of neuroscience, the study of the organization and function of the nervous system of humans and other animals. Topics include the neuron and neural transmission, the overall function and organization of the nervous system, the development of the brain, neural plasticity, sleep, memory and other higher cognitive functions.
Physics

- PHYS-111 College Physics I
  Prerequisites:
  Take MATH-121 or MATH-134 or MATH-165 or permission of Physics department chair; PHYS-L111 taken concurrently

  Credits:
  3.00

  Description:
  Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.

- PHYS-L111 College Physics Lab I
  Prerequisites:
  PHYS 111 concurrently

  Credits:
  1.00

  Description:
  Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks and formal reports required.

- PHYS-151 University Physics I
  Prerequisites:
  MATH-121 or higher (previously or concurrently) and PHYS L151 concurrently
Credits: 3.00

Description:
PHYS 151 is the first of three courses (PHYS 151, 152, 153) that comprise the calculus based introductory physics sequence at Suffolk University intended for students majoring in the physical sciences, engineering and mathematics. This course aims to teach basic techniques in physics that fall under the topic of classical mechanics and their application in understanding the natural world. Specific topics include the study of vectors, Newton's laws, rotations, rigid body statics and dynamics, fluid mechanics, simple harmonic motion, mechanical waves, sound and hearing. The student will learn how to analyze physical situations by using simple models, and also how to solve those models and derive useful conclusions from them. This course will show students how experimental results and mathematical representations are combined to create testable scientific theories, and how the complexities of most real-life physical situations can be reduced to simple problems by identifying the essential physical features and ignoring the rest. The student will learn to distinguish the scientific approach to physical situations from other ways of looking at them, for example, artistic, humanistic, and business.

- PHYS-L151 University Physics Lab I

Prerequisites:
MATH 121 or higher (previously or concurrently) PHYS 151 concurrently

Credits: 1.00

Description:
The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton's laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

- PHYS-152 University Physics II

Prerequisites:
PHYS-151 and PHYS-L151. Must be taken concurrently with PHYS-L152.
Credits: 3.00

Description: This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss' law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday's law and AC circuits are discussed. This is followed by Maxwell's equations, electromagnetic waves, and properties of light.

— PHYS-L152 University Physics Lab II

Prerequisites: PHYS 151 and L151 and PHYS 152 must be taken concurrently

Credits: 1.00

Description: The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday's law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

— PHYS-153 University Physics III

Prerequisites: MATH-121, MATH-164, or MATH-165; PHYS-151; PHYS-L153 concurrently

Credits: 3.00

Description: This calculus-based course is the introduction of the topics of modern physics. It begins with special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom. Then Schrodinger's equation is
introduced with use of wave functions, particle box, barrier penetration, quantum mechanical tunneling, the Pauli Exclusion principle, the development of the periodic table, and the X-ray spectra. Development of solid state physics with bonding in molecules, band theory of solids and semiconductor behavior. The final topics cover nuclear physics, radioactivity, half-life, nuclear fission and fusion, medical uses of radiation, elementary particle physics and introduction to astrophysics.

- **SCI-L103 Environmental Science Lab**

**Prerequisites:**
Must take SCI-103 concurrently

**Credits:**
1.00

**Description:**
Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.

- **SCI-108 Introduction to Cancer Care**

**Credits:**
4.00

**Description:**
Introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants.

- **SCI-109 SL-Introduction to Community Cancer Care**

**Credits:**
4.00

**Description:**
Students meet community needs by engaging in service-learning outside the classroom. This course introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants. Service-learning is a pedagogy
integrating academically relevant service activities that address human and community needs into a course. Students connect knowledge and theory to practice by combining service with reflection in a structured learning environment. Students will engage in service-learning with an underserved community partner in regards to cancer by working directly with cancer patients or by assisting on a project that supports cancer patients.

MATH-128 or higher and SCI-L112 concurrently

**Credits:**
3.00

**Description:**
Astronomy of the cosmos; sun, stars, interstellar materials, galaxies, pulsars, quasars, black holes; nature of time relativity, cosmology. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations. For non-science majors.

---

**SCI-L112 Structure of the Universe Lab**

**Prerequisites:**
Take SCI-112 concurrently

**Credits:**
1.00

**Description:**
Laboratory experiments and exercises to illustrate the principles discussed in Science 112. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations.

---

**SCI-113 A Habitable Earth Within the Solar System**

**Credits:**
4.00

**Description:**
This course introduces non-science majors to concepts that are central to making our planet habitable. It presents Earth in context of the solar system with a broad view of global climate change and energy resources in a quest to better understand the workings our planet. This course on Earth and Planetary Science is suitable for students who may have taken their last science and math course several years ago, or are just curious about knowing facts on major issues that pertain to the future of our planet. Together with a reading component, this course aims to give students a
flavor of how researchers think, investigate and develop conclusions that directly affect our political and economic future. Topics covered in this course range from the solar system to the study of search for other habitable Earth-like planets, search for extraterrestrial life, and evolution of life on Earth. Other characteristics of this course are heavy use of audio-visual materials often including computer animations and simulations, in-class experiment demonstration, and intensive use of INTERNET-based resources.

- **SCI-165 Inner Workings of Physics Universe**

  **Credits:**
  4.00

  **Description:**
  About 15 billion years ago, (data indicate) the big bang occurred and the universe was born. With it came physical laws and a spectacular array of consequences that lead to the universe as we know it. This non-lab, 4 credit course explores the inner workings of the physical universe in terms of the scientific inquiry which lead to Newton's laws, an understanding of energy, waves, light, electricity, atomic structure, chemical reactions, nuclear physics, particle physics, relativity, and the big bang theory. During the course, students will learn to make use of modern resources to access scientific and technical literature to research a scientific topic. They will learn to distinguish between science and technology (e.g. quantum mechanics and nanotechnology, the discovery of the Higgs boson and the large hadron collider that made it possible, etc.) and to understand how the science, technology, and engineering disciplines play a crucial role in recognizing and solving problems of society and the world that we share.

- **SCI-171 The Built World: How Humans Engineer Environments**

  **Credits:**
  4.00

  **Description:**
  The most basic needs of humans have not changed - water, food, and shelter - but the means of meeting these needs has. In this course, we will examine how technology-driven societies operate by studying how cities are built and how they function. Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design),
and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.

- **SCI-173 Mapping Our World The Power of Digital Maps**
  
  **Prerequisites:**
  SCI-L173 must be taken concurrently.

  **Credits:**
  3.00

  **Description:**
  Geographic Information Science (GIS) link information (number of fire hydrants on a block) to features on a map (e.g., a point representing street address) that has a designated geographic location (as designated by global coordinates). Unlike paper maps, GIS software allows the production of interactive maps that allows the user to layer data, to indicate spatial patterns, to analyze trends, and to combine different features of the mapped area in novel ways. For example, a business person may wish to use GIS to determine the optimum location of retail outlet (based on the mapped demographics of a neighborhood), while an environmental engineer may use GIS to describe the location of outfalls to see how they correlate to areas of stream pollution. In this course, students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

- **SCI-L173 Mapping Our World Lab**
  
  **Prerequisites:**
  SCI-173 must be taken concurrently.

  **Credits:**
  1.00

  **Description:**
  This laboratory illustrates concepts and methods taught in SCI 173. In this lab students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type
applications is presumed.

- **SCI-181 Science and Life in the 21st Century**

**Credits:** 4.00

**Description:**
No longer offered on Boston campus. This is a four credit, non-lab, science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.

- **SCI-184 Contemporary Science and Innovation**

**Credits:** 4.00

**Description:**
This is a 4 credit, project based science course that examines the central scientific problems confronting the 21st century. The course consists of lectures, class discussions, field trips, and in-class hands-on activities designed to familiarize the student with different concepts of the lectures. The current focus is on sustainable energy production. A final team project related to the course topics will be given. This is the version of SCI 183 without a separate lab component. Students who have taken SCI 183, L183 are not allowed to take this course.

- **SCI-201 Physics for Future Presidents**

**Credits:** 4.00

**Description:**
This course presents a topical introduction to the key principles and concepts of physics in the context of the world events and natural phenomena that confront world leaders and that require informed decisions and responses. Energy, health, counter-terrorism, remote sensing, space programs, nuclear proliferation, and a
host of other modern challenges have technological and scientific dimensions, the understanding of which is essential to avoiding disastrous policy decisions. This course considers the application of physics to these societal challenges. The material is covered at a level and pace that a future world leader should be able to handle; the emphasis is on the development of physical reasoning skills, and not on detailed, mathematical problem solving.

---

**SCI-210 Earth and Planetary Crystals**

**Prerequisites:**
Take SCI-L210 concurrently

**Credits:**
3.00

**Description:**
This course will provide undergraduate students of various disciplines with an introduction to gems and crystals using interactive, evidence-based teaching approaches. Crystalline forms of matter are critical to our existence. Using innovative teaching strategies of in-class hands-on demonstration, supplemented with visuals of crystal details, the course provides students insights into the formation, alteration and unique properties that make crystals invaluable. Topics range from the study of proteins and nucleic acids to the interior of planets. The in-class lectures will provide a basic guide that will serve as a platform for individually catered in-depth study. Therefore, the course is open to advanced students as well, who can pick up higher level of information for discussion and class projects.

---

**SCI-L210 Earth and Planetary Crystals Laboratory**

**Prerequisites:**
Take SCI-210 concurrently

**Credits:**
1.00

**Description:**
This course introduces concepts that are central to understanding crystals, gemstones and other natural materials abundant throughout the solar system. It includes an introduction to carbon-based crystals (diamonds, proteins, viruses and...
ices) in context with origins of life, geopolitical significance and their applications. This laboratory-based course is an introduction to modern tools and techniques for crystal analysis with a historical context of some of the greatest discoveries in science (DNA, and other nanomaterials). It presents crystals and gems from their visually appealing point of view to their sometimes-dramatic physical characteristics, with a broad view of their formation, occurrence, physics, chemistry and resources perspective.

Some Science division courses may have Math or Computer Science prerequisites; many have other Science prerequisites.

**Studies in Literature: 1 course, 4 credits Archive 2018-2019**

Choose one Studies in Literature course from those listed below:

- **ENG-113 World Drama I**
  **Credits:**
  4.00

  **Description:**
  Survey of drama and theatre as part of world culture from classical Greece through 18th-century China. Normally offered yearly.

- **ENG-114 World Drama II**
  **Credits:**
  4.00

  **Description:**
  Survey of drama and theatre as part of world culture from the 19th century to the present.
- **ENG-130 Introduction to Literature**
  **Credits:**
  4.00

  **Description:**
  Study of poetry, prose, and drama, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author’s craft and relationship to the reader. Offered every semester.

- **ENG-135 World Literature in English**
  **Credits:**
  4.00

  **Description:**
  A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

- **ENG-141 Studies in British Literature**
  **Credits:**
  4.00

  **Description:**
  Study of poetry, prose, and drama from the British literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author’s craft and relationship to the reader. Offered every semester.

- **ENG-142 Studies in American Literature**
  **Credits:**
  4.00

  **Description:**
Study of poetry, prose, and drama from the American literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author's craft and relationship to the reader. Offered every semester.

- **ENG-151 Introduction to African-American Literature**
  **Credits:** 4.00
  
  **Description:**
  Literature has the capacity to record and interrogate history in an imaginative and artistic context. African-American literature is a rich, varied, and complex body of literature that faces our tainted history directly. The authors we will read in this class examine slavery's long-term psychological and social effects while forging a literary history that is at once a part of and apart from American literary history more generally.

- **ENG-152 Horror Fiction**
  **Credits:** 4.00
  
  **Description:**
  This course focuses on the reading and analysis of horror literature and the ways in which horror reflects and represents personal and cultural anxieties. Readings will include both classic and contemporary authors, for example, Edgar Allan Poe, H.P. Lovecraft, Shirley Jackson, Stephen King, and others. Assignments will include analytical essays as well as creative writing.

- **ENG-153 Literature of War**
  **Credits:** 4.00
  
  **Description:**
  This course will examine a wide range of writers and film makers who have sought to bridge the gap that exists between those who have experienced war and those who have not. Some stories we will examine are told from an American perspective;
some are told from the perspective of soldiers who fought against Americans; and some are told from those who experienced life under U.S. military occupation.

- **ENG-154 Bob Dylan and the Beat Generation**
  **Credits:** 4.00

  **Description:**
  A study of literary works by the so-called "Beat Generation," the American literary underworld of the late 1950s and 1960s, including major works by the three central figures (Ginsburg, Kerouac, Burroughs) and less central figures (Corso, Snyder, DiPrima, Jones/Baraka) as well as the influence of the Beats on the work of Bob Dylan, the only musician to win the Nobel Prize in Literature.

- **ENG-155 Young Adult Literature**
  **Credits:** 4.00

  **Description:**
  Young Adult Literature’s recent explosion in popularity raises important questions about the stories it tells, the values it promotes, and the audiences it seeks. This course approaches the YA phenomenon as one with deep historical roots as well as contemporary cultural relevance. From nineteenth century classics to current series favorites, literary works focused on young people reframe perennially fresh narratives about coming of age, negotiating personal identity, and navigating a complex moral universe. This course also considers YA literature as part of an evolving network of writers, readers, publishers, critics and filmmakers.

- **ENG-157 Poetry and Religion**
  **Credits:** 4.00

  **Description:**
  This course will use close readings to examine poetry as a heightened form of language seeking to make contact with divine sources of faith. We will consider poems that provide examples of the struggle to attain belief, as well as poems that
deny belief. Language as both the grammar of ascent and the locus of descent. The position of human beings in relation to God, or the gods, or the absence of the divine.

- **ENG-158 Nasty Women and Unruly Voices in American Literature**
  **Credits:** 4.00
  **Description:** This course takes students on a tour of witches, "nasty women," and other "unruly tongues" or "bitter spirits" throughout American literary history. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Fulfills the Literature Requirement of the CAS Core Curriculum.

- **ENG-159 The Literature of London**
  **Credits:** 3.00
  **Description:** For more than a thousand years, the city of London has been a cultural center, the home of playwrights and poets, novelists and critics, theaters and libraries. In this class we will read a wide range of literary works in different genres that take the city of London, and the experience of living or writing there, as central themes. The class will emphasize close reading and literary analysis of London texts, and will also explore contextualizing materials from newspaper articles to music and art. Designed to be taken in tandem with an optional one-credit study abroad trip to London, UK.

- **ENG-161 Writing the American West**
  **Credits:** 4.00
  **Description:**
Study of 20th century writing on the American West by American women and men in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes provide the basis for the study of “frontier” or western literature by American authors. Fulfills the Literature Requirement of the CAS Core Curriculum.

Study of major American writing from 1865 through the present. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

---

**ENG-347 20th Century Female Gothic**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
This course focuses on Gothic literature by women writers, from its origins in the 18th century to the present, focusing primarily on 20th century writers. The novels, short stories, and films we will discuss involve haunted houses, secret chambers, madness, and other Gothic tropes. Writers to be studied will include Charlotte Bronte, Daphne du Maurier, Shirley Jackson, Jean Rhys, Angela Carter, and others.

---

**ENG-356 Whitman and Dickinson**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
An investigation of the lives and works of two of nineteenth-century America's greatest and most original poets. Topics will include types of poetic language and formal structure, the work of the poetic imagination in transforming observations of the world into art, and the ways in which poets process the idea of death and the reality of war. Finally, this course examines Whitman and Dickinson's impact on American popular culture as well as on the writings of modern poets and literary critics.

---

- **ENG-358 Women Writing the American West**

**Prerequisites:**
Take WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
Study of 19th and 20th century writing on the American West by American women in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes provide the basis for the study of the gendering of the "frontier" and literature of the West by American women authors.

---

- **ENG-361 Contemporary American Fiction**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
The course will cover major works of American fiction from the period between the end of the American war in Vietnam and the present. The course will emphasize fiction reflecting America's cultural diversity and current trends in fiction.
- **ENG-362** Asian-American Literature
  
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

- **ENG-388** Utopias and Dystopias
  
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  This course follows the spirit of utopian experimentation as it travels through the linguistic patterns and imaginative conditions of brave new worlds in literature. We will consider how utopian thinking allows writers to take creative license with political systems, social relations, gender roles, and racial identities, and to blur dividing lines between nature, technology, and culture as well as between Earth and the cosmos. Our readings will balance such foundational texts as Plato’s Republic and More’s Utopia with revolutionary works from the nineteenth through the twenty-first centuries, and conjure utopian dreams as well as dystopian worlds gone wrong. Selected works of literary criticism and films will also be included.

- **ENG-395** Rhetoric and Memoir
  
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00
### Description:
This course examines the rhetoric of memoirs written primarily by international figures who seek to use personal stories to shape readers’ perspectives on political issues. After a brief introduction to rhetorical theory and to the genre of memoir, this course will examine contemporary memoirs that address such issues as racism, sexism, religious extremism, war, and genocide.

### ENG-410 From Pagan Reason to Christian Revelation

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
A survey of major works of literature and thought crucial to the transformation of pagan models of reason to Christian systems of belief, including works by Plato and Plotinus, St. Augustine and Dante. Of central concern is the changing conception of love, from Eros to Agape. Note: This course is cross-listed with HST 339.

### FR-216 Masterpieces of French and Francophone Literature in English Translation

**Credits:**
4.00

**Description:**
Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

### FR-309 Survey of French Literature I

**Prerequisites:**
FR 202 or Instructors permission

**Credits:**
<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>FR-310 Survey of French Literature II</strong></td>
<td>Analyzes and discusses canonical works of French literature from medieval times to the eighteenth century.</td>
</tr>
<tr>
<td><strong>FR-318 Face in the Mirror: Writing &amp; Reflecting the Self in French</strong></td>
<td>Study, analyze and discuss canonical works of French-language literature from the nineteenth through the twenty-first centuries, as they relate to important events in the art, culture, and history of the Francophone world.</td>
</tr>
<tr>
<td><strong>PHIL-424 Philosophy and Literature: Feodor Dostoevsky and the Great Philosophical Novel</strong></td>
<td>Examines literature in the French language focusing on memoir, essay, and autobiography. Read authors such as, Montaigne, Rousseau, Lamartine, Colette, Duras, Beauvoir, Le, Chamoiseau, Djebar, Conde, Ernaux, Genet, and Satrapi. Develops an appreciation of the differences between autobiography and autofiction. Explores the question of truth and the fallibility of memory.</td>
</tr>
</tbody>
</table>
**Description:**
A study of the nineteenth-century Russian novelist Feodor Dostoevsky and his contribution to world philosophy and literature. Dostoevsky's stories, which weave together philosophical reflections, unique personalities and gripping plots, earned the author numerous superlative titles. Dostoevsky has been praised as a literary genius, a prophetic political thinker, a keen psychologist and an expert on human condition. His work inspired generations of intellectuals, among them prominent European thinkers: Nietzsche, Freud, Heidegger, Sartre, Camus, Hesse and many others. In addition to a detailed study of Dostoevsky's writings the course explores the socio-political, literary, and intellectual contexts in which he developed as a thinker, introducing students to both his opponents and admirers.

**SPAN-426 Latin American Theater and Society**

**Prerequisites:**
SPAN 290 or SPAN 300 or Instructor's consent. Spanish 302 is strongly recommended

**Credits:**
4.00

**Description:**
Introduces students to the most important movements and playwrights of Latin American Theater in the 20th and 21st Centuries. Students examine the history of Latin American Theatre since its inception and become familiar with the most important performing centers.

**WGS-211 Heroines, Hotties & Hubris: Adolescent Girl’s Books**

**Credits:**
4.00

**Description:**
Explores what we can learn from the books that teenage girls read. In addition to a wide array of interesting and complex Young Adult novels targeted to young female readers, students will be exposed to theories of adolescent development, literary criticism, and social theory. Topics include how the dilemmas of girlhood have changed or stayed constant and the urge, so common in books for children and teens, to teach kids how to think and behave.
- **WGS-220 Other Worlds, Other Genders: Women and Science Fiction**
  
  **Credits:**
  4.00

  **Description:**
  Examines through both classic and contemporary science fiction a variety of possibilities for world-reimagining in the realms of gender, sexuality, race, and other forms of difference. Draws on theories of utopian and dystopian discourse, engages with questions of biology and reproduction, and explores colonialism through first-contact and space empire narratives.

- **WGS-325 Global Women's Fiction**
  
  **Credits:**
  4.00

  **Description:**
  Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

- **WGS-340 Women on Stage**
  
  **Credits:**
  4.00

  **Description:**
  Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel,
Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht’s alienation effect, and the distinction between performance and the performative.

### Ethical & Philosophical Inquiry: 1 course, 4 credits

Archive 2018-2019

Choose one Ethics course from those listed below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL-119</td>
<td>Ethics</td>
<td>4.00</td>
<td>A systematic introduction to the major thinkers and their positions on the main issues of ethics, such as: What is morality? What are moral values? How should we live our lives? Are there objective, universal, absolute moral standards? If so, what are they, and what is their basis? 1 term - credits. Normally offered every year.</td>
</tr>
<tr>
<td>PHIL-120</td>
<td>Ethics and Civic Life</td>
<td>4.00</td>
<td>In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.</td>
</tr>
<tr>
<td>PHIL-123</td>
<td>Social Ethics: The Good Life</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
An examination of contemporary Western society, particularly in the United States, in relation to philosophical attempts to define the "good life." Current books that exhibit a philosophical approach towards important contemporary social issues will be discussed, as well as classics in philosophy. Topics may include: civic virtue, consumerism, current events, economic justice, popular culture (film, music, television), religion and secularism, etc. 1 term - 4 credits. Normally offered every year.

PHIL-127 Contemporary Moral Issues
Credits: 4.00

Description:
A critical examination of a number of contemporary moral issues such as: abortion, affirmative action, animal rights, capital punishment, cloning, drug legalization, environmental ethics, euthanasia, genetic engineering, gun control, pornography, same-sex marriage, suicide, war and terrorism, etc. 1 term - 4 credits. Normally offered every year.

Human Behavior and Societies: 1 course, 4 credits
Archive 2018-2019

Choose one Human Behavior and Societies course from those listed below:

Advertising and Public Relations:

ADPR-285 Media and Pop Culture I
Credits: 4.00

Description:
Examines the influence of media on contemporary society from a social science perspective. Television, radio, film, and print formats are discussed in terms of their persuasive impact on mass culture in the U.S.. The emergence and development of
"Rock N Roll" is discussed in unison with the Civil Rights, Student's Rights, and anti-War movements of the period from 1946-1972.

**Communication:**

- **CJN-255 Introduction to Media**
  **Credits:** 4.00
  **Description:**
  An introduction to the role of media in contemporary society, focusing on media's influence on cultural, political, and ideological processes. An examination of the historical contexts within which newspapers, radio, television, and new media technologies develop, and how audiences interact with and influence the use of media.

- **CJN-375 Organizational Communication**
  **Credits:** 4.00
  **Description:**
  Historical development of the theory of organizations, examination of information flow, network analysis, communication overload and underload, corporate culture, superior-subordinate communications, organizational effectiveness, and change processes.

**CUES:**

- **UES-101 Environmental Studies**
  **Credits:** 4.00
  **Description:**
Focuses on the natural environment through the lens of social science and humanities. Students will study texts from those disciplines to acquire a deeper understanding of the values and beliefs that underlie environmental issues. Students will investigate the policy-making processes and institutions through which those issues are decided, and the social inequalities in the distribution of environmental problems. Texts to be studied will range from literature, philosophy, and film to policy statements, impact reports, community advocacy materials, and investigative journalism.

**Economics:**

- **EC-151 Economic & Human Geography**
  
  **Credits:**
  4.00

  **Description:**
  The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

**Government:**

- **GVT-110 Introduction to American Politics**
  
  **Credits:**
  4.00

  **Description:**
An introduction to the American political system and constitutional framework. Focus will be on the interplay of various institutions (the Presidency, Congress and the Judiciary) in creating public policies. Contemporary public issues will be discussed, as will the role of political theory in shaping American democracy. Attention will be given to the role of the news media, public opinion, political ideology, political parties and interest groups in the American system.

- **GVT-115 Evolution of the Global System**

  **Credits:**

  4.00

  **Description:**

  Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies

**Psychology:**

- **PSYCH-114 General Psychology**

  **Credits:**

  4.00

  **Description:**

  Surveys core theoretical concepts and contemporary empirical research from the major sub-fields of psychology: physiology; perception; cognition; learning; emotion; motivation; development; personality; psychopathology; psychotherapy; and social behavior. Offered every semester.
- PSYCH-249 Introduction to Lifespan Development
  
  **Credits:**
  4.00

  **Description:**
  Examines biological, cognitive, social, and emotional development across the lifespan, with attention to the role of culture and context. Explores how various major theories of development can be used to adaptive and maladaptive behaviors and trajectories and considers. Implications for treatment, prevention, and positive development across the lifespan. Normally offered yearly.

---

**Sociology:**

- SOC-113 Introduction to Sociology
  
  **Credits:**
  4.00

  **Description:**
  An introduction to the sociological understanding of human interaction, group process and social structures. Students are introduced to basic concepts, theories and methods of sociological investigation. Majors and minors must pass with a grade of "C" or better.

---

- SOC-116 Social Justice
  
  **Credits:**
  4.00

  **Description:**
  An examination of traditional and contemporary problems associated with major social institutions such as the family, economics, government and education. Social forces related to ethnicity, social class, health and welfare, and urbanization are also included. Alternative remedial measures based on behavioral science theories are discussed. Majors and minors must pass with a grade of "C" or better.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC-221</td>
<td>Environment and Society</td>
<td>4.00</td>
<td>This course will explore our natural environment and human interactions with it. We will connect a critical study of society, power, and inequality to the study of our natural environment and the ways it is altered by human behaviors. We will also consider ways to change our society's relationship with the natural environment to keep our earth clean and safe for human society.</td>
</tr>
<tr>
<td>SOC-223</td>
<td>Families in Contemporary Society</td>
<td>4.00</td>
<td>An exploration of the diversity of contemporary families. Comparisons are made between the cultural myths of the &quot;ideal family&quot; and the lived realities. Challenges confronting contemporary families and their implications for social policy are examined in such areas as work/family conflicts, gay and lesbian families, welfare, family violence.</td>
</tr>
<tr>
<td>SOC-224</td>
<td>Families in Contemporary Society (Spain)</td>
<td>4.00</td>
<td>Spain has experienced major socio-demographic changes since the mid 1970s. These transformations mainly arise from the new role of women in society and, in particular, women's higher levels of education, work experience, and labor market attachment. The changes in women's labor force participation have occurred in conjunction with a progressive postponement of main family events, such as leaving the parental home, forming a partnership and having children, as well as with a reduction in the family size. Spain is, indeed, characterized as having one of the &quot;lowest low fertility levels&quot; within Western industrialized countries, a pattern that is exacerbating the ongoing process of population aging. This picture partly reflects the conflicting relationship that currently exists between women's labor force</td>
</tr>
</tbody>
</table>
participation and the accommodation of family responsibilities: the so-called work/family balance. Ongoing differences among countries have been accounted for by different explanatory factors that involve socio-economic, cultural and social policy dimensions. From a comparative perspective, the course is intended to cover recent debates, controversies, and research on family formation and family dilemmas in contemporary Spain.

- **SOC-227 Race in American Society**

**Credits:**
4.00

**Description:**
Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

**Women's & Gender Studies:**

- **WGS-113 Women, Science, and Society**

**Credits:**
4.00

**Description:**
Explores women's lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the
female body and eating disorders; women's health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

**Social & Intellectual History/Visual & Performing Arts Theory & History: 1 course, 4 credits Archive 2018-2019**

**Social & Intellectual History/Visual & Performing Arts Theory & History: 1 course, 4 credits**

Choose one course from those listed below:

**American Studies:**

- **AMST-101 American History and Culture**

  **Credits:**
  4.00

  **Description:**
  This course offers a basic introduction to American culture and society through the study of American History. The city of Boston and its extraordinary history and institutions will be at the heart of the class and students will frequently visit sites close to the campus. Topics will focus on areas such as the way people from different cultures have understood and misunderstood each other; the evolution of American politics and political institutions; the American Revolution and the founding documents and institutions of the United States; the distinct forms of American religion, American literature and the American economy; slavery and race in American society; the rise of America to world power; the changing role of women; the New Deal and the rise of the modern welfare state; immigration; the development of popular culture; and the meaning of Donald Trump. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-111 Defining America and Americans.
**Credits:**

4.00

**Description:**
Examines artistic, social, and political imaginings of America and Americans. We will read works by American and foreign observers of the United States to ask how Americans define themselves and how others see them. Course assignments will introduce students to themes, perspectives, and methods in the field of American Studies. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-101 American History and Culture.

---

**Art & Design:**

- **ADG-224 History of Graphic Design**

  **Credits:**

  4.00

  **Description:**

  The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various-isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

---

- **ADI-234 History & Theory of Interior Architecture**

  **Prerequisites:**

  Taken concurrently with ADI S201

  **Credits:**

  3.00

  **Description:**
This course introduces students to the important individuals, ideas and issues that have shaped the direction of contemporary interior design practice in the twentieth century, building upon the historical foundation established by the Ideas of Western Art and History of Furniture and Architecture classes. Intermixing lectures and readings with visits to important local buildings, it discusses the influences of culture, technology, fashion and media upon the work and thinking of the first generation of modern designers, as well as emerging social, moral and environmental imperatives that will form the basis of future practice; cultural identity, interdisciplinary collaboration, sustainability and universal design.

### Art History:

- **ARH-101 Art History I**
  **Credits:**
  4.00
  
  **Description:**
  Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

- **ARH-102 Art History II**
  **Credits:**
  4.00
  
  **Description:**
  Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

**Description:**
Discusses and deepens understanding of French and Francophone cinema from its origins in the late nineteenth century to the early twenty-first century. Explores early works from France, by the Lumiere Brothers and Georges Melies as well as contemporary films from France, Algeria, Burkina Faso, Canada, Haiti, and Senegal.

---

FR-320 French & Francophone Cinema

**Credits:**
4.00

**Description:**
A survey of French and Francophone cinema from the late 19th century to the early 21st century. We will explore early works from France by the Lumiere brothers and George Melies, as well as contemporary films from France and French-speaking...
countries, such as Algeria, Burkina Faso, Canada, Haiti, Senegal. All papers are written in French, and bi-monthly discussion sessions are conducted in French. Normally offered alternate years. Cultural Diversity B. 4 credits.

### History:

- **HST-101 History of Western Civilization I**  
  **Credits:** 4.00  
  **Description:** Surveys European culture, politics, and society from antiquity to the seventeenth century. Topics include: the Greek, Judaic, and Roman heritage; the rise of Christianity; feudal society in the Middle Ages; Renaissance and Reformation; the Scientific Revolution; and the development of absolutist and constitutional governments.

- **HST-102 History of Western Civilization II**  
  **Credits:** 4.00  
  **Description:** Surveys European culture, politics, and society from the Scientific Revolution to the present. Topics include: the development of absolutist and constitutional governments; the Enlightenment; the French Revolution; Industrialization and urbanization; nationalism and imperialism; World War I, World War II, and the Cold War; the decline of Europe as a world power.

- **HST-103 Cultures and Social Transformations in Asia**  
  **Credits:** 4.00  
  **Description:**
Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

- **HST-121 World History I**

  **Credits:**
  4.00

  **Description:**
  Explores the major themes of human history to 1500. Topics include: hunter-gathering, the migration of humans across the globe, transitions to food production, and the development of complex societies based on agriculture. Major early Eurasian civilizations (China, India, the Middle East, and Europe) are examined (alongside their interactions with Inner Asia and the Arabian Peninsula). So too are Sub-Saharan Africa and the Americas.

- **HST-122 World History II**

  **Credits:**
  4.00

  **Description:**
  Explores the major themes of human history since 1500. Topics include: the outward expansion of Europe, the Scientific Revolution, the Enlightenment, the Age of Revolutions, the Industrial Revolution, the creation of a great-power dominated global system, the two world wars, the Cold War, the Third World, globalization, climate change, and modern social and political movements.

- **HST-149 Empires & Globalization in World History I**

  **Credits:**
  4.00

  **Description:**
This is the first of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include the formation of the medieval trade system, the development of finance and capitalism in the early modern ages, and economic changes prior to the Industrial Revolution. The specific topics may change every year due to new academic developments and publications.

- **HST-150 Empires & Globalization in World History II**
  **Credits:**
  4.00

  **Description:**
  This is the second of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include state-making, wars, and the rivalry among early modern empires, economic development, the Industrial Revolution and the formation of the global trade system. The specific topics may change every year due to new academic developments and publications.

- **HST-181 American Life to the Civil War Era**
  **Credits:**
  4.00

  **Description:**
  Surveys American history from European colonization up through the era of the Civil War. Topics include interactions with Native Americans; slavery; the American Revolution; the founding of a new republic; social and economic developments in the early nineteenth century; expansion; party politics; sectional conflict; the Civil War and Reconstruction.

- **HST-182 American Life Since the Civil War Era**
  **Credits:**
  4.00
**Description:**
Surveys American history from the 1870s to the present. Topics include the new industrial order; farmer and worker protests; progressivism; America's emergence as a world power; the two World Wars; the Great Depression; the New Deal; the Cold War; post-World War II American society; the Civil rights movement; Vietnam; dissent and counterculture in the 1960s; the women's movement; economic, social, and political changes in the late-twentieth century; America's relationship to a globalized world.

</table>

**Description:**
In this course each student will select a topic about Asia that they wish to study. Virtually any topic, to be approved by the professor, is acceptable. The goal will be to write a five to seven page paper about that topic by the end of the course. As a class, we will work together through each step of the process of defining a topic, gathering materials about it, and organizing and reporting the final paper.

**Description:**
Introduces the peoples of Asia and the cultures they have created. Particular attention is paid to the lives of the common people in both historical and contemporary times. By understanding the richness and complexities of daily life in Asia, we will understand the continuities and discontinuities brought on by social, cultural, and economic changes. We will gain an appreciation of our fellow human beings in Asia.

- **HST-268 History of the Mediterranean**
  
  **Credits:**
  4.00

  **Description:**
  Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

- **HST-292 American Foreign Relations Since 1898**
  
  **Credits:**
  4.00

  **Description:**
  Surveys the history of the U.S. as a world power. Examines officials’ motives and methods, as well as influences on policy in the form of social and economic forces, interest groups, and foreign challenges. Explores public debates over America's role (as well as debates among historians and international relations theorists), and discusses the domestic and foreign impact of America's world role. Major events addressed include the two world wars, the Cold War, Vietnam, and the U.S. recent history of involvement in the Middle East.

- **HST-312 Renaissance and Reformation Europe**
  
  **Credits:**
  4.00

  **Description:**
Explores the intellectual and cultural developments of the Renaissance, and of the Protestant and Catholic Reformation in their social and political contexts. Topics include: Humanism, the rise of the city-state; art, and science; changes in family and social life; the causes of the Reformation (intellectual, social, technological); Calvinists, Luthers, and Radical Reformers; Counter-Reformation and its political consequences; the Wars of Religion.

- **HST-313 Cities of Early-Modern Europe**
  
  **Credits:**
  4.00

  **Description:**
  Explores the political, economic, social and cultural development of the urban experience in Europe in the 14-1700s. The history of the most important cities of the continent and Mediterranean, and their common path in business, urbanism, society and imperialism.

- **HST-333 The United States: 1898-1945**
  
  **Credits:**
  4.00

  **Description:**
  Addresses social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also discussed. Topics include: the labor movement, civil rights, woman suffrage, progressivism, the rise of the U.S. as a world power, the First World War, the cultural and social crosscurrents of the nineteen-twenties, Fordism, new developments in advertising and industrial engineering, the Great Depression, the New Deal, and World War II.

- **HST-335 The United States Since 1970**
  
  **Credits:**
  4.00

  **Description:**
Examines the transformation of America in the decades since the early nineteen-seventies, taking up social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also emphasized. Topics include: Watergate, the aftermath of the Vietnam War, the end of the post-World War II economic boom, the culture wars, the rise of the New Right and decline of the New Deal order, the end of the cold War, America's growing involvement in the Middle East globalization, the impact and aftermath of 9/11, and the Great Recession of the early twenty-first century.

- **HST-357 History of Spain I**
  
  **Credits:**
  4.00

  **Description:**
  Surveys the most transcendental social, cultural, economic and political developments in the history of Spain from the Neolithic to the Early Modern Period. Examines the broad history of the nation and its peoples and placing emphasis on three central themes: diversity within the Iberian Peninsula, the region's social and geo-political structures, and the transformation of the Old Order of the ancient kingdoms into a modern, nation-state. Topics include: the Pre-historical period, Roman Hispania, the Medieval Kingdoms, Islamic Civilization, the Christian Reconquest, the Catholic Monarchy, Imperial Spain under the Habsburgs, and the Crisis of the Spanish Empire in the 17th century.

- **HST-358 History of Spain II**
  
  **Credits:**
  4.00

  **Description:**
  Examines the political, economic, and social history of Spain from 1700 to the present. Topics include: the War of Spanish Succession; the Bourbon state; the Enlightenment in Spain; the impact of the French Revolution; Spain in the Napoleonic Wars; the rise of liberalism, socialism, and anarchism; the crisis of 1898; the problems of modernization; the Spanish Civil War and the Franco regime; the transition from dictatorship to democracy; Spain's international position today.
- **HST-361 Native America 1832 to Present**

  **Credits:**
  4.00

  **Description:**
  Topics will include the Plains Indian Wars; ethnological aspects of Indian tribes; the pitfalls of Indian reform movements; Indian resistance to U.S. assimilation and reservation policies; the Indian New Deal; activism and the American Indian Movement; Indians’ future prospects. Cultural Diversity A

- **HST-383 Boston: Heritage of a City**

  **Prerequisites:**
  One History course

  **Credits:**
  4.00

  **Description:**
  Boston from its foundation in 1630 to its development as a 21st century metropolis. From the Massachusetts Bay Colony, to cradle of the American Revolution, to a Yankee merchant capital, Brahmin cultural center, and immigrant melting pot. When offered in the hybrid format, this course will meet at the regularly-scheduled time, but lectures and other course materials will be available on the course Blackboard site in case you cannot attend.

- **HST-385 Slavery & Race in American History**

  **Credits:**
  4.00

  **Description:**
  Topics will be selected from the following: the nature of slavery; the origins of slavery in America and the process of enslavement; the economics of slavery; the American Revolution and slavery; the slave trade; black and white women and the institution of slavery; rebellions of enslaved people; the pro-slavery argument; racial thought; masters and the culture of the South; the movement to abolish slavery; the literature of slavery; the Civil War and the end of slavery; Reconstruction; Segregation; the Civil Rights Movement; race and racism in contemporary America.
- HST-394 Slavery in Film, Literature and History
  **Credits:**
  4.00

  **Description:**
  A seminar on slavery in the United States as depicted in history, literature, and film. Topics may include resistance to slavery, honor, the attack on slavery, the cultural and social worlds of masters and enslaved people, the thought of masters and enslaved people, women and slavery, and/or slavery as an economic institution.

- HST-414 Nazi Germany
  **Credits:**
  4.00

  **Description:**
  Examines German and European preconditions; the Versailles Treaty and the failure of the Weimar Republic; Hitler’s ideas, collaborators and institutions; Nazi foreign and domestic policy; World War II and the concentration camps.

- HST-426 Politics and Culture in Europe, 1919-1939
  **Credits:**
  4.00

  **Description:**
  Explores the social and political development of European society between the two world wars, primarily through the literature, art, and films of the period. Topics include: the dissolution of pre-1914 middle class society; deviance and sexuality in the 1920s; the role of decadence in art and the Fascist response to deviance in life and art; women, workers, and the new technology; the rise of Fascism; political engagement and polarization throughout European society in the face of economic and social crisis.

- HST-483 Death, Disease, Healing-U.S. History
  **Credits:**
  4.00
Description:
Investigates how Americans have understood and responded to health, illness, and death from the eighteenth century to the present. Examine interactions among patients, healers (orthodox and heterodox), the medical and scientific professions, business, and government. Explore the effects of scientific and technological advancements, industrialization, urbanization, immigration, war, and social movements on the nation’s moral and political economies of health, and on evolving ideas about bodily integrity and autonomy, linked to historical relations of gender, race, class, and sexuality.

HST-489 Germany: Film, Politics, Memory Since 1945
Credits: 4.00

Description:
Explores German history since 1945 through film, newsreels and other archival footage, war memorials and museums, novels, published diaries, memoirs, and recent historical scholarship. Topics include the representation, in film and other texts, of: post-war rebuilding; the German Economic Miracle; divided Berlin; 1960s and 70s radical politics; coming to terms since 1945, with Germany's Nazi past and the Holocaust; coming to terms since 1990 with the Stasi and East German past; "Ostalgie" (nostalgia in the 21st century for some aspects of East German socialism); the multi-cultural society that is Germany today, with new Turkish, Greek, Russian, Arab, and even Israeli communities.

Music History:

MUH-101 History of Music I
Credits: 4.00

Description:
Surveys Western music from CE800-1800, from Gregorian to Beethoven; selected major composers, representative masterworks, and the musical styles of the Medieval, Renaissance, Baroque, and Classical periods; links the music to some of
the major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.

- **MUH-221 History of Women in Music**

  **Credits:**
  4.00

  **Description:**
  Surveys music in the lives of women, including composers, performers, producers, mothers, and educators from the Middle Ages to the present; examines issues of gender and control, perspective in historical narrative, and religious and secular traditions that impact the cross-cultural reception of women's music. Normally offered every year.

- **MUH-227 Jazz and Blues**

  **Credits:**
  4.00

  **Description:**
  Follows the evolution of jazz from blues and ragtime through Dixieland, Swing, Bebop, Cool, Latin, Modern, Free, Fusion, and Avant-Garde to Post-modern expressions of the present; the contributions of major soloists, arrangers, composers, leaders, and bands. Normally offered every year.

---

**Philosophy:**

- **PHIL-210 History of Ancient & Medieval Philosophy**

  **Prerequisites:**
  Restricted to PHIL majors and minors, PPE majors, and honors students

  **Credits:**
  4.00

  **Description:**
  The study of philosophical thought from the period of the ancient Greek philosophers through the Medieval thinkers, including such philosophers as Socrates, Plato, Aristotle, Epicurus, Zeno, Parmenides, Pythagoras, Protagoras,
Augustine, Aquinas, Anselm, and Abelard. An introductory course designed to equip the student with a well grounded understanding and appreciation of Philosophy. 1 term - 4 credits. Normally offered every year.

- **PHIL-219 Philosophy of Art**

  **Credits:**
  4.00

  **Description:**
  "What counts as art?" "What is beauty?" "Are there objective standards of beauty?"
  This course examines the nature of aesthetic experience, art, beauty, and creativity. Through the classic and contemporary readings, the students will be introduced to philosophical issues concerning the meaning of art, artistic representation, perceptions of art, interpretation, and criticism. Students will be encouraged to reflect on their own experience of art and explore the relationships among the artist, the audience, the artwork, and the world. 1 term - 4 credits. Normally offered every third year.

- **PHIL-250 Social & Political Philosophy**

  **Credits:**
  4.00

  **Description:**
  An examination of persistent debates in political and social philosophy. Topics covered can include the meaning of property and welfare, the tensions between liberty and equality, censorship and freedom of expression, the relation of church and state, human rights and the common good, the possibility of political education and civic virtue, legitimacy of the state, revolution and counter-revolution, war and problems of ends and means, addressing historic injustices, such as racism, genocide, or sexism, among other topics. Students will read both classic and contemporary writings to address both the historical roots and the contemporary treatment of these questions. 1 term - 4 credits. Normally offered every year.

**Theatre:**
- **THETR-260 Broadway Musicals**
  **Credits:** 4.00

  **Description:**
  This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

- **THETR-266 Intro to Theatre: 20th Century**
  **Credits:** 4.00

  **Description:**
  Picking up chronologically where THETR 225 leaves off, this survey course is designed to provide students with an understanding of modern Western theatre. Beginning with a melodrama, plays will include representative works of realism, naturalism, expressionism, epic theatre, theatre of cruelty, theatre of the absurd, and metatheatricality. Lectures and class discussions will explore how these concepts translate to acting and production techniques as well as what they imply as artistic responses to a modern and post-modern world. Satisfies a core requirement for Theatre Majors.

### Women’s & Gender Studies:

- **WGS-111 Women, History, and Culture**
  **Credits:** 4.00

  **Description:**
Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-115 Introduction to Gender Studies**

**Credits:**

4.00

**Description:**
Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women's studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

- **WGS-311 Engendering Entertainment: Feminism and Popular Culture**

**Credits:**

4.00

**Description:**
Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How to Be a
Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

- **WGS-315 Feminist Thought**
  **Credits:**
  4.00

  **Description:**
  Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldúa, and Judith Butler.

- **WGS-330 Furies to Femi-Nazis: A History of Modern Anti-Feminism**
  **Credits:**
  4.00

  **Description:**
  Explore the deep antipathy women have faced at nearly every turn in their struggles for civic and social inclusion. Anti-feminist denials of women’s rights have taken the form of attacks on women’s nature, bodies, and fitness for public life, tagging them with labels of otherness: opponents of women’s rights deem them irrational, unnatural, traitors to society, even sexual deviants. This course will examine the dangers that women allegedly represent to social stability from the Enlightenment to the present day, as well as how women have fought back to assert their rights and independence.

- **WGS-335 Queer Narratives**
  **Credits:**
4.00

**Description:**
Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock’s recent memoir, “Redefining Realness”, as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

**Modern Language: 0-2 courses, 0-8 credits Archive 2018-2019**

To fulfill the modern language requirement, a student must earn credit for a course in a language other than English taught at Suffolk at the level of 102 or above. A student may have to complete the prerequisite of 101 before taking 102. A student may test into 102 or higher. The modern language requirement may be waived with proof of proficiency at the 202 level in any qualifying language.
ASSOCIATE OF SCIENCE DEGREE (ARCHIVE 2018-2019)

Academic Catalog Archive 2018-2019

The AS degree program requires the successful completion of the following courses:

- **Minimum Total Credits Required for Degree Conferral:** 64 credits Archive 2018-2019
- **Core Requirements:** 15 courses, 54-56 credits Archive 2018-2019
- **First Year Experience:** 1 course, 1 credit Archive 2018-2019
- **First-Year Writing:** 2 courses, 8 credits Archive 2018-2019
- **Math:** 1 course, 4 credits Archive 2018-2019
- **Science, Technology, & Engineering (STE):** 2 courses, at least one with a laboratory, 8 credits Archive 2018-2019
- **Ethical & Philosophical Inquiry:** 1 course, 4 credits Archive 2018-2019
- **Social and Intellectual History:** 1 course, 4 credits Archive 2018-2019
- **Quantitative Analysis:** 1 course, 4 credits Archive 2018-2019

**Minimum Total Credits Required for Degree Conferral:** 64 credits Archive 2018-2019
Core Requirements: 15 courses, 54-56 credits
Archive 2018-2019

First Year Experience: 1 course, 1 credit Archive 2018-2019

Students with 15+ transfer credits of college or university work are exempt.

Choose one of the following to be completed during the first semester of matriculation:

- **CAS-101 Strategies of Success**

  **Prerequisites:**
  CAS students only. SBS students by special permission.

  **Credits:**
  1.00

  **Description:**
  CAS 101 is a one-credit course that meets once a week and is designed to help you have a successful transition to Suffolk University and our unique urban community. It is also designed to introduce you to the principles and concepts of Oral Communication and Presentation Skills. Through interactive exercises and engaging assignments, you will explore the campus environment and learn about strategies for success as a student. You will present speeches about your research and activities to improve your abilities as a speaker.

- **ADPR-102 Professional Development**

  **Prerequisites:**
  ADPR 101

  **Credits:**
  1.00
**Description:**
In this hands-on experiential course, students examine potential career paths in Advertising, Public Relations, and Social Media, become oriented to the university and the surrounding Boston area, and identify professional resources in Boston that foster career development.

**Seminar for Freshmen: 1 course, 4 credits Archive 2018-2019**

Students with 15+ transfer credits of college or university work are exempt.

Please note that not all courses are offered each semester. Students should contact their advisor to learn about current course offerings.

Choose one Seminar for Freshmen course from those listed below:

- **SF-101 Fixing the World- Energy and Water: The Science of Solutions**
  
  **Credits:**
  4.00

  **Description:**
  Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs?
Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-116 Enlightened Insanity**
  **Credits:**
  4.00

  **Description:**
  Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

- **SF-126 The Boston Theatre Scene: the Inside Experience**
  **Credits:**
  4.00

  **Description:**
  Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston's many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

- **SF-132 The Beatles: Here, There & Everywhere**
  **Credits:**
  4.00
Description:
This seminar will investigate the impact and legacy of the Beatles. The Fab Four deserve our scholarly attention as musical innovators and as cultural avatars of the 1960s, an era that still exerts influence today. We will examine the many ways in which the Beatles rocked the establishment and became defining figures in post-war youth culture. We will also discuss other media (the visual arts, film, fashion, style) and fields of study (mass media, marketing, recording technology, copyright law, English history) using the Beatles as our guides.

SF-156 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life

Credits:
4.00

Description:
The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.

SF-173 Crime in American Society

Credits:
4.00

Description:
Popular beliefs about crime are often inspired by the media and by specific criminological theories. These theories about and media images of crime will be examined in detail, including the "hits" and "misses".

SF-174 Tragedy and Literature

Credits:
4.00

Description:
This course will focus on classic works of ancient and modern literature that examine the human condition from a tragic perspective. We will concentrate on close readings from the following texts: Homer’s Iliad, Sophocles’ Antigone, The Bhagavad-Gita, Shakespeare’s Othello, Chekhov’s short stories, and Joyce’s Dubliners.

- **SF-175 War and Apocalypse in Science Fiction**
  **Credits:** 4.00
  **Description:** From some of the earliest examples of what we call science fiction to today's cutting edge writers, artists, and videographers, the devastation of war and other disasters and their aftermath have loomed large in how the future (and alternative versions of the present) plays out. This course will look at some of the more important issues of future war and post-apocalyptic literature, with a dash of television and film and a soupçon of art.

- **SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**
  **Credits:** 4.00
  **Description:** This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

- **SF-183 Politics, Power and the Media**
  **Credits:** 4.00
Description:
Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of “big government”, and the concept of a liberal media.

— SF-190 Asia in America Fiction and Fact

Credits:
4.00

Description:
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

— SF-191 Film Adaptation

Credits:
4.00
Description:
"Why did they change the ending of the book? The novel is so much better!" We will explore the concept and industry of film adaptation. Students will read novels and watch respective film adaptations to explore how the written word is adapted to the screen; both fiction and non-fiction works will be considered. Also, field trips to past film locations in Boston will be taken to explore why specific settings were chosen for respective situations. Additionally, students will create their own written adaptations of source materials, putting into practice the concepts studied in class.

- SF-197 Sustainability, Energy, and Technology At Suffolk University

Credits: 4.00

Description:
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

- SF-198 Music and the Brain

Credits: 4.00

Description:
What accounts for the power of music to move us so profoundly? This course explores how our brains and music evolved together: "What music can teach us about the brain, what the brain can teach us about music, and what both can teach us about ourselves."

- SF-199 Unfolding the European Union

Credits: 4.00
**Description:**
The EU is a powerful political, economic and cultural block that is meant to play a major role, together with the USA and China, in the creation of a new post-crisis world order. The seminar is intended to cover, at a basic but reachable level, the history, the politics, the culture and the functions of the EU in the beginning of the Twentieth Century. An extraordinary experiment of sociopolitical engineering, comparable to that of the United States of America, the EU has been changing the life of an increasing number of Europeans for over 50 years. No American student could afford to ignore the inner structure as well as the particular peculiarities of such inclusive supranational organization in today's world. Issues as institutional functioning, problems derived from individual state sovereignty, economic coordination to face common challenges, cultural integration, future enlargement, etc. are all indispensable to understand the way in which Europe is changing. But also much more day-to-day issues, such as travel mobility, education exchange programs, citizen's participation, supranational networks of people in the arts or in business, unified labor market, gender participation, human rights, consumer's protection, etc. are all in the process of developing a more robust and functional European Citizenship.

- **SF-1127 The Vietnam and Iraq Wars: Polarized Perspectives**

  **Credits:**
  4.00

  **Description:**
  This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement "just"? To what extent were the methods used by the United States military during each war "just"? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit "the enemies" of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

- **SF-1129 Beacon Hill: Fact, Fiction, and Fantasy**

  **Credits:**
Description:
The course will explore the physical geography, history, and image in literature, film, and pop culture of Suffolk University's Beacon Hill neighborhood. The purpose and objective of the course is to provide students with a deep knowledge, understanding, and appreciation of Beacon Hill through examination of written and visual sources, and feet-on and eyes-on experience of the public parts of the Hill.

- SF-1133 Problems and Solutions in Early American History
  Credits: 4.00

Description:
This course will examine four major problems in the early American republic: forming a government; bridging vast distances on the American continent; slavery; international relations. We will explore the various proposed solutions to these problems. Some of the solutions worked well, others were more disastrous than the initial problem. We will read primary documents pertaining to these issues, and try to imagine how men and women considering the problems might have responded to them. What solutions could be proposed? What solutions would work? What were the political, economic, or social difficulties generated by the problem and by the proposed solutions? In considering the problems, we will also learn how to use the various archives close at hand: the Sawyer Library, the Boston Public Library, the Massachusetts Historical Society, and the Massachusetts State Archives. Students will also post their findings on a class blog, and present their work to one another in class.

- SF-1134 The Meaning of Life
  Credits: 4.00

Description:
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these
questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity’s Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity’s Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

- **SF-1135 Women Warriors: Stories of Captivity, Conversion, and Confession**

**Credits:**
4.00

**Description:**
Since the beginning of time, women have been "doing battle" to themselves, while men have gone to battle against others. Whether it is through converting to Christ, yielding to captors in order to survive, or carrying a baby, this course introduces students to the many ways in which, whatever battles they face, women are warriors; they survive. Utilizing an array of captivity, conversion, and confession narratives by women, and pairing them across the centuries, students will make connections and draw conclusions between early-and mid-19th-century-American and contemporary women. Students will connect, for example, the trials of the 17th-century Puritan captive, Mary Rowlandson, and contemporary hostage, Elizabeth Smart, to explore how women (no matter how different they seem) draw upon unique inner resources to survive.

- **SF-1141 Classical Civilizations: Pathways to Wisdom**

**Credits:**
4.00

**Description:**
How is it that the knowledge, intelligence, wisdom and values of the Greeks and Romans still educate and edify the world by providing venues towards leading fulfilling and dignified lives? The guiding principles of their respective civilizations rested upon eight pillars: -Humanism: It was recognized that humans have the potential to master their world and live life to the fullest. -The Pursuit of Excellence: To imagine the highest good and strive to attain it. -Self Knowledge: It is imperative
to know oneself before seeking to know the world. -Rationalism: Always question, reason and discern truth from falsehood and never consider any matter superficially. -Restless Curiosity: Often the resolution of one issue leads to the revelations of others mysteries and pursuits which compels further investigation. The wise individual makes this a lifelong endeavor. -Love of Freedom: As long as one brings no harm to others, one must be free to live and discover as much as possible. -Individualism: All are unique and, therefore, must recognize individual strengths and identity. -The Practice of Moderation: The prudence of avoiding extremes in personal and social conduct. In this course, students will read two (brief) texts on the Greek and Roman contributions to the world and then will proceed with specific readings which illuminate the eight principles above for achieving the good life.

- SF-1143 In the First-Person: Storytelling in the 21st Century

Credits: 4.00

Description: This section of the Seminar for Freshmen will consider the forms, venues, and impacts of narrative nonfiction in contemporary culture. From the exploding popularity of personal essays in the digital age to the living, evolving essays we create on social media, we are constantly narrating and archiving our lives, shaping their content for specific audiences. In doing so, we shape what our experiences mean and represent. In order to analyze the power of narrative nonfiction, we will look at a variety of multimodal texts: essays, podcasts, Instagram and Twitter feeds, stand-up comedy, and storytelling slams, as well historical texts such as the essays of Michel de Montaigne and historical artifacts at the National Archives in Boston. We will also write our own narrative nonfiction, and adapt our first-person stories for listening and viewing audiences, such as the MassMouth story slam and podcasts like This American Life. Additionally, we will practice narrative nonfiction for professional audiences, using storytelling as a way to showcase personal strengths to employers, internship coordinators, and the like.

- SF-1145 Emergence of Southeast Asia

Credits: 4.00

Description:
Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SF-1146 Fido the Friendly Wolf: A Natural History of Dogs**
  **Credits:** 4.00
  **Description:**
  This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

- **SF-1147 Global (In) Security: From ISIS to Ebola**
  **Credits:** 4.00
  **Description:**
  This course reviews the principal features of global and national security as it is currently practiced by tracing the evolution of theories, policies and circumstances whereby current international security is developed. Students will evaluate the nature and origins of war, arms proliferation, military instability, terrorism, genocide, health threats and natural resources depletion.

- **SF-1148 Brave New Worlds**
  **Credits:** 4.00
  **Description:**
  Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of
cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

- **SF-1150 Religion in Contemporary Society**
  
  **Credits:**
  4.00

  **Description:**
  This course is designed to provide students with an overview of the social settings and cultural meanings of religion in the contemporary world. Topics that will be covered in reading and discussions include the rise of religious fundamentalism, religion and violence, women's and men's religious experiences, new religions, and portrayals of religion in popular films. In addition to the readings, students will observe and experience religious expressions and activities through fieldwork assignments. The emphasis on films and fieldwork reflects my belief that religion is made up of “lived experiences” of actual individuals and communities. In order to understand religion in contemporary society we will make every effort to see (in person or in film) a wide range of religious activities. The films we will see include some of the following: Leap of Faith, Devil's Playground, Kadosh, Women of Hezbollah, Singing Stream, A Still Small Voice.

- **SF-1151 Reproduction and Society**
  
  **Credits:**
  4.00

  **Description:**
  This course explores relationships between reproductive health and rights both nationally and internationally. Many of our topics fit into two broad areas: conflicts over the control of childbearing (sterilization abuse, birth control, and abortion) and conflicts over who deserves to be a mother, especially when the mothers in question face social stigma and lack political power. Other topics include safe birth and maternal mortality, breastfeeding, infertility and reproductive technology. We also examine the politics of women's sexual and reproductive autonomy, including the policies that shape women's choices to prevent, achieve, abort, or carry to term a pregnancy. Throughout, we are guided by the following questions: Why is reproduction an important site through which to understand society? How do statuses such as race, class, gender, sexuality and ability influence people's...
reproductive possibilities? What is the role of the state in shaping these experiences? How have communities supported or resisted efforts at reproductive control? Why is reproductive justice central to these answers?

- SF-1152 The Idea of America: Past, Present, Future
  **Credits:**
  4.00

**Description:**
A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation's history, from the struggle over slavery to America's contemporary role in the world. Because this course intends to apply theoretical understanding to real life, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation's philosophical and historical currents.

- SF-1154 Introduction to Visual Studies
  **Credits:**
  4.00

**Description:**
This seminar provides an introduction to Visual Studies, a relatively new interdisciplinary field that examines how images communicate and the roles that they play in society. Students will apply the concepts and techniques of Visual Studies to analyze sites and signs around Boston, such as advertisements, street signs, fashions, newspaper photographs, buildings, and public spaces. Class projects will increase students' awareness of their visual environment and their ability to critically analyze the visual rhetoric that surrounds us and is often used to manipulate us.

- SF-1156 Thinking About the Insanity Defense
  **Credits:**
4.00

**Description:**
This course examines sixteen case examples providing a clear and compelling introduction to one of the most important topics in the relation between public policy and law. This course addresses: the history of the insanity defense; the effects of different standards for determining insanity; the arguments for its retention; abolition, and revision; media and other responses to it; and the controversies around pre and post conviction commitment. The case examples illustrates a variety of outcomes and include individuals who were found not guilty by reason of insanity; found guilty even though mentally ill; and not charged because of mental illness.

– **SF-1158 Global Climate Change**

**Credits:**
4.00

**Description:**
Conversation about the weather is considered to be the universal icebreaker. Yesterday's sweltering heat, the storm predicted for this weekend, even long-term climate shifts find their way in our daily conversation. Today, however, such casual conversations have an edge to them, because we are realizing that humans play a role in determining the climate shift. In fact, understanding the human fingerprint in the Arctic tundra melting, or a devastating hurricane, has gone well-beyond small talk to become one of the most important challenges our society faces today, and on that is wedded to geopolitics. To meaningfully participate in any dialogue that addresses this challenge people have to be aware of certain key ideas of Physics and Planetary Science. The aim of this course is to provide you with some of the essential facts and pieces of science underlying such questions. This course will enable you to grasp many of the issues that dominate today's political discourse and to develop an informed opinion (your, not our!) for which you can rationally argue.

– **SF-1160 Individuals and Society in the Zombie Apocalypse**

**Credits:**
4.00
**Description:**

"The Walking Dead" tells viewers that life in the zombie apocalypse requires people to "fight the dead, fear the living." Sociologists want to know why we should fear the living. How do individuals come together and try to recreate society for themselves: either to build community or fight other groups? What role do morals and values have in a society? How does all of this determine life, death, and the struggles people must face? Questions like these will give our class a new view of "The Walking Dead" and can help us to learn more about the society that we live in where so far the dead have remained in the ground.

**SF-1161 The Playwright and the Stage**

**Credits:**

4.00

**Description:**

This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

**SF-1162 Space Missions: From Moon to Mars and Beyond**

**Credits:**

4.00

**Description:**

It is hard to believe that only 60 years ago, our only close-up view of a planetary body was that of Earth. We are truly living in the Golden Age of Space Exploration, when a new mission every few years brings us spectacular images from either a neighbor in the solar system or galaxies at the edge of the universe. This course will describe the dozen space missions that changed our view of the universe, ranging from our solar system to the most distant galaxies.
SF-1163 Spellbound! Witches, Wizards and Spirits In American Literature

**Credits:**
4.00

**Description:**
Since the beginning of time and across cultures, people have been interested in the supernatural, the paranormal, and the otherworldly. Often, these phenomena have appeared in the form of witches, wizards, and spirits, whether good or bad, wicked or wonderful. Women who have not fulfilled traditional gender roles have historically been cast as witches or, to use Shakespeare's phrase, as "weird sisters", or, in Donald Trump's recent election parlance, as "nasty women." Men in turn appear as wizards, usually more positively than female witches. Men and women alike also can take the form of spirits or ghosts; even houses can be possessed. What lies beneath the great fascination with the supernatural and the paranormal, with the haunted, the possessed, and the spellbinding? What accounts for the different manifestations of spirits? This course takes students on a tour of witches, wizards, and otherworldly spirits throughout American literary history. Tropes of the witch and the wizard have appeared in literature from the time of Shakespeare (see Macbeth) to the contemporary best-selling Harry Potter series, and hits every century in between, such as in Anne Hutchinson's Puritan accounts form the 1600s, Nathaniel Hawthorne and Edgar Allan Poe's in the 1800s, The Wizard of Oz in 1900, and John Updike's The Witches of Eastwick in the 20th century. The course offers readings across genre lines-poetry, fiction, non-fiction, young adult fantasy, and drama-and includes excerpts from film and television shows based upon wizards and witches (such as Bewitched, Buffy the Vampire Slayer, and The Vampire Diaries). The course may include a field trip to Salem, MA, as well as possibly the opportunity to see Wicked at the Boston Opera House (if it is renewed through the fall season, 2017).

SF-1164 Reinventing Europe: Beyond Brexit and Secular Stagnation

**Credits:**
4.00

**Description:**
While newspaper headlines focus on the multiple problems Europe is facing today, the evolving adaptation of European nation states and the integration process receive less attention. Brexit and economic crises seem to be synonymous of Europe today, but facts such as the European Union accepting five new members in
the coming five years or Europe being the most advance environmental actor or the main international provider of official aid are often ignored by public opinion. This Seminar for Freshman examines the dynamic evolution of the integration process in Europe in the context of globalization. Three sections articulate the main debates and tensions in the interplay between national and supranational institutions and policies. The first part analyzes how eight European countries have forged their national preferences to delineate their level of immersion in the integration process; it later proceeds with the examination of the main historical events in the history of the integration process. The second part explores the functioning of the EU institutions in order to grasp the essence of the complex policy-making in the Europe of 28 members. The third and final section presents the analysis of the main areas of the EU policy making such as agriculture, monetary and economic issues, among others, and observes the main developments in the area of EU external relations.

**Description:**
Readers lining up at midnight for the newest Harry Potter book, hundreds of thousands of viewers crashing HBO's website in their eagerness to watch Game of Thrones: examples of fantasy's recent popularity are everywhere. This course explores the genre of contemporary fantasy through a historical and critical lens, from the work of J.R.R. Tolkien to the 2015 Nebula Award Winner, Uprooted. We will begin by reading selections from medieval literary texts, including Arthurian legend and Anglo-Saxon epic, to understand the roots of the fantasy genre and consider how these early works have inspired and informed the world-building efforts of later authors. We will also explore fantasy's newest manifestations across different kinds of media, from big-budget film adaptations to internet fan fictions. Critical questions will include: How do works of fantasy deal with the ethical questions surrounding the categories of "good" and "evil", "monstrosity" and "otherness" How do common fantasy plots such as coming-of-age or quest narratives work to aid in fictional character development and build suspense? How are contemporary anxieties about issues such as gender, race and class explored through the genre of fantasy?

---

**SF-1168 The Real Thing: the Pursuit and Problems Of Authenticity**

**Credits:**
4.00

**Description:**
This course will focus on the concept of authenticity in American culture, from its origins in the early 19th century to the present. When the advertising gurus of Coca-Cola branded it as "The Real Thing," they were exploiting something powerful: the idea of something real, stripped of any falsity or illusion. Humans have always desired to know the world and others "as they really are," but this desire is particularly strong in the modern world: witness the eagerness to discover one's "true self," cut through the B.S., obtain the genuine article, and "live authentically." In this course we will interrogate this pursuit of the Real Thing. In various ways, the texts we study both embrace authenticity as an ideal and also question its goodness, usefulness, or even its very possibility. We will thus confront a number of interrelated questions: Where does this desire for authenticity come from? What counts as "authenticity," in life and in art? Is authenticity really a virtue to live by? How does it shape artistic and literary expression? Is there even such a thing as "the real you" This course will be divided into three units. In the first unit, "Counterfeiters and Self-Made Men," we will study how a commitment to authenticity arises in antebellum American literature and culture during a time of rapid national...
expansion and invention. Readings will include texts by Henry David Thoreau, Ralph Waldo Emerson, Herman Melville, and P.T. Barnum. In the second unit, "Authenticity and Contamination," we will consider two major ways in which authenticity becomes idealized around the turn of the 20th century: as artistic ideal set against fears of mass cultural production, and as a cultural ideal set against fears of racial and cultural mixing. Readings will include texts by Ernest Hemingway, Nella Larsen, Jean Toomer, and William Carlos Williams. In Unit Three, "Buying and Selling Authenticity," we will examine how authenticity becomes commodified (associated with products and "lifestyles") in post-WWII American culture. Texts will include works by Andy Warhol, David Foster Wallace, George Saunders, Banksy, and the TV series Mad Men. Final projects will ask students to consider authenticity today: how is the pursuit of the Real Thing affected by technologies of reproduction, by commodification, and by the increasingly virtual world of the 21st century?

- **SF-1169 Immortality: Real and Imagined**
  **Credits:** 4.00

  **Description:**
  Most of the world’s religious traditions have as a part of their doctrines some notion of immortality, rendered both in scriptures as well as iconographically. What precisely is entailed by immortality and why does it constitute such a significant element of so many religious traditions? What can we learn about immortality by investigating various conceptions of the afterlife? Is immortality truly a desirable thing? These questions among others will be examined from the perspectives of philosophy, religion, psychology, anthropology, and biology. Besides being cross-disciplinary, the course will be multi-media in nature. In addition to reading philosophical and religious texts concerning the nature of immortality, students will study various accounts of immortality and the afterlife, examine how the afterlife has been dealt with in (visual) art, literature, and film, and investigate current research into life prolongation (biomedical gerontology).

- **SF-1170 From Philia to Facebook: the Meaning of Friendship**
  **Credits:** 4.00

  **Description:**
The thematic focus of this seminar will be friendship. Friendship is one of the most important of human relationships; one that every student in this seminar has already participated in for many years. It shapes who we are and helps determine who we may become. And while it is a universal phenomenon, it has been practiced quite differently at various times and places in human history. And while we all have an intimate, personal and practical knowledge of friendship through our own experiences, sometimes things that are so close and so obvious to us can be hard to see. Over the course of the semester we will inquire into friendship from many different angles, trying to gain both a broader and a deeper understanding than our own individual experience allows. We will look at friendship first through the lens of philosophy, particularly through the foundational text of Aristotle, The Nicomachean Ethics. We will look at other views of friendship from the ancient world, starting in the past to help us see that friendship has not always been thought of the way we think of it now. After this initial foundation is laid, we will examine other writers and thinkers and take up additional topics like friendship in different cultures, friendship and gender, friendship in and through the arts and include an examination of friendship through the lenses of many different academic disciplines to see how other systematic thinkers conceive of friendship. All along we will be comparing and contrasting with our own personal experiences and considering what modern technology, such as social networking sites, has done to influence friendship, in the way we practice it and the way we conceive it. It is the aim of this class that students not just study different academic points of view, but that that they take up the questions and challenges that these thinkers present to them and fully engage with them on a meaningful personal level.

SF-1171 Living on and Beyond the Hyphen/Latino Writers in the USA

**Credits:**
4.00

**Description:**
Hyphenated-Americans of Latino origin come from many places and backgrounds. Often perceived as a divide, an either/or that separates and distinguishes one ethnic group from another, the hyphen can also be viewed as a link that connects, integrates and facilitates the formation of "new" cultural spaces. Through films and written narratives by and about U.S.A. Latino(a)(x)-Americans, students will examine how individuals who live on the threshold between two languages and cultures embrace the challenge of preserving their own identity and moving beyond stereotypes. Each of the Latino/a/x authors that we will read in this course will describe his/her own experiences living in the U.S.A. By examining their views
through our own filtered lens we shall try to answer questions like the following: 1. What role does language have in our definition/understanding of cultural identity? 2. How do individuals move beyond the hyphen and stop seeing themselves as hybrids? 3. How can an individual who does not belong to a marginalized group (i.e. one considered less powerful and secondary) understand and empathize with those who do? 4. How does globalization affect the dichotomies that arise in bi-cultural and multi-cultural communities?

---

**SF-1172 The United States Mexican Border**

**Credits:**

4.00

**Description:**

One hundred and sixty nine years have passed since the Treaty of Guadalupe Hidalgo was signed. It is only fitting to analyze the profound changes that the gain/loss of these territories caused for the citizens of both sides of the border. This course will explore the literature, culture, and history of the United States-Mexican Border and the most pressing problems pertaining to the region. Emphasis will be on contemporary border theater and film. The works of Salcedo, Galindo, Lopez and others will be studied as well as contemporary films and documentaries such as Alambrista, Senorita Extraviada, The Gatekeeper, Sin Nombre, Wetback: the Undocumented Documentary,Victoria para Chino, Which Way Home, and much more. There are no prerequisites for this course. Though the course in conducted in English, parallel readings in Spanish will be made available to those who wish to read and/or compare the original texts.

---

**SF-1173 Understanding the Vast Sweep of Chinese Culture**

**Credits:**

4.00

**Description:**

This course is an introduction to both ancient and modern Chinese civilization with a focus on its literature, arts, and 4000 year cultural history. We will see China at its earliest stages through its archaeology and progress to the heights of literary splendor in the Tang and Song Dynasties. Study of select early plays from the Mongol Yuan period will clearly tie into the development of Ming and Qing period fiction. With the fall of imperial China in 1911, the focus of literature changed drastically and we will study how many modern authors were able to draw from a
massive wealth of literary resources to help create a new Chinese literature and culture. We will watch several films that will provide a rich visual portrait of the culture. We will read quite a few representative literary and historical works in English translation that will give a great deal of insight into modern China and how we can both relate to and interact with this complex and amazing country. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for students in all majors that wish to gain a deeper understanding of Asian culture.

- **SF-1176 What Is a Fact?**
  **Credits:**
  4.00

  **Description:**
  What makes a fact a fact? What makes a fact true? At one time, these questions were only asked by epistemologists and postmodernists, but with the rise of fake news and the discourses surrounding it, these questions are relevant to everyone. Understanding facts is also essential to college students, who must learn to use reliable sources in order to create credible work. In this class, we will examine works of literature, art, science, and history that interrogate how facts are created and how we determine their truth value. Texts will include podcasts, novels and book-length studies of memory and theory of mind (the study of how we understand what others are thinking). We will also utilize the resources of Boston and Suffolk University; we will visit the WBUR NPR newsroom, a local museum, and learn about the legal definition of “truth” from a representative of the law school. By analyzing these texts, participating in these experiences, and completing a series of assignments that ask students to think critically and creatively, this class seeks to understand how we create facts, and why we need them.

- **SF-1177 Revolutions in Thought**
  **Credits:**
  4.00

  **Description:**
  The course will consider major changes in thought that revolutionized the cultures and societies in which they were embedded. Topics include the rise of monotheistic religions; the American Revolution; the recognition of slavery as a moral evil; the idea of women’s equality; Freudianism; Darwinism; Marxism; as well as Einstein and
the Theory of Relativity. We will enrich the readings and classroom conversations with visits to museums, churches, historic sites and other locations that reflect some aspect of the revolutionary changes that are our focus.

Students in the CAS Honors Program should choose one Seminar for Freshmen course from those listed below:

- **SF-H101 Fixing the World- Energy and Water: The Science of Solutions**
  **Prerequisites:**
  CAS Honors students only
  **Credits:**
  4.00
  **Description:**
  Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-H116 Enlightened Insanity**
  **Prerequisites:**
  CAS Honors students only.
Credits: 4.00

Description: Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

Prerequisites: CAS Honors students only

Credits: 4.00

Description: This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

Prerequisites: CAS Honors students only

Credits:
4.00

**Description:**
How is it that "comics", a genre often viewed as entertainment for children and adolescents, has become one of the most exciting forms of narrative and visual art? To answer this question, this seminar will examine a range of graphic novels, from those that celebrate their origins in superhero comics, such as Alan Moore’s Watchmen, to those that treat subjects not usually considered proper to the comics genre, such as Art Spiegelman's Maus, about the Holocaust, and Alison Bechdel's Fun Home, about the complexities of sexual identity. As we read these works, we will look at how the combination of words and still images makes the graphic novel a unique storytelling form, as well as how artists and writers push the envelope to create new styles and challenge our expectations. In addition to class discussions and writing assignments, we will take a field trip to the Museum of Fine Arts and create a collaborative group graphic novel step-by-step over the course of the semester (all abilities welcome).

— SF-H197 Sustainability, Energy, and Technology At Suffolk University

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

— SF-H1134 The Meaning of Life

**Prerequisites:**
CAS honors students only.
Credits:
4.00

Description:
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity's Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

Prerequisites:
Restricted to CAS Honors students

Credits:
4.00
Description:
Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

— SF-H1161 The Playwright and the Stage

Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

First-Year Writing: 2 courses, 8 credits Archive 2018-2019

— WRI-101 First Year Writing I
Credits:
4.00

Description:
Study and practice of the writing process and revision in terms of expository writing modes for an academic audience.

- **WRI-102 First Year Writing II**  
  **Prerequisites:**  
  WRI-101 or ENG-099 with at least a B and ENG-P099 with a P or WRI-H103  
  **Credits:**  
  4.00  
  **Description:**  
  Study and practice of argumentative and research writing through further work with writing process and revision and the critical reading of a variety of texts.

A student may be assigned to other writing courses or may be invited to take WRI-H103. Students not eligible for direct entry into WRI-101 will be required to complete one additional pathway course. Depending on eligibility, students who are assigned one additional pathway course must either complete WRI-100 or WRI-100+ prior to enrolling in WRI-101.

- **WRI-100 Developmental Writing I**  
  **Credits:**  
  4.00  
  **Description:**  
  This course affords students extended practice with persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. Students who are placed into WRI-100 must complete the course with a C in order to continue on to WRI-101.

- **WRI-100+ Developmental Writing - Tutorial Section**  
  **Credits:**
4.00

Description:
This course affords students extended practice with persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. WRI-100+ sections require students to meet with their instructors once per week for a thirty-minute, one-to-one tutorial session, to be scheduled by the instructor with each individual student.

— WRI-H103 Advanced First Year Writing

Prerequisites:
By Invitation Only.

Credits:
4.00

Description:
This course is by invitation only and reserved for incoming Suffolk students with high admission scores. Advanced study and practice of writing process, revision, and research, based on close readings of a variety of texts. Fall semester only.

Creativity & Innovation: 1 course, 3 credits Archive 2018-2019

In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk and support divergent thinking. In the process, they will become more confident life-long learners.

Choose one Creativity & Innovation course from those listed below:
- ADF-S171 CI: Integrated Studio 1
  Prerequisites:
  Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

  Credits:
  3.00

  Description:
  This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

- ADF-S172 CI: Integrated Studio II
  Prerequisites:
  ADF S101; Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

  Credits:
  3.00

  Description:
  This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.

- CI-102 The End of Global Poverty
  Prerequisites:
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
Credits: 3.00

Description:
This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. More than one-third of our global population lives in poverty, earning less than two dollars a day. Governments, businesses, social enterprises, and charitable organizations have tried to solve the global poverty issue with mixed results. What is the solution? Is entrepreneurship the solution, part of the solution, or has no impact whatsoever? In this course, you will gain an understanding of the power of entrepreneurship (in the context of creativity and innovation), the definition and depth of global poverty (in the context of constraints, such as human, financial and physical resources embedded in local, regional, national and global cultures), and successes and failures of past initiatives to reduce poverty. This is not a course about politics or business, but rather finding a solution to a problem that has eluded mankind since the beginning of time.

− CI-H102 The End of Global Poverty

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only

---

- **CI-103 Sticking Your Neck Out- Inventing for Non-Engineers**
  
  **Credits:**
  3.00
  
  **Description:**
  This course examines cutting edge technologies, the science behind them, and their practical application and follow-up success or failure. It also provides the students a chance to consider the relevance of identified "needed" inventions from the 1950s, and whether those projections were correct. The history behind some remarkable inventions will be presented. Finally, working in small teams, students will brainstorm to identify something useful to invent and determine several approaches to implementing it.

---

- **CI-106 Failing Successfully**
  
  **Credits:**
  3.00
  
  **Description:**
  This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. Did you know Netscape was the internet browser? What about MySpace, arguably the Facebook of the last decade? What led Apple from being innovative pioneers of the 70’s to the verge of extinction in the 80’s to the technological giant they are today? Technologies come and go, but what leads to organizations lasting more than 100 years such as IBM, General Electric, etc.? What role does failure play in successful innovation, decision-making, and business viability? In this course, you will learn about innovation that may have been successful and well-executed. You will also learn about innovation that was a viable business opportunity, but poorly
executed: one phase of failure. In addition, you will learn about innovation that had no real market viability, but was launched anyway: another phase of failure. Can failure lead to success? If so, how?

— CI-H106 Failing Successfully

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

---

- **CI-110 The Entrepreneur’s Cocktail**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
How do you and your story drive business? This course takes an innovative look at human creativity and entrepreneurship. As an entrepreneur needs perseverance and high motivation, we will explore the importance of values, risk taking, problem solving, and the discovery of the market opportunities. In order for you to be creative and essentially create successful ventures, you will discover the nuances between the three factors and explore them further through interactive discussion and debate as well as collaborative group work. You will be encouraged to think in non-conforming ways and apply new concepts and develop your own personal operating principles.

---

- **CI-112 Creating Problems: a New Solution for Sustainability**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00
Description:
As the majority of the world population now lives in cities, for the first time in human history, issues of urban sustainability have become more complex and more important than ever before. Presented with case studies of urban efforts to gain a sustainability foothold, students will utilize ideation, critical thinking, and strategic decision making to both identify root problems and to present solutions. This course will lean heavily on ideation processes, teamwork, and logical methods of analysis to pursue actionable solutions for significant problems. The methods of problem identification and solution analysis learned in this class will be readily adaptable to many complex problems, helping the students to make informed and decisive determinations in their careers.

— CI-114 Creating the Dream Team
Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
Every successful venture today is based on effective teamwork. Unlike a typical lecture format, Creating the Dream Team is a course that utilizes experiential group learning to provide students with pivotal team-building skills. These essential skills are vital for everyone’s future success in the business world. As team players, students are challenged to think creatively. A collaborative problem-solving process is used to analyze "real life" business situations. Teamwork involves research, data collection and information analysis to develop creative solutions to typical business problems. Teams will utilize multi-media tools to present their innovative ideas. Classmates will provide peer feedback and review. Through iterations, all students will assume roles as project leaders, keynote speakers and collaborators on a series of Team Challenges. Upon successful completion of this course, all students will have formed working "dream teams". As reinforcement and final evaluation, Dream Teams are required to create a multi-media Capstone Event as a course performance measure. This capstone presentation will "showcase" all of their newly acquired "dream" team-player skills.
CI-116 Good to Great: Design YOUR Portal to the World

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk, and support divergent thinking. In the process, they will become more confident life-long learners.

CI-H119 SL-Honors Theatre at Work

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

**Credits:**
3.00

**Description:**
In this course, students meet community needs by engaging in service-learning outside the classroom. Theatre at Work is an introduction to creative practice using live performance as a problem solving tool in an educational environment. Specifically, students will create a performance piece in response to an issue they have uncovered in collaboration with select groups of students in a host Boston Public School. There will be a special focus on normalizing risk-taking and the learning that comes from false starts and failed ideas. Students will be responsible for creating every aspect of their performance testing its feasibility on a limited budget, ensuring that the content meets established criteria, and successfully implementing and evaluating their success both with their peers and their audience.
- **CI-129 Art & Innovation Practices**

  **Credits:**
  3.00

  **Description:**
The intent of this course is for students to examine and effectively express in writing their ideas on creativity and to inspire undergraduate students to exceed their current levels of learning. Students will learn to meaningfully integrate course content into long term-retained useful skills through applied creative collaborations. This course is based on the idea that exposure and insight development will enable students to better visualize themselves in their desired fields and make informed choices within the variety of options available to them. The focus of the course will help students to assess their personal interests and strengths as they plan for their own educational and professional futures.

- **CI-131 Off to the Future: Leadership Through Compromise**

  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  Some past political issues were resolved with great success (the Compromise of 1820), and some resulted in great failures (the US Civil War). In this course, students will study noteworthy political dilemmas of the past, identify the major problem solvers and examine the art of compromise. These investigations will provide guidance and inspiration for students to develop innovative and creative solutions to present day political problems such as climate change, immigration, Social Security, income distribution, higher education affordability, and homelessness. Students will work in teams and propose creative and innovative solutions that will convince the affected interest groups favorably, represented by teams of other students in the class, and result in compromises solving tomorrow's problems today.
CI-H133 Honors Franklin and the American Experiment
Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

Credits:
3.00

Description:
What made Benjamin Franklin such a creative force in American history? We will explore the many facets of Franklin's life (printer, writer, scientist, statesman) and learn about Benjamin Franklin's political and diplomatic ventures, and will recreate some of his scientific experiments.

CI-135 The Design of Everything
Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
This course will explore a selection of the genius personalities and their creative work in 5 distinct areas of human creative endeavor; art, science, nature, technology and the built environment. The course explores the underlying similarities in the process of their discovery, invention and creativity across the disciplines. Studying such names as Newton, Warhol, Hawking, Jobs, Gaudi and Banksy, students will uncover the process of design through research, analysis, synthesis, iteration and error. In class group projects will allow a hands-on opportunity to create.

CI-H139 Creating, Promoting, and Participating in the Literary Arts
Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. CAS and SBS honors students or GPA of 3.5 or above only.

Credits:
3.00

Description:
With the launch of Boston’s new Literary Cultural District, we have renewed cause to celebrate the history and industry of literature in our city. This course will immerse students in the world of literary culture and its many branches: writing, editing, reviewing, and publicity. Students will practice the art of creative writing, and learn how writers find publishing venues, how authors build platforms for their work, and how literature reaches the public through readings, social media, book trailers and other marketing campaigns, authors interviews, and reader reviews. Various industry professionals, authors, editors and publicists will speak to the class about the artistic and business opportunities, trends, and futures of literature and literary publishing. Students will apply their knowledge and interests to a variety of projects, including book reviews, author interviews, social media campaigns, literary events, and other collaborative projects. We will also work as a class to launch a new digital literary journal at Suffolk.

---

CI-141 The Creative Approach to Learning

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
This course is focusing on the creative process by introducing students to creative practice as a disciplined approach to problem solving and innovation requiring research, persistence and grit. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original ways, embrace ambiguity and support divergent thinking and risk taking. The course will have an undertone based on science, but it is suitable for non-science majors too!
CI-143 Dreams, Demons, and Dynamic Artists Creative Nature

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
What motivates your creative nature? This course will explore converging themes in Art and Psychology in order to give students the tools they need to unblock their creative potential. Collaborative small team activities, assigned readings, large group discussions, and personal reflection exercises will provide an avenue for students to explore their own creative patterns and how they are influenced by, and perceived within, the world around them. Dreams, mental illness and psychosocial theories of self will also be widely discussed in order to give students context for this inter/intrapersonal exploration.

CI-147 Seeing Double, Printmaking, the Art of Discovery, Experimentation and Process

Credits:
3.00

Description:
Always wanted to explore a creative side but never had the opportunity to take an art class? Here's your chance! Sync the power of icons/images with ideas and making. We will use cellphone and printmaking technologies in a workshop style environment. Rather then a lecture based class, this class we will play, learn and build new Neurological pathways towards creative thinking. Come to every class excited to learn, make and discover. This course will give you the building blocks for innovative thinking beyond the classroom. Power is in the image. As in the way a dream can grip you, images carry incredible amount of influence and creative potential, when they are "seen." Glimpses of these images circulate in media, movies, cell phones, and so on. Learn to develop your own images and understand the broad world of images of human culture.
- **CI-149 SL-Creative Writing and Literacy**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course, students meet community needs by engaging in service-learning outside the classroom. This course will explore the value of creativity and play in developing reading and writing skills and the habits of lifelong learning, both in our own lives and in the lives of young people in Boston. In this course, we will work closely with the non-profit literacy organization 826 Boston, which works with students ages 6-18 on reading and writing skills through playful, creative workshops, as well as tutoring and other kinds of support. Students will learn about the work of 826 Boston by volunteering with the organization, and by the end of the semester you will conceive, plan, and run creative writing workshops of your own at 826 Boston.

- **CI-H149 SL-Creative Writing and Literacy**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

**Credits:**
3.00

- **CI-157 Mindful Journal**
  
  **Credits:**
  3.00
  
  **Description:**
  To keep a journal is to make an investment, often long before we understand the value. A journal is a personal database of snapshots in time, good ideas and bad, observational doodles and unfiltered emotions. On any given page a journal may appear inconsequential but within the rigor of filling a whole notebook (and another, and another) an individual viewpoint emerges. This class will facilitate a student's ability to draw from his or her own lived experience and discover unique springboards into universal issues by making mindful connections. An entire lifetime of images, stories and details resides within each of our minds but the ability to explore that richness requires dedication to documentation. Mindful Journal is a process class fostering focus through mindfulness practices, content generation and meaning making.

- **CI-159 Building a Better T**
  
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
  
  **Credits:**
  3.00
  
  **Description:**
  If any set of problems could use creative and innovative thinking, it's the myriad of problems facing the T. The Boston Globe is filled with stories about financial and organizational problems in the system, and you only have to spend a few minutes on the green line to feel the effects of those issues. Still, millions depend on it every day - it is the circulatory system of our city, and it is more than a way to get around: the T increases accessibility and functions as a democratizing force. That is, when
it's running. In this class we will study the MBTA and other mass transit systems in order to propose creative solutions to the T's most pressing problems. We will read articles about the T and other transit systems, we will look at interactive maps that express different kinds of data, and we will visit local stations. In addition, we will study the process of creative thinking, in order to apply those skills to the issues at hand. You will be asked to create both stand-alone short writing assignments and visual representations of your ideas, accompanied by short, written explanations, both alone and in group projects.

**Description:**
You live in Boston now. At least for a while. Perhaps you’ve noticed that it has its own ways of remembering things. Consider The Boston Literary District, The Freedom Trail, and all the many events and festivals devoted to history, culture, and identity. From guided tours and colonial cosplay to images and written texts to monuments, memorials, and museums, this city tells stories about itself today in the ways it tells stories about its past. In this class, you’re going to tell more stories about Boston. You’re going to help it find other things to remember, and other ways of remembering them. You’ll likely need to focus on parts of the real events that Boston doesn’t prefer to include in its stories, emphasizing issues of race, socioeconomic class, nationality, colonialism, gender, sexuality, and other stories of unequal power and how that manifests in real people's lives and in the culture of this city.

-- CI-163 A Course on Skepticism and Rationality

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits: 3.00

Description:
Magician James "The Amazing" Randi reminds us that "No matter how smart or how well educated you are, you can be deceived." In an age fraught with deception and misinformation, students need tactics and strategies in order to separate truth from falsity. This course encourages its participants to act as skeptics - not cynics, necessarily - by requiring evidence and proof before believing or accepting claims. Students are urged to identify the most-likely-to occur opportunities for deception in their major fields and draw from the tenets of classical rhetoric, logic, and the scientific method in order to develop safeguards. Frequent collaboration with classmates will allow for dynamic solutions to small and large-scale contemporary problems ranging from the personal (e.g. used car prices and avoiding fraud) to the universal(e.g. "fake news" and God).
− **CI-165 Chemistry Is Everywhere: Zig-Zagging to Success**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
We will be discovering the process of becoming more creative. The emphasis is on understanding the creative process and applying effective teamwork strategies towards a shared goal. Students will use scientific inquiry to explore topics in chemistry that they find interesting. Each team of 3-4 students will choose a project and develop it during the semester with the goal of raising awareness about chemistry or designing innovative and engaging ways of teaching chemistry.

− **CI-169 Riddles of Identity**

**Credits:**
3.00

**Description:**
In this course, we will be exploring the often puzzling question of personal identity from a creative perspective, learning about creativity by exploring questions of personal identity. What exactly constitutes our identities? How much control - if any - do we have in determining what our identities are? By wrestling with these among other important questions from a wide-range of perspectives and with creative confidence - the firm belief that each of us can and must explore these questions creatively - we will arrive at a better understanding of ourselves, our personal identities, as well as acquire a greater appreciation of the identities of others. Our course is a genuinely collaborative one, given the significant role others can play in providing us with a perspective on our identities unavailable to us as individuals.

− **CI-171 What Is the Moral of This Story?**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course, the idea of embodiment refers to the integration of the expressiveness of our bodies as a vehicle for the art of speaking and communicating. The meaning of embodiment employed here is both a style and philosophy of engagement and will be examined and practiced as an ongoing pedagogy for connecting with stories at various levels of discourse and apperception.

− **CI-173 Imagining the Other**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course we will explore how to enter into new ways of thinking and adopt new perspectives, by reading, discussing and imitating a range of texts (from poems, hybrid-genre pieces, and song lyrics, to photographs, dreams, and ethnographies). Trying to transcend ordinary modes of interpreting the world, trying to imagine what it is like to be someone or something else entirely, immersing ourselves and describing/translation the new experiences, we will then share the writing (and other texts) we produce, workshopping them as a group, and producing a final presentation and collective portfolio.

− **CI-175 Creating Social Change: From Theory to Activism**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Social change doesn't just happen because something is "in the air" or because of some kind of mystical zeitgeist. Social change happens because engaged citizens find creative and innovative ways to frame social conversations and push on the levers of power. In this course we will examine some of the foundational figures and texts called on by those hoping to enact social change. We will study previous social movements in order to understand how they constructed and supported their arguments in favor of change, and how activists used creativity to overcome entrenched thinking and change the social conversation. We will work in small groups to collaboratively develop achievable but ambitious plans to engage the public and enact change in our own communities.

---

**CI-179 Myths of Self-Making**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course, students examine and engage with one of the major mythological figures of the American imagination: the "self-made man." The idea of the enterprising person who "pulls himself (or herself) up by the bootstraps" is distinctively American. But where and why does it arise? How did it come to prominence in American culture, politics, and economics? And, by gaining understanding of both the limits and the potential of this cultural ideal, what can we draw from it in our own careers and lives? Students will practice skills of close reading, analysis, and argumentation in the first half of the semester, prior to moving onto more complex and interpersonal forms of scholarly creativity and...
problem-solving in teams and in the community. Course content will follow a similar trajectory. In the first half of the semester, we will focus on how the myth of the self-made man originates and develops, and consider some critiques of it as an ideal. After spring break, we will apply the concepts we have studied to a robust analysis of issues in contemporary politics and economics including financial speculation, entitlement reform, technological disruption, and the gig economy. This contemporary focus will culminate in a Group Project & Final Presentation in which students aim for an innovative approach to a current question in light of the works we have studied.

- **CI-181 Creating Change: Perspective Matters**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Reality and perception have been debated and discussed for millennia. Humans see and experience their world in different ways. How do humans determine appropriate solutions for challenging social and economic problems? Why do most accept the current structures or status quo in regards to challenging problems? How do we gain a different perspective to find the vision and resources to erect new structures and thus challenge the status quo? Students will creatively explore these big questions through readings and presentations, studying examples of individuals and movements that have led to new and divergent perspectives. Students will participate by crafting products, creating visual projects, and coming into original thought via trial and error. Students will also develop their analytical and critical thinking skills, while learning to communicate effectively and honestly.

Note: Students with 30+ transfer credits are exempt from this requirement.

Math: 1 course, 4 credits Archive 2018-2019
Choose one Math course from those listed below:

- **MATH-128 Math for the Modern World**
  **Prerequisites:**
  MATH level 2, or Mathshop, or MATH-104

  **Credits:**
  4.00

  **Description:**
  From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem solving in contemporary life and work. It uses a minimal amount of algebra and focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)

- **MATH-130 Topics in Finite Mathematics**
  **Prerequisites:**
  MATH-104, or MATH-121, or MATH level 3

  **Credits:**
  4.00

  **Description:**
  Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments,
Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

- **MATH-134 Calculus for Management & Social Sciences**
  
  **Prerequisites:**
  MATH-104, MATH-121 or MATH level 4

  **Credits:**
  4.00

  **Description:**
  A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, limits and continuity, derivatives, differentiation rules, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, and area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester.

- **MATH-164 Calculus 1 Bridge With Trigonometry**
  
  **Prerequisites:**
  Permission of Instructor

  **Credits:**
  4.00

  **Description:**
  This course provides an alternative to MATH 165 (Calculus I) for those students who have taken MATH 134 (Calculus for Management and Social Sciences) but who do not have the trigonometric precalculus prerequisite (such as MATH 121) for MATH 165. In other words, the sequence MATH 134 / MATH 164 serves as an alternative to the sequence MATH 121 / MATH 165, and similarly prepares students to take MATH 166 (Calculus II). The course includes a thorough review of trigonometry and other
Precalculus topics. Aspects of limits and differentiation which students have already seen in MATH 134 are presented briefly, but in most cases with more emphasis on conceptual understanding, and often illustrated using more complicated examples. New calculus topics (i.e. not covered in MATH 134) include one-sided limits, special trigonometric limits, differentiability, derivatives of trigonometric functions and their inverses, derivatives of general inverse functions, logarithmic and implicit differentiation, related rates, L’Hospital’s rule, intermediate values theorem, Rolle’s theorem, mean values theorem, Newton’s method, and linearization. 4 lecture hours plus 1 recitation session each week. Normally offered in fall.

- **MATH-165 Calculus I**
  **Prerequisites:**
  MATH-121 with a minimum grade of C, MATH-075, or MATH level 5

  **Credits:**
  4.00

  **Description:**
  Functions, limits and continuity, squeeze theorem, limits at infinity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; derivatives of other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); applications of the derivative (implicit differentiation, related rates, optimization, differentials, curve sketching, L’Hospital’s rule); anti-derivatives; indefinite integrals; Fundamental Theorem; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

- **MATH-166 Calculus II**
  **Prerequisites:**
  MATH-164 or MATH-165 with a minimum grade of C

  **Credits:**
  4.00

  **Description:**
Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (substitution, by parts, trig integrals, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); improper integrals; infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series (computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

Social, Cultural, & Global Perspectives: 1 course, 3-4 credits Archive 2018-2019

Choose one SCGP course from those listed below:

- **ADPR-217 Gay and Lesbian Studies**
  
  **Credits:**
  4.00

  **Description:**
  Examines the portrayal of homosexuality in political, social, and cultural discourse. Analyzes the role of media and symbolic construction in the shaping of public values, opinions, and social movements.

- **ADPR-219 Rhetoric of Protest and Reform**
  
  **Credits:**
  4.00

  **Description:**
  Examines the persuasive strategies of social reform movements with special emphasis on the civil rights’, women’s rights, and gay rights movements in the United States.
- **ARH-203 Arts of Asia**
  **Credits:** 4.00

  **Description:**
  Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**
  **Credits:** 4.00

  **Description:**
  Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

- **ARH-321 Women, Art and Society**
  **Credits:** 4.00

  **Description:**
  Surveys women artists from the sixteenth century to the present and examines new direction in art-historical scholarship developed by feminist art historians during recent decades.

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**
  **Credits:** 4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations,
Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **AS-500 Asian Studies Internship**
  
  **Credits:**
  4.00

  **Description:**
  Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)

- **BLE-325 Global Business Ethics**
  
  **Prerequisites:**
  BLE-215, PHIL-119, PHIL-120, PHIL-123 or PHIL-127

  **Credits:**
  3.00

  **Description:**
  Surveys business ethics as they transcend the diverse perspectives of global business. Explores current global ethics standards and values, ethical challenges, controversies, convergence and trends. Students explore famous global business cases through films, websites and independent research. Emphasizes identification and resolution of global business ethical issues within the context of ethical decision-making and sustainability. Analyzes corporate social responsibility; hence, transforming global business ethics through business.

- **CI-204 Prague: Castles to Barbwire**
  
  **Prerequisites:**
  At least 24 credits earned.

  **Credits:**
3.00

**Description:**
Prague offers students a more recent view into history and will serve as a backdrop to learning "Design Thinking." The curriculum will use Czech and Central European cultural features as the inspiration for learning the creative process, skills that can be applied broadly and globally across disciplines. WWII and its fall to Communism left the Czech Republic undamaged. Artists played a vital part in the country’s rise to a Republic during the Velvet Revolution. These dissidents, including writers, actors, artists and musicians were innovators who were the catalyst for change. One could say that creative minds changed this country. This course is designed to demystify the creative process by introducing the creative practice as a disciplined approach to problem solving and innovation requiring research. This one-month study abroad experience will offer a more worldly insight to the significance of developing skills where divergent thinking and risk taking are one of many key tools in learning to generate new ideas. Travel fee covers accommodations, transfers, some meals and cultural visits. Airfare and tuition not included.

---

**CJN-216 Intercultural Communication**

**Credits:**
4.00

**Description:**
An examination of communication variations and cultural viewpoints and their impact on cross-cultural communication. A special emphasis is placed on rituals and message patterns in non-Western cultures.

---

**CJN-225 World Cinema**

**Credits:**
4.00

**Description:**
An introductory course in film studies with a focus on foreign films. Movies studied include masterpieces of cinema from Europe, Asia, the Middle East, and other nations (Films have subtitles).

**Description:**
The relationship between cultural diversity and schooling is explored by examining impediments to academic achievement and advancement by minority students, non-native English speaking students, and other under-represented groups. Topics include: standardized testing, identification of inequities, legal and ethical responsibilities of teachers, and promoting equity. Ten pre-practicum observation hours required for teacher candidates.

**EDUC-315 Strategies for Working With English Learners**

**Credits:**
4.00

**Description:**
This course examines the specific needs and challenges of the various language and cultural groups in schools. Topics include: theories of 1st and 2nd language acquisition, strategies for teaching academic content, modifying instruction in the mainstream classroom, creating classroom cultures that invite all students into learning, the role of advocacy and professional collaboration in ESL, and analysis of policies related to assessment and placement of English Language Learners.

**ENG-123 Great Books of the World I**

**Credits:**
4.00

**Description:**
Literary masterpieces from ancient times to the Renaissance, including: Homer’s Odyssey, Sophocles’ Oedipus, Virgil’s Aeneid, selections from the Hebrew Bible and the Gospels, and Dante’s Divine Comedy. List may vary at the discretion of the instructor.

**ENG-124 Great Books of the World II**

**Credits:**
4.00

**Description:**
This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptomist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

- **ENG-135 World Literature in English**

  **Credits:**
  4.00

  **Description:**
  A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

- **ENG-216 World Literature in English**

  **Prerequisites:**
  WRI-102 or WRI-103

  **Credits:**
  4.00

  **Description:**
  A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. </tbody>
</table>
**Description:**
Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.

**GVT-208 Politics / Religion**

**Credits:**
4.00

**Description:**
This course explores the relationship between politics & religion in the United States. How and why does religion influence politics in the U.S? What does freedom of religion mean in the U.S? Why do some groups today erroneously claim that the U.S. was founded as a "Christian nation"? This course also examines what major world religions say about the status and responsibilities of the state and the roles that minority religious groups (Buddhism, Islam, etc.) play in U.S. politics.

**GVT-281 Intro to Comparative Politics**

**Prerequisites:**
GVT 110, GVT 115, and GVT 120 or consent of instructor; Sophomore status or higher

**Credits:**
4.00

**Description:**
Introduces various approaches of comparative politics, such as institutionalism, structuralism, political culture, corporatism, state-society relationship, political economy, etc. Applies the different approaches to explain how various factors
affect government institutions, sociopolitical and economic development in different societies. An effort is made to include countries from all regions of the world. Normally offered every semester.

- **GVT-359 Hockey, International Development & Politics**

  **Credits:**
  4.00

  **Description:**
  This class examines the way in which national identity, global and regional economics and international development intersect. It uses the professionalization of the sport of hockey and its subsequent spread around the globe as its case. It will look at the rise of the pro game, the way in which it shapes national identity in the Canadian case, the way in which the pro business model has changed in response to broad socio-economic changes in North America and geo-political shifts around the globe, especially in Eastern Europe and the Former Soviet Union.

- **GVT-467 Comparative Social Movements**

  **Prerequisites:**
  Junior status

  **Credits:**
  4.00

  **Description:**
  How do we explain the appearance or absence of social movements? What social or individual factors explain their development and decline? Who joins social movements? Who does not? Why? What ideas or ideals animate those who do participate? What is it like to be part of a social movement? What effect do they or have they had on politics, power and efforts at social change? These are some of the questions that have traditionally shaped debates over social movements, both domestically and internationally. They will form the analytical core of the work in this course. By critically evaluating several competing schools of thought in social movement theory and history we will attempt to highlight the social forces that have, at varying points in times, facilitated, maintained, as well as blocked the development of social movements in the US and beyond.
### HST-100 Introduction to Asian Studies: Culture, People, Ideas
**Credits:**
4.00

**Description:**
An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, the Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

### HST-103 Cultures and Social Transformations in Asia
**Credits:**
4.00

**Description:**
Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

### HST-247 History of Modern Middle East
**Credits:**
4.00

**Description:**
Explores the broad historical forces, conflicts and major events that have shaped the contemporary nations of the modern Middle East. Topic include: the emergence of the modern Middle East from the empires of the sixteenth and seventeenth centuries; the age of colonialism; the rise of nationalism; socialism, capitalism; the impact of Israeli and Palestinian conflict on the region; oil, the Islamic Revolution in Iran and the rise of Islamic fundamentalist movements; U.S. policy; and Saddam Hussein's Iraq.
- HST-250 A History of Martial Arts in Movies
  **Credits:**
  4.00

  **Description:**
  Outlines the history of Chinese martial arts in five movies, highlighting Chinese views of violence, personal loyalty, government, and justice.

- HST-251 Modern East Asia
  **Credits:**
  4.00

  **Description:**
  China, Japan, and Korea - East Asia’s critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

- HST-252 The Rise of China: Through Films, Media, and History
  **Credits:**
  4.00

  **Description:**
  Discusses the rise of China as the world’s largest economy and its impact on our life through films, media, and history.

- HST-263 Comparative Race Relations
  **Credits:**
  4.00

  **Description:**
  Compares and analyzes the history of race and politics in South Africa and the United States from the 17th century to the present. Examines how race as a social and ideological construct influenced and informed political conflicts over land,
labor, and social relations in the two countries including slavery, segregation, apartheid, and the struggle to create racial democracies.

- **HST-268 History of the Mediterranean**
  **Credits:**
  4.00
  **Description:**
  Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

- **HST-274 Women in 19th-Century Europe**
  **Credits:**
  4.00
  **Description:**
  Explores the condition of European women from 1800 to 1914. Readings focus primarily on women's experiences in France and Great Britain. Topics include: the effects of industrialization on the lives of working-class women; working and middle-class women's negotiation of marriage, work, and family life; the rise of feminism, women's greater participation in the public sphere, and conservative reaction to these changes in women's place in society; women and crime; Victorian ideas about female sexuality; the politics of class and gender in nineteenth-century European society.

- **HST-275 Women in 20th-Century Europe**
  **Credits:**
  4.00
  **Description:**
  Examines the changing place of women in European society since 1900. Topics include: women's suffrage and the political advances of the 1920s and 1930s; the revolution in sexual mores, birth control, and the rise of companionate marriage; women and the consumer economy; the anti-woman policies of Fascist Italy and
Germany under National Socialism; liberation of women and retrenchment in the Soviet Union; World War II; feminism, sexual liberation, and women's political engagement since the 1960s; and, throughout the twentieth century, women's continuing negotiation of work and family responsibilities.

- **HST-321 History of Islam**
  **Credits:** 4.00
  **Description:**
  Presents a coherent account of the origin and history of Islam since its foundation in Arabia in the seventh century A.D. to the present. Analyzes the terms, events, characteristics, developments, movements, and institutions that have been part of the shaping of Islam. Ideological challenges and impact of Islam in the world today from both spiritual and political perspectives are examined.

- **HST-371 U.S. Women’s History Colonial to 1865**
  **Credits:** 4.00
  **Description:**
  Traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism legal status, labor activism and popular culture. With attention to ethnicity, race, class, age, region of residence, disability and sexual orientation, the course focuses primarily on the everyday lives of ordinary women.

- **HST-484 History of the Emotions**
  **Credits:** 4.00
  **Description:**
  Explores ideas about emotional life from the fields of history, anthropology, sociology, and psychology as well as the evolution of emotion rules and prescriptions, focusing on western Europe and the United States since 1700. In the
eighteenth century, emotions were seen as a positive influence on politics and public life, especially during the French Revolution. After the fall of Robespierre, the emotions were banished to the private sphere - so we will read both primary sources and recent scholarship on 19th- and 20th- century ideas about masculinity and femininity, romantic love and marriage, childrearing, and about what parents and children are supposed feel toward each other, how ideas about these subjects have changed over time, and whether our feelings change with them.

- **MUH-223 World Music**  
  **Credits:** 4.00
  
  **Description:** Covers topics in folk, traditional, and modern music of Africa, the Middle East, Asia, and Europe in the context of the cultures and lives of the indigenous peoples of those regions; examines how music interacts with the issues of race, gender, class, religion, politics, and social movements. Normally offered every other year.

- **P.AD-201 Social Change**  
  **Credits:** 3.00
  
  **Description:** This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women’s movement, environmentalism, and the gay and lesbian movement.

- **P.AD-H201 Honors Social Change**  
  **Credits:** 3.00
This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women’s movement, environmentalism, and the gay and lesbian movement.

PHIL-120 Ethics and Civic Life
Credits: 4.00

Description:
In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.

PHIL-228 Feminist Philosophy
Credits: 4.00

Description:
This course is an introduction to the philosophy of feminist thought. Feminist theories of epistemology, metaphysics and morality will be examined as critiques of traditional philosophy. Feminist perspectives and methodologies include radical, liberal, postmodern, as well as more recent trends in ecofeminism. Special emphasis will be placed on explicit and implicit practices of alienation and exclusion as they have unfolded in the “gendering” of thought, truth, and reality. 1 term - 4 credits. Normally offered every third year. Cb

PHIL-229 Eco-Feminism
Prerequisites: PHIL 119, or PHIL 123, or PHIL 127

Credits: 4.00

Description:
Examines the political, social, and ecological problems facing us as a global community. Having its roots in feminist theory and deep-ecology, eco-feminism provides a critical framework for ecological responsibility and accountability. Writings from eco-feminist thinkers and environmental activists around the world will be used to highlight the philosophical and political conflicts and challenges, including globalization and loss of biodiversity, global warming, international human rights, the relationship of gender and nature, and modes of redress for eco-justice and sustainable development.

An exploration into the various dimensions and ideologies concerning the role of the feminine in relation to the Divine. Belief systems, myths and archetypes from ancient Goddess worship to 20th century feminist theology will be examined in terms of the philosophical content and psychological consequences. Special emphasis will be placed on feminist metaphysical structures for understanding consciousness and Reality. Classes will be conducted by means of lectures, primary and secondary texts and class discussions. Normally offered alternate years.

Cultural Diversity A

PHIL-267 Chinese Philosophy

Credits: 4.00

Description:
A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course then considers Zen Buddhism, which is called Ch’an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.

PSYCH-243 Organizational Psychology

Prerequisites:
Take PSYCH-114;

Credits: 4.00

Description:
Explores the application of psychological theories and principles to organizations and the workplace with attention to the role of culture and context. Topics includes job analysis, recruitment, selection, evaluation, training, retention, and termination. Employee morale, well-being, stress, and hardiness are considered.

PSYCH-247 Asian Perspectives on Health and Work
Credits:
4.00

Description:
Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants.

RS-111 Introduction to World Religions: Western Traditions
Credits:
4.00

Description:
This course will explore the comparative history and structure of Western religious traditions, broadly understood, and their impact on other world religions, while attempting to recognize the similarities and the differences among them. Traditions to be studied include Greek and Roman religion, the monotheistic faiths (Judaism, Christianity, and Islam, as well as Zoroastrianism, Sikhism and Bahaiism). We will also explore the impact of the Western religions on indigenous traditions, such as African religion, Native American religion, and Pacific Island religion. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. 1 term - 4 credits. Normally offered every year.

RS-112 Introduction to World Religions: Eastern Traditions
Credits:
4.00

Description:
This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting
to recognize the similarities and the differences among them. Attention will be
given to the reading of original texts when available. Requiring students to observe
religious ceremonies will enhance practical understanding of many of the above
traditions. Normally offered every year. Cultural Diversity B

- SIB-550 Global Travel Seminar
  Prerequisites:
  Please email Hillary Sabbagh at hsabbagh@suffolk.edu to register for a travel
  seminar.

  Credits:
  3.00

  Description:
  An in-depth analysis of timely special issues in international business. Specific
topics are announced when the course is scheduled.

- SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American
  Hoop Dream
  Credits:
  4.00

  Description:
  This course is about the basketball hoop dream played out at the high school and
college levels. We will study a wide variety of materials - novels, films, websites,
reference works - to understand both the construction, and destruction, of the
hoop dream in such diverse places as New York City, Seattle, rural Indiana,
suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and
culture will serve as guiding themes as we develop critical theory explaining why
the hoop dream has persisted, and adapted, over time, to fit the needs of its
believers and supporters.

- SF-190 Asia in America Fiction and Fact
  Credits:
  4.00
**Description:**
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

---

- **SF-1145 Emergence of Southeast Asia**

**Credits:**
4.00

**Description:**
Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

---

- **SOC-218 Crime and Law in Indian Country**

**Credits:**
4.00

**Description:**
What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.
- **SOC-227 Race in American Society**  
  **Credits:** 4.00

  **Description:**  
  Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

- **SOC-228 Cultural, Global and Social Perspectives**  
  **Credits:** 4.00

  **Description:**  
  Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.

- **SOC-275 Women and Crime**  
  **Credits:** 4.00

  **Description:**  
  This course examines the complex relationships between women and crime today. This focus will include women as criminal offenders; women as victims of crime; and women as both offenders and victims. Course materials draw from recent feminist
scholarship on these issues in the social sciences. Topics include the causes of women’s crime women, drugs, and crime; child abuse and trauma; prostitution and sex trafficking; race, gender and victimization; and feminist social movements against violence. Crimes of violence against women are a central focus in the course.

**SOC-329 Sociology of Globalization**

**Prerequisites:**
Prerequisite: SOC 113 or SOC 116.

**Credits:**
4.00

**Description:**
Globalization is shrinking the world. How and why did this happen? This course will explore global change and the global processes which effect key social institutions: culture, the economy and politics. Students will study the processes of globalization and its impact on our lives and people around the globe.

**SOC-341 International Drug Control Policy**

**Credits:**
4.00

**Description:**
Relying on a simplistic demand or supply explanation of why Americans use/abuse drugs obscures the reality of America’s drug problem, is ineffective as a guide to public policy and has unforeseen, often negative consequences. Drug use is a complex and multi-faceted issue. There are no easy answers. To comprehend the complexity of America's drug problem one needs an understanding of the geography, history, religion, law, economics and international politics of the Middle and Far East, Eastern Europe, Africa, Mexico, and Central and South America. This class will provide this basic understanding without losing sight that the problem we seek to remedy is our own.

**SOC-354 Death and Dying**

**Credits:**
Description:
An examination of changing definitions of life and death, social factors affecting causes and rates of death, care of the dying and their families, institutionalization, the funeral industry, suicide, crisis intervention, and the impact of technology on the dying process.

Description:
An examination of how different cultures understand health and illness. Healing approaches from Asia, Africa and the Americas will be explored.

Description:
Continues skills development from 201. Students read a collection of short stories, write compositions, develop cultural insights through comparative and contrastive assignments, and practice listening and speaking skills in weekly conversation sessions.

Description:
Prerequisite: Spanish 202, 203 or 250 or Instructor’s consent
**Description:**
Develops written and oral skills in various contexts and registers. Emphasis on strengthening written skills and learning to speak clearly and persuasively in Spanish. Short texts and audio-visual materials provide the basis for classroom activities which include regularly assigned essays, group discussions and debates.

**SPAN-300 Intro to Cultural Texts**

**Prerequisites:**
Spanish 202, 203, 250 or Instructor's consent.

**Credits:**
4.00

**Description:**
Explores a selection of Peninsular and Latin American cultural materials. Primarily examines texts from different literary genres (narrative, drama, essay, and poetry). Develops critical skills required in more advanced Spanish courses, through close readings and textual analysis. Activities include regularly assigned essays, group discussions, and short scene work.

**SPAN-301 Spanish Culture and Civilization**

**Prerequisites:**
Spanish 202, 203 or 250. Spanish 290 or 300 are strongly recommended.

**Credits:**
4.00

**Description:**
Examines the civilization and culture of Spain highlighting its historical development and cultural manifestations from pre-historic times to the nineteenth century. Students improve their four skills through activities that include discussions, oral presentations, and writing assignments based on reading and films.

**SPAN-302 Indigenous and Colonial Latin America**

**Prerequisites:**
Spanish 202, 203 or 250 or Instructor's consent. Span 290 or 300 strongly recommended.

**Credits:**
4.00

**Description:**
Introduces students to the complexity Latin America by examining its roots in pre-Columbian America and the impact of Spanish exploration and colonization. Places emphasis on cultural, economic, historical, philosophical, political and religious patterns that define the region. Includes class discussions, oral presentations, and writing assignments based on reading and audio-visual material.

---

**SPAN-303 Modern and Contemporary Latin America**

**Prerequisites:**
SPAN 202 or 203 or Instructor's consent. SPAN 290 or 300 strongly recommended.

**Credits:**
4.00

**Description:**
Examines the path taken by Latin American and Caribbean countries to build independent nations out of colonial territories highlighting the 19th, 20th, and 21st centuries, ethnic plurality, and cultural complexity in areas such as politics, religion, sociology, economics, customs, music & film. The cultural contributions of Spanish-speaking minorities in the United States are also addressed. Includes class discussions, oral presentations, and writing assignments based on readings and audio-visual material.

---

**SPAN-315 Spanish for the Professions**

**Prerequisites:**
SPAN 290 or SPAN 300 or Instructor's consent.

**Credits:**
4.00

**Description:**
Integrates language learning with culture via business context of the Hispanic world. Spanish for banking and finance, marketing and advertising, and international commerce are highlighted. Students increase their cross-cultural understanding and written and oral proficiency in business Spanish through a wide range of assignments.

- **SPAN-390 Introduction to Latin American and Caribbean Literature**

**Prerequisites:**
SPAN 300; SPAN 302 is strongly recommended

**Credits:**
4.00

**Description:**
Examines authors from Latin America and the Caribbean in their historical and cultural contexts. Reading and class discussions consider the relationship between the writer and society by covering such topics as colonialism, the oral tradition, modernism and the emergence of new narratives in the twentieth century. The Inca Garcilaso, Sor Juana, Carlos Fuentes, Rigoberta Menchu, and Pablo Neruda are among some writers studied.

- **THETR-260 Broadway Musicals**

**Credits:**
4.00

**Description:**
This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

- **THETR-267 Introduction to Theatre: Contemporary American**

**Credits:**
4.00

**Description:**
This course provides a formal introduction to the theories and practices strategically used by American theatre artists after the Second World War. Special emphasis is placed on theatre artists exploring issues of cultural identity including works by GLBT, African-American, Asian-American, and Latin American playwrights. These playwrights may include Tony Kushner, Paula Vogel, Suzan-Lori Parks, Adrienne Kennedy, August Wilson, David Henry Hwang, Philip Kan Gotanda, Eduardo Machado, and Melinda Lopez. The course will also provide an introduction to trends in post-modern theatre practices related to emerging work of the auteur director, solo performers, and interdisciplinary collectives. Satisfies a core requirement for Theatre majors. Normally offered alternate years.

— **WGS-111 Women, History, and Culture**

**Credits:**
4.00

**Description:**
Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

— **WGS-H111 Women, History, & Culture**

**Prerequisites:**
At least a 3.3 GPA required.

**Credits:**
4.00
Description:
Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

— WGS-113 Women, Science, and Society
Credits: 4.00

Description:
Explores women’s lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the female body and eating disorders; women’s health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

— WGS-115 Introduction to Gender Studies
Credits: 4.00

Description:
Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women’s studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about
gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

- **WGS-235 Gender and Sexuality in Visual Culture**
  
  **Credits:**
  4.00

  **Description:**
  Explores how gender and sexuality are depicted, constructed, and interrogated across a variety of visual mediums, including film, television, and photography. We will pair foundational readings in queer and feminist thought with representations in order to consider how theory and popular culture engage in a constant dialogue. Topics include: the maintenance of norms regarding gender and sexuality; how race, class, and ability complicate our understanding of gender and sexuality; the ways in which sexuality intertwines with other social and political formations; imagining alternative theories and practices in representing gender and sexuality in contemporary media culture. Possible texts include theoretical work by Sigmund Freud, Judith Butler, Rosemarie Garland-Thomson, and David Halperin and media such as The Shape of Water (2017), Blade Runner (1982), Queer Eye for the Straight Guy (2003-2007), and Jess Dugan's To Survive on This Shore (2018).

- **WGS-311 Engendering Entertainment: Feminism and Popular Culture**
  
  **Credits:**
  4.00

  **Description:**
  Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.
- **WGS-315 Feminist Thought**
  **Credits:**
  4.00
  
  **Description:**
  Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldúa, and Judith Butler.

- **WGS-325 Global Women's Fiction**
  **Credits:**
  4.00
  
  **Description:**
  Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

- **WGS-335 Queer Narratives**
  **Credits:**
  4.00
  
  **Description:**
Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's recent memoir, "Redefining Realness", as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

- **WGS-340 Women on Stage**

  **Credits:**
  4.00

  **Description:**
  Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht's alienation effect, and the distinction between performance and the performative.

Courses that fulfill the Creativity and Innovation, Humanities/History, Language, Literature, Quantitative Reasoning, Seminar for Freshmen, Social Science, or VPATH requirements may double count to fulfill the Social, Cultural, and Global Perspectives (SCGP) requirement.

**Science, Technology, & Engineering (STE): 2 courses, at least one with a laboratory, 8 credits**

**Archive 2018-2019**
Choose two STE (Science, Technology, and Engineering) courses, at least one with a corresponding laboratory, from those listed below. Courses do not need to be in a sequence. In the case of a course that is a lecture plus a lab, the student must complete both components to earn credit for the STE requirement.

**Biology:**

- **BIO-105 Humans and the Evolutionary Perspective**

  **Prerequisites:**
  Non Science Majors Only

  **Credits:**
  4.00

  **Description:**
  Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

- **BIO-109 Plants and People**

  **Prerequisites:**
  Non Science Majors Only.

  **Credits:**
  4.00

  **Description:**
  This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also
touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.

- **BIO-111 Introduction to the Cell**
  **Prerequisites:**
  Must take BIO L111 concurrently

  **Credits:**
  3.00

  **Description:**
  Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

- **BIO-L111 Introduction to the Cell Laboratory**
  **Prerequisites:**
  Concurrently with BIO 111

  **Credits:**
  1.00

  **Description:**
  Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

- **BIO-114 Organismal Biology**
  **Prerequisites:**
  Must take BIO L114 concurrently.

  **Credits:**
  3.00
**Description:**
Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO-L114 Organismal Biology Laboratory</td>
<td>A series of laboratory experiences in evolution, diversity, anatomy and physiology.</td>
</tr>
<tr>
<td>BIO-201 Biology’s Big Questions</td>
<td>This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.</td>
</tr>

</thead>
<tbody>
<tr>
<td>CHEM-105 Chemical New Product Development</td>
<td></td>
</tr>
</tbody>
</table>
**Credits:**
4.00

**Description:**
This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

---

**CHEM-106 Biotechnology & Its Applications in Medicine, Agriculture, Law**

**Credits:**
4.00

**Description:**
Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, short documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.

---

**CHEM-111 General Chemistry I**

**Prerequisites:**
Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

**Credits:**
3.00

**Description:**
Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

---

**CHEM-L111 General Chemistry Laboratory**

**Prerequisites:**
MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

**Credits:**
1.00

**Description:**
Introduces the basic principles of chemistry through "discovery" laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

---

**Computer Science:**

---

**CMPSC-F107 Ants, Rumors and Gridlocks**

**Prerequisites:**
Math placement level of 2 or above or any MATH course at the level 100 or above

**Credits:**
4.00

**Description:**
Do viruses and rumors spread like forest fires? How do ants cooperate? Do spoken languages and biological species evolve in a similar way? "Ants, Rumors, and Gridlocks" exposes students to introductory aspects of computational science by addressing and answering these and many other questions. Students use and modify virtual experiments preprogrammed in the NetLogo programming language to investigate these topics and others in Social Sciences, Biology, and Environmental Science. No prior knowledge of computer programming or NetLogo is required.

**Electrical Engineering**

- **ECE-288 Measuring the World**

  **Credits:**
  
  4.00

  **Description:**
  
  The world is addicted to quantifying the essence of everything, from personal IQ, to the speed of a baseball, to our healthiness, or our chances of winning the lottery. Behind most of these numeric values exists a science of measurement. Some of this is referenced to international standards, such as for length, time, weight, or temperature. Others are more arbitrary and subjective, such as ranking Olympic performance in gymnastics, beauty pageants, or popular responses as found in the game show "Family Feud." A third category includes controversial areas, such as measuring whether a person is lying when interrogated, or using hype rather than reality to market products. Sometimes statistics are used to predict sports outcomes, such as in the annual March Madness NCAA basketball brackets. Finally, in a world subject to fraud and deception, it can be essential to distinguish legitimate from counterfeit items, such as in money, art, collectibles, and historical documents. Don’t get hoodwinked! This course examines all of these, starting with how measurements have been made throughout history, along with a full deck of entertaining terms used during the ages. This may help you sort out your weight, whether given in pounds, kilos, or stones. Often these terms will provide insights into how people lived in different eras. We will also look at some of the technologies currently available to provide these measurements, and unravel the complexities of various sensors that are used. As we consider the meaning of “accuracy” we may become less naive about how much confidence to ascribe to the results given us. Hovering around all of these measurements should be the question.
of validity - are they meaningful, useful, or misleading? And the impact they have on society - whether they steer behavior more powerfully than one might originally suspect. Each student will also be given an opportunity to become an "expert" in an area of measurement of personal interest. By the end of the course all students should have gained greater insight into how the world around them is quantified, and whether numbers can provide accurate predictors for our future. Algebra helpful. Basic science background helpful. Curiosity essential!

**Engineering Science:**

- **ENS-103 Introduction to Engineering**

  **Prerequisites:**
  ENS L103 MUST BE TAKEN CONCURRENTLY.

  **Credits:**
  3.00

  **Description:**
  "This course provides exposure to engineering practice, with particular focus on electrical engineering components such as circuit elements and systems. It seeks to go beyond the mathematics and provide an intuitive appreciation of functional devices. Examples taken from a broad swath of technological history illustrate significant crossroads, decisions, and inventiveness. Emphasis is placed on learning to think as an engineer - assessment of problems, candidate solution tradeoffs, and implementations. Frequent exercises in creative engineering design will be used. Students will be required to design several elementary devices, such as a magnet, a capacitor, a timing device, and a motor, which they will enter in a competition for overall strength, compactness, accuracy, or speed. Sometimes assignments relate to "'survival on an island'" concerns, such as communication or drinking water. Students also learn about reverse engineering by selecting, building, troubleshooting, and presenting an electronic kit of their choice. A term paper determining the engineering behind a topic of their choice will also be written and presented. On occasion (see ENS L103) there will be team competitions between various smaller groups in the class."
Prerequisites:
Must be taken Concurrently w/ ENS-103

Credits:
1.00

Description:
The Lab is designed to provide opportunities to gain familiarity with engineering tools. Students will be introduced to parts (e.g. learn the resistor color code), test equipment (multimeters, prototyping trainers, signal generators, and oscilloscopes), and construction techniques (wiring, soldering, troubleshooting). Although it varies from year to year, Class Projects can be built during the Lab sessions. In the past these have included a 25 Watt electric generator, various door lock systems (both mechanical and electronic), and an AM transmitter and receiver (all projects made from scratch). It is likely that 2010-2011 may introduce some robotic creations for a competition. Electronic kits and motors can also be built and serviced in the Lab. There is an adjoining machine shop, which can be utilized (with supervision), for fabricating items. Individual creativity is encouraged, and informal problem solving sessions occasionally occupy lab time. However, the lab is accessible outside of the traditional scheduled time.

Environmental Science:

- UES-107 Introduction to Drones
Prerequisites:
UES-L107 must be taken concurrently.

Credits:
3.00

Description:
Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities...
inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration’s Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

− **UES-L107 Introduction to Drones Lab**

**Prerequisites:**
UES-107 must be taken concurrently.

**Credits:**
1.00

− **UES-111 Environmental Science**

**Prerequisites:**
Take UES-L111 concurrently

**Credits:**
3.00

**Description:**
Applies the fundamentals of science to environmental issues. Topics include population dynamics and resources, environmental degradation, ecosystems, geologic processes, deforestation, biodiversity, climate change, air, soil, and water resource management, and pollution and risks to health.

---

- **UES-L111 Environmental Science Lab**

**Prerequisites:**
Take UES-111 concurrently

**Credits:**
1.00

**Description:**
Laboratory exercises are used to illustrate topics covered in UES 111. Field testing and analysis of environmental samples. Field trips may be required.

---

- **UES-121 Science, Art, and the Environment**

**Prerequisites:**
Take UES-L121 concurrently

**Credits:**
3.00

**Description:**
Examines art and cultural objects through the lens of the biological, chemical, and physical principles of the materials and processes we use to make them. Includes consideration of factors important in art conservation. Provides an environmental context for the manufacture and use of art materials and the preservation of cultural objects.

---

- **UES-L121 Science, Art, and the Environment Lab**

**Prerequisites:**
Take UES-121 concurrently
Credits: 1.00

Description:
Providers hands-on work with pigments, dyes, and other art materials using the basic principles of science and technology. Students will conduct laboratory experiments that produce art objects and other consumer products. Instruction in safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables, graphs, and graphics. Practice in synthesizing compounds like paints and finishes and in evaluating methods of art conservation.

UES-225 Geographical Information Science

Prerequisites:
Take UES-L225 concurrently

Credits: 3.00

Description:
Provides the fundamentals of geographic information science (GIS) including the history of automated mapping. A review of the necessary hardware and software elements used in GIS is presented. Hands-on exercises with computerized mapping software are required.

UES-L225 Geographic Information Science Lab

Prerequisites:
Take UES-225 concurrently

Credits: 1.00

Description:
Required companion computer laboratory to be taken concurrently with UES 225.

UES-270 SL-Understanding Wetlands Through Citizen Science
**Credits:**

4.00

**Description:**
In this course students meet community needs by engaging in service-learning outside the classroom. Develops students’ awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps. The beginning of the semester is devoted to understanding of how these vital ecosystems function with topics including wetland hydrology, biogeochemistry, management, and restoration. The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner.

---

- **UES-H270 Honors SL Understanding Wetlands Through Citizen Science**

**Prerequisites:**
Honors student or at least 3.3 GPA

---

**Credits:**

4.00

**Description:**
In this course students meet community needs by engaging in service-learning outside the classroom. Students’ awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps will be developed through exploration of these vital ecosystems (topics include wetland biology, management, and restoration). The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner where students will be going into the field three times over the course of the semester via pre-arranged private transportation.

---

**Forensic Science:**

- **FS-103 Introduction to Forensic Science**

**Prerequisites:**
FS-L103 concurrently

**Credits:**
3.00

**Description:**
Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall

---

**FS-L103 Introduction to Forensic Science Lab**

**Prerequisites:**
FS-103 concurrently

**Credits:**
1.00

**Description:**
Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall

---

**Neuroscience:**

---

**NEUR-101 Intro to Neuroscience**

**Credits:**
4.00

**Description:**
Introduces the field of neuroscience, the study of the organization and function of the nervous system of humans and other animals. Topics include the neuron and neural transmission, the overall function and organization of the nervous system, the development of the brain, neural plasticity, sleep, memory and other higher cognitive functions.
Physics:

- **PHYS-111 College Physics I**
  
  **Prerequisites:**
  Take MATH-121 or MATH-134 or MATH-165 or permission of Physics department chair; PHYS-L111 taken concurrently
  
  **Credits:**
  3.00

  **Description:**
  Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.

- **PHYS-L111 College Physics Lab I**
  
  **Prerequisites:**
  PHYS 111 concurrently
  
  **Credits:**
  1.00

  **Description:**
  Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks and formal reports required.

- **PHYS-151 University Physics I**
  
  **Prerequisites:**
  MATH-121 or higher (previously or concurrently) and PHYS L151 concurrently
Credits: 3.00

Description:
PHYS 151 is the first of three courses (PHYS 151, 152, 153) that comprise the calculus based introductory physics sequence at Suffolk University intended for students majoring in the physical sciences, engineering and mathematics. This course aims to teach basic techniques in physics that fall under the topic of classical mechanics and their application in understanding the natural world. Specific topics include the study of vectors, Newton’s laws, rotations, rigid body statics and dynamics, fluid mechanics, simple harmonic motion, mechanical waves, sound and hearing. The student will learn how to analyze physical situations by using simple models, and also how to solve those models and derive useful conclusions from them. This course will show students how experimental results and mathematical representations are combined to create testable scientific theories, and how the complexities of most real-life physical situations can be reduced to simple problems by identifying the essential physical features and ignoring the rest. The student will learn to distinguish the scientific approach to physical situations from other ways of looking at them, for example, artistic, humanistic, and business.

- PHYS-L151 University Physics Lab I

Prerequisites:
MATH 121 or higher (previously or concurrently) PHYS 151 concurrently

Credits: 1.00

Description:
The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton’s laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

- PHYS-152 University Physics II

Prerequisites:
PHYS-151 and PHYS-L151. Must be taken concurrently with PHYS-L152.
Credits: 3.00

Description:
This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss’ law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday’s law and AC circuits are discussed. This is followed by Maxwell’s equations, electromagnetic waves, and properties of light.

— PHYS-L152 University Physics Lab II
Prerequisites:
PHYS 151 and L151 and PHYS 152 must be taken concurrently

Credits: 1.00

Description:
The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday’s law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

— PHYS-153 University Physics III
Prerequisites:
MATH-121, MATH-164, or MATH-165; PHYS-151; PHYS-L153 concurrently

Credits: 3.00

Description:
This calculus-based course is the introduction of the topics of modern physics. It begins with special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom. Then Schrodinger’s equation is
introduced with use of wave functions, particle box, barrier penetration, quantum mechanical tunneling, the Pauli Exclusion principle, the development of the periodic table, and the X-ray spectra. Development of solid state physics with bonding in molecules, band theory of solids and semiconductor behavior. The final topics cover nuclear physics, radioactivity, half-life, nuclear fission and fusion, medical uses of radiation, elementary particle physics and introduction to astrophysics.

– PHYS-L153 University Physics III Lab

**Prerequisites:**
PHYS-153 concurrently

**Credits:**
1.00

**Description:**
The laboratory consists of experiments to illustrate the basic concepts of special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom.

**Science:**

– SCI-103 Environmental Science

**Prerequisites:**
SCI-L103 must be taken concurrently

**Credits:**
3.00

**Description:**
Case study approach to the fundamentals of science applied to environmental degradation, ecosystems, geological processes, population dynamics, deforestation and biodiversity, climate change, ozone depletion, air soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment.
- **SCI-L103 Environmental Science Lab**

  **Prerequisites:**
  Must take SCI-103 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.

- **SCI-108 Introduction to Cancer Care**

  **Credits:**
  4.00

  **Description:**
  Introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants.

- **SCI-109 SL-Introduction to Community Cancer Care**

  **Credits:**
  4.00

  **Description:**
  Students meet community needs by engaging in service-learning outside the classroom. This course introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants. Service-learning is a pedagogy...
integrating academically relevant service activities that address human and community needs into a course. Students connect knowledge and theory to practice by combining service with reflection in a structured learning environment. Students will engage in service-learning with an underserved community partner in regards to cancer by working directly with cancer patients or by assisting on a project that supports cancer patients.

- **SCI-111 Introduction to Astronomy**

  **Prerequisites:**
  MATH-128 or higher and SCI-L111 must be taken concurrently.

  **Credits:**
  3.00

  **Description:**
  History of Astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors; space programs, science and technology in society. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations. For non-science majors.

- **SCI-L111 Introduction to Astronomy Lab**

  **Prerequisites:**
  Take SCI-111 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory experiments and exercises to illustrate the principles discussed in Science 111. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations.

- **SCI-112 Structure of the Universe**

  **Prerequisites:**
MATH-128 or higher and SCI-L12 concurrently

**Credits:**
3.00

**Description:**
Astronomy of the cosmos; sun, stars, interstellar materials, galaxies, pulsars, quasars, black holes; nature of time relativity, cosmology. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations. For non-science majors.

- **SCI-L112 Structure of the Universe Lab**
  **Prerequisites:**
  Take SCI-112 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory experiments and exercises to illustrate the principles discussed in Science 112. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations.

- **SCI-113 A Habitable Earth Within the Solar System**
  **Credits:**
  4.00

  **Description:**
  This course introduces non-science majors to concepts that are central to making our planet habitable. It presents Earth in context of the solar system with a broad view of global climate change and energy resources in a quest to better understand the workings our planet. This course on Earth and Planetary Science is suitable for students who may have taken their last science and math course several years ago, or are just curious about knowing facts on major issues that pertain to the future of our planet. Together with a reading component, this course aims to give students a
flavor of how researchers think, investigate and develop conclusions that directly affect our political and economic future. Topics covered in this course range from the solar system to the study of search for other habitable Earth-like planets, search for extraterrestrial life, and evolution of life on Earth. Other characteristics of this course are heavy use of audio-visual materials often including computer animations and simulations, in-class experiment demonstration, and intensive use of INTERNET-based resources.

- **SCI-165 Inner Workings of Physics Universe**

  **Credits:**
  4.00

  **Description:**
  About 15 billion years ago, (data indicate) the big bang occurred and the universe was born. With it came physical laws and a spectacular array of consequences that lead to the universe as we know it. This non-lab, 4 credit course explores the inner workings of the physical universe in terms of the scientific inquiry which lead to Newton's laws, an understanding of energy, waves, light, electricity, atomic structure, chemical reactions, nuclear physics, particle physics, relativity, and the big bang theory. During the course, students will learn to make use of modern resources to access scientific and technical literature to research a scientific topic. They will learn to distinguish between science and technology (e.g. quantum mechanics and nanotechnology, the discovery of the Higgs boson and the large hadron collider that made it possible, etc.) and to understand how the science, technology, and engineering disciplines play a crucial role in recognizing and solving problems of society and the world that we share.

- **SCI-171 The Built World: How Humans Engineer Environments**

  **Credits:**
  4.00

  **Description:**
  The most basic needs of humans have not changed - water, food, and shelter - but the means of meeting these needs has. In this course, we will examine how technology-driven societies operate by studying how cities are built and how they function. Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design),
and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.

---

**SCI-173 Mapping Our World The Power of Digital Maps**

**Prerequisites:**
SCI-L173 must be taken concurrently.

**Credits:**
3.00

**Description:**
Geographic Information Science (GIS) link information (number of fire hydrants on a block) to features on a map (e.g., a point representing street address) that has a designated geographic location (as designated by global coordinates). Unlike paper maps, GIS software allows the production of interactive maps that allows the user to layer data, to indicate spatial patterns, to analyze trends, and to combine different features of the mapped area in novel ways. For example, a business person may wish to use GIS to determine the optimum location of retail outlet (based on the mapped demographics of a neighborhood), while an environmental engineer may use GIS to describe the location of outfalls to see how they correlate to areas of stream pollution. In this course, students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

---

**SCI-L173 Mapping Our World Lab**

**Prerequisites:**
SCI-173 must be taken concurrently.

**Credits:**
1.00

**Description:**
This laboratory illustrates concepts and methods taught in SCI 173. In this lab students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type...
applications is presumed.

- **SCI-181 Science and Life in the 21st Century**
  **Credits:**
  4.00
  **Description:**
  No longer offered on Boston campus. This is a four credit, non-lab, science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.

- **SCI-184 Contemporary Science and Innovation**
  **Credits:**
  4.00
  **Description:**
  This is a 4 credit, project based science course that examines the central scientific problems confronting the 21st century. The course consists of lectures, class discussions, field trips, and in-class hands-on activities designed to familiarize the student with different concepts of the lectures. The current focus is on sustainable energy production. A final team project related to the course topics will be given. This is the version of SCI 183 without a separate lab component. Students who have taken SCI 183, L183 are not allowed to take this course.

- **SCI-201 Physics for Future Presidents**
  **Credits:**
  4.00
  **Description:**
  This course presents a topical introduction to the key principles and concepts of physics in the context of the world events and natural phenomena that confront world leaders and that require informed decisions and responses. Energy, health, counter-terrorism, remote sensing, space programs, nuclear proliferation, and a
host of other modern challenges have technological and scientific dimensions, the understanding of which is essential to avoiding disastrous policy decisions. This course considers the application of physics to these societal challenges. The material is covered at a level and pace that a future world leader should be able to handle; the emphasis is on the development of physical reasoning skills, and not on detailed, mathematical problem solving.

- **SCI-210 Earth and Planetary Crystals**
  **Prerequisites:**
  Take SCI-L210 concurrently

  **Credits:**
  3.00

  **Description:**
  This course will provide undergraduate students of various disciplines with an introduction to gems and crystals using interactive, evidence-based teaching approaches. Crystalline forms of matter are critical to our existence. Using innovative teaching strategies of in-class hands-on demonstration, supplemented with visuals of crystal details, the course provides students insights into the formation, alteration and unique properties that make crystals invaluable. Topics range from the study of proteins and nucleic acids to the interior of planets. The in-class lectures will provide a basic guide that will serve as a platform for individually catered in-depth study. Therefore, the course is open to advanced students as well, who can pick up higher level of information for discussion and class projects.

- **SCI-L210 Earth and Planetary Crystals Laboratory**
  **Prerequisites:**
  Take SCI-210 concurrently

  **Credits:**
  1.00

  **Description:**
  This course introduces concepts that are central to understanding crystals, gemstones and other natural materials abundant throughout the solar system. It includes an introduction to carbon-based crystals (diamonds, proteins, viruses and
ices) in context with origins of life, geopolitical significance and their applications. This laboratory-based course is an introduction to modern tools and techniques for crystal analysis with a historical context of some of the greatest discoveries in science (DNA, and other nanomaterials). It presents crystals and gems from their visually appealing point of view to their sometimes-dramatic physical characteristics, with a broad view of their formation, occurrence, physics, chemistry and resources perspective.

Some Science division courses may have Math or Computer Science prerequisites; many have other Science prerequisites.

**Studies in Literature: 1 course, 4 credits Archive 2018-2019**

Choose one Studies in Literature course from those listed below:

- **ENG-113 World Drama I**
  
  **Credits:**
  4.00
  
  **Description:**
  Survey of drama and theatre as part of world culture from classical Greece through 18th-century China. Normally offered yearly.

Study of poetry, prose, and drama from the American literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author's craft and relationship to the reader. Offered every semester.

**ENG-151 Introduction to African-American Literature**

*Credits: 4.00*

**Description:**
Literature has the capacity to record and interrogate history in an imaginative and artistic context. African-American literature is a rich, varied, and complex body of literature that faces our tainted history directly. The authors we will read in this class examine slavery's long-term psychological and social effects while forging a literary history that is at once a part of and apart from American literary history more generally.

**ENG-152 Horror Fiction**

*Credits: 4.00*

**Description:**
This course focuses on the reading and analysis of horror literature and the ways in which horror reflects and represents personal and cultural anxieties. Readings will include both classic and contemporary authors, for example, Edgar Allan Poe, H.P. Lovecraft, Shirley Jackson, Stephen King, and others. Assignments will include analytical essays as well as creative writing.

**ENG-153 Literature of War**

*Credits: 4.00*

**Description:**
This course will examine a wide range of writers and film makers who have sought to bridge the gap that exists between those who have experienced war and those who have not. Some stories we will examine are told from an American perspective;
some are told from the perspective of soldiers who fought against Americans; and some are told from those who experienced life under U.S. military occupation.

- **ENG-154 Bob Dylan and the Beat Generation**
  
  **Credits:**
  4.00

  **Description:**
  A study of literary works by the so-called “Beat Generation,” the American literary underworld of the late 1950s and 1960s, including major works by the three central figures (Ginsburg, Kerouac, Burroughs) and less central figures (Corso, Snyder, DiPrima, Jones/Baraka) as well as the influence of the Beats on the work of Bob Dylan, the only musician to win the Nobel Prize in Literature.

- **ENG-155 Young Adult Literature**
  
  **Credits:**
  4.00

  **Description:**
  Young Adult Literature’s recent explosion in popularity raises important questions about the stories it tells, the values it promotes, and the audiences it seeks. This course approaches the YA phenomenon as one with deep historical roots as well as contemporary cultural relevance. From nineteenth century classics to current series favorites, literary works focused on young people reframe perennially fresh narratives about coming of age, negotiating personal identity, and navigating a complex moral universe. This course also considers YA literature as part of an evolving network of writers, readers, publishers, critics and filmmakers.

- **ENG-157 Poetry and Religion**
  
  **Credits:**
  4.00

  **Description:**
  This course will use close readings to examine poetry as a heightened form of language seeking to make contact with divine sources of faith. We will consider poems that provide examples of the struggle to attain belief, as well as poems that
deny belief. Language as both the grammar of ascent and the locus of descent. The position of human beings in relation to God, or the gods, or the absence of the divine.

<tr>
<td>ENG-356 Whitman and Dickinson</td>
<td></td>
</tr>
</tbody>
</table>

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
### Description:
An investigation of the lives and works of two of nineteenth-century America's greatest and most original poets. Topics will include types of poetic language and formal structure, the work of the poetic imagination in transforming observations of the world into art, and the ways in which poets process the idea of death and the reality of war. Finally, this course examines Whitman and Dickinson's impact on American popular culture as well as on the writings of modern poets and literary critics.

#### ENG-358 Women Writing the American West

**Prerequisites:**
Take WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
Study of 19th and 20th century writing on the American West by American women in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes provide the basis for the study of the gendering of the "frontier" and literature of the West by American women authors.

#### ENG-361 Contemporary American Fiction

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
The course will cover major works of American fiction from the period between the end of the American war in Vietnam and the present. The course will emphasize fiction reflecting America's cultural diversity and current trends in fiction.

<tr>
<td>ENG-362 Asian-American Literature</td>
<td>An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.</td>
</tr>
<tr>
<td>ENG-388 Utopias and Dystopias</td>
<td>This course follows the spirit of utopian experimentation as it travels through the linguistic patterns and imaginative conditions of brave new worlds in literature. We will consider how utopian thinking allows writers to take creative license with political systems, social relations, gender roles, and racial identities, and to blur dividing lines between nature, technology, and culture as well as between Earth and the cosmos. Our readings will balance such foundational texts as Plato's Republic and More's Utopia with revolutionary works from the nineteenth through the twenty-first centuries, and conjure utopian dreams as well as dystopian worlds gone wrong. Selected works of literary criticism and films will also be included.</td>
</tr>
<tr>
<td>ENG-395 Rhetoric and Memoir</td>
<td></td>
</tr>
</tbody>
</table>
Description:
This course examines the rhetoric of memoirs written primarily by international figures who seek to use personal stories to shape readers’ perspectives on political issues. After a brief introduction to rhetorical theory and to the genre of memoir, this course will examine contemporary memoirs that address such issues as racism, sexism, religious extremism, war, and genocide.

- **ENG-410 From Pagan Reason to Christian Revelation**

Prerequisites:
WRI-102 or WRI-H103

Credits:
4.00

Description:
A survey of major works of literature and thought crucial to the transformation of pagan models of reason to Christian systems of belief, including works by Plato and Plotinus, St. Augustine and Dante. Of central concern is the changing conception of love, from Eros to Agape. Note: This course is cross-listed with HST 339.

- **FR-216 Masterpieces of French and Francophone Literature in English Translation**

Credits:
4.00

Description:
Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

- **FR-309 Survey of French Literature I**

<td>PHIL-424</td>
<td>Philosophy and Literature: Feodor Dostoevsky and the Great Philosophical Novel</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
**Description:**
A study of the nineteenth-century Russian novelist Feodor Dostoevsky and his contribution to world philosophy and literature. Dostoevsky's stories, which weave together philosophical reflections, unique personalities and gripping plots, earned the author numerous superlative titles. Dostoevsky has been praised as a literary genius, a prophetic political thinker, a keen psychologist and an expert on human condition. His work inspired generations of intellectuals, among them prominent European thinkers: Nietzsche, Freud, Heidegger, Sartre, Camus, Hesse and many others. In addition to a detailed study of Dostoevsky's writings the course explores the socio-political, literary, and intellectual contexts in which he developed as a thinker, introducing students to both his opponents and admirers.

---

**SPAN-426 Latin American Theater and Society**

**Prerequisites:**
SPAN 290 or SPAN 300 or Instructor's consent. Spanish 302 is strongly recommended

**Credits:**
4.00

**Description:**
Introduces students to the most important movements and playwrights of Latin American Theater in the 20th and 21st Centuries. Students examine the history of Latin American Theatre since its inception and become familiar with the most important performing centers.

---

**WGS-211 Heroines, Hotties & Hubris: Adolescent Girl’s Books**

**Credits:**
4.00

**Description:**
Explores what we can learn from the books that teenage girls read. In addition to a wide array of interesting and complex Young Adult novels targeted to young female readers, students will be exposed to theories of adolescent development, literary criticism, and social theory. Topics include how the dilemmas of girlhood have changed or stayed constant and the urge, so common in books for children and teens, to teach kids how to think and behave.

| WGS-220     | Other Worlds, Other Genders: Women and Science Fiction | 4.00    | **Description:**
Examines through both classic and contemporary science fiction a variety of possibilities for world-reimagining in the realms of gender, sexuality, race, and other forms of difference. Draws on theories of utopian and dystopian discourse, engages with questions of biology and reproduction, and explores colonialism through first-contact and space empire narratives.                                                                                                                  |
| WGS-325     | Global Women’s Fiction                           | 4.00    | **Description:**
Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.                                                                                         |
| WGS-340     | Women on Stage                                   | 4.00    | **Description:**
Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, |
Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht's alienation effect, and the distinction between performance and the performative.

Ethical & Philosophical Inquiry: 1 course, 4 credits
Archive 2018-2019

Choose one Ethics course from those listed below:

- **PHIL-119 Ethics**
  
  **Credits:**
  
  4.00

  **Description:**
  A systematic introduction to the major thinkers and their positions on the main issues of ethics, such as: What is morality? What are moral values? How should we live our lives? Are there objective, universal, absolute moral standards? If so, what are they, and what is their basis? 1 term - credits. Normally offered every year.

- **PHIL-120 Ethics and Civic Life**
  
  **Credits:**
  
  4.00

  **Description:**
  In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.

- **PHIL-123 Social Ethics: The Good Life**
  
  **Credits:**
  
  4.00

  **Description:**
An examination of contemporary Western society, particularly in the United States, in relation to philosophical attempts to define the "good life." Current books that exhibit a philosophical approach towards important contemporary social issues will be discussed, as well as classics in philosophy. Topics may include: civic virtue, consumerism, current events, economic justice, popular culture (film, music, television), religion and secularism, etc. 1 term - 4 credits. Normally offered every year.

- PHIL-127 Contemporary Moral Issues
  Credits:
  4.00

  Description:
  A critical examination of a number of contemporary moral issues such as: abortion, affirmative action, animal rights, capital punishment, cloning, drug legalization, environmental ethics, euthanasia, genetic engineering, gun control, pornography, same-sex marriage, suicide, war and terrorism, etc. 1 term - 4 credits. Normally offered every year.

**Human Behavior and Societies: 1 course, 4 credits**

Archive 2018-2019

Choose one Human Behavior and Societies course from those listed below:

**Advertising and Public Relations:**

- ADPR-285 Media and Pop Culture I
  Credits:
  4.00

  Description:
  Examines the influence of media on contemporary society from a social science perspective. Television, radio, film, and print formats are discussed in terms of their persuasive impact on mass culture in the U.S.. The emergence and development of
"Rock N Roll" is discussed in unison with the Civil Rights, Student's Rights, and anti-War movements of the period from 1946-1972.

Communication

- **CJN-255 Introduction to Media**
  **Credits:**
  4.00

  **Description:**
  An introduction to the role of media in contemporary society, focusing on media's influence on cultural, political, and ideological processes. An examination of the historical contexts within which newspapers, radio, television, and new media technologies develop, and how audiences interact with and influence the use of media.

- **CJN-375 Organizational Communication**
  **Credits:**
  4.00

  **Description:**
  Historical development of the theory of organizations, examination of information flow, network analysis, communication overload and underload, corporate culture, superior-subordinate communications, organizational effectiveness, and change processes.

**CUES:**

- **UES-101 Environmental Studies**
  **Credits:**
  4.00

  **Description:**
Focuses on the natural environment through the lens of social science and humanities. Students will study texts from those disciplines to acquire a deeper understanding of the values and beliefs that underlie environmental issues. Students will investigate the policy-making processes and institutions through which those issues are decided, and the social inequalities in the distribution of environmental problems. Texts to be studied will range from literature, philosophy, and film to policy statements, impact reports, community advocacy materials, and investigative journalism.

**Economics:**

- **EC-151 Economic & Human Geography**  
**Credits:** 4.00  
**Description:**  
The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

**Government:**

- **GVT-110 Introduction to American Politics**  
**Credits:** 4.00  
**Description:**
An introduction to the American political system and constitutional framework. Focus will be on the interplay of various institutions (the Presidency, Congress and the Judiciary) in creating public policies. Contemporary public issues will be discussed, as will the role of political theory in shaping American democracy. Attention will be given to the role of the news media, public opinion, political ideology, political parties and interest groups in the American system.

- **GVT-115 Evolution of the Global System**
  
  **Credits:**
  
  4.00

  **Description:**
  Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.

**Psychology:**

- **PSYCH-114 General Psychology**

  **Credits:**

  4.00

  **Description:**
  Surveys core theoretical concepts and contemporary empirical research from the major sub-fields of psychology: physiology; perception; cognition; learning; emotion; motivation; development; personality; psychopathology; psychotherapy; and social behavior. Offered every semester.
– PSYCH-249 Introduction to Lifespan Development  
**Credits:**  
4.00  

**Description:**  
Examines biological, cognitive, social, and emotional development across the lifespan, with attention to the role of culture and context. Explores how various major theories of development can be used to adaptive and maladaptive behaviors and trajectories and considers. Implications for treatment, prevention, and positive development across the lifespan. Normally offered yearly.

**Sociology:**

– SOC-113 Introduction to Sociology  
**Credits:**  
4.00  

**Description:**  
An introduction to the sociological understanding of human interaction, group process and social structures. Students are introduced to basic concepts, theories and methods of sociological investigation. Majors and minors must pass with a grade of "C" or better.

– SOC-116 Social Justice  
**Credits:**  
4.00  

**Description:**  
An examination of traditional and contemporary problems associated with major social institutions such as the family, economics, government and education. Social forces related to ethnicity, social class, health and welfare, and urbanization are also included. Alternative remedial measures based on behavioral science theories are discussed. Majors and minors must pass with a grade of "C" or better.
- **SOC-221 Environment and Society**
  **Credits:**
  4.00

  **Description:**
  This course will explore our natural environment and human interactions with it. We will connect a critical study of society, power, and inequality to the study of our natural environment and the ways it is altered by human behaviors. We will also consider ways to change our society's relationship with the natural environment to keep our earth clean and safe for human society.

- **SOC-223 Families in Contemporary Society**
  **Credits:**
  4.00

  **Description:**
  An exploration of the diversity of contemporary families. Comparisons are made between the cultural myths of the "ideal family" and the lived realities. Challenges confronting contemporary families and their implications for social policy are examined in such areas as work/family conflicts, gay and lesbian families, welfare, family violence.

- **SOC-224 Families in Contemporary Society (Spain)**
  **Credits:**
  4.00

  **Description:**
  Spain has experienced major socio-demographic changes since the mid 1970s. These transformations mainly arise from the new role of women in society and, in particular, women's higher levels of education, work experience, and labor market attachment. The changes in women's labor force participation have occurred in conjunction with a progressive postponement of main family events, such as leaving the parental home, forming a partnership and having children, as well as with a reduction in the family size. Spain is, indeed, characterized as having one of the "lowest low fertility levels" within Western industrialized countries, a pattern that is exacerbating the ongoing process of population aging. This picture partly reflects the conflicting relationship that currently exists between women's labor force...
participation and the accommodation of family responsibilities: the so-called work/family balance. Ongoing differences among countries have been accounted for by different explanatory factors that involve socio-economic, cultural and social policy dimensions. From a comparative perspective, the course is intended to cover recent debates, controversies, and research on family formation and family dilemmas in contemporary Spain.

- **SOC-227 Race in American Society**

  **Credits:**
  4.00

  **Description:**
  Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

**Women's & Gender Studies:**

- **WGS-113 Women, Science, and Society**

  **Credits:**
  4.00

  **Description:**
  Explores women’s lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the
female body and eating disorders; women's health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

– AMST-101 American History and Culture
  Credits: 4.00

  Description: This course offers a basic introduction to American culture and society through the study of American History. The city of Boston and its extraordinary history and institutions will be at the heart of the class and students will frequently visit sites close to the campus. Topics will focus on areas such as the way people from different cultures have understood and misunderstood each other; the evolution of American politics and political institutions; the American Revolution and the founding documents and institutions of the United States; the distinct forms of American religion, American literature and the American economy; slavery and race in American society; the rise of America to world power; the changing role of women; the New Deal and the rise of the modern welfare state; immigration; the development of popular culture; and the meaning of Donald Trump. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-111 Defining America and Americans.

– AMST-111 Defining America and Americans
  Credits: 4.00
Description:
Examines artistic, social, and political imaginings of America and Americans. We will read works by American and foreign observers of the United States to ask how Americans define themselves and how others see them. Course assignments will introduce students to themes, perspectives, and methods in the field of American Studies. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-101 American History and Culture.

Art & Design:

- **ADG-224 History of Graphic Design**

Credits:
4.00

Description:
The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various-isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

Asian Studies:

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**

Credits:
4.00

Description:
An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations,
Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

**Communication:**

- **CJN-114 Great Works of Journalism**
  **Credits:**
  4.00

  **Description:**
  An examination of important contributions to the literature of journalism through an analysis of major writers and news coverage of significant events from a journalistic perspective.

**English:**

- **ENG-123 Great Books of the World I**
  **Credits:**
  4.00

  **Description:**
  Literary masterpieces from ancient times to the Renaissance, including: Homer’s Odyssey, Sophocles’ Oedipus, Virgil’s Aeneid, selections from the Hebrew Bible and the Gospels, and Dante’s Divine Comedy. List may vary at the discretion of the instructor.

- **ENG-124 Great Books of the World II**
  **Credits:**
  4.00

  **Description:**
This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptomist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

Environmental Science:

- UES-325 Environmental History of the U.S.
  Credits: 4.00

Description:
Explores how Americans have understood the environment and their relationship to it through analysis of classic environmental texts, historical contexts, and societal perspectives. Analyzes how the environment has changed from pre-colonial times to the present and how these changes have been described through the lens of environmental history. Themes include differing viewpoints of European and indigenous peoples toward the natural environment, the impacts of the Western expansion on native species and landscapes, the rise of industrialism and its impacts on natural resources and ecosystems, and the rise of 20th century environmentalism.

History:

- HST-101 History of Western Civilization I
  Credits: 4.00

Description:
Surveys European culture, politics, and society from antiquity to the seventeenth century. Topics include: the Greek, Judaic, and Roman heritage; the rise of Christianity; feudal society in the Middle Ages; Renaissance and Reformation; the Scientific Revolution; and the development of absolutist and constitutional governments.

This is the second of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include state-making, wars, and the rivalry among early modern empires, economic development, the Industrial Revolution and the formation of the global trade system. The specific topics may change every year due to new academic developments and publications.

- **HST-181 American Life to the Civil War Era**  
  **Credits:** 4.00

  **Description:**  
  Surveys American history from European colonization up through the era of the Civil War. Topics include interactions with Native Americans; slavery; the American Revolution; the founding of a new republic; social and economic developments in the early nineteenth century; expansion; party politics; sectional conflict; the Civil War and Reconstruction.

- **HST-182 American Life Since the Civil War Era**  
  **Credits:** 4.00

  **Description:**  
  Surveys American history from the 1870s to the present. Topics include the new industrial order; farmer and worker protests; progressivism; America’s emergence as a world power; the two World Wars; the Great Depression; the New Deal; the Cold War; post-World War II American society; the Civil rights movement; Vietnam; dissent and counterculture in the 1960s; the women’s movement; economic, social, and political changes in the late-twentieth century; America’s relationship to a globalized world.

- **HST-251 Modern East Asia**  
  **Credits:** 4.00
**Description:**
China, Japan, and Korea - East Asia's critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

---

**HST-256 Exploring Asia**

**Credits:**
4.00

**Description:**
In this course each student will select a topic about Asia that they wish to study. Virtually any topic, to be approved by the professor, is acceptable. The goal will be to write a five to seven page paper about that topic by the end of the course. As a class, we will work together through each step of the process of defining a topic, gathering materials about it, and organizing and reporting the final paper.

---

**HST-260 Asian Peoples and Cultures**

**Credits:**
4.00

**Description:**
Introduces the peoples of Asia and the cultures they have created. Particular attention is paid to the lives of the common people in both historical and contemporary times. By understanding the richness and complexities of daily life in Asia, we will understand the continuities and discontinuities brought on by social, cultural, and economic changes. We will gain an appreciation of our fellow human beings in Asia.

---

**HST-268 History of the Mediterranean**

**Credits:**
4.00

**Description:**
Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

- **HST-292 American Foreign Relations Since 1898**
  
  **Credits:**
  
  4.00

  **Description:**
  
  Surveys the history of the U.S. as a world power. Examines officials' motives and methods, as well as influences on policy in the form of social and economic forces, interest groups, and foreign challenges. Explores public debates over America's role (as well as debates among historians and international relations theorists), and discusses the domestic and foreign impact of America's world role. Major events addressed include the two world wars, the Cold War, Vietnam, and the U.S. recent history of involvement in the Middle East.

- **HST-312 Renaissance and Reformation Europe**
  
  **Credits:**
  
  4.00

  **Description:**
  
  Explores the intellectual and cultural developments of the Renaissance, and of the Protestant and Catholic Reformations in their social and political contexts. Topics include: Humanism, the rise of the city-state; art, and science; changes in family and social life; the causes of the Reformation (intellectual, social, technological); Calvinists, Lutherans, and Radical Reformers; Counter-Reformation and its political consequences; the Wars of Religion.

- **HST-313 Cities of Early-Modern Europe**
  
  **Credits:**
  
  4.00

  **Description:**
Explores the political, economic, social and cultural development of the urban experience in Europe in the 14-1700s. The history of the most important cities of the continent and Mediterranean, and their common path in business, urbanism, society and imperialism.

<td>HST-357</td>
<td>History of Spain I</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
Description:
Surveys the most transcendental social, cultural, economic and political
developments in the history of Spain from the Neolithic to the Early Modern Period.
Examines the broad history of the nation and its peoples and placing emphasis on
three central themes: diversity within the Iberian Peninsula, the region's social and
geo-political structures, and the transformation of the Old Order of the ancient
kings into a modern, nation-state. Topics include: the Pre-historical period,
Roman Hispania, the Medieval Kingdoms, Islamic Civilization, the Christian
Reconquest, the Catholic Monarchy, Imperial Spain under the Habsburgs, and the
Crisis of the Spanish Empire in the 17th century.

— HST-358 History of Spain II
Credit:
4.00

Description:
Examines the political, economic, and social history of Spain from 1700 to the
present. Topics include: the War of Spanish Succession; the Bourbon state; the
Enlightenment in Spain; the impact of the French Revolution; Spain in the
Napoleonic Wars; the rise of liberalism, socialism, and anarchism; the crisis of 1898;
the problems of modernization; the Spanish Civil War and the Franco regime; the
transition from dictatorship to democracy; Spain's international position today.

— HST-361 Native America 1832 to Present
Credit:
4.00

Description:
Topics will include the Plains Indian Wars; ethnological aspects of Indian tribes; the
pitfalls of Indian reform movements; Indian resistance to U.S. assimilation and
reservation policies; the Indian New Deal; activism and the American Indian
Movement; Indians’ future prospects. Cultural Diversity A

— HST-383 Boston: Heritage of a City
Prerequisites:
One History course
Credits: 4.00

Description:
Boston from its foundation in 1630 to its development as a 21st century metropolis. From the Massachusetts Bay Colony, to cradle of the American Revolution, to a Yankee merchant capital, Brahmin cultural center, and immigrant melting pot. When offered in the hybrid format, this course will meet at the regularly-scheduled time, but lectures and other course materials will be available on the course Blackboard site in case you cannot attend.

- HST-385 Slavery & Race in American History

Credits: 4.00

Description:
Topics will be selected from the following: the nature of slavery; the origins of slavery in America and the process of enslavement; the economics of slavery; the American Revolution and slavery; the slave trade; black and white women and the institution of slavery; rebellions of enslaved people; the pro-slavery argument; racial thought; masters and the culture of the South; the movement to abolish slavery; the literature of slavery; the Civil War and the end of slavery; Reconstruction; Segregation; the Civil Rights Movement; race and racism in contemporary America.

- HST-394 Slavery in Film, Literature and History

Credits: 4.00

Description:
A seminar on slavery in the United States as depicted in history, literature, and film. Topics may include resistance to slavery, honor, the attack on slavery, the cultural and social worlds of masters and enslaved people, the thought of masters and enslaved people, women and slavery, and/or slavery as an economic institution.

- HST-414 Nazi Germany

Credits:
4.00

**Description:**
Examines German and European preconditions; the Versailles Treaty and the failure of the Weimar Republic; Hitler’s ideas, collaborators and institutions; Nazi foreign and domestic policy; World War II and the concentration camps.

— **HST-426 Politics and Culture in Europe, 1919-1939**

**Credits:**
4.00

**Description:**
Explores the social and political development of European society between the two world wars, primarily through the literature, art, and films of the period. Topics include: the dissolution of pre-1914 middle class society; deviance and sexuality in the 1920s; the role of decadence in art and the Fascist response to deviance in life and art; women, workers, and the new technology; the rise of Fascism; political engagement and polarization throughout European society in the face of economic and social crisis.

— **HST-483 Death, Disease, Healing-U.S. History**

**Credits:**
4.00

**Description:**
Investigates how Americans have understood and responded to health, illness, and death from the eighteenth century to the present. Examine interactions among patients, healers (orthodox and heterodox), the medical and scientific professions, business, and government. Explore the effects of scientific and technological advancements, industrialization, urbanization, immigration, war, and social movements on the nation’s moral and political economies of health, and on evolving ideas about bodily integrity and autonomy, linked to historical relations of gender, race, class, and sexuality.

— **HST-489 Germany: Film, Politics, Memory Since 1945**

**Credits:**
4.00

**Description:**
Explores German history since 1945 through film, newsreels and other archival footage, war memorials and museums, novels, published diaries, memoirs, and recent historical scholarship. Topics include the representation, in film and other texts, of: post-war rebuilding; the German Economic Miracle; divided Berlin; 1960s and 70s radical politics; coming to terms since 1945, with Germany's Nazi past and the Holocaust; coming to terms since 1990 with the Stasi and East German past; "Ostalgie" (nostalgia in the 21st century for some aspects of East German socialism); the multi-cultural society that is Germany today, with new Turkish, Greek, Russian, Arab, and even Israeli communities.

**Philosophy:**

– PHIL-210 History of Ancient & Medieval Philosophy  
**Prerequisites:**
Restricted to PHIL majors and minors, PPE majors, and honors students

**Credits:**
4.00

**Description:**
The study of philosophical thought from the period of the ancient Greek philosophers through the Medieval thinkers, including such philosophers as Socrates, Plato, Aristotle, Epicurus, Zeno, Parmenides, Pythagoras, Protagoras, Augustine, Aquinas, Anselm, and Abelard. An introductory course designed to equip the student with a well grounded understanding and appreciation of Philosophy. 1 term - 4 credits. Normally offered every year.

– PHIL-250 Social & Political Philosophy  
**Credits:**
4.00

**Description:**
An examination of persistent debates in political and social philosophy. Topics covered can include the meaning of property and welfare, the tensions between liberty and equality, censorship and freedom of expression, the relation of church and state, human rights and the common good, the possibility of political education and civic virtue, legitimacy of the state, revolution and counter-revolution, war and problems of ends and means, addressing historic injustices, such as racism, genocide, or sexism, among other topics. Students will read both classic and contemporary writings to address both the historical roots and the contemporary treatment of these questions. 1 term - 4 credits. Normally offered every year.

**Women's & Gender Studies:**

- **WGS-111 Women, History, and Culture**
  **Credits:** 4.00
  **Description:** Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-115 Introduction to Gender Studies**
  **Credits:** 4.00
  **Description:** Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women’s studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology,
explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

— WGS-311 Engendering Entertainment: Feminism and Popular Culture

**Credits:**
4.00

**Description:**
Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

— WGS-315 Feminist Thought

**Credits:**
4.00

**Description:**
Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist
arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldua, and Judith Butler.

- **WGS-330 Furies to Femi-Nazis: A History of Modern Anti-Feminism**
  **Credits:**
  4.00

  **Description:**
  Explore the deep antipathy women have faced at nearly every turn in their struggles for civic and social inclusion. Anti-feminist denials of women’s rights have taken the form of attacks on women’s nature, bodies, and fitness for public life, tagging them with labels of otherness: opponents of women’s rights deem them irrational, unnatural, traitors to society, even sexual deviants. This course will examine the dangers that women allegedly represent to social stability from the Enlightenment to the present day, as well as how women have fought back to assert their rights and independence.

- **WGS-335 Queer Narratives**
  **Credits:**
  4.00

  **Description:**
  Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean’s 2012 album, "Channel Orange", and Janet Mock’s recent memoir, "Redefining Realness", as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

**Visual & Performing Arts Theory and History: 1 course, 3-4 credits**
Choose one course from those listed below:

- **ADG-224 History of Graphic Design**
  
  **Credits:**
  4.00
  
  **Description:**
  The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various-isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

- **ADI-234 History & Theory of Interior Architecture**
  
  **Prerequisites:**
  Taken concurrently with ADI S201
  
  **Credits:**
  3.00
  
  **Description:**
  This course introduces students to the important individuals, ideas and issues that have shaped the direction of contemporary interior design practice in the twentieth century, building upon the historical foundation established by the Ideas of Western Art and History of Furniture and Architecture classes. Intermixing lectures and readings with visits to important local buildings, it discusses the influences of culture, technology, fashion and media upon the work and thinking of the first generation of modern designers, as well as emerging social, moral and environmental imperatives that will form the basis of future practice; cultural identity, interdisciplinary collaboration, sustainability and universal design.

- **ARH-101 Art History I**
  
  **Credits:**
  4.00
**Description:**
Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

---

- **ARH-102 Art History II**

**Credits:**
4.00

**Description:**
Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

---

- **ARH-203 Arts of Asia**

**Credits:**
4.00

**Description:**
Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

---

- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**

**Credits:**
4.00

**Description:**
Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.
- **ARH-307 Art of the Italian Renaissance**
  
  **Credits:**
  4.00

  **Description:**
  Examines painting, sculpture and architecture of the 14th, 15th, and 16th centuries in Italy in their cultural context. Artists include Giotto, Masaccio, Donatello, Leonardo da Vinci, Raphael, Michelangelo, and Titian.

- **ARH-308 Art of the Baroque & Rococo**
  
  **Credits:**
  4.00

  **Description:**
  Explores painting, sculpture and architecture in Italy, Spain and Northern Europe during the 17th and 18th century. Works by Rembrandt, Rubens, Caravaggio, Bernini, Poussin, Velasquez, Watteau, Boucher, Fragonard, Chardin, Hogarth and others considered within their historical contexts.

- **ARH-309 Art of the 19th Century**
  
  **Credits:**
  4.00

  **Description:**
  Examines Neoclassicism, Romanticism, Realism and Impression in the European painting. Considers works by artists such as David, Ingres, Friedrich, Constable, Delacroix, Goya, Courbet, Millet, Daumier, Manet, Monet, Renoir, Degas, and Cassatt within their historical contexts.
Examines European painting and sculpture from around 1880 to 1940, including Symbolism, Post-Impressionism, Fauvism, Expressionism, Cubism, Futurism, The Bauhaus, Dada, and Surrealism. Considers works by artists such as Gauguin, Cezanne, Van Gogh, Matisse, Kandinsky, Picasso, Braque, Mondrian, Duchamp, Magritte, Dali, and Ernst within their historical contexts.

- **ARH-311 American Art**

  **Credits:**
  4.00

  **Description:**
  Surveys American painting, sculpture, photography and architecture from the colonial period through WWII. Considers works by artists such as Smibert, Copley, West, Stuart, Whistler, Sargent, Eakins, Homer, Ryder, Bierstadt, Cole, Inness, Sloan, Sullivan, Wright, Hopper, O’Keefe, Dove, Hartley, Bellows, Stieglitz, Weston, and Steichen.

- **ARH-312 Art of the Northern Renaissance**

  **Credits:**
  4.00

  **Description:**
  Examines painting, sculpture, and architecture of the 14th, 15th and 16th centuries in Northern Europe, within their historical context. Topics include the rise of oil painting, the development of woodcut and engraving, the effect of the Reformation on art. Artists include van Eyck, Bosch, Durer, Holbein and Brueghel.

- **ARH-316 Contemporary Art**

  **Credits:**
  4.00

  **Description:**
  Explores European and American art since WWII, including Abstract Expressionism, Colorfield Painting, Pop Art, Minimalism, Neo-Dada, Performance Art, Feminism, Neo-Expressionism and Post-Modernism. Artists include Bacon, Giacometti, Pollock,

- **CJN-152 Visual Aesthetics**  
  **Credits:** 4.00  
  **Description:**  
  This course provides an introduction to a humanities approach to a range of media, including but not limited to film and television. The course helps students develop visual literacies, enriching their understanding of multiple forms of media. The class also explores how media texts are constructed for specific cultural, entertainment, informative and propaganda purposes.

- **CJN-292 Film History: From Silent Cinema to the Modern Era**  
  **Credits:** 4.00  
  **Description:**  
  An introductory film studies course that covers the history of the film medium from its birth until the 1970s. It provides an introduction to major film theory concepts, such as genre and/or auteur studies, as well as key films and stars in movie history.

- **ENG-266 “Mad Men:” Reading Visual Narratives**  
  **Credits:** 4.00  
  **Description:**  
  The class will consider various theoretical approaches to the TV Series Mad Men beginning with ideas gleaned from the discourse of visual literacy and proceed by applying textual analysis adapted from more traditional modes of literary studies and film analysis. A combination of critical and evaluative critiques will be examined, including book-length studies of the series and essays based on the
series’ appeal to style, American popular culture, advertising, gender roles, race, and 60s nostalgia. The recent phenomenon of the series recap will serve as a touchstone to the class’s collective viewing of the first two seasons of the series.

- **FR-220 French & Francophone Cinema**
  **Credits:**
  4.00

  **Description:**
  Discusses and deepens understanding of French and Francophone cinema from its origins in the late nineteenth century to the early twenty-first century. Explores early works from France, by the Lumiere Brothers and Georges Melies as well as contemporary films from France, Algeria, Burkina Faso, Canada, Haiti, and Senegal.

- **MUH-101 History of Music I**
  **Credits:**
  4.00

  **Description:**
  Surveys Western music from CE800-1800, from Gregorian to Beethoven; selected major composers, representative masterworks, and the musical styles of the Medieval, Renaissance, Baroque, and Classical periods; links the music to some of the major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.

- **MUH-102 History of Music II**
  **Credits:**
  4.00

  **Description:**
  Surveys Western art music from 1800-present, from Schubert to Jennifer Higdon; selected major composers, representative masterworks, and the musical styles of Romantic, Contemporary, and post-Modern periods; links the music to some of the major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.
- **MUH-211 Music of the United States**
  
  **Credits:**
  4.00

  **Description:**
  Surveys American music from Colonial times to the present; various attempts to create an indigenous musical style; vernacular and art music genres including folk, concert, and religious music, jazz and musical theatre; includes music of Billings, Amy Beach, Ives, Copland, Bernstein, and Libby Larsen. Normally offered yearly.

- **MUH-212 Popular Music in the United States**
  
  **Credits:**
  4.00

  **Description:**
  Covers various popular music styles that emerged in America from 1850 to the present including minstrelsy, art song, piano music, band music, blues, jazz, country, rock and rap; includes representative musical selections, emphasis the social and cultural factors that foster the emergence and developed of these genres. Normally offered every other year.

- **MUH-221 History of Women in Music**
  
  **Credits:**
  4.00

  **Description:**
  Surveys music in the lives of women, including composers, performers, producers, mothers, and educators from the Middle Ages to the present; examines issues of gender and control, perspective in historical narrative, and religious and secular traditions that impact the cross-cultural reception of women's music. Normally offered every year.

- **MUH-227 Jazz and Blues**
  
  **Credits:**
  4.00
Description:
Follows the evolution of jazz from blues and ragtime through Dixieland, Swing, Bebop, Cool, Latin, Modern, Free, Fusion, and Avant-Garde to Post-modern expressions of the present; the contributions of major soloists, arrangers, composers, leaders, and bands. Normally offered every year.

PHIL-219 Philosophy of Art
Credits: 4.00

Description:
“What counts as art?” “What is beauty?” “Are there objective standards of beauty?” This course examines the nature of aesthetic experience, art, beauty, and creativity. Through the classic and contemporary readings, the students will be introduced to philosophical issues concerning the meaning of art, artistic representation, perceptions of art, interpretation, and criticism. Students will be encouraged to reflect on their own experience of art and explore the relationships among the artist, the audience, the artwork, and the world. 1 term - 4 credits. Normally offered every third year.

THETR-260 Broadway Musicals
Credits: 4.00

Description:
This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway’s greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

THETR-266 Intro to Theatre: 20th Century
Credits: 4.00
Description:
Picking up chronologically where THETR 225 leaves off, this survey course is designed to provide students with an understanding of modern Western theatre. Beginning with a melodrama, plays will include representative works of realism, naturalism, expressionism, epic theatre, theatre of cruelty, theatre of the absurd, and metatheatricality. Lectures and class discussions will explore how these concepts translate to acting and production techniques as well as what they imply as artistic responses to a modern and post-modern world. Satisfies a core requirement for Theatre Majors.

Quantitative Analysis: 1 course, 4 credits Archive 2018-2019

Choose one course from those listed below:

Biology

- BIO-273 Biostatistics

Prerequisites:
BIO 111/L111

Credits:
4.00

Description:
Introduction to the statistical methods used to evaluate biological problems. Sampling, probability, confidence intervals, hypothesis tests, experimental design, analysis of variance, regression, and correlation are some of the topics offered. Software for data handling, graphics, and analysis will be used.

Communication
- **CJN-210 Communication Research Statistics**
  **Credits:**
  4.00

  **Description:**
  The course develops an understanding of how statistics are used in the presentation of information and arguments in Communication and Journalism. Emphasizing a conceptual approach to learning statistics, the course focuses on data collection and summarization, correlation, regression, sampling, estimation, and tests of significance. Students perform basic statistical calculations using SPSS software.

**Computer Science**

- **CMPSC-310 Introduction to Data Science**
  **Prerequisites:**
  CMPSC-F132 and 1 of the following: STATS-240, STATS-250, MATH-134, MATH-165, MATH-164 or MATH-255.

  **Credits:**
  4.00

  **Description:**
  The field of data science is emerging at the intersection of the fields of social science and statistics, information and computer science and design. Data science involves using automated methods to analyze massive amounts of data and to extract knowledge from them. This course serves as a project-based introduction to data science in Python language, covering data organization and retrieval, statistical data processing and data visualization.

- **CMPSC-F120 Programming for the World Wide Web**
  **Credits:**
  4.00

  **Description:**
This is a hands-on course aimed at non-CS students who want to learn how to build interesting and interactive web pages. We do not use any drag-and-drop software for this purpose. Instead we cover the basics of HTML and PHP and, if time permits, we look at some ways of building web pages that interact with databases. Each student will have, for the duration of the course, an account on a server that permits individuals to have web pages that are visible on the World Wide Web.

- **CMPSC-F124 Game Programming**

  **Credits:**
  4.00

  **Description:**
  This course introduces students to computer game development, including, but not limited to, game programming. We use Game Maker, a framework for personal computers that runs equally well on Mac and PC. We learn about the foundational concepts of two-dimensional (flat) games: graphics, sound, objects, actions, rooms, scores, levels, multiplayer support, artificial intelligence, and more. Game Maker has an intuitive interface that makes game development approachable for everyone, including those who have never written a single game or a single computer program. All games created by Game Maker can be saved as standalone applications and can be shared freely with classmates, friends, and family. This is not a course in graphics design, audio editing, or scriptwriting. Students are encouraged to use their creativity and imagination to design games and the correctness of game implementation is stressed throughout the course. Normally offered in Fall.

**Government**

- **GVT-201 Data Analysis and Politics**

  **Prerequisites:**
  Sophomore Standing GVT 110 and 120 and Math 128 or higher.

  **Credits:**
  4.00

  **Description:**
Quantitative analysis is quickly changing the way we understand and engage in politics, how we implement policy, and how organizations across the world make decisions. In this course, we will learn the fundamental principles of statistical inference and develop the necessary programming skills to answer a wide range of political and policy oriented questions with data analysis. Who is most likely to win the upcoming presidential election? Do countries become less democratic when leaders are assassinated? Is there racial discrimination in the labor market? These are just a few of the questions we will work on in the course.

**Philosophy**

- **PHIL-212 Formal Logic**
  
  **Credits:**
  4.00

  **Description:**
  An introduction to formal (or semi-formal) study of the basic types of deductive arguments (propositional and syllogistic logic). 1 term - 4 credits. Normally offered every year.

**Psychology**

- **PSYCH-215 Behavioral Statistics**
  
  **Prerequisites:**
  PSYCH 114; Restricted to majors only unless with permission of instructor.

  **Credits:**
  4.00

  **Description:**
  Introduces the use of statistics as tools for description and decision-making, including hypothesis testing. Prepares students for the analysis, interpretation, and evaluation of psychological research. Offered every semester.
### Sociology

- **SOC-212 Statistics for Sociology**

**Prerequisites:**
SOC-113 OR SOC-116 and MATH-128 or higher

**Credits:**
4.00

**Description:**
In this course, students will be introduced to descriptive and basic inferential statistical techniques. The course will provide information on the following topics: Description - measures of central tendency (mean, median, mode) and measures of dispersion (range, standard deviation); logic of statistical inference, including normal curve and sampling distribution; hypothesis testing with one sample and two samples; measures of association between two variables (bivariate analysis), including chi-square, regression, and correlation; and introduction to multivariate regression. Students will utilize SPSS (Statistical Package for the Social Sciences) software to input and analyze data. The goals of the course are for students to appreciate the need for statistical methods in the broad field of sociology and to gain basic statistical literacy.

### Statistics

- **STATS-240 Introduction to Statistics**

**Prerequisites:**
Math 128 or higher. REMINDER: STATS 240 is a required prerequisite MKT 220, FIN 200 and ISOM 201(prerequisite for ISOM 319)

**Credits:**
4.00

**Description:**
Topics include: data presentation, measures of central locations and dispersion, probability and probability distributions, estimation, hypothesis testing, simple and multiple regression models. The use of Excel and SPSS will be emphasized throughout the course. 1 term - 4 credits (4 hours per week). Normally offered each semester. STATS 240 satisfies the same requirements as STATS 250.

- **STATS-250 Applied Statistics**
  
  **Prerequisites:**
  MATH 128 or higher. REMINDER: STATS 250 is a required prerequisite MKT 220, FIN 200 and ISOM 201(prerequisite for ISOM 319)

  **Credits:**
  4.00

  **Description:**
  Application of statistical analysis to real-world business and economic problems. Topics include data presentation, descriptive statistics including measures of location and dispersion, introduction to probability, discrete and continuous random variables, probability distributions including binomial and normal distributions, sampling and sampling distributions, statistical inference including estimation and hypothesis testing, simple and multiple regression analysis. The use of computers is emphasized throughout the course. Normally offered each semester.
ASSOCIATE OF SCIENCE IN PARALEGAL STUDIES ARCHIVE 2018-2019

Academic Catalog Archive 2018-2019

The ASPS degree requires the successful completion of the following courses:

- **Minimum Total Credits Required for Degree Conferral:** 64 credits Archive 2018-2019
- **First Year Experience:** 1 course, 1 credit Archive 2018-2019
- **First-Year Writing:** 2 courses, 8 credits Archive 2018-2019
- **Social, Cultural, & Global Perspectives:** 1 course, 3-4 credits Archive 2018-2019
- **Ethical & Philosophical Inquiry:** 1 course, 4 credits Archive 2018-2019
- **Social and Intellectual History:** 1 course, 4 credits Archive 2018-2019

- **Major Requirements:** 8 courses, 32 credits Archive 2018-2019
- **Core Requirements:** 11 courses, 40-41 credits Archive 2018-2019
- **Seminar for Freshmen:** 1 course, 4 credits Archive 2018-2019
- **Math:** 1 course, 4 credits Archive 2018-2019
- **Science, Technology, & Engineering (STE):** 2 courses, at least one with a laboratory, 8 credits Archive 2018-2019
- **Human Behavior and Societies:** 1 course, 4 credits Archive 2018-2019

**Minimum Total Credits Required for Degree Conferral:** 64 credits Archive 2018-2019

**Major Requirements:** 8 courses, 32 credits Archive 2018-2019
Core Requirements: 11 courses, 40-41 credits
Archive 2018-2019

First Year Experience: 1 course, 1 credit Archive 2018-2019

Students with 15+ transfer credits of college or university work are exempt.

Choose one of the following to be completed during the first semester of matriculation:

- **CAS-101 Strategies of Success**
  
  **Prerequisites:**
  CAS students only. SBS students by special permission.

  **Credits:**
  1.00

  **Description:**
  CAS 101 is a one-credit course that meets once a week and is designed to help you have a successful transition to Suffolk University and our unique urban community. It is also designed to introduce you to the principles and concepts of Oral Communication and Presentation Skills. Through interactive exercises and engaging assignments, you will explore the campus environment and learn about strategies for success as a student. You will present speeches about your research and activities to improve your abilities as a speaker.

- **ADPR-102 Professional Development**
  
  **Prerequisites:**
  ADPR 101

  **Credits:**
  1.00
Description:
In this hands-on experiential course, students examine potential career paths in Advertising, Public Relations, and Social Media, become oriented to the university and the surrounding Boston area, and identify professional resources in Boston that foster career development.

Seminar for Freshmen: 1 course, 4 credits Archive 2018-2019

Students with 15+ transfer credits of college or university work are exempt.

Please note that not all courses are offered each semester. Students should contact their advisor to learn about current course offerings.

Choose one Seminar for Freshmen course from those listed below:

Credits:
4.00

Description:
Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs?
Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-116 Enlightened Insanity**
  **Credits:**
  4.00

  **Description:**
  Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

- **SF-126 The Boston Theatre Scene: the Inside Experience**
  **Credits:**
  4.00

  **Description:**
  Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston's many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

- **SF-132 The Beatles: Here, There & Everywhere**
  **Credits:**
  4.00
Description: This seminar will investigate the impact and legacy of the Beatles. The Fab Four deserve our scholarly attention as musical innovators and as cultural avatars of the 1960s, an era that still exerts influence today. We will examine the many ways in which the Beatles rocked the establishment and became defining figures in post-war youth culture. We will also discuss other media (the visual arts, film, fashion, style) and fields of study (mass media, marketing, recording technology, copyright law, English history) using the Beatles as our guides.

SF-156 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life
Credits: 4.00

Description: The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.

SF-173 Crime in American Society
Credits: 4.00

Description: Popular beliefs about crime are often inspired by the media and by specific criminological theories. These theories about and media images of crime will be examined in detail, including the "hits" and "misses".

SF-174 Tragedy and Literature
Credits: 4.00

Description:
This course will focus on classic works of ancient and modern literature that examine the human condition from a tragic perspective. We will concentrate on close readings from the following texts: Homer's Iliad, Sophocles' Antigone, The Bhagavad-Gita, Shakespeare’s Othello, Chekhov's short stories, and Joyce’s Dubliners.

- **SF-175 War and Apocalypse in Science Fiction**
  
  **Credits:**
  4.00

  **Description:**
  From some of the earliest examples of what we call science fiction to today's cutting edge writers, artists, and videographers, the devastation of war and other disasters and their aftermath have loomed large in how the future (and alternative versions of the present) plays out. This course will look at some of the more important issues of future war and post-apocalyptic literature, with a dash of television and film and a soupçon of art.

- **SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**
  
  **Credits:**
  4.00

  **Description:**
  This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

- **SF-183 Politics, Power and the Media**
  
  **Credits:**
  4.00
Description:
Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of "big government", and the concept of a liberal media.

SF-190 Asia in America Fiction and Fact
Credits:
4.00

Description:
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

SF-191 Film Adaptation
Credits:
4.00
Description:
"Why did they change the ending of the book? The novel is so much better!" We will explore the concept and industry of film adaptation. Students will read novels and watch respective film adaptations to explore how the written word is adapted to the screen; both fiction and non-fiction works will be considered. Also, field trips to past film locations in Boston will be taken to explore why specific settings were chosen for respective situations. Additionally, students will create their own written adaptations of source materials, putting into practice the concepts studied in class.

— SF-197 Sustainability, Energy, and Technology At Suffolk University
Credits:
4.00

Description:
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

— SF-198 Music and the Brain
Credits:
4.00

Description:
What accounts for the power of music to move us so profoundly? This course explores how our brains and music evolved together: "What music can teach us about the brain, what the brain can teach us about music, and what both can teach us about ourselves."

— SF-199 Unfolding the European Union
Credits:
4.00
**Description:**
The EU is a powerful political, economic and cultural block that is meant to play a major role, together with the USA and China, in the creation of a new post-crisis world order. The seminar is intended to cover, at a basic but reachable level, the history, the politics, the culture and the functions of the EU in the beginning of the Twentieth Century. An extraordinary experiment of sociopolitical engineering, comparable to that of the United States of America, the EU has been changing the life of an increasing number of Europeans for over 50 years. No American student could afford to ignore the inner structure as well as the particular peculiarities of such inclusive supranational organization in today's world. Issues as institutional functioning, problems derived from individual state sovereignty, economic coordination to face common challenges, cultural integration, future enlargement, etc. are all indispensable to understand the way in which Europe is changing. But also much more day-to-day issues, such as travel mobility, education exchange programs, citizen's participation, supranational networks of people in the arts or in business, unified labor market, gender participation, human rights, consumer's protection, etc. are all in the process of developing a more robust and functional European Citizenship.

- **SF-1127 The Vietnam and Iraq Wars: Polarized Perspectives**

**Credits:**
4.00

**Description:**
This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement "just"? To what extent were the methods used by the United States military during each war "just"? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit "the enemies" of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

- **SF-1129 Beacon Hill: Fact, Fiction, and Fantasy**

**Credits:**
4.00

**Description:**
The course will explore the physical geography, history, and image in literature, film, and pop culture of Suffolk University’s Beacon Hill neighborhood. The purpose and objective of the course is to provide students with a deep knowledge, understanding, and appreciation of Beacon Hill through examination of written and visual sources, and feet-on and eyes-on experience of the public parts of the Hill.

---

**SF-1133 Problems and Solutions in Early American History**

**Credits:**
4.00

**Description:**
This course will examine four major problems in the early American republic: forming a government; bridging vast distances on the American continent; slavery; international relations. We will explore the various proposed solutions to these problems. Some of the solutions worked well, others were more disastrous than the initial problem. We will read primary documents pertaining to these issues, and try to imagine how men and women considering the problems might have responded to them. What solutions could be proposed? What solutions would work? What were the political, economic, or social difficulties generated by the problem and by the proposed solutions? In considering the problems, we will also learn how to use the various archives close at hand: the Sawyer Library, the Boston Public Library, the Massachusetts Historical Society, and the Massachusetts State Archives. Students will also post their findings on a class blog, and present their work to one another in class.

---

**SF-1134 The Meaning of Life**

**Credits:**
4.00

**Description:**
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these
questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity’s Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

- **SF-1135 Women Warriors: Stories of Captivity, Conversion, and Confession**
  **Credits:**
  4.00

  **Description:**
  Since the beginning of time, women have been “doing battle” to themselves, while men have gone to battle against others. Whether it is through converting to Christ, yielding to captors in order to survive, or carrying a baby, this course introduces students to the many ways in which, whatever battles they face, women are warriors; they survive. Utilizing an array of captivity, conversion, and confession narratives by women, and pairing them across the centuries, students will make connections and draw conclusions between early-and mid-19th-century-American and contemporary women. Students will connect, for example, the trials of the 17th-century Puritan captive, Mary Rowlandson, and contemporary hostage, Elizabeth Smart, to explore how women (no matter how different they seem) draw upon unique inner resources to survive.

- **SF-1141 Classical Civilizations: Pathways to Wisdom**
  **Credits:**
  4.00

  **Description:**
  How is it that the knowledge, intelligence, wisdom and values of the Greeks and Romans still educate and edify the world by providing venues towards leading fulfilling and dignified lives? The guiding principles of their respective civilizations rested upon eight pillars: -Humanism: It was recognized that humans have the potential to master their world and live life to the fullest. -The Pursuit of Excellence: To imagine the highest good and strive to attain it. -Self Knowledge: It is imperative
to know oneself before seeking to know the world. -Rationalism: Always question, reason and discern truth from falsehood and never consider any matter superficially. -Restless Curiosity: Often the resolution of one issue leads to the revelations of others mysteries and pursuits which compels further investigation. The wise individual makes this a lifelong endeavor. -Love of Freedom: As long as one brings no harm to others, one must be free to live and discover as much as possible. -Individualism: All are unique and, therefore, must recognize individual strengths and identity. -The Practice of Moderation: The prudence of avoiding extremes in personal and social conduct. In this course, students will read two (brief) texts on the Greek and Roman contributions to the world and then will proceed with specific readings which illuminate the eight principles above for achieving the good life.

- **SF-1143 In the First-Person: Storytelling in the 21st Century**

  **Credits:**
  4.00

  **Description:**
  This section of the Seminar for Freshmen will consider the forms, venues, and impacts of narrative nonfiction in contemporary culture. From the exploding popularity of personal essays in the digital age to the living, evolving essays we create on social media, we are constantly narrating and archiving our lives, shaping their content for specific audiences. In doing so, we shape what our experiences mean and represent. In order to analyze the power of narrative nonfiction, we will look at a variety of multimodal texts: essays, podcasts, Instagram and Twitter feeds, stand-up comedy, and storytelling slams, as well historical texts such as the essays of Michel de Montaigne and historical artifacts at the National Archives in Boston. We will also write our own narrative nonfiction, and adapt our first-person stories for listening and viewing audiences, such as the MassMouth story slam and podcasts like This American Life. Additionally, we will practice narrative nonfiction for professional audiences, using storytelling as a way to showcase personal strengths to employers, internship coordinators, and the like.

- **SF-1145 Emergence of Southeast Asia**

  **Credits:**
  4.00

  **Description:**
Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SF-1146 Fido the Friendly Wolf: A Natural History of Dogs**
  **Credits:** 4.00

  **Description:**
  This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

- **SF-1147 Global (In) Security: From ISIS to Ebola**
  **Credits:** 4.00

  **Description:**
  This course reviews the principal features of global and national security as it is currently practiced by tracing the evolution of theories, policies and circumstances whereby current international security is developed. Students will evaluate the nature and origins of war, arms proliferation, military instability, terrorism, genocide, health threats and natural resources depletion.

- **SF-1148 Brave New Worlds**
  **Credits:** 4.00

  **Description:**
  Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of
cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

- **SF-1150 Religion in Contemporary Society**
  
  **Credits:** 4.00
  
  **Description:** This course is designed to provide students with an overview of the social settings and cultural meanings of religion in the contemporary world. Topics that will be covered in reading and discussions include the rise of religious fundamentalism, religion and violence, women's and men's religious experiences, new religions, and portrayals of religion in popular films. In addition to the readings, students will observe and experience religious expressions and activities through fieldwork assignments. The emphasis on films and fieldwork reflects my belief that religion is made up of "lived experiences" of actual individuals and communities. In order to understand religion in contemporary society we will make every effort to see (in person or in film) a wide range of religious activities. The films we will see include some of the following: Leap of Faith, Devil's Playground, Kadosh, Women of Hezbollah, Singing Stream, A Still Small Voice.

- **SF-1151 Reproduction and Society**
  
  **Credits:** 4.00
  
  **Description:** This course explores relationships between reproductive health and rights both nationally and internationally. Many of our topics fit into two broad areas: conflicts over the control of childbearing (sterilization abuse, birth control, and abortion) and conflicts over who deserves to be a mother, especially when the mothers in question face social stigma and lack political power. Other topics include safe birth and maternal mortality, breastfeeding, infertility and reproductive technology. We also examine the politics of women’s sexual and reproductive autonomy, including the policies that shape women's choices to prevent, achieve, abort, or carry to term a pregnancy. Throughout, we are guided by the following questions: Why is reproduction an important site through which to understand society? How do statuses such as race, class, gender, sexuality and ability influence people's
reproductive possibilities? What is the role of the state in shaping these experiences? How have communities supported or resisted efforts at reproductive control? Why is reproductive justice central to these answers?

- SF-1152 The Idea of America: Past, Present, Future
  
  **Credits:**
  4.00

  **Description:**
  A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation’s history, from the struggle over slavery to America’s contemporary role in the world. Because this course intends to apply theoretical understanding to real life, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation’s philosophical and historical currents.

- SF-1154 Introduction to Visual Studies
  
  **Credits:**
  4.00

  **Description:**
  This seminar provides an introduction to Visual Studies, a relatively new interdisciplinary field that examines how images communicate and the roles that they play in society. Students will apply the concepts and techniques of Visual Studies to analyze sites and signs around Boston, such as advertisements, street signs, fashions, newspaper photographs, buildings, and public spaces. Class projects will increase students’ awareness of their visual environment and their ability to critically analyze the visual rhetoric that surrounds us and is often used to manipulate us.
Description:
This course examines sixteen case examples providing a clear and compelling introduction to one of the most important topics in the relation between public policy and law. This course addresses: the history of the insanity defense; the effects of different standards for determining insanity; the arguments for its retention; abolition, and revision; media and other responses to it; and the controversies around pre and post conviction commitment. The case examples illustrates a variety of outcomes and include individuals who were found not guilty by reason of insanity; found guilty even though mentally ill; and not charged because of mental illness.

– SF-1158 Global Climate Change
Credits:
4.00

Description:
Conversation about the weather is considered to be the universal icebreaker. Yesterday's sweltering heat, the storm predicted for this weekend, even long-term climate shifts find their way in our daily conversation. Today, however, such casual conversations have an edge to them, because we are realizing that humans play a role in determining the climate shift. In fact, understanding the human fingerprint in the Arctic tundra melting, or a devastating hurricane, has gone well-beyond small talk to become one of the most important challenges our society faces today, and on that is wedded to geopolitics. To meaningfully participate in any dialogue that addresses this challenge people have to be aware of certain key ideas of Physics and Planetary Science. The aim of this course is to provide you with some of the essential facts and pieces of science underlying such questions. This course will enable you to grasp many of the issues that dominate today's political discourse and to develop an informed opinion (your, not our!) for which you can rationally argue.

– SF-1160 Individuals and Society in the Zombie Apocalypse
Credits:
4.00
### Description:
"The Walking Dead" tells viewers that life in the zombie apocalypse requires people to "fight the dead, fear the living." Sociologists want to know why we should fear the living. How do individuals come together and try to recreate society for themselves: either to build community or fight other groups? What role do morals and values have in a society? How does all of this determine life, death, and the struggles people must face? Questions like these will give our class a new view of "The Walking Dead" and can help us to learn more about the society that we live in where so far the dead have remained in the ground.

<table>
<thead>
<tr>
<th>SF-1161 The Playwright and the Stage</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Credits:</strong> 4.00</td>
</tr>
</tbody>
</table>

### Description:
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

<table>
<thead>
<tr>
<th>SF-1162 Space Missions: From Moon to Mars and Beyond</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Credits:</strong> 4.00</td>
</tr>
</tbody>
</table>

### Description:
It is hard to believe that only 60 years ago, our only close-up view of a planetary body was that of Earth. We are truly living in the Golden Age of Space Exploration, when a new mission every few years brings us spectacular images from either a neighbor in the solar system or galaxies at the edge of the universe. This course will describe the dozen space missions that changed our view of the universe, ranging from our solar system to the most distant galaxies.
SF-1163 Spellbound! Witches, Wizards and Spirits In American Literature

Credits: 4.00

Description:
Since the beginning of time and across cultures, people have been interested in the supernatural, the paranormal, and the otherworldly. Often, these phenomena have appeared in the form of witches, wizards, and spirits, whether good or bad, wicked or wonderful. Women who have not fulfilled traditional gender roles have historically been cast as witches or, to use Shakespeare's phrase, as "weird sisters", or, in Donald Trump's recent election parlance, as "nasty women." Men in turn appear as wizards, usually more positively than female witches. Men and women alike also can take the form of spirits or ghosts; even houses can be possessed. What lies beneath the great fascination with the supernatural and the paranormal, with the haunted, the possessed, and the spellbinding? What accounts for the different manifestations of spirits? This course takes students on a tour of witches, wizards, and otherworldly spirits throughout American literary history. Tropes of the witch and the wizard have appeared in literature from the time of Shakespeare (see Macbeth) to the contemporary best-selling Harry Potter series, and hits every century in between, such as in Anne Hutchinson's Puritan accounts form the 1600s, Nathaniel Hawthorne and Edgar Allan Poe's in the 1800s, The Wizard of Oz in 1900, and John Updike's The Witches of Eastwick in the 20th century. The course offers readings across genre lines-poetry, fiction, non-fiction, young adult fantasy, and drama-and includes excerpts from film and television shows based upon wizards and witches (such as Bewitched, Buffy the Vampire Slayer, and The Vampire Diaries). The course may include a field trip to Salem, MA, as well as possibly the opportunity to see Wicked at the Boston Opera House (if it is renewed through the fall season, 2017).

SF-1164 Reinventing Europe: Beyond Brexit and Secular Stagnation

Credits: 4.00

Description:
While newspaper headlines focus on the multiple problems Europe is facing today, the evolving adaptation of European nation states and the integration process receive less attention. Brexit and economic crises seem to be synonymous of Europe today, but facts such as the European Union accepting five new members in
the coming five years or Europe being the most advance environmental actor or the main international provider of official aid are often ignored by public opinion. This Seminar for Freshman examines the dynamic evolution of the integration process in Europe in the context of globalization. Three sections articulate the main debates and tensions in the interplay between national and supranational institutions and policies. The first part analyzes how eight European countries have forged their national preferences to delineate their level of immersion in the integration process; it later proceeds with the examination of the main historical events in the history of the integration process. The second part explores the functioning of the EU institutions in order to grasp the essence of the complex policy-making in the Europe of 28 members. The third and final section presents the analysis of the main areas of the EU policy making such as agriculture, monetary and economic issues, among others, and observes the main developments in the area of EU external relations.

- **SF-1165 History of Boston**
  
  **Credits:**
  4.00

  **Description:**
  This semester we will explore Boston’s history. We will read books, visit historical sites, and you will learn how to do historical research on your own. This course meets the requirement of Humanities and History.

- **SF-1166 Cinema-Monde: Global Challenges on Film**
  
  **Credits:**
  4.00

  **Description:**
  This course focuses on French-language films - with subtitles! - that address pressing social issues of the 20th and 21st centuries, such as hunger, female genital mutilation, immigration, racism, economic inequality, genocide, gender, sexuality, colonialism and post-colonialism.

- **SF-1167 Fantasy Fiction: Imaginary Worlds**
  
  **Credits:**
  4.00
Description:
Readers lining up at midnight for the newest Harry Potter book, hundreds of thousands of viewers crashing HBO’s website in their eagerness to watch Game of Thrones: examples of fantasy’s recent popularity are everywhere. This course explores the genre of contemporary fantasy through a historical and critical lens, from the work of J.R.R. Tolkien to the 2015 Nebula Award Winner, Uprooted. We will begin by reading selections from medieval literary texts, including Arthurian legend and Anglo-Saxon epic, to understand the roots of the fantasy genre and consider how these early works have inspired and informed the world-building efforts of later authors. We will also explore fantasy's newest manifestations across different kinds of media, from big-budget film adaptations to internet fan fictions. Critical questions will include: How do works of fantasy deal with the ethical questions surrounding the categories of "good" and "evil", "monstrosity" and "otherness" How do common fantasy plots such as coming-of-age or quest narratives work to aid in fictional character development and build suspense? How are contemporary anxieties about issues such as gender, race and class explored through the genre of fantasy?

SF-1168 The Real Thing: the Pursuit and Problems Of Authenticity
Credits: 4.00

Description:
This course will focus on the concept of authenticity in American culture, from its origins in the early 19th century to the present. When the advertising gurus of Coca-Cola branded it as "The Real Thing," they were exploiting something powerful: the idea of something real, stripped of any falsity or illusion. Humans have always desired to know the world and others "as they really are," but this desire is particularly strong in the modern world: witness the eagerness to discover one’s "true self," cut through the B.S., obtain the genuine article, and "live authentically." In this course we will interrogate this pursuit of the Real Thing. In various ways, the texts we study both embrace authenticity as an ideal and also question its goodness, usefulness, or even its very possibility. We will thus confront a number of interrelated questions: Where does this desire for authenticity come from? What counts as "authenticity," in life and in art? Is authenticity really a virtue to live by? How does it shape artistic and literary expression? Is there even such a thing as "the real you" This course will be divided into three units. In the first unit, "Counterfeitters and Self-Made Men," we will study how a commitment to authenticity arises in antebellum American literature and culture during a time of rapid national
expansion and invention. Readings will include texts by Henry David Thoreau, Ralph Waldo Emerson, Herman Melville, and P.T. Barnum. In the second unit, "Authenticity and Contamination," we will consider two major ways in which authenticity becomes idealized around the turn of the 20th century: as artistic ideal set against fears of mass cultural production, and as a cultural ideal set against fears of racial and cultural mixing. Readings will include texts by Ernest Hemingway, Nella Larsen, Jean Toomer, and William Carlos Williams. In Unit Three, "Buying and Selling Authenticity," we will examine how authenticity becomes commodified (associated with products and "lifestyles") in post-WWII American culture. Texts will include works by Andy Warhol, David Foster Wallace, George Saunders, Banksy, and the TV series Mad Men. Final projects will ask students to consider authenticity today: how is the pursuit of the Real Thing affected by technologies of reproduction, by commodification, and by the increasingly virtual world of the 21st century?

- **SF-1169 Immortality: Real and Imagined**

  **Credits:**
  4.00

  **Description:**
  Most of the world’s religious traditions have as a part of their doctrines some notion of immortality, rendered both in scriptures as well as iconographically. What precisely is entailed by immortality and why does it constitute such a significant element of so many religious traditions? What can we learn about immortality by investigating various conceptions of the afterlife? Is immortality truly a desirable thing? These questions among others will be examined from the perspectives of philosophy, religion, psychology, anthropology, and biology. Besides being cross-disciplinary, the course will be multi-media in nature. In addition to reading philosophical and religious texts concerning the nature of immortality, students will study various accounts of immortality and the afterlife, examine how the afterlife has been dealt with in (visual) art, literature, and film, and investigate current research into life prolongation (biomedical gerontology).

- **SF-1170 From Philia to Facebook: the Meaning of Friendship**

  **Credits:**
  4.00

  **Description:**
The thematic focus of this seminar will be friendship. Friendship is one of the most important of human relationships; one that every student in this seminar has already participated in for many years. It shapes who we are and helps determine who we may become. And while it is a universal phenomenon, it has been practiced quite differently at various times and places in human history. And while we all have an intimate, personal and practical knowledge of friendship through our own experiences, sometimes things that are so close and so obvious to us can be hard to see. Over the course of the semester we will inquire into friendship from many different angles, trying to gain both a broader and a deeper understanding than our own individual experience allows. We will look at friendship first through the lens of philosophy, particularly through the foundational text of Aristotle, The Nicomachean Ethics. We will look at other views of friendship from the ancient world, starting in the past to help us see that friendship has not always been thought of the way we think of it now. After this initial foundation is laid, we will examine other writers and thinkers and take up additional topics like friendship in different cultures, friendship and gender, friendship in and through the arts and include an examination of friendship through the lenses of many different academic disciplines to see how other systematic thinkers conceive of friendship. All along we will be comparing and contrasting with our own personal experiences and considering what modern technology, such as social networking sites, has done to influence friendship, in the way we practice it and the way we conceive it. It is the aim of this class that students not just study different academic points of view, but that that they take up the questions and challenges that these thinkers present to them and fully engage with them on a meaningful personal level.

- **SF-1171 Living on and Beyond the Hyphen/Latino Writers in the USA**

**Credits:**

4.00

**Description:**

Hyphenated-Americans of Latino origin come from many places and backgrounds. Often perceived as a divide, an either/or that separates and distinguishes one ethnic group from another, the hyphen can also be viewed as a link that connects, integrates and facilitates the formation of "new" cultural spaces. Through films and written narratives by and about U.S.A. Latino(a)(x)-Americans, students will examine how individuals who live on the threshold between two languages and cultures embrace the challenge of preserving their own identity and moving beyond stereotypes. Each of the Latino/a/x authors that we will read in this course will describe his/her own experiences living in the U.S.A. By examining their views
through our own filtered lens we shall try to answer questions like the following: 1. What role does language have in our definition/understanding of cultural identity? 2. How do individuals move beyond the hyphen and stop seeing themselves as hybrids? 3. How can an individual who does not belong to a marginalized group (i.e. one considered less powerful and secondary) understand and empathize with those who do? 4. How does globalization affect the dichotomies that arise in bi-cultural and multi-cultural communities?

– SF-1172 The United States Mexican Border

Credits:
4.00

Description:
One hundred and sixty nine years have passed since the Treaty of Guadalupe Hidalgo was signed. It is only fitting to analyze the profound changes that the gain/loss of these territories caused for the citizens of both sides of the border. This course will explore the literature, culture, and history of the United States-Mexican Border and the most pressing problems pertaining to the region. Emphasis will be on contemporary border theater and film. The works of Salcedo, Galindo, Lopez and others will be studied as well as contemporary films and documentaries such as Alambrista, Senorita Extraviada, The Gatekeeper, Sin Nombre, Wetback: the Undocumented Documentary, Victoria para Chino, Which Way Home, and much more. There are no prerequisites for this course. Though the course in conducted in English, parallel readings in Spanish will be made available to those who wish to read and/or compare the original texts.

– SF-1173 Understanding the Vast Sweep of Chinese Culture

Credits:
4.00

Description:
This course is an introduction to both ancient and modern Chinese civilization with a focus on its literature, arts, and 4000 year cultural history. We will see China at its earliest stages through its archaeology and progress to the heights of literary splendor in the Tang and Song Dynasties. Study of select early plays from the Mongol Yuan period will clearly tie into the development of Ming and Qing period fiction. With the fall of imperial China in 1911, the focus of literature changed drastically and we will study how many modern authors were able to draw from a
massive wealth of literary resources to help create a new Chinese literature and culture. We will watch several films that will provide a rich visual portrait of the culture. We will read quite a few representative literary and historical works in English translation that will give a great deal of insight into modern China and how we can both relate to and interact with this complex and amazing country. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for students in all majors that wish to gain a deeper understanding of Asian culture.

- **SF-1176** What Is a Fact?

**Credits:**
4.00

**Description:**
What makes a fact a fact? What makes a fact true? At one time, these questions were only asked by epistemologists and postmodernists, but with the rise of fake news and the discourses surrounding it, these questions are relevant to everyone. Understanding facts is also essential to college students, who must learn to use reliable sources in order to create credible work. In this class, we will examine works of literature, art, science, and history that interrogate how facts are created and how we determine their truth value. Texts will include podcasts, novels and book-length studies of memory and theory of mind (the study of how we understand what others are thinking). We will also utilize the resources of Boston and Suffolk University; we will visit the WBUR NPR newsroom, a local museum, and learn about the legal definition of “truth” from a representative of the law school. By analyzing these texts, participating in these experiences, and completing a series of assignments that ask students to think critically and creatively, this class seeks to understand how we create facts, and why we need them.

- **SF-1177** Revolutions in Thought

**Credits:**
4.00

**Description:**
The course will consider major changes in thought that revolutionized the cultures and societies in which they were embedded. Topics include the rise of monotheistic religions; the American Revolution; the recognition of slavery as a moral evil; the idea of women’s equality; Freudianism; Darwinism; Marxism; as well as Einstein and
the Theory of Relativity. We will enrich the readings and classroom conversations with visits to museums, churches, historic sites and other locations that reflect some aspect of the revolutionary changes that are our focus.

Students in the CAS Honors Program should choose one Seminar for Freshmen course from those listed below:

- **SF-H101 Fixing the World- Energy and Water: The Science of Solutions**  
  **Prerequisites:**  
  CAS Honors students only  
  **Credits:**  
  4.00  
  **Description:**  
  Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-H116 Enlightened Insanity**  
  **Prerequisites:**  
  CAS Honors students only.
Credits:  
4.00

Description:  
Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

Prerequisites:  
CAS Honors students only

Credits:  
4.00

Description:  
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

Prerequisites:  
CAS Honors students only

Credits:  

Description:
How is it that "comics", a genre often viewed as entertainment for children and adolescents, has become one of the most exciting forms of narrative and visual art? To answer this question, this seminar will examine a range of graphic novels, from those that celebrate their origins in superhero comics, such as Alan Moore’s Watchmen, to those that treat subjects not usually considered proper to the comics genre, such as Art Spiegelman's Maus, about the Holocaust, and Alison Bechdel's Fun Home, about the complexities of sexual identity. As we read these works, we will look at how the combination of words and still images makes the graphic novel a unique storytelling form, as well as how artists and writers push the envelope to create new styles and challenge our expectations. In addition to class discussions and writing assignments, we will take a field trip to the Museum of Fine Arts and create a collaborative group graphic novel step-by-step over the course of the semester (all abilities welcome).

- SF-H197 Sustainability, Energy, and Technology At Suffolk University

Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

- SF-H1134 The Meaning of Life

Prerequisites:
CAS honors students only.
Credits:
4.00

Description:
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity's Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

---

SF-H1146 Fido the Friendly Wolf: A Natural History of Dogs

Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

---

SF-H1148 Brave New Worlds

Prerequisites:
Restricted to CAS Honors students

Credits:
4.00
Description:
Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

First-Year Writing: 2 courses, 8 credits Archive 2018-2019

Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. WRI-100+ sections require students to meet with their instructors once per week for a thirty-minute, one-to-one tutorial session, to be scheduled by the instructor with each individual student.

**WRI-H103 Advanced First Year Writing**

**Prerequisites:**
By Invitation Only.

**Credits:**
4.00

**Description:**
This course is by invitation only and reserved for incoming Suffolk students with high admission scores. Advanced study and practice of writing process, revision, and research, based on close readings of a variety of texts. Fall semester only.

---

**Math: 1 course, 4 credits Archive 2018-2019**

Choose one Math course from those listed below:

**MATH-128 Math for the Modern World**

**Prerequisites:**
MATH level 2, or Mathshop, or MATH-104

**Credits:**
4.00

**Description:**
From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem solving in contemporary life and work. It uses a minimal amount of algebra and focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)

− MATH-130 Topics in Finite Mathematics

Prerequisites:
MATH-104, or MATH-121, or MATH level 3

Credits:
4.00

Description:
Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments, Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

− MATH-134 Calculus for Management & Social Sciences

Prerequisites:
MATH-104, MATH-121 or MATH level 4

Credits:
4.00
**Description:**
A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, limits and continuity, derivatives, differentiation rules, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, and area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester.

---

- **MATH-164 Calculus 1 Bridge With Trigonometry**

**Prerequisites:**
Permission of Instructor

**Credits:**
4.00

**Description:**
This course provides an alternative to MATH 165 (Calculus I) for those students who have taken MATH 134 (Calculus for Management and Social Sciences) but who do not have the trigonometric precalculus prerequisite (such as MATH 121) for MATH 165. In other words, the sequence MATH 134 / MATH 164 serves as an alternative to the sequence MATH 121 / MATH 165, and similarly prepares students to take MATH 166 (Calculus II). The course includes a thorough review of trigonometry and other precalculus topics. Aspects of limits and differentiation which students have already seen in MATH 134 are presented briefly, but in most cases with more emphasis on conceptual understanding, and often illustrated using more complicated examples. New calculus topics (i.e. not covered in MATH 134) include one-sided limits, special trigonometric limits, differentiability, derivatives of trigonometric functions and their inverses, derivatives of general inverse functions, logarithmic and implicit differentiation, related rates, L’Hopital’s rule, intermediate values theorem, Rolle’s theorem, mean values theorem, Newton’s method, and linearization. 4 lecture hours plus 1 recitation session each week. Normally offered in fall.

---

- **MATH-165 Calculus I**

**Prerequisites:**
MATH-121 with a minimum grade of C, MATH-075, or MATH level 5

Credits:
4.00

Description:
Functions, limits and continuity, squeeze theorem, limits at infinity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; derivatives of other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); applications of the derivative (implicit differentiation, related rates, optimization, differentials, curve sketching, L'Hopital's rule); anti-derivatives; indefinite integrals; Fundamental Theorem; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

- MATH-166 Calculus II
Prerequisites:
MATH-164 or MATH-165 with a minimum grade of C

Credits:
4.00

Description:
Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (substitution, by parts, trig integrals, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); improper integrals; infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series (computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.
# Social, Cultural, & Global Perspectives: 1 course, 3-4 credits Archive 2018-2019

Choose one SCGP course from those listed below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADPR-217</td>
<td>Gay and Lesbian Studies</td>
<td>4.00</td>
<td>Examines the portrayal of homosexuality in political, social, and cultural discourse. Analyzes the role of media and symbolic construction in the shaping of public values, opinions, and social movements.</td>
</tr>
<tr>
<td>ADPR-219</td>
<td>Rhetoric of Protest and Reform</td>
<td>4.00</td>
<td>Examines the persuasive strategies of social reform movements with special emphasis on the civil rights', women’s rights, and gay rights movements in the United States.</td>
</tr>
<tr>
<td>ARH-203</td>
<td>Arts of Asia</td>
<td>4.00</td>
<td>Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.</td>
</tr>
</tbody>
</table>
- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**  
  **Credits:** 4.00

  **Description:**  
  Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

- **ARH-321 Women, Art and Society**  
  **Credits:** 4.00

  **Description:**  
  Surveys women artists from the sixteenth century to the present and examines new direction in art-historical scholarship developed by feminist art historians during recent decades.

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**  
  **Credits:** 4.00

  **Description:**  
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **AS-500 Asian Studies Internship**  
  **Credits:** 4.00

  **Description:**
Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)

- **BLE-325 Global Business Ethics**
  **Prerequisites:**
  BLE-215, PHIL-119, PHIL-120, PHIL-123 or PHIL-127

  **Credits:**
  3.00

  **Description:**
  Surveys business ethics as they transcend the diverse perspectives of global business. Explores current global ethics standards and values, ethical challenges, controversies, convergence and trends. Students explore famous global business cases through films, websites and independent research. Emphasizes identification and resolution of global business ethical issues within the context of ethical decision-making and sustainability. Analyzes corporate social responsibility; hence, transforming global business ethics through business.

- **CI-204 Prague: Castles to Barbwire**
  **Prerequisites:**
  At least 24 credits earned.

  **Credits:**
  3.00

  **Description:**
  Prague offers students a more recent view into history and will serve as a backdrop to learning "Design Thinking." The curriculum will use Czech and Central European cultural features as the inspiration for learning the creative process, skills that can be applied broadly and globally across disciplines. WWII and its fall to Communism left the Czech Republic undamaged. Artists played a vital part in the country's rise to a Republic during the Velvet Revolution. These dissidents, including writers, actors, artists and musicians were innovators who were the catalyst for change. One
could say that creative minds changed this country. This course is designed to demystify the creative process by introducing the creative practice as a disciplined approach to problem solving and innovation requiring research. This one-month study abroad experience will offer a more worldly insight to the significance of developing skills where divergent thinking and risk taking are one of many key tools in learning to generate new ideas. Travel fee covers accommodations, transfers, some meals and cultural visits. Airfare and tuition not included.

− CJN-216 Intercultural Communication
  Credits:
  4.00

  Description:
  An examination of communication variations and cultural viewpoints and their impact on cross-cultural communication. A special emphasis is placed on rituals and message patterns in non-Western cultures.

− CJN-225 World Cinema
  Credits:
  4.00

  Description:
  An introductory course in film studies with a focus on foreign films. Movies studied include masterpieces of cinema from Europe, Asia, the Middle East, and other nations (Films have subtitles).

− CJN-281 Asian Popular Culture
  Credits:
  4.00

  Description:
  Students critically analyze Asian popular culture since the 1980s using a cultural ethnographic approach. Students apply the lenses of gender, identity, globalization, and business strategies to examine pop phenomena such as Korean Wave, Cool Japan, and Cantonese popular music.
- **CJN-293 Hong Kong Cinema**
  **Credits:**
  4.00

  **Description:**
  By examining the film texts of Hong Kong auteurs such as John Woo, Wong Kar-wai, Tsui Hark, Andrew Lau, and Alan Mak, the course examines issues such as film genres, colonization/decolonization, transnational political economy, the Greater Chinese media market, and the diaspora.

- **CJN-301 Documentary Film and the Image of Conflict in the Middle East**
  **Credits:**
  4.00

  **Description:**
  The course focuses on some of the divisions and conflicts within Israeli society. Students analyze and compare mainstream media discourse to alternative representations in documentary film. Analysis also covers media representation of the Israeli-Palestinian conflict.

- **CJN-385 Globalization of Media and Telecommunications**
  **Credits:**
  4.00

  **Description:**
  A critique of the circulation of media goods and ideologies from both a cultural and political/economic perspective. Topics include global Hollywood, the images of Muslim women in transnational media, the information society, and global social movements.

- **EC-141 Development Economics**
  **Credits:**
  4.00

  **Description:**
Why do so many countries remain so poor? Why have some (e.g. the Asian "tigers") grown so rapidly? Why have most of the countries of Eastern Europe and the Former Soviet Union been slow to ignite economic growth? These questions are addressed by looking at domestic factors (government policies, resource endowments) as well as the international environment (mobile investors, international financial institutions). Asks what economic choices these countries face now. Normally offered yearly. Cultural Diversity B

---

EC-151 Economic & Human Geography

**Credits:**

4.00

**Description:**
The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

---

EDUC-310 Culturally Responsive Education

**Credits:**

4.00

**Description:**
The relationship between cultural diversity and schooling is explored by examining impediments to academic achievement and advancement by minority students, non-native English speaking students, and other under-represented groups. Topics include: standardized testing, identification of inequities, legal and ethical responsibilities of teachers, and promoting equity. Ten pre-practicum observation hours required for teacher candidates.

---

EDUC-315 Strategies for Working With English Learners

**Credits:**

4.00
### Description:
This course examines the specific needs and challenges of the various language and cultural groups in schools. Topics include: theories of 1st and 2nd language acquisition, strategies for teaching academic content, modifying instruction in the mainstream classroom, creating classroom cultures that invite all students into learning, the role of advocacy and professional collaboration in ESL, and analysis of policies related to assessment and placement of English Language Learners.

### ENG-123 Great Books of the World I
**Credits:**
4.00

**Description:**
Literary masterpieces from ancient times to the Renaissance, including: Homer's Odyssey, Sophocles' Oedipus, Virgil's Aeneid, selections from the Hebrew Bible and the Gospels, and Dante's Divine Comedy. List may vary at the discretion of the instructor.

### ENG-124 Great Books of the World II
**Credits:**
4.00

**Description:**
This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptimist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

### ENG-135 World Literature in English
**Credits:**
4.00

**Description:**
A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester. Cultural Diversity B

**ENG-216 World Literature in English**

**Prerequisites:**
WRI-102 or WRI-103

**Credits:**
4.00

**Description:**
A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester. Cultural Diversity B

**ENG-362 Asian-American Literature**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

**FR-205 The Francophone World**

**Prerequisites:**
FR 202 or Instructor's consent
Credits: 4.00

Description:
Explores the francophone world through the study of short stories, print media, and film, by engaging with the rich textured and diverse francophone literary canon. Teaches advance notions of French grammar, write compositions, and the art of conversation related to cultural themes.

FR-216 Masterpieces of French and Francophone Literature in English Translation
Credits: 4.00

Description:
Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

GVT-115 Evolution of the Global System
Credits: 4.00

Description:
Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.
– **GVT-208 Politics / Religion**

**Credits:**

4.00

**Description:**

This course explores the relationship between politics & religion in the United States. How and why does religion influence politics in the U.S.? What does freedom of religion mean in the U.S.? Why do some groups today erroneously claim that the U.S. was founded as a “Christian nation”? This course also examines what major world religions say about the status and responsibilities of the state and the roles that minority religious groups (Buddhism, Islam, etc.) play in U.S. politics.

– **GVT-281 Intro to Comparative Politics**

**Prerequisites:**

GVT 110, GVT 115, and GVT 120 or consent of instructor; Sophomore status or higher

**Credits:**

4.00

**Description:**

Introduces various approaches of comparative politics, such as institutionalism, structuralism, political culture, corporatism, state-society relationship, political economy, etc. Applies the different approaches to explain how various factors affect government institutions, sociopolitical and economic development in different societies. An effort is made to include countries from all regions of the world. Normally offered every semester.

– **GVT-359 Hockey, International Development & Politics**

**Credits:**

4.00

**Description:**

This class examines the way in which national identity, global and regional economics and international development intersect. It uses the professionalization of the sport of hockey and its subsequent spread around the globe as its case. It will look at the rise of the pro game, the way in which it shapes national identity in
the Canadian case, the way in which the pro business model has changed in response to broad socio-economic changes in North America and geo-political shifts around the globe, especially in Eastern Europe and the Former Soviet Union.

- **GVT-467 Comparative Social Movements**
  **Prerequisites:**
  Junior status

  **Credits:**
  4.00

  **Description:**
  How do we explain the appearance or absence of social movements? What social or individual factors explain their development and decline? Who joins social movements? Who does not? Why? What ideas or ideals animate those who do participate? What is it like to be part of a social movement? What effect do they or have they had on politics, power and efforts at social change? These are some of the questions that have traditionally shaped debates over social movements, both domestically and internationally. They will form the analytical core of the work in this course. By critically evaluating several competing schools of thought in social movement theory and history we will attempt to highlight the social forces that have, at varying points in times, facilitated, maintained, as well as blocked the development of social movements in the US and beyond.

- **HST-100 Introduction to Asian Studies: Culture, People, Ideas**
  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, the Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.
- HST-103 Cultures and Social Transformations in Asia  
  **Credits:**  
  4.00  
  
  **Description:**  
  Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

- HST-247 History of Modern Middle East  
  **Credits:**  
  4.00  
  
  **Description:**  
  Explores the broad historical forces, conflicts and major events that have shaped the contemporary nations of the modern Middle East. Topic include: the emergence of the modern Middle East from the empires of the sixteenth and seventeenth centuries; the age of colonialism; the rise of nationalism; socialism, capitalism; the impact of Israeli and Palestinian conflict on the region; oil, the Islamic Revolution in Iran and the rise of Islamic fundamentalist movements; U.S. policy; and Saddam Hussein's Iraq.

- HST-250 A History of Martial Arts in Movies  
  **Credits:**  
  4.00  
  
  **Description:**  
  Outlines the history of Chinese martial arts in five movies, highlighting Chinese views of violence, personal loyalty, government, and justice.

- HST-251 Modern East Asia  
  **Credits:**  
  4.00
### Description:
China, Japan, and Korea - East Asia's critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

</tr>
</thead>
<tbody>
<tr>
<td>HST-252</td>
<td>The Rise of China: Through Films, Media, and History</td>
<td>4.00</td>
<td>Discusses the rise of China as the world’s largest economy and its impact on our life through films, media, and history.</td>
</tr>
<tr>
<td>HST-263</td>
<td>Comparative Race Relations</td>
<td>4.00</td>
<td>Compares and analyzes the history of race and politics in South Africa and the United States from the 17th century to the present. Examines how race as a social and ideological construct influenced and informed political conflicts over land, labor, and social relations in the two countries including slavery, segregation, apartheid, and the struggle to create racial democracies.</td>
</tr>
<tr>
<td>HST-268</td>
<td>History of the Mediterranean</td>
<td>4.00</td>
<td>Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.</td>
</tr>
</tbody>
</table>
- **HST-274 Women in 19th-Century Europe**

**Credits:** 4.00

**Description:**
Explores the condition of European women from 1800 to 1914. Readings focus primarily on women's experiences in France and Great Britain. Topics include: the effects of industrialization on the lives of working-class women; working and middle-class women's negotiation of marriage, work, and family life; the rise of feminism, women's greater participation in the public sphere, and conservative reaction to these changes in women's place in society; women and crime; Victorian ideas about female sexuality; the politics of class and gender in nineteenth-century European society.

- **HST-275 Women in 20th-Century Europe**

**Credits:** 4.00

**Description:**
Examines the changing place of women in European society since 1900. Topics include: women's suffrage and the political advances of the 1920s and 1930s; the revolution in sexual mores, birth control, and the rise of companionate marriage; women and the consumer economy; the anti-woman policies of Fascist Italy and Germany under National Socialism; liberation of women and retrenchment in the Soviet Union; World War II; feminism, sexual liberation, and women's political engagement since the 1960s; and, throughout the twentieth century, women's continuing negotiation of work and family responsibilities.

- **HST-321 History of Islam**

**Credits:** 4.00

**Description:**
Presents a coherent account of the origin and history of Islam since its foundation in Arabia in the seventh century A.D. to the present. Analyzes the terms, events, characteristics, developments, movements, and institutions that have been part of
the shaping of Islam. Ideological challenges and impact of Islam in the world today from both spiritual and political perspectives are examined.

- **HST-371 U.S. Women’s History Colonial to 1865**
  
  **Credits:**
  4.00

  **Description:**
  Traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism legal status, labor activism and popular culture. With attention to ethnicity, race, class, age, region of residence, disability and sexual orientation, the course focuses primarily on the everyday lives of ordinary women.

- **HST-484 History of the Emotions**
  
  **Credits:**
  4.00

  **Description:**
  Explores ideas about emotional life from the fields of history, anthropology, sociology, and psychology as well as the evolution of emotion rules and prescriptions, focusing on western Europe and the United States since 1700. In the eighteenth century, emotions were seen as a positive influence on politics and public life, especially during the French Revolution. After the fall of Robespierre, the emotions were banished to the private sphere - so we will read both primary sources and recent scholarship on 19th- and 20th- century ideas about masculinity and femininity, romantic love and marriage, childrearing, and about what parents and children are supposed feel toward each other, how ideas about these subjects have changed over time, and whether our feelings change with them.

- **MUH-223 World Music**
  
  **Credits:**
  4.00

  **Description:**
Covers topics in folk, traditional, and modern music of Africa, the Middle East, Asia, and Europe in the context of the cultures and lives of the indigenous peoples of those regions; examines how music interacts with the issues of race, gender, class, religion, politics, and social movements. Normally offered every other year.

- **P.AD-201 Social Change**
  **Credits:**
  3.00

  **Description:**
  This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women’s movement, environmentalism, and the gay and lesbian movement.

- **P.AD-H201 Honors Social Change**
  **Credits:**
  3.00

  **Description:**
  This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women’s movement, environmentalism, and the gay and lesbian movement.

- **PHIL-120 Ethics and Civic Life**
  **Credits:**
  4.00

  **Description:**
  In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.
- **PHIL-228 Feminist Philosophy**
  **Credits:**
  4.00

  **Description:**
  This course is an introduction to the philosophy of feminist thought. Feminist theories of epistemology, metaphysics and morality will be examined as critiques of traditional philosophy. Feminist perspectives and methodologies include radical, liberal, postmodern, as well as more recent trends in ecofeminism. Special emphasis will be placed on explicit and implicit practices of alienation and exclusion as they have unfolded in the “gendering” of thought, truth, and reality. 1 term - 4 credits. Normally offered every third year. Cb

- **PHIL-229 Eco-Feminism**
  **Prerequisites:**
  PHIL 119, or PHIL 123, or PHIL 127

  **Credits:**
  4.00

  **Description:**
  Examines the political, social, and ecological problems facing us as a global community. Having its roots in feminist theory and deep-ecology, eco-feminism provides a critical framework for ecological responsibility and accountability. Writings from eco-feminist thinkers and environmental activists around the world will be used to highlight the philosophical and political conflicts and challenges, including globalization and loss of biodiversity, global warming, international human rights, the relationship of gender and nature, and modes of redress for eco-justice and sustainable development.

- **PHIL-261 Eastern Philosophy**
  **Credits:**
  4.00

  **Description:**
The exposition and critical evaluation of Hinduism, Buddhism, Confucianism, Taoism, and Islam. Special attention is given to foundation principles as well as to the similarities and differences of each of these philosophies to basic ideas in Western philosophy. 1 term - 4 credits. Normally offered alternate years. C b

<td>PHIL-265</td>
<td>Women in Spirituality</td>
<td>4.00</td>
<td>An exploration into the various dimensions and ideologies concerning the role of the feminine in relation to the Divine. Belief systems, myths and archetypes from ancient Goddess worship to 20th century feminist theology will be examined in terms of the philosophical content and psychological consequences. Special emphasis will be placed on feminist metaphysical structures for understanding consciousness and Reality. Classes will be conducted by means of lectures, primary and secondary texts and class discussions. Normally offered alternate years. Cultural Diversity A</td>
</tr>
<tr>
<td>PHIL-267</td>
<td>Chinese Philosophy</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course then considers Zen Buddhism, which is called Ch'an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.

- **PSYCH-243 Organizational Psychology**
  
  **Prerequisites:**
  Take PSYCH-114;

  **Credits:**
  4.00

  **Description:**
  Explores the application of psychological theories and principles to organizations and the workplace with attention to the role of culture and context. Topics includes job analysis, recruitment, selection, evaluation, training, retention, and termination. Employee morale, well-being, stress, and hardiness are considered.

- **PSYCH-247 Asian Perspectives on Health and Work**
  
  **Credits:**
  4.00

  **Description:**
  Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants.

- **RS-111 Introduction to World Religions: Western Traditions**
  
  **Credits:**
### Description:
This course will explore the comparative history and structure of Western religious traditions, broadly understood, and their impact on other world religions, while attempting to recognize the similarities and the differences among them. Traditions to be studied include Greek and Roman religion, the monotheistic faiths (Judaism, Christianity, and Islam, as well as Zoroastrianism, Sikhism and Bahai). We will also explore the impact of the Western religions on indigenous traditions, such as African religion, Native American religion, and Pacific Island religion. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. 1 term - 4 credits. Normally offered every year.

---

### RS-112 Introduction to World Religions: Eastern Traditions

**Credits:**

4.00

**Description:**

This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting to recognize the similarities and the differences among them. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. Normally offered every year. Cultural Diversity B

---

### SIB-550 Global Travel Seminar

**Prerequisites:**

Please email Hillary Sabbagh at hsabbagh@suffolk.edu to register for a travel seminar.

**Credits:**

3.00
Description:
An in-depth analysis of timely special issues in international business. Specific topics are announced when the course is scheduled.

- **SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**

  **Credits:**
  4.00

  **Description:**
  This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

- **SF-190 Asia in America Fiction and Fact**

  **Credits:**
  4.00

  **Description:**
  With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.
- **SF-1145 Emergence of Southeast Asia**
  **Credits:**
  4.00

  **Description:**
  Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SOC-218 Crime and Law in Indian Country**
  **Credits:**
  4.00

  **Description:**
  What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.

- **SOC-227 Race in American Society**
  **Credits:**
  4.00

  **Description:**
  Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become
racial identification, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

- **SOC-228 Cultural, Global and Social Perspectives**

  **Credits:**
  4.00

  **Description:**
  Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.

- **SOC-275 Women and Crime**

  **Credits:**
  4.00

  **Description:**
  This course examines the complex relationships between women and crime today. This focus will include women as criminal offenders; women as victims of crime; and women as both offenders and victims. Course materials draw from recent feminist scholarship on these issues in the social sciences. Topics include the causes of women's crime women, drugs, and crime; child abuse and trauma; prostitution and sex trafficking; race, gender and victimization; and feminist social movements against violence. Crimes of violence against women are a central focus in the course.

- **SOC-329 Sociology of Globalization**

  **Prerequisites:**
  Prerequisite: SOC 113 or SOC 116.

  **Credits:**
  4.00
**Description:**
Globalization is shrinking the world. How and why did this happen? This course will explore global change and the global processes which effect key social institutions: culture, the economy and politics. Students will study the processes of globalization and its impact on our lives and people around the globe.

- **SOC-341 International Drug Control Policy**
  **Credits:**
  4.00
  **Description:**
  Relying on a simplistic demand or supply explanation of why Americans use/abuse drugs obscures the reality of America’s drug problem, is ineffective as a guide to public policy and has unforeseen, often negative consequences. Drug use is a complex and multi-faceted issue. There are no easy answers. To comprehend the complexity of America's drug problem one needs an understanding of the geography, history, religion, law, economics and international politics of the Middle and Far East, Eastern Europe, Africa, Mexico, and Central and South America. This class will provide this basic understanding without losing sight that the problem we seek to remedy is our own.

- **SOC-354 Death and Dying**
  **Credits:**
  4.00
  **Description:**
  An examination of changing definitions of life and death, social factors affecting causes and rates of death, care of the dying and their families, institutionalization, the funeral industry, suicide, crisis intervention, and the impact of technology on the dying process.

- **SOC-357 Global Health and Healing**
  **Credits:**
  4.00
  **Description:**
An examination of how different cultures understand health and illness. Healing approaches from Asia, Africa and the Americas will be explored.

- **SPAN-202 Intermediate Spanish II**

**Prerequisites:**
SPAN 201 or Instructor’s consent.

**Credits:**
4.00

**Description:**
Continues skills development from 201. Students read a collection of short stories, write compositions, develop cultural insights through comparative and contrastive assignments, and practice listening and speaking skills in weekly conversation sessions.

- **SPAN-290 Advanced Composition & Conversation**

**Prerequisites:**
Prerequisite: Spanish 202, 203 or 250 or Instructor’s consent

**Credits:**
4.00

**Description:**
Develops written and oral skills in various contexts and registers. Emphasis on strengthening written skills and learning to speak clearly and persuasively in Spanish. Short texts and audio-visual materials provide the basis for classroom activities which include regularly assigned essays, group discussions and debates.

- **SPAN-300 Intro to Cultural Texts**

**Prerequisites:**
Spanish 202, 203, 250 or Instructor’s consent.

**Credits:**
4.00
Description:
Explores a selection of Peninsular and Latin American cultural materials. Primarily examines texts from different literary genres (narrative, drama, essay, and poetry). Develops critical skills required in more advanced Spanish courses, through close readings and textual analysis. Activities include regularly assigned essays, group discussions, and short scene work.

- SPAN-301 Spanish Culture and Civilization

Prerequisites:
Spanish 202, 203 or 250. Spanish 290 or 300 are strongly recommended.

Credits:
4.00

Description:
Examines the civilization and culture of Spain highlighting its historical development and cultural manifestations from pre-historic times to the nineteenth century. Students improve their four skills through activities that include discussions, oral presentations, and writing assignments based on reading and films.

- SPAN-302 Indigenous and Colonial Latin America

Prerequisites:
Spanish 202, 203 or 250 or Instructor's consent. Span 290 or 300 strongly recommended.

Credits:
4.00

Description:
Introduces students to the complexity Latin America by examining its roots in pre-Columbian America and the impact of Spanish exploration and colonization. Places emphasis on cultural, economic, historical, philosophical, political and religious patterns that define the region. Includes class discussions, oral presentations, and writing assignments based on reading and audio-visual material.
- **SPAN-303 Modern and Contemporary Latin America**

**Prerequisites:**
SPAN 202 or 203 or Instructor's consent. SPAN 290 or 300 strongly recommended.

**Credits:**
4.00

**Description:**
Examines the path taken by Latin American and Caribbean countries to build independent nations out of colonial territories highlighting the 19th, 20th, and 21st centuries, ethnic plurality, and cultural complexity in areas such as politics, religion, sociology, economics, customs, music & film. The cultural contributions of Spanish-speaking minorities in the United States are also addressed. Includes class discussions, oral presentations, and writing assignments based on readings and audio-visual material.

- **SPAN-315 Spanish for the Professions**

**Prerequisites:**
SPAN 290 or SPAN 300 or Instructor's consent.

**Credits:**
4.00

**Description:**
Integrates language learning with culture via business context of the Hispanic world. Spanish for banking and finance, marketing and advertising, and international commerce are highlighted. Students increase their cross-cultural understanding and written and oral proficiency in business Spanish through a wide range of assignments.

- **SPAN-390 Introduction to Latin American and Caribbean Literature**

**Prerequisites:**
SPAN 300; SPAN 302 is strongly recommended

**Credits:**
4.00
**Description:**
Examines authors from Latin America and the Caribbean in their historical and cultural contexts. Reading and class discussions consider the relationship between the writer and society by covering such topics as colonialism, the oral tradition, modernism and the emergence of new narratives in the twentieth century. The Inca Garcilaso, Sor Juana, Carlos Fuentes, Rigoberta Menchu, and Pablo Neruda are among some writers studied.

---

**THETR-260 Broadway Musicals**

**Credits:**
4.00

**Description:**
This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

---

**THETR-267 Introduction to Theatre: Contemporary American**

**Credits:**
4.00

**Description:**
This course provides a formal introduction to the theories and practices strategically used by American theatre artists after the Second World War. Special emphasis is placed on theatre artists exploring issues of cultural identity including works by GLBT, African-American, Asian-American, and Latin American playwrights. These playwrights may include Tony Kushner, Paula Vogel, Suzan-Lori Parks, Adrienne Kennedy, August Wilson, David Henry Hwang, Philip Kan Gotanda, Eduardo Machado, and Melinda Lopez. The course will also provide an introduction to trends in post-modern theatre practices related to emerging work of the auteur director, solo performers, and interdisciplinary collectives. Satisfies a core requirement for Theatre majors. Normally offered alternate years.
- **WGS-111 Women, History, and Culture**

  **Credits:**
  4.00

  **Description:**
  Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-H111 Women, History, & Culture**

  **Prerequisites:**
  At least a 3.3 GPA required.

  **Credits:**
  4.00

  **Description:**
  Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-113 Women, Science, and Society**

  **Credits:**
  4.00
**Description:**
Explores women's lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the female body and eating disorders; women's health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

---

- **WGS-115 Introduction to Gender Studies**

**Credits:**
4.00

**Description:**
Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women's studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

---

- **WGS-235 Gender and Sexuality in Visual Culture**

**Credits:**
4.00

**Description:**
Explores how gender and sexuality are depicted, constructed, and interrogated across a variety of visual mediums, including film, television, and photography. We will pair foundational readings in queer and feminist thought with representations in order to consider how theory and popular culture engage in a constant dialogue. Topics include: the maintenance of norms regarding gender and sexuality; how race, class, and ability complicate our understanding of gender and sexuality; the ways in which sexuality intertwines with other social and political formations; imagining alternative theories and practices in representing gender and sexuality in
contemporary media culture. Possible texts include theoretical work by Sigmund Freud, Judith Butler, Rosemarie Garland-Thomson, and David Halperin and media such as The Shape of Water (2017), Blade Runner (1982), Queer Eye for the Straight Guy (2003-2007), and Jess Dugan's To Survive on This Shore (2018).

- **WGS-311 Engendering Entertainment: Feminism and Popular Culture**

  **Credits:**
  4.00

  **Description:**
  Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How To Be A Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

- **WGS-315 Feminist Thought**

  **Credits:**
  4.00

  **Description:**
  Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldua, and Judith Butler.
- **WGS-325 Global Women's Fiction**
  **Credits:**
  4.00  

  **Description:**
  Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

- **WGS-335 Queer Narratives**
  **Credits:**
  4.00  

  **Description:**
  Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's recent memoir, "Redefining Realness", as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

- **WGS-340 Women on Stage**
  **Credits:**
  4.00  

  **Description:**
  Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of
authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht’s alienation effect, and the distinction between performance and the performative.

Courses that fulfill the Creativity and Innovation, Humanities/History, Language, Literature, Quantitative Reasoning, Seminar for Freshmen, Social Science, or VPATH requirements may double count to fulfill the Social, Cultural, and Global Perspectives (SCGP) requirement.

Science, Technology, & Engineering (STE): 2 courses, at least one with a laboratory, 8 credits Archive 2018-2019

Choose two STE (Science, Technology, and Engineering) courses, at least one with a corresponding laboratory, from those listed below. Courses do not need to be in a sequence. In the case of a course that is a lecture plus a lab, the student must complete both components to earn credit for the STE requirement.

Biology:

- **BIO-105 Humans and the Evolutionary Perspective**
  
  **Prerequisites:**
  Non Science Majors Only

  **Credits:**
  4.00

  **Description:**
  Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one
of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

- **BIO-109 Plants and People**
  **Prerequisites:**
  Non Science Majors Only.

  **Credits:**
  4.00

  **Description:**
  This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.

- **BIO-111 Introduction to the Cell**
  **Prerequisites:**
  Must take BIO L111 concurrently

  **Credits:**
  3.00

  **Description:**
  Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.
**Prerequisites:**
Concurrently with BIO 111

**Credits:**
1.00

**Description:**
Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

---

**BIO-114 Organismal Biology**

**Prerequisites:**
Must take BIO L114 concurrently.

**Credits:**
3.00

**Description:**
Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

---

**BIO-L114 Organismal Biology Laboratory**

**Prerequisites:**
Must take BIO 114 concurrently

**Credits:**
1.00

**Description:**
A series of laboratory experiences in evolution, diversity, anatomy and physiology.

---

**BIO-201 Biology’s Big Questions**
Prerequisites:
Non Science Majors Only.

Credits:
4.00

Description:
This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

Chemistry:

- CHEM-105 Chemical New Product Development
  
  Prerequisites:
  ENT 101

  Credits:
  4.00

  Description:
  This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

- CHEM-106 Biotechnology & Its Applications in Medicine, Agriculture, Law
Credits:
4.00

Description:
Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, short documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.

- CHEM-111 General Chemistry I

Prerequisites:
Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

Credits:
3.00

Description:
Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

- CHEM-L111 General Chemistry Laboratory I

Prerequisites:
MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

Credits:
1.00

Description:
Introduces the basic principles of chemistry through “discovery” laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs,
and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

**Computer Science:**

- **CMPSC-F107 Ants, Rumors and Gridlocks**

  **Prerequisites:**
  Math placement level of 2 or above or any MATH course at the level 100 or above

  **Credits:**
  4.00

  **Description:**
  Do viruses and rumors spread like forest fires? How do ants cooperate? Do spoken languages and biological species evolve in a similar way? "Ants, Rumors, and Gridlocks" exposes students to introductory aspects of computational science by addressing and answering these and many other questions. Students use and modify virtual experiments preprogrammed in the NetLogo programming language to investigate these topics and others in Social Sciences, Biology, and Environmental Science. No prior knowledge of computer programming or NetLogo is required.

**Electrical Engineering:**

- **ECE-288 Measuring the World**

  **Credits:**
  4.00

  **Description:**
The world is addicted to quantifying the essence of everything, from personal IQ, to the speed of a baseball, to our healthiness, or our chances of winning the lottery. Behind most of these numeric values exists a science of measurement. Some of this is referenced to international standards, such as for length, time, weight, or temperature. Others are more arbitrary and subjective, such as ranking Olympic performance in gymnastics, beauty pageants, or popular responses as found in the game show “Family Feud.” A third category includes controversial areas, such as measuring whether a person is lying when interrogated, or using hype rather than reality to market products. Sometimes statistics are used to predict sports outcomes, such as in the annual March Madness NCAA basketball brackets. Finally, in a world subject to fraud and deception, it can be essential to distinguish legitimate from counterfeit items, such as in money, art, collectibles, and historical documents. Don’t get hoodwinked! This course examines all of these, starting with how measurements have been made throughout history, along with a full deck of entertaining terms used during the ages. This may help you sort out your weight, whether given in pounds, kilos, or stones. Often these terms will provide insights into how people lived in different eras. We will also look at some of the technologies currently available to provide these measurements, and unravel the complexities of various sensors that are used. As we consider the meaning of "accuracy" we may become less naive about how much confidence to ascribe to the results given us. Hovering around all of these measurements should be the question of validity - are they meaningful, useful, or misleading? And the impact they have on society - whether they steer behavior more powerfully than one might originally suspect. Each student will also be given an opportunity to become an "expert" in an area of measurement of personal interest. By the end of the course all students should have gained greater insight into how the world around them is quantified, and whether numbers can provide accurate predictors for our future. Algebra helpful. Basic science background helpful. Curiosity essential!

**Engineering Science:**

- **ENS-103 Introduction to Engineering**

  **Prerequisites:**
  ENS L103 MUST BE TAKEN CONCURRENTLY.

  **Credits:**
  3.00
**Description:**
"This course provides exposure to engineering practice, with particular focus on electrical engineering components such as circuit elements and systems. It seeks to go beyond the mathematics and provide an intuitive appreciation of functional devices. Examples taken from a broad swath of technological history illustrate significant crossroads, decisions, and inventiveness. Emphasis is placed on learning to think as an engineer - assessment of problems, candidate solution tradeoffs, and implementations. Frequent exercises in creative engineering design will be used. Students will be required to design several elementary devices, such as a magnet, a capacitor, a timing device, and a motor, which they will enter in a competition for overall strength, compactness, accuracy, or speed. Sometimes assignments relate to "'survival on an island'" concerns, such as communication or drinking water. Students also learn about reverse engineering by selecting, building, troubleshooting, and presenting an electronic kit of their choice. A term paper determining the engineering behind a topic of their choice will also be written and presented. On occasion (see ENS L103) there will be team competitions between various smaller groups in the class."

**Prerequisites:**
Must be taken Concurrently w/ ENS-103

**Credits:**
1.00

**Description:**
The Lab is designed to provide opportunities to gain familiarity with engineering tools. Students will be introduced to parts (e.g. learn the resistor color code), test equipment (multimeters, prototyping trainers, signal generators, and oscilloscopes), and construction techniques (wiring, soldering, troubleshooting). Although it varies from year to year, Class Projects can be built during the Lab sessions. In the past these have included a 25 Watt electric generator, various door lock systems (both mechanical and electronic), and an AM transmitter and receiver (all projects made from scratch). It is likely that 2010-2011 may introduce some robotic creations for a competition. Electronic kits and motors can also be built and serviced in the Lab. There is an adjoining machine shop, which can be utilized (with supervision), for fabricating items. Individual creativity is encouraged, and informal problem solving sessions occasionally occupy lab time. However, the lab is accessible outside of the traditional scheduled time.
Environmental Science:

- **UES-107 Introduction to Drones**

**Prerequisites:**
UES-L107 must be taken concurrently.

**Credits:**
3.00

**Description:**
Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration’s Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

- **UES-L107 Introduction to Drones Lab**

**Prerequisites:**
UES-107 must be taken concurrently.

**Credits:**
1.00

**Description:**
Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration's Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

UES-111 Environmental Science
Prerequisites:
Take UES-L111 concurrently

Credits:
3.00

Description:
Applies the fundamentals of science to environmental issues. Topics include population dynamics and resources, environmental degradation, ecosystems, geologic processes, deforestation, biodiversity, climate change, air, soil, and water resource management, and pollution and risks to health.

UES-L111 Environmental Science Lab
Prerequisites:
Take UES-111 concurrently

Credits:
1.00

Description:
Laboratory exercises are used to illustrate topics covered in UES 111. Field testing and analysis of environmental samples. Field trips may be required.

UES-121 Science, Art, and the Environment

Prerequisites:
Take UES-L121 concurrently

Credits:
3.00

Description:
Examines art and cultural objects through the lens of the biological, chemical, and physical principles of the materials and processes we use to make them. Includes consideration of factors important in art conservation. Provides an environmental context for the manufacture and use of art materials and the preservation of cultural objects.

UES-L121 Science, Art, and the Environment Lab

Prerequisites:
Take UES-121 concurrently

Credits:
1.00

Description:
Provides hands-on work with pigments, dyes, and other art materials using the basic principles of science and technology. Students will conduct laboratory experiments that produce art objects and other consumer products. Instruction in safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables, graphs, and graphics. Practice in synthesizing compounds like paints and finishes and in evaluating methods of art conservation.

UES-225 Geographical Information Science

Prerequisites:
Take UES-L225 concurrently
Credits:  
3.00

Description:  
Provides the fundamentals of geographic information science (GIS) including the history of automated mapping. A review of the necessary hardware and software elements used in GIS is presented. Hands-on exercises with computerized mapping software are required.

UES-L225 Geographic Information Science Lab

Prerequisites:  
Take UES-225 concurrently

Credits:  
1.00

Description:  
Required companion computer laboratory to be taken concurrently with UES 225.

UES-270 SL-Understanding Wetlands Through Citizen Science

Credits:  
4.00

Description:  
In this course students meet community needs by engaging in service-learning outside the classroom. Develops students' awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps. The beginning of the semester is devoted to understanding of how these vital ecosystems function with topics including wetland hydrology, biogeochemistry, management, and restoration. The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner.

UES-H270 Honors SL Understanding Wetlands Through Citizen Science

Prerequisites:
Honors student or at least 3.3 GPA

Credits: 4.00

Description: In this course students meet community needs by engaging in service-learning outside the classroom. Students' awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps will be developed through exploration of these vital ecosystems (topics include wetland biology, management, and restoration). The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner where students will be going into the field three times over the course of the semester via pre-arranged private transportation.

**Forensic Science:**

- **FS-103 Introduction to Forensic Science**
  
  Prerequisites: FS-L103 concurrently
  
  Credits: 3.00

  Description: Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall

- **FS-L103 Introduction to Forensic Science Lab**
  
  Prerequisites: FS-103 concurrently
  
  Credits:
1.00

**Description:**
Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall

**Neuroscience:**

- **NEUR-101 Intro to Neuroscience**

  **Credits:**
  4.00

  **Description:**
  Introduces the field of neuroscience, the study of the organization and function of the nervous system of humans and other animals. Topics include the neuron and neural transmission, the overall function and organization of the nervous system, the development of the brain, neural plasticity, sleep, memory and other higher cognitive functions.

**Physics:**

- **PHYS-111 College Physics I**

  **Prerequisites:**
  Take MATH-121 or MATH-134 or MATH-165 or permission of Physics department chair; PHYS-L111 taken concurrently

  **Credits:**
  3.00

  **Description:**
Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.

---

**PHYS-L111 College Physics Lab I**

**Prerequisites:**
PHYS 111 concurrently

**Credits:**
1.00

**Description:**
Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks and formal reports required.

---

**PHYS-151 University Physics I**

**Prerequisites:**
MATH-121 or higher (previously or concurrently) and PHYS L151 concurrently

**Credits:**
3.00

**Description:**
PHYS 151 is the first of three courses (PHYS 151, 152, 153) that comprise the calculus based introductory physics sequence at Suffolk University intended for students majoring in the physical sciences, engineering and mathematics. This course aims to teach basic techniques in physics that fall under the topic of classical mechanics and their application in understanding the natural world. Specific topics include the study of vectors, Newton’s laws, rotations, rigid body statics and dynamics, fluid mechanics, simple harmonic motion, mechanical waves, sound and hearing. The student will learn how to analyze physical situations by using simple models, and also how to solve those models and derive useful conclusions from them. This course will show students how experimental results and mathematical
representations are combined to create testable scientific theories, and how the complexities of most real-life physical situations can be reduced to simple problems by identifying the essential physical features and ignoring the rest. The student will learn to distinguish the scientific approach to physical situations from other ways of looking at them, for example, artistic, humanistic, and business.

- **PHYS-L151 University Physics Lab I**
  **Prerequisites:**
  MATH 121 or higher (previously or concurrently) PHYS 151 concurrently

  **Credits:**
  1.00

  **Description:**
  The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton’s laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

- **PHYS-152 University Physics II**
  **Prerequisites:**
  PHYS-151 and PHYS-L151. Must be taken concurrently with PHYS-L152.

  **Credits:**
  3.00

  **Description:**
  This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss' law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday's law and AC circuits are discussed. This is followed by Maxwell's equations, electromagnetic waves, and properties of light.

- **PHYS-L152 University Physics Lab II**
  **Prerequisites:**
  PHYS 151 and L151 and PHYS 152 must be taken concurrently
Credits:  
1.00

Description:  
The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday’s law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

Prerequisites:  
- PHYS-153 University Physics III

Credits:  
3.00

Description:  
This calculus-based course is the introduction of the topics of modern physics. It begins with special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom. Then Schrodinger’s equation is introduced with use of wave functions, particle box, barrier penetration, quantum mechanical tunneling, the Pauli Exclusion principle, the development of the periodic table, and the X-ray spectra. Development of solid state physics with bonding in molecules, band theory of solids and semiconductor behavior. The final topics cover nuclear physics, radioactivity, half-life, nuclear fission and fusion, medical uses of radiation, elementary particle physics and introduction to astrophysics.

Prerequisites:  
- PHYS-L153 University Physics III Lab

Credits:  
1.00
Description:
The laboratory consists of experiments to illustrate the basic concepts of special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom.

Science:

- **SCI-103 Environmental Science**
  **Prerequisites:**
  SCI-L103 must be taken concurrently

  **Credits:**
  3.00

  **Description:**
  Case study approach to the fundamentals of science applied to environmental degradation, ecosystems, geological processes, population dynamics, deforestation and biodiversity, climate change, ozone depletion, air soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment.

- **SCI-L103 Environmental Science Lab**
  **Prerequisites:**
  Must take SCI-103 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.
- **SCI-108 Introduction to Cancer Care**
  
  **Credits:**
  4.00
  
  **Description:**
  Introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants.

- **SCI-109 SL-Introduction to Community Cancer Care**
  
  **Credits:**
  4.00
  
  **Description:**
  Students meet community needs by engaging in service-learning outside the classroom. This course introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants. Service-learning is a pedagogy integrating academically relevant service activities that address human and community needs into a course. Students connect knowledge and theory to practice by combining service with reflection in a structured learning environment. Students will engage in service-learning with an underserved community partner in regards to cancer by working directly with cancer patients or by assisting on a project that supports cancer patients.

- **SCI-111 Introduction to Astronomy**
  
  **Prerequisites:**
  MATH-128 or higher and SCI-L111 must be taken concurrently.
  
  **Credits:**
  3.00
### Description:
History of Astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors; space programs, science and technology in society. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations. For non-science majors.

---

- **SCI-113 A Habitable Earth Within the Solar System**

**Credits:**
4.00

**Description:**
This course introduces non-science majors to concepts that are central to making our planet habitable. It presents Earth in context of the solar system with a broad view of global climate change and energy resources in a quest to better understand the workings our planet. This course on Earth and Planetary Science is suitable for students who may have taken their last science and math course several years ago, or are just curious about knowing facts on major issues that pertain to the future of our planet. Together with a reading component, this course aims to give students a flavor of how researchers think, investigate and develop conclusions that directly affect our political and economic future. Topics covered in this course range from the solar system to the study of search for other habitable Earth-like planets, search for extraterrestrial life, and evolution of life on Earth. Other characteristics of this course are heavy use of audio-visual materials often including computer animations and simulations, in-class experiment demonstration, and intensive use of INTERNET-based resources.

---

- **SCI-165 Inner Workings of Physics Universe**

**Credits:**
4.00

**Description:**
About 15 billion years ago, (data indicate) the big bang occurred and the universe was born. With it came physical laws and a spectacular array of consequences that lead to the universe as we know it. This non-lab, 4 credit course explores the inner
workings of the physical universe in terms of the scientific inquiry which lead to
Newton's laws, an understanding of energy, waves, light, electricity, atomic
structure, chemical reactions, nuclear physics, particle physics, relativity, and the
big bang theory. During the course, students will learn to make use of modern
resources to access scientific and technical literature to research a scientific topic.
They will learn to distinguish between science and technology (e.g. quantum
mechanics and nanotechnology, the discovery of the Higgs boson and the large
hadron collider that made it possible, etc.) and to understand how the science,
technology, and engineering disciplines play a crucial role in recognizing and
solving problems of society and the world that we share.

<tr>
<td>SCI-171 The Built World: How Humans Engineer Environments</td>
<td>The most basic needs of humans have not changed - water, food, and shelter - but the means of meeting these needs has. In this course, we will examine how technology-driven societies operate by studying how cities are built and how they function. Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design), and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.</td>

Geographic Information Science (GIS) link information (number of fire hydrants on a block) to features on a map (e.g., a point representing street address) that has a designated geographic location (as designated by global coordinates). Unlike paper maps, GIS software allows the production of interactive maps that allows the user to layer data, to indicate spatial patterns, to analyze trends, and to combine different features of the mapped area in novel ways. For example, a business person may wish to use GIS to determine the optimum location of retail outlet (based on the mapped demographics of a neighborhood), while an environmental engineer may use GIS to describe the location of outfalls to see how they correlate to areas of stream pollution. In this course, students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

---

**SCI-L173 Mapping Our World Lab**

**Prerequisites:**
SCI-173 must be taken concurrently.

**Credits:**
1.00

**Description:**
This laboratory illustrates concepts and methods taught in SCI 173. In this lab students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

---

**SCI-181 Science and Life in the 21st Century**

**Credits:**
4.00

**Description:**
No longer offered on Boston campus This is a four credit, non-lab, science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.
<table>

<tr>
<td>SCI-184 Contemporary Science and Innovation</td>
<td>4.00</td>
<td>This is a 4 credit, project based science course that examines the central scientific problems confronting the 21st century. The course consists of lectures, class discussions, field trips, and in-class hands-on activities designed to familiarize the student with different concepts of the lectures. The current focus is on sustainable energy production. A final team project related to the course topics will be given. This is the version of SCI 183 without a separate lab component. Students who have taken SCI 183, L183 are not allowed to take this course.</td>
</tr>
<tr>
<td>SCI-201 Physics for Future Presidents</td>
<td>4.00</td>
<td>This course presents a topical introduction to the key principles and concepts of physics in the context of the world events and natural phenomena that confront world leaders and that require informed decisions and responses. Energy, health, counter-terrorism, remote sensing, space programs, nuclear proliferation, and a host of other modern challenges have technological and scientific dimensions, the understanding of which is essential to avoiding disastrous policy decisions. This course considers the application of physics to these societal challenges. The material is covered at a level and pace that a future world leader should be able to handle; the emphasis is on the development of physical reasoning skills, and not on detailed, mathematical problem solving.</td>
</tr>
<tr>
<td>SCI-210 Earth and Planetary Crystals</td>
<td>3.00</td>
<td><strong>Prerequisites:</strong> Take SCI-L210 concurrently</td>
</tr>
</tbody>
</table>
Description:
This course will provide undergraduate students of various disciplines with an introduction to gems and crystals using interactive, evidence-based teaching approaches. Crystalline forms of matter are critical to our existence. Using innovative teaching strategies of in-class hands-on demonstration, supplemented with visuals of crystal details, the course provides students insights into the formation, alteration and unique properties that make crystals invaluable. Topics range from the study of proteins and nucleic acids to the interior of planets. The in-class lectures will provide a basic guide that will serve as a platform for individually catered in-depth study. Therefore, the course is open to advanced students as well, who can pick up higher level of information for discussion and class projects.

– SCI-L210 Earth and Planetary Crystals Laboratory

Prerequisites:
Take SCI-210 concurrently

Credits:
1.00

Description:
This course introduces concepts that are central to understanding crystals, gemstones and other natural materials abundant throughout the solar system. It includes an introduction to carbon-based crystals (diamonds, proteins, viruses and ices) in context with origins of life, geopolitical significance and their applications. This laboratory-based course is an introduction to modern tools and techniques for crystal analysis with a historical context of some of the greatest discoveries in science (DNA, and other nanomaterials). It presents crystals and gems from their visually appealing point of view to their sometimes-dramatic physical characteristics, with a broad view of their formation, occurrence, physics, chemistry and resources perspective.

Some Science division courses may have Math or Computer Science prerequisites; many have other Science prerequisites.

Ethical & Philosophical Inquiry: 1 course, 4 credits
Archive 2018-2019
Choose one Ethics course from those listed below:

- **PHIL-119 Ethics**
  
  **Credits:**
  4.00

  **Description:**
  A systematic introduction to the major thinkers and their positions on the main issues of ethics, such as: What is morality? What are moral values? How should we live our lives? Are there objective, universal, absolute moral standards? If so, what are they, and what is their basis? 1 term - credits. Normally offered every year.

- **PHIL-120 Ethics and Civic Life**
  
  **Credits:**
  4.00

  **Description:**
  In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.

- **PHIL-123 Social Ethics: The Good Life**
  
  **Credits:**
  4.00

  **Description:**
  An examination of contemporary Western society, particularly in the United States, in relation to philosophical attempts to define the "good life." Current books that exhibit a philosophical approach towards important contemporary social issues will be discussed, as well as classics in philosophy. Topics may include: civic virtue, consumerism, current events, economic justice, popular culture (film, music, television), religion and secularism, etc. 1 term - 4 credits. Normally offered every year.

- **PHIL-127 Contemporary Moral Issues**
  
  **Credits:**
4.00

Description:
A critical examination of a number of contemporary moral issues such as: abortion, affirmative action, animal rights, capital punishment, cloning, drug legalization, environmental ethics, euthanasia, genetic engineering, gun control, pornography, same-sex marriage, suicide, war and terrorism, etc. 1 term - 4 credits. Normally offered every year.

Human Behavior and Societies: 1 course, 4 credits
Archive 2018-2019

– LAWU-211 Litigation

Prerequisites:
Certificate or Sophomore status, or Instructor’s consent

Credits:
4.00

Description:
The Rules of Civil Procedure dictate the steps taken in state and federal lawsuits. This course will acquaint students with rules and the practical requirements of the rules, from filing a complaint to clarifying a judgment and to the duties of paralegals in a litigation office. Normally offered each semester.

Social and Intellectual History: 1 course, 4 credits
Archive 2018-2019

Choose one course from those listed below:
American Studies:

- AMST-101 American History and Culture
  Credits: 4.00

Description:
This course offers a basic introduction to American culture and society through the study of American History. The city of Boston and its extraordinary history and institutions will be at the heart of the class and students will frequently visit sites close to the campus. Topics will focus on areas such as the way people from different cultures have understood and misunderstood each other; the evolution of American politics and political institutions; the American Revolution and the founding documents and institutions of the United States; the distinct forms of American religion, American literature and the American economy; slavery and race in American society; the rise of America to world power; the changing role of women; the New Deal and the rise of the modern welfare state; immigration; the development of popular culture; and the meaning of Donald Trump. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-111 Defining America and Americans.

- AMST-111 Defining America and Americans
  Credits: 4.00

Description:
Examines artistic, social, and political imaginings of America and Americans. We will read works by American and foreign observers of the United States to ask how Americans define themselves and how others see them. Course assignments will introduce students to themes, perspectives, and methods in the field of American Studies. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-101 American History and Culture.

Art & Design:
- **ADG-224 History of Graphic Design**
  **Credits:**
  4.00

  **Description:**
  The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various-isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

**Asian Studies:**

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**
  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

**Communication:**

- **CJN-114 Great Works of Journalism**
  **Credits:**
  4.00

  **Description:**
  [Description not provided]
An examination of important contributions to the literature of journalism through an analysis of major writers and news coverage of significant events from a journalistic perspective.

**English:**

- **ENG-123 Great Books of the World I**
  **Credits:**
  4.00

  **Description:**
  Literary masterpieces from ancient times to the Renaissance, including: Homer’s Odyssey, Sophocles’ Oedipus, Virgil's Aeneid, selections from the Hebrew Bible and the Gospels, and Dante's Divine Comedy. List may vary at the discretion of the instructor.

- **ENG-124 Great Books of the World II**
  **Credits:**
  4.00

  **Description:**
  This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptomist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

**Environmental Science:**

- **UES-325 Environmental History of the U.S.**
  **Credits:**
4.00

**Description:**
Explores how Americans have understood the environment and their relationship to it through analysis of classic environmental texts, historical contexts, and societal perspectives. Analyzes how the environment has changed from pre-colonial times to the present and how these changes have been described through the lens of environmental history. Themes include differing viewpoints of European and indigenous peoples toward the natural environment, the impacts of the Western expansion on native species and landscapes, the rise of industrialism and its impacts on natural resources and ecosystems, and the rise of 20th century environmentalism.

**History:**

- **HST-101 History of Western Civilization I**
  **Credits:**
  4.00
  **Description:**
  Surveys European culture, politics, and society from antiquity to the seventeenth century. Topics include: the Greek, Judaic, and Roman heritage; the rise of Christianity; feudal society in the Middle Ages; Renaissance and Reformation; the Scientific Revolution; and the development of absolutist and constitutional governments.

- **HST-102 History of Western Civilization II**
  **Credits:**
  4.00
  **Description:**
  Surveys European culture, politics, and society from the Scientific Revolution to the present. Topics include: the development of absolutist and constitutional governments; the Enlightenment; the French Revolution; Industrialization and urbanization; nationalism and imperialism; World War I, World War II, and the Cold War; the decline of Europe as a world power.
- **HST-103 Cultures and Social Transformations in Asia**  
**Credits:**  
4.00

**Description:**  
Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

- **HST-121 World History I**  
**Credits:**  
4.00

**Description:**  
Explores the major themes of human history to 1500. Topics include: hunter-gathering, the migration of humans across the globe, transitions to food production, and the development of complex societies based on agriculture. Major early Eurasian civilizations (China, India, the Middle East, and Europe) are examined (alongside their interactions with Inner Asia and the Arabian Peninsula). So too are Sub-Saharan Africa and the Americas.

- **HST-122 World History II**  
**Credits:**  
4.00

**Description:**  
Explores the major themes of human history since 1500. Topics include: the outward expansion of Europe, the Scientific Revolution, the Enlightenment, the Age of Revolutions, the Industrial Revolution, the creation of a great-power dominated global system, the two world wars, the Cold War, the Third World, globalization, climate change, and modern social and political movements.
- **HST-149 Empires & Globalization in World History I**
  
  **Credits:**
  4.00

  **Description:**
  This is the first of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include the formation of the medieval trade system, the development of finance and capitalism in the early modern ages, and economic changes prior to the Industrial Revolution. The specific topics may change every year due to new academic developments and publications.

- **HST-150 Empires & Globalization in World History II**
  
  **Credits:**
  4.00

  **Description:**
  This is the second of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include state-making, wars, and the rivalry among early modern empires, economic development, the Industrial Revolution and the formation of the global trade system. The specific topics may change every year due to new academic developments and publications.

- **HST-181 American Life to the Civil War Era**
  
  **Credits:**
  4.00

  **Description:**
  Surveys American history from European colonization up through the era of the Civil War. Topics include interactions with Native Americans; slavery; the American Revolution; the founding of a new republic; social and economic developments in the early nineteenth century; expansion; party politics; sectional conflict; the Civil War and Reconstruction.
- **HST-182 American Life Since the Civil War Era**  
  **Credits:**  
  4.00

**Description:**  
Surveys American history from the 1870s to the present. Topics include the new industrial order; farmer and worker protests; progressivism; America’s emergence as a world power; the two World Wars; the Great Depression; the New Deal; the Cold War; post-World War II American society; the Civil rights movement; Vietnam; dissent and counterculture in the 1960s; the women’s movement; economic, social, and political changes in the late-twentieth century; America’s relationship to a globalized world.

- **HST-251 Modern East Asia**  
  **Credits:**  
  4.00

**Description:**  
China, Japan, and Korea - East Asia’s critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

- **HST-256 Exploring Asia**  
  **Credits:**  
  4.00

**Description:**  
In this course each student will select a topic about Asia that they wish to study. Virtually any topic, to be approved by the professor, is acceptable. The goal will be to write a five to seven page paper about that topic by the end of the course. As a class, we will work together through each step of the process of defining a topic, gathering materials about it, and organizing and reporting the final paper.

- **HST-260 Asian Peoples and Cultures**
Credits:
4.00

Description:
Introduces the peoples of Asia and the cultures they have created. Particular attention is paid to the lives of the common people in both historical and contemporary times. By understanding the richness and complexities of daily life in Asia, we will understand the continuities and discontinuities brought on by social, cultural, and economic changes. We will gain an appreciation of our fellow human beings in Asia.

- HST-268 History of the Mediterranean
Credits:
4.00

Description:
Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

- HST-292 American Foreign Relations Since 1898
Credits:
4.00

Description:
Surveys the history of the U.S. as a world power. Examines officials’ motives and methods, as well as influences on policy in the form of social and economic forces, interest groups, and foreign challenges. Explores public debates over America's role (as well as debates among historians and international relations theorists), and discusses the domestic and foreign impact of America's world role. Major events addressed include the two world wars, the Cold War, Vietnam, and the U.S. recent history of involvement in the Middle East.

- HST-312 Renaissance and Reformation Europe
Credits:
### 4.00

**Description:**
Explores the intellectual and cultural developments of the Renaissance, and of the Protestant and Catholic Reformations in their social and political contexts. Topics include: Humanism, the rise of the city-state; art, and science; changes in family and social life; the causes of the Reformation (intellectual, social, technological); Calvinists, Lutherans, and Radical Reformers; Counter-Reformation and its political consequences; the Wars of Religion.

| – | HST-313 Cities of Early-Modern Europe |
| Credits: | 4.00 |

**Description:**
Explores the political, economic, social and cultural development of the urban experience in Europe in the 14-1700s. The history of the most important cities of the continent and Mediterranean, and their common path in business, urbanism, society and imperialism.

| – | HST-333 The United States: 1898-1945 |
| Credits: | 4.00 |

**Description:**
Addresses social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also discussed. Topics include: the labor movement, civil rights, woman suffrage, progressivism, the rise of the U.S. as a world power, the First World War, the cultural and social crosscurrents of the nineteen-twenties, Fordism, new developments in advertising and industrial engineering, the Great Depression, the New Deal, and World War II.

| – | HST-335 The United States Since 1970 |
| Credits: | 4.00 |
**Description:**
Examines the transformation of America in the decades since the early nineteen-seventies, taking up social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also emphasized. Topics include: Watergate, the aftermath of the Vietnam War, the end of the post-World War II economic boom, the culture wars, the rise of the New Right and decline of the New Deal order, the end of the cold War, America's growing involvement in the Middle East globalization, the impact and aftermath of 9/11, and the Great Recession of the early twenty-first century.

**HST-357 History of Spain I**

**Credits:**
4.00

**Description:**
Surveys the most transcendent social, cultural, economic and political developments in the history of Spain from the Neolithic to the Early Modern Period. Examines the broad history of the nation and its peoples and placing emphasis on three central themes: diversity within the Iberian Peninsula, the region's social and geo-political structures, and the transformation of the Old Order of the ancient kingdoms into a modern, nation-state. Topics include: the Pre-historical period, Roman Hispania, the Medieval Kingdoms, Islamic Civilization, the Christian Reconquest, the Catholic Monarchy, Imperial Spain under the Habsburgs, and the Crisis of the Spanish Empire in the 17th century.

**HST-358 History of Spain II**

**Credits:**
4.00

**Description:**
Examines the political, economic, and social history of Spain from 1700 to the present. Topics include: the War of Spanish Succession; the Bourbon state; the Enlightenment in Spain; the impact of the French Revolution; Spain in the Napoleonic Wars; the rise of liberalism, socialism, and anarchism; the crisis of 1898; the problems of modernization; the Spanish Civil War and the Franco regime; the transition from dictatorship to democracy; Spain's international position today.
– **HST-361 Native America 1832 to Present**

**Credits:**
4.00

**Description:**
Topics will include the Plains Indian Wars; ethnological aspects of Indian tribes; the pitfalls of Indian reform movements; Indian resistance to U.S. assimilation and reservation policies; the Indian New Deal; activism and the American Indian Movement; Indians’ future prospects. Cultural Diversity A

– **HST-383 Boston: Heritage of a City**

**Prerequisites:**
One History course

**Credits:**
4.00

**Description:**
Boston from its foundation in 1630 to its development as a 21st century metropolis. From the Massachusetts Bay Colony, to cradle of the American Revolution, to a Yankee merchant capital, Brahmin cultural center, and immigrant melting pot. When offered in the hybrid format, this course will meet at the regularly-scheduled time, but lectures and other course materials will be available on the course Blackboard site in case you cannot attend.

– **HST-385 Slavery & Race in American History**

**Credits:**
4.00

**Description:**
Topics will be selected from the following: the nature of slavery; the origins of slavery in America and the process of enslavement; the economics of slavery; the American Revolution and slavery; the slave trade; black and white women and the institution of slavery; rebellions of enslaved people; the pro-slavery argument; racial thought; masters and the culture of the South; the movement to abolish slavery; the literature of slavery; the Civil War and the end of slavery; Reconstruction; Segregation; the Civil Rights Movement; race and racism in contemporary America.

<td>HST-483</td>
<td>Death, Disease, Healing-U.S. History</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
**Description:**
Investigates how Americans have understood and responded to health, illness, and death from the eighteenth century to the present. Examine interactions among patients, healers (orthodox and heterodox), the medical and scientific professions, business, and government. Explore the effects of scientific and technological advancements, industrialization, urbanization, immigration, war, and social movements on the nation’s moral and political economies of health, and on evolving ideas about bodily integrity and autonomy, linked to historical relations of gender, race, class, and sexuality.

**HST-489 Germany: Film, Politics, Memory Since 1945**

**Credits:**
4.00

**Description:**
Explores German history since 1945 through film, newsreels and other archival footage, war memorials and museums, novels, published diaries, memoirs, and recent historical scholarship. Topics include the representation, in film and other texts, of: post-war rebuilding; the German Economic Miracle; divided Berlin; 1960s and 70s radical politics; coming to terms since 1945, with Germany's Nazi past and the Holocaust; coming to terms since 1990 with the Stasi and East German past; "Ostalgie" (nostalgia in the 21st century for some aspects of East German socialism); the multi-cultural society that is Germany today, with new Turkish, Greek, Russian, Arab, and even Israeli communities.

**Philosophy:**

**PHIL-210 History of Ancient & Medieval Philosophy**

**Prerequisites:**
Restricted to PHIL majors and minors, PPE majors, and honors students

**Credits:**
4.00

**Description:**
The study of philosophical thought from the period of the ancient Greek philosophers through the Medieval thinkers, including such philosophers as Socrates, Plato, Aristotle, Epicurus, Zeno, Parmenides, Pythagoras, Protagoras, Augustine, Aquinas, Anselm, and Abelard. An introductory course designed to equip the student with a well grounded understanding and appreciation of Philosophy. 1 term - 4 credits. Normally offered every year.

- **PHIL-250 Social & Political Philosophy**
  **Credits:**
  4.00

  **Description:**
  An examination of persistent debates in political and social philosophy. Topics covered can include the meaning of property and welfare, the tensions between liberty and equality, censorship and freedom of expression, the relation of church and state, human rights and the common good, the possibility of political education and civic virtue, legitimacy of the state, revolution and counter-revolution, war and problems of ends and means, addressing historic injustices, such as racism, genocide, or sexism, among other topics. Students will read both classic and contemporary writings to address both the historical roots and the contemporary treatment of these questions. 1 term - 4 credits. Normally offered every year.

**Women's & Gender Studies:**

- **WGS-111 Women, History, and Culture**
  **Credits:**
  4.00

  **Description:**
  Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls;
negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-115 Introduction to Gender Studies**

  **Credits:**
  4.00

  **Description:**
  Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women’s studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

- **WGS-311 Engendering Entertainment: Feminism and Popular Culture**

  **Credits:**
  4.00

  **Description:**
  Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today’s popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey’s Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy’s Female Chauvinist Pigs, and Caitlin Moran’s How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.
- **WGS-315 Feminist Thought**

  **Credits:**
  4.00

  **Description:**
  Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldúa, and Judith Butler.

- **WGS-330 Furies to Femi-Nazis: A History of Modern Anti-Feminism**

  **Credits:**
  4.00

  **Description:**
  Explore the deep antipathy women have faced at nearly every turn in their struggles for civic and social inclusion. Anti-feminist denials of women's rights have taken the form of attacks on women's nature, bodies, and fitness for public life, tagging them with labels of otherness: opponents of women's rights deem them irrational, unnatural, traitors to society, even sexual deviants. This course will examine the dangers that women allegedly represent to social stability from the Enlightenment to the present day, as well as how women have fought back to assert their rights and independence.

- **WGS-335 Queer Narratives**

  **Credits:**
  4.00

  **Description:**
Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's recent memoir, "Redefining Realness", as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.
BACHELOR OF ARTS DEGREE (ARCHIVE 2018-2019)

Academic Catalog Archive 2018-2019

All BA degree programs require the successful completion of the following courses:

- **Minimum Total Credits Required for Degree Conferral:** 126 credits Archive 2018-2019
- **Major Requirements Minimum:** 8 courses, 32 credits Archive 2018-2019
- **Complementary Major Requirements, Minor Requirements, and Free Electives:** credit varies Archive 2018-2019
- **Core Requirements:** 13-15 courses, 47-56 credits Archive 2018-2019
- **Seminar for Freshmen:** 1 course, 4 credits Archive 2018-2019
- **Creativity & Innovation:** 1 course, 3 credits Archive 2018-2019
- **Social, Cultural, & Global Perspectives:** 1 course, 3-4 credits Archive 2018-2019
- **First Year Experience:** 1 course, 1 credit Archive 2018-2019

Minimum Total Credits Required for Degree Conferral: 126 credits Archive 2018-2019
Major Requirements Minimum: 8 courses, 32 credits Archive 2018-2019

Complementary Major Requirements, Minor Requirements, and Free Electives: credit varies Archive 2018-2019

Core Requirements: 13-15 courses, 47-56 credits Archive 2018-2019

First Year Experience: 1 course, 1 credit Archive 2018-2019

Students with 15+ transfer credits of college or university work are exempt.

Choose one of the following to be completed during the first semester of matriculation:

- **CAS-101 Strategies of Success**

**Prerequisites:**
CAS students only. SBS students by special permission.

**Credits:**
1.00

**Description:**
CAS 101 is a one-credit course that meets once a week and is designed to help you have a successful transition to Suffolk University and our unique urban community. It is also designed to introduce you to the principles and concepts of Oral Communication and Presentation Skills. Through interactive exercises and engaging
assignments, you will explore the campus environment and learn about strategies for success as a student. You will present speeches about your research and activities to improve your abilities as a speaker.

- **ADPR-102 Professional Development**

**Prerequisites:**
ADPR 101

**Credits:**
1.00

**Description:**
In this hands-on experiential course, students examine potential career paths in Advertising, Public Relations, and Social Media, become oriented to the university and the surrounding Boston area, and identify professional resources in Boston that foster career development.

---

**Seminar for Freshmen: 1 course, 4 credits Archive 2018-2019**

Students with 15+ transfer credits of college or university work are exempt.

Please note that not all courses are offered each semester. Students should contact their advisor to learn about current course offerings.

Choose one Seminar for Freshmen course from those listed below:

- **SF-101 Fixing the World- Energy and Water: The Science of Solutions**

**Credits:**
4.00

**Description:**
Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

---

**SF-116 Enlightened Insanity**

**Credits:**

4.00

**Description:**

Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

---

**SF-126 The Boston Theatre Scene: the Inside Experience**

**Credits:**

4.00

**Description:**
Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston's many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

SF-132 The Beatles: Here, There & Everywhere

Credits: 4.00

Description:
This seminar will investigate the impact and legacy of the Beatles. The Fab Four deserve our scholarly attention as musical innovators and as cultural avatars of the 1960s, an era that still exerts influence today. We will examine the many ways in which the Beatles rocked the establishment and became defining figures in post-war youth culture. We will also discuss other media (the visual arts, film, fashion, style) and fields of study (mass media, marketing, recording technology, copyright law, English history) using the Beatles as our guides.

SF-156 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life

Credits: 4.00

Description:
The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.

SF-173 Crime in American Society

Credits:
4.00

**Description:**
Popular beliefs about crime are often inspired by the media and by specific criminological theories. These theories about and media images of crime will be examined in detail, including the "hits" and "misses".

---

- **SF-174 Tragedy and Literature**

**Credits:**
4.00

**Description:**
This course will focus on classic works of ancient and modern literature that examine the human condition from a tragic perspective. We will concentrate on close readings from the following texts: Homer's Iliad, Sophocles’ Antigone, The Bhagavad-Gita, Shakespeare’s Othello, Chekhov’s short stories, and Joyce’s Dubliners.

---

- **SF-175 War and Apocalypse in Science Fiction**

**Credits:**
4.00

**Description:**
From some of the earliest examples of what we call science fiction to today’s cutting edge writers, artists, and videographers, the devastation of war and other disasters and their aftermath have loomed large in how the future (and alternative versions of the present) plays out. This course will look at some of the more important issues of future war and post-apocalyptic literature, with a dash of television and film and a soupçon of art.

---

- **SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**

**Credits:**
4.00

**Description:**
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

- **SF-183 Politics, Power and the Media**

**Credits:**
4.00

**Description:**
Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of "big government", and the concept of a liberal media.

- **SF-190 Asia in America Fiction and Fact**

**Credits:**
4.00

**Description:**
With a focus on some selected ethnic groups from Asia, “Asia in America” studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home"
as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

- **SF-191 Film Adaptation**
  **Credits:**
  4.00

  **Description:**
  "Why did they change the ending of the book? The novel is so much better!" We will explore the concept and industry of film adaptation. Students will read novels and watch respective film adaptations to explore how the written word is adapted to the screen; both fiction and non-fiction works will be considered. Also, field trips to past film locations in Boston will be taken to explore why specific settings were chosen for respective situations. Additionally, students will create their own written adaptations of source materials, putting into practice the concepts studied in class.

- **SF-197 Sustainability, Energy, and Technology At Suffolk University**
  **Credits:**
  4.00

  **Description:**
  In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

- **SF-198 Music and the Brain**
  **Credits:**
4.00

**Description:**
What accounts for the power of music to move us so profoundly? This course explores how our brains and music evolved together: "What music can teach us about the brain, what the brain can teach us about music, and what both can teach us about ourselves."

– **SF-199 Unfolding the European Union**

**Credits:**
4.00

**Description:**
The EU is a powerful political, economic and cultural block that is meant to play a major role, together with the USA and China, in the creation of a new post-crisis world order. The seminar is intended to cover, at a basic but reachable level, the history, the politics, the culture and the functions of the EU in the beginning of the Twentieth Century. An extraordinary experiment of sociopolitical engineering, comparable to that of the United States of America, the EU has been changing the life of an increasing number of Europeans for over 50 years. No American student could afford to ignore the inner structure as well as the particular peculiarities of such inclusive supranational organization in today’s world. Issues as institutional functioning, problems derived from individual state sovereignty, economic coordination to face common challenges, cultural integration, future enlargement, etc. are all indispensable to understand the way in which Europe is changing. But also much more day-to-day issues, such as travel mobility, education exchange programs, citizen’s participation, supranational networks of people in the arts or in business, unified labor market, gender participation, human rights, consumer’s protection, etc. are all in the process of developing a more robust and functional European Citizenship.

– **SF-1127 The Vietnam and Iraq Wars: Polarized Perspectives**

**Credits:**
4.00

**Description:**
This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement \textit{"just"}? To what extent were the methods used by the United States military during each war \textit{"just"}? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit \textit{"the enemies"} of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

- **SF-1129 Beacon Hill: Fact, Fiction, and Fantasy**
  
  **Credits:**
  4.00

  **Description:**
  The course will explore the physical geography, history, and image in literature, film, and pop culture of Suffolk University’s Beacon Hill neighborhood. The purpose and objective of the course is to provide students with a deep knowledge, understanding, and appreciation of Beacon Hill through examination of written and visual sources, and feet-on and eyes-on experience of the public parts of the Hill.

- **SF-1133 Problems and Solutions in Early American History**
  
  **Credits:**
  4.00

  **Description:**
  This course will examine four major problems in the early American republic: forming a government; bridging vast distances on the American continent; slavery; international relations. We will explore the various proposed solutions to these problems. Some of the solutions worked well, others were more disastrous than the initial problem. We will read primary documents pertaining to these issues, and try to imagine how men and women considering the problems might have responded to them. What solutions could be proposed? What solutions would work? What were the political, economic, or social difficulties generated by the problem and by the proposed solutions? In considering the problems, we will also learn how to use the various archives close at hand: the Sawyer Library, the Boston Public Library,
the Massachusetts Historical Society, and the Massachusetts State Archives. Students will also post their findings on a class blog, and present their work to one another in class.

- **SF-1134 The Meaning of Life**
  
  **Credits:**
  
  4.00
  
  **Description:**
  What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity’s Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity’s Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

- **SF-1135 Women Warriors: Stories of Captivity, Conversion, and Confession**
  
  **Credits:**
  
  4.00
  
  **Description:**
  Since the beginning of time, women have been "doing battle" to themselves, while men have gone to battle against others. Whether it is through converting to Christ, yielding to captors in order to survive, or carrying a baby, this course introduces students to the many ways in which, whatever battles they face, women are warriors; they survive. Utilizing an array of captivity, conversion, and confession narratives by women, and pairing them across the centuries, students will make connections and draw conclusions between early-and mid-19th-century-American and contemporary women. Students will connect, for example, the trials of the 17th-
century Puritan captive, Mary Rowlandson, and contemporary hostage, Elizabeth Smart, to explore how women (no matter how different they seem) draw upon unique inner resources to survive.

- **SF-1141 Classical Civilizations: Pathways to Wisdom**
  **Credits:**
  4.00
  
  **Description:**
  How is it that the knowledge, intelligence, wisdom and values of the Greeks and Romans still educate and edify the world by providing venues towards leading fulfilling and dignified lives? The guiding principles of their respective civilizations rested upon eight pillars: -Humanism: It was recognized that humans have the potential to master their world and live life to the fullest. -The Pursuit of Excellence: To imagine the highest good and strive to attain it. -Self Knowledge: It is imperative to know oneself before seeking to know the world. -Rationalism: Always question, reason and discern truth from falsehood and never consider any matter superficially. -Restless Curiosity: Often the resolution of one issue leads to the revelations of others mysteries and pursuits which compels further investigation. The wise individual makes this a lifelong endeavor. -Love of Freedom: As long as one brings no harm to others, one must be free to live and discover as much as possible. -Individualism: All are unique and, therefore, must recognize individual strengths and identity. -The Practice of Moderation: The prudence of avoiding extremes in personal and social conduct. In this course, students will read two (brief) texts on the Greek and Roman contributions to the world and then will proceed with specific readings which illuminate the eight principles above for achieving the good life.

- **SF-1143 In the First-Person: Storytelling in the 21st Century**
  **Credits:**
  4.00
  
  **Description:**
  This section of the Seminar for Freshmen will consider the forms, venues, and impacts of narrative nonfiction in contemporary culture. From the exploding popularity of personal essays in the digital age to the living, evolving essays we create on social media, we are constantly narrating and archiving our lives, shaping their content for specific audiences. In doing so, we shape what our experiences
mean and represent. In order to analyze the power of narrative nonfiction, we will look at a variety of multimodal texts: essays, podcasts, Instagram and Twitter feeds, stand-up comedy, and storytelling slams, as well historical texts such as the essays of Michel de Montaigne and historical artifacts at the National Archives in Boston. We will also write our own narrative nonfiction, and adapt our first-person stories for listening and viewing audiences, such as the MassMouth story slam and podcasts like This American Life. Additionally, we will practice narrative nonfiction for professional audiences, using storytelling as a way to showcase personal strengths to employers, internship coordinators, and the like.

- **SF-1145 Emergence of Southeast Asia**
  **Credits:**
  4.00

**Description:**
Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SF-1146 Fido the Friendly Wolf: A Natural History of Dogs**
  **Credits:**
  4.00

**Description:**
This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

- **SF-1147 Global (In) Security: From ISIS to Ebola**
  **Credits:**
  4.00
Description:
This course reviews the principal features of global and national security as it is currently practiced by tracing the evolution of theories, policies and circumstances whereby current international security is developed. Students will evaluate the nature and origins of war, arms proliferation, military instability, terrorism, genocide, health threats and natural resources depletion.

- SF-1148 Brave New Worlds

Credits: 4.00

Description:
Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

- SF-1150 Religion in Contemporary Society

Credits: 4.00

Description:
This course is design to provide students with an overview of the social settings and cultural meanings of religion in the contemporary world. Topics that will be covered in reading and discussions include the rise of religious fundamentalism, religion and violence, women's and men's religious experiences, new religions, and portrayals of religion in popular films. In addition to the readings, students will observe and experience religious expressions and activities through fieldwork assignments. The emphasis on films and fieldwork reflects my belief that religion is made up of "lived experiences" of actual individuals and communities. In order to understand religion in contemporary society we will make every effort to see (in person or in film) a wide range of religious activities. The films we will see include some of the following: Leap of Faith, Devil's Playground, Kadosh, Women of Hezbollah, Singing Stream, A Still Small Voice.
- **SF-1151 Reproduction and Society**

  **Credits:**
  4.00

  **Description:**
  This course explores relationships between reproductive health and rights both nationally and internationally. Many of our topics fit into two broad areas: conflicts over the control of childbearing (sterilization abuse, birth control, and abortion) and conflicts over who deserves to be a mother, especially when the mothers in question face social stigma and lack political power. Other topics include safe birth and maternal mortality, breastfeeding, infertility and reproductive technology. We also examine the politics of women’s sexual and reproductive autonomy, including the policies that shape women’s choices to prevent, achieve, abort, or carry to term a pregnancy. Throughout, we are guided by the following questions: Why is reproduction an important site through which to understand society? How do statuses such as race, class, gender, sexuality and ability influence people’s reproductive possibilities? What is the role of the state in shaping these experiences? How have communities supported or resisted efforts at reproductive control? Why is reproductive justice central to these answers?

- **SF-1152 The Idea of America: Past, Present, Future**

  **Credits:**
  4.00

  **Description:**
  A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation’s history, from the struggle over slavery to America’s contemporary role in the world. Because this course intends to apply theoretical understanding to real life, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation’s philosophical and historical currents.
Credits:  
4.00

Description:  
This seminar provides an introduction to Visual Studies, a relatively new interdisciplinary field that examines how images communicate and the roles that they play in society. Students will apply the concepts and techniques of Visual Studies to analyze sites and signs around Boston, such as advertisements, street signs, fashions, newspaper photographs, buildings, and public spaces. Class projects will increase students' awareness of their visual environment and their ability to critically analyze the visual rhetoric that surrounds us and is often used to manipulate us.

– SF-1156 Thinking About the Insanity Defense  
Credits:  
4.00

Description:  
This course examines sixteen case examples providing a clear and compelling introduction to one of the most important topics in the relation between public policy and law. This course addresses: the history of the insanity defense; the effects of different standards for determining insanity; the arguments for its retention; abolition, and revision; media and other responses to it; and the controversies around pre and post conviction commitment. The case examples illustrates a variety of outcomes and include individuals who were found not guilty by reason of insanity; found guilty even though mentally ill; and not charged because of mental illness.

– SF-1158 Global Climate Change  
Credits:  
4.00

Description:  
Conversation about the weather is considered to be the universal icebreaker. Yesterday's sweltering heat, the storm predicted for this weekend, even long-term climate shifts find their way in our daily conversation. Today, however, such casual conversations have an edge to them, because we are realizing that humans play a role in determining the climate shift. In fact, understanding the human fingerprint in
the Arctic tundra melting, or a devastating hurricane, has gone well-beyond small talk to become one of the most important challenges our society faces today, and on that is wedded to geopolitics. To meaningfully participate in any dialogue that addresses this challenge people have to be aware of certain key ideas of Physics and Planetary Science. The aim of this course is to provide you with some of the essential facts and pieces of science underlying such questions. This course will enable you to grasp many of the issues that dominate today’s political discourse and to develop an informed opinion (your, not our!) for which you can rationally argue.

- **SF-1160 Individuals and Society in the Zombie Apocalypse**
  
  **Credits:**
  4.00

  **Description:**
  "The Walking Dead" tells viewers that life in the zombie apocalypse requires people to "fight the dead, fear the living." Sociologists want to know why we should fear the living. How do individuals come together and try to recreate society for themselves: either to build community or fight other groups? What role do morals and values have in a society? How does all of this determine life, death, and the struggles people must face? Questions like these will give our class a new view of "The Walking Dead" and can help us to learn more about the society that we live in where so far the dead have remained in the ground.

- **SF-1161 The Playwright and the Stage**
  
  **Credits:**
  4.00

  **Description:**
  This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.
- **SF-1162 Space Missions: From Moon to Mars and Beyond**
  
  **Credits:**
  4.00

  **Description:**
  It is hard to believe that only 60 years ago, our only close-up view of a planetary body was that of Earth. We are truly living in the Golden Age of Space Exploration, when a new mission every few years brings us spectacular images from either a neighbor in the solar system or galaxies at the edge of the universe. This course will describe the dozen space missions that changed our view of the universe, ranging from our solar system to the most distant galaxies.

- **SF-1163 Spellbound! Witches, Wizards and Spirits In American Literature**
  
  **Credits:**
  4.00

  **Description:**
  Since the beginning of time and across cultures, people have been interested in the supernatural, the paranormal, and the otherworldly. Often, these phenomena have appeared in the form of witches, wizards, and spirits, whether good or bad, wicked or wonderful. Women who have not fulfilled traditional gender roles have historically been cast as witches or, to use Shakespeare's phrase, as "weird sisters", or, in Donald Trump's recent election parlance, as "nasty women." Men in turn appear as wizards, usually more positively than female witches. Men and women alike also can take the form of spirits or ghosts; even houses can be possessed. What lies beneath the great fascination with the supernatural and the paranormal, with the haunted, the possessed, and the spellbinding? What accounts for the different manifestations of spirits? This course takes students on a tour of witches, wizards, and otherworldly spirits throughout American literary history. Tropes of the witch and the wizard have appeared in literature from the time of Shakespeare (see Macbeth) to the contemporary best-selling Harry Potter series, and hits every century in between, such as in Anne Hutchinson's Puritan accounts form the 1600s, Nathaniel Hawthorne and Edgar Allan Poe's in the 1800s, The Wizard of Oz in 1900, and John Updike's The Witches of Eastwick in the 20th century. The course offers readings across genre lines-poetry, fiction, non-fiction, young adult fantasy, and drama-and includes excerpts from film and television shows based upon wizards and witches (such as Bewitched, Buffy the Vampire Slayer, and The Vampire
Diaries). The course may include a field trip to Salem, MA, as well as possibly the opportunity to see Wicked at the Boston Opera House (if it is renewed through the fall season, 2017).

- **SF-1164 Reinventing Europe: Beyond Brexit and Secular Stagnation**
  **Credits:**
  4.00

  **Description:**
  While newspaper headlines focus on the multiple problems Europe is facing today, the evolving adaptation of European nation states and the integration process receive less attention. Brexit and economic crises seem to be synonymous of Europe today, but facts such as the European Union accepting five new members in the coming five years or Europe being the most advance environmental actor or the main international provider of official aid are often ignored by public opinion. This Seminar for Freshman examines the dynamic evolution of the integration process in Europe in the context of globalization. Three sections articulate the main debates and tensions in the interplay between national and supranational institutions and policies. The first part analyzes how eight European countries have forged their national preferences to delineate their level of immersion in the integration process; it later proceeds with the examination of the main historical events in the history of the integration process. The second part explores the functioning of the EU institutions in order to grasp the essence of the complex policy-making in the Europe of 28 members. The third and final section presents the analysis of the main areas of the EU policy making such as agriculture, monetary and economic issues, among others, and observes the main developments in the area of EU external relations.

- **SF-1165 History of Boston**
  **Credits:**
  4.00

  **Description:**
  This semester we will explore Boston's history. We will read books, visit historical sites, and you will learn how to do historical research on your own. This course meets the requirement of Humanities and History.
SF-1166 Cinema-Monde: Global Challenges on Film

Credits: 4.00

Description:
This course focuses on French-language films - with subtitles! - that address pressing social issues of the 20th and 21st centuries, such as hunger, female genital mutilation, immigration, racism, economic inequality, genocide, gender, sexuality, colonialism and post-colonialism.

SF-1167 Fantasy Fiction: Imaginary Worlds

Credits: 4.00

Description:
Readers lining up at midnight for the newest Harry Potter book, hundreds of thousands of viewers crashing HBO's website in their eagerness to watch Game of Thrones: examples of fantasy's recent popularity are everywhere. This course explores the genre of contemporary fantasy through a historical and critical lens, from the work of J.R.R. Tolkien to the 2015 Nebula Award Winner, Uprooted. We will begin by reading selections from medieval literary texts, including Arthurian legend and Anglo-Saxon epic, to understand the roots of the fantasy genre and consider how these early works have inspired and informed the world-building efforts of later authors. We will also explore fantasy's newest manifestations across different kinds of media, from big-budget film adaptations to internet fan fictions. Critical questions will include: How do works of fantasy deal with the ethical questions surrounding the categories of "good" and "evil", "monstrosity" and "otherness" How do common fantasy plots such as coming-of-age or quest narratives work to aid in fictional character development and build suspense? How are contemporary anxieties about issues such as gender, race and class explored through the genre of fantasy?

SF-1168 The Real Thing: the Pursuit and Problems Of Authenticity

Credits: 4.00

Description:
This course will focus on the concept of authenticity in American culture, from its origins in the early 19th century to the present. When the advertising gurus of Coca-Cola branded it as "The Real Thing," they were exploiting something powerful: the idea of something real, stripped of any falsity or illusion. Humans have always desired to know the world and others "as they really are," but this desire is particularly strong in the modern world: witness the eagerness to discover one's "true self," cut through the B.S., obtain the genuine article, and "live authentically."

In this course we will interrogate this pursuit of the Real Thing. In various ways, the texts we study both embrace authenticity as an ideal and also question its goodness, usefulness, or even its very possibility. We will thus confront a number of interrelated questions: Where does this desire for authenticity come from? What counts as "authenticity," in life and in art? Is authenticity really a virtue to live by? How does it shape artistic and literary expression? Is there even such a thing as "the real you"? This course will be divided into three units. In the first unit, "Counterfeiters and Self-Made Men," we will study how a commitment to authenticity arises in antebellum American literature and culture during a time of rapid national expansion and invention. Readings will include texts by Henry David Thoreau, Ralph Waldo Emerson, Herman Melville, and P.T. Barnum. In the second unit, "Authenticity and Contamination," we will consider two major ways in which authenticity becomes idealized around the turn of the 20th century: as artistic ideal set against fears of mass cultural production, and as a cultural ideal set against fears of racial and cultural mixing. Readings will include texts by Ernest Hemingway, Nella Larsen, Jean Toomer, and William Carlos Williams. In Unit Three, "Buying and Selling Authenticity," we will examine how authenticity becomes commodified (associated with products and "lifestyles") in post-WWII American culture. Texts will include works by Andy Warhol, David Foster Wallace, George Saunders, Banksy, and the TV series Mad Men. Final projects will ask students to consider authenticity today: how is the pursuit of the Real Thing affected by technologies of reproduction, by commodification, and by the increasingly virtual world of the 21st century?

– SF-1169 Immortality: Real and Imagined

Credits:
4.00

Description:
Most of the world's religious traditions have as a part of their doctrines some notion of immortality, rendered both in scriptures as well as iconographically. What precisely is entailed by immortality and why does it constitute such a significant element of so many religious traditions? What can we learn about immortality by
investigating various conceptions of the afterlife? Is immortality truly a desirable thing? These questions among others will be examined from the perspectives of philosophy, religion, psychology, anthropology, and biology. Besides being cross-disciplinary, the course will be multi-media in nature. In addition to reading philosophical and religious texts concerning the nature of immortality, students will study various accounts of immortality and the afterlife, examine how the afterlife has been dealt with in (visual) art, literature, and film, and investigate current research into life prolongation (biomedical gerontology).

- **SF-1170 From Philia to Facebook: the Meaning of Friendship**

**Credits:**
4.00

**Description:**
The thematic focus of this seminar will be friendship. Friendship is one of the most important of human relationships; one that every student in this seminar has already participated in for many years. It shapes who we are and helps determine who we may become. And while it is a universal phenomenon, it has been practiced quite differently at various times and places in human history. And while we all have an intimate, personal and practical knowledge of friendship through our own experiences, sometimes things that are so close and so obvious to us can be hard to see. Over the course of the semester we will inquire into friendship from many different angles, trying to gain both a broader and a deeper understanding than our own individual experience allows. We will look at friendship first through the lens of philosophy, particularly through the foundational text of Aristotle, The Nicomachean Ethics. We will look at other views of friendship from the ancient world, starting in the past to help us see that friendship has not always been thought of the way we think of it now. After this initial foundation is laid, we will examine other writers and thinkers and take up additional topics like friendship in different cultures, friendship and gender, friendship in and through the arts and include an examination of friendship through the lenses of many different academic disciplines to see how other systematic thinkers conceive of friendship. All along we will be comparing and contrasting with our own personal experiences and considering what modern technology, such as social networking sites, has done to influence friendship, in the way we practice it and the way we conceive it. It is the aim of this class that students not just study different academic points of view, but that they take up the questions and challenges that these thinkers present to them and fully engage with them on a meaningful personal level.
- **SF-1171 Living on and Beyond the Hyphen/Latino Writers in the USA**

  **Credits:**
  4.00

  **Description:**
  Hyphenated-Americans of Latino origin come from many places and backgrounds. Often perceived as a divide, an either/or that separates and distinguishes one ethnic group from another, the hyphen can also be viewed as a link that connects, integrates and facilitates the formation of "new" cultural spaces. Through films and written narratives by and about U.S.A. Latino(a)(x)-Americans, students will examine how individuals who live on the threshold between two languages and cultures embrace the challenge of preserving their own identity and moving beyond stereotypes. Each of the Latino/a/x authors that we will read in this course will describe his/her own experiences living in the U.S.A. By examining their views through our own filtered lens we shall try to answer questions like the following: 1. What role does language have in our definition/understanding of cultural identity? 2. How do individuals move beyond the hyphen and stop seeing themselves as hybrids? 3. How can an individual who does not belong to a marginalized group (i.e. one considered less powerful and secondary) understand and empathize with those who do? 4. How does globalization affect the dichotomies that arise in bi-cultural and multi-cultural communities?

- **SF-1172 The United States Mexican Border**

  **Credits:**
  4.00

  **Description:**
  One hundred and sixty nine years have passed since the Treaty of Guadalupe Hidalgo was signed. It is only fitting to analyze the profound changes that the gain/loss of these territories caused for the citizens of both sides of the border. This course will explore the literature, culture, and history of the United States-Mexican Border and the most pressing problems pertaining to the region. Emphasis will be on contemporary border theater and film. The works of Salcedo, Galindo, Lopez and others will be studied as well as contemporary films and documentaries such as Alambrista, Senorita Extraviada, The Gatekeeper, Sin Nombre, Wetback: the Undocumented Documentary, Victoria para Chino, Which Way Home, and much
more. There are no prerequisites for this course. Though the course in conducted in English, parallel readings in Spanish will be made available to those who wish to read and/or compare the original texts.

- **SF-1173 Understanding the Vast Sweep of Chinese Culture**

**Credits:**

4.00

**Description:**

This course is an introduction to both ancient and modern Chinese civilization with a focus on its literature, arts, and 4000 year cultural history. We will see China at its earliest stages through its archaeology and progress to the heights of literary splendor in the Tang and Song Dynasties. Study of select early plays from the Mongol Yuan period will clearly tie into the development of Ming and Qing period fiction. With the fall of imperial China in 1911, the focus of literature changed drastically and we will study how many modern authors were able to draw from a massive wealth of literary resources to help create a new Chinese literature and culture. We will watch several films that will provide a rich visual portrait of the culture. We will read quite a few representative literary and historical works in English translation that will give a great deal of insight into modern China and how we can both relate to and interact with this complex and amazing country. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for students in all majors that wish to gain a deeper understanding of Asian culture.

- **SF-1176 What Is a Fact?**

**Credits:**

4.00

**Description:**

What makes a fact a fact? What makes a fact true? At one time, these questions were only asked by epistemologists and postmodernists, but with the rise of fake news and the discourses surrounding it, these questions are relevant to everyone. Understanding facts is also essential to college students, who must learn to use reliable sources in order to create credible work. In this class, we will examine works of literature, art, science, and history that interrogate how facts are created and how we determine their truth value. Texts will include podcasts, novels and book-length studies of memory and theory of mind (the study of how we understand
what others are thinking). We will also utilize the resources of Boston and Suffolk University; we will visit the WBUR NPR newsroom, a local museum, and learn about the legal definition of "truth" from a representative of the law school. By analyzing these texts, participating in these experiences, and completing a series of assignments that ask students to think critically and creatively, this class seeks to understand how we create facts, and why we need them.

– **SF-1177 Revolutions in Thought**

**Credits:**
4.00

**Description:**
The course will consider major changes in thought that revolutionized the cultures and societies in which they were embedded. Topics include the rise of monotheistic religions; the American Revolution; the recognition of slavery as a moral evil; the idea of women’s equality; Freudianism; Darwinism; Marxism; as well as Einstein and the Theory of Relativity. We will enrich the readings and classroom conversations with visits to museums, churches, historic sites and other locations that reflect some aspect of the revolutionary changes that are our focus.

Students in the CAS Honors Program should choose one Seminar for Freshmen course from those listed below:

– **SF-H101 Fixing the World- Energy and Water: The Science of Solutions**

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial
Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

---

- **SF-H116 Enlightened Insanity**

**Prerequisites:**
CAS Honors students only.

**Credits:**
4.00

**Description:**
Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

---

- **SF-H178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00
**Description:**
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

— SF-H182 Heroes, Antiheroes and Outsiders: Reading the Graphic Novel

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
How is it that “comics”, a genre often viewed as entertainment for children and adolescents, has become one of the most exciting forms of narrative and visual art? To answer this question, this seminar will examine a range of graphic novels, from those that celebrate their origins in superhero comics, such as Alan Moore's Watchmen, to those that treat subjects not usually considered proper to the comics genre, such as Art Spiegelman’s Maus, about the Holocaust, and Alison Bechdel’s Fun Home, about the complexities of sexual identity. As we read these works, we will look at how the combination of words and still images makes the graphic novel a unique storytelling form, as well as how artists and writers push the envelope to create new styles and challenge our expectations. In addition to class discussions and writing assignments, we will take a field trip to the Museum of Fine Arts and create a collaborative group graphic novel step-by-step over the course of the semester (all abilities welcome).

— SF-H197 Sustainability, Energy, and Technology At Suffolk University

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00
**Description:**
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

- **SF-H1134 The Meaning of Life**

**Prerequisites:**
CAS honors students only.

**Credits:**
4.00

**Description:**
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity's Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

- **SF-H1146 Fido the Friendly Wolf: A Natural History of Dogs**

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00
Description:
This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

SF-H1148 Brave New Worlds
Prerequisites:
Restricted to CAS Honors students

Credits:
4.00

Description:
Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

SF-H1161 The Playwright and the Stage
Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and
critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

**First-Year Writing: 2 courses, 8 credits Archive 2018-2019**

- **WRI-101 First Year Writing I**
  
  **Credits:**
  4.00

  **Description:**
  Study and practice of the writing process and revision in terms of expository writing modes for an academic audience.

- **WRI-102 First Year Writing II**
  
  **Prerequisites:**
  WRI-101 or ENG-099 with at least a B and ENG-P099 with a P or WRI-H103

  **Credits:**
  4.00

  **Description:**
  Study and practice of argumentative and research writing through further work with writing process and revision and the critical reading of a variety of texts.

A student may be assigned to other writing courses or may be invited to take WRI-H103. Students not eligible for direct entry into WRI-101 will be required to complete one additional pathway course. Depending on eligibility, students who are assigned one additional pathway course must either complete WRI-100 or WRI-100+ prior to enrolling in WRI-101.

Creativity & Innovation: 1 course, 3 credits Archive 2018-2019

In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk and support divergent thinking. In the process, they will become more confident life-long learners.

Note: Students with 30+ transfer credits are exempt from this requirement.

Choose one Creativity & Innovation course from those listed below:

- **ADF-S171 CI: Integrated Studio 1**
  **Prerequisites:**
  Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

  **Credits:**
  3.00

  **Description:**
  This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

- **ADF-S172 CI: Integrated Studio II**
  **Prerequisites:**
  ADF S101; Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

  **Credits:**
3.00

**Description:**
This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.

---

- **CI-102 The End of Global Poverty**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. More than one-third of our global population lives in poverty, earning less than two dollars a day. Governments, businesses, social enterprises, and charitable organizations have tried to solve the global poverty issue with mixed results. What is the solution? Is entrepreneurship the solution, part of the solution, or has no impact whatsoever? In this course, you will gain an understanding of the power of entrepreneurship (in the context of creativity and innovation), the definition and depth of global poverty (in the context of constraints, such as human, financial and physical resources embedded in local, regional, national and global cultures), and successes and failures of past initiatives to reduce poverty. This is not a course about politics or business, but rather finding a solution to a problem that has eluded mankind since the beginning of time.
- **CI-H102 The End of Global Poverty**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

**Credits:**
3.00

- **CI-103 Sticking Your Neck Out- Inventing for Non-Engineers**

**Credits:**
3.00

**Description:**
This course examines cutting edge technologies, the science behind them, and their practical application and follow-up success or failure. It also provides the students a chance to consider the relevance of identified "needed" inventions from the 1950s, and whether those projections were correct. The history behind some remarkable inventions will be presented. Finally, working in small teams, students will brainstorm to identify something useful to invent and determine several approaches to implementing it.
- **CI-106 Failing Successfully**

**Credits:**
3.00

**Description:**
This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. Did you know Netscape was the internet browser? What about MySpace, arguably the Facebook of the last decade? What led Apple from being innovative pioneers of the 70's to the verge of extinction in the 80's to the technological giant they are today? Technologies come and go, but what leads to organizations lasting more than 100 years such as IBM, General Electric, etc.? What role does failure play in successful innovation, decision-making, and business viability? In this course, you will learn about innovation that may have been successful and well-executed. You will also learn about innovation that was a viable business opportunity, but poorly executed: one phase of failure. In addition, you will learn about innovation that had no real market viability, but was launched anyway: another phase of failure. Can failure lead to success? If so, how?

- **CI-H106 Failing Successfully**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

- **CI-110 The Entrepreneur’s Cocktail**
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
How do you and your story drive business? This course takes an innovative look at human creativity and entrepreneurship. As an entrepreneur needs perseverance and high motivation, we will explore the importance of values, risk taking, problem solving, and the discovery of the market opportunities. In order for you to be creative and essentially create successful ventures, you will discover the nuances between the three factors and explore them further through interactive discussion and debate as well as collaborative group work. You will be encouraged to think in non-conforming ways and apply new concepts and develop your own personal operating principles.

- CI-112 Creating Problems: a New Solution for Sustainability

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
As the majority of the world population now lives in cities, for the first time in human history, issues of urban sustainability have become more complex and more important than ever before. Presented with case studies of urban efforts to gain a sustainability foothold, students will utilize ideation, critical thinking, and strategic decision making to both identify root problems and to present solutions. This course will lean heavily on ideation processes, teamwork, and logical methods of analysis to pursue actionable solutions for significant problems. The methods of problem identification and solution analysis learned in this class will be readily adaptable to many complex problems, helping the students to make informed and decisive determinations in their careers.

- CI-114 Creating the Dream Team

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
**Credits:**
3.00

**Description:**
Every successful venture today is based on effective teamwork. Unlike a typical lecture format, Creating the Dream Team is a course that utilizes experiential group learning to provide students with pivotal team-building skills. These essential skills are vital for everyone’s future success in the business world. As team players, students are challenged to think creatively. A collaborative problem-solving process is used to analyze "real life" business situations. Teamwork involves research, data collection and information analysis to develop creative solutions to typical business problems. Teams will utilize multi-media tools to present their innovative ideas. Classmates will provide peer feedback and review. Through iterations, all students will assume roles as project leaders, keynote speakers and collaborators on a series of Team Challenges. Upon successful completion of this course, all students will have formed working "dream teams". As reinforcement and final evaluation, Dream Teams are required to create a multi-media Capstone Event as a course performance measure. This capstone presentation will "showcase" all of their newly acquired "dream" team-player skills.

---

**CI-116 Good to Great: Design YOUR Portal to the World**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk, and support divergent thinking. In the process, they will become more confident life-long learners.

---

**CI-H119 SL-Honors Theatre at Work**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

**Credits:**

3.00

**Description:**

In this course, students meet community needs by engaging in service-learning outside the classroom. Theatre at Work is an introduction to creative practice using live performance as a problem solving tool in an educational environment. Specifically, students will create a performance piece in response to an issue they have uncovered in collaboration with select groups of students in a host Boston Public School. There will be a special focus on normalizing risk-taking and the learning that comes from false starts and failed ideas. Students will be responsible for creating every aspect of their performance testing its feasibility on a limited budget, ensuring that the content meets established criteria, and successfully implementing and evaluating their success both with their peers and their audience.

---

CI-129 **Art & Innovation Practices**

**Credits:**

3.00

**Description:**

The intent of this course is for students to examine and effectively express in writing their ideas on creativity and to inspire undergraduate students to exceed their current levels of learning. Students will learn to meaningfully integrate course content into long term-retained useful skills through applied creative collaborations. This course is based on the idea that exposure and insight development will enable students to better visualize themselves in their desired fields and make informed choices within the variety of options available to them. The focus of the course will help students to assess their personal interests and strengths as they plan for their own educational and professional futures.

---

CI-131 **Off to the Future: Leadership Through Compromise**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Some past political issues were resolved with great success (the Compromise of 1820), and some resulted in great failures (the US Civil War). In this course, students will study noteworthy political dilemmas of the past, identify the major problem solvers and examine the art of compromise. These investigations will provide guidance and inspiration for students to develop innovative and creative solutions to present day political problems such as climate change, immigration, Social Security, income distribution, higher education affordability, and homelessness. Students will work in teams and propose creative and innovative solutions that will convince the affected interest groups favorably, represented by teams of other students in the class, and result in compromises solving tomorrow's problems today.

---

**CI-H133 Honors Franklin and the American Experiment**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

**Credits:**
3.00

**Description:**
What made Benjamin Franklin such a creative force in American history? We will explore the many facets of Franklin's life (printer, writer, scientist, statesman) and learn about Benjamin Franklin's political and diplomatic ventures, and will recreate some of his scientific experiments.

---

**CI-135 The Design of Everything**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
This course will explore a selection of the genius personalities and their creative work in 5 distinct areas of human creative endeavor; art, science, nature, technology and the built environment. The course explores the underlying similarities in the process of their discovery, invention and creativity across the disciplines. Studying such names as Newton, Warhol, Hawking, Jobs, Gaudí and Banksy, students will uncover the process of design through research, analysis, synthesis, iteration and error. In class group projects will allow a hands-on opportunity to create.

---

CI-H139 Creating, Promoting, and Participating in the Literary Arts

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. CAS and SBS honors students or GPA of 3.5 or above only.

**Credits:**
3.00

**Description:**
With the launch of Boston's new Literary Cultural District, we have renewed cause to celebrate the history and industry of literature in our city. This course will immerse students in the world of literary culture and its many branches: writing, editing, reviewing, and publicity. Students will practice the art of creative writing, and learn how writers find publishing venues, how authors build platforms for their work, and how literature reaches the public through readings, social media, book trailers and other marketing campaigns, authors interviews, and reader reviews. Various industry professionals, authors, editors and publicists will speak to the class about the artistic and business opportunities, trends, and futures of literature and literary publishing. Students will apply their knowledge and interests to a variety of
projects, including book reviews, author interviews, social media campaigns, literary events, and other collaborative projects. We will also work as a class to launch a new digital literary journal at Suffolk.

- **CI-141 The Creative Approach to Learning**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
This course is focusing on the creative process by introducing students to creative practice as a disciplined approach to problem solving and innovation requiring research, persistence and grit. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original ways, embrace ambiguity and support divergent thinking and risk taking. The course will have an undertone based on science, but it is suitable for non-science majors too!

- **CI-143 Dreams, Demons, and Dynamic Artists Creative Nature**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
What motivates your creative nature? This course will explore converging themes in Art and Psychology in order to give students the tools they need to unblock their creative potential. Collaborative small team activities, assigned readings, large group discussions, and personal reflection exercises will provide an avenue for students to explore their own creative patterns and how they are influenced by, and
perceived within, the world around them. Dreams, mental illness and psychosocial theories of self will also be widely discussed in order to give students context for this inter/intrapersonal exploration.

— **CI-147 Seeing Double, Printmaking, the Art of Discovery, Experimentation and Process**

**Credits:**
3.00

**Description:**
Always wanted to explore a creative side but never had the opportunity to take an art class? Here's your chance! Sync the power of icons/ images with ideas and making. We will use cellphone and printmaking technologies in a workshop style environment. Rather then a lecture based class, this class we will play, learn and build new Neurological pathways towards creative thinking. Come to every class excited to learn, make and discover. This course will give you the building blocks for innovative thinking beyond the classroom. Power is in the image. As in the way a dream can grip you, images carry incredible amount of influence and creative potential, when they are “seen.” Glimpses of these images circulate in media, movies, cell phones, and so on. Learn to develop your own images and understand the broad world of images of human culture.

— **CI-149 SL-Creative Writing and Literacy**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course, students meet community needs by engaging in service-learning outside the classroom. This course will explore the value of creativity and play in developing reading and writing skills and the habits of lifelong learning, both in our own lives and in the lives of young people in Boston. In this course, we will work closely with the non-profit literacy organization 826 Boston, which works with students ages 6-18 on reading and writing skills through playful, creative
workshops, as well as tutoring and other kinds of support. Students will learn about the work of 826 Boston by volunteering with the organization, and by the end of the semester you will conceive, plan, and run creative writing workshops of your own at 826 Boston.

CI-H149 SL-Creative Writing and Literacy

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

Credits:
3.00

Description:
In this course students meet community needs by engaging in service-learning outside the classroom. CI-157 Mindful Journal

Credits:
3.00

Description:
To keep a journal is to make an investment, often long before we understand the value. A journal is a personal database of snapshots in time, good ideas and bad, observational doodles and unfiltered emotions. On any given page a journal may appear inconsequential but within the rigor of filling a whole notebook (and another, and another) an individual viewpoint emerges. This class will facilitate a student’s ability to draw from his or her own lived experience and discover unique
springboards into universal issues by making mindful connections. An entire lifetime of images, stories and details resides within each of our minds but the ability to explore that richness requires dedication to documentation. Mindful Journal is a process class fostering focus through mindfulness practices, content generation and meaning making.

— **CI-159 Building a Better T**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
If any set of problems could use creative and innovative thinking, it’s the myriad of problems facing the T. The Boston Globe is filled with stories about financial and organizational problems in the system, and you only have to spend a few minutes on the green line to feel the effects of those issues. Still, millions depend on it every day - it is the circulatory system of our city, and it is more than a way to get around: the T increases accessibility and functions as a democratizing force. That is, when it’s running. In this class we will study the MBTA and other mass transit systems in order to propose creative solutions to the T’s most pressing problems. We will read articles about the T and other transit systems, we will look at interactive maps that express different kinds of data, and we will visit local stations. In addition, we will study the process of creative thinking, in order to apply those skills to the issues at hand. You will be asked to create both stand-alone short writing assignments and visual representations of your ideas, accompanied by short, written explanations, both alone and in group projects.

— **CI-161 Making History: Public Memory in the Digital Age**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
Credits:
3.00

Description:
You live in Boston now. At least for a while. Perhaps you’ve noticed that it has its own ways of remembering things. Consider The Boston Literary District, The Freedom Trail, and all the many events and festivals devoted to history, culture, and identity. From guided tours and colonial cosplay to images and written texts to monuments, memorials, and museums, this city tells stories about itself today in the ways it tells stories about its past. In this class, you’re going to tell more stories about Boston. You’re going to help it find other things to remember, and other ways of remembering them. You’ll likely need to focus on parts of the real events that Boston doesn't prefer to include in its stories, emphasizing issues of race, socioeconomic class, nationality, colonialism, gender, sexuality, and other stories of unequal power and how that manifests in real people's lives and in the culture of this city.

— CI-H161 Making History: Public Memory in the Digital Age

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

Credits:
3.00

— **CI-163 A Course on Skepticism and Rationality**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Magician James "The Amazing" Randi reminds us that "No matter how smart or how well educated you are, you can be deceived." In an age fraught with deception and misinformation, students need tactics and strategies in order to separate truth from falsity. This course encourages its participants to act as skeptics - not cynics, necessarily - by requiring evidence and proof before believing or accepting claims. Students are urged to identify the most-likely-to occur opportunities for deception in their major fields and draw from the tenets of classical rhetoric, logic, and the scientific method in order to develop safeguards. Frequent collaboration with classmates will allow for dynamic solutions to small and large-scale contemporary problems ranging from the personal (e.g. used car prices and avoiding fraud) to the universal(e.g. "fake news" and God).

— **CI-165 Chemistry Is Everywhere: Zig-Zagging to Success**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
We will be discovering the process of becoming more creative. The emphasis is on understanding the creative process and applying effective teamwork strategies towards a shared goal. Students will use scientific inquiry to explore topics in
chemistry that they find interesting. Each team of 3-4 students will choose a project and develop it during the semester with the goal of raising awareness about chemistry or designing innovative and engaging ways of teaching chemistry.

- **CI-169 Riddles of Identity**  
**Credits:** 3.00

**Description:**  
In this course, we will be exploring the often puzzling question of personal identity from a creative perspective, learning about creativity by exploring questions of personal identity. What exactly constitutes our identities? How much control - if any - do we have in determining what our identities are? By wrestling with these among other important questions from a wide-range of perspectives and with creative confidence - the firm belief that each of us can and must explore these questions creatively - we will arrive at a better understanding of ourselves, our personal identities, as well as acquire a greater appreciation of the identities of others. Our course is a genuinely collaborative one, given the significant role others can play in providing us with a perspective on our identities unavailable to us as individuals.

- **CI-171 What Is the Moral of This Story?**  
**Prerequisites:** Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.  

**Credits:** 3.00

**Description:**  
In this course, the idea of embodiment refers to the integration of the expressiveness of our bodies as a vehicle for the art of speaking and communicating. The meaning of embodiment employed here is both a style and philosophy of engagement and will be examined and practiced as an ongoing pedagogy for connecting with stories at various levels of discourse and apperception.
- **CI-173 Imagining the Other**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course we will explore how to enter into new ways of thinking and adopt new perspectives, by reading, discussing and imitating a range of texts (from poems, hybrid-genre pieces, and song lyrics, to photographs, dreams, and ethnographies). Trying to transcend ordinary modes of interpreting the world, trying to imagine what it is like to be someone or something else entirely, immersing ourselves and describing/translating the new experiences, we will then share the writing (and other texts) we produce, workshopping them as a group, and producing a final presentation and collective portfolio.

- **CI-175 Creating Social Change: From Theory to Activism**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Social change doesn't just happen because something is "in the air" or because of some kind of mystical zeitgeist. Social change happens because engaged citizens find creative and innovative ways to frame social conversations and push on the levers of power. In this course we will examine some of the foundational figures and texts called on by those hoping to enact social change. We will study previous social movements in order to understand how they constructed and supported their arguments in favor of change, and how activists used creativity to overcome
entrenched thinking and change the social conversation. We will work in small
groups to collaboratively develop achievable but ambitious plans to engage the
public and enact change in our own communities.

- **CI-179 Myths of Self-Making**
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits
  needing to fulfill their CI requirement should seek approval from the Undergraduate
  Advising Office.

  **Credits:**
  3.00

  **Description:**
  In this course, students examine and engage with one of the major mythological
  figures of the American imagination: the "self-made man." The idea of the
  enterprising person who "pulls himself (or herself) up by the bootstraps" is
  distinctively American. But where and why does it arise? How did it come to
  prominence in American culture, politics, and economics? And, by gaining
  understanding of both the limits and the potential of this cultural ideal, what can we
draw from it in our own careers and lives? Students will practice skills of close
  reading, analysis, and argumentation in the first half of the semester, prior to
  moving onto more complex and interpersonal forms of scholarly creativity and
  problem-solving in teams and in the community. Course content will follow a similar
  trajectory. In the first half of the semester, we will focus on how the myth of the
  self-made man originates and develops, and consider some critiques of it as an
  ideal. After spring break, we will apply the concepts we have studied to a robust
  analysis of issues in contemporary politics and economics including financial
  speculation, entitlement reform, technological disruption, and the gig economy.
  This contemporary focus will culminate in a Group Project & Final Presentation in
  which students aim for an innovative approach to a current question in light of the
  works we have studied.

- **CI-181 Creating Change: Perspective Matters**
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits
  needing to fulfill their CI requirement should seek approval from the Undergraduate
  Advising Office.
Credits:
3.00

Description:
Reality and perception have been debated and discussed for millennia. Humans see and experience their world in different ways. How do humans determine appropriate solutions for challenging social and economic problems? Why do most accept the current structures or status quo in regards to challenging problems? How do we gain a different perspective to find the vision and resources to erect new structures and thus challenge the status quo? Students will creatively explore these big questions through readings and presentations, studying examples of individuals and movements that have led to new and divergent perspectives. Students will participate by crafting products, creating visual projects, and coming into original thought via trial and error. Students will also develop their analytical and critical thinking skills, while learning to communicate effectively and honestly.

Math: 1 course, 4 credits Archive 2018-2019

Choose one Math course from those listed below:

- MATH-128 Math for the Modern World

Prerequisites:
MATH level 2, or Mathshop, or MATH-104

Credits:
4.00

Description:
From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem
solving in contemporary life and work. It uses a minimal amount of algebra and focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)

- **MATH-130 Topics in Finite Mathematics**

**Prerequisites:**
MATH-104, or MATH-121, or MATH level 3

**Credits:**
4.00

**Description:**
Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments, Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.*

- **MATH-134 Calculus for Management & Social Sciences**

**Prerequisites:**
MATH-104, MATH-121 or MATH level 4

**Credits:**
4.00

**Description:**
A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, limits and continuity, derivatives, differentiation rules, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite
integral, the Fundamental Theorem of Calculus, and area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester.

- **MATH-164 Calculus 1 Bridge With Trigonometry**  
  **Prerequisites:**  
  Permission of Instructor  

  **Credits:**  
  4.00  

  **Description:**  
  This course provides an alternative to MATH 165 (Calculus I) for those students who have taken MATH 134 (Calculus for Management and Social Sciences) but who do not have the trigonometric precalculus prerequisite (such as MATH 121) for MATH 165. In other words, the sequence MATH 134 / MATH 164 serves as an alternative to the sequence MATH 121 / MATH 165, and similarly prepares students to take MATH 166 (Calculus II). The course includes a thorough review of trigonometry and other precalculus topics. Aspects of limits and differentiation which students have already seen in MATH 134 are presented briefly, but in most cases with more emphasis on conceptual understanding, and often illustrated using more complicated examples. New calculus topics (i.e. not covered in MATH 134) include one-sided limits, special trigonometric limits, differentiability, derivatives of trigonometric functions and their inverses, derivatives of general inverse functions, logarithmic and implicit differentiation, related rates, L’Hopital’s rule, intermediate values theorem, Rolle’s theorem, mean values theorem, Newton’s method, and linearization. 4 lecture hours plus 1 recitation session each week. Normally offered in fall.

- **MATH-165 Calculus I**  
  **Prerequisites:**  
  MATH-121 with a minimum grade of C, MATH-075, or MATH level 5  

  **Credits:**  
  4.00  

  **Description:**
Functions, limits and continuity, squeeze theorem, limits at infinity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; derivatives of other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); applications of the derivative (implicit differentiation, related rates, optimization, differentials, curve sketching, L’Hopital’s rule); anti-derivatives; indefinite integrals; Fundamental Theorem; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

- MATH-166 Calculus II
Prerequisites:
MATH-164 or MATH-165 with a minimum grade of C

Credits:
4.00

Description:
Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (substitution, by parts, trig integrals, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); improper integrals; infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series (computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

Social, Cultural, & Global Perspectives: 1 course, 3-4 credits Archive 2018-2019

Courses that fulfill the Creativity and Innovation, Humanities/History, Language, Literature, Quantitative Reasoning, Seminar for Freshmen, Social Science, or VPATH requirements may double count to fulfill the Social, Cultural, and Global Perspectives (SCGP) requirement.
Choose one SCGP course from those listed below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADPR-217</td>
<td>Gay and Lesbian Studies</td>
<td>4.00</td>
<td>Examines the portrayal of homosexuality in political, social, and cultural discourse. Analyzes the role of media and symbolic construction in the shaping of public values, opinions, and social movements.</td>
</tr>
<tr>
<td>ADPR-219</td>
<td>Rhetoric of Protest and Reform</td>
<td>4.00</td>
<td>Examines the persuasive strategies of social reform movements with special emphasis on the civil rights', women's rights, and gay rights movements in the United States.</td>
</tr>
<tr>
<td>ARH-203</td>
<td>Arts of Asia</td>
<td>4.00</td>
<td>Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.</td>
</tr>
<tr>
<td>ARH-205</td>
<td>Gender, Class and Alterity in Ancient and Medieval Art</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

- **ARH-321 Women, Art and Society**

  **Credits:**
  4.00

  **Description:**
  Surveys women artists from the sixteenth century to the present and examines new direction in art-historical scholarship developed by feminist art historians during recent decades.

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**

  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **AS-500 Asian Studies Internship**

  **Credits:**
  4.00

  **Description:**
  Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)
- **BLE-325 Global Business Ethics**

  **Prerequisites:**
  BLE-215, PHIL-119, PHIL-120, PHIL-123 or PHIL-127

  **Credits:**
  3.00

  **Description:**
  Surveys business ethics as they transcend the diverse perspectives of global business. Explores current global ethics standards and values, ethical challenges, controversies, convergence and trends. Students explore famous global business cases through films, websites and independent research. Emphasizes identification and resolution of global business ethical issues within the context of ethical decision-making and sustainability. Analyzes corporate social responsibility; hence, transforming global business ethics through business.

- **CI-204 Prague: Castles to Barbwire**

  **Prerequisites:**
  At least 24 credits earned.

  **Credits:**
  3.00

  **Description:**
  Prague offers students a more recent view into history and will serve as a backdrop to learning "Design Thinking." The curriculum will use Czech and Central European cultural features as the inspiration for learning the creative process, skills that can be applied broadly and globally across disciplines. WWII and its fall to Communism left the Czech Republic undamaged. Artists played a vital part in the country’s rise to a Republic during the Velvet Revolution. These dissidents, including writers, actors, artists and musicians were innovators who were the catalyst for change. One could say that creative minds changed this country. This course is designed to demystify the creative process by introducing the creative practice as a disciplined approach to problem solving and innovation requiring research. This one-month study abroad experience will offer a more worldly insight to the significance of developing skills where divergent thinking and risk taking are one of many key tools in learning to generate new ideas. Travel fee covers accommodations, transfers, some meals and cultural visits. Airfare and tuition not included.
- **CJN-216 Intercultural Communication**

  **Credits:**
  4.00

  **Description:**
  An examination of communication variations and cultural viewpoints and their impact on cross-cultural communication. A special emphasis is placed on rituals and message patterns in non-Western cultures.

- **CJN-225 World Cinema**

  **Credits:**
  4.00

  **Description:**
  An introductory course in film studies with a focus on foreign films. Movies studied include masterpieces of cinema from Europe, Asia, the Middle East, and other nations (Films have subtitles).

- **CJN-281 Asian Popular Culture**

  **Credits:**
  4.00

  **Description:**
  Students critically analyze Asian popular culture since the 1980s using a cultural ethnographic approach. Students apply the lenses of gender, identity, globalization, and business strategies to examine pop phenomena such as Korean Wave, Cool Japan, and Cantonese popular music.

- **CJN-293 Hong Kong Cinema**

  **Credits:**
  4.00

  **Description:**
By examining the film texts of Hong Kong auteurs such as John Woo, Wong Kar-wai, Tsui Hark, Andrew Lau, and Alan Mak, the course examines issues such as film genres, colonization/decolonization, transnational political economy, the Greater Chinese media market, and the diaspora.

- **CJN-301 Documentary Film and the Image of Conflict in the Middle East**  
  **Credits:**  
  4.00
  
  **Description:**  
  The course focuses on some of the divisions and conflicts within Israeli society. Students analyze and compare mainstream media discourse to alternative representations in documentary film. Analysis also covers media representation of the Israeli-Palestinian conflict.

- **CJN-385 Globalization of Media and Telecommunications**  
  **Credits:**  
  4.00
  
  **Description:**  
  A critique of the circulation of media goods and ideologies from both a cultural and political/economic perspective. Topics include global Hollywood, the images of Muslim women in transnational media, the information society, and global social movements.

- **EC-141 Development Economics**  
  **Credits:**  
  4.00
  
  **Description:**  
  Why do so many countries remain so poor? Why have some (e.g. the Asian "tigers") grown so rapidly? Why have most of the countries of Eastern Europe and the Former Soviet Union been slow to ignite economic growth? These questions are addressed by looking at domestic factors (government policies, resource
endowments) as well as the international environment (mobile investors, international financial institutions). Asks what economic choices these countries face now. Normally offered yearly. Cultural Diversity B

- **EC-151 Economic & Human Geography**
  **Credits:**
  4.00

**Description:**
The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

- **EDUC-310 Culturally Responsive Education**
  **Credits:**
  4.00

**Description:**
The relationship between cultural diversity and schooling is explored by examining impediments to academic achievement and advancement by minority students, non-native English speaking students, and other under-represented groups. Topics include: standardized testing, identification of inequities, legal and ethical responsibilities of teachers, and promoting equity. Ten pre-practicum observation hours required for teacher candidates.

- **EDUC-315 Strategies for Working With English Learners**
  **Credits:**
  4.00

**Description:**
This course examines the specific needs and challenges of the various language and cultural groups in schools. Topics include: theories of 1st and 2nd language acquisition, strategies for teaching academic content, modifying instruction in the mainstream classroom, creating classroom cultures that invite all students into learning, the role of advocacy and professional collaboration in ESL, and analysis of policies related to assessment and placement of English Language Learners.

- **ENG-123 Great Books of the World I**

  **Credits:**
  4.00

  **Description:**
  Literary masterpieces from ancient times to the Renaissance, including: Homer's Odyssey, Sophocles' Oedipus, Virgil's Aeneid, selections from the Hebrew Bible and the Gospels, and Dante's Divine Comedy. List may vary at the discretion of the instructor.

- **ENG-124 Great Books of the World II**

  **Credits:**
  4.00

  **Description:**
  This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptomist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

- **ENG-135 World Literature in English**

  **Credits:**
  4.00

  **Description:**
A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester. Cultural Diversity B

### Credits:
4.00

### Description:
Explores the francophone world through the study of short stories, print media, and film, by engaging with the rich textured and diverse francophone literary canon. Teaches advance notions of French grammar, write compositions, and the art of conversation related to cultural themes.

- **FR-216 Masterpieces of French and Francophone Literature in English Translation**
  
  **Credits:**
  4.00

  **Description:**
  Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

- **GVT-115 Evolution of the Global System**
  
  **Credits:**
  4.00

  **Description:**
  Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.
– GVT-208 Politics / Religion

Credits:
4.00

Description:
This course explores the relationship between politics & religion in the United States. How and why does religion influence politics in the U.S? What does freedom of religion mean in the U.S.? Why do some groups today erroneously claim that the U.S. was founded as a "Christian nation"? This course also examines what major world religions say about the status and responsibilities of the state and the roles that minority religious groups (Buddhism, Islam, etc.) play in U.S. politics.

– GVT-281 Intro to Comparative Politics

Prerequisites:
GVT 110, GVT 115, and GVT 120 or consent of instructor; Sophomore status or higher

Credits:
4.00

Description:
Introduces various approaches of comparative politics, such as institutionalism, structuralism, political culture, corporatism, state-society relationship, political economy, etc. Applies the different approaches to explain how various factors affect government institutions, sociopolitical and economic development in different societies. An effort is made to include countries from all regions of the world. Normally offered every semester.

– GVT-359 Hockey, International Development & Politics

Credits:
4.00

Description:
This class examines the way in which national identity, global and regional economics and international development intersect. It uses the professionalization of the sport of hockey and its subsequent spread around the globe as its case. It will look at the rise of the pro game, the way in which it shapes national identity in
the Canadian case, the way in which the pro business model has changed in response to broad socio-economic changes in North America and geo-political shifts around the globe, especially in Eastern Europe and the Former Soviet Union.

- **GVT-467 Comparative Social Movements**  
  **Prerequisites:**  
  Junior status  
  **Credits:**  
  4.00  
  **Description:**  
  How do we explain the appearance or absence of social movements? What social or individual factors explain their development and decline? Who joins social movements? Who does not? Why? What ideas or ideals animate those who do participate? What is it like to be part of a social movement? What effect do they have? Have they had on politics, power and efforts at social change? These are some of the questions that have traditionally shaped debates over social movements, both domestically and internationally. They will form the analytical core of the work in this course. By critically evaluating several competing schools of thought in social movement theory and history we will attempt to highlight the social forces that have, at varying points in time, facilitated, maintained, as well as blocked the development of social movements in the US and beyond.

- **HST-100 Introduction to Asian Studies: Culture, People, Ideas**  
  **Credits:**  
  4.00  
  **Description:**  
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, the Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.
- **HST-103 Cultures and Social Transformations in Asia**
  
  **Credits:**
  4.00

  **Description:**
  Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

- **HST-247 History of Modern Middle East**
  
  **Credits:**
  4.00

  **Description:**
  Explores the broad historical forces, conflicts and major events that have shaped the contemporary nations of the modern Middle East. Topic include: the emergence of the modern Middle East from the empires of the sixteenth and seventeenth centuries; the age of colonialism; the rise of nationalism; socialism, capitalism; the impact of Israeli and Palestinian conflict on the region; oil, the Islamic Revolution in Iran and the rise of Islamic fundamentalist movements; U.S. policy; and Saddam Hussein's Iraq.

- **HST-250 A History of Martial Arts in Movies**
  
  **Credits:**
  4.00

  **Description:**
  Outlines the history of Chinese martial arts in five movies, highlighting Chinese views of violence, personal loyalty, government, and justice.

- **HST-251 Modern East Asia**
  
  **Credits:**
  4.00
Description:
China, Japan, and Korea - East Asia's critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

- HST-252 The Rise of China: Through Films, Media, and History
Credits: 4.00

Description:
Discusses the rise of China as the world’s largest economy and its impact on our life through films, media, and history.

- HST-263 Comparative Race Relations
Credits: 4.00

Description:
Compares and analyzes the history of race and politics in South Africa and the United States from the 17th century to the present. Examines how race as a social and ideological construct influenced and informed political conflicts over land, labor, and social relations in the two countries including slavery, segregation, apartheid, and the struggle to create racial democracies.

- HST-268 History of the Mediterranean
Credits: 4.00

Description:
Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.
- **HST-274 Women in 19th-Century Europe**
  
  **Credits:**
  4.00
  
  **Description:**
  Explores the condition of European women from 1800 to 1914. Readings focus primarily on women's experiences in France and Great Britain. Topics include: the effects of industrialization on the lives of working-class women; working and middle-class women's negotiation of marriage, work, and family life; the rise of feminism, women's greater participation in the public sphere, and conservative reaction to these changes in women's place in society; women and crime; Victorian ideas about female sexuality; the politics of class and gender in nineteenth-century European society.

- **HST-275 Women in 20th-Century Europe**
  
  **Credits:**
  4.00
  
  **Description:**
  Examines the changing place of women in European society since 1900. Topics include: women's suffrage and the political advances of the 1920s and 1930s; the revolution in sexual mores, birth control, and the rise of companionate marriage; women and the consumer economy; the anti-woman policies of Fascist Italy and Germany under National Socialism; liberation of women and retrenchment in the Soviet Union; World War II; feminism, sexual liberation, and women's political engagement since the 1960s; and, throughout the twentieth century, women's continuing negotiation of work and family responsibilities.

- **HST-321 History of Islam**
  
  **Credits:**
  4.00
  
  **Description:**
  Presents a coherent account of the origin and history of Islam since its foundation in Arabia in the seventh century A.D. to the present. Analyzes the terms, events, characteristics, developments, movements, and institutions that have been part of
the shaping of Islam. Ideological challenges and impact of Islam in the world today from both spiritual and political perspectives are examined.

- **HST-371 U.S. Women’s History Colonial to 1865**
  **Credits:**
  4.00

**Description:**
Traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism legal status, labor activism and popular culture. With attention to ethnicity, race, class, age, region of residence, disability and sexual orientation, the course focuses primarily on the everyday lives of ordinary women.

- **HST-484 History of the Emotions**
  **Credits:**
  4.00

**Description:**
Explores ideas about emotional life from the fields of history, anthropology, sociology, and psychology as well as the evolution of emotion rules and prescriptions, focusing on western Europe and the United States since 1700. In the eighteenth century, emotions were seen as a positive influence on politics and public life, especially during the French Revolution. After the fall of Robespierre, the emotions were banished to the private sphere - so we will read both primary sources and recent scholarship on 19th- and 20th- century ideas about masculinity and femininity, romantic love and marriage, childrearing, and about what parents and children are supposed feel toward each other, how ideas about these subjects have changed over time, and whether our feelings change with them.

- **MUH-223 World Music**
  **Credits:**
  4.00

**Description:**
Covers topics in folk, traditional, and modern music of Africa, the Middle East, Asia, and Europe in the context of the cultures and lives of the indigenous peoples of those regions; examines how music interacts with the issues of race, gender, class, religion, politics, and social movements. Normally offered every other year.

- **P.AD-201 Social Change**
  
  **Credits:**
  3.00

  **Description:**
  This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women's movement, environmentalism, and the gay and lesbian movement.

- **P.AD-H201 Honors Social Change**
  
  **Credits:**
  3.00

  **Description:**
  This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women's movement, environmentalism, and the gay and lesbian movement.

- **PHIL-120 Ethics and Civic Life**
  
  **Credits:**
  4.00

  **Description:**
  In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.
- **PHIL-228 Feminist Philosophy**

  **Credits:**
  4.00

  **Description:**
  This course is an introduction to the philosophy of feminist thought. Feminist theories of epistemology, metaphysics and morality will be examined as critiques of traditional philosophy. Feminist perspectives and methodologies include radical, liberal, postmodern, as well as more recent trends in ecofeminism. Special emphasis will be placed on explicit and implicit practices of alienation and exclusion as they have unfolded in the “gendering” of thought, truth, and reality. 1 term - 4 credits. Normally offered every third year. Cb

- **PHIL-229 Eco-Feminism**

  **Prerequisites:**
  PHIL 119, or PHIL 123, or PHIL 127

  **Credits:**
  4.00

  **Description:**
  Examines the political, social, and ecological problems facing us as a global community. Having its roots in feminist theory and deep-ecology, eco-feminism provides a critical framework for ecological responsibility and accountability. Writings from eco-feminist thinkers and environmental activists around the world will be used to highlight the philosophical and political conflicts and challenges, including globalization and loss of biodiversity, global warming, international human rights, the relationship of gender and nature, and modes of redress for eco-justice and sustainable development.

- **PHIL-261 Eastern Philosophy**

  **Credits:**
  4.00

  **Description:**
The exposition and critical evaluation of Hinduism, Buddhism, Confucianism, Taoism, and Islam. Special attention is given to foundation principles as well as to the similarities and differences of each of these philosophies to basic ideas in Western philosophy. 1 term - 4 credits. Normally offered alternate years. C b

<tr>
<td>PHIL-267</td>
<td>Chinese Philosophy</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course then considers Zen Buddhism, which is called Ch'an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.

- **PSYCH-243 Organizational Psychology**

**Prerequisites:**
Take PSYCH-114;

**Credits:**
4.00

**Description:**
Explores the application of psychological theories and principles to organizations and the workplace with attention to the role of culture and context. Topics includes job analysis, recruitment, selection, evaluation, training, retention, and termination. Employee morale, well-being, stress, and hardness are considered.

- **PSYCH-247 Asian Perspectives on Health and Work**

**Credits:**
4.00

**Description:**
Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants.

- **RS-111 Introduction to World Religions: Western Traditions**

**Credits:**
Description:
This course will explore the comparative history and structure of Western religious traditions, broadly understood, and their impact on other world religions, while attempting to recognize the similarities and the differences among them. Traditions to be studied include Greek and Roman religion, the monotheistic faiths (Judaism, Christianity, and Islam, as well as Zoroastrianism, Sikhism and Bahaism). We will also explore the impact of the Western religions on indigenous traditions, such as African religion, Native American religion, and Pacific Island religion. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. 1 term - 4 credits. Normally offered every year.

RS-112 Introduction to World Religions: Eastern Traditions
Credits: 4.00

Description:
This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting to recognize the similarities and the differences among them. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. Normally offered every year. Cultural Diversity B

SIB-550 Global Travel Seminar
Prerequisites:
Please email Hillary Sabbagh at hsabbagh@suffolk.edu to register for a travel seminar.

Credits: 3.00
**Description:**
An in-depth analysis of timely special issues in international business. Specific topics are announced when the course is scheduled.

---

**SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**

**Credits:**
4.00

**Description:**
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

---

**SF-190 Asia in America Fiction and Fact**

**Credits:**
4.00

**Description:**
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.
- **SF-1145 Emergence of Southeast Asia**

  **Credits:**
  4.00

  **Description:**
  Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SOC-218 Crime and Law in Indian Country**

  **Credits:**
  4.00

  **Description:**
  What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.

- **SOC-227 Race in American Society**

  **Credits:**
  4.00

  **Description:**
  Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become
 racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

- **SOC-228 Cultural, Global and Social Perspectives**
  **Credits:**
  4.00
  
  **Description:** Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.

- **SOC-275 Women and Crime**
  **Credits:**
  4.00
  
  **Description:** This course examines the complex relationships between women and crime today. This focus will include women as criminal offenders; women as victims of crime; and women as both offenders and victims. Course materials draw from recent feminist scholarship on these issues in the social sciences. Topics include the causes of women's crime women, drugs, and crime; child abuse and trauma; prostitution and sex trafficking; race, gender and victimization; and feminist social movements against violence. Crimes of violence against women are a central focus in the course.

- **SOC-329 Sociology of Globalization**
  **Prerequisites:**
  Prerequisite: SOC 113 or SOC 116.
  
  **Credits:**
  4.00
Description:
Globalization is shrinking the world. How and why did this happen? This course will explore global change and the global processes which effect key social institutions: culture, the economy and politics. Students will study the processes of globalization and its impact on our lives and people around the globe.

- SOC-341 International Drug Control Policy
  Credits: 4.00
  Description:
  Relying on a simplistic demand or supply explanation of why Americans use/abuse drugs obscures the reality of America’s drug problem, is ineffective as a guide to public policy and has unforeseen, often negative consequences. Drug use is a complex and multi-faceted issue. There are no easy answers. To comprehend the complexity of America's drug problem one needs an understanding of the geography, history, religion, law, economics and international politics of the Middle and Far East, Eastern Europe, Africa, Mexico, and Central and South America. This class will provide this basic understanding without losing sight that the problem we seek to remedy is our own.

- SOC-354 Death and Dying
  Credits: 4.00
  Description:
  An examination of changing definitions of life and death, social factors affecting causes and rates of death, care of the dying and their families, institutionalization, the funeral industry, suicide, crisis intervention, and the impact of technology on the dying process.

- SOC-357 Global Health and Healing
  Credits: 4.00
  Description:
An examination of how different cultures understand health and illness. Healing approaches from Asia, Africa and the Americas will be explored.

- **SPAN-202 Intermediate Spanish II**

  **Prerequisites:**
  SPAN 201 or Instructor’s consent.

  **Credits:**
  4.00

  **Description:**
  Continues skills development from 201. Students read a collection of short stories, write compositions, develop cultural insights through comparative and contrastive assignments, and practice listening and speaking skills in weekly conversation sessions.

- **SPAN-290 Advanced Composition & Conversation**

  **Prerequisites:**
  Prerequisite: Spanish 202, 203 or 250 or Instructor’s consent

  **Credits:**
  4.00

  **Description:**
  Develops written and oral skills in various contexts and registers. Emphasis on strengthening written skills and learning to speak clearly and persuasively in Spanish. Short texts and audio-visual materials provide the basis for classroom activities which include regularly assigned essays, group discussions and debates.

- **SPAN-300 Intro to Cultural Texts**

  **Prerequisites:**
  Spanish 202, 203, 250 or Instructor's consent.

  **Credits:**
  4.00
**Description:**
Explores a selection of Peninsular and Latin American cultural materials. Primarily examines texts from different literary genres (narrative, drama, essay, and poetry). Develops critical skills required in more advanced Spanish courses, through close readings and textual analysis. Activities include regularly assigned essays, group discussions, and short scene work.

</table>

**Description:**
Introduces students to the complexity Latin America by examining its roots in pre-Columbian America and the impact of Spanish exploration and colonization. Places emphasis on cultural, economic, historical, philosophical, political and religious patterns that define the region. Includes class discussions, oral presentations, and writing assignments based on reading and audio-visual material.
- **SPAN-303 Modern and Contemporary Latin America**
  **Prerequisites:**
  SPAN 202 or 203 or Instructor's consent. SPAN 290 or 300 strongly recommended.

  **Credits:**
  4.00

  **Description:**
  Examines the path taken by Latin American and Caribbean countries to build independent nations out of colonial territories highlighting the 19th, 20th, and 21st centuries, ethnic plurality, and cultural complexity in areas such as politics, religion, sociology, economics, customs, music & film. The cultural contributions of Spanish-speaking minorities in the United States are also addressed. Includes class discussions, oral presentations, and writing assignments based on readings and audio-visual material.

- **SPAN-315 Spanish for the Professions**
  **Prerequisites:**
  SPAN 290 or SPAN 300 or Instructor's consent.

  **Credits:**
  4.00

  **Description:**
  Integrates language learning with culture via business context of the Hispanic world. Spanish for banking and finance, marketing and advertising, and international commerce are highlighted. Students increase their cross-cultural understanding and written and oral proficiency in business Spanish through a wide range of assignments.

- **SPAN-390 Introduction to Latin American and Caribbean Literature**
  **Prerequisites:**
  SPAN 300; SPAN 302 is strongly recommended

  **Credits:**
  4.00
**Description:**
Examines authors from Latin America and the Caribbean in their historical and cultural contexts. Reading and class discussions consider the relationship between the writer and society by covering such topics as colonialism, the oral tradition, modernism and the emergence of new narratives in the twentieth century. The Inca Garcilaso, Sor Juana, Carlos Fuentes, Rigoberta Menchu, and Pablo Neruda are among some writers studied.

— **THETR-260 Broadway Musicals**

**Credits:**
4.00

**Description:**
This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

— **THETR-267 Introduction to Theatre: Contemporary American**

**Credits:**
4.00

**Description:**
This course provides a formal introduction to the theories and practices strategically used by American theatre artists after the Second World War. Special emphasis is placed on theatre artists exploring issues of cultural identity including works by GLBT, African-American, Asian-American, and Latin American playwrights. These playwrights may include Tony Kushner, Paula Vogel, Suzan-Lori Parks, Adrienne Kennedy, August Wilson, David Henry Hwang, Philip Kan Gotanda, Eduardo Machado, and Melinda Lopez. The course will also provide an introduction to trends in post-modern theatre practices related to emerging work of the auteur director, solo performers, and interdisciplinary collectives. Satisfies a core requirement for Theatre majors. Normally offered alternate years.
– WGS-111 Women, History, and Culture

Credits:
4.00

Description:
Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

– WGS-H111 Women, History, & Culture

Prerequisites:
At least a 3.3 GPA required.

Credits:
4.00

Description:
Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

– WGS-113 Women, Science, and Society

Credits:
4.00
Description:
Explores women's lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the female body and eating disorders; women's health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

- WGS-115 Introduction to Gender Studies

Credits:
4.00

Description:
Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women's studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

- WGS-235 Gender and Sexuality in Visual Culture

Credits:
4.00

Description:
Explores how gender and sexuality are depicted, constructed, and interrogated across a variety of visual mediums, including film, television, and photography. We will pair foundational readings in queer and feminist thought with representations in order to consider how theory and popular culture engage in a constant dialogue. Topics include: the maintenance of norms regarding gender and sexuality; how race, class, and ability complicate our understanding of gender and sexuality; the ways in which sexuality intertwines with other social and political formations; imagining alternative theories and practices in representing gender and sexuality in
contemporary media culture. Possible texts include theoretical work by Sigmund Freud, Judith Butler, Rosemarie Garland-Thomson, and David Halperin and media such as The Shape of Water (2017), Blade Runner (1982), Queer Eye for the Straight Guy (2003-2007), and Jess Dugan's To Survive on This Shore (2018).

WGS-311 Engendering Entertainment: Feminism and Popular Culture

Credits: 4.00

Description: Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How To Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

WGS-315 Feminist Thought

Credits: 4.00

Description: Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldúa, and Judith Butler.
- **WGS-325 Global Women's Fiction**  
  **Credits:**  
  4.00  
  
  **Description:**  
  Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

- **WGS-335 Queer Narratives**  
  **Credits:**  
  4.00  
  
  **Description:**  
  Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's recent memoir, "Redefining Realness", as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

- **WGS-340 Women on Stage**  
  **Credits:**  
  4.00  
  
  **Description:**  
  Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of
authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht’s alienation effect, and the distinction between performance and the performative.

Science, Technology, & Engineering (STE): 2 courses and corresponding laboratories where applicable, 8 credits Archive 2018-2019

Choose two STE courses (and corresponding laboratory where applicable) from those listed below. Courses do not need to be in a sequence. In the case of a course that is a lecture plus a lab, the student must complete both components to earn credit for the STE requirement.

Some Science division courses may have Math or Computer Science prerequisites; many have other Science prerequisites.

Biology

- BIO-105 Humans and the Evolutionary Perspective

Prerequisites:
Non Science Majors Only

Credits:
4.00

Description:
Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.
- **BIO-109 Plants and People**

**Prerequisites:**
Non Science Majors Only.

**Credits:**
4.00

**Description:**
This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.

- **BIO-111 Introduction to the Cell**

**Prerequisites:**
Must take BIO L111 concurrently

**Credits:**
3.00

**Description:**
Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

- **BIO-L111 Introduction to the Cell Laboratory**

**Prerequisites:**
Concurrently with BIO 111

**Credits:**
1.00
**Description:**
Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

<td>4.00</td>
</tr>
</tbody>
</table>
Description:
This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

Chemistry

- CHEM-105 Chemical New Product Development

Prerequisites:
ENT 101

Credits:
4.00

Description:
This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

- CHEM-106 Biotechnology & Its Applications in Medicine, Agriculture, Law

Credits:
4.00

Description:
Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, short documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.

**CHEM-111 General Chemistry I**

**Prerequisites:**
Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

**Credits:**
3.00

**Description:**
Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

**CHEM-L111 General Chemistry Laboratory I**

**Prerequisites:**
MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

**Credits:**
1.00

**Description:**
Introduces the basic principles of chemistry through “discovery” laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading
and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

**Computer Science**

- **CMPSC-F107 Ants, Rumors and Gridlocks**
  
  **Prerequisites:**
  Math placement level of 2 or above or any MATH course at the level 100 or above

  **Credits:**
  4.00

  **Description:**
  Do viruses and rumors spread like forest fires? How do ants cooperate? Do spoken languages and biological species evolve in a similar way? "Ants, Rumors, and Gridlocks" exposes students to introductory aspects of computational science by addressing and answering these and many other questions. Students use and modify virtual experiments preprogrammed in the NetLogo programming language to investigate these topics and others in Social Sciences, Biology, and Environmental Science. No prior knowledge of computer programming or NetLogo is required.

**Electrical Engineering**

- **ECE-288 Measuring the World**

  **Credits:**
  4.00

  **Description:**
  The world is addicted to quantifying the essence of everything, from personal IQ, to the speed of a baseball, to our healthiness, or our chances of winning the lottery. Behind most of these numeric values exists a science of measurement. Some of this is referenced to international standards, such as for length, time, weight, or
temperature. Others are more arbitrary and subjective, such as ranking Olympic performance in gymnastics, beauty pageants, or popular responses as found in the game show “Family Feud.” A third category includes controversial areas, such as measuring whether a person is lying when interrogated, or using hype rather than reality to market products. Sometimes statistics are used to predict sports outcomes, such as in the annual March Madness NCAA basketball brackets. Finally, in a world subject to fraud and deception, it can be essential to distinguish legitimate from counterfeit items, such as in money, art, collectibles, and historical documents. Don’t get hoodwinked! This course examines all of these, starting with how measurements have been made throughout history, along with a full deck of entertaining terms used during the ages. This may help you sort out your weight, whether given in pounds, kilos, or stones. Often these terms will provide insights into how people lived in different eras. We will also look at some of the technologies currently available to provide these measurements, and unravel the complexities of various sensors that are used. As we consider the meaning of "accuracy" we may become less naive about how much confidence to ascribe to the results given us. Hovering around all of these measurements should be the question of validity - are they meaningful, useful, or misleading? And the impact they have on society - whether they steer behavior more powerfully than one might originally suspect. Each student will also be given an opportunity to become an "expert" in an area of measurement of personal interest. By the end of the course all students should have gained greater insight into how the world around them is quantified, and whether numbers can provide accurate predictors for our future. Algebra helpful. Basic science background helpful. Curiosity essential!

**Engineering Science**

- **ENS-103 Introduction to Engineering.**

**Prerequisites:**
ENS L103 MUST BE TAKEN CONCURRENTLY.

**Credits:**
3.00

**Description:**
"This course provides exposure to engineering practice, with particular focus on electrical engineering components such as circuit elements and systems. It seeks to go beyond the mathematics and provide an intuitive appreciation of functional devices. Examples taken from a broad swath of technological history illustrate significant crossroads, decisions, and inventiveness. Emphasis is placed on learning to think as an engineer - assessment of problems, candidate solution tradeoffs, and implementations. Frequent exercises in creative engineering design will be used. Students will be required to design several elementary devices, such as a magnet, a capacitor, a timing device, and a motor, which they will enter in a competition for overall strength, compactness, accuracy, or speed. Sometimes assignments relate to ""survival on an island"" concerns, such as communication or drinking water. Students also learn about reverse engineering by selecting, building, troubleshooting, and presenting an electronic kit of their choice. A term paper determining the engineering behind a topic of their choice will also be written and presented. On occasion (see ENS L103) there will be team competitions between various smaller groups in the class."

- **ENS-L103 Intro to Engineering Lab**

**Prerequisites:**
Must be taken Concurrently w/ ENS-103

**Credits:**
1.00

**Description:**
The Lab is designed to provide opportunities to gain familiarity with engineering tools. Students will be introduced to parts (e.g. learn the resistor color code), test equipment (multimeters, prototyping trainers, signal generators, and oscilloscopes), and construction techniques (wiring, soldering, troubleshooting). Although it varies from year to year, Class Projects can be built during the Lab sessions. In the past these have included a 25 Watt electric generator, various door lock systems (both mechanical and electronic), and an AM transmitter and receiver (all projects made from scratch). It is likely that 2010-2011 may introduce some robotic creations for a competition. Electronic kits and motors can also be built and serviced in the Lab. There is an adjoining machine shop, which can be utilized (with supervision), for fabricating items. Individual creativity is encouraged, and informal problem solving sessions occasionally occupy lab time. However, the lab is accessible outside of the traditional scheduled time.
Environmental Science

- **UES-107 Introduction to Drones**
  **Prerequisites:**
  UES-L107 must be taken concurrently.
  
  **Credits:**
  3.00
  
  **Description:**
  Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration's Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

- **UES-L107 Introduction to Drones Lab**
  **Prerequisites:**
  UES-107 must be taken concurrently.
  
  **Credits:**
  1.00

UES-111 Environmental Science

**Prerequisites:**
Take UES-L111 concurrently

**Credits:**
3.00

**Description:**
Applies the fundamentals of science to environmental issues. Topics include population dynamics and resources, environmental degradation, ecosystems, geologic processes, deforestation, biodiversity, climate change, air, soil, and water resource management, and pollution and risks to health.

UES-L111 Environmental Science Lab

**Prerequisites:**
Take UES-111 concurrently

**Credits:**
1.00

**Description:**
Laboratory exercises are used to illustrate topics covered in UES 111. Field testing and analysis of environmental samples. Field trips may be required.
UES-121 Science, Art, and the Environment

Prerequisites:
Take UES-L121 concurrently

Credits:
3.00

Description:
Examines art and cultural objects through the lens of the biological, chemical, and physical principles of the materials and processes we use to make them. Includes consideration of factors important in art conservation. Provides an environmental context for the manufacture and use of art materials and the preservation of cultural objects.

UES-L121 Science, Art, and the Environment Lab

Prerequisites:
Take UES-121 concurrently

Credits:
1.00

Description:
Provides hands-on work with pigments, dyes, and other art materials using the basic principles of science and technology. Students will conduct laboratory experiments that produce art objects and other consumer products. Instruction in safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables, graphs, and graphics. Practice in synthesizing compounds like paints and finishes and in evaluating methods of art conservation.

UES-225 Geographical Information Science

Prerequisites:
Take UES-L225 concurrently

Credits:
3.00
Description:
Provides the fundamentals of geographic information science (GIS) including the history of automated mapping. A review of the necessary hardware and software elements used in GIS is presented. Hands-on exercises with computerized mapping software are required.

UES-L225 Geographic Information Science Lab

Prerequisites:
Take UES-225 concurrently

Credits:
1.00

Description:
Required companion computer laboratory to be taken concurrently with UES 225.

UES-270 SL-Understanding Wetlands Through Citizen Science

Credits:
4.00

Description:
In this course students meet community needs by engaging in service-learning outside the classroom. Develops students' awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps. The beginning of the semester is devoted to understanding of how these vital ecosystems function with topics including wetland hydrology, biogeochemistry, management, and restoration. The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner.

UES-H270 Honors SL Understanding Wetlands Through Citizen Science

Prerequisites:
Honors student or at least 3.3 GPA

Credits:
**Description:**
In this course students meet community needs by engaging in service-learning outside the classroom. Students' awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps will be developed through exploration of these vital ecosystems (topics include wetland biology, management, and restoration). The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner where students will be going into the field three times over the course of the semester via pre-arranged private transportation.

---

**Forensic Science**

- **FS-103 Introduction to Forensic Science**
  **Prerequisites:**
  FS-L103 concurrently

  **Credits:**
  3.00

  **Description:**
  Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall

- **FS-L103 Introduction to Forensic Science Lab**
  **Prerequisites:**
  FS-103 concurrently

  **Credits:**
  1.00

  **Description:**
Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall

**Neuroscience**

- **NEUR-101 Intro to Neuroscience**
  **Credits:**
  4.00

  **Description:**
  Introduces the field of neuroscience, the study of the organization and function of the nervous system of humans and other animals. Topics include the neuron and neural transmission, the overall function and organization of the nervous system, the development of the brain, neural plasticity, sleep, memory and other higher cognitive functions.

**Physics**

- **PHYS-111 College Physics I**
  **Prerequisites:**
  Take MATH-121 or MATH-134 or MATH-165 or permission of Physics department chair; PHYS-L111 taken concurrently

  **Credits:**
  3.00

  **Description:**
  Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.
- **PHYS-L111 College Physics Lab I**
  **Prerequisites:**
  PHYS 111 concurrently

  **Credits:**
  1.00

  **Description:**
  Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks and formal reports required.

- **PHYS-151 University Physics I**
  **Prerequisites:**
  MATH-121 or higher (previously or concurrently) and PHYS L151 concurrently

  **Credits:**
  3.00

  **Description:**
  PHYS 151 is the first of three courses (PHYS 151, 152, 153) that comprise the calculus based introductory physics sequence at Suffolk University intended for students majoring in the physical sciences, engineering and mathematics. This course aims to teach basic techniques in physics that fall under the topic of classical mechanics and their application in understanding the natural world. Specific topics include the study of vectors, Newton's laws, rotations, rigid body statics and dynamics, fluid mechanics, simple harmonic motion, mechanical waves, sound and hearing. The student will learn how to analyze physical situations by using simple models, and also how to solve those models and derive useful conclusions from them. This course will show students how experimental results and mathematical representations are combined to create testable scientific theories, and how the complexities of most real-life physical situations can be reduced to simple problems by identifying the essential physical features and ignoring the rest. The student will learn to distinguish the scientific approach to physical situations from other ways of looking at them, for example, artistic, humanistic, and business.

</table>
The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday’s law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

- PHYS-153 University Physics III

**Prerequisites:**
MATH-121, MATH-164, or MATH-165; PHYS-151; PHYS-L153 concurrently

**Credits:**
3.00

**Description:**
This calculus-based course is the introduction of the topics of modern physics. It begins with special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom. Then Schrodinger’s equation is introduced with use of wave functions, particle box, barrier penetration, quantum mechanical tunneling, the Pauli Exclusion principle, the development of the periodic table, and the X-ray spectra. Development of solid state physics with bonding in molecules, band theory of solids and semiconductor behavior. The final topics cover nuclear physics, radioactivity, half-life, nuclear fission and fusion, medical uses of radiation, elementary particle physics and introduction to astrophysics.

- PHYS-L153 University Physics III Lab

**Prerequisites:**
PHYS-153 concurrently

**Credits:**
1.00

**Description:**
The laboratory consists of experiments to illustrate the basic concepts of special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation,
photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom.

### Science

- **SCI-103 Environmental Science**
  **Prerequisites:**
  SCI-L103 must be taken concurrently

  **Credits:**
  3.00

  **Description:**
  Case study approach to the fundamentals of science applied to environmental degradation, ecosystems, geological processes, population dynamics, deforestation and biodiversity, climate change, ozone depletion, air soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment.

- **SCI-L103 Environmental Science Lab**
  **Prerequisites:**
  Must take SCI-103 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.

- **SCI-108 Introduction to Cancer Care**
  **Credits:**
  4.00
**Description:**
Introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants.

— **SCI-109 SL-Introduction to Community Cancer Care**

**Credits:**
4.00

**Description:**
Students meet community needs by engaging in service-learning outside the classroom. This course introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants. Service-learning is a pedagogy integrating academically relevant service activities that address human and community needs into a course. Students connect knowledge and theory to practice by combining service with reflection in a structured learning environment. Students will engage in service-learning with an underserved community partner in regards to cancer by working directly with cancer patients or by assisting on a project that supports cancer patients.

— **SCI-111 Introduction to Astronomy**

**Prerequisites:**
MATH-128 or higher and SCI-L111 must be taken concurrently.

**Credits:**
3.00

**Description:**
History of Astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors; space programs, science and technology in society. Course culminates with a visit to the Clay Center Observatory, where
students will be able to make first hand observations. For non-science majors.

- **SCI-L111 Introduction to Astronomy Lab**
  **Prerequisites:**
  Take SCI-111 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory experiments and exercises to illustrate the principles discussed in Science 111. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations.

- **SCI-112 Structure of the Universe**
  **Prerequisites:**
  MATH-128 or higher and SCI-L112 concurrently

  **Credits:**
  3.00

  **Description:**
  Astronomy of the cosmos; sun, stars, interstellar materials, galaxies, pulsars, quasars, black holes; nature of time relativity, cosmology. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations. For non-science majors.

- **SCI-L112 Structure of the Universe Lab**
  **Prerequisites:**
  Take SCI-112 concurrently

  **Credits:**
  1.00
**Description:**
Laboratory experiments and exercises to illustrate the principles discussed in Science 112. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations.

---

| SCI-113 A Habitable Earth Within the Solar System |
| Credits: |
| 4.00 |

**Description:**
This course introduces non-science majors to concepts that are central to making our planet habitable. It presents Earth in context of the solar system with a broad view of global climate change and energy resources in a quest to better understand the workings our planet. This course on Earth and Planetary Science is suitable for students who may have taken their last science and math course several years ago, or are just curious about knowing facts on major issues that pertain to the future of our planet. Together with a reading component, this course aims to give students a flavor of how researchers think, investigate and develop conclusions that directly affect our political and economic future. Topics covered in this course range from the solar system to the study of search for other habitable Earth-like planets, search for extraterrestrial life, and evolution of life on Earth. Other characteristics of this course are heavy use of audio-visual materials often including computer animations and simulations, in-class experiment demonstration, and intensive use of INTERNET-based resources.

---

| SCI-165 Inner Workings of Physics Universe |
| Credits: |
| 4.00 |

**Description:**
About 15 billion years ago, (data indicate) the big bang occurred and the universe was born. With it came physical laws and a spectacular array of consequences that lead to the universe as we know it. This non-lab, 4 credit course explores the inner workings of the physical universe in terms of the scientific inquiry which lead to Newton’s laws, an understanding of energy, waves, light, electricity, atomic structure, chemical reactions, nuclear physics, particle physics, relativity, and the
big bang theory. During the course, students will learn to make use of modern resources to access scientific and technical literature to research a scientific topic. They will learn to distinguish between science and technology (e.g. quantum mechanics and nanotechnology, the discovery of the Higgs boson and the large hadron collider that made it possible, etc.) and to understand how the science, technology, and engineering disciplines play a crucial role in recognizing and solving problems of society and the world that we share.

- SCI-171 The Built World: How Humans Engineer Environments

**Credits:**
4.00

**Description:**
The most basic needs of humans have not changed - water, food, and shelter - but the means of meeting these needs has. In this course, we will examine how technology-driven societies operate by studying how cities are built and how they function. Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design), and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.

**Prerequisites:**
SCI-L173 must be taken concurrently.

**Credits:**
3.00

**Description:**
Geographic Information Science (GIS) link information (number of fire hydrants on a block) to features on a map (e.g., a point representing street address) that has a designated geographic location (as designated by global coordinates). Unlike paper maps, GIS software allows the production of interactive maps that allows the user to layer data, to indicate spatial patterns, to analyze trends, and to combine
different features of the mapped area in novel ways. For example, a business person may wish to use GIS to determine the optimum location of retail outlet (based on the mapped demographics of a neighborhood), while an environmental engineer may use GIS to describe the location of outfalls to see how they correlate to areas of stream pollution. In this course, students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

- **SCI-L173 Mapping Our World Lab**

  **Prerequisites:**
  SCI-173 must be taken concurrently.

  **Credits:**
  1.00

  **Description:**
  This laboratory illustrates concepts and methods taught in SCI 173. In this lab students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

- **SCI-181 Science and Life in the 21st Century**

  **Credits:**
  4.00

  **Description:**
  No longer offered on Boston campus This is a four credit, non-lab, science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.

- **SCI-184 Contemporary Science and Innovation**

  **Credits:**
  4.00
Description:
This is a 4 credit, project based science course that examines the central scientific problems confronting the 21st century. The course consists of lectures, class discussions, field trips, and in-class hands-on activities designed to familiarize the student with different concepts of the lectures. The current focus is on sustainable energy production. A final team project related to the course topics will be given. This is the version of SCI 183 without a separate lab component. Students who have taken SCI 183, L183 are not allowed to take this course.

- SCI-201 Physics for Future Presidents

Credits:
4.00

Description:
This course presents a topical introduction to the key principles and concepts of physics in the context of the world events and natural phenomena that confront world leaders and that require informed decisions and responses. Energy, health, counter-terrorism, remote sensing, space programs, nuclear proliferation, and a host of other modern challenges have technological and scientific dimensions, the understanding of which is essential to avoiding disastrous policy decisions. This course considers the application of physics to these societal challenges. The material is covered at a level and pace that a future world leader should be able to handle; the emphasis is on the development of physical reasoning skills, and not on detailed, mathematical problem solving.

- SCI-210 Earth and Planetary Crystals

Prerequisites:
Take SCI-L210 concurrently

Credits:
3.00

Description:
This course will provide undergraduate students of various disciplines with an introduction to gems and crystals using interactive, evidence-based teaching approaches. Crystalline forms of matter are critical to our existence. Using innovative teaching strategies of in-class hands-on demonstration, supplemented with visuals of crystal details, the course provides students insights into the
formation, alteration and unique properties that make crystals invaluable. Topics range from the study of proteins and nucleic acids to the interior of planets. The in-class lectures will provide a basic guide that will serve as a platform for individually catered in-depth study. Therefore, the course is open to advanced students as well, who can pick up higher level of information for discussion and class projects.

- **SCI-L210 Earth and Planetary Crystals Laboratory**

**Prerequisites:**
Take SCI-210 concurrently

**Credits:**
1.00

**Description:**
This course introduces concepts that are central to understanding crystals, gemstones and other natural materials abundant throughout the solar system. It includes an introduction to carbon-based crystals (diamonds, proteins, viruses and ices) in context with origins of life, geopolitical significance and their applications. This laboratory-based course is an introduction to modern tools and techniques for crystal analysis with a historical context of some of the greatest discoveries in science (DNA, and other nanomaterials). It presents crystals and gems from their visually appealing point of view to their sometimes-dramatic physical characteristics, with a broad view of their formation, occurrence, physics, chemistry and resources perspective.

**Studies in Literature: 1 course, 4 credits Archive 2018-2019**

Choose one Studies in Literature course from those listed below:

- **ENG-113 World Drama I**

**Credits:**
4.00
### Description:
Survey of drama and theatre as part of world culture from classical Greece through 18th-century China. Normally offered yearly.

4.00

**Description:**
Study of poetry, prose, and drama from the British literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author’s craft and relationship to the reader. Offered every semester.

– **ENG-142 Studies in American Literature**

**Credits:**
4.00

**Description:**
Study of poetry, prose, and drama from the American literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author’s craft and relationship to the reader. Offered every semester.

– **ENG-151 Introduction to African-American Literature**

**Credits:**
4.00

**Description:**
Literature has the capacity to record and interrogate history in an imaginative and artistic context. African-American literature is a rich, varied, and complex body of literature that faces our tainted history directly. The authors we will read in this class examine slavery’s long-term psychological and social effects while forging a literary history that is at once a part of and apart from American literary history more generally.

– **ENG-152 Horror Fiction**

**Credits:**
4.00

**Description:**
This course focuses on the reading and analysis of horror literature and the ways in which horror reflects and represents personal and cultural anxieties. Readings will include both classic and contemporary authors, for example, Edgar Allan Poe, H.P. Lovecraft, Shirley Jackson, Stephen King, and others. Assignments will include analytical essays as well as creative writing.

- **ENG-153 Literature of War**
  **Credits:**
  4.00

  **Description:**
  This course will examine a wide range of writers and film makers who have sought to bridge the gap that exists between those who have experienced war and those who have not. Some stories we will examine are told from an American perspective; some are told from the perspective of soldiers who fought against Americans; and some are told from those who experienced life under U.S. military occupation.

- **ENG-154 Bob Dylan and the Beat Generation**
  **Credits:**
  4.00

  **Description:**
  A study of literary works by the so-called "Beat Generation," the American literary underworld of the late 1950s and 1960s, including major works by the three central figures (Ginsburg, Kerouac, Burroughs) and less central figures (Corso, Snyder, DiPrima, Jones/Baraka) as well as the influence of the Beats on the work of Bob Dylan, the only musician to win the Nobel Prize in Literature.

- **ENG-155 Young Adult Literature**
  **Credits:**
  4.00

  **Description:**
  Young Adult Literature’s recent explosion in popularity raises important questions about the stories it tells, the values it promotes, and the audiences it seeks. This course approaches the YA phenomenon as one with deep historical roots as well as
contemporary cultural relevance. From nineteenth century classics to current series favorites, literary works focused on young people reframe perennially fresh narratives about coming of age, negotiating personal identity, and navigating a complex moral universe. This course also considers YA literature as part of an evolving network of writers, readers, publishers, critics and filmmakers.

### ENG-157 Poetry and Religion
**Credits:** 4.00

**Description:**
This course will use close readings to examine poetry as a heightened form of language seeking to make contact with divine sources of faith. We will consider poems that provide examples of the struggle to attain belief, as well as poems that deny belief. Language as both the grammar of ascent and the locus of descent. The position of human beings in relation to God, or the gods, or the absence of the divine.

### ENG-158 Nasty Women and Unruly Voices in American Literature
**Credits:** 4.00

**Description:**
This course takes students on a tour of witches, "nasty women," and other "unruly tongues" or "bitter spirits" throughout American literary history. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Fulfills the Literature Requirement of the CAS Core Curriculum.

### ENG-159 The Literature of London
**Credits:** 3.00

**Description:**
For more than a thousand years, the city of London has been a cultural center, the home of playwrights and poets, novelists and critics, theaters and libraries. In this class we will read a wide range of literary works in different genres that take the city of London, and the experience of living or writing there, as central themes. The class will emphasize close reading and literary analysis of London texts, and will also explore contextualizing materials from newspaper articles to music and art. Designed to be taken in tandem with an optional one-credit study abroad trip to London, UK.

- ENG-161 Writing the American West
  
  **Credits:**
  4.00

  **Description:**
  Study of 20th century writing on the American West by American women and men in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes provide the basis for the study of "frontier" or western literature by American authors. Fulfills the Literature Requirement of the CAS Core Curriculum.

- ENG-213 English Literature I
  
  **Prerequisites:**
  English Majors and Minors or Instructor Permission

  **Credits:**
  4.00

  **Description:**
  Study of major writers of England from the beginning to the mid-18th century. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

- ENG-214 English Literature II
  
  **Prerequisites:**
  English Majors and Minors or Instructor Permission
Credits:
4.00

Description:
Study of major English writers from the mid-18th century to the present. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

- ENG-217 American Literature I

Prerequisites:
English Majors and Minors or Instructor Permission

Credits:
4.00

Description:
Study of major American writing from its origins through 1865. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

- ENG-218 American Literature II

Prerequisites:
English Majors and Minors or Instructor Permission

Credits:
4.00

Description:
Study of major American writing from 1865 through the present. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

- ENG-347 20th Century Female Gothic

Prerequisites:
WRI-102 or WRI-H103
**Credits:**
4.00

**Description:**
This course focuses on Gothic literature by women writers, from its origins in the 18th century to the present, focusing primarily on 20th century writers. The novels, short stories, and films we will discuss involve haunted houses, secret chambers, madness, and other Gothic tropes. Writers to be studied will include Charlotte Bronte, Daphne du Maurier, Shirley Jackson, Jean Rhys, Angela Carter, and others.

— **ENG-356 Whitman and Dickinson**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
An investigation of the lives and works of two of nineteenth-century America's greatest and most original poets. Topics will include types of poetic language and formal structure, the work of the poetic imagination in transforming observations of the world into art, and the ways in which poets process the idea of death and the reality of war. Finally, this course examines Whitman and Dickinson's impact on American popular culture as well as on the writings of modern poets and literary critics.

— **ENG-358 Women Writing the American West**

**Prerequisites:**
Take WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
Study of 19th and 20th century writing on the American West by American women in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes.
provide the basis for the study of the gendering of the "frontier" and literature of the West by American women authors.

- **ENG-361 Contemporary American Fiction**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  The course will cover major works of American fiction from the period between the end of the American war in Vietnam and the present. The course will emphasize fiction reflecting America's cultural diversity and current trends in fiction.

- **ENG-362 Asian-American Literature**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

- **ENG-388 Utopias and Dystopias**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
This course follows the spirit of utopian experimentation as it travels through the linguistic patterns and imaginative conditions of brave new worlds in literature. We will consider how utopian thinking allows writers to take creative license with political systems, social relations, gender roles, and racial identities, and to blur dividing lines between nature, technology, and culture as well as between Earth and the cosmos. Our readings will balance such foundational texts as Plato's Republic and More's Utopia with revolutionary works from the nineteenth through the twenty-first centuries, and conjure utopian dreams as well as dystopian worlds gone wrong. Selected works of literary criticism and films will also be included.

- **ENG-395 Rhetoric and Memoir**

  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  This course examines the rhetoric of memoirs written primarily by international figures who seek to use personal stories to shape readers’ perspectives on political issues. After a brief introduction to rhetorical theory and to the genre of memoir, this course will examine contemporary memoirs that address such issues as racism, sexism, religious extremism, war, and genocide.

- **ENG-410 From Pagan Reason to Christian Revelation**

  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  A survey of major works of literature and thought crucial to the transformation of pagan models of reason to Christian systems of belief, including works by Plato and Plotinus, St. Augustine and Dante. Of central concern is the changing conception of love, from Eros to Agape. Note: This course is cross-listed with HST 339.
- **FR-216 Masterpieces of French and Francophone Literature in English Translation**  
  **Credits:** 4.00  
  **Description:** Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

- **FR-309 Survey of French Literature I**  
  **Prerequisites:** FR 202 or Instructors permission  
  **Credits:** 4.00  
  **Description:** Analyzes and discusses canonical works of French literature from medieval times to the eighteenth century.

- **FR-310 Survey of French Literature II**  
  **Prerequisites:** FR-202 or instructor's permission  
  **Credits:** 4.00  
  **Description:** Study, analyze and discuss canonical works of French-language literature from the nineteenth through the twenty-first centuries, as they relate to important events in the art, culture, and history of the Francophone world.

- **FR-318 Face in the Mirror: Writing & Reflecting the Self in French**  
  **Prerequisites:**
FR-205 and FR-305 or Instructor's consent

Credits:
4.00

Description:
Examines literature in the French language focusing on memoir, essay, and autobiography. Read authors such as, Montaigne, Rousseau, Lamartine, Colette, Duras, Beauvoir, Le, Chamoiseau, Djebar, Conde, Ernaux, Genet, and Satrapi. Develops an appreciation of the differences between autobiography and autofiction. Explores the question of truth and the fallibility of memory.

- PHIL-424 Philosophy and Literature: Feodor Dostoevsky and the Great Philosophical Novel

Credits:
4.00

Description:
A study of the nineteenth-century Russian novelist Feodor Dostoevsky and his contribution to world philosophy and literature. Dostoevsky's stories, which weave together philosophical reflections, unique personalities and gripping plots, earned the author numerous superlative titles. Dostoevsky has been praised as a literary genius, a prophetic political thinker, a keen psychologist and an expert on human condition. His work inspired generations of intellectuals, among them prominent European thinkers: Nietzsche, Freud, Heidegger, Sartre, Camus, Hesse and many others. In addition to a detailed study of Dostoevsky's writings the course explores the socio-political, literary, and intellectual contexts in which he developed as a thinker, introducing students to both his opponents and admirers.

- SPAN-426 Latin American Theater and Society

Prerequisites:
SPAN 290 or SPAN 300 or Instructor’s consent. Spanish 302 is strongly recommended

Credits:
4.00
**Description:**
Introduces students to the most important movements and playwrights of Latin American Theater in the 20th and 21st Centuries. Students examine the history of Latin American Theatre since its inception and become familiar with the most important performing centers.

<td>Global Women’s Fiction</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

- **WGS-340 Women on Stage**
  **Credits:**
  4.00

**Description:**
Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht’s alienation effect, and the distinction between performance and the performative.

---

**Ethical & Philosophical Inquiry: 1 course, 4 credits**

**Archive 2018-2019**

Choose one Ethics course from those listed below:

- **PHIL-119 Ethics**
  **Credits:**
  4.00

**Description:**
A systematic introduction to the major thinkers and their positions on the main issues of ethics, such as: What is morality? What are moral values? How should we live our lives? Are there objective, universal, absolute moral standards? If so, what are they, and what is their basis? 1 term - credits. Normally offered every year.

- **PHIL-120 Ethics and Civic Life**
  **Credits:**
  4.00

  **Description:**
  In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.

- **PHIL-123 Social Ethics: The Good Life**
  **Credits:**
  4.00

  **Description:**
  An examination of contemporary Western society, particularly in the United States, in relation to philosophical attempts to define the "good life." Current books that exhibit a philosophical approach towards important contemporary social issues will be discussed, as well as classics in philosophy. Topics may include: civic virtue, consumerism, current events, economic justice, popular culture (film, music, television), religion and secularism, etc. 1 term - 4 credits. Normally offered every year.

- **PHIL-127 Contemporary Moral Issues**
  **Credits:**
  4.00

  **Description:**
  A critical examination of a number of contemporary moral issues such as: abortion, affirmative action, animal rights, capital punishment, cloning, drug legalization, environmental ethics, euthanasia, genetic engineering, gun control, pornography,
same-sex marriage, suicide, war and terrorism, etc. 1 term - 4 credits. Normally offered every year.

Human Behavior & Societies: 1 course, 4 credits
Archive 2018-2019

Choose one Human Behavior and Societies course from those listed below:

Advertising and Public Relations

- ADPR-285 Media and Pop Culture I
  Credits: 4.00
  Description: Examines the influence of media on contemporary society from a social science perspective. Television, radio, film, and print formats are discussed in terms of their persuasive impact on mass culture in the U.S.. The emergence and development of "Rock N Roll" is discussed in unison with the Civil Rights, Student's Rights, and anti-War movements of the period from 1946-1972.

Communication

- CJN-255 Introduction to Media
  Credits: 4.00
  Description:
An introduction to the role of media in contemporary society, focusing on media's influence on cultural, political, and ideological processes. An examination of the historical contexts within which newspapers, radio, television, and new media technologies develop, and how audiences interact with and influence the use of media.

- **CJN-375 Organizational Communication**
  
  **Credits:**
  4.00
  
  **Description:**
  Historical development of the theory of organizations, examination of information flow, network analysis, communication overload and underload, corporate culture, superior-subordinate communications, organizational effectiveness, and change processes.

---

**CUES**

- **UES-101 Environmental Studies**
  
  **Credits:**
  4.00
  
  **Description:**
  Focuses on the natural environment through the lens of social science and humanities. Students will study texts from those disciplines to acquire a deeper understanding of the values and beliefs that underlie environmental issues. Students will investigate the policy-making processes and institutions through which those issues are decided, and the social inequalities in the distribution of environmental problems. Texts to be studied will range from literature, philosophy, and film to policy statements, impact reports, community advocacy materials, and investigative journalism.

---

**Economics**
- **EC-151 Economic & Human Geography**  
  **Credits:**  
  4.00

**Description:**  
The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

**Government**

- **GVT-110 Introduction to American Politics**  
  **Credits:**  
  4.00

**Description:**  
An introduction to the American political system and constitutional framework. Focus will be on the interplay of various institutions (the Presidency, Congress and the Judiciary) in creating public policies. Contemporary public issues will be discussed, as will the role of political theory in shaping American democracy. Attention will be given to the role of the news media, public opinion, political ideology, political parties and interest groups in the American system.

- **GVT-115 Evolution of the Global System**  
  **Credits:**  
  4.00

**Description:**  
Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization.
Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.

**Psychology**

- **PSYCH-114 General Psychology**
  
  **Credits:**
  4.00

  **Description:**
  Surveys core theoretical concepts and contemporary empirical research from the major sub-fields of psychology: physiology; perception; cognition; learning; emotion; motivation; development; personality; psychopathology; psychotherapy; and social behavior. Offered every semester.

- **PSYCH-249 Introduction to Lifespan Development**
  
  **Credits:**
  4.00

  **Description:**
  Examines biological, cognitive, social, and emotional development across the lifespan, with attention to the role of culture and context. Explores how various major theories of development can be used to adaptive and maladaptive behaviors and trajectories and considers. Implications for treatment, prevention, and positive development across the lifespan. Normally offered yearly.

<tbody>
<tr>
<td>SOC-113</td>
<td>Introduction to Sociology</td>
<td>4.00</td>
<td>An introduction to the sociological understanding of human interaction, group process and social structures. Students are introduced to basic concepts, theories and methods of sociological investigation. Majors and minors must pass with a grade of &quot;C&quot; or better.</td>
</tr>
<tr>
<td>SOC-116</td>
<td>Social Justice</td>
<td>4.00</td>
<td>An examination of traditional and contemporary problems associated with major social institutions such as the family, economics, government and education. Social forces related to ethnicity, social class, health and welfare, and urbanization are also included. Alternative remedial measures based on behavioral science theories are discussed. Majors and minors must pass with a grade of &quot;C&quot; or better.</td>
</tr>
<tr>
<td>SOC-221</td>
<td>Environment and Society</td>
<td>4.00</td>
<td>This course will explore our natural environment and human interactions with it. We will connect a critical study of society, power, and inequality to the study of our natural environment and the ways it is altered by human behaviors. We will also consider ways to change our society's relationship with the natural environment to keep our earth clean and safe for human society.</td>
</tr>
<tr>
<td>SOC-223</td>
<td>Families in Contemporary Society</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
Description:
An exploration of the diversity of contemporary families. Comparisons are made between the cultural myths of the "ideal family" and the lived realities. Challenges confronting contemporary families and their implications for social policy are examined in such areas as work/family conflicts, gay and lesbian families, welfare, family violence.

SOC-224 Families in Contemporary Society (Spain)
Credits: 4.00

Description:
Spain has experienced major socio-demographic changes since the mid 1970s. These transformations mainly arise from the new role of women in society and, in particular, women's higher levels of education, work experience, and labor market attachment. The changes in women's labor force participation have occurred in conjunction with a progressive postponement of main family events, such as leaving the parental home, forming a partnership and having children, as well as with a reduction in the family size. Spain is, indeed, characterized as having one of the "lowest low fertility levels" within Western industrialized countries, a pattern that is exacerbating the ongoing process of population aging. This picture partly reflects the conflicting relationship that currently exists between women's labor force participation and the accommodation of family responsibilities: the so-called work/family balance. Ongoing differences among countries have been accounted for by different explanatory factors that involve socio-economic, cultural and social policy dimensions. From a comparative perspective, the course is intended to cover recent debates, controversies, and research on family formation and family dilemmas in contemporary Spain.

SOC-227 Race in American Society
Credits: 4.00

Description:
Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health
care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

**Women’s & Gender Studies**

- WGS-113 Women, Science, and Society

  **Credits:**
  4.00

  **Description:**
  Explores women's lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the female body and eating disorders; women’s health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

**Social & Intellectual History/Visual & Performing Arts Theory & History: 1 course 4 credits Archive 2018-2019**

Choose one course from those listed below:

**American Studies**
- **AMST-101 American History and Culture**
  **Credits:**
  4.00

  **Description:**
  This course offers a basic introduction to American culture and society through the study of American History. The city of Boston and its extraordinary history and institutions will be at the heart of the class and students will frequently visit sites close to the campus. Topics will focus on areas such as the way people from different cultures have understood and misunderstood each other; the evolution of American politics and political institutions; the American Revolution and the founding documents and institutions of the United States; the distinct forms of American religion, American literature and the American economy; slavery and race in American society; the rise of America to world power; the changing role of women; the New Deal and the rise of the modern welfare state; immigration; the development of popular culture; and the meaning of Donald Trump. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-111 Defining America and Americans.

- **AMST-111 Defining America and Americans**
  **Credits:**
  4.00

  **Description:**
  Examines artistic, social, and political imaginings of America and Americans. We will read works by American and foreign observers of the United States to ask how Americans define themselves and how others see them. Course assignments will introduce students to themes, perspectives, and methods in the field of American Studies. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-101 American History and Culture.

---

**Art & Design**

- **ADG-224 History of Graphic Design**
  **Credits:**
4.00

**Description:**
The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various-isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

---

- **ADI-234 History & Theory of Interior Architecture**

**Prerequisites:**
Taken concurrently with ADI S201

**Credits:**
3.00

**Description:**
This course introduces students to the important individuals, ideas and issues that have shaped the direction of contemporary interior design practice in the twentieth century, building upon the historical foundation established by the Ideas of Western Art and History of Furniture and Architecture classes. Intermixing lectures and readings with visits to important local buildings, it discusses the influences of culture, technology, fashion and media upon the work and thinking of the first generation of modern designers, as well as emerging social, moral and environmental imperatives that will form the basis of future practice; cultural identity, interdisciplinary collaboration, sustainability and universal design.

---

### Art History

- **ARH-101 Art History I**

**Credits:**
4.00

**Description:**
Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

– **ARH-102 Art History II**

**Credits:**
4.00

**Description:**
Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

– **ARH-203 Arts of Asia**

**Credits:**
4.00

**Description:**
Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

– **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**

**Credits:**
4.00

**Description:**
Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.
- **ARH-307 Art of the Italian Renaissance**
  **Credits:**
  4.00

  **Description:**
  Examines painting, sculpture and architecture of the 14th, 15th, and 16th centuries in Italy in their cultural context. Artists include Giotto, Masaccio, Donatello, Leonardo da Vinci, Raphael, Michelangelo, and Titian.

- **ARH-308 Art of the Baroque & Rococo**
  **Credits:**
  4.00

  **Description:**
  Explores painting, sculpture and architecture in Italy, Spain and Northern Europe during the 17th and 18th century. Works by Rembrandt, Rubens, Caravaggio, Bernini, Poussin, Velasquez, Watteau, Boucher, Fragonard, Chardin, Hogarth and others considered within their historical contexts.

- **ARH-309 Art of the 19th Century**
  **Credits:**
  4.00

  **Description:**
  Examines Neoclassicism, Romanticism, Realism and Impression in the European painting. Considers works by artists such as David, Ingres, Friedrich, Constable, Delacroix, Goya, Courbet, Millet, Daumier, Manet, Monet, Renoir, Degas, and Cassatt within their historical contexts.

- **ARH-310 Modernism in Art**
  **Credits:**
  4.00

  **Description:**
Examines European painting and sculpture from around 1880 to 1940, including Symbolism, Post-Impressionism, Fauvism, Expressionism, Cubism, Futurism, The Bauhaus, Dada, and Surrealism. Considers works by artists such as Gauguin, Cezanne, Van Gogh, Matisse, Kandinsky, Picasso, Braque, Mondrian, Duchamp, Magritte, Dali, and Ernst within their historical contexts.

- **ARH-311 American Art**
  **Credits:**
  4.00

  **Description:**
  Surveys American painting, sculpture, photography and architecture from the colonial period through WWII. Considers works by artists such as Smibert, Copley, West, Stuart, Whistler, Sargent, Eakins, Homer, Ryder, Bierstadt, Cole, Inness, Sloan, Sullivan, Wright, Hopper, O'Keefe, Dove, Hartley, Bellows, Stieglitz, Weston, and Steichen.

- **ARH-312 Art of the Northern Renaissance**
  **Credits:**
  4.00

  **Description:**
  Examines painting, sculpture, and architecture of the 14th, 15th and 16th centuries in Northern Europe, within their historical context. Topics include the rise of oil painting, the development of woodcut and engraving, the effect of the Reformation on art. Artists include van Eyck, Bosch, Durer, Holbein and Brueghel.

- **ARH-316 Contemporary Art**
  **Credits:**
  4.00

  **Description:**
  Explores European and American art since WWII, including Abstract Expressionism, Colorfield Painting, Pop Art, Minimalism, Neo-Dada, Performance Art, Feminism, Neo-Expressionism and Post-Modernism. Artists include Bacon, Giacometti, Pollock,
Asian Studies

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**
  
  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

Communication

- **CJN-114 Great Works of Journalism**
  
  **Credits:**
  4.00

  **Description:**
  An examination of important contributions to the literature of journalism through an analysis of major writers and news coverage of significant events from a journalistic perspective.

- **CJN-152 Visual Aesthetics**
**English**

- **ENG-123 Great Books of the World I**
  **Credits:**
  4.00

  **Description:**
  Literary masterpieces from ancient times to the Renaissance, including: Homer’s Odyssey, Sophocles’ Oedipus, Virgil’s Aeneid, selections from the Hebrew Bible and the Gospels, and Dante’s Divine Comedy. List may vary at the discretion of the instructor.

- **ENG-124 Great Books of the World II**
  **Credits:**
4.00

**Description:**
This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptimist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

**ENG-266 "Mad Men:" Reading Visual Narratives**

**Credits:**
4.00

**Description:**
The class will consider various theoretical approaches to the TV Series Mad Men beginning with ideas gleaned from the discourse of visual literacy and proceed by applying textual analysis adapted from more traditional modes of literary studies and film analysis. A combination of critical and evaluative critiques will be examined, including book-length studies of the series and essays based on the series' appeal to style, American popular culture, advertising, gender roles, race, and 60s nostalgia. The recent phenomenon of the series recap will serve as a touchstone to the class’s collective viewing of the first two seasons of the series.

**Environmental Science**

**UES-325 Environmental History of the U.S.**

**Credits:**
4.00

**Description:**
Explores how Americans have understood the environment and their relationship to it through analysis of classic environmental texts, historical contexts, and societal perspectives. Analyzes how the environment has changed from pre-colonial times to the present and how these changes have been described through the lens of
environmental history. Themes include differing viewpoints of European and indigenous peoples toward the natural environment, the impacts of the Western expansion on native species and landscapes, the rise of industrialism and its impacts on natural resources and ecosystems, and the rise of 20th century environmentalism.

**French**

- **FR-220 French & Francophone Cinema**
  **Credits:**
  4.00

  **Description:**
  Discusses and deepens understanding of French and Francophone cinema from its origins in the late nineteenth century to the early twenty-first century. Explores early works from France, by the Lumiere Brothers and Georges Melies as well as contemporary films from France, Algeria, Burkina Faso, Canada, Haiti, and Senegal.

- **FR-320 French & Francophone Cinema**
  **Credits:**
  4.00

  **Description:**
  A survey of French and Francophone cinema from the late 19th century to the early 21st century. We will explore early works from France by the Lumiere brothers and George Melies, as well as contemporary films from France and French-speaking countries, such as Algeria, Burkina Faso, Canada, Haiti, Senegal. All papers are written in French, and bi-monthly discussion sessions are conducted in French. Normally offered alternate years. Cultural Diversity B. 4 credits.

4.00

**Description:**
Explores the major themes of human history to 1500. Topics include: hunter-gathering, the migration of humans across the globe, transitions to food production, and the development of complex societies based on agriculture. Major early Eurasian civilizations (China, India, the Middle East, and Europe) are examined (alongside their interactions with Inner Asia and the Arabian Peninsula). So too are Sub-Saharan Africa and the Americas.

**HST-122 World History II**

**Credits:**
4.00

**Description:**
Explores the major themes of human history since 1500. Topics include: the outward expansion of Europe, the Scientific Revolution, the Enlightenment, the Age of Revolutions, the Industrial Revolution, the creation of a great-power dominated global system, the two world wars, the Cold War, the Third World, globalization, climate change, and modern social and political movements.

**HST-149 Empires & Globalization in World History I**

**Credits:**
4.00

**Description:**
This is the first of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include the formation of the medieval trade system, the development of finance and capitalism in the early modern ages, and economic changes prior to the Industrial Revolution. The specific topics may change every year due to new academic developments and publications.

**HST-150 Empires & Globalization in World History II**

**Credits:**
4.00

**Description:**
This is the second of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include state-making, wars, and the rivalry among early modern empires, economic development, the Industrial Revolution and the formation of the global trade system. The specific topics may change every year due to new academic developments and publications.

- **HST-181 American Life to the Civil War Era**

**Credits:**
4.00

**Description:**
Surveys American history from European colonization up through the era of the Civil War. Topics include interactions with Native Americans; slavery; the American Revolution; the founding of a new republic; social and economic developments in the early nineteenth century; expansion; party politics; sectional conflict; the Civil War and Reconstruction.

- **HST-182 American Life Since the Civil War Era**

**Credits:**
4.00

**Description:**
Surveys American history from the 1870s to the present. Topics include the new industrial order; farmer and worker protests; progressivism; America's emergence as a world power; the two World Wars; the Great Depression; the New Deal; the Cold War; post-World War II American society; the Civil rights movement; Vietnam; dissent and counterculture in the 1960s; the women's movement; economic, social, and political changes in the late-twentieth century; America's relationship to a globalized world.
Credits:
4.00

Description:
China, Japan, and Korea - East Asia's critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

- HST-256 Exploring Asia
  Credits:
  4.00
  Description:
  In this course each student will select a topic about Asia that they wish to study. Virtually any topic, to be approved by the professor, is acceptable. The goal will be to write a five to seven page paper about that topic by the end of the course. As a class, we will work together through each step of the process of defining a topic, gathering materials about it, and organizing and reporting the final paper.

- HST-260 Asian Peoples and Cultures
  Credits:
  4.00
  Description:
  Introduces the peoples of Asia and the cultures they have created. Particular attention is paid to the lives of the common people in both historical and contemporary times. By understanding the richness and complexities of daily life in Asia, we will understand the continuities and discontinuities brought on by social, cultural, and economic changes. We will gain an appreciation of our fellow human beings in Asia.

- HST-268 History of the Mediterranean
  Credits:
  4.00
**Description:**
Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

Explores the political, economic, social and cultural development of the urban experience in Europe in the 14-1700s. The history of the most important cities of the continent and Mediterranean, and their common path in business, urbanism, society and imperialism.

- **HST-333 The United States: 1898-1945**
  
  **Credits:**
  4.00

  **Description:**
  Addresses social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also discussed. Topics include: the labor movement, civil rights, woman suffrage, progressivism, the rise of the U.S. as a world power, the First World War, the cultural and social crosscurrents of the nineteen-twenties, Fordism, new developments in advertising and industrial engineering, the Great Depression, the New Deal, and World War II.

- **HST-335 The United States Since 1970**
  
  **Credits:**
  4.00

  **Description:**
  Examines the transformation of America in the decades since the early nineteen-seventies, taking up social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also emphasized. Topics include: Watergate, the aftermath of the Vietnam War, the end of the post-World War II economic boom, the culture wars, the rise of the New Right and decline of the New Deal order, the end of the cold War, America's growing involvement in the Middle East globalization, the impact and aftermath of 9/11, and the Great Recession of the early twenty-first century.

- **HST-357 History of Spain I**
  
  **Credits:**
  4.00
**Description:**
Surveys the most transcendental social, cultural, economic and political developments in the history of Spain from the Neolithic to the Early Modern Period. Examines the broad history of the nation and its peoples and placing emphasis on three central themes: diversity within the Iberian Peninsula, the region's social and geo-political structures, and the transformation of the Old Order of the ancient kingdoms into a modern, nation-state. Topics include: the Pre-historical period, Roman Hispania, the Medieval Kingdoms, Islamic Civilization, the Christian Reconquista, the Catholic Monarchy, Imperial Spain under the Habsburgs, and the Crisis of the Spanish Empire in the 17th century.

- **HST-358 History of Spain II**
  **Credits:**
  4.00
  
  **Description:**
  Examines the political, economic, and social history of Spain from 1700 to the present. Topics include: the War of Spanish Succession; the Bourbon state; the Enlightenment in Spain; the impact of the French Revolution; Spain in the Napoleonic Wars; the rise of liberalism, socialism, and anarchism; the crisis of 1898; the problems of modernization; the Spanish Civil War and the Franco regime; the transition from dictatorship to democracy; Spain's international position today.

- **HST-361 Native America 1832 to Present**
  **Credits:**
  4.00
  
  **Description:**
  Topics will include the Plains Indian Wars; ethnological aspects of Indian tribes; the pitfalls of Indian reform movements; Indian resistance to U.S. assimilation and reservation policies; the Indian New Deal; activism and the American Indian Movement; Indians’ future prospects. Cultural Diversity A

- **HST-383 Boston: Heritage of a City**
  **Prerequisites:**
  One History course
Credits:  
4.00

Description:  
Boston from its foundation in 1630 to its development as a 21st century metropolis. From the Massachusetts Bay Colony, to cradle of the American Revolution, to a Yankee merchant capital, Brahmin cultural center, and immigrant melting pot. When offered in the hybrid format, this course will meet at the regularly-scheduled time, but lectures and other course materials will be available on the course Blackboard site in case you cannot attend.

- HST-385 Slavery & Race in American History  
Credits:  
4.00

Description:  
Topics will be selected from the following: the nature of slavery; the origins of slavery in America and the process of enslavement; the economics of slavery; the American Revolution and slavery; the slave trade; black and white women and the institution of slavery; rebellions of enslaved people; the pro-slavery argument; racial thought; masters and the culture of the South; the movement to abolish slavery; the literature of slavery; the Civil War and the end of slavery; Reconstruction; Segregation; the Civil Rights Movement; race and racism in contemporary America.

- HST-394 Slavery in Film, Literature and History  
Credits:  
4.00

Description:  
A seminar on slavery in the United States as depicted in history, literature, and film. Topics may include resistance to slavery, honor, the attack on slavery, the cultural and social worlds of masters and enslaved people, the thought of masters and enslaved people, women and slavery, and/or slavery as an economic institution.

- HST-414 Nazi Germany  
Credits:  

4.00

**Description:**
Examines German and European preconditions; the Versailles Treaty and the failure of the Weimar Republic; Hitler's ideas, collaborators and institutions; Nazi foreign and domestic policy; World War II and the concentration camps.

---

- **HST-426 Politics and Culture in Europe, 1919-1939**

**Credits:**
4.00

**Description:**
Explores the social and political development of European society between the two world wars, primarily through the literature, art, and films of the period. Topics include: the dissolution of pre-1914 middle class society; deviance and sexuality in the 1920s; the role of decadence in art and the Fascist response to deviance in life and art; women, workers, and the new technology; the rise of Fascism; political engagement and polarization throughout European society in the face of economic and social crisis.

---

- **HST-483 Death, Disease, Healing-U.S. History**

**Credits:**
4.00

**Description:**
Investigates how Americans have understood and responded to health, illness, and death from the eighteenth century to the present. Examine interactions among patients, healers (orthodox and heterodox), the medical and scientific professions, business, and government. Explore the effects of scientific and technological advancements, industrialization, urbanization, immigration, war, and social movements on the nation's moral and political economies of health, and on evolving ideas about bodily integrity and autonomy, linked to historical relations of gender, race, class, and sexuality.

---

- **HST-489 Germany: Film, Politics, Memory Since 1945**

**Credits:**
4.00

**Description:**
Explores German history since 1945 through film, newsreels and other archival footage, war memorials and museums, novels, published diaries, memoirs, and recent historical scholarship. Topics include the representation, in film and other texts, of: post-war rebuilding; the German Economic Miracle; divided Berlin; 1960s and 70s radical politics; coming to terms since 1945, with Germany's Nazi past and the Holocaust; coming to terms since 1990 with the Stasi and East German past; "Ostalgie" (nostalgia in the 21st century for some aspects of East German socialism); the multi-cultural society that is Germany today, with new Turkish, Greek, Russian, Arab, and even Israeli communities.

**Music History**

- **MUH-101 History of Music I**
  **Credits:**
  4.00

  **Description:**
  Surveys Western music from CE800-1800, from Gregorian to Beethoven; selected major composers, representative masterworks, and the musical styles of the Medieval, Renaissance, Baroque, and Classical periods; links the music to some of the major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.

- **MUH-102 History of Music II**
  **Credits:**
  4.00

  **Description:**
  Surveys Western art music from 1800-present, from Schubert to Jennifer Higdon; selected major composers, representative masterworks, and the musical styles of Romantic, Contemporary, and post-Modern periods; links the music to some of the...
major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.

- **MUH-211 Music of the United States**
  **Credits:**
  4.00

  **Description:**
  Surveys American music from Colonial times to the present; various attempts to create an indigenous musical style; vernacular and art music genres including folk, concert, and religious music, jazz and musical theatre; includes music of Billings, Amy Beach, Ives, Copland, Bernstein, and Libby Larsen. Normally offered yearly.

- **MUH-212 Popular Music in the United States**
  **Credits:**
  4.00

  **Description:**
  Covers various popular music styles that emerged in America from 1850 to the present including minstrelsy, art song, piano music, band music, blues, jazz, country, rock and rap; includes representative musical selections, emphasis the social and cultural factors that foster the emergence and developed of these genres. Normally offered every other year.

- **MUH-221 History of Women in Music**
  **Credits:**
  4.00

  **Description:**
  Surveys music in the lives of women, including composers, performers, producers, mothers, and educators from the Middle Ages to the present; examines issues of gender and control, perspective in historical narrative, and religious and secular traditions that impact the cross-cultural reception of women's music. Normally offered every year.
- **MUH-227 Jazz and Blues**

  **Credits:**
  4.00

  **Description:**
  Follows the evolution of jazz from blues and ragtime through Dixieland, Swing, Bebop, Cool, Latin, Modern, Free, Fusion, and Avant-Garde to Post-modern expressions of the present; the contributions of major soloists, arrangers, composers, leaders, and bands. Normally offered every year.

**Philosophy**

- **PHIL-210 History of Ancient & Medieval Philosophy**

  **Prerequisites:**
  Restricted to PHIL majors and minors, PPE majors, and honors students

  **Credits:**
  4.00

  **Description:**
  The study of philosophical thought from the period of the ancient Greek philosophers through the Medieval thinkers, including such philosophers as Socrates, Plato, Aristotle, Epicurus, Zeno, Parmenides, Pythagoras, Protagoras, Augustine, Aquinas, Anselm, and Abelard. An introductory course designed to equip the student with a well grounded understanding and appreciation of Philosophy. 1 term - 4 credits. Normally offered every year.

- **PHIL-219 Philosophy of Art**

  **Credits:**
  4.00

  **Description:**
"What counts as art?" "What is beauty?" "Are there objective standards of beauty?"
This course examines the nature of aesthetic experience, art, beauty, and creativity. Through the classic and contemporary readings, the students will be introduced to philosophical issues concerning the meaning of art, artistic representation, perceptions of art, interpretation, and criticism. Students will be encouraged to reflect on their own experience of art and explore the relationships among the artist, the audience, the artwork, and the world. 1 term - 4 credits. Normally offered every third year.

- PHIL-250 Social & Political Philosophy
  
  **Credits:**
  4.00

  **Description:**
  An examination of persistent debates in political and social philosophy. Topics covered can include the meaning of property and welfare, the tensions between liberty and equality, censorship and freedom of expression, the relation of church and state, human rights and the common good, the possibility of political education and civic virtue, legitimacy of the state, revolution and counter-revolution, war and problems of ends and means, addressing historic injustices, such as racism, genocide, or sexism, among other topics. Students will read both classic and contemporary writings to address both the historical roots and the contemporary treatment of these questions. 1 term - 4 credits. Normally offered every year.

### Theatre

- THETR-260 Broadway Musicals
  
  **Credits:**
  4.00

  **Description:**
  This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to
shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

</tbody>
</table>
WGS-115 Introduction to Gender Studies

Credits:
4.00

Description:
Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women’s studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

WGS-311 Engendering Entertainment: Feminism and Popular Culture

Credits:
4.00

Description:
Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey’s Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy’s Female Chauvinist Pigs, and Caitlin Moran’s How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

WGS-315 Feminist Thought

Credits:
4.00
**Description:**
Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldua, and Judith Butler.

---

- **WGS-330 Furies to Femi-Nazis: A History of Modern Anti-Feminism**

**Credits:**
4.00

**Description:**
Explore the deep antipathy women have faced at nearly every turn in their struggles for civic and social inclusion. Anti-feminist denials of women's rights have taken the form of attacks on women's nature, bodies, and fitness for public life, tagging them with labels of otherness: opponents of women's rights deem them irrational, unnatural, traitors to society, even sexual deviants. This course will examine the dangers that women allegedly represent to social stability from the Enlightenment to the present day, as well as how women have fought back to assert their rights and independence.

---

- **WGS-335 Queer Narratives**

**Credits:**
4.00

**Description:**
Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's recent memoir, "Redefining Realness", as well as foundational queer theory from...
Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

**Modern Language: 0-2 courses, 0-8 credits Archive 2018-2019**

To fulfill the modern language requirement, a student must earn credit for a course in a language other than English taught at Suffolk at the level of 102 or above. A student may have to complete the prerequisite of 101 before taking 102. A student may test into 102 or higher. The modern language requirement may be waived with proof of proficiency at the 202 level in any qualifying language.
BACHELOR OF FINE ARTS DEGREE (ARCHIVE 2018-2019)

Core Requirements: 14 courses, 53-54 credits Archive 2018-2019

Minimum Total Credits Required for Degree Conferral: 124 credits Archive 2018-2019
First-Year Experience: 2 courses, 6 credits Archive 2018-2019

Please note that not all courses are offered each semester. Students should contact their advisor to learn about current course offerings.

Students with 15+ transfer credits of college or university work are exempt.

Students must attend expanded advising sessions and community meetings in addition to the following courses:

- **ADF-S166 2D/Color**
  
  **Prerequisites:**
  Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

  **Credits:**
  3.00

  **Description:**
  The study of color and design is supportive of every studio discipline and is vital to the understanding of all visual media. This course emphasizes the basic concepts and practices of two-dimensional design and color theory. Students employ an intensive, hands-on approach as they explore and master the elements of design (including line, shape, and value) and the three fundamental properties of color (hue, value, and strength). These skills are used in the construction of formally cohesive compositions, the development of arresting images, and the communication of visual ideas.

Choose one of the following:

- **ADF-S171 CI: Integrated Studio 1**
  
  **Prerequisites:**
Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

- **ADI-S110 Digital Orthographics**

  **Credits:**
  3.00

  **Description:**
  This course will provide students with an understanding of orthographic principles and their importance to spatial thinking and design communication. Students will produce manual drawings in order to manipulate scale. Students will employ Computer Aided Drafting (CAD) software to create measured architectural plans, elevations and sections. The course will introduce students to file management skills and develop proficiency in using cloud based resources. Students will employ virtual workspaces to conduct work in, and out of class. Vector graphic software will also be used to compose work, manipulate technical drawings and illustrate plans and sections for portfolio use.

---

**Seminar for Freshmen: 1 course, 4 credits Archive 2018-2019**

Choose one Seminar for Freshmen course from those listed below:

- **SF-101 Fixing the World- Energy and Water: The Science of Solutions**
Credits: 4.00

Description:
Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- SF-116 Enlightened Insanity
Credits: 4.00

Description:
Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

SF-126 The Boston Theatre Scene: the Inside Experience
Credits:
4.00

Description:
Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston's many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

– SF-132 The Beatles: Here, There & Everywhere

Credits:
4.00

Description:
This seminar will investigate the impact and legacy of the Beatles. The Fab Four deserve our scholarly attention as musical innovators and as cultural avatars of the 1960s, an era that still exerts influence today. We will examine the many ways in which the Beatles rocked the establishment and became defining figures in post-war youth culture. We will also discuss other media (the visual arts, film, fashion, style) and fields of study (mass media, marketing, recording technology, copyright law, English history) using the Beatles as our guides.

– SF-156 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life

Credits:
4.00

Description:
The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.
- **SF-173 Crime in American Society**
  **Credits:**
  4.00

  **Description:**
  Popular beliefs about crime are often inspired by the media and by specific criminological theories. These theories about and media images of crime will be examined in detail, including the "hits" and "misses".

- **SF-174 Tragedy and Literature**
  **Credits:**
  4.00

  **Description:**
  This course will focus on classic works of ancient and modern literature that examine the human condition from a tragic perspective. We will concentrate on close readings from the following texts: Homer’s Iliad, Sophocles’ Antigone, The Bhagavad-Gita, Shakespeare’s Othello, Chekhov’s short stories, and Joyce’s Dubliners.

- **SF-175 War and Apocalypse in Science Fiction**
  **Credits:**
  4.00

  **Description:**
  From some of the earliest examples of what we call science fiction to today’s cutting edge writers, artists, and videographers, the devastation of war and other disasters and their aftermath have loomed large in how the future (and alternative versions of the present) plays out. This course will look at some of the more important issues of future war and post-apocalyptic literature, with a dash of television and film and a soupçon of art.

- **SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**
  **Credits:**
Description:
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

SF-183 Politics, Power and the Media
Credits: 4.00

Description:
Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of "big government", and the concept of a liberal media.

SF-190 Asia in America Fiction and Fact
Credits: 4.00

Description:
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

- **SF-191 Film Adaptation**
  
  **Credits:**
  4.00

  **Description:**
  "Why did they change the ending of the book? The novel is so much better!" We will explore the concept and industry of film adaptation. Students will read novels and watch respective film adaptations to explore how the written word is adapted to the screen; both fiction and non-fiction works will be considered. Also, field trips to past film locations in Boston will be taken to explore why specific settings were chosen for respective situations. Additionally, students will create their own written adaptations of source materials, putting into practice the concepts studied in class.

- **SF-197 Sustainability, Energy, and Technology At Suffolk University**
  
  **Credits:**
  4.00

  **Description:**
  In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids
in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

- **SF-198 Music and the Brain**

  **Credits:**
  4.00

  **Description:**
  What accounts for the power of music to move us so profoundly? This course explores how our brains and music evolved together: "What music can teach us about the brain, what the brain can teach us about music, and what both can teach us about ourselves."

- **SF-199 Unfolding the European Union**

  **Credits:**
  4.00

  **Description:**
  The EU is a powerful political, economic and cultural block that is meant to play a major role, together with the USA and China, in the creation of a new post-crisis world order. The seminar is intended to cover, at a basic but reachable level, the history, the politics, the culture and the functions of the EU in the beginning of the Twentieth Century. An extraordinary experiment of sociopolitical engineering, comparable to that of the United States of America, the EU has been changing the life of an increasing number of Europeans for over 50 years. No American student could afford to ignore the inner structure as well as the particular peculiarities of such inclusive supranational organization in today’s world. Issues as institutional functioning, problems derived from individual state sovereignty, economic coordination to face common challenges, cultural integration, future enlargement, etc. are all indispensable to understand the way in which Europe is changing. But also much more day-to-day issues, such as travel mobility, education exchange programs, citizen’s participation, supranational networks of people in the arts or in business, unified labor market, gender participation, human rights, consumer’s protection, etc. are all in the process of developing a more robust and functional European Citizenship.
- **SF-1127 The Vietnam and Iraq Wars: Polarized Perspectives**
  
  **Credits:** 4.00

  **Description:**
  This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement "just"? To what extent were the methods used by the United States military during each war "just"? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit "the enemies" of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

- **SF-1129 Beacon Hill: Fact, Fiction, and Fantasy**
  
  **Credits:** 4.00

  **Description:**
  The course will explore the physical geography, history, and image in literature, film, and pop culture of Suffolk University's Beacon Hill neighborhood. The purpose and objective of the course is to provide students with a deep knowledge, understanding, and appreciation of Beacon Hill through examination of written and visual sources, and feet-on and eyes-on experience of the public parts of the Hill.

- **SF-1133 Problems and Solutions in Early American History**
  
  **Credits:** 4.00

  **Description:**
  This course will examine four major problems in the early American republic: forming a government; bridging vast distances on the American continent; slavery; international relations. We will explore the various proposed solutions to these problems. Some of the solutions worked well, others were more disastrous than the
initial problem. We will read primary documents pertaining to these issues, and try to imagine how men and women considering the problems might have responded to them. What solutions could be proposed? What solutions would work? What were the political, economic, or social difficulties generated by the problem and by the proposed solutions? In considering the problems, we will also learn how to use the various archives close at hand: the Sawyer Library, the Boston Public Library, the Massachusetts Historical Society, and the Massachusetts State Archives. Students will also post their findings on a class blog, and present their work to one another in class.

---

SF-1134 The Meaning of Life

**Credits:**
4.00

**Description:**
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity's Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

---

SF-1135 Women Warriors: Stories of Captivity, Conversion, and Confession

**Credits:**
4.00

**Description:**
Since the beginning of time, women have been "doing battle" to themselves, while men have gone to battle against others. Whether it is through converting to Christ, yielding to captors in order to survive, or carrying a baby, this course introduces students to the many ways in which, whatever battles they face, women are
warriors; they survive. Utilizing an array of captivity, conversion, and confession narratives by women, and pairing them across the centuries, students will make connections and draw conclusions between early-and mid-19th-century-American and contemporary women. Students will connect, for example, the trials of the 17th-century Puritan captive, Mary Rowlandson, and contemporary hostage, Elizabeth Smart, to explore how women (no matter how different they seem) draw upon unique inner resources to survive.

---

**SF-1141 Classical Civilizations: Pathways to Wisdom**

**Credits:**

4.00

**Description:**

How is it that the knowledge, intelligence, wisdom and values of the Greeks and Romans still educate and edify the world by providing venues towards leading fulfilling and dignified lives? The guiding principles of their respective civilizations rested upon eight pillars: -Humanism: It was recognized that humans have the potential to master their world and live life to the fullest. -The Pursuit of Excellence: To imagine the highest good and strive to attain it. -Self Knowledge: It is imperative to know oneself before seeking to know the world. -Rationalism: Always question, reason and discern truth from falsehood and never consider any matter superficially. -Restless Curiosity: Often the resolution of one issue leads to the revelations of others mysteries and pursuits which compels further investigation. The wise individual makes this a lifelong endeavor. -Love of Freedom: As long as one brings no harm to others, one must be free to live and discover as much as possible. -Individualism: All are unique and, therefore, must recognize individual strengths and identity. -The Practice of Moderation: The prudence of avoiding extremes in personal and social conduct. In this course, students will read two (brief) texts on the Greek and Roman contributions to the world and then will proceed with specific readings which illuminate the eight principles above for achieving the good life.

---

**SF-1143 In the First-Person: Storytelling in the 21st Century**

**Credits:**

4.00

**Description:**
This section of the Seminar for Freshmen will consider the forms, venues, and impacts of narrative nonfiction in contemporary culture. From the exploding popularity of personal essays in the digital age to the living, evolving essays we create on social media, we are constantly narrating and archiving our lives, shaping their content for specific audiences. In doing so, we shape what our experiences mean and represent. In order to analyze the power of narrative nonfiction, we will look at a variety of multimodal texts: essays, podcasts, Instagram and Twitter feeds, stand-up comedy, and storytelling slams, as well historical texts such as the essays of Michel de Montaigne and historical artifacts at the National Archives in Boston. We will also write our own narrative nonfiction, and adapt our first-person stories for listening and viewing audiences, such as the MassMouth story slam and podcasts like This American Life. Additionally, we will practice narrative nonfiction for professional audiences, using storytelling as a way to showcase personal strengths to employers, internship coordinators, and the like.

- **SF-1145 Emergence of Southeast Asia**
  
  **Credits:**
  
  4.00

  **Description:**
  
  Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SF-1146 Fido the Friendly Wolf: A Natural History of Dogs**
  
  **Credits:**
  
  4.00

  **Description:**
  
  This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.
- **SF-1147 Global (In) Security: From ISIS to Ebola**
  
  **Credits:**
  4.00

  **Description:**
  This course reviews the principal features of global and national security as it is currently practiced by tracing the evolution of theories, policies and circumstances whereby current international security is developed. Students will evaluate the nature and origins of war, arms proliferation, military instability, terrorism, genocide, health threats and natural resources depletion.

- **SF-1148 Brave New Worlds**
  
  **Credits:**
  4.00

  **Description:**
  Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

- **SF-1150 Religion in Contemporary Society**
  
  **Credits:**
  4.00

  **Description:**
  This course is design to provide students with an overview of the social settings and cultural meanings of religion in the contemporary world. Topics that will be covered in reading and discussions include the rise of religious fundamentalism, religion and violence, women's and men's religious experiences, new religions, and portrayals of religion in popular films. In addition to the readings, students will observe and experience religious expressions and activities through fieldwork assignments. The emphasis on films and fieldwork reflects my belief that religion is made up of "lived experiences" of actual individuals and communities. In order to understand religion in contemporary society we will make every effort to see (in
person or in film) a wide range of religious activities. The films we will see include some of the following: Leap of Faith, Devil's Playground, Kadosh, Women of Hezbollah, Singing Stream, A Still Small Voice.

- SF-1151 Reproduction and Society

**Credits:**
4.00

**Description:**
This course explores relationships between reproductive health and rights both nationally and internationally. Many of our topics fit into two broad areas: conflicts over the control of childbearing (sterilization abuse, birth control, and abortion) and conflicts over who deserves to be a mother, especially when the mothers in question face social stigma and lack political power. Other topics include safe birth and maternal mortality, breastfeeding, infertility and reproductive technology. We also examine the politics of women's sexual and reproductive autonomy, including the policies that shape women's choices to prevent, achieve, abort, or carry to term a pregnancy. Throughout, we are guided by the following questions: Why is reproduction an important site through which to understand society? How do statuses such as race, class, gender, sexuality and ability influence people's reproductive possibilities? What is the role of the state in shaping these experiences? How have communities supported or resisted efforts at reproductive control? Why is reproductive justice central to these answers?

- SF-1152 The Idea of America: Past, Present, Future

**Credits:**
4.00

**Description:**
A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation's history, from the struggle over slavery to America's contemporary role in the world. Because this course intends to
apply theoretical understanding to real life, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation's philosophical and historical currents.

- **SF-1154 Introduction to Visual Studies**  
  **Credits:** 4.00
  
  **Description:** This seminar provides an introduction to Visual Studies, a relatively new interdisciplinary field that examines how images communicate and the roles that they play in society. Students will apply the concepts and techniques of Visual Studies to analyze sites and signs around Boston, such as advertisements, street signs, fashions, newspaper photographs, buildings, and public spaces. Class projects will increase students' awareness of their visual environment and their ability to critically analyze the visual rhetoric that surrounds us and is often used to manipulate us.

- **SF-1156 Thinking About the Insanity Defense**  
  **Credits:** 4.00
  
  **Description:** This course examines sixteen case examples providing a clear and compelling introduction to one of the most important topics in the relation between public policy and law. This course addresses: the history of the insanity defense; the effects of different standards for determining insanity; the arguments for its retention; abolition, and revision; media and other responses to it; and the controversies around pre and post conviction commitment. The case examples illustrates a variety of outcomes and include individuals who were found not guilty by reason of insanity; found guilty even though mentally ill; and not charged because of mental illness.

- **SF-1158 Global Climate Change**  
  **Credits:** 4.00
**Description:**
Conversation about the weather is considered to be the universal icebreaker. Yesterday's sweltering heat, the storm predicted for this weekend, even long-term climate shifts find their way in our daily conversation. Today, however, such casual conversations have an edge to them, because we are realizing that humans play a role in determining the climate shift. In fact, understanding the human fingerprint in the Arctic tundra melting, or a devastating hurricane, has gone well-beyond small talk to become one of the most important challenges our society faces today, and on that is wedded to geopolitics. To meaningfully participate in any dialogue that addresses this challenge people have to be aware of certain key ideas of Physics and Planetary Science. The aim of this course is to provide you with some of the essential facts and pieces of science underlying such questions. This course will enable you to grasp many of the issues that dominate today's political discourse and to develop an informed opinion (your, not our!) for which you can rationally argue.

— **SF-1160 Individuals and Society in the Zombie Apocalypse**
**Credits:**
4.00

**Description:**
"The Walking Dead" tells viewers that life in the zombie apocalypse requires people to "fight the dead, fear the living." Sociologists want to know why we should fear the living. How do individuals come together and try to recreate society for themselves: either to build community or fight other groups? What role do morals and values have in a society? How does all of this determine life, death, and the struggles people must face? Questions like these will give our class a new view of "The Walking Dead" and can help us to learn more about the society that we live in where so far the dead have remained in the ground.

— **SF-1161 The Playwright and the Stage**
**Credits:**
4.00

**Description:**
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other
activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

- **SF-1162 Space Missions: From Moon to Mars and Beyond**

**Credits:**
4.00

**Description:**
It is hard to believe that only 60 years ago, our only close-up view of a planetary body was that of Earth. We are truly living in the Golden Age of Space Exploration, when a new mission every few years brings us spectacular images from either a neighbor in the solar system or galaxies at the edge of the universe. This course will describe the dozen space missions that changed our view of the universe, ranging from our solar system to the most distant galaxies.

- **SF-1163 Spellbound! Witches, Wizards and Spirits In American Literature**

**Credits:**
4.00

**Description:**
Since the beginning of time and across cultures, people have been interested in the supernatural, the paranormal, and the otherworldly. Often, these phenomena have appeared in the form of witches, wizards, and spirits, whether good or bad, wicked or wonderful. Women who have not fulfilled traditional gender roles have historically been cast as witches or, to use Shakespeare's phrase, as "weird sisters", or, in Donald Trump's recent election parlance, as "nasty women." Men in turn appear as wizards, usually more positively than female witches. Men and women alike also can take the form of spirits or ghosts; even houses can be possessed. What lies beneath the great fascination with the supernatural and the paranormal, with the haunted, the possessed, and the spellbinding? What accounts for the different manifestations of spirits? This course takes students on a tour of witches, wizards, and otherworldly spirits throughout American literary history. Tropes of the witch and the wizard have appeared in literature from the time of Shakespeare (see Macbeth) to the contemporary best-selling Harry Potter series, and hits every
century in between, such as in Anne Hutchinson's Puritan accounts from the 1600s, Nathaniel Hawthorne and Edgar Allan Poe's in the 1800s, The Wizard of Oz in 1900, and John Updike's The Witches of Eastwick in the 20th century. The course offers readings across genre lines-poetry, fiction, non-fiction, young adult fantasy, and drama—and includes excerpts from film and television shows based upon wizards and witches (such as Bewitched, Buffy the Vampire Slayer, and The Vampire Diaries). The course may include a field trip to Salem, MA, as well as possibly the opportunity to see Wicked at the Boston Opera House (if it is renewed through the fall season, 2017).

— SF-1164 Reinventing Europe: Beyond Brexit and Secular Stagnation

Credits: 4.00

Description:
While newspaper headlines focus on the multiple problems Europe is facing today, the evolving adaptation of European nation states and the integration process receive less attention. Brexit and economic crises seem to be synonymous of Europe today, but facts such as the European Union accepting five new members in the coming five years or Europe being the most advance environmental actor or the main international provider of official aid are often ignored by public opinion. This Seminar for Freshman examines the dynamic evolution of the integration process in Europe in the context of globalization. Three sections articulate the main debates and tensions in the interplay between national and supranational institutions and policies. The first part analyzes how eight European countries have forged their national preferences to delineate their level of immersion in the integration process; it later proceeds with the examination of the main historical events in the history of the integration process. The second part explores the functioning of the EU institutions in order to grasp the essence of the complex policy-making in the Europe of 28 members. The third and final section presents the analysis of the main areas of the EU policy making such as agriculture, monetary and economic issues, among others, and observes the main developments in the area of EU external relations.

— SF-1165 History of Boston

Credits: 4.00
**Description:**
This semester we will explore Boston’s history. We will read books, visit historical sites, and you will learn how to do historical research on your own. This course meets the requirement of Humanities and History.

---

- **SF-1166 Cinema-Monde: Global Challenges on Film**

**Credits:**
4.00

**Description:**
This course focuses on French-language films - with subtitles! - that address pressing social issues of the 20th and 21st centuries, such as hunger, female genital mutilation, immigration, racism, economic inequality, genocide, gender, sexuality, colonialism and post-colonialism.

---

- **SF-1167 Fantasy Fiction: Imaginary Worlds**

**Credits:**
4.00

**Description:**
Readers lining up at midnight for the newest Harry Potter book, hundreds of thousands of viewers crashing HBO’s website in their eagerness to watch Game of Thrones: examples of fantasy’s recent popularity are everywhere. This course explores the genre of contemporary fantasy through a historical and critical lens, from the work of J.R.R. Tolkien to the 2015 Nebula Award Winner, Uprooted. We will begin by reading selections from medieval literary texts, including Arthurian legend and Anglo-Saxon epic, to understand the roots of the fantasy genre and consider how these early works have inspired and informed the world-building efforts of later authors. We will also explore fantasy’s newest manifestations across different kinds of media, from big-budget film adaptations to internet fan fictions. Critical questions will include: How do works of fantasy deal with the ethical questions surrounding the categories of "good" and "evil", "monstrosity" and "otherness" How do common fantasy plots such as coming-of-age or quest narratives work to aid in fictional character development and build suspense? How are contemporary anxieties about issues such as gender, race and class explored through the genre of fantasy?
SF-1168 The Real Thing: the Pursuit and Problems Of Authenticity

Credits: 4.00

Description:
This course will focus on the concept of authenticity in American culture, from its origins in the early 19th century to the present. When the advertising gurus of Coca-Cola branded it as "The Real Thing," they were exploiting something powerful: the idea of something real, stripped of any falsity or illusion. Humans have always desired to know the world and others "as they really are," but this desire is particularly strong in the modern world: witness the eagerness to discover one's "true self," cut through the B.S., obtain the genuine article, and "live authentically." In this course we will interrogate this pursuit of the Real Thing. In various ways, the texts we study both embrace authenticity as an ideal and also question its goodness, usefulness, or even its very possibility. We will thus confront a number of interrelated questions: Where does this desire for authenticity come from? What counts as "authenticity," in life and in art? Is authenticity really a virtue to live by? How does it shape artistic and literary expression? Is there even such a thing as "the real you" This course will be divided into three units. In the first unit, "Counterfeiters and Self-Made Men," we will study how a commitment to authenticity arises in antebellum American literature and culture during a time of rapid national expansion and invention. Readings will include texts by Henry David Thoreau, Ralph Waldo Emerson, Herman Melville, and P.T. Barnum. In the second unit, "Authenticity and Contamination," we will consider two major ways in which authenticity becomes idealized around the turn of the 20th century: as artistic ideal set against fears of mass cultural production, and as a cultural ideal set against fears of racial and cultural mixing. Readings will include texts by Ernest Hemingway, Nella Larsen, Jean Toomer, and William Carlos Williams. In Unit Three, "Buying and Selling Authenticity," we will examine how authenticity becomes commodified (associated with products and "lifestyles") in post-WWII American culture. Texts will include works by Andy Warhol, David Foster Wallace, George Saunders, Banksy, and the TV series Mad Men. Final projects will ask students to consider authenticity today: how is the pursuit of the Real Thing affected by technologies of reproduction, by commodification, and by the increasingly virtual world of the 21st century?

SF-1169 Immortality: Real and Imagined

Credits: 4.00
**Description:**
Most of the world's religious traditions have as a part of their doctrines some notion of immortality, rendered both in scriptures as well as iconographically. What precisely is entailed by immortality and why does it constitute such a significant element of so many religious traditions? What can we learn about immortality by investigating various conceptions of the afterlife? Is immortality truly a desirable thing? These questions among others will be examined from the perspectives of philosophy, religion, psychology, anthropology, and biology. Besides being cross-disciplinary, the course will be multi-media in nature. In addition to reading philosophical and religious texts concerning the nature of immortality, students will study various accounts of immortality and the afterlife, examine how the afterlife has been dealt with in (visual) art, literature, and film, and investigate current research into life prolongation (biomedical gerontology).

---

**SF-1170 From Philia to Facebook: the Meaning of Friendship**

**Credits:**
4.00

**Description:**
The thematic focus of this seminar will be friendship. Friendship is one of the most important of human relationships; one that every student in this seminar has already participated in for many years. It shapes who we are and helps determine who we may become. And while it is a universal phenomenon, it has been practiced quite differently at various times and places in human history. And while we all have an intimate, personal and practical knowledge of friendship through our own experiences, sometimes things that are so close and so obvious to us can be hard to see. Over the course of the semester we will inquire into friendship from many different angles, trying to gain both a broader and a deeper understanding than our own individual experience allows. We will look at friendship first through the lens of philosophy, particularly through the foundational text of Aristotle, The Nicomachean Ethics. We will look at other views of friendship from the ancient world, starting in the past to help us see that friendship has not always been thought of the way we think of it now. After this initial foundation is laid, we will examine other writers and thinkers and take up additional topics like friendship in different cultures, friendship and gender, friendship in and through the arts and include an examination of friendship through the lenses of many different academic disciplines to see how other systematic thinkers conceive of friendship. All along we will be comparing and contrasting with our own personal experiences and considering what modern technology, such as social networking sites, has done to
influence friendship, in the way we practice it and the way we conceive it. It is the aim of this class that students not just study different academic points of view, but that they take up the questions and challenges that these thinkers present to them and fully engage with them on a meaningful personal level.

— SF-1171 Living on and Beyond the Hyphen/Latino Writers in the USA

**Credits:**
4.00

**Description:**
Hyphenated-Americans of Latino origin come from many places and backgrounds. Often perceived as a divide, an either/or that separates and distinguishes one ethnic group from another, the hyphen can also be viewed as a link that connects, integrates and facilitates the formation of "new" cultural spaces. Through films and written narratives by and about U.S.A. Latino(a)(x)-Americans, students will examine how individuals who live on the threshold between two languages and cultures embrace the challenge of preserving their own identity and moving beyond stereotypes. Each of the Latino/a/x authors that we will read in this course will describe his/her own experiences living in the U.S.A. By examining their views through our own filtered lens we shall try to answer questions like the following: 1. What role does language have in our definition/understanding of cultural identity? 2. How do individuals move beyond the hyphen and stop seeing themselves as hybrids? 3. How can an individual who does not belong to a marginalized group (i.e. one considered less powerful and secondary) understand and empathize with those who do? 4. How does globalization affect the dichotomies that arise in bi-cultural and multi-cultural communities?

— SF-1172 The United States Mexican Border

**Credits:**
4.00

**Description:**
One hundred and sixty nine years have passed since the Treaty of Guadalupe Hidalgo was signed. It is only fitting to analyze the profound changes that the gain/loss of these territories caused for the citizens of both sides of the border. This course will explore the literature, culture, and history of the United States-Mexican Border and the most pressing problems pertaining to the region. Emphasis will be on contemporary border theater and film. The works of Salcedo, Galindo,
Lopez and others will be studied as well as contemporary films and documentaries such as Alambrista, Senorita Extraviada, The Gatekeeper, Sin Nombre, Wetback: the Undocumented Documentary, Victoria para Chino, Which Way Home, and much more. There are no prerequisites for this course. Though the course in conducted in English, parallel readings in Spanish will be made available to those who wish to read and/or compare the original texts.

SF-1173 Understanding the Vast Sweep of Chinese Culture

Credits:
4.00

Description:
This course is an introduction to both ancient and modern Chinese civilization with a focus on its literature, arts, and 4000 year cultural history. We will see China at its earliest stages through its archaeology and progress to the heights of literary splendor in the Tang and Song Dynasties. Study of select early plays from the Mongol Yuan period will clearly tie into the development of Ming and Qing period fiction. With the fall of imperial China in 1911, the focus of literature changed drastically and we will study how many modern authors were able to draw from a massive wealth of literary resources to help create a new Chinese literature and culture. We will watch several films that will provide a rich visual portrait of the culture. We will read quite a few representative literary and historical works in English translation that will give a great deal of insight into modern China and how we can both relate to and interact with this complex and amazing country. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for students in all majors that wish to gain a deeper understanding of Asian culture.

SF-1176 What Is a Fact?

Credits:
4.00

Description:
What makes a fact a fact? What makes a fact true? At one time, these questions were only asked by epistemologists and postmodernists, but with the rise of fake news and the discourses surrounding it, these questions are relevant to everyone. Understanding facts is also essential to college students, who must learn to use reliable sources in order to create credible work. In this class, we will examine works
of literature, art, science, and history that interrogate how facts are created and how we determine their truth value. Texts will include podcasts, novels and book-length studies of memory and theory of mind (the study of how we understand what others are thinking). We will also utilize the resources of Boston and Suffolk University; we will visit the WBUR NPR newsroom, a local museum, and learn about the legal definition of "truth" from a representative of the law school. By analyzing these texts, participating in these experiences, and completing a series of assignments that ask students to think critically and creatively, this class seeks to understand how we create facts, and why we need them.

- **SF-1177 Revolutions in Thought**

**Credits:**
4.00

**Description:**
The course will consider major changes in thought that revolutionized the cultures and societies in which they were embedded. Topics include the rise of monotheistic religions; the American Revolution; the recognition of slavery as a moral evil; the idea of women's equality; Freudianism; Darwinism; Marxism; as well as Einstein and the Theory of Relativity. We will enrich the readings and classroom conversations with visits to museums, churches, historic sites and other locations that reflect some aspect of the revolutionary changes that are our focus.

Students in the CAS Honors Program should choose one Seminar for Freshmen course from those listed below:

- **SF-H101 Fixing the World- Energy and Water: The Science of Solutions**

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-H116 Enlightened Insanity**

**Prerequisites:**
CAS Honors students only.

**Credits:**
4.00

**Description:**
Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

- **SF-H178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**
Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

SF-H182 Heroes, Antiheroes and Outsiders: Reading the Graphic Novel

Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
How is it that "comics", a genre often viewed as entertainment for children and adolescents, has become one of the most exciting forms of narrative and visual art? To answer this question, this seminar will examine a range of graphic novels, from those that celebrate their origins in superhero comics, such as Alan Moore’s Watchmen, to those that treat subjects not usually considered proper to the comics genre, such as Art Spiegelman’s Maus, about the Holocaust, and Alison Bechdel’s Fun Home, about the complexities of sexual identity. As we read these works, we will look at how the combination of words and still images makes the graphic novel a unique storytelling form, as well as how artists and writers push the envelope to create new styles and challenge our expectations. In addition to class discussions and writing assignments, we will take a field trip to the Museum of Fine Arts and create a collaborative group graphic novel step-by-step over the course of the semester (all abilities welcome).
SF-H197 Sustainability, Energy, and Technology At Suffolk University

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

---

SF-H1134 The Meaning of Life

**Prerequisites:**
CAS honors students only.

**Credits:**
4.00

**Description:**
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity's Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/
- SF-H1146 Fido the Friendly Wolf: A Natural History of Dogs
  **Prerequisites:**
  CAS Honors students only

  **Credits:**
  4.00

  **Description:**
  This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

- SF-H1148 Brave New Worlds
  **Prerequisites:**
  Restricted to CAS Honors students

  **Credits:**
  4.00

  **Description:**
  Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

- SF-H1161 The Playwright and the Stage
  **Prerequisites:**
  CAS Honors students only

  **Credits:**
  4.00

  **Description:**
  //
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

**First-Year Writing: 2 courses, 8 credits Archive 2018-2019**

- **WRI-101 First Year Writing I**
  **Credits:**
  4.00

  **Description:**
  Study and practice of the writing process and revision in terms of expository writing modes for an academic audience.

- **WRI-102 First Year Writing II**
  **Prerequisites:**
  WRI-101 or ENG-099 with at least a B and ENG-PO99 with a P or WRI-H103

  **Credits:**
  4.00

  **Description:**
  Study and practice of argumentative and research writing through further work with writing process and revision and the critical reading of a variety of texts.
A student may be assigned to other writing courses or may be invited to take WRI-H103. Students not eligible for direct entry into WRI-101 will be required to complete one additional pathway course. Depending on eligibility, students who are assigned one additional pathway course must either complete WRI-100 or WRI-100+ prior to enrolling in WRI-101.

- **WRI-100 Developmental Writing I**
  
  **Credits:**
  4.00

  **Description:**
  This course affords students extended practice with persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. Students who are placed into WRI-100 must complete the course with a C in order to continue on to WRI-101.

- **WRI-100+ Developmental Writing - Tutorial Section**
  
  **Credits:**
  4.00

  **Description:**
  This course affords students extended practice with persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. WRI-100+ sections require students to meet with their instructors once per week for a thirty-minute, one-to-one tutorial session, to be scheduled by the instructor with each individual student.

- **WRI-H103 Advanced First Year Writing**
  
  **Prerequisites:**
  By Invitation Only.

  **Credits:**
  4.00
Description:
This course is by invitation only and reserved for incoming Suffolk students with high admission scores. Advanced study and practice of writing process, revision, and research, based on close readings of a variety of texts. Fall semester only.

Creativity & Innovation: 1 course, 4 credits Archive 2018-2019

In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk and support divergent thinking. In the process, they will become more confident life-long learners.

The Creativity & Innovation requirement is satisfied by completion of the BFA Foundation Studies requirement of ADF-S171 or ADF-S172.

ADF-S171 CI: Integrated Studio I
Prerequisites:
Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

Credits:
3.00

Description:
This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

ADF-S172 CI: Integrated Studio II
Prerequisites:
ADF S101; Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.

---

**Math: 1 course, 4 credits Archive 2018-2019**

Choose one Math course from those listed below:

- **MATH-128 Math for the Modern World**

**Prerequisites:**
MATH level 2, or Mathshop, or MATH-104

**Credits:**
4.00

**Description:**
From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem solving in contemporary life and work. It uses a minimal amount of algebra and
focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)

MATH-130 Topics in Finite Mathematics
Prerequisites:
MATH-104, or MATH-121, or MATH level 3

Credits:
4.00

Description:
Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments, Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.

MATH-134 Calculus for Management & Social Sciences
Prerequisites:
MATH-104, MATH-121 or MATH level 4

Credits:
4.00

Description:
A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, limits and continuity, derivatives, differentiation rules, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, and area measurements. This
course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester.

- **MATH-164 Calculus 1 Bridge With Trigonometry**
  **Prerequisites:**
  Permission of Instructor

  **Credits:**
  4.00

  **Description:**
  This course provides an alternative to MATH 165 (Calculus I) for those students who have taken MATH 134 (Calculus for Management and Social Sciences) but who do not have the trigonometric precalculus prerequisite (such as MATH 121) for MATH 165. In other words, the sequence MATH 134 / MATH 164 serves as an alternative to the sequence MATH 121 / MATH 165, and similarly prepares students to take MATH 166 (Calculus II). The course includes a thorough review of trigonometry and other precalculus topics. Aspects of limits and differentiation which students have already seen in MATH 134 are presented briefly, but in most cases with more emphasis on conceptual understanding, and often illustrated using more complicated examples. New calculus topics (i.e. not covered in MATH 134) include one-sided limits, special trigonometric limits, differentiability, derivatives of trigonometric functions and their inverses, derivatives of general inverse functions, logarithmic and implicit differentiation, related rates, L'Hopital's rule, intermediate values theorem, Rolle's theorem, mean values theorem, Newton's method, and linearization. 4 lecture hours plus 1 recitation session each week. Normally offered in fall.

- **MATH-165 Calculus I**
  **Prerequisites:**
  MATH-121 with a minimum grade of C, MATH-075, or MATH level 5

  **Credits:**
  4.00

  **Description:**
Functions, limits and continuity, squeeze theorem, limits at infinity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; derivatives of other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); applications of the derivative (implicit differentiation, related rates, optimization, differentials, curve sketching, L'Hopital's rule); anti-derivatives; indefinite integrals; Fundamental Theorem; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

- **MATH-166 Calculus II**

**Prerequisites:**
MATH-164 or MATH-165 with a minimum grade of C

**Credits:**
4.00

**Description:**
Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (substitution, by parts, trig integrals, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); improper integrals; infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series (computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

---

**Social, Cultural, & Global Perspectives: 1 course, 3-4 credits Archive 2018-2019**

Courses that fulfill the Creativity and Innovation, Humanities/History, Language, Literature, Quantitative Reasoning, Seminar for Freshmen, Social Science, or VPATH requirements may double count to fulfill the Social, Cultural, and Global Perspectives (SCGP) requirement.
Choose one SCGP course from those listed below:

- **ADPR-217 Gay and Lesbian Studies**
  **Credits:** 4.00
  **Description:**
  Examines the portrayal of homosexuality in political, social, and cultural discourse. Analyzes the role of media and symbolic construction in the shaping of public values, opinions, and social movements.

- **ADPR-219 Rhetoric of Protest and Reform**
  **Credits:** 4.00
  **Description:**
  Examines the persuasive strategies of social reform movements with special emphasis on the civil rights’, women’s rights, and gay rights movements in the United States.

- **ARH-203 Arts of Asia**
  **Credits:** 4.00
  **Description:**
  Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**
  **Credits:** 4.00
  **Description:**
Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

- **ARH-321 Women, Art and Society**
  **Credits:**
  4.00

  **Description:**
  Surveys women artists from the sixteenth century to the present and examines new direction in art-historical scholarship developed by feminist art historians during recent decades.

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**
  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **AS-500 Asian Studies Internship**
  **Credits:**
  4.00

  **Description:**
  Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)
- **BLE-325 Global Business Ethics**  
**Prerequisites:**  
BLE-215, PHIL-119, PHIL-120, PHIL-123 or PHIL-127

**Credits:**  
3.00

**Description:**  
Surveys business ethics as they transcend the diverse perspectives of global business. Explores current global ethics standards and values, ethical challenges, controversies, convergence and trends. Students explore famous global business cases through films, websites and independent research. Emphasizes identification and resolution of global business ethical issues within the context of ethical decision-making and sustainability. Analyzes corporate social responsibility; hence, transforming global business ethics through business.

- **CI-204 Prague: Castles to Barbwire**  
**Prerequisites:**  
At least 24 credits earned.

**Credits:**  
3.00

**Description:**  
Prague offers students a more recent view into history and will serve as a backdrop to learning "Design Thinking." The curriculum will use Czech and Central European cultural features as the inspiration for learning the creative process, skills that can be applied broadly and globally across disciplines. WWII and its fall to Communism left the Czech Republic undamaged. Artists played a vital part in the country’s rise to a Republic during the Velvet Revolution. These dissidents, including writers, actors, artists and musicians were innovators who were the catalyst for change. One could say that creative minds changed this country. This course is designed to demystify the creative process by introducing the creative practice as a disciplined approach to problem solving and innovation requiring research. This one-month study abroad experience will offer a more worldly insight to the significance of developing skills where divergent thinking and risk taking are one of many key tools in learning to generate new ideas. Travel fee covers accommodations, transfers, some meals and cultural visits. Airfare and tuition not included.

| **CJN-301 Documentary Film and the Image of Conflict in the Middle East** | Credits: 4.00  
Description: The course focus is on some of the divisions and conflicts within Israeli society. Students analyze and compare mainstream media discourse to alternative representations in documentary film. Analysis also covers media representation of the Israeli-Palestinian conflict. |
| **CJN-385 Globalization of Media and Telecommunications** | Credits: 4.00  
Description: A critique of the circulation of media goods and ideologies from both a cultural and political/economic perspective. Topics include global Hollywood, the images of Muslim women in transnational media, the information society, and global social movements. |
| **EC-141 Development Economics**           | Credits: 4.00  
Description: Why do so many countries remain so poor? Why have some (e.g. the Asian “tigers”) grown so rapidly? Why have most of the countries of Eastern Europe and the Former Soviet Union been slow to ignite economic growth? These questions are addressed by looking at domestic factors (government policies, resource
endowments) as well as the international environment (mobile investors, international financial institutions). Asks what economic choices these countries face now. Normally offered yearly. Cultural Diversity B

- **EC-151 Economic & Human Geography**

  **Credits:**
  4.00

  **Description:**
  The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

- **EDUC-310 Culturally Responsive Education**

  **Credits:**
  4.00

  **Description:**
  The relationship between cultural diversity and schooling is explored by examining impediments to academic achievement and advancement by minority students, non-native English speaking students, and other under-represented groups. Topics include: standardized testing, identification of inequities, legal and ethical responsibilities of teachers, and promoting equity. Ten pre-practicum observation hours required for teacher candidates.

- **EDUC-315 Strategies for Working With English Learners**

  **Credits:**
  4.00

  **Description:**
This course examines the specific needs and challenges of the various language and cultural groups in schools. Topics include: theories of 1st and 2nd language acquisition, strategies for teaching academic content, modifying instruction in the mainstream classroom, creating classroom cultures that invite all students into learning, the role of advocacy and professional collaboration in ESL, and analysis of policies related to assessment and placement of English Language Learners.

- **ENG-123 Great Books of the World I**
  
  **Credits:**
  4.00

  **Description:**
  Literary masterpieces from ancient times to the Renaissance, including: Homer’s Odyssey, Sophocles’ Oedipus, Virgil’s Aeneid, selections from the Hebrew Bible and the Gospels, and Dante's Divine Comedy. List may vary at the discretion of the instructor.

- **ENG-124 Great Books of the World II**
  
  **Credits:**
  4.00

  **Description:**
  This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptomist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

- **ENG-135 World Literature in English**
  
  **Credits:**
  4.00

  **Description:**
A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester. Cultural Diversity B

- **ENG-216 World Literature in English**

  **Prerequisites:**
  WRI-102 or WRI-103

  **Credits:**
  4.00

  **Description:**
  A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

- **ENG-362 Asian-American Literature**

  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

- **FR-205 The Francophone World**

  **Prerequisites:**
  FR 202 or Instructor's consent
Credits:
4.00

Description:
Explores the francophone world through the study of short stories, print media, and film, by engaging with the rich textured and diverse francophone literary canon. Teaches advance notions of French grammar, write compositions, and the art of conversation related to cultural themes.

- **FR-216 Masterpieces of French and Francophone Literature in English Translation**

Credits:
4.00

Description:
Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

- **GVT-115 Evolution of the Global System**

Credits:
4.00

Description:
Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.
- **GVT-208 Politics / Religion**

  **Credits:**
  4.00

  **Description:**
  This course explores the relationship between politics & religion in the United States. How and why does religion influence politics in the U.S? What does freedom of religion mean in the U.S? Why do some groups today erroneously claim that the U.S. was founded as a "Christian nation”? This course also examines what major world religions say about the status and responsibilities of the state and the roles that minority religious groups (Buddhism, Islam, etc.) play in U.S. politics.

- **GVT-281 Intro to Comparative Politics**

  **Prerequisites:**
  GVT 110, GVT 115, and GVT 120 or consent of instructor; Sophomore status or higher

  **Credits:**
  4.00

  **Description:**
  Introduces various approaches of comparative politics, such as institutionalism, structuralism, political culture, corporatism, state-society relationship, political economy, etc. Applies the different approaches to explain how various factors affect government institutions, sociopolitical and economic development in different societies. An effort is made to include countries from all regions of the world. Normally offered every semester.

- **GVT-359 Hockey, International Development & Politics**

  **Credits:**
  4.00

  **Description:**
  This class examines the way in which national identity, global and regional economics and international development intersect. It uses the professionalization of the sport of hockey and its subsequent spread around the globe as its case. It will look at the rise of the pro game, the way in which it shapes national identity in
the Canadian case, the way in which the pro business model has changed in response to broad socio-economic changes in North America and geo-political shifts around the globe, especially in Eastern Europe and the Former Soviet Union.

- **GVT-467 Comparative Social Movements**

  **Prerequisites:**
  Junior status

  **Credits:**
  4.00

  **Description:**
  How do we explain the appearance or absence of social movements? What social or individual factors explain their development and decline? Who joins social movements? Who does not? Why? What ideas or ideals animate those who do participate? What is it like to be part of a social movement? What effect do they or have they had on politics, power and efforts at social change? These are some of the questions that have traditionally shaped debates over social movements, both domestically and internationally. They will form the analytical core of the work in this course. By critically evaluating several competing schools of thought in social movement theory and history we will attempt to highlight the social forces that have, at varying points in times, facilitated, maintained, as well as blocked the development of social movements in the US and beyond.

- **HST-100 Introduction to Asian Studies: Culture, People, Ideas**

  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, the Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

<td>Modern East Asia</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>
**Description:**
China, Japan, and Korea - East Asia's critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

---

- **HST-252 The Rise of China: Through Films, Media, and History**

  **Credits:**
  4.00

  **Description:**
  Discusses the rise of China as the world’s largest economy and its impact on our life through films, media, and history.

---

- **HST-263 Comparative Race Relations**

  **Credits:**
  4.00

  **Description:**
  Compares and analyzes the history of race and politics in South Africa and the United States from the 17th century to the present. Examines how race as a social and ideological construct influenced and informed political conflicts over land, labor, and social relations in the two countries including slavery, segregation, apartheid, and the struggle to create racial democracies.

---

- **HST-268 History of the Mediterranean**

  **Credits:**
  4.00

  **Description:**
  Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.
- **HST-274 Women in 19th-Century Europe**
  
  **Credits:**
  4.00
  
  **Description:**
  Explores the condition of European women from 1800 to 1914. Readings focus primarily on women's experiences in France and Great Britain. Topics include: the effects of industrialization on the lives of working-class women; working and middle-class women's negotiation of marriage, work, and family life; the rise of feminism, women's greater participation in the public sphere, and conservative reaction to these changes in women's place in society; women and crime; Victorian ideas about female sexuality; the politics of class and gender in nineteenth-century European society.

- **HST-275 Women in 20th-Century Europe**
  
  **Credits:**
  4.00
  
  **Description:**
  Examines the changing place of women in European society since 1900. Topics include: women's suffrage and the political advances of the 1920s and 1930s; the revolution in sexual mores, birth control, and the rise of companionate marriage; women and the consumer economy; the anti-woman policies of Fascist Italy and Germany under National Socialism; liberation of women and retrenchment in the Soviet Union; World War II; feminism, sexual liberation, and women's political engagement since the 1960s; and, throughout the twentieth century, women's continuing negotiation of work and family responsibilities.

- **HST-321 History of Islam**
  
  **Credits:**
  4.00
  
  **Description:**
  Presents a coherent account of the origin and history of Islam since its foundation in Arabia in the seventh century A.D. to the present. Analyzes the terms, events, characteristics, developments, movements, and institutions that have been part of
the shaping of Islam. Ideological challenges and impact of Islam in the world today from both spiritual and political perspectives are examined.

- **HST-371 U.S. Women’s History Colonial to 1865**
  **Credits:**
  4.00

  **Description:**
  Traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism legal status, labor activism and popular culture. With attention to ethnicity, race, class, age, region of residence, disability and sexual orientation, the course focuses primarily on the everyday lives of ordinary women.

- **HST-484 History of the Emotions**
  **Credits:**
  4.00

  **Description:**
  Explores ideas about emotional life from the fields of history, anthropology, sociology, and psychology as well as the evolution of emotion rules and prescriptions, focusing on western Europe and the United States since 1700. In the eighteenth century, emotions were seen as a positive influence on politics and public life, especially during the French Revolution. After the fall of Robespierre, the emotions were banished to the private sphere - so we will read both primary sources and recent scholarship on 19th- and 20th- century ideas about masculinity and femininity, romantic love and marriage, childrearing, and about what parents and children are supposed feel toward each other, how ideas about these subjects have changed over time, and whether our feelings change with them.

- **MUH-223 World Music**
  **Credits:**
  4.00

  **Description:**
Covers topics in folk, traditional, and modern music of Africa, the Middle East, Asia, and Europe in the context of the cultures and lives of the indigenous peoples of those regions; examines how music interacts with the issues of race, gender, class, religion, politics, and social movements. Normally offered every other year.

- **P.AD-201 Social Change**

  **Credits:**
  3.00

  **Description:**
  This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women's movement, environmentalism, and the gay and lesbian movement.

- **P.AD-H201 Honors Social Change**

  **Credits:**
  3.00

  **Description:**
  This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women's movement, environmentalism, and the gay and lesbian movement.

- **PHIL-120 Ethics and Civic Life**

  **Credits:**
  4.00

  **Description:**
  In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.
PHIL-228 Feminist Philosophy

Credits: 4.00

Description: This course is an introduction to the philosophy of feminist thought. Feminist theories of epistemology, metaphysics and morality will be examined as critiques of traditional philosophy. Feminist perspectives and methodologies include radical, liberal, postmodern, as well as more recent trends in ecofeminism. Special emphasis will be placed on explicit and implicit practices of alienation and exclusion as they have unfolded in the "gendering" of thought, truth, and reality. 1 term - 4 credits. Normally offered every third year. Cb

PHIL-229 Eco-Feminism

Prerequisites: PHIL 119, or PHIL 123, or PHIL 127

Credits: 4.00

Description: Examines the political, social, and ecological problems facing us as a global community. Having its roots in feminist theory and deep-ecology, eco-feminism provides a critical framework for ecological responsibility and accountability. Writings from eco-feminist thinkers and environmental activists around the world will be used to highlight the philosophical and political conflicts and challenges, including globalization and loss of biodiversity, global warming, international human rights, the relationship of gender and nature, and modes of redress for eco-justice and sustainable development.

PHIL-261 Eastern Philosophy

Credits: 4.00

Description:
The exposition and critical evaluation of Hinduism, Buddhism, Confucianism, Taoism, and Islam. Special attention is given to foundation principles as well as to the similarities and differences of each of these philosophies to basic ideas in Western philosophy. 1 term - 4 credits. Normally offered alternate years. C b

-- PHIL-262 Buddhism
Credits: 4.00

Description:
An historical survey of Buddhist philosophy. We will explore Buddhist origins, central teachings, devotional and meditational practices, ritual and institutions as developed from classical to modern times. Special attention given to the philosophical diversity of the Buddhist world view. 1 term - 4 credits. Normally offered alternate years. C b

-- PHIL-265 Women in Spirituality
Credits: 4.00

Description:
An exploration into the various dimensions and ideologies concerning the role of the feminine in relation to the Divine. Belief systems, myths and archetypes from ancient Goddess worship to 20th century feminist theology will be examined in terms of the philosophical content and psychological consequences. Special emphasis will be placed on feminist metaphysical structures for understanding consciousness and Reality. Classes will be conducted by means of lectures, primary and secondary texts and class discussions. Normally offered alternate years. Cultural Diversity A

-- PHIL-267 Chinese Philosophy
Credits: 4.00

Description:
A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course then considers Zen Buddhism, which is called Ch'an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.

- **PSYCH-243 Organizational Psychology**
  **Prerequisites:**
  Take PSYCH-114;

  **Credits:**
  4.00

  **Description:**
  Explores the application of psychological theories and principles to organizations and the workplace with attention to the role of culture and context. Topics includes job analysis, recruitment, selection, evaluation, training, retention, and termination. Employee morale, well-being, stress, and hardiness are considered.

- **PSYCH-247 Asian Perspectives on Health and Work**
  **Credits:**
  4.00

  **Description:**
  Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants.

- **RS-111 Introduction to World Religions: Western Traditions**
  **Credits:**
Description:
This course will explore the comparative history and structure of Western religious traditions, broadly understood, and their impact on other world religions, while attempting to recognize the similarities and the differences among them. Traditions to be studied include Greek and Roman religion, the monotheistic faiths (Judaism, Christianity, and Islam, as well as Zoroastrianism, Sikhism and Bahaism). We will also explore the impact of the Western religions on indigenous traditions, such as African religion, Native American religion, and Pacific Island religion. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. 1 term - 4 credits. Normally offered every year.

RS-112 Introduction to World Religions: Eastern Traditions

Credits:
4.00

Description:
This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting to recognize the similarities and the differences among them. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. Normally offered every year. Cultural Diversity B

SIB-550 Global Travel Seminar

Prerequisites:
Please email Hillary Sabbagh at hsabbagh@suffolk.edu to register for a travel seminar.

Credits:
3.00
**Description:**
An in-depth analysis of timely special issues in international business. Specific topics are announced when the course is scheduled.

<tr>
<td>SF-178</td>
<td>Sacred Hoops &amp; Sneaker Pimps: Understanding the American Hoop Dream</td>
<td>4.00</td>
<td>This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.</td>
</tr>
<tr>
<td>SF-190</td>
<td>Asia in America Fiction and Fact</td>
<td>4.00</td>
<td>With a focus on some selected ethnic groups from Asia, &quot;Asia in America&quot; studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted &quot;home&quot; as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.</td>
</tr>
</tbody>
</table>
- **SF-1145 Emergence of Southeast Asia**
  **Credits:** 4.00

  **Description:**
  Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SOC-218 Crime and Law in Indian Country**
  **Credits:** 4.00

  **Description:**
  What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.

- **SOC-227 Race in American Society**
  **Credits:** 4.00

  **Description:**
  Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become...
racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

- **SOC-228 Cultural, Global and Social Perspectives**
  
  **Credits:**
  
  4.00
  
  **Description:**
  Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.

- **SOC-275 Women and Crime**
  
  **Credits:**
  
  4.00
  
  **Description:**
  This course examines the complex relationships between women and crime today. This focus will include women as criminal offenders; women as victims of crime; and women as both offenders and victims. Course materials draw from recent feminist scholarship on these issues in the social sciences. Topics include the causes of women's crime women, drugs, and crime; child abuse and trauma; prostitution and sex trafficking; race, gender and victimization; and feminist social movements against violence. Crimes of violence against women are a central focus in the course.

- **SOC-329 Sociology of Globalization**
  
  **Prerequisites:**
  
  Prerequisite: SOC 113 or SOC 116.
  
  **Credits:**
  
  4.00
Description:
Globalization is shrinking the world. How and why did this happen? This course will explore global change and the global processes which affect key social institutions: culture, the economy and politics. Students will study the processes of globalization and its impact on our lives and people around the globe.

– SOC-341 International Drug Control Policy

Credits:
4.00

Description:
Relying on a simplistic demand or supply explanation of why Americans use/abuse drugs obscures the reality of America’s drug problem, is ineffective as a guide to public policy and has unforeseen, often negative consequences. Drug use is a complex and multi-faceted issue. There are no easy answers. To comprehend the complexity of America's drug problem one needs an understanding of the geography, history, religion, law, economics and international politics of the Middle and Far East, Eastern Europe, Africa, Mexico, and Central and South America. This class will provide this basic understanding without losing sight that the problem we seek to remedy is our own.

– SOC-354 Death and Dying

Credits:
4.00

Description:
An examination of changing definitions of life and death, social factors affecting causes and rates of death, care of the dying and their families, institutionalization, the funeral industry, suicide, crisis intervention, and the impact of technology on the dying process.

– SOC-357 Global Health and Healing

Credits:
4.00

Description:
An examination of how different cultures understand health and illness. Healing approaches from Asia, Africa and the Americas will be explored.

− **SPAN-202 Intermediate Spanish II**

**Prerequisites:**
SPAN 201 or Instructor’s consent.

**Credits:**
4.00

**Description:**
Continues skills development from 201. Students read a collection of short stories, write compositions, develop cultural insights through comparative and contrastive assignments, and practice listening and speaking skills in weekly conversation sessions.

− **SPAN-290 Advanced Composition & Conversation**

**Prerequisites:**
Prerequisite: Spanish 202, 203 or 250 or Instructor’s consent

**Credits:**
4.00

**Description:**
Develops written and oral skills in various contexts and registers. Emphasis on strengthening written skills and learning to speak clearly and persuasively in Spanish. Short texts and audio-visual materials provide the basis for classroom activities which include regularly assigned essays, group discussions and debates.

− **SPAN-300 Intro to Cultural Texts**

**Prerequisites:**
Spanish 202, 203, 250 or Instructor's consent.

**Credits:**
4.00
Description:
Explores a selection of Peninsular and Latin American cultural materials. Primarily examines texts from different literary genres (narrative, drama, essay, and poetry). Develops critical skills required in more advanced Spanish courses, through close readings and textual analysis. Activities include regularly assigned essays, group discussions, and short scene work.

- **SPAN-301 Spanish Culture and Civilization**

**Prerequisites:**
Spanish 202, 203 or 250. Spanish 290 or 300 are strongly recommended.

**Credits:**
4.00

Description:
Examines the civilization and culture of Spain highlighting its historical development and cultural manifestations from pre-historic times to the nineteenth century. Students improve their four skills through activities that include discussions, oral presentations, and writing assignments based on reading and films.

- **SPAN-302 Indigenous and Colonial Latin America**

**Prerequisites:**
Spanish 202, 203 or 250 or Instructor's consent. Span 290 or 300 strongly recommended.

**Credits:**
4.00

Description:
Introduces students to the complexity Latin America by examining its roots in pre-Columbian America and the impact of Spanish exploration and colonization. Places emphasis on cultural, economic, historical, philosophical, political and religious patterns that define the region. Includes class discussions, oral presentations, and writing assignments based on reading and audio-visual material.
- **SPAN-303 Modern and Contemporary Latin America**

**Prerequisites:**
SPAN 202 or 203 or Instructor's consent. SPAN 290 or 300 strongly recommended.

**Credits:**
4.00

**Description:**
Examines the path taken by Latin American and Caribbean countries to build independent nations out of colonial territories highlighting the 19th, 20th, and 21st centuries, ethnic plurality, and cultural complexity in areas such as politics, religion, sociology, economics, customs, music & film. The cultural contributions of Spanish-speaking minorities in the United States are also addressed. Includes class discussions, oral presentations, and writing assignments based on readings and audio-visual material.

- **SPAN-315 Spanish for the Professions**

**Prerequisites:**
SPAN 290 or SPAN 300 or Instructor's consent.

**Credits:**
4.00

**Description:**
Integrates language learning with culture via business context of the Hispanic world. Spanish for banking and finance, marketing and advertising, and international commerce are highlighted. Students increase their cross-cultural understanding and written and oral proficiency in business Spanish through a wide range of assignments.

- **SPAN-390 Introduction to Latin American and Caribbean Literature**

**Prerequisites:**
SPAN 300; SPAN 302 is strongly recommended

**Credits:**
4.00
Description:
Examines authors from Latin America and the Caribbean in their historical and cultural contexts. Reading and class discussions consider the relationship between the writer and society by covering such topics as colonialism, the oral tradition, modernism and the emergence of new narratives in the twentieth century. The Inca Garcilaso, Sor Juana, Carlos Fuentes, Rigoberta Menchu, and Pablo Neruda are among some writers studied.

- **THETR-260 Broadway Musicals**

  **Credits:**
  4.00

  **Description:**
  This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

- **THETR-267 Introduction to Theatre: Contemporary American**

  **Credits:**
  4.00

  **Description:**
  This course provides a formal introduction to the theories and practices strategically used by American theatre artists after the Second World War. Special emphasis is placed on theatre artists exploring issues of cultural identity including works by GLBT, African-American, Asian-American, and Latin American playwrights. These playwrights may include Tony Kushner, Paula Vogel, Suzan-Lori Parks, Adrienne Kennedy, August Wilson, David Henry Hwang, Philip Kan Gotanda, Eduardo Machado, and Melinda Lopez. The course will also provide an introduction to trends in post-modern theatre practices related to emerging work of the auteur director, solo performers, and interdisciplinary collectives. Satisfies a core requirement for Theatre majors. Normally offered alternate years.
- **WGS-111 Women, History, and Culture**

  **Credits:**
  4.00

  **Description:**
  Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-H111 Women, History, & Culture**

  **Prerequisites:**
  At least a 3.3 GPA required.

  **Credits:**
  4.00

  **Description:**
  Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-113 Women, Science, and Society**

  **Credits:**
  4.00
**Description:**
Explores women's lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the female body and eating disorders; women's health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

---

- **WGS-115 Introduction to Gender Studies**

**Credits:**
4.00

**Description:**
Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women's studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

---

- **WGS-235 Gender and Sexuality in Visual Culture**

**Credits:**
4.00

**Description:**
Explores how gender and sexuality are depicted, constructed, and interrogated across a variety of visual mediums, including film, television, and photography. We will pair foundational readings in queer and feminist thought with representations in order to consider how theory and popular culture engage in a constant dialogue. Topics include: the maintenance of norms regarding gender and sexuality; how race, class, and ability complicate our understanding of gender and sexuality; the ways in which sexuality intertwines with other social and political formations; imagining alternative theories and practices in representing gender and sexuality in...
contemporary media culture. Possible texts include theoretical work by Sigmund Freud, Judith Butler, Rosemarie Garland-Thomson, and David Halperin and media such as The Shape of Water (2017), Blade Runner (1982), Queer Eye for the Straight Guy (2003-2007), and Jess Dugan's To Survive on This Shore (2018).

— **WGS-311 Engendering Entertainment: Feminism and Popular Culture**

**Credits:**

4.00

**Description:**

Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

— **WGS-315 Feminist Thought**

**Credits:**

4.00

**Description:**

Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldua, and Judith Butler.
− **WGS-325 Global Women's Fiction**

**Credits:**
4.00

**Description:**
Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

− **WGS-335 Queer Narratives**

**Credits:**
4.00

**Description:**
Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's recent memoir, "Redefining Realness", as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

− **WGS-340 Women on Stage**

**Credits:**
4.00

**Description:**
Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of...
authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht’s alienation effect, and the distinction between performance and the performative.

Science, Technology, & Engineering (STE): 2 courses and corresponding laboratories where applicable, 8 credits Archive 2018-2019

Choose two STE courses (and corresponding laboratory where applicable) from those listed below. Courses do not need to be in a sequence. In the case of a course that is a lecture plus a lab, the student must complete both components to earn credit for the STE requirement.

Some Science division courses may have Math or Computer Science prerequisites; many have other Science prerequisites.

Biology

- BIO-105 Humans and the Evolutionary Perspective
  Prerequisites:
  Non Science Majors Only

  Credits:
  4.00

  Description:
  Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one
of the non laboratory science requirements for the non-science major. This reading
and writing intensive course is a non-laboratory science option for non-science
majors. This course will not fulfill requirement for a major or a minor in Biology.

- **BIO-109 Plants and People**
  **Prerequisites:**
  Non Science Majors Only.

  **Credits:**
  4.00

  **Description:**
  This course focuses on the ancient, intimate, and mutually beneficial relationship
  between humans and plants. We will discuss the basic anatomy, physiology, and
  genetic characteristics of flowering plants and how these characteristics have
  facilitated their use by humans. We will explore the impacts of a wide range of
  plants and their products on human society while considering the evolutionary
  changes that these plants have undergone through artificial selection. We will also
  touch on the synergistic role of fungus and plants in alcohol fermentation. This
course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA
degrees. Non-biology majors only.

- **BIO-111 Introduction to the Cell**
  **Prerequisites:**
  Must take BIO L111 concurrently

  **Credits:**
  3.00

  **Description:**
  Explanation of key biological structures and reactions of the cell. This is an
  introductory course required of all biology majors and minors, and some non-
  biology science majors. This course is not recommended for the non-science
  student.

- **BIO-L111 Introduction to the Cell Laboratory**
**Prerequisites:**
Concurrently with BIO 111

**Credits:**
1.00

**Description:**
Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

---

- **BIO-114 Organismal Biology**

  **Prerequisites:**
  Must take BIO L114 concurrently.

  **Credits:**
  3.00

  **Description:**
  Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

---

- **BIO-L114 Organismal Biology Laboratory**

  **Prerequisites:**
  Must take BIO 114 concurrently

  **Credits:**
  1.00

  **Description:**
  A series of laboratory experiences in evolution, diversity, anatomy and physiology.

---

**BIO-201 Biology’s Big Questions**
**Prerequisites:**
Non Science Majors Only.

**Credits:**
4.00

**Description:**
This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

---

**Chemistry**

- **CHEM-105 Chemical New Product Development**

  **Prerequisites:**
  ENT 101

  **Credits:**
  4.00

  **Description:**
  This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

---

- **CHEM-106 Biotechnology & Its Applications in Medicine, Agriculture, Law**
Credits: 4.00

Description:
Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, short documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.

— CHEM-111 General Chemistry I

Prerequisites:
Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

Credits: 3.00

Description:
Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

— CHEM-L111 General Chemistry Laboratory I

Prerequisites:
MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

Credits: 1.00

Description:
Introduces the basic principles of chemistry through “discovery” laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs,
and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

Computer Science

- **CMPSC-F107 Ants, Rumors and Gridlocks**

  **Prerequisites:**
  Math placement level of 2 or above or any MATH course at the level 100 or above

  **Credits:**
  4.00

  **Description:**
  Do viruses and rumors spread like forest fires? How do ants cooperate? Do spoken languages and biological species evolve in a similar way? "Ants, Rumors, and Gridlocks" exposes students to introductory aspects of computational science by addressing and answering these and many other questions. Students use and modify virtual experiments preprogrammed in the NetLogo programming language to investigate these topics and others in Social Sciences, Biology, and Environmental Science. No prior knowledge of computer programming or NetLogo is required.

Electrical Engineering

- **ECE-288 Measuring the World**

  **Credits:**
  4.00

  **Description:**
The world is addicted to quantifying the essence of everything, from personal IQ, to the speed of a baseball, to our healthiness, or our chances of winning the lottery. Behind most of these numeric values exists a science of measurement. Some of this is referenced to international standards, such as for length, time, weight, or temperature. Others are more arbitrary and subjective, such as ranking Olympic performance in gymnastics, beauty pageants, or popular responses as found in the game show "Family Feud." A third category includes controversial areas, such as measuring whether a person is lying when interrogated, or using hype rather than reality to market products. Sometimes statistics are used to predict sports outcomes, such as in the annual March Madness NCAA basketball brackets. Finally, in a world subject to fraud and deception, it can be essential to distinguish legitimate from counterfeit items, such as in money, art, collectibles, and historical documents. Don't get hoodwinked! This course examines all of these, starting with how measurements have been made throughout history, along with a full deck of entertaining terms used during the ages. This may help you sort out your weight, whether given in pounds, kilos, or stones. Often these terms will provide insights into how people lived in different eras. We will also look at some of the technologies currently available to provide these measurements, and unravel the complexities of various sensors that are used. As we consider the meaning of "accuracy" we may become less naive about how much confidence to ascribe to the results given us. Hovering around all of these measurements should be the question of validity - are they meaningful, useful, or misleading? And the impact they have on society - whether they steer behavior more powerfully than one might originally suspect. Each student will also be given an opportunity to become an "expert" in an area of measurement of personal interest. By the end of the course all students should have gained greater insight into how the world around them is quantified, and whether numbers can provide accurate predictors for our future. Algebra helpful. Basic science background helpful. Curiosity essential!

Engineering Science

- **ENS-103 Introduction to Engineering**

  **Prerequisites:**
  ENS L103 MUST BE TAKEN CONCURRENTLY.

  **Credits:**
  3.00
**Description:**

"This course provides exposure to engineering practice, with particular focus on electrical engineering components such as circuit elements and systems. It seeks to go beyond the mathematics and provide an intuitive appreciation of functional devices. Examples taken from a broad swath of technological history illustrate significant crossroads, decisions, and inventiveness. Emphasis is placed on learning to think as an engineer - assessment of problems, candidate solution tradeoffs, and implementations. Frequent exercises in creative engineering design will be used. Students will be required to design several elementary devices, such as a magnet, a capacitor, a timing device, and a motor, which they will enter in a competition for overall strength, compactness, accuracy, or speed. Sometimes assignments relate to "survival on an island" concerns, such as communication or drinking water. Students also learn about reverse engineering by selecting, building, troubleshooting, and presenting an electronic kit of their choice. A term paper determining the engineering behind a topic of their choice will also be written and presented. On occasion (see ENS L103) there will be team competitions between various smaller groups in the class."

- **ENS-L103 Intro to Engineering Lab**

**Prerequisites:**

Must be taken Concurrently w/ ENS-103

**Credits:**

1.00

**Description:**

The Lab is designed to provide opportunities to gain familiarity with engineering tools. Students will be introduced to parts (e.g. learn the resistor color code), test equipment (multimeters, prototyping trainers, signal generators, and oscilloscopes), and construction techniques (wiring, soldering, troubleshooting). Although it varies from year to year, Class Projects can be built during the Lab sessions. In the past these have included a 25 Watt electric generator, various door lock systems (both mechanical and electronic), and an AM transmitter and receiver (all projects made from scratch). It is likely that 2010-2011 may introduce some robotic creations for a competition. Electronic kits and motors can also be built and serviced in the Lab. There is an adjoining machine shop, which can be utilized (with supervision), for fabricating items. Individual creativity is encouraged, and informal problem solving sessions occasionally occupy lab time. However, the lab is accessible outside of the traditional scheduled time.
Environmental Science

- UES-107 Introduction to Drones
  
  **Prerequisites:**
  UES-L107 must be taken concurrently.

  **Credits:**
  3.00

  **Description:**
  Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration’s Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

- UES-L107 Introduction to Drones Lab
  
  **Prerequisites:**
  UES-107 must be taken concurrently.

  **Credits:**
  1.00

  **Description:**

The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

UES-111 Environmental Science

Prerequisites:
Take UES-L111 concurrently

Credits:
3.00

Description:
Applies the fundamentals of science to environmental issues. Topics include population dynamics and resources, environmental degradation, ecosystems, geologic processes, deforestation, biodiversity, climate change, air, soil, and water resource management, and pollution and risks to health.

UES-L111 Environmental Science Lab

Prerequisites:
Take UES-111 concurrently

Credits:
1.00

Description:
Laboratory exercises are used to illustrate topics covered in UES 111. Field testing and analysis of environmental samples. Field trips may be required.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>UES-121 Science, Art, and the Environment</strong>&lt;br&gt;<strong>Prerequisites:</strong>&lt;br&gt;Take UES-L121 concurrently</td>
<td>Examines art and cultural objects through the lens of the biological, chemical, and physical principles of the materials and processes we use to make them. Includes consideration of factors important in art conservation. Provides an environmental context for the manufacture and use of art materials and the preservation of cultural objects.</td>
</tr>
<tr>
<td><strong>UES-L121 Science, Art, and the Environment Lab</strong>&lt;br&gt;<strong>Prerequisites:</strong>&lt;br&gt;Take UES-121 concurrently</td>
<td>Provides hands-on work with pigments, dyes, and other art materials using the basic principles of science and technology. Students will conduct laboratory experiments that produce art objects and other consumer products. Instruction in safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables, graphs, and graphics. Practice in synthesizing compounds like paints and finishes and in evaluating methods of art conservation.</td>
</tr>
<tr>
<td><strong>UES-225 Geographical Information Science</strong>&lt;br&gt;<strong>Prerequisites:</strong>&lt;br&gt;Take UES-L225 concurrently</td>
<td></td>
</tr>
</tbody>
</table>
Credits: 3.00

Description:
Provides the fundamentals of geographic information science (GIS) including the history of automated mapping. A review of the necessary hardware and software elements used in GIS is presented. Hands-on exercises with computerized mapping software are required.

UES-L225 Geographic Information Science Lab

Prerequisites:
Take UES-225 concurrently

Credits: 1.00

Description:
Required companion computer laboratory to be taken concurrently with UES 225.

UES-270 SL-Understanding Wetlands Through Citizen Science

Credits: 4.00

Description:
In this course students meet community needs by engaging in service-learning outside the classroom. Develops students’ awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps. The beginning of the semester is devoted to understanding of how these vital ecosystems function with topics including wetland hydrology, biogeochemistry, management, and restoration. The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner.

UES-H270 Honors SL Understanding Wetlands Through Citizen Science

Prerequisites:
Honors student or at least 3.3 GPA

Credits: 4.00

Description: In this course students meet community needs by engaging in service-learning outside the classroom. Students’ awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps will be developed through exploration of these vital ecosystems (topics include wetland biology, management, and restoration). The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner where students will be going into the field three times over the course of the semester via pre-arranged private transportation.

Forensic Science

- FS-103 Introduction to Forensic Science
  Prerequisites:
  FS-L103 concurrently

  Credits: 3.00

  Description: Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall

- FS-L103 Introduction to Forensic Science Lab
  Prerequisites:
  FS-103 concurrently

  Credits:
1.00

**Description:**
Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall

---

**Neuroscience**

- **NEUR-101 Intro to Neuroscience**
  
  **Credits:**
  4.00

  **Description:**
  Introduces the field of neuroscience, the study of the organization and function of the nervous system of humans and other animals. Topics include the neuron and neural transmission, the overall function and organization of the nervous system, the development of the brain, neural plasticity, sleep, memory and other higher cognitive functions.

---

**Physics**

- **PHYS-111 College Physics I**

  **Prerequisites:**
  Take MATH-121 or MATH-134 or MATH-165 or permission of Physics department chair; PHYS-L111 taken concurrently

  **Credits:**
  3.00

  **Description:**
Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.

- **PHYS-L111 College Physics Lab I**

**Prerequisites:**
PHYS 111 concurrently

**Credits:**
1.00

**Description:**
Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks and formal reports required.

- **PHYS-151 University Physics I**

**Prerequisites:**
MATH-121 or higher (previously or concurrently) and PHYS L151 concurrently

**Credits:**
3.00

**Description:**
PHYS 151 is the first of three courses (PHYS 151, 152, 153) that comprise the calculus based introductory physics sequence at Suffolk University intended for students majoring in the physical sciences, engineering and mathematics. This course aims to teach basic techniques in physics that fall under the topic of classical mechanics and their application in understanding the natural world. Specific topics include the study of vectors, Newton's laws, rotations, rigid body statics and dynamics, fluid mechanics, simple harmonic motion, mechanical waves, sound and hearing. The student will learn how to analyze physical situations by using simple models, and also how to solve those models and derive useful conclusions from them. This course will show students how experimental results and mathematical
representations are combined to create testable scientific theories, and how the complexities of most real-life physical situations can be reduced to simple problems by identifying the essential physical features and ignoring the rest. The student will learn to distinguish the scientific approach to physical situations from other ways of looking at them, for example, artistic, humanistic, and business.

- **PHYS-L151 University Physics Lab I**
  
  **Prerequisites:**
  MATH 121 or higher (previously or concurrently) PHYS 151 concurrently

  **Credits:**
  1.00

  **Description:**
  The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton’s laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

- **PHYS-152 University Physics II**
  
  **Prerequisites:**
  PHYS-151 and PHYS-L151. Must be taken concurrently with PHYS-L152.

  **Credits:**
  3.00

  **Description:**
  This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss’ law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday's law and AC circuits are discussed. This is followed by Maxwell’s equations, electromagnetic waves, and properties of light.

- **PHYS-L152 University Physics Lab II**
  
  **Prerequisites:**
  PHYS 151 and L151 and PHYS 152 must be taken concurrently
Credits:  
1.00

Description:  
The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday’s law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

---  

**PHYS-153 University Physics III**

Prerequisites:  
MATH-121, MATH-164, or MATH-165; PHYS-151; PHYS-L153 concurrently

Credits:  
3.00

Description:  
This calculus-based course is the introduction of the topics of modern physics. It begins with special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom. Then Schrodinger’s equation is introduced with use of wave functions, particle box, barrier penetration, quantum mechanical tunneling, the Pauli Exclusion principle, the development of the periodic table, and the X-ray spectra. Development of solid state physics with bonding in molecules, band theory of solids and semiconductor behavior. The final topics cover nuclear physics, radioactivity, half-life, nuclear fission and fusion, medical uses of radiation, elementary particle physics and introduction to astrophysics.

---  

**PHYS-L153 University Physics III Lab**

Prerequisites:  
PHYS-153 concurrently

Credits:  
1.00
Description:
The laboratory consists of experiments to illustrate the basic concepts of special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom.

Science

- SCI-103 Environmental Science

Prerequisites:
SCI-L103 must be taken concurrently

Credits:
3.00

Description:
Case study approach to the fundamentals of science applied to environmental degradation, ecosystems, geological processes, population dynamics, deforestation and biodiversity, climate change, ozone depletion, air soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment.

- SCI-L103 Environmental Science Lab

Prerequisites:
Must take SCI-103 concurrently

Credits:
1.00

Description:
Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.
- SCI-108 Introduction to Cancer Care
  **Credits:**
  4.00

  **Description:**
  Introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants.

- SCI-109 SL-Introduction to Community Cancer Care
  **Credits:**
  4.00

  **Description:**
  Students meet community needs by engaging in service-learning outside the classroom. This course introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants. Service-learning is a pedagogy integrating academically relevant service activities that address human and community needs into a course. Students connect knowledge and theory to practice by combining service with reflection in a structured learning environment. Students will engage in service-learning with an underserved community partner in regards to cancer by working directly with cancer patients or by assisting on a project that supports cancer patients.

- SCI-111 Introduction to Astronomy
  **Prerequisites:**
  MATH-128 or higher and SCI-L111 must be taken concurrently.

  **Credits:**
  3.00
### Description:
History of Astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors; space programs, science and technology in society. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations. For non-science majors.

SCI-113 A Habitable Earth Within the Solar System

Credits:
4.00

Description:
This course introduces non-science majors to concepts that are central to making our planet habitable. It presents Earth in context of the solar system with a broad view of global climate change and energy resources in a quest to better understand the workings our planet. This course on Earth and Planetary Science is suitable for students who may have taken their last science and math course several years ago, or are just curious about knowing facts on major issues that pertain to the future of our planet. Together with a reading component, this course aims to give students a flavor of how researchers think, investigate and develop conclusions that directly affect our political and economic future. Topics covered in this course range from the solar system to the study of search for other habitable Earth-like planets, search for extraterrestrial life, and evolution of life on Earth. Other characteristics of this course are heavy use of audio-visual materials often including computer animations and simulations, in-class experiment demonstration, and intensive use of INTERNET-based resources.

SCI-165 Inner Workings of Physics Universe

Credits:
4.00

Description:
About 15 billion years ago, (data indicate) the big bang occurred and the universe was born. With it came physical laws and a spectacular array of consequences that lead to the universe as we know it. This non-lab, 4 credit course explores the inner
workings of the physical universe in terms of the scientific inquiry which lead to Newton's laws, an understanding of energy, waves, light, electricity, atomic structure, chemical reactions, nuclear physics, particle physics, relativity, and the big bang theory. During the course, students will learn to make use of modern resources to access scientific and technical literature to research a scientific topic. They will learn to distinguish between science and technology (e.g. quantum mechanics and nanotechnology, the discovery of the Higgs boson and the large hadron collider that made it possible, etc.) and to understand how the science, technology, and engineering disciplines play a crucial role in recognizing and solving problems of society and the world that we share.

- **SCI-171 The Built World: How Humans Engineer Environments**
  **Credits:**
  4.00
  **Description:**
  The most basic needs of humans have not changed - water, food, and shelter - but the means of meeting these needs has. In this course, we will examine how technology-driven societies operate by studying how cities are built and how they function. Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design), and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.

- **SCI-173 Mapping Our World The Power of Digital Maps**
  **Prerequisites:**
  SCI-L173 must be taken concurrently.
  **Credits:**
  3.00
  **Description:**
Geographic Information Science (GIS) link information (number of fire hydrants on a block) to features on a map (e.g., a point representing street address) that has a designated geographic location (as designated by global coordinates). Unlike paper maps, GIS software allows the production of interactive maps that allows the user to layer data, to indicate spatial patterns, to analyze trends, and to combine different features of the mapped area in novel ways. For example, a business person may wish to use GIS to determine the optimum location of retail outlet (based on the mapped demographics of a neighborhood), while an environmental engineer may use GIS to describe the location of outfalls to see how they correlate to areas of stream pollution. In this course, students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

- **SCI-L173 Mapping Our World Lab**

  **Prerequisites:**
  SCI-173 must be taken concurrently.

  **Credits:**
  1.00

  **Description:**
  This laboratory illustrates concepts and methods taught in SCI 173. In this lab students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

- **SCI-181 Science and Life in the 21st Century**

  **Credits:**
  4.00

  **Description:**
  No longer offered on Boston campus This is a four credit, non-lab, science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.
- **SCI-184 Contemporary Science and Innovation**

  **Credits:**
  4.00

  **Description:**
  This is a 4 credit, project based science course that examines the central scientific problems confronting the 21st century. The course consists of lectures, class discussions, field trips, and in-class hands-on activities designed to familiarize the student with different concepts of the lectures. The current focus is on sustainable energy production. A final team project related to the course topics will be given. This is the version of SCI 183 without a separate lab component. Students who have taken SCI 183, L183 are not allowed to take this course.

- **SCI-201 Physics for Future Presidents**

  **Credits:**
  4.00

  **Description:**
  This course presents a topical introduction to the key principles and concepts of physics in the context of the world events and natural phenomena that confront world leaders and that require informed decisions and responses. Energy, health, counter-terrorism, remote sensing, space programs, nuclear proliferation, and a host of other modern challenges have technological and scientific dimensions, the understanding of which is essential to avoiding disastrous policy decisions. This course considers the application of physics to these societal challenges. The material is covered at a level and pace that a future world leader should be able to handle; the emphasis is on the development of physical reasoning skills, and not on detailed, mathematical problem solving.

- **SCI-210 Earth and Planetary Crystals**

  **Prerequisites:**
  Take SCI-L210 concurrently

  **Credits:**
  3.00
Description:
This course will provide undergraduate students of various disciplines with an introduction to gems and crystals using interactive, evidence-based teaching approaches. Crystalline forms of matter are critical to our existence. Using innovative teaching strategies of in-class hands-on demonstration, supplemented with visuals of crystal details, the course provides students insights into the formation, alteration and unique properties that make crystals invaluable. Topics range from the study of proteins and nucleic acids to the interior of planets. The in-class lectures will provide a basic guide that will serve as a platform for individually catered in-depth study. Therefore, the course is open to advanced students as well, who can pick up higher level of information for discussion and class projects.

---

[SCI-L210 Earth and Planetary Crystals Laboratory]

Prerequisites:
Take SCI-210 concurrently

Credits:
1.00

Description:
This course introduces concepts that are central to understanding crystals, gemstones and other natural materials abundant throughout the solar system. It includes an introduction to carbon-based crystals (diamonds, proteins, viruses and ices) in context with origins of life, geopolitical significance and their applications. This laboratory-based course is an introduction to modern tools and techniques for crystal analysis with a historical context of some of the greatest discoveries in science (DNA, and other nanomaterials). It presents crystals and gems from their visually appealing point of view to their sometimes-dramatic physical characteristics, with a broad view of their formation, occurrence, physics, chemistry and resources perspective.

---

Studies in Literature: 1 course, 4 credits
2018-2019
Choose one Studies in Literature course from those listed below:

- **ENG-113 World Drama I**
  **Credits:** 4.00
  **Description:**
  Survey of drama and theatre as part of world culture from classical Greece through 18th-century China. Normally offered yearly.

- **ENG-114 World Drama II**
  **Credits:** 4.00
  **Description:**
  Survey of drama and theatre as part of world culture from the 19th century to the present.

- **ENG-130 Introduction to Literature**
  **Credits:** 4.00
  **Description:**
  Study of poetry, prose, and drama, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author's craft and relationship to the reader. Offered every semester.

- **ENG-135 World Literature in English**
  **Credits:** 4.00
  **Description:**
A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

- **ENG-141 Studies in British Literature**
  **Credits:**
  4.00

  **Description:**
  Study of poetry, prose, and drama from the British literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author's craft and relationship to the reader. Offered every semester.

- **ENG-142 Studies in American Literature**
  **Credits:**
  4.00

  **Description:**
  Study of poetry, prose, and drama from the American literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author's craft and relationship to the reader. Offered every semester.

- **ENG-151 Introduction to African-American Literature**
  **Credits:**
  4.00

  **Description:**
  Literature has the capacity to record and interrogate history in an imaginative and artistic context. African-American literature is a rich, varied, and complex body of literature that faces our tainted history directly. The authors we will read in this
class examine slavery's long-term psychological and social effects while forging a literary history that is at once a part of and apart from American literary history more generally.

− **ENG-152 Horror Fiction**  
  **Credits:**  
  4.00

  **Description:**  
  This course focuses on the reading and analysis of horror literature and the ways in which horror reflects and represents personal and cultural anxieties. Readings will include both classic and contemporary authors, for example, Edgar Allan Poe, H.P. Lovecraft, Shirley Jackson, Stephen King, and others. Assignments will include analytical essays as well as creative writing.

− **ENG-153 Literature of War**  
  **Credits:**  
  4.00

  **Description:**  
  This course will examine a wide range of writers and film makers who have sought to bridge the gap that exists between those who have experienced war and those who have not. Some stories we will examine are told from an American perspective; some are told from the perspective of soldiers who fought against Americans; and some are told from those who experienced life under U.S. military occupation.

− **ENG-154 Bob Dylan and the Beat Generation**  
  **Credits:**  
  4.00

  **Description:**  
  A study of literary works by the so-called "Beat Generation," the American literary underworld of the late 1950s and 1960s, including major works by the three central figures (Ginsburg, Kerouac, Burroughs) and less central figures (Corso, Snyder, DiPrima, Jones/Baraka) as well as the influence of the Beats on the work of Bob Dylan, the only musician to win the Nobel Prize in Literature.
- **ENG-155 Young Adult Literature**
  
  **Credits:**
  4.00

  **Description:**
  Young Adult Literature’s recent explosion in popularity raises important questions about the stories it tells, the values it promotes, and the audiences it seeks. This course approaches the YA phenomenon as one with deep historical roots as well as contemporary cultural relevance. From nineteenth century classics to current series favorites, literary works focused on young people reframe perennally fresh narratives about coming of age, negotiating personal identity, and navigating a complex moral universe. This course also considers YA literature as part of an evolving network of writers, readers, publishers, critics and filmmakers.

- **ENG-157 Poetry and Religion**
  
  **Credits:**
  4.00

  **Description:**
  This course will use close readings to examine poetry as a heightened form of language seeking to make contact with divine sources of faith. We will consider poems that provide examples of the struggle to attain belief, as well as poems that deny belief. Language as both the grammar of ascent and the locus of descent. The position of human beings in relation to God, or the gods, or the absence of the divine.

- **ENG-158 Nasty Women and Unruly Voices in American Literature**
  
  **Credits:**
  4.00

  **Description:**
  This course takes students on a tour of witches, "nasty women," and other "unruly tongues" or "bitter spirits" throughout American literary history. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Fulfills the Literature Requirement of the CAS Core Curriculum.
- **ENG-159 The Literature of London**

**Credits:**
3.00

**Description:**
For more than a thousand years, the city of London has been a cultural center, the home of playwrights and poets, novelists and critics, theaters and libraries. In this class we will read a wide range of literary works in different genres that take the city of London, and the experience of living or writing there, as central themes. The class will emphasize close reading and literary analysis of London texts, and will also explore contextualizing materials from newspaper articles to music and art. Designed to be taken in tandem with an optional one-credit study abroad trip to London, UK.

- **ENG-161 Writing the American West**

**Credits:**
4.00

**Description:**
Study of 20th century writing on the American West by American women and men in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes provide the basis for the study of "frontier" or western literature by American authors. Fulfills the Literature Requirement of the CAS Core Curriculum.

- **ENG-213 English Literature I**

**Prerequisites:**
English Majors and Minors or Instructor Permission

**Credits:**
4.00

**Description:**
Study of major writers of England from the beginning to the mid-18th century. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.
— **ENG-214 English Literature II**  
**Prerequisites:**  
English Majors and Minors or Instructor Permission

**Credits:**  
4.00

**Description:**  
Study of major English writers from the mid-18th century to the present. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

— **ENG-217 American Literature I**  
**Prerequisites:**  
English Majors and Minors or Instructor Permission

**Credits:**  
4.00

**Description:**  
Study of major American writing from its origins through 1865. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

— **ENG-218 American Literature II**  
**Prerequisites:**  
English Majors and Minors or Instructor Permission

**Credits:**  
4.00

**Description:**  
Study of major American writing from 1865 through the present. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.
- **ENG-347 20th Century Female Gothic**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  This course focuses on Gothic literature by women writers, from its origins in the 18th century to the present, focusing primarily on 20th century writers. The novels, short stories, and films we will discuss involve haunted houses, secret chambers, madness, and other Gothic tropes. Writers to be studied will include Charlotte Bronte, Daphne du Maurier, Shirley Jackson, Jean Rhys, Angela Carter, and others.

- **ENG-356 Whitman and Dickinson**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  An investigation of the lives and works of two of nineteenth-century America's greatest and most original poets. Topics will include types of poetic language and formal structure, the work of the poetic imagination in transforming observations of the world into art, and the ways in which poets process the idea of death and the reality of war. Finally, this course examines Whitman and Dickinson's impact on American popular culture as well as on the writings of modern poets and literary critics.

- **ENG-358 Women Writing the American West**
  **Prerequisites:**
  Take WRI-102 or WRI-H103

  **Credits:**
4.00

**Description:**
Study of 19th and 20th century writing on the American West by American women in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes provide the basis for the study of the gendering of the "frontier" and literature of the West by American women authors.

- **ENG-361 Contemporary American Fiction**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  The course will cover major works of American fiction from the period between the end of the American war in Vietnam and the present. The course will emphasize fiction reflecting America's cultural diversity and current trends in fiction.

- **ENG-362 Asian-American Literature**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

- **ENG-388 Utopias and Dystopias**
  **Prerequisites:**
  WRI-102 or WRI-H103
Credits:  
4.00

Description:  
This course follows the spirit of utopian experimentation as it travels through the linguistic patterns and imaginative conditions of brave new worlds in literature. We will consider how utopian thinking allows writers to take creative license with political systems, social relations, gender roles, and racial identities, and to blur dividing lines between nature, technology, and culture as well as between Earth and the cosmos. Our readings will balance such foundational texts as Plato’s Republic and More’s Utopia with revolutionary works from the nineteenth through the twenty-first centuries, and conjure utopian dreams as well as dystopian worlds gone wrong. Selected works of literary criticism and films will also be included.

- ENG-395 Rhetoric and Memoir  
Prerequisites:  
WRI-102 or WRI-H103

Credits:  
4.00

Description:  
This course examines the rhetoric of memoirs written primarily by international figures who seek to use personal stories to shape readers’ perspectives on political issues. After a brief introduction to rhetorical theory and to the genre of memoir, this course will examine contemporary memoirs that address such issues as racism, sexism, religious extremism, war, and genocide.

- ENG-410 From Pagan Reason to Christian Revelation  
Prerequisites:  
WRI-102 or WRI-H103

Credits:  
4.00

Description:  
...
A survey of major works of literature and thought crucial to the transformation of pagan models of reason to Christian systems of belief, including works by Plato and Plotinus, St. Augustine and Dante. Of central concern is the changing conception of love, from Eros to Agape. Note: This course is cross-listed with HST 339.

- FR-216 Masterpieces of French and Francophone Literature in English Translation
  
  **Credits:**
  4.00

  **Description:**
  Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

- FR-309 Survey of French Literature I
  
  **Prerequisites:**
  FR 202 or Instructors permission

  **Credits:**
  4.00

  **Description:**
  Analyzes and discusses canonical works of French literature from medieval times to the eighteenth century.

- FR-310 Survey of French Literature II
  
  **Prerequisites:**
  FR-202 or instructor's permission

  **Credits:**
  4.00

  **Description:**
Study, analyze and discuss canonical works of French-language literature from the nineteenth through the twenty-first centuries, as they relate to important events in the art, culture, and history of the Francophone world.

- **FR-318 Face in the Mirror: Writing & Reflecting the Self in French**
  
  **Prerequisites:**
  FR-205 and FR-305 or Instructor's consent

  **Credits:**
  4.00

  **Description:**
  Examines literature in the French language focusing on memoir, essay, and autobiography. Read authors such as, Montaigne, Rousseau, Lamartine, Colette, Duras, Beauvoir, Le, Chamoiseau, Djebar, Conde, Ernaux, Genet, and Satrapi. Develops an appreciation of the differences between autobiography and autofiction. Explores the question of truth and the fallibility of memory.

- **PHIL-424 Philosophy and Literature: Feodor Dostoevsky and the Great Philosophical Novel**

  **Credits:**
  4.00

  **Description:**
  A study of the nineteenth-century Russian novelist Feodor Dostoevsky and his contribution to world philosophy and literature. Dostoevsky's stories, which weave together philosophical reflections, unique personalities and gripping plots, earned the author numerous superlative titles. Dostoevsky has been praised as a literary genius, a prophetic political thinker, a keen psychologist and an expert on human condition. His work inspired generations of intellectuals, among them prominent European thinkers: Nietzsche, Freud, Heidegger, Sartre, Camus, Hesse and many others. In addition to a detailed study of Dostoevsky's writings the course explores the socio-political, literary, and intellectual contexts in which he developed as a thinker, introducing students to both his opponents and admirers.

- **SPAN-426 Latin American Theater and Society**
  
  **Prerequisites:**

SPAN 290 or SPAN 300 or Instructor's consent. Spanish 302 is strongly recommended

**Credits:**
4.00

**Description:**
Introduces students to the most important movements and playwrights of Latin American Theater in the 20th and 21st Centuries. Students examine the history of Latin American Theatre since its inception and become familiar with the most important performing centers.

---

- **WGS-211 Heroines, Hotties & Hubris: Adolescent Girl’s Books**

  **Credits:**
  4.00

  **Description:**
  Explores what we can learn from the books that teenage girls read. In addition to a wide array of interesting and complex Young Adult novels targeted to young female readers, students will be exposed to theories of adolescent development, literary criticism, and social theory. Topics include how the dilemmas of girlhood have changed or stayed constant and the urge, so common in books for children and teens, to teach kids how to think and behave.

---

- **WGS-220 Other Worlds, Other Genders: Women and Science Fiction**

  **Credits:**
  4.00

  **Description:**
  Examines through both classic and contemporary science fiction a variety of possibilities for world-reimagining in the realms of gender, sexuality, race, and other forms of difference. Draws on theories of utopian and dystopian discourse, engages with questions of biology and reproduction, and explores colonialism through first-contact and space empire narratives.

---

- **WGS-325 Global Women’s Fiction**
Credits: 4.00

Description: 
Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

WGS-340 Women on Stage
Credits: 4.00

Description: 
Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht's alienation effect, and the distinction between performance and the performative.

Ethical & Philosophical Inquiry: 1 course, 4 credits
Archive 2018-2019

Choose one Ethics course from those listed below:

PHIL-119 Ethics
Credits: 4.00
**Description:**
A systematic introduction to the major thinkers and their positions on the main issues of ethics, such as: What is morality? What are moral values? How should we live our lives? Are there objective, universal, absolute moral standards? If so, what are they, and what is their basis? 1 term - credits. Normally offered every year.

**Human Behavior & Societies: 1 course, 4 credits Archive 2018-2019**

Choose one Human Behavior and Societies course from those listed below:

**Advertising and Public Relations**

- **ADPR-285 Media and Pop Culture I**
  
  **Credits:**
  
  4.00

  **Description:**
  
  Examines the influence of media on contemporary society from a social science perspective. Television, radio, film, and print formats are discussed in terms of their persuasive impact on mass culture in the U.S.. The emergence and development of "Rock N Roll" is discussed in unison with the Civil Rights, Student's Rights, and anti-War movements of the period from 1946-1972.

**Communication**

- **CJN-255 Introduction to Media**
  
  **Credits:**
  
  4.00

  **Description:**
An introduction to the role of media in contemporary society, focusing on media’s influence on cultural, political, and ideological processes. An examination of the historical contexts within which newspapers, radio, television, and new media technologies develop, and how audiences interact with and influence the use of media.

- **CJN-375 Organizational Communication**

  **Credits:**
  4.00

  **Description:**
  Historical development of the theory of organizations, examination of information flow, network analysis, communication overload and underload, corporate culture, superior-subordinate communications, organizational effectiveness, and change processes.

**CUES**

- **UES-101 Environmental Studies**

  **Credits:**
  4.00

  **Description:**
  Focuses on the natural environment through the lens of social science and humanities. Students will study texts from those disciplines to acquire a deeper understanding of the values and beliefs that underlie environmental issues. Students will investigate the policy-making processes and institutions through which those issues are decided, and the social inequalities in the distribution of environmental problems. Texts to be studied will range from literature, philosophy, and film to policy statements, impact reports, community advocacy materials, and investigative journalism.

**Economics**

- **EC-151 Economic & Human Geography**

  **Credits:**
  4.00

  **Description:**
  The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

---

**Government**

- **GVT-110 Introduction to American Politics**

  **Credits:**
  4.00

  **Description:**
  An introduction to the American political system and constitutional framework. Focus will be on the interplay of various institutions (the Presidency, Congress and the Judiciary) in creating public policies. Contemporary public issues will be discussed, as will the role of political theory in shaping American democracy. Attention will be given to the role of the news media, public opinion, political ideology, political parties and interest groups in the American system.

- **GVT-115 Evolution of the Global System**

  **Credits:**
  4.00

  **Description:**
  Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization.
Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.

**Psychology**

- **PSYCH-114 General Psychology**  
  **Credits:**  
  4.00

  **Description:**  
  Surveys core theoretical concepts and contemporary empirical research from the major sub-fields of psychology: physiology; perception; cognition; learning; emotion; motivation; development; personality; psychopathology; psychotherapy; and social behavior. Offered every semester.

- **PSYCH-249 Introduction to Lifespan Development**  
  **Credits:**  
  4.00

  **Description:**  
  Examines biological, cognitive, social, and emotional development across the lifespan, with attention to the role of culture and context. Explores how various major theories of development can be used to adaptive and maladaptive behaviors and trajectories and considers. Implications for treatment, prevention, and positive development across the lifespan. Normally offered yearly.

</tbody>
</table>
Description:
An exploration of the diversity of contemporary families. Comparisons are made between the cultural myths of the "ideal family" and the lived realities. Challenges confronting contemporary families and their implications for social policy are examined in such areas as work/family conflicts, gay and lesbian families, welfare, family violence.

- SOC-224 Families in Contemporary Society (Spain)
Credits:
4.00

Description:
Spain has experienced major socio-demographic changes since the mid 1970s. These transformations mainly arise from the new role of women in society and, in particular, women's higher levels of education, work experience, and labor market attachment. The changes in women's labor force participation have occurred in conjunction with a progressive postponement of main family events, such as leaving the parental home, forming a partnership and having children, as well as with a reduction in the family size. Spain is, indeed, characterized as having one of the "lowest low fertility levels" within Western industrialized countries, a pattern that is exacerbating the ongoing process of population aging. This picture partly reflects the conflicting relationship that currently exists between women's labor force participation and the accommodation of family responsibilities: the so-called work/family balance. Ongoing differences among countries have been accounted for by different explanatory factors that involve socio-economic, cultural and social policy dimensions. From a comparative perspective, the course is intended to cover recent debates, controversies, and research on family formation and family dilemmas in contemporary Spain.

- SOC-227 Race in American Society
Credits:
4.00

Description:
Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health
care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

Women’s & Gender Studies

- WGS-113 Women, Science, and Society

Credits: 4.00

Description:
Explores women’s lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the female body and eating disorders; women’s health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

Social & Intellectual History/Visual & Performing Arts: 1 course, 4 credits Archive 2018-2019

The Social & Intellectual History/Visual & Performing Arts requirement is satisfied by the completion of the BFA Art History requirement.
BACHELOR OF GENERAL STUDIES
(ARCHIVE 2018-2019)

Bachelor of General Studies Archive 2018-2019

The Bachelor of General Studies (BGS) degree is an alternative to the traditional department-centered baccalaureate program. A student follows the core requirements of the Bachelor of Science degree and then takes 44 hours within one of the five interdepartmental clusters -- Humanities, Social Sciences, Life Sciences, Physical Sciences, or Visual Arts -- in place of a single departmental concentration.

The degree is designed principally to meet the needs of transfer students and adult learners returning to college after an absence of several years. The degree allows the student with an eclectic set of transfer credits to earn a bachelor's degree. The BGS is not appropriate for most students planning to go on to graduate or professional study. A student seeking a BGS should consult with the Office of Undergraduate Admission and a department chair in the proposed Interdepartmental Cluster prior to enrolling in this degree program.

Composition of the Interdepartmental Clusters:

**Humanities:**
- Communication & Journalism
- Theatre Arts
- English
- History
- World Languages & Cultural Studies
- Philosophy
- Women's & Gender Studies (courses with a humanities focus)

**Social Sciences:**
- ADPR
- Economics
- Education Studies
- Environmental Studies
- Government
- History
- Psychology
- Sociology
- Women's & Gender Studies (courses with a social science focus)

**Life Sciences:**
- Biology
- Chemistry
- Radiation Science

**Physical Sciences:**
- Chemistry
- Computer Science
- Environmental Science
- Mathematics
- Physics

**Visual Arts:**
- Art Foundation Studies
- Art History
- Fine Arts
- Graphic Design
- Interior Design
BACHELOR OF SCIENCE DEGREE (ARCHIVE 2018-2019)

Academic Catalog Archive 2018-2019

- Core Requirements: 15 courses, 54-56 credits Archive 2018-2019
- Seminar for Freshmen: 1 course, 4 credits Archive 2018-2019
- Creativity & Innovation: 1 course, 3 credits Archive 2018-2019
- Social Cultural and Global Perspectives: 1 course, 3-4 credits Archive 2018-2019
- Studies in Literature: 1 course, 4 credits Archive 2018-2019
- Human Behavior & Societies: 1 course, 4 credits Archive 2018-2019
- Visual & Performing Arts Theory and History: 1 course, 3-4 credits Archive 2018-2019
- First Year Experience: 1 course, 1 credit Archive 2018-2019
- First-Year Writing: 2 courses, 8 credits Archive 2018-2019
- Math: 1 course, 4 credits Archive 2018-2019
- Science, Technology, & Engineering (STE): 2 courses, at least one with a laboratory, 8 credits Archive 2018-2019
- Ethical & Philosophical Inquiry: 1 course, 4 credits Archive 2018-2019
- Social & Intellectual History: 1 course, 4 credits Archive 2018-2019
- Quantitative Analysis: 1 course, 4 credits Archive 2018-2019

Core Requirements: 15 courses, 54-56 credits Archive 2018-2019

Major Requirements Minimum: 8 courses, 32 credits
Complementary Major Requirements, Minor Requirements, and Free Electives: credit varies

Minimum Total Credits Required for Degree Conferral: 126 credits

Note:
Core Requirements may also count toward major if taken at appropriate level.
Some degree programs exceed 126 credits.

**First Year Experience: 1 course, 1 credit Archive 2018-2019**

Students with 15+ transfer credits of college or university work are exempt.

Choose one of the following to be completed during the first semester of matriculation:

- **CAS-101 Strategies of Success**
  
  **Prerequisites:**
  CAS students only. SBS students by special permission.

  **Credits:**
  1.00

  **Description:**
  CAS 101 is a one-credit course that meets once a week and is designed to help you have a successful transition to Suffolk University and our unique urban community. It is also designed to introduce you to the principles and concepts of Oral Communication and Presentation Skills. Through interactive exercises and engaging assignments, you will explore the campus environment and learn about strategies for success as a student. You will present speeches about your research and activities to improve your abilities as a speaker.

- **ADPR-102 Professional Development**
  
  **Prerequisites:**
  ADPR 101

  **Credits:**
  1.00

  **Description:**
In this hands-on experiential course, students examine potential career paths in Advertising, Public Relations, and Social Media, become oriented to the university and the surrounding Boston area, and identify professional resources in Boston that foster career development.

**Seminar for Freshmen: 1 course, 4 credits Archive 2018-2019**

Students with 15+ transfer credits of college or university work are exempt.

Please note that not all courses are offered each semester. Students should contact their advisor to learn about current course offerings.

Choose one Seminar for Freshmen course from those listed below:

- **SF-101 Fixing the World- Energy and Water: The Science of Solutions**
  **Credits:**
  4.00

  **Description:**
  Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs?
Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-116 Enlightened Insanity**
  
  **Credits:**
  4.00
  
  **Description:**
  Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

- **SF-126 The Boston Theatre Scene: the Inside Experience**
  
  **Credits:**
  4.00
  
  **Description:**
  Using the current Boston theatre season as its syllabus, this writing- and analysis-intensive course will explore several plays in production at some of Boston's many professional theatres. We will study the script of four to five plays before attending performances of those works. Students will gain insights on the world of theatre through backstage tours and conversations with theatre professionals such as producers, directors, actors, designers, playwrights, and critics. Students must be available for evening (usually Wednesday) performances. A fee for student-rate tickets will be assessed.

- **SF-132 The Beatles: Here, There & Everywhere**
  
  **Credits:**
  4.00
Description:
This seminar will investigate the impact and legacy of the Beatles. The Fab Four deserve our scholarly attention as musical innovators and as cultural avatars of the 1960s, an era that still exerts influence today. We will examine the many ways in which the Beatles rocked the establishment and became defining figures in post-war youth culture. We will also discuss other media (the visual arts, film, fashion, style) and fields of study (mass media, marketing, recording technology, copyright law, English history) using the Beatles as our guides.

—— SF-156 The Mask Behind the Face: Personas, Personalities, and Perception. Acting in /Out Life
Credits:
4.00

Description:
The theatre has always been a metaphor for life. In modern times life has become theatre. This seminar will confront the idea of real life and the eroding boundary between performers and audience. Students will study the roots of the contemporary obsession with stars and stardom, a mania that began in the 18th century and flourished in the 19th century. We will look at performance studies, performers memoirs, plays, and films that dramatize this dilemma.

—— SF-173 Crime in American Society
Credits:
4.00

Description:
Popular beliefs about crime are often inspired by the media and by specific criminological theories. These theories about and media images of crime will be examined in detail, including the "hits" and "misses".

—— SF-174 Tragedy and Literature
Credits:
4.00

Description:
This course will focus on classic works of ancient and modern literature that examine the human condition from a tragic perspective. We will concentrate on close readings from the following texts: Homer's Iliad, Sophocles' Antigone, The Bhagavad-Gita, Shakespeare's Othello, Chekhov's short stories, and Joyce's Dubliners.

- SF-175 War and Apocalypse in Science Fiction

**Credits:**
4.00

**Description:**
From some of the earliest examples of what we call science fiction to today's cutting edge writers, artists, and videographers, the devastation of war and other disasters and their aftermath have loomed large in how the future (and alternative versions of the present) plays out. This course will look at some of the more important issues of future war and post-apocalyptic literature, with a dash of television and film and a soupçon of art.

- SF-178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream

**Credits:**
4.00

**Description:**
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

- SF-183 Politics, Power and the Media

**Credits:**
4.00
**Description:**
Is there a relationship between accumulated political power and mass media representations? Is news content impacted by existing political power relations? It is the object of this course to critically analyze the role of the mass media within the framework of existing political power relations in the United States. In particular, the course will focus on the role the mass media plays in promoting and reinforcing dominant political practices and ideologies. The course will begin by exploring various theories of the press, notably its function in a democratic society, as well as the concepts of power and propaganda. We will continue with a series of case studies, complemented by secondary sources that highlight how media representations affect the contemporary distribution of political power in the US. Topics of discussion will include the current US war on terrorism, the ongoing health care debate, the public disavowal of "big government", and the concept of a liberal media.

---

- **SF-190 Asia in America Fiction and Fact**

**Credits:**
4.00

**Description:**
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

---

- **SF-191 Film Adaptation**

**Credits:**
4.00
**Description:**
"Why did they change the ending of the book? The novel is so much better!" We will explore the concept and industry of film adaptation. Students will read novels and watch respective film adaptations to explore how the written word is adapted to the screen; both fiction and non-fiction works will be considered. Also, field trips to past film locations in Boston will be taken to explore why specific settings were chosen for respective situations. Additionally, students will create their own written adaptations of source materials, putting into practice the concepts studied in class.

**SF-197 Sustainability, Energy, and Technology At Suffolk University**

**Credits:**
4.00

**Description:**
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

**SF-198 Music and the Brain**

**Credits:**
4.00

**Description:**
What accounts for the power of music to move us so profoundly? This course explores how our brains and music evolved together: "What music can teach us about the brain, what the brain can teach us about music, and what both can teach us about ourselves."

**SF-199 Unfolding the European Union**

**Credits:**
4.00
Description:
The EU is a powerful political, economic and cultural block that is meant to play a major role, together with the USA and China, in the creation of a new post-crisis world order. The seminar is intended to cover, at a basic but reachable level, the history, the politics, the culture and the functions of the EU in the beginning of the Twentieth Century. An extraordinary experiment of sociopolitical engineering, comparable to that of the United States of America, the EU has been changing the life of an increasing number of Europeans for over 50 years. No American student could afford to ignore the inner structure as well as the particular peculiarities of such inclusive supranational organization in today's world. Issues as institutional functioning, problems derived from individual state sovereignty, economic coordination to face common challenges, cultural integration, future enlargement, etc. are all indispensable to understand the way in which Europe is changing. But also much more day-to-day issues, such as travel mobility, education exchange programs, citizen's participation, supranational networks of people in the arts or in business, unified labor market, gender participation, human rights, consumer's protection, etc. are all in the process of developing a more robust and functional European Citizenship.

SF-1127 The Vietnam and Iraq Wars: Polarized Perspectives

Credits:
4.00

Description:
This class will examine some of the many controversies surrounding the Vietnam and Iraq Wars, two conflicts that have been profoundly polarizing for the American people. There are widely divergent perspectives regarding the fundamental questions surrounding each war. Were the reasons for American involvement "just"? To what extent were the methods used by the United States military during each war "just"? To what extent did the media play an appropriate role before, during, and after each war? Did opposition to these wars serve primarily to benefit "the enemies" of the United States or did it constitute a form of patriotism and love of country? This interdisciplinary course will address these and other complex questions by examining the histories, literature, and films (both documentaries and dramatic) that have been produced in response to these wars.

SF-1129 Beacon Hill: Fact, Fiction, and Fantasy

Credits:
4.00

**Description:**
The course will explore the physical geography, history, and image in literature, film, and pop culture of Suffolk University's Beacon Hill neighborhood. The purpose and objective of the course is to provide students with a deep knowledge, understanding, and appreciation of Beacon Hill through examination of written and visual sources, and feet-on and eyes-on experience of the public parts of the Hill.

— **SF-1133 Problems and Solutions in Early American History**

**Credits:**
4.00

**Description:**
This course will examine four major problems in the early American republic: forming a government; bridging vast distances on the American continent; slavery; international relations. We will explore the various proposed solutions to these problems. Some of the solutions worked well, others were more disastrous than the initial problem. We will read primary documents pertaining to these issues, and try to imagine how men and women considering the problems might have responded to them. What solutions could be proposed? What solutions would work? What were the political, economic, or social difficulties generated by the problem and by the proposed solutions? In considering the problems, we will also learn how to use the various archives close at hand: the Sawyer Library, the Boston Public Library, the Massachusetts Historical Society, and the Massachusetts State Archives. Students will also post their findings on a class blog, and present their work to one another in class.

— **SF-1134 The Meaning of Life**

**Credits:**
4.00

**Description:**
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these
questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament's book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity’s Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity's Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

– SF-1135 Women Warriors: Stories of Captivity, Conversion, and Confession

Credits:
4.00

Description:
Since the beginning of time, women have been “doing battle” to themselves, while men have gone to battle against others. Whether it is through converting to Christ, yielding to captors in order to survive, or carrying a baby, this course introduces students to the many ways in which, whatever battles they face, women are warriors; they survive. Utilizing an array of captivity, conversion, and confession narratives by women, and pairing them across the centuries, students will make connections and draw conclusions between early-and mid-19th-century-American and contemporary women. Students will connect, for example, the trials of the 17th-century Puritan captive, Mary Rowlandson, and contemporary hostage, Elizabeth Smart, to explore how women (no matter how different they seem) draw upon unique inner resources to survive.

– SF-1141 Classical Civilizations: Pathways to Wisdom

Credits:
4.00

Description:
How is it that the knowledge, intelligence, wisdom and values of the Greeks and Romans still educate and edify the world by providing venues towards leading fulfilling and dignified lives? The guiding principles of their respective civilizations rested upon eight pillars: -Humanism: It was recognized that humans have the potential to master their world and live life to the fullest. -The Pursuit of Excellence: To imagine the highest good and strive to attain it. -Self Knowledge: It is imperative
to know oneself before seeking to know the world. -Rationalism: Always question, reason and discern truth from falsehood and never consider any matter superficially. -Restless Curiosity: Often the resolution of one issue leads to the revelations of others mysteries and pursuits which compels further investigation. The wise individual makes this a lifelong endeavor. -Love of Freedom: As long as one brings no harm to others, one must be free to live and discover as much as possible. -Individualism: All are unique and, therefore, must recognize individual strengths and identity. -The Practice of Moderation: The prudence of avoiding extremes in personal and social conduct. In this course, students will read two (brief) texts on the Greek and Roman contributions to the world and then will proceed with specific readings which illuminate the eight principles above for achieving the good life.

- **SF-1143 In the First-Person: Storytelling in the 21st Century**

**Credits:**
4.00

**Description:**
This section of the Seminar for Freshmen will consider the forms, venues, and impacts of narrative nonfiction in contemporary culture. From the exploding popularity of personal essays in the digital age to the living, evolving essays we create on social media, we are constantly narrating and archiving our lives, shaping their content for specific audiences. In doing so, we shape what our experiences mean and represent. In order to analyze the power of narrative nonfiction, we will look at a variety of multimodal texts: essays, podcasts, Instagram and Twitter feeds, stand-up comedy, and storytelling slams, as well historical texts such as the essays of Michel de Montaigne and historical artifacts at the National Archives in Boston. We will also write our own narrative nonfiction, and adapt our first-person stories for listening and viewing audiences, such as the MassMouth story slam and podcasts like This American Life. Additionally, we will practice narrative nonfiction for professional audiences, using storytelling as a way to showcase personal strengths to employers, internship coordinators, and the like.

- **SF-1145 Emergence of Southeast Asia**

**Credits:**
4.00

**Description:**
Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

- **SF-1146 Fido the Friendly Wolf: A Natural History of Dogs**
  - **Credits:** 4.00
  - **Description:**
    This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

- **SF-1147 Global (In) Security: From ISIS to Ebola**
  - **Credits:** 4.00
  - **Description:**
    This course reviews the principal features of global and national security as it is currently practiced by tracing the evolution of theories, policies and circumstances whereby current international security is developed. Students will evaluate the nature and origins of war, arms proliferation, military instability, terrorism, genocide, health threats and natural resources depletion.

- **SF-1148 Brave New Worlds**
  - **Credits:** 4.00
  - **Description:**
    Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of
cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk’s global network of study abroad programs.

- **SF-1150 Religion in Contemporary Society**
  **Credits:**
  4.00

**Description:**
This course is design to provide students with an overview of the social settings and cultural meanings of religion in the contemporary world. Topics that will be covered in reading and discussions include the rise of religious fundamentalism, religion and violence, women's and men’s religious experiences, new religions, and portrayals of religion in popular films. In addition to the readings, students will observe and experience religious expressions and activities through fieldwork assignments. The emphasis on films and fieldwork reflects my belief that religion is made up of “lived experiences” of actual individuals and communities. In order to understand religion in contemporary society we will make every effort to see (in person or in film) a wide range of religious activities. The films we will see include some of the following: Leap of Faith, Devil’s Playground, Kadosh, Women of Hezbollah, Singing Stream, A Still Small Voice.

- **SF-1151 Reproduction and Society**
  **Credits:**
  4.00

**Description:**
This course explores relationships between reproductive health and rights both nationally and internationally. Many of our topics fit into two broad areas: conflicts over the control of childbearing (sterilization abuse, birth control, and abortion) and conflicts over who deserves to be a mother, especially when the mothers in question face social stigma and lack political power. Other topics include safe birth and maternal mortality, breastfeeding, infertility and reproductive technology. We also examine the politics of women's sexual and reproductive autonomy, including the policies that shape women's choices to prevent, achieve, abort, or carry to term a pregnancy. Throughout, we are guided by the following questions: Why is reproduction an important site through which to understand society? How do statuses such as race, class, gender, sexuality and ability influence people's
reproductive possibilities? What is the role of the state in shaping these experiences? How have communities supported or resisted efforts at reproductive control? Why is reproductive justice central to these answers?

– SF-1152 The Idea of America: Past, Present, Future

Credits: 4.00

Description:
A systematic exploration of thinking of and about America, from the founding of the republic to American issues and traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers and other thinkers who address conflicts over the meaning of founding principles in the course of the nation’s history, from the struggle over slavery to America’s contemporary role in the world. Because this course intends to apply theoretical understanding to real life, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation's philosophical and historical currents.

– SF-1154 Introduction to Visual Studies

Credits: 4.00

Description:
This seminar provides an introduction to Visual Studies, a relatively new interdisciplinary field that examines how images communicate and the roles that they play in society. Students will apply the concepts and techniques of Visual Studies to analyze sites and signs around Boston, such as advertisements, street signs, fashions, newspaper photographs, buildings, and public spaces. Class projects will increase students' awareness of their visual environment and their ability to critically analyze the visual rhetoric that surrounds us and is often used to manipulate us.

– SF-1156 Thinking About the Insanity Defense

Credits:
4.00

**Description:**
This course examines sixteen case examples providing a clear and compelling introduction to one of the most important topics in the relation between public policy and law. This course addresses: the history of the insanity defense; the effects of different standards for determining insanity; the arguments for its retention; abolition, and revision; media and other responses to it; and the controversies around pre and post conviction commitment. The case examples illustrates a variety of outcomes and include individuals who were found not guilty by reason of insanity; found guilty even though mentally ill; and not charged because of mental illness.

– **SF-1158 Global Climate Change**

**Credits:**
4.00

**Description:**
Conversation about the weather is considered to be the universal icebreaker. Yesterday's sweltering heat, the storm predicted for this weekend, even long-term climate shifts find their way in our daily conversation. Today, however, such casual conversations have an edge to them, because we are realizing that humans play a role in determining the climate shift. In fact, understanding the human fingerprint in the Arctic tundra melting, or a devastating hurricane, has gone well-beyond small talk to become one of the most important challenges our society faces today, and on that is wedded to geopolitics. To meaningfully participate in any dialogue that addresses this challenge people have to be aware of certain key ideas of Physics and Planetary Science. The aim of this course is to provide you with some of the essential facts and pieces of science underlying such questions. This course will enable you to grasp many of the issues that dominate today's political discourse and to develop an informed opinion (your, not our!) for which you can rationally argue.

– **SF-1160 Individuals and Society in the Zombie Apocalypse**

**Credits:**
4.00
**Description:**
"The Walking Dead" tells viewers that life in the zombie apocalypse requires people to "fight the dead, fear the living." Sociologists want to know why we should fear the living. How do individuals come together and try to recreate society for themselves: either to build community or fight other groups? What role do morals and values have in a society? How does all of this determine life, death, and the struggles people must face? Questions like these will give our class a new view of "The Walking Dead" and can help us to learn more about the society that we live in where so far the dead have remained in the ground.

---

- **SF-1161 The Playwright and the Stage**

**Credits:**
4.00

**Description:**
This writing and script analysis intensive course will explore plays across a range periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

---

- **SF-1162 Space Missions: From Moon to Mars and Beyond**

**Credits:**
4.00

**Description:**
It is hard to believe that only 60 years ago, our only close-up view of a planetary body was that of Earth. We are truly living in the Golden Age of Space Exploration, when a new mission every few years brings us spectacular images from either a neighbor in the solar system or galaxies at the edge of the universe. This course will describe the dozen space missions that changed our view of the universe, ranging from our solar system to the most distant galaxies.
- SF-1163 Spellbound! Witches, Wizards and Spirits In American Literature

**Credits:**  
4.00

**Description:**  
Since the beginning of time and across cultures, people have been interested in the supernatural, the paranormal, and the otherworldly. Often, these phenomena have appeared in the form of witches, wizards, and spirits, whether good or bad, wicked or wonderful. Women who have not fulfilled traditional gender roles have historically been cast as witches or, to use Shakespeare's phrase, as "weird sisters", or, in Donald Trump's recent election parlance, as "nasty women." Men in turn appear as wizards, usually more positively than female witches. Men and women alike also can take the form of spirits or ghosts; even houses can be possessed. What lies beneath the great fascination with the supernatural and the paranormal, with the haunted, the possessed, and the spellbinding? What accounts for the different manifestations of spirits? This course takes students on a tour of witches, wizards, and otherworldly spirits throughout American literary history. Tropes of the witch and the wizard have appeared in literature from the time of Shakespeare (see Macbeth) to the contemporary best-selling Harry Potter series, and hits every century in between, such as in Anne Hutchinson's Puritan accounts form the 1600s, Nathaniel Hawthorne and Edgar Allan Poe's in the 1800s, The Wizard of Oz in 1900, and John Updike's The Witches of Eastwick in the 20th century. The course offers readings across genre lines-poetry, fiction, non-fiction, young adult fantasy, and drama-and includes excerpts from film and television shows based upon wizards and witches (such as Bewitched, Buffy the Vampire Slayer, and The Vampire Diaries). The course may include a field trip to Salem, MA, as well as possibly the opportunity to see Wicked at the Boston Opera House (if it is renewed through the fall season, 2017).

- SF-1164 Reinventing Europe: Beyond Brexit and Secular Stagnation

**Credits:**  
4.00

**Description:**  
While newspaper headlines focus on the multiple problems Europe is facing today, the evolving adaptation of European nation states and the integration process receive less attention. Brexit and economic crises seem to be synonymous of Europe today, but facts such as the European Union accepting five new members in
the coming five years or Europe being the most advance environmental actor or the main international provider of official aid are often ignored by public opinion. This Seminar for Freshman examines the dynamic evolution of the integration process in Europe in the context of globalization. Three sections articulate the main debates and tensions in the interplay between national and supranational institutions and policies. The first part analyzes how eight European countries have forged their national preferences to delineate their level of immersion in the integration process; it later proceeds with the examination of the main historical events in the history of the integration process. The second part explores the functioning of the EU institutions in order to grasp the essence of the complex policy-making in the Europe of 28 members. The third and final section presents the analysis of the main areas of the EU policy making such as agriculture, monetary and economic issues, among others, and observes the main developments in the area of EU external relations.

- **SF-1165 History of Boston**
  
  **Credits:**
  
  4.00

  **Description:**
  
  This semester we will explore Boston’s history. We will read books, visit historical sites, and you will learn how to do historical research on your own. This course meets the requirement of Humanities and History.

- **SF-1166 Cinema-Monde: Global Challenges on Film**

  **Credits:**
  
  4.00

  **Description:**
  
  This course focuses on French-language films - with subtitles! - that address pressing social issues of the 20th and 21st centuries, such as hunger, female genital mutilation, immigration, racism, economic inequality, genocide, gender, sexuality, colonialism and post-colonialism.

- **SF-1167 Fantasy Fiction: Imaginary Worlds**

  **Credits:**
  
  4.00
Description:
Readers lining up at midnight for the newest Harry Potter book, hundreds of thousands of viewers crashing HBO’s website in their eagerness to watch Game of Thrones: examples of fantasy’s recent popularity are everywhere. This course explores the genre of contemporary fantasy through a historical and critical lens, from the work of J.R.R. Tolkien to the 2015 Nebula Award Winner, Uprooted. We will begin by reading selections from medieval literary texts, including Arthurian legend and Anglo-Saxon epic, to understand the roots of the fantasy genre and consider how these early works have inspired and informed the world-building efforts of later authors. We will also explore fantasy's newest manifestations across different kinds of media, from big-budget film adaptations to internet fan fictions. Critical questions will include: How do works of fantasy deal with the ethical questions surrounding the categories of "good" and "evil", "monstrosity" and "otherness" How do common fantasy plots such as coming-of-age or quest narratives work to aid in fictional character development and build suspense? How are contemporary anxieties about issues such as gender, race and class explored through the genre of fantasy?

- SF-1168 The Real Thing: the Pursuit and Problems Of Authenticity

Credits:
4.00

Description:
This course will focus on the concept of authenticity in American culture, from its origins in the early 19th century to the present. When the advertising gurus of Coca-Cola branded it as "The Real Thing," they were exploiting something powerful: the idea of something real, stripped of any falsity or illusion. Humans have always desired to know the world and others "as they really are," but this desire is particularly strong in the modern world: witness the eagerness to discover one’s "true self," cut through the B.S., obtain the genuine article, and "live authentically." In this course we will interrogate this pursuit of the Real Thing. In various ways, the texts we study both embrace authenticity as an ideal and also question its goodness, usefulness, or even its very possibility. We will thus confront a number of interrelated questions: Where does this desire for authenticity come from? What counts as "authenticity," in life and in art? Is authenticity really a virtue to live by? How does it shape artistic and literary expression? Is there even such a thing as "the real you" This course will be divided into three units. In the first unit, "Counterfeiters and Self-Made Men," we will study how a commitment to authenticity arises in antebellum American literature and culture during a time of rapid national
expansion and invention. Readings will include texts by Henry David Thoreau, Ralph Waldo Emerson, Herman Melville, and P.T. Barnum. In the second unit, "Authenticity and Contamination," we will consider two major ways in which authenticity becomes idealized around the turn of the 20th century: as artistic ideal set against fears of mass cultural production, and as a cultural ideal set against fears of racial and cultural mixing. Readings will include texts by Ernest Hemingway, Nella Larsen, Jean Toomer, and William Carlos Williams. In Unit Three, "Buying and Selling Authenticity," we will examine how authenticity becomes commodified (associated with products and "lifestyles") in post-WWII American culture. Texts will include works by Andy Warhol, David Foster Wallace, George Saunders, Banksy, and the TV series Mad Men. Final projects will ask students to consider authenticity today: how is the pursuit of the Real Thing affected by technologies of reproduction, by commodification, and by the increasingly virtual world of the 21st century?

- SF-1169 Immortality: Real and Imagined
  Credits: 4.00
  Description: Most of the world's religious traditions have as a part of their doctrines some notion of immortality, rendered both in scriptures as well as iconographically. What precisely is entailed by immortality and why does it constitute such a significant element of so many religious traditions? What can we learn about immortality by investigating various conceptions of the afterlife? Is immortality truly a desirable thing? These questions among others will be examined from the perspectives of philosophy, religion, psychology, anthropology, and biology. Besides being cross-disciplinary, the course will be multi-media in nature. In addition to reading philosophical and religious texts concerning the nature of immortality, students will study various accounts of immortality and the afterlife, examine how the afterlife has been dealt with in (visual) art, literature, and film, and investigate current research into life prolongation (biomedical gerontology).

- SF-1170 From Philia to Facebook: the Meaning of Friendship
  Credits: 4.00
  Description:
The thematic focus of this seminar will be friendship. Friendship is one of the most important of human relationships; one that every student in this seminar has already participated in for many years. It shapes who we are and helps determine who we may become. And while it is a universal phenomenon, it has been practiced quite differently at various times and places in human history. And while we all have an intimate, personal and practical knowledge of friendship through our own experiences, sometimes things that are so close and so obvious to us can be hard to see. Over the course of the semester we will inquire into friendship from many different angles, trying to gain both a broader and a deeper understanding than our own individual experience allows. We will look at friendship first through the lens of philosophy, particularly through the foundational text of Aristotle, The Nicomachean Ethics. We will look at other views of friendship from the ancient world, starting in the past to help us see that friendship has not always been thought of the way we think of it now. After this initial foundation is laid, we will examine other writers and thinkers and take up additional topics like friendship in different cultures, friendship and gender, friendship in and through the arts and include an examination of friendship through the lenses of many different academic disciplines to see how other systematic thinkers conceive of friendship. All along we will be comparing and contrasting with our own personal experiences and considering what modern technology, such as social networking sites, has done to influence friendship, in the way we practice it and the way we conceive it. It is the aim of this class that students not just study different academic points of view, but that that they take up the questions and challenges that these thinkers present to them and fully engage with them on a meaningful personal level.

- **SF-1171 Living on and Beyond the Hyphen/Latino Writers in the USA**

  **Credits:**
  4.00

  **Description:**
  Hyphenated-Americans of Latino origin come from many places and backgrounds. Often perceived as a divide, an either/or that separates and distinguishes one ethnic group from another, the hyphen can also be viewed as a link that connects, integrates and facilitates the formation of "new" cultural spaces. Through films and written narratives by and about U.S.A. Latino(a)(x)-Americans, students will examine how individuals who live on the threshold between two languages and cultures embrace the challenge of preserving their own identity and moving beyond stereotypes. Each of the Latino/a/x authors that we will read in this course will describe his/her own experiences living in the U.S.A. By examining their views
through our own filtered lens we shall try to answer questions like the following: 1. What role does language have in our definition/understanding of cultural identity? 2. How do individuals move beyond the hyphen and stop seeing themselves as hybrids? 3. How can an individual who does not belong to a marginalized group (i.e. one considered less powerful and secondary) understand and empathize with those who do? 4. How does globalization affect the dichotomies that arise in bi-cultural and multi-cultural communities?

- SF-1172 The United States Mexican Border

**Credits:**
4.00

**Description:**
One hundred and sixty nine years have passed since the Treaty of Guadalupe Hidalgo was signed. It is only fitting to analyze the profound changes that the gain/loss of these territories caused for the citizens of both sides of the border. This course will explore the literature, culture, and history of the United States-Mexican Border and the most pressing problems pertaining to the region. Emphasis will be on contemporary border theater and film. The works of Salcedo, Galindo, Lopez and others will be studied as well as contemporary films and documentaries such as Alambrista, Senorita Extraviada, The Gatekeeper, Sin Nombre, Wetback: the Undocumented Documentary, Victoria para Chino, Which Way Home, and much more. There are no prerequisites for this course. Though the course in conducted in English, parallel readings in Spanish will be made available to those who wish to read and/or compare the original texts.

- SF-1173 Understanding the Vast Sweep of Chinese Culture

**Credits:**
4.00

**Description:**
This course is an introduction to both ancient and modern Chinese civilization with a focus on its literature, arts, and 4000 year cultural history. We will see China at its earliest stages through its archaeology and progress to the heights of literary splendor in the Tang and Song Dynasties. Study of select early plays from the Mongol Yuan period will clearly tie into the development of Ming and Qing period fiction. With the fall of imperial China in 1911, the focus of literature changed drastically and we will study how many modern authors were able to draw from a
massive wealth of literary resources to help create a new Chinese literature and culture. We will watch several films that will provide a rich visual portrait of the culture. We will read quite a few representative literary and historical works in English translation that will give a great deal of insight into modern China and how we can both relate to and interact with this complex and amazing country. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for students in all majors that wish to gain a deeper understanding of Asian culture.

— SF-1176 What Is a Fact?

**Credits:**
4.00

**Description:**
What makes a fact a fact? What makes a fact true? At one time, these questions were only asked by epistemologists and postmodernists, but with the rise of fake news and the discourses surrounding it, these questions are relevant to everyone. Understanding facts is also essential to college students, who must learn to use reliable sources in order to create credible work. In this class, we will examine works of literature, art, science, and history that interrogate how facts are created and how we determine their truth value. Texts will include podcasts, novels and book-length studies of memory and theory of mind (the study of how we understand what others are thinking). We will also utilize the resources of Boston and Suffolk University; we will visit the WBUR NPR newsroom, a local museum, and learn about the legal definition of “truth” from a representative of the law school. By analyzing these texts, participating in these experiences, and completing a series of assignments that ask students to think critically and creatively, this class seeks to understand how we create facts, and why we need them.

— SF-1177 Revolutions in Thought

**Credits:**
4.00

**Description:**
The course will consider major changes in thought that revolutionized the cultures and societies in which they were embedded. Topics include the rise of monotheistic religions; the American Revolution; the recognition of slavery as a moral evil; the idea of women’s equality; Freudianism; Darwinism; Marxism; as well as Einstein and
the Theory of Relativity. We will enrich the readings and classroom conversations with visits to museums, churches, historic sites and other locations that reflect some aspect of the revolutionary changes that are our focus.

Students in the CAS Honors Program should choose one Seminar for Freshmen course from those listed below:

- **SF-H101 Fixing the World- Energy and Water: The Science of Solutions**
  **Prerequisites:**
  CAS Honors students only

  **Credits:**
  4.00

  **Description:**
  Two of the most daunting challenges the world faces (or will face) is how to provide for both its growing energy needs and potable drinking water. Regular news events include climate change, droughts, flooding, and petroleum struggles. Human nature often requires a severe crisis before it responds. This course will investigate the historical science driving the use of energy since the Industrial Revolution to convert energy resources into work, including the steam engine, the electric motor, and the internal combustion engine. It will also consider alternative energy options to fossil fuels, such as solar, wind, geothermal, and ocean power. Along the way we will consider the evidence for Global Warming and Climate Change. We will look into human nature, simple life styles, conspiracy theories, and the influence of those in power to shape human opinion. We will also consider how our water supply is provided and where it goes after being used. What options do developing countries or drought racked areas have to remedy their water needs? Although the course pursues a scientific understanding of these issues, the mathematics used will be gentle, and a larger emphasis will be placed on the intuitive appreciation of these concerns.

- **SF-H116 Enlightened Insanity**
  **Prerequisites:**
  CAS Honors students only.
**Credits:**
4.00

**Description:**
Rain or shine, the great 18th century Enlightenment philosophers would meet at the famous cafes of Paris to discuss their ideas, and to observe and criticize society. From these informal debates emerged ideas that are at the core of our modern understanding of the nature of society, marginality, human nature, civil rights, the essence of creativity and genius. Come join us in the quest to understand, define, observe, and analyze the key ideas and concepts of these great thinkers, such as Rousseau, Diderot, and Voltaire, still so relevant in our time. We will read key works of these creative thinkers and philosophers. We will enrich our experience and understanding through the use of film, theatre performances, museum visits, as well as the occasional cafe debate.

- **SF-H178 Sacred Hoops & Sneaker Pimps: Understanding the American Hoop Dream**

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.

- **SF-H182 Heroes, Antiheroes and Outsiders: Reading the Graphic Novel**

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
How is it that "comics", a genre often viewed as entertainment for children and adolescents, has become one of the most exciting forms of narrative and visual art? To answer this question, this seminar will examine a range of graphic novels, from those that celebrate their origins in superhero comics, such as Alan Moore’s Watchmen, to those that treat subjects not usually considered proper to the comics genre, such as Art Spiegelman's Maus, about the Holocaust, and Alison Bechdel’s Fun Home, about the complexities of sexual identity. As we read these works, we will look at how the combination of words and still images makes the graphic novel a unique storytelling form, as well as how artists and writers push the envelope to create new styles and challenge our expectations. In addition to class discussions and writing assignments, we will take a field trip to the Museum of Fine Arts and create a collaborative group graphic novel step-by-step over the course of the semester (all abilities welcome).

---

- **SF-H197 Sustainability, Energy, and Technology At Suffolk University**

**Prerequisites:**
CAS Honors students only

**Credits:**
4.00

**Description:**
In this project and team-based course, students study a sustainability problem at Suffolk University and spend the semester developing proposals to address the problem. At the end of the course students will present their proposals to Suffolk University's sustainability committee, and will exhibit their websites and visual aids in the Donahue lobby to educate the Suffolk community about sustainability. If their proposals are well-researched and well-communicated, students can see their ideas actualized while they are still undergraduates.

---

- **SF-H1134 The Meaning of Life**

**Prerequisites:**
CAS honors students only.
Credits:
4.00

Description:
What do we live for? Which beliefs, values, and experiences sustain meaningful, fulfilling existence? Are we authors of our destinies or powerless pawns in an unfathomable cosmic game? Does death render all our efforts superfluous? This award-winning course offers a cross-cultural, interdisciplinary exploration of these questions through philosophical and religious texts, art, fiction, autobiography, and psychological studies. The course opens with the Old Testament’s book of Ecclesiastes, followed by three units: 1) A Life Worth Living: Humanity’s Ideals focuses on the ancient and modern visions of human flourishing; 2) Threats to Meaning: Humanity’s Discontents, discusses the disillusionments leading to the loss of meaning; and 3) Recovery of Meaning: Crises and Hopes, explores the post-crisis possibilities of self-discovery and growth. Please visit http://meaningoflife.cherkasova.org/

- SF-H1146 Fido the Friendly Wolf: A Natural History of Dogs

Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
This course explores the evolution of dogs from wolves and the ways in which dogs have adapted to their niche in human society. The ecology, behavior, genetics, and adaptations of dogs will be explored in relation to both their wolf ancestry and artificial selection by humans. The course includes 2 mandatory field trips to a wolf sanctuary and an animal shelter.

- SF-H1148 Brave New Worlds

Prerequisites:
Restricted to CAS Honors students

Credits:
4.00
Description:
Explores themes of adventure, self-discovery, exile, and culture shock in classic and contemporary travel writing (including fiction, poetry, and non-fiction) as well as film. Students will experiment with creative writing of their own, develop theories of cosmopolitan world citizenship, travel through the city of Boston on field trips, and team up to learn about different countries in Suffolk's global network of study abroad programs.

- SF-H1161 The Playwright and the Stage

Prerequisites:
CAS Honors students only

Credits:
4.00

Description:
This writing and script analysis intensive course will explore plays across a range of periods and styles. The scripts of five plays will be studied and we will attend performances of two of those works at professional theatres in Boston. Other activities will range from a backstage tour to conversations with theatre professionals such as producers, directors, actors, designers, playwrights and critics, in order to lift the script off the page and provide a living experience of theatre. Requires students to be available for evening (usually Wednesday) performances. A fee for tickets at student rates will be assessed.

First-Year Writing: 2 courses, 8 credits Archive 2018-2019

- WRI-101 First Year Writing I

Credits:
4.00

Description:
Study and practice of the writing process and revision in terms of expository writing modes for an academic audience.

- **WRI-102 First Year Writing II**
  **Prerequisites:**
  WRI-101 or ENG-099 with at least a B and ENG-P099 with a P or WRI-H103

  **Credits:**
  4.00

  **Description:**
  Study and practice of argumentative and research writing through further work with writing process and revision and the critical reading of a variety of texts.

A student may be assigned to other writing courses or may be invited to take WRI-H103. Students not eligible for direct entry into WRI-101 will be required to complete one additional pathway course. Depending on eligibility, students who are assigned one additional pathway course must either complete WRI-100 or WRI-100+ prior to enrolling in WRI-101.

- **WRI-100 Developmental Writing I**
  **Credits:**
  4.00

  **Description:**
  This course affords students extended practice with persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. Students who are placed into WRI-100 must complete the course with a C in order to continue on to WRI-101.

- **WRI-100+ Developmental Writing - Tutorial Section**
  **Credits:**
  4.00
Description:
This course affords students extended practice with persuasive and expository writing in the essay form through frequent writing assignments based on critical readings of class texts and discussions. Students will also compose a research paper and study the process of writing and revising for an academic audience. No standard pre-requisites; offered every semester. WRI-100+ sections require students to meet with their instructors once per week for a thirty-minute, one-to-one tutorial session, to be scheduled by the instructor with each individual student.

WRI-H103 Advanced First Year Writing

Prerequisites:
By Invitation Only.

Credits:
4.00

Description:
This course is by invitation only and reserved for incoming Suffolk students with high admission scores. Advanced study and practice of writing process, revision, and research, based on close readings of a variety of texts. Fall semester only.

Creativity & Innovation: 1 course, 3 credits Archive 2018-2019

In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk and support divergent thinking. In the process, they will become more confident life-long learners.

Note: Students with 30+ transfer credits are exempt from this requirement.

Choose one Creativity & Innovation course from those listed below:
ADF-S171 CI: Integrated Studio 1

**Prerequisites:**
Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

ADF-S172 CI: Integrated Studio II

**Prerequisites:**
ADF S101; Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.

CI-102 The End of Global Poverty

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.
Credits: 3.00

Description:
This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. More than one-third of our global population lives in poverty, earning less than two dollars a day. Governments, businesses, social enterprises, and charitable organizations have tried to solve the global poverty issue with mixed results. What is the solution? Is entrepreneurship the solution, part of the solution, or has no impact whatsoever? In this course, you will gain an understanding of the power of entrepreneurship (in the context of creativity and innovation), the definition and depth of global poverty (in the context of constraints, such as human, financial and physical resources embedded in local, regional, national and global cultures), and successes and failures of past initiatives to reduce poverty. This is not a course about politics or business, but rather finding a solution to a problem that has eluded mankind since the beginning of time.

- CI-H102 The End of Global Poverty

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only

— CI-103 Sticking Your Neck Out- Inventing for Non-Engineers

**Credits:**
3.00

**Description:**
This course examines cutting edge technologies, the science behind them, and their practical application and follow-up success or failure. It also provides the students a chance to consider the relevance of identified "needed" inventions from the 1950s, and whether those projections were correct. The history behind some remarkable inventions will be presented. Finally, working in small teams, students will brainstorm to identify something useful to invent and determine several approaches to implementing it.

— CI-106 Failing Successfully

**Credits:**
3.00

**Description:**
This course is designed to demystify the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking. Did you know Netscape was the internet browser? What about MySpace, arguably the Facebook of the last decade? What led Apple from being innovative pioneers of the 70's to the verge of extinction in the 80's to the technological giant they are today? Technologies come and go, but what leads to organizations lasting more than 100 years such as IBM, General Electric, etc.? What role does failure play in successful innovation, decision-making, and business viability? In this course, you will learn about innovation that may have been successful and well-executed. You will also learn about innovation that was a viable business opportunity, but poorly
executed: one phase of failure. In addition, you will learn about innovation that had no real market viability, but was launched anyway: another phase of failure. Can failure lead to success? If so, how?

-- CI-H106 Failing Successfully
**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

-- CI-108 Designing the Next Best Thing
**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Demystifies the creative process by introducing students to creative practice as a disciplined approach to problem-solving and innovation. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original way, embrace ambiguity and support divergent thinking and risk taking.

---

- **CI-110 The Entrepreneur’s Cocktail**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
How do you and your story drive business? This course takes an innovative look at human creativity and entrepreneurship. As an entrepreneur needs perseverance and high motivation, we will explore the importance of values, risk taking, problem solving, and the discovery of the market opportunities. In order for you to be creative and essentially create successful ventures, you will discover the nuances between the three factors and explore them further through interactive discussion and debate as well as collaborative group work. You will be encouraged to think in non-conforming ways and apply new concepts and develop your own personal operating principles.

---

- **CI-112 Creating Problems: a New Solution for Sustainability**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00
**Description:**
As the majority of the world population now lives in cities, for the first time in human history, issues of urban sustainability have become more complex and more important than ever before. Presented with case studies of urban efforts to gain a sustainability foothold, students will utilize ideation, critical thinking, and strategic decision making to both identify root problems and to present solutions. This course will lean heavily on ideation processes, teamwork, and logical methods of analysis to pursue actionable solutions for significant problems. The methods of problem identification and solution analysis learned in this class will be readily adaptable to many complex problems, helping the students to make informed and decisive determinations in their careers.

---

- **CI-114 Creating the Dream Team**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Every successful venture today is based on effective teamwork. Unlike a typical lecture format, Creating the Dream Team is a course that utilizes experiential group learning to provide students with pivotal team-building skills. These essential skills are vital for everyone's future success in the business world. As team players, students are challenged to think creatively. A collaborative problem-solving process is used to analyze "real life" business situations. Teamwork involves research, data collection and information analysis to develop creative solutions to typical business problems. Teams will utilize multi-media tools to present their innovative ideas. Classmates will provide peer feedback and review. Through iterations, all students will assume roles as project leaders, keynote speakers and collaborators on a series of Team Challenges. Upon successful completion of this course, all students will have formed working "dream teams". As reinforcement and final evaluation, Dream Teams are required to create a multi-media Capstone Event as a course performance measure. This capstone presentation will "showcase" all of their newly acquired "dream" team-player skills.
CI-116 Good to Great: Design YOUR Portal to the World

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
In this course students will be introduced to the practice of creativity as a rigorous approach to problem solving requiring research, persistence and grit. Students will work collaboratively to effectively synthesize existing ideas, images, and skill sets in original ways. They will embrace risk, and support divergent thinking. In the process, they will become more confident life-long learners.

CI-H119 SL-Honors Theatre at Work

Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

Credits:
3.00

Description:
In this course, students meet community needs by engaging in service-learning outside the classroom. Theatre at Work is an introduction to creative practice using live performance as a problem solving tool in an educational environment. Specifically, students will create a performance piece in response to an issue they have uncovered in collaboration with select groups of students in a host Boston Public School. There will be a special focus on normalizing risk-taking and the learning that comes from false starts and failed ideas. Students will be responsible for creating every aspect of their performance testing its feasibility on a limited budget, ensuring that the content meets established criteria, and successfully implementing and evaluating their success both with their peers and their audience.
- **CI-129 Art & Innovation Practices**

**Credits:**
3.00

**Description:**
The intent of this course is for students to examine and effectively express in writing their ideas on creativity and to inspire undergraduate students to exceed their current levels of learning. Students will learn to meaningfully integrate course content into long term-retained useful skills through applied creative collaborations. This course is based on the idea that exposure and insight development will enable students to better visualize themselves in their desired fields and make informed choices within the variety of options available to them. The focus of the course will help students to assess their personal interests and strengths as they plan for their own educational and professional futures.

- **CI-131 Off to the Future: Leadership Through Compromise**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Some past political issues were resolved with great success (the Compromise of 1820), and some resulted in great failures (the US Civil War). In this course, students will study noteworthy political dilemmas of the past, identify the major problem solvers and examine the art of compromise. These investigations will provide guidance and inspiration for students to develop innovative and creative solutions to present day political problems such as climate change, immigration, Social Security, income distribution, higher education affordability, and homelessness. Students will work in teams and propose creative and innovative solutions that will convince the affected interest groups favorably, represented by teams of other students in the class, and result in compromises solving tomorrow's problems today.
- **CI-H133 Honors Franklin and the American Experiment**

  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

  **Credits:**
  3.00

  **Description:**
  What made Benjamin Franklin such a creative force in American history? We will explore the many facets of Franklin's life (printer, writer, scientist, statesman) and learn about Benjamin Franklin's political and diplomatic ventures, and will recreate some of his scientific experiments.

- **CI-135 The Design of Everything**

  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  This course will explore a selection of the genius personalities and their creative work in 5 distinct areas of human creative endeavor; art, science, nature, technology and the built environment. The course explores the underlying similarities in the process of their discovery, invention and creativity across the disciplines. Studying such names as Newton, Warhol, Hawking, Jobs, Gaudi and Banksy, students will uncover the process of design through research, analysis, synthesis, iteration and error. In class group projects will allow a hands-on opportunity to create.

- **CI-H139 Creating, Promoting, and Participating in the Literary Arts**

  **Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. CAS and SBS honors students or GPA of 3.5 or above only.

**Credits:**
3.00

**Description:**
With the launch of Boston’s new Literary Cultural District, we have renewed cause to celebrate the history and industry of literature in our city. This course will immerse students in the world of literary culture and its many branches: writing, editing, reviewing, and publicity. Students will practice the art of creative writing, and learn how writers find publishing venues, how authors build platforms for their work, and how literature reaches the public through readings, social media, book trailers and other marketing campaigns, authors interviews, and reader reviews. Various industry professionals, authors, editors and publicists will speak to the class about the artistic and business opportunities, trends, and futures of literature and literary publishing. Students will apply their knowledge and interests to a variety of projects, including book reviews, author interviews, social media campaigns, literary events, and other collaborative projects. We will also work as a class to launch a new digital literary journal at Suffolk.

---

**CI-141 The Creative Approach to Learning**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
This course is focusing on the creative process by introducing students to creative practice as a disciplined approach to problem solving and innovation requiring research, persistence and grit. Students will be encouraged to synthesize existing ideas, images, concepts, and skill sets in original ways, embrace ambiguity and support divergent thinking and risk taking. The course will have an undertone based on science, but it is suitable for non-science majors too!
- **CI-143 Dreams, Demons, and Dynamic Artists Creative Nature**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
What motivates your creative nature? This course will explore converging themes in Art and Psychology in order to give students the tools they need to unblock their creative potential. Collaborative small team activities, assigned readings, large group discussions, and personal reflection exercises will provide an avenue for students to explore their own creative patterns and how they are influenced by, and perceived within, the world around them. Dreams, mental illness and psychosocial theories of self will also be widely discussed in order to give students context for this inter/intrapersonal exploration.

- **CI-147 Seeing Double, Printmaking, the Art of Discovery, Experimentation and Process**

**Credits:**
3.00

**Description:**
Always wanted to explore a creative side but never had the opportunity to take an art class? Here's your chance! Sync the power of icons/ images with ideas and making. We will use cellphone and printmaking technologies in a workshop style environment. Rather then a lecture based class, this class we will play, learn and build new Neurological pathways towards creative thinking. Come to every class excited to learn, make and discover. This course will give you the building blocks for innovative thinking beyond the classroom. Power is in the image. As in the way a dream can grip you, images carry incredible amount of influence and creative potential, when they are "seen." Glimpses of these images circulate in media, movies, cell phones, and so on. Learn to develop your own images and understand the broad world of images of human culture.
- **CI-149 SL-Creative Writing and Literacy**

  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  In this course, students meet community needs by engaging in service-learning outside the classroom. This course will explore the value of creativity and play in developing reading and writing skills and the habits of lifelong learning, both in our own lives and in the lives of young people in Boston. In this course, we will work closely with the non-profit literacy organization 826 Boston, which works with students ages 6-18 on reading and writing skills through playful, creative workshops, as well as tutoring and other kinds of support. Students will learn about the work of 826 Boston by volunteering with the organization, and by the end of the semester you will conceive, plan, and run creative writing workshops of your own at 826 Boston.

- **CI-H149 SL-Creative Writing and Literacy**

  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.

  **Credits:**
  3.00

- **CI-157 Mindful Journal**

  **Credits:**
  3.00

  **Description:**
  To keep a journal is to make an investment, often long before we understand the value. A journal is a personal database of snapshots in time, good ideas and bad, observational doodles and unfiltered emotions. On any given page a journal may appear inconsequential but within the rigor of filling a whole notebook (and another, and another) an individual viewpoint emerges. This class will facilitate a student's ability to draw from his or her own lived experience and discover unique springboards into universal issues by making mindful connections. An entire lifetime of images, stories and details resides within each of our minds but the ability to explore that richness requires dedication to documentation. Mindful Journal is a process class fostering focus through mindfulness practices, content generation and meaning making.

- **CI-159 Building a Better T**

  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  If any set of problems could use creative and innovative thinking, it's the myriad of problems facing the T. The Boston Globe is filled with stories about financial and organizational problems in the system, and you only have to spend a few minutes on the green line to feel the effects of those issues. Still, millions depend on it every day - it is the circulatory system of our city, and it is more than a way to get around: the T increases accessibility and functions as a democratizing force. That is, when
it's running. In this class we will study the MBTA and other mass transit systems in order to propose creative solutions to the T's most pressing problems. We will read articles about the T and other transit systems, we will look at interactive maps that express different kinds of data, and we will visit local stations. In addition, we will study the process of creative thinking, in order to apply those skills to the issues at hand. You will be asked to create both stand-alone short writing assignments and visual representations of your ideas, accompanied by short, written explanations, both alone and in group projects.

- **CI-161 Making History: Public Memory in the Digital Age**
  
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

  **Credits:**
  3.00

  **Description:**
  You live in Boston now. At least for a while. Perhaps you’ve noticed that it has its own ways of remembering things. Consider The Boston Literary District, The Freedom Trail, and all the many events and festivals devoted to history, culture, and identity. From guided tours and colonial cosplay to images and written texts to monuments, memorials, and museums, this city tells stories about itself today in the ways it tells stories about its past. In this class, you’re going to tell more stories about Boston. You’re going to help it find other things to remember, and other ways of remembering them. You’ll likely need to focus on parts of the real events that Boston doesn’t prefer to include in its stories, emphasizing issues of race, socioeconomic class, nationality, colonialism, gender, sexuality, and other stories of unequal power and how that manifests in real people's lives and in the culture of this city.

- **CI-H161 Making History: Public Memory in the Digital Age**
  
  **Prerequisites:**
  Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office. Honors students only.
Credits:
3.00

CI-163 A Course on Skepticism and Rationality
Prerequisites:
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

Credits:
3.00

Description:
Magician James "The Amazing" Randi reminds us that "No matter how smart or how well educated you are, you can be deceived." In an age fraught with deception and misinformation, students need tactics and strategies in order to separate truth from falsity. This course encourages its participants to act as skeptics - not cynics, necessarily - by requiring evidence and proof before believing or accepting claims. Students are urged to identify the most-likely-to occur opportunities for deception in their major fields and draw from the tenets of classical rhetoric, logic, and the scientific method in order to develop safeguards. Frequent collaboration with classmates will allow for dynamic solutions to small and large-scale contemporary problems ranging from the personal (e.g. used car prices and avoiding fraud) to the universal(e.g. "fake news" and God).
---

**CI-165 Chemistry Is Everywhere: Zig-Zagging to Success**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
We will be discovering the process of becoming more creative. The emphasis is on understanding the creative process and applying effective teamwork strategies towards a shared goal. Students will use scientific inquiry to explore topics in chemistry that they find interesting. Each team of 3-4 students will choose a project and develop it during the semester with the goal of raising awareness about chemistry or designing innovative and engaging ways of teaching chemistry.

---

**CI-169 Riddles of Identity**

**Credits:**
3.00

**Description:**
In this course, we will be exploring the often puzzling question of personal identity from a creative perspective, learning about creativity by exploring questions of personal identity. What exactly constitutes our identities? How much control - if any - do we have in determining what our identities are? By wrestling with these among other important questions from a wide-range of perspectives and with creative confidence - the firm belief that each of us can and must explore these questions creatively - we will arrive at a better understanding of ourselves, our personal identities, as well as acquire a greater appreciation of the identities of others. Our course is a genuinely collaborative one, given the significant role others can play in providing us with a perspective on our identities unavailable to us as individuals.

---

**CI-171 What Is the Moral of This Story?**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course, the idea of embodiment refers to the integration of the expressiveness of our bodies as a vehicle for the art of speaking and communicating. The meaning of embodiment employed here is both a style and philosophy of engagement and will be examined and practiced as an ongoing pedagogy for connecting with stories at various levels of discourse and apperception.

---

**CI-173 Imagining the Other**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course we will explore how to enter into new ways of thinking and adopt new perspectives, by reading, discussing and imitating a range of texts (from poems, hybrid-genre pieces, and song lyrics, to photographs, dreams, and ethnographies). Trying to transcend ordinary modes of interpreting the world, trying to imagine what it is like to be someone or something else entirely, immersing ourselves and describing/ translating the new experiences, we will then share the writing (and other texts) we produce, workshopping them as a group, and producing a final presentation and collective portfolio.

---

**CI-175 Creating Social Change: From Theory to Activism**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Social change doesn't just happen because something is "in the air" or because of some kind of mystical zeitgeist. Social change happens because engaged citizens find creative and innovative ways to frame social conversations and push on the levers of power. In this course we will examine some of the foundational figures and texts called on by those hoping to enact social change. We will study previous social movements in order to understand how they constructed and supported their arguments in favor of change, and how activists used creativity to overcome entrenched thinking and change the social conversation. We will work in small groups to collaboratively develop achievable but ambitious plans to engage the public and enact change in our own communities.

– **CI-179 Myths of Self-Making**

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
In this course, students examine and engage with one of the major mythological figures of the American imagination: the "self-made man." The idea of the enterprising person who “pulls himself (or herself) up by the bootstraps” is distinctively American. But where and why does it arise? How did it come to prominence in American culture, politics, and economics? And, by gaining understanding of both the limits and the potential of this cultural ideal, what can we draw from it in our own careers and lives? Students will practice skills of close reading, analysis, and argumentation in the first half of the semester, prior to moving onto more complex and interpersonal forms of scholarly creativity and
problem-solving in teams and in the community. Course content will follow a similar trajectory. In the first half of the semester, we will focus on how the myth of the self-made man originates and develops, and consider some critiques of it as an ideal. After spring break, we will apply the concepts we have studied to a robust analysis of issues in contemporary politics and economics including financial speculation, entitlement reform, technological disruption, and the gig economy. This contemporary focus will culminate in a Group Project & Final Presentation in which students aim for an innovative approach to a current question in light of the works we have studied.

---

CI-181 Creating Change: Perspective Matters

**Prerequisites:**
Restricted to students with less than 54 credits. Students with more than 54 credits needing to fulfill their CI requirement should seek approval from the Undergraduate Advising Office.

**Credits:**
3.00

**Description:**
Reality and perception have been debated and discussed for millennia. Humans see and experience their world in different ways. How do humans determine appropriate solutions for challenging social and economic problems? Why do most accept the current structures or status quo in regards to challenging problems? How do we gain a different perspective to find the vision and resources to erect new structures and thus challenge the status quo? Students will creatively explore these big questions through readings and presentations, studying examples of individuals and movements that have led to new and divergent perspectives. Students will participate by crafting products, creating visual projects, and coming into original thought via trial and error. Students will also develop their analytical and critical thinking skills, while learning to communicate effectively and honestly.

---

**Math: 1 course, 4 credits Archive 2018-2019**

Choose one Math course from those listed below:
- **MATH-128 Math for the Modern World**

**Prerequisites:**
MATH level 2, or Mathshop, or MATH-104

**Credits:**
4.00

**Description:**
From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem solving in contemporary life and work. It uses a minimal amount of algebra and focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)

- **MATH-130 Topics in Finite Mathematics**

**Prerequisites:**
MATH-104, or MATH-121, or MATH level 3

**Credits:**
4.00

**Description:**
Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments, Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.
- MATH-134 Calculus for Management & Social Sciences

**Prerequisites:**
MATH-104, MATH-121 or MATH level 4

**Credits:**
4.00

**Description:**
A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, limits and continuity, derivatives, differentiation rules, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, and area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester.

- MATH-164 Calculus 1 Bridge With Trigonometry

**Prerequisites:**
Permission of Instructor

**Credits:**
4.00

**Description:**
This course provides an alternative to MATH 165 (Calculus I) for those students who have taken MATH 134 (Calculus for Management and Social Sciences) but who do not have the trigonometric precalculus prerequisite (such as MATH 121) for MATH 165. In other words, the sequence MATH 134 / MATH 164 serves as an alternative to the sequence MATH 121 / MATH 165, and similarly prepares students to take MATH 166 (Calculus II). The course includes a thorough review of trigonometry and other precalculus topics. Aspects of limits and differentiation which students have already seen in MATH 134 are presented briefly, but in most cases with more emphasis on conceptual understanding, and often illustrated using more complicated examples. New calculus topics (i.e. not covered in MATH 134) include one-sided limits, special trigonometric limits, differentiability, derivatives of trigonometric functions and
their inverses, derivatives of general inverse functions, logarithmic and implicit differentiation, related rates, L’Hopital’s rule, intermediate values theorem, Rolle’s theorem, mean values theorem, Newton’s method, and linearization. 4 lecture hours plus 1 recitation session each week. Normally offered in fall.

- **MATH-165 Calculus I**

**Prerequisites:**
MATH-121 with a minimum grade of C, MATH-075, or MATH level 5

**Credits:**
4.00

**Description:**
Functions, limits and continuity, squeeze theorem, limits at infinity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; derivatives of other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); applications of the derivative (implicit differentiation, related rates, optimization, differentials, curve sketching, L’Hopital’s rule); anti-derivatives; indefinite integrals; Fundamental Theorem; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

- **MATH-166 Calculus II**

**Prerequisites:**
MATH-164 or MATH-165 with a minimum grade of C

**Credits:**
4.00

**Description:**
Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (substitution, by parts, trig integrals, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); improper integrals; infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series...
(computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

---

**Social Cultural and Global Perspectives: 1 course, 3-4 credits Archive 2018-2019**

Courses that fulfill the Creativity and Innovation, Humanities/History, Language, Literature, Quantitative Reasoning, Seminar for Freshmen, Social Science, or VPATH requirements may double count to fulfill the Social, Cultural, and Global Perspectives (SCGP) requirement.

Choose one SCGP course from those listed below:

- **ADPR-217 Gay and Lesbian Studies**
  
  **Credits:** 4.00

  **Description:**
  Examines the portrayal of homosexuality in political, social, and cultural discourse. Analyzes the role of media and symbolic construction in the shaping of public values, opinions, and social movements.

- **ADPR-219 Rhetoric of Protest and Reform**
  
  **Credits:** 4.00

  **Description:**
  Examines the persuasive strategies of social reform movements with special emphasis on the civil rights', women's rights, and gay rights movements in the United States.
- **ARH-203 Arts of Asia**
  **Credits:**
  4.00

  **Description:**
  Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**
  **Credits:**
  4.00

  **Description:**
  Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

- **ARH-321 Women, Art and Society**
  **Credits:**
  4.00

  **Description:**
  Surveys women artists from the sixteenth century to the present and examines new direction in art-historical scholarship developed by feminist art historians during recent decades.

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**
  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations,
Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **AS-500 Asian Studies Internship**
  
  **Credits:**
  4.00

  **Description:**
  Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)

- **BLE-325 Global Business Ethics**
  
  **Prerequisites:**
  BLE-215, PHIL-119, PHIL-120, PHIL-123 or PHIL-127

  **Credits:**
  3.00

  **Description:**
  Surveys business ethics as they transcend the diverse perspectives of global business. Explores current global ethics standards and values, ethical challenges, controversies, convergence and trends. Students explore famous global business cases through films, websites and independent research. Emphasizes identification and resolution of global business ethical issues within the context of ethical decision-making and sustainability. Analyzes corporate social responsibility; hence, transforming global business ethics through business.

- **CI-204 Prague: Castles to Barbwire**
  
  **Prerequisites:**
  At least 24 credits earned.

  **Credits:**
3.00

Description:
Prague offers students a more recent view into history and will serve as a backdrop to learning "Design Thinking." The curriculum will use Czech and Central European cultural features as the inspiration for learning the creative process, skills that can be applied broadly and globally across disciplines. WWII and its fall to Communism left the Czech Republic undamaged. Artists played a vital part in the country’s rise to a Republic during the Velvet Revolution. These dissidents, including writers, actors, artists and musicians were innovators who were the catalyst for change. One could say that creative minds changed this country. This course is designed to demystify the creative process by introducing the creative practice as a disciplined approach to problem solving and innovation requiring research. This one-month study abroad experience will offer a more worldly insight to the significance of developing skills where divergent thinking and risk taking are one of many key tools in learning to generate new ideas. Travel fee covers accommodations, transfers, some meals and cultural visits. Airfare and tuition not included.

- CJN-216 Intercultural Communication

Credits:
4.00

Description:
An examination of communication variations and cultural viewpoints and their impact on cross-cultural communication. A special emphasis is placed on rituals and message patterns in non-Western cultures.

- CJN-225 World Cinema

Credits:
4.00

Description:
An introductory course in film studies with a focus on foreign films. Movies studied include masterpieces of cinema from Europe, Asia, the Middle East, and other nations (Films have subtitles).
- **CJN-281 Asian Popular Culture**

  **Credits:**
  4.00

  **Description:**
  Students critically analyze Asian popular culture since the 1980s using a cultural ethnographic approach. Students apply the lenses of gender, identity, globalization, and business strategies to examine pop phenomena such as Korean Wave, Cool Japan, and Cantonese popular music.

- **CJN-293 Hong Kong Cinema**

  **Credits:**
  4.00

  **Description:**
  By examining the film texts of Hong Kong auteurs such as John Woo, Wong Kar-wai, Tsui Hark, Andrew Lau, and Alan Mak, the course examines issues such as film genres, colonization/decolonization, transnational political economy, the Greater Chinese media market, and the diaspora.

- **CJN-301 Documentary Film and the Image of Conflict in the Middle East**

  **Credits:**
  4.00

  **Description:**
  The course focus is on some of the divisions and conflicts within Israeli society. Students analyze and compare mainstream media discourse to alternative representations in documentary film. Analysis also covers media representation of the Israeli-Palestinian conflict.

- **CJN-385 Globalization of Media and Telecommunications**

  **Credits:**
  4.00

  **Description:**
A critique of the circulation of media goods and ideologies from both a cultural and political/economic perspective. Topics include global Hollywood, the images of Muslim women in transnational media, the information society, and global social movements.

- **EC-141 Development Economics**  
  **Credits:**  
  4.00

  **Description:**  
  Why do so many countries remain so poor? Why have some (e.g. the Asian "tigers") grown so rapidly? Why have most of the countries of Eastern Europe and the Former Soviet Union been slow to ignite economic growth? These questions are addressed by looking at domestic factors (government policies, resource endowments) as well as the international environment (mobile investors, international financial institutions). Asks what economic choices these countries face now. Normally offered yearly. Cultural Diversity B

- **EC-151 Economic & Human Geography**  
  **Credits:**  
  4.00

  **Description:**  
  The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

- **EDUC-310 Culturally Responsive Education**  
  **Credits:**  
  4.00
Description:
The relationship between cultural diversity and schooling is explored by examining impediments to academic achievement and advancement by minority students, non-native English speaking students, and other under-represented groups. Topics include: standardized testing, identification of inequities, legal and ethical responsibilities of teachers, and promoting equity. Ten pre-practicum observation hours required for teacher candidates.

- EDUC-315 Strategies for Working With English Learners

Credits:
4.00

Description:
This course examines the specific needs and challenges of the various language and cultural groups in schools. Topics include: theories of 1st and 2nd language acquisition, strategies for teaching academic content, modifying instruction in the mainstream classroom, creating classroom cultures that invite all students into learning, the role of advocacy and professional collaboration in ESL, and analysis of policies related to assessment and placement of English Language Learners.

- ENG-123 Great Books of the World I

Credits:
4.00

Description:
Literary masterpieces from ancient times to the Renaissance, including: Homer’s Odyssey, Sophocles’ Oedipus, Virgil’s Aeneid, selections from the Hebrew Bible and the Gospels, and Dante’s Divine Comedy. List may vary at the discretion of the instructor.

- ENG-124 Great Books of the World II

Credits:
4.00

Description:
This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptomist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

**Credits:**
4.00

**Description:**
An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

**FR-205 The Francophone World**

**Prerequisites:**
FR 202 or Instructor's consent

**Credits:**
4.00

**Description:**
Explores the francophone world through the study of short stories, print media, and film, by engaging with the rich textured and diverse francophone literary canon. Teaches advance notions of French grammar, write compositions, and the art of conversation related to cultural themes.

**FR-216 Masterpieces of French and Francophone Literature in English Translation**

**Credits:**
4.00

**Description:**
Masterpieces of French and Francophone Literature in English Translation. Studies works translated into English by major authors from the Middle Ages to the present. Explores drama, fiction, and poetry from many regions of the world: Africa, Western Europe, North America, the Caribbean, and Vietnam.

**GVT-115 Evolution of the Global System**

**Credits:**
4.00
Description:
Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.

GVT-208 Politics / Religion

Credits:
4.00

Description:
This course explores the relationship between politics & religion in the United States. How and why does religion influence politics in the U.S.? What does freedom of religion mean in the U.S.? Why do some groups today erroneously claim that the U.S. was founded as a "Christian nation"? This course also examines what major world religions say about the status and responsibilities of the state and the roles that minority religious groups (Buddhism, Islam, etc.) play in U.S. politics.

GVT-281 Intro to Comparative Politics

Prerequisites:
GVT 110, GVT 115, and GVT 120 or consent of instructor; Sophomore status or higher

Credits:
4.00

Description:
Introduces various approaches of comparative politics, such as institutionalism, structuralism, political culture, corporatism, state-society relationship, political economy, etc. Applies the different approaches to explain how various factors
affect government institutions, sociopolitical and economic development in different societies. An effort is made to include countries from all regions of the world. Normally offered every semester.

- **GVT-359 Hockey, International Development & Politics**
  
  **Credits:**
  4.00

  **Description:**
  This class examines the way in which national identity, global and regional economics and international development intersect. It uses the professionalization of the sport of hockey and its subsequent spread around the globe as its case. It will look at the rise of the pro game, the way in which it shapes national identity in the Canadian case, the way in which the pro business model has changed in response to broad socio-economic changes in North America and geo-political shifts around the globe, especially in Eastern Europe and the Former Soviet Union.

- **GVT-467 Comparative Social Movements**
  
  **Prerequisites:**
  Junior status

  **Credits:**
  4.00

  **Description:**
  How do we explain the appearance or absence of social movements? What social or individual factors explain their development and decline? Who joins social movements? Who does not? Why? What ideas or ideals animate those who do participate? What is it like to be part of a social movement? What effect do they or have they had on politics, power and efforts at social change? These are some of the questions that have traditionally shaped debates over social movements, both domestically and internationally. They will form the analytical core of the work in this course. By critically evaluating several competing schools of thought in social movement theory and history we will attempt to highlight the social forces that have, at varying points in times, facilitated, maintained, as well as blocked the development of social movements in the US and beyond.
- **HST-100 Introduction to Asian Studies: Culture, People, Ideas**
  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, the Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **HST-103 Cultures and Social Transformations in Asia**
  **Credits:**
  4.00

  **Description:**
  Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

- **HST-247 History of Modern Middle East**
  **Credits:**
  4.00

  **Description:**
  Explores the broad historical forces, conflicts and major events that have shaped the contemporary nations of the modern Middle East. Topic include: the emergence of the modern Middle East from the empires of the sixteenth and seventeenth centuries; the age of colonialism; the rise of nationalism; socialism, capitalism; the impact of Israeli and Palestinian conflict on the region; oil, the Islamic Revolution in Iran and the rise of Islamic fundamentalist movements; U.S. policy; and Saddam Hussein's Iraq.
- HST-250 A History of Martial Arts in Movies
  **Credits:**
  4.00

  **Description:**
  Outlines the history of Chinese martial arts in five movies, highlighting Chinese views of violence, personal loyalty, government, and justice.

- HST-251 Modern East Asia
  **Credits:**
  4.00

  **Description:**
  China, Japan, and Korea - East Asia’s critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

- HST-252 The Rise of China: Through Films, Media, and History
  **Credits:**
  4.00

  **Description:**
  Discusses the rise of China as the world’s largest economy and its impact on our life through films, media, and history.

- HST-263 Comparative Race Relations
  **Credits:**
  4.00

  **Description:**
  Compares and analyzes the history of race and politics in South Africa and the United States from the 17th century to the present. Examines how race as a social and ideological construct influenced and informed political conflicts over land,
labor, and social relations in the two countries including slavery, segregation, apartheid, and the struggle to create racial democracies.

- HST-268 History of the Mediterranean

**Credits:**
4.00

**Description:**
Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

- HST-274 Women in 19th-Century Europe

**Credits:**
4.00

**Description:**
Explores the condition of European women from 1800 to 1914. Readings focus primarily on women's experiences in France and Great Britain. Topics include: the effects of industrialization on the lives of working-class women; working and middle-class women's negotiation of marriage, work, and family life; the rise of feminism, women's greater participation in the public sphere, and conservative reaction to these changes in women's place in society; women and crime; Victorian ideas about female sexuality; the politics of class and gender in nineteenth-century European society.

- HST-275 Women in 20th-Century Europe

**Credits:**
4.00

**Description:**
Examines the changing place of women in European society since 1900. Topics include: women's suffrage and the political advances of the 1920s and 1930s; the revolution in sexual mores, birth control, and the rise of companionate marriage; women and the consumer economy; the anti-woman policies of Fascist Italy and
Germany under National Socialism; liberation of women and retrenchment in the Soviet Union; World War II; feminism, sexual liberation, and women's political engagement since the 1960s; and, throughout the twentieth century, women's continuing negotiation of work and family responsibilities.

- **HST-321 History of Islam**
  - Credits: 4.00
  - **Description:**
    Presents a coherent account of the origin and history of Islam since its foundation in Arabia in the seventh century A.D. to the present. Analyzes the terms, events, characteristics, developments, movements, and institutions that have been part of the shaping of Islam. Ideological challenges and impact of Islam in the world today from both spiritual and political perspectives are examined.

- **HST-371 U.S. Women's History Colonial to 1865**
  - Credits: 4.00
  - **Description:**
    Traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism legal status, labor activism and popular culture. With attention to ethnicity, race, class, age, region of residence, disability and sexual orientation, the course focuses primarily on the everyday lives of ordinary women.

- **HST-484 History of the Emotions**
  - Credits: 4.00
  - **Description:**
    Explores ideas about emotional life from the fields of history, anthropology, sociology, and psychology as well as the evolution of emotion rules and prescriptions, focusing on western Europe and the United States since 1700. In the
eighteenth century, emotions were seen as a positive influence on politics and public life, especially during the French Revolution. After the fall of Robespierre, the emotions were banished to the private sphere - so we will read both primary sources and recent scholarship on 19th- and 20th- century ideas about masculinity and femininity, romantic love and marriage, childrearing, and about what parents and children are supposed feel toward each other, how ideas about these subjects have changed over time, and whether our feelings change with them.

- **MUH-223 World Music**  
  **Credits:** 4.00  
  **Description:** Covers topics in folk, traditional, and modern music of Africa, the Middle East, Asia, and Europe in the context of the cultures and lives of the indigenous peoples of those regions; examines how music interacts with the issues of race, gender, class, religion, politics, and social movements. Normally offered every other year.

- **PAD-201 Social Change**  
  **Credits:** 3.00  
  **Description:** This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women’s movement, environmentalism, and the gay and lesbian movement.

- **PAD-H201 Honors Social Change**  
  **Credits:** 3.00  
  **Description:**
This course will examine social change in the U.S. and abroad. The course will also examine the role of business, nonprofits, and the public sector in addressing social problems. Topics studied may include the Industrial Revolution, the civil rights movement, the women’s movement, environmentalism, and the gay and lesbian movement.

- PHIL-120 Ethics and Civic Life
  
  **Credits:**
  4.00

  **Description:**
  In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.

- PHIL-228 Feminist Philosophy
  
  **Credits:**
  4.00

  **Description:**
  This course is an introduction to the philosophy of feminist thought. Feminist theories of epistemology, metaphysics and morality will be examined as critiques of traditional philosophy. Feminist perspectives and methodologies include radical, liberal, postmodern, as well as more recent trends in ecofeminism. Special emphasis will be placed on explicit and implicit practices of alienation and exclusion as they have unfolded in the “gendering” of thought, truth, and reality. 1 term - 4 credits. Normally offered every third year. C b

- PHIL-229 Eco-Feminism
  
  **Prerequisites:**
  PHIL 119, or PHIL 123, or PHIL 127

  **Credits:**
  4.00

  **Description:**
Examine the political, social, and ecological problems facing us as a global community. Having its roots in feminist theory and deep-ecology, eco-feminism provides a critical framework for ecological responsibility and accountability. Writings from eco-feminist thinkers and environmental activists around the world will be used to highlight the philosophical and political conflicts and challenges, including globalization and loss of biodiversity, global warming, international human rights, the relationship of gender and nature, and modes of redress for eco-justice and sustainable development.

- **PHIL-261 Eastern Philosophy**
  
  **Credits:**
  4.00

  **Description:**
  The exposition and critical evaluation of Hinduism, Buddhism, Confucianism, Taoism, and Islam. Special attention is given to foundation principles as well as to the similarities and differences of each of these philosophies to basic ideas in Western philosophy. 1 term - 4 credits. Normally offered alternate years. C b

- **PHIL-262 Buddhism**
  
  **Credits:**
  4.00

  **Description:**
  An historical survey of Buddhist philosophy. We will explore Buddhist origins, central teachings, devotional and meditational practices, ritual and institutions as developed from classical to modern times. Special attention given to the philosophical diversity of the Buddhist world view. 1 term - 4 credits. Normally offered alternate years. C b

- **PHIL-265 Women in Spirituality**
  
  **Credits:**
  4.00

  **Description:**
An exploration into the various dimensions and ideologies concerning the role of the feminine in relation to the Divine. Belief systems, myths and archetypes from ancient Goddess worship to 20th century feminist theology will be examined in terms of the philosophical content and psychological consequences. Special emphasis will be placed on feminist metaphysical structures for understanding consciousness and Reality. Classes will be conducted by means of lectures, primary and secondary texts and class discussions. Normally offered alternate years.

Cultural Diversity A

---

**PHIL-267 Chinese Philosophy**

**Credits:**

4.00

**Description:**

A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course then considers Zen Buddhism, which is called Ch’an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.

---

**PSYCH-243 Organizational Psychology**

**Prerequisites:**

Take PSYCH-114;

**Credits:**

4.00

**Description:**

Explores the application of psychological theories and principles to organizations and the workplace with attention to the role of culture and context. Topics includes job analysis, recruitment, selection, evaluation, training, retention, and termination. Employee morale, well-being, stress, and hardiness are considered.

---

**PSYCH-247 Asian Perspectives on Health and Work**
Credits: 4.00

Description:
Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants.

- RS-111 Introduction to World Religions: Western Traditions

Credits: 4.00

Description:
This course will explore the comparative history and structure of Western religious traditions, broadly understood, and their impact on other world religions, while attempting to recognize the similarities and the differences among them. Traditions to be studied include Greek and Roman religion, the monotheistic faiths (Judaism, Christianity, and Islam, as well as Zoroastrianism, Sikhism and Bahaiism). We will also explore the impact of the Western religions on indigenous traditions, such as African religion, Native American religion, and Pacific Island religion. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. 1 term - 4 credits. Normally offered every year.

- RS-112 Introduction to World Religions: Eastern Traditions

Credits: 4.00

Description:
This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting
to recognize the similarities and the differences among them. Attention will be
given to the reading of original texts when available. Requiring students to observe
religious ceremonies will enhance practical understanding of many of the above
traditions. Normally offered every year. Cultural Diversity B

<tr>
<td>Description: This course is about the basketball hoop dream played out at the high school and college levels. We will study a wide variety of materials - novels, films, websites, reference works - to understand both the construction, and destruction, of the hoop dream in such diverse places as New York City, Seattle, rural Indiana, suburban Georgia, and the Wind River Reservation in Wyoming. Issues of race and culture will serve as guiding themes as we develop critical theory explaining why the hoop dream has persisted, and adapted, over time, to fit the needs of its believers and supporters.</td>

| Course                         | Credits: 4.00 |
| SF-190 Asia in America Fiction and Fact |             |

**Description:**
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

<tr>
<td>SF-1145</td>
<td>Emergence of Southeast Asia</td>
</tr>
<tr>
<td>Credits:</td>
<td>4.00</td>
</tr>
</tbody>
</table>

**Description:**
Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

<tr>
<td>SOC-218</td>
<td>Crime and Law in Indian Country</td>
</tr>
<tr>
<td>Credits:</td>
<td>4.00</td>
</tr>
</tbody>
</table>

**Description:**
What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.
- SOC-227 Race in American Society  
  **Credits:** 4.00  
  **Description:** Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to healthcare and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

- SOC-228 Cultural, Global and Social Perspectives  
  **Credits:** 4.00  
  **Description:** Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.

- SOC-275 Women and Crime  
  **Credits:** 4.00  
  **Description:** This course examines the complex relationships between women and crime today. This focus will include women as criminal offenders; women as victims of crime; and women as both offenders and victims. Course materials draw from recent feminist
scholarship on these issues in the social sciences. Topics include the causes of women’s crime women, drugs, and crime; child abuse and trauma; prostitution and sex trafficking; race, gender and victimization; and feminist social movements against violence. Crimes of violence against women are a central focus in the course.

- **SOC-329 Sociology of Globalization**
  **Prerequisites:**
  Prerequisite: SOC 113 or SOC 116.

  **Credits:**
  4.00

  **Description:**
  Globalization is shrinking the world. How and why did this happen? This course will explore global change and the global processes which effect key social institutions: culture, the economy and politics. Students will study the processes of globalization and its impact on our lives and people around the globe.

- **SOC-341 International Drug Control Policy**
  **Credits:**
  4.00

  **Description:**
  Relying on a simplistic demand or supply explanation of why Americans use/abuse drugs obscures the reality of America’s drug problem, is ineffective as a guide to public policy and has unforeseen, often negative consequences. Drug use is a complex and multi-faceted issue. There are no easy answers. To comprehend the complexity of America's drug problem one needs an understanding of the geography, history, religion, law, economics and international politics of the Middle and Far East, Eastern Europe, Africa, Mexico, and Central and South America. This class will provide this basic understanding without losing sight that the problem we seek to remedy is our own.

- **SOC-354 Death and Dying**
  **Credits:**
**Description:**
An examination of changing definitions of life and death, social factors affecting causes and rates of death, care of the dying and their families, institutionalization, the funeral industry, suicide, crisis intervention, and the impact of technology on the dying process.

---

**SOC-357 Global Health and Healing**

**Credits:**
4.00

**Description:**
An examination of how different cultures understand health and illness. Healing approaches from Asia, Africa and the Americas will be explored.

---

**SPAN-202 Intermediate Spanish II**

**Prerequisites:**
SPAN 201 or Instructor’s consent.

**Credits:**
4.00

**Description:**
Continues skills development from 201. Students read a collection of short stories, write compositions, develop cultural insights through comparative and contrastive assignments, and practice listening and speaking skills in weekly conversation sessions.

---

**SPAN-290 Advanced Composition & Conversation**

**Prerequisites:**
Prerequisite: Spanish 202, 203 or 250 or Instructor’s consent

**Credits:**
4.00
Description:
Develops written and oral skills in various contexts and registers. Emphasis on strengthening written skills and learning to speak clearly and persuasively in Spanish. Short texts and audio-visual materials provide the basis for classroom activities which include regularly assigned essays, group discussions and debates.

- **SPAN-300 Intro to Cultural Texts**
  
  **Prerequisites:**
  Spanish 202, 203, 250 or Instructor's consent.

  **Credits:**
  4.00

Description:
Explores a selection of Peninsular and Latin American cultural materials. Primarily examines texts from different literary genres (narrative, drama, essay, and poetry). Develops critical skills required in more advanced Spanish courses, through close readings and textual analysis. Activities include regularly assigned essays, group discussions, and short scene work.

- **SPAN-301 Spanish Culture and Civilization**
  
  **Prerequisites:**
  Spanish 202, 203 or 250. Spanish 290 or 300 are strongly recommended

  **Credits:**
  4.00

Description:
Examines the civilization and culture of Spain highlighting its historical development and cultural manifestations from pre-historic times to the nineteenth century. Students improve their four skills through activities that include discussions, oral presentations, and writing assignments based on reading and films.

- **SPAN-302 Indigenous and Colonial Latin America**
  
  **Prerequisites:**
Spanish 202, 203 or 250 or Instructor's consent. Span 290 or 300 strongly recommended.

**Credits:**
4.00

**Description:**
Introduces students to the complexity Latin America by examining its roots in pre-Columbian America and the impact of Spanish exploration and colonization. Places emphasis on cultural, economic, historical, philosophical, political and religious patterns that define the region. Includes class discussions, oral presentations, and writing assignments based on reading and audio-visual material.

---

**SPAN-303 Modern and Contemporary Latin America**

**Prerequisites:**
SPAN 202 or 203 or Instructor's consent. SPAN 290 or 300 strongly recommended.

**Credits:**
4.00

**Description:**
Examines the path taken by Latin American and Caribbean countries to build independent nations out of colonial territories highlighting the 19th, 20th, and 21st centuries, ethnic plurality, and cultural complexity in areas such as politics, religion, sociology, economics, customs, music & film. The cultural contributions of Spanish-speaking minorities in the United States are also addressed. Includes class discussions, oral presentations, and writing assignments based on readings and audio-visual material.

---

**SPAN-315 Spanish for the Professions**

**Prerequisites:**
SPAN 290 or SPAN 300 or Instructor's consent.

**Credits:**
4.00

**Description:**
Integrates language learning with culture via business context of the Hispanic world. Spanish for banking and finance, marketing and advertising, and international commerce are highlighted. Students increase their cross-cultural understanding and written and oral proficiency in business Spanish through a wide range of assignments.

- **SPAN-390 Introduction to Latin American and Caribbean Literature**
  **Prerequisites:**
  SPAN 300; SPAN 302 is strongly recommended

  **Credits:**
  4.00

  **Description:**
  Examines authors from Latin America and the Caribbean in their historical and cultural contexts. Reading and class discussions consider the relationship between the writer and society by covering such topics as colonialism, the oral tradition, modernism and the emergence of new narratives in the twentieth century. The Inca Garcilaso, Sor Juana, Carlos Fuentes, Rigoberta Menchu, and Pablo Neruda are among some writers studied.

- **THETR-260 Broadway Musicals**
  **Credits:**
  4.00

  **Description:**
  This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.
4.00

**Description:**
This course provides a formal introduction to the theories and practices strategically used by American theatre artists after the Second World War. Special emphasis is placed on theatre artists exploring issues of cultural identity including works by GLBT, African-American, Asian-American, and Latin American playwrights. These playwrights may include Tony Kushner, Paula Vogel, Suzan-Lori Parks, Adrienne Kennedy, August Wilson, David Henry Hwang, Philip Kan Gotanda, Eduardo Machado, and Melinda Lopez. The course will also provide an introduction to trends in post-modern theatre practices related to emerging work of the auteur director, solo performers, and interdisciplinary collectives. Satisfies a core requirement for Theatre majors. Normally offered alternate years.

– **WGS-111 Women, History, and Culture**

**Credits:**
4.00

**Description:**
Explores the roles and images of women in Western culture and the realities of women’s everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

– **WGS-H111 Women, History, & Culture**

**Prerequisites:**
At least a 3.3 GPA required.

**Credits:**
4.00
Description:
Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

— WGS-113 Women, Science, and Society

Credits:
4.00

Description:
Explores women's lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the female body and eating disorders; women's health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

— WGS-115 Introduction to Gender Studies

Credits:
4.00

Description:
Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women's studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology, explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about
gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

- **WGS-235 Gender and Sexuality in Visual Culture**

**Credits:**
4.00

**Description:**
Explores how gender and sexuality are depicted, constructed, and interrogated across a variety of visual mediums, including film, television, and photography. We will pair foundational readings in queer and feminist thought with representations in order to consider how theory and popular culture engage in a constant dialogue. Topics include: the maintenance of norms regarding gender and sexuality; how race, class, and ability complicate our understanding of gender and sexuality; the ways in which sexuality intertwines with other social and political formations; imagining alternative theories and practices in representing gender and sexuality in contemporary media culture. Possible texts include theoretical work by Sigmund Freud, Judith Butler, Rosemarie Garland-Thomson, and David Halperin and media such as The Shape of Water (2017), Blade Runner (1982), Queer Eye for the Straight Guy (2003-2007), and Jess Dugan's To Survive on This Shore (2018).

- **WGS-311 Engendering Entertainment: Feminism and Popular Culture**

**Credits:**
4.00

**Description:**
Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy’s Female Chauvinist Pigs, and Caitlin Moran’s How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.
- **WGS-315 Feminist Thought**
  
  **Credits:**
  4.00
  
  **Description:**
  Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class, sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist arguments. Readings include classic critical texts by authors including Mary Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldua, and Judith Butler.

- **WGS-325 Global Women's Fiction**
  
  **Credits:**
  4.00
  
  **Description:**
  Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

- **WGS-335 Queer Narratives**
  
  **Credits:**
  4.00
  
  **Description:**
Explores the stories that help us to understand communities, identities, and bodies that could be considered queer, and the ways that film, music, memoir and fiction have discussed queer as different, unusual, or other. Texts include the documentary, "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's recent memoir, "Redefining Realness", as well as foundational queer theory from Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help build a framework for approaching and interpreting both fictional and non-fictional accounts of queer lives.

- **WGS-340 Women on Stage**

  **Credits:**
  4.00

  **Description:**
  Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht's alienation effect, and the distinction between performance and the performative.

**Science, Technology, & Engineering (STE): 2 courses, at least one with a laboratory, 8 credits**

Choose two STE courses (and corresponding laboratory where applicable) from those listed below. Courses do not need to be in a sequence. In the case of a course that is a lecture plus a lab, the student must complete both components to earn credit for the STE requirement.
Some Science division courses may have Math or Computer Science prerequisites; many have other Science prerequisites.

## Biology

- **BIO-105 Humans and the Evolutionary Perspective**
  - **Prerequisites:**
    Non Science Majors Only
  - **Credits:**
    4.00
  - **Description:**
    Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

- **BIO-109 Plants and People**
  - **Prerequisites:**
    Non Science Majors Only.
  - **Credits:**
    4.00
  - **Description:**
    This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.
<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO-111 Introduction to the Cell</td>
<td>Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.</td>
</tr>
<tr>
<td>BIO-L111 Introduction to the Cell Laboratory</td>
<td>Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.</td>
</tr>
<tr>
<td>BIO-114 Organismal Biology</td>
<td></td>
</tr>
</tbody>
</table>
Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

- **BIO-L114 Organismal Biology Laboratory**
  **Prerequisites:**
  Must take BIO 114 concurrently

  **Credits:**
  1.00

  **Description:**
  A series of laboratory experiences in evolution, diversity, anatomy and physiology.

- **BIO-201 Biology’s Big Questions**
  **Prerequisites:**
  Non Science Majors Only.

  **Credits:**
  4.00

  **Description:**
  This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

**Chemistry**

- **CHEM-105 Chemical New Product Development**
  **Prerequisites:**
  ENT 101
**Credits:**
4.00

**Description:**
This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

– **CHEM-106 Biotechnology & Its Applications in Medicine, Agriculture, Law**

**Credits:**
4.00

**Description:**
Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, short documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.

– **CHEM-111 General Chemistry I**

**Prerequisites:**
Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

**Credits:**
3.00

**Description:**
Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

— **CHEM-L111 General Chemistry Laboratory |**

**Prerequisites:**
MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

**Credits:**
1.00

**Description:**
Introduces the basic principles of chemistry through “discovery” laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

---

**Computer Science**

— **CMPSC-F107 Ants, Rumors and Gridlocks**

**Prerequisites:**
Math placement level of 2 or above or any MATH course at the level 100 or above

**Credits:**
4.00

**Description:**
Do viruses and rumors spread like forest fires? How do ants cooperate? Do spoken languages and biological species evolve in a similar way? "Ants, Rumors, and Gridlocks" exposes students to introductory aspects of computational science by addressing and answering these and many other questions. Students use and modify virtual experiments preprogrammed in the NetLogo programming language to investigate these topics and others in Social Sciences, Biology, and Environmental Science. No prior knowledge of computer programming or NetLogo is required.

**Electrical Engineering**

- **ECE-288 Measuring the World**
  **Credits:**
  4.00

**Description:**
The world is addicted to quantifying the essence of everything, from personal IQ, to the speed of a baseball, to our healthiness, or our chances of winning the lottery. Behind most of these numeric values exists a science of measurement. Some of this is referenced to international standards, such as for length, time, weight, or temperature. Others are more arbitrary and subjective, such as ranking Olympic performance in gymnastics, beauty pageants, or popular responses as found in the game show "Family Feud." A third category includes controversial areas, such as measuring whether a person is lying when interrogated, or using hype rather than reality to market products. Sometimes statistics are used to predict sports outcomes, such as in the annual March Madness NCAA basketball brackets. Finally, in a world subject to fraud and deception, it can be essential to distinguish legitimate from counterfeit items, such as in money, art, collectibles, and historical documents. Don’t get hoodwinked! This course examines all of these, starting with how measurements have been made throughout history, along with a full deck of entertaining terms used during the ages. This may help you sort out your weight, whether given in pounds, kilos, or stones. Often these terms will provide insights into how people lived in different eras. We will also look at some of the technologies currently available to provide these measurements, and unravel the complexities of various sensors that are used. As we consider the meaning of "accuracy" we may become less naive about how much confidence to ascribe to the results given us. Hovering around all of these measurements should be the question.
of validity - are they meaningful, useful, or misleading? And the impact they have on society - whether they steer behavior more powerfully than one might originally suspect. Each student will also be given an opportunity to become an "expert" in an area of measurement of personal interest. By the end of the course all students should have gained greater insight into how the world around them is quantified, and whether numbers can provide accurate predictors for our future. Algebra helpful. Basic science background helpful. Curiosity essential!

**Engineering Science**

- ENS-103 Introduction to Engineering

**Prerequisites:**
ENS L103 MUST BE TAKEN CONCURRENTLY.

**Credits:**
3.00

**Description:**
"This course provides exposure to engineering practice, with particular focus on electrical engineering components such as circuit elements and systems. It seeks to go beyond the mathematics and provide an intuitive appreciation of functional devices. Examples taken from a broad swath of technological history illustrate significant crossroads, decisions, and inventiveness. Emphasis is placed on learning to think as an engineer - assessment of problems, candidate solution tradeoffs, and implementations. Frequent exercises in creative engineering design will be used. Students will be required to design several elementary devices, such as a magnet, a capacitor, a timing device, and a motor, which they will enter in a competition for overall strength, compactness, accuracy, or speed. Sometimes assignments relate to "'survival on an island"' concerns, such as communication or drinking water. Students also learn about reverse engineering by selecting, building, troubleshooting, and presenting an electronic kit of their choice. A term paper determining the engineering behind a topic of their choice will also be written and presented. On occasion (see ENS L103) there will be team competitions between various smaller groups in the class."

- ENS-L103 Intro to Engineering Lab
**Prerequisites:**
Must be taken Concurrently w/ ENS-103

**Credits:**
1.00

**Description:**
The Lab is designed to provide opportunities to gain familiarity with engineering tools. Students will be introduced to parts (e.g. learn the resistor color code), test equipment (multimeters, prototyping trainers, signal generators, and oscilloscopes), and construction techniques (wiring, soldering, troubleshooting). Although it varies from year to year, Class Projects can be built during the Lab sessions. In the past these have included a 25 Watt electric generator, various door lock systems (both mechanical and electronic), and an AM transmitter and receiver (all projects made from scratch). It is likely that 2010-2011 may introduce some robotic creations for a competition. Electronic kits and motors can also be built and serviced in the Lab. There is an adjoining machine shop, which can be utilized (with supervision), for fabricating items. Individual creativity is encouraged, and informal problem solving sessions occasionally occupy lab time. However, the lab is accessible outside of the traditional scheduled time.

**Environmental Science**

- **UES-107 Introduction to Drones**

  **Prerequisites:**
  UES-L107 must be taken concurrently.

  **Credits:**
  3.00

  **Description:**
  Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities
inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration’s Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

UES-L107 Introduction to Drones Lab

Prerequisites:
UES-107 must be taken concurrently.

Credits:
1.00

Description:
Unmanned autonomous systems (UAS) or Drones are high-tech, intelligent machines capable of traveling by air, land, or sea via a remote connection. This course presents concepts and practical methods of using Unmanned Vehicles in a professional context, particularly for environmental projects. UAVs are increasingly being used in a professional capacity such as cinematography and filming, real estate, construction, surveying, mapping, agriculture, industrial inspections, utilities inspections and many more. The course covers mission planning, operations, field data collection, data processing, legal implications, data analysis and data deliverables. The course and laboratory will include learning flying micro-drones and preparing to pass the Federal Aviation Administration’s Unmanned Aerial Vehicle Airmen (Part 107) exam. The course will have an associated Laboratory component in which students will learn how to properly plan effective flight missions, fly safely and legally, develop risk management strategies, analyze the data captured and convert it into a useful data deliverable.

UES-111 Environmental Science

Prerequisites:
Take UES-L111 concurrently

Credits:
3.00

**Description:**
Applies the fundamentals of science to environmental issues. Topics include population dynamics and resources, environmental degradation, ecosystems, geologic processes, deforestation, biodiversity, climate change, air, soil, and water resource management, and pollution and risks to health.

- **UES-L111 Environmental Science Lab**
  **Prerequisites:**
  Take UES-111 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory exercises are used to illustrate topics covered in UES 111. Field testing and analysis of environmental samples. Field trips may be required.

- **UES-121 Science, Art, and the Environment**
  **Prerequisites:**
  Take UES-L121 concurrently

  **Credits:**
  3.00

  **Description:**
  Examines art and cultural objects through the lens of the biological, chemical, and physical principles of the materials and processes we use to make them. Includes consideration of factors important in art conservation. Provides an environmental context for the manufacture and use of art materials and the preservation of cultural objects.

- **UES-L121 Science, Art, and the Environment Lab**
  **Prerequisites:**
  Take UES-121 concurrently
Credits:  
1.00

Description:  
Provides hands-on work with pigments, dyes, and other art materials using the basic principles of science and technology. Students will conduct laboratory experiments that produce art objects and other consumer products. Instruction in safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables, graphs, and graphics. Practice in synthesizing compounds like paints and finishes and in evaluating methods of art conservation.

UES-225 Geographical Information Science
Prerequisites:  
Take UES-L225 concurrently

Credits:  
3.00

Description:  
Provides the fundamentals of geographic information science (GIS) including the history of automated mapping. A review of the necessary hardware and software elements used in GIS is presented. Hands-on exercises with computerized mapping software are required.

UES-L225 Geographic Information Science Lab
Prerequisites:  
Take UES-225 concurrently

Credits:  
1.00

Description:  
Required companion computer laboratory to be taken concurrently with UES 225.

UES-270 SL-Understanding Wetlands Through Citizen Science
Credits:  
4.00

Description:  
In this course students meet community needs by engaging in service-learning outside the classroom. Develops students' awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps. The beginning of the semester is devoted to understanding of how these vital ecosystems function with topics including wetland hydrology, biogeochemistry, management, and restoration. The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner.

UES-H270 Honors SL Understanding Wetlands Through Citizen Science

Prerequisites:  
Honors student or at least 3.3 GPA

Credits:  
4.00

Description:  
In this course students meet community needs by engaging in service-learning outside the classroom. Students' awareness and understanding of wetlands including inland and salt marshes, mangroves, and swamps will be developed through exploration of these vital ecosystems (topics include wetland biology, management, and restoration). The latter portion of the semester is focused on developing a testable citizen science project (e.g. a sampling protocol) for a local salt marsh in conjunction with a local community partner where students will be going into the field three times over the course of the semester via pre-arranged private transportation.

Forensic Science

FS-103 Introduction to Forensic Science

Prerequisites:  

FS-L103 concurrently

Credits:
3.00

Description:
Application of the principles of forensic science in evaluating physical evidence, with emphasis on its role in criminal investigation. Class experiences may include guest lectures and field trips. 3-hour lecture. Normally offered Fall

– FS-L103 Introduction to Forensic Science Lab

Prerequisites:
FS-103 concurrently

Credits:
1.00

Description:
Laboratory experiences related to the collection and analysis of physical evidence as performed by forensic science professionals. Experiments may include forensic microscopy, drug analysis, forensic serology, physical patterns, fingerprint and firearm evidence analysis techniques. 3-hour laboratory. Normally offered Fall

Neuroscience

– NEUR-101 Intro to Neuroscience

Credits:
4.00

Description:
Introduces the field of neuroscience, the study of the organization and function of the nervous system of humans and other animals. Topics include the neuron and neural transmission, the overall function and organization of the nervous system, the development of the brain, neural plasticity, sleep, memory and other higher cognitive functions.
Physics

- **PHYS-111 College Physics I**
  **Prerequisites:**
  Take MATH-121 or MATH-134 or MATH-165 or permission of Physics department chair; PHYS-L111 taken concurrently

  **Credits:**
  3.00

  **Description:**
  Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.

- **PHYS-L111 College Physics Lab I**
  **Prerequisites:**
  PHYS 111 concurrently

  **Credits:**
  1.00

  **Description:**
  Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course. Error propagation, use of Excel, laboratory notebooks and formal reports required.

- **PHYS-151 University Physics I**
  **Prerequisites:**
  MATH-121 or higher (previously or concurrently) and PHYS L151 concurrently
Credits:  
3.00

Description:  
PHYS 151 is the first of three courses (PHYS 151, 152, 153) that comprise the calculus based introductory physics sequence at Suffolk University intended for students majoring in the physical sciences, engineering and mathematics. This course aims to teach basic techniques in physics that fall under the topic of classical mechanics and their application in understanding the natural world. Specific topics include the study of vectors, Newton's laws, rotations, rigid body statics and dynamics, fluid mechanics, simple harmonic motion, mechanical waves, sound and hearing. The student will learn how to analyze physical situations by using simple models, and also how to solve those models and derive useful conclusions from them. This course will show students how experimental results and mathematical representations are combined to create testable scientific theories, and how the complexities of most real-life physical situations can be reduced to simple problems by identifying the essential physical features and ignoring the rest. The student will learn to distinguish the scientific approach to physical situations from other ways of looking at them, for example, artistic, humanistic, and business.

- PHYS-L151 University Physics Lab I

Prerequisites:  
MATH 121 or higher (previously or concurrently) PHYS 151 concurrently

Credits:  
1.00

Description:  
The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton's laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

- PHYS-152 University Physics II

Prerequisites:  
PHYS-151 and PHYS-L151. Must be taken concurrently with PHYS-L152.
Credits: 3.00

Description:
This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss’ law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday's law and AC circuits are discussed. This is followed by Maxwell's equations, electromagnetic waves, and properties of light.

- PHYS-L152 University Physics Lab II

Prerequisites:
PHYS 151 and L151 and PHYS 152 must be taken concurrently

Credits: 1.00

Description:
The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday’s law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

- PHYS-153 University Physics III

Prerequisites:
MATH-121, MATH-164, or MATH-165; PHYS-151; PHYS-L153 concurrently

Credits: 3.00

Description:
This calculus-based course is the introduction of the topics of modern physics. It begins with special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom. Then Schrodinger's equation is
introduced with use of wave functions, particle box, barrier penetration, quantum mechanical tunneling, the Pauli Exclusion principle, the development of the periodic table, and the X-ray spectra. Development of solid state physics with bonding in molecules, band theory of solids and semiconductor behavior. The final topics cover nuclear physics, radioactivity, half-life, nuclear fission and fusion, medical uses of radiation, elementary particle physics and introduction to astrophysics.

- **PHYS-L153 University Physics III Lab**

  **Prerequisites:**
  PHYS-153 concurrently

  **Credits:**
  1.00

  **Description:**
  The laboratory consists of experiments to illustrate the basic concepts of special relativity, the Lorentz transformation, relativistic momentum and energy, addition of relativistic velocities, then covers early quantum theory, blackbody radiation, photoelectric effect, the Compton effect, photon interactions, pair production, and the Bohr theory of the atom.

**Science**

- **SCI-103 Environmental Science**

  **Prerequisites:**
  SCI-L103 must be taken concurrently

  **Credits:**
  3.00

  **Description:**
  Case study approach to the fundamentals of science applied to environmental degradation, ecosystems, geological processes, population dynamics, deforestation and biodiversity, climate change, ozone depletion, air soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment.
- **SCI-L103 Environmental Science Lab**  
**Prerequisites:**  
Must take SCI-103 concurrently

**Credits:**  
1.00

**Description:**  
Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.

- **SCI-108 Introduction to Cancer Care**  
**Credits:**  
4.00

**Description:**  
Introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants.

- **SCI-109 SL-Introduction to Community Cancer Care**  
**Credits:**  
4.00

**Description:**  
Students meet community needs by engaging in service-learning outside the classroom. This course introduces the top ten U.S. adult cancers, as well as the most common pediatric cancers. Topics to be covered include cancer causes, detection, and prevention. Psychosocial aspects of being diagnosed with cancer and the role nutrition plays for cancer patients will be integrated. The course will also discuss the major treatment modalities for each cancer including radiation therapy, surgery, chemotherapy, and bone marrow transplants. Service-learning is a pedagogy
integrating academically relevant service activities that address human and community needs into a course. Students connect knowledge and theory to practice by combining service with reflection in a structured learning environment. Students will engage in service-learning with an underserved community partner in regards to cancer by working directly with cancer patients or by assisting on a project that supports cancer patients.

- **SCI-111 Introduction to Astronomy**

  **Prerequisites:**
  MATH-128 or higher and SCI-L111 must be taken concurrently.

  **Credits:**
  3.00

  **Description:**
  History of Astronomy from the ancients to Newton; light; telescopes; sun, earth, moon planets, comets, asteroids, meteors; space programs, science and technology in society. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations. For non-science majors.

- **SCI-L111 Introduction to Astronomy Lab**

  **Prerequisites:**
  Take SCI-111 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory experiments and exercises to illustrate the principles discussed in Science 111. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations.

- **SCI-112 Structure of the Universe**

  **Prerequisites:**
MATH-128 or higher and SCI-L112 concurrently

Credits:
3.00

Description:
Astronomy of the cosmos; sun, stars, interstellar materials, galaxies, pulsars, quasars, black holes; nature of time relativity, cosmology. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations. For non-science majors.

SCI-L112 Structure of the Universe Lab

Prerequisites:
Take SCI-112 concurrently

Credits:
1.00

Description:
Laboratory experiments and exercises to illustrate the principles discussed in Science 112. Observational exercises using the Celestron telescope, astrophotography exercises, and computer simulations. Course culminates with a visit to the Clay Center Observatory, where students will be able to make first hand observations.

SCI-113 A Habitable Earth Within the Solar System

Credits:
4.00

Description:
This course introduces non-science majors to concepts that are central to making our planet habitable. It presents Earth in context of the solar system with a broad view of global climate change and energy resources in a quest to better understand the workings our planet. This course on Earth and Planetary Science is suitable for students who may have taken their last science and math course several years ago, or are just curious about knowing facts on major issues that pertain to the future of our planet. Together with a reading component, this course aims to give students a
flavor of how researchers think, investigate and develop conclusions that directly affect our political and economic future. Topics covered in this course range from the solar system to the study of search for other habitable Earth-like planets, search for extraterrestrial life, and evolution of life on Earth. Other characteristics of this course are heavy use of audio-visual materials often including computer animations and simulations, in-class experiment demonstration, and intensive use of INTERNET-based resources.

— SCI-165 Inner Workings of Physics Universe

**Credits:**

4.00

**Description:**

About 15 billion years ago, (data indicate) the big bang occurred and the universe was born. With it came physical laws and a spectacular array of consequences that lead to the universe as we know it. This non-lab, 4 credit course explores the inner workings of the physical universe in terms of the scientific inquiry which lead to Newton's laws, an understanding of energy, waves, light, electricity, atomic structure, chemical reactions, nuclear physics, particle physics, relativity, and the big bang theory. During the course, students will learn to make use of modern resources to access scientific and technical literature to research a scientific topic. They will learn to distinguish between science and technology (e.g. quantum mechanics and nanotechnology, the discovery of the Higgs boson and the large hadron collider that made it possible, etc.) and to understand how the science, technology, and engineering disciplines play a crucial role in recognizing and solving problems of society and the world that we share.

— SCI-171 The Built World: How Humans Engineer Environments

**Credits:**

4.00

**Description:**

The most basic needs of humans have not changed - water, food, and shelter - but the means of meeting these needs has. In this course, we will examine how technology-driven societies operate by studying how cities are built and how they function. Topics will include water supply and distribution systems; transportation systems (including road and bridge design and construction); building design, construction, and operation (including skyscraper and sustainable building design),
and waste removal systems (municipal and industrial wastewater removal and treatment, solid waste removal and treatment). This is not a course about little gadgets and widgets; this is a course about big engineering marvels; and it emphasizes applications of science - how things work - rather than scientific theory.

SCI-173 Mapping Our World The Power of Digital Maps

Prerequisites:
SCI-L173 must be taken concurrently.

Credits:
3.00

Description:
Geographic Information Science (GIS) link information (number of fire hydrants on a block) to features on a map (e.g., a point representing street address) that has a designated geographic location (as designated by global coordinates). Unlike paper maps, GIS software allows the production of interactive maps that allows the user to layer data, to indicate spatial patterns, to analyze trends, and to combine different features of the mapped area in novel ways. For example, a business person may wish to use GIS to determine the optimum location of retail outlet (based on the mapped demographics of a neighborhood), while an environmental engineer may use GIS to describe the location of outfalls to see how they correlate to areas of stream pollution. In this course, students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type applications is presumed.

SCI-L173 Mapping Our World Lab

Prerequisites:
SCI-173 must be taken concurrently.

Credits:
1.00

Description:
This laboratory illustrates concepts and methods taught in SCI 173. In this lab students will be introduced to maps, map vocabulary and attributes, and GIS mapping through a series of mapping exercises. A knowledge of Windows-type
applications is presumed.

- SCI-181 Science and Life in the 21st Century

  **Credits:**
  4.00

  **Description:**
  No longer offered on Boston campus This is a four credit, non-lab, science course that examines the central scientific problems confronting the 21st century. The course studies particular topics and teaches the necessary science around these topics to provide a good understanding of the issues. The topics currently are: Energy, Science and Economic Decisions, Sustainability of Life on Earth, Health and Science.

- SCI-184 Contemporary Science and Innovation

  **Credits:**
  4.00

  **Description:**
  This is a 4 credit, project based science course that examines the central scientific problems confronting the 21st century. The course consists of lectures, class discussions, field trips, and in-class hands-on activities designed to familiarize the student with different concepts of the lectures. The current focus is on sustainable energy production. A final team project related to the course topics will be given. This is the version of SCI 183 without a separate lab component. Students who have taken SCI 183, L183 are not allowed to take this course.

- SCI-201 Physics for Future Presidents

  **Credits:**
  4.00

  **Description:**
  This course presents a topical introduction to the key principles and concepts of physics in the context of the world events and natural phenomena that confront world leaders and that require informed decisions and responses. Energy, health, counter-terrorism, remote sensing, space programs, nuclear proliferation, and a
host of other modern challenges have technological and scientific dimensions, the understanding of which is essential to avoiding disastrous policy decisions. This course considers the application of physics to these societal challenges. The material is covered at a level and pace that a future world leader should be able to handle; the emphasis is on the development of physical reasoning skills, and not on detailed, mathematical problem solving.

– SCI-210 Earth and Planetary Crystals

**Prerequisites:**
Take SCI-L210 concurrently

**Credits:**
3.00

**Description:**
This course will provide undergraduate students of various disciplines with an introduction to gems and crystals using interactive, evidence-based teaching approaches. Crystalline forms of matter are critical to our existence. Using innovative teaching strategies of in-class hands-on demonstration, supplemented with visuals of crystal details, the course provides students insights into the formation, alteration and unique properties that make crystals invaluable. Topics range from the study of proteins and nucleic acids to the interior of planets. The in-class lectures will provide a basic guide that will serve as a platform for individually catered in-depth study. Therefore, the course is open to advanced students as well, who can pick up higher level of information for discussion and class projects.

– SCI-L210 Earth and Planetary Crystals Laboratory

**Prerequisites:**
Take SCI-210 concurrently

**Credits:**
1.00

**Description:**
This course introduces concepts that are central to understanding crystals, gemstones and other natural materials abundant throughout the solar system. It includes an introduction to carbon-based crystals (diamonds, proteins, viruses and
ices) in context with origins of life, geopolitical significance and their applications
This laboratory-based course is an introduction to modern tools and techniques for
crystal analysis with a historical context of some of the greatest discoveries in
science (DNA, and other nanomaterials). It presents crystals and gems from their
visually appealing point of view to their sometimes-dramatic physical
characteristics, with a broad view of their formation, occurrence, physics, chemistry
and resources perspective.

</tbody>
</table>
Description:
Study of poetry, prose, and drama, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author’s craft and relationship to the reader. Offered every semester.

---

- ENG-135 World Literature in English

Credits: 4.00

Description:
A study of literature written in English from cultures around the world, with emphasis on major modern and contemporary writers from countries such as Australia, Canada, India, Ireland, Nigeria, South Africa and the Caribbean. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

---

- ENG-141 Studies in British Literature

Credits: 4.00

Description:
Study of poetry, prose, and drama from the British literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author’s craft and relationship to the reader. Offered every semester.

---

- ENG-142 Studies in American Literature

Credits: 4.00

Description:
Study of poetry, prose, and drama from the American literary tradition, with emphasis on close reading and literary analysis. Students will compose formal essays discussing the meanings and relationship between texts as well as the author’s craft and relationship to the reader. Offered every semester.
- **ENG-151 Introduction to African-American Literature**
  **Credits:**
  4.00

  **Description:**
  Literature has the capacity to record and interrogate history in an imaginative and artistic context. African-American literature is a rich, varied, and complex body of literature that faces our tainted history directly. The authors we will read in this class examine slavery's long-term psychological and social effects while forging a literary history that is at once a part of and apart from American literary history more generally.

- **ENG-152 Horror Fiction**
  **Credits:**
  4.00

  **Description:**
  This course focuses on the reading and analysis of horror literature and the ways in which horror reflects and represents personal and cultural anxieties. Readings will include both classic and contemporary authors, for example, Edgar Allan Poe, H.P. Lovecraft, Shirley Jackson, Stephen King, and others. Assignments will include analytical essays as well as creative writing.

- **ENG-153 Literature of War**
  **Credits:**
  4.00

  **Description:**
  This course will examine a wide range of writers and film makers who have sought to bridge the gap that exists between those who have experienced war and those who have not. Some stories we will examine are told from an American perspective; some are told from the perspective of soldiers who fought against Americans; and some are told from those who experienced life under U.S. military occupation.

- **ENG-154 Bob Dylan and the Beat Generation**
**Credits:**
4.00

**Description:**
A study of literary works by the so-called "Beat Generation," the American literary underworld of the late 1950s and 1960s, including major works by the three central figures (Ginsburg, Kerouac, Burroughs) and less central figures (Corso, Snyder, DiPrima, Jones/Baraka) as well as the influence of the Beats on the work of Bob Dylan, the only musician to win the Nobel Prize in Literature.

---

- **ENG-155 Young Adult Literature**

**Credits:**
4.00

**Description:**
Young Adult Literature’s recent explosion in popularity raises important questions about the stories it tells, the values it promotes, and the audiences it seeks. This course approaches the YA phenomenon as one with deep historical roots as well as contemporary cultural relevance. From nineteenth century classics to current series favorites, literary works focused on young people reframe perennially fresh narratives about coming of age, negotiating personal identity, and navigating a complex moral universe. This course also considers YA literature as part of an evolving network of writers, readers, publishers, critics and filmmakers.

---

- **ENG-157 Poetry and Religion**

**Credits:**
4.00

**Description:**
This course will use close readings to examine poetry as a heightened form of language seeking to make contact with divine sources of faith. We will consider poems that provide examples of the struggle to attain belief, as well as poems that deny belief. Language as both the grammar of ascent and the locus of descent. The position of human beings in relation to God, or the gods, or the absence of the divine.
- **ENG-158 Nasty Women and Unruly Voices in American Literature**
  **Credits:**
  4.00

  **Description:**
  This course takes students on a tour of witches, "nasty women," and other "unruly tongues" or "bitter spirits" throughout American literary history. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Fulfills the Literature Requirement of the CAS Core Curriculum.

- **ENG-159 The Literature of London**
  **Credits:**
  3.00

  **Description:**
  For more than a thousand years, the city of London has been a cultural center, the home of playwrights and poets, novelists and critics, theaters and libraries. In this class we will read a wide range of literary works in different genres that take the city of London, and the experience of living or writing there, as central themes. The class will emphasize close reading and literary analysis of London texts, and will also explore contextualizing materials from newspaper articles to music and art. Designed to be taken in tandem with an optional one-credit study abroad trip to London, UK.

- **ENG-161 Writing the American West**
  **Credits:**
  4.00

  **Description:**
  Study of 20th century writing on the American West by American women and men in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes provide the basis for the study of "frontier" or western literature by American authors. Fulfills the Literature Requirement of the CAS Core Curriculum.
- **ENG-213 English Literature I**
  
  **Prerequisites:**
  English Majors and Minors or Instructor Permission
  
  **Credits:**
  4.00

  **Description:**
  Study of major writers of England from the beginning to the mid-18th century. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

- **ENG-214 English Literature II**
  
  **Prerequisites:**
  English Majors and Minors or Instructor Permission
  
  **Credits:**
  4.00

  **Description:**
  Study of major English writers from the mid-18th century to the present. Regularly assigned essays on the reading provide the basis for individualized instruction in clear, correct and persuasive writing. Offered every semester.

- **ENG-217 American Literature I**
  
  **Prerequisites:**
  English Majors and Minors or Instructor Permission
  
  **Credits:**
  4.00

  **Description:**
  Study of major American writing from its origins through 1865. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.
- **ENG-218 American Literature II**
  **Prerequisites:**
  English Majors and Minors or Instructor Permission

  **Credits:**
  4.00

  **Description:**
  Study of major American writing from 1865 through the present. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

- **ENG-347 20th Century Female Gothic**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  This course focuses on Gothic literature by women writers, from its origins in the 18th century to the present, focusing primarily on 20th century writers. The novels, short stories, and films we will discuss involve haunted houses, secret chambers, madness, and other Gothic tropes. Writers to be studied will include Charlotte Bronte, Daphne du Maurier, Shirley Jackson, Jean Rhys, Angela Carter, and others.

- **ENG-356 Whitman and Dickinson**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  An investigation of the lives and works of two of nineteenth-century America's greatest and most original poets. Topics will include types of poetic language and formal structure, the work of the poetic imagination in transforming observations of
the world into art, and the ways in which poets process the idea of death and the reality of war. Finally, this course examines Whitman and Dickinson's impact on American popular culture as well as on the writings of modern poets and literary critics.

- **ENG-358 Women Writing the American West**
  **Prerequisites:**
  Take WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  Study of 19th and 20th century writing on the American West by American women in the form of novels, memoirs, and short stories. Regularly assigned reading responses and essays on the readings as well as discussion questions and quizzes provide the basis for the study of the gendering of the "frontier" and literature of the West by American women authors.

- **ENG-361 Contemporary American Fiction**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  The course will cover major works of American fiction from the period between the end of the American war in Vietnam and the present. The course will emphasize fiction reflecting America's cultural diversity and current trends in fiction.

- **ENG-362 Asian-American Literature**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
Description:
An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

ENG-388 Utopias and Dystopias
Prerequisites:
WRI-102 or WRI-H103

Credits:
4.00

Description:
This course follows the spirit of utopian experimentation as it travels through the linguistic patterns and imaginative conditions of brave new worlds in literature. We will consider how utopian thinking allows writers to take creative license with political systems, social relations, gender roles, and racial identities, and to blur dividing lines between nature, technology, and culture as well as between Earth and the cosmos. Our readings will balance such foundational texts as Plato’s Republic and More’s Utopia with revolutionary works from the nineteenth through the twenty-first centuries, and conjure utopian dreams as well as dystopian worlds gone wrong. Selected works of literary criticism and films will also be included.

ENG-395 Rhetoric and Memoir
Prerequisites:
WRI-102 or WRI-H103

Credits:
4.00

Description:
This course examines the rhetoric of memoirs written primarily by international figures who seek to use personal stories to shape readers’ perspectives on political issues. After a brief introduction to rhetorical theory and to the genre of memoir,
this course will examine contemporary memoirs that address such issues as racism, sexism, religious extremism, war, and genocide.

- **ENG-410 From Pagan Reason to Christian Revelation**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  A survey of major works of literature and thought crucial to the transformation of pagan models of reason to Christian systems of belief, including works by Plato and Plotinus, St. Augustine and Dante. Of central concern is the changing conception of love, from Eros to Agape. Note: This course is cross-listed with HST 339.

- **FR-216 Masterpieces of French and Francophone Literature in English Translation**

  **Credits:**
  4.00

<tr>
<td>PHIL-424</td>
<td>Philosophy and Literature: Feodor Dostoevsky and the Great Philosophical Novel</td>
<td>4.00</td>
<td></td>
</tr>
</tbody>
</table>

Description:
A study of the nineteenth-century Russian novelist Feodor Dostoevsky and his contribution to world philosophy and literature. Dostoevsky’s stories, which weave together philosophical reflections, unique personalities and gripping plots, earned the author numerous superlative titles. Dostoevsky has been praised as a literary genius, a prophetic political thinker, a keen psychologist and an expert on human condition. His work inspired generations of intellectuals, among them prominent European thinkers: Nietzsche, Freud, Heidegger, Sartre, Camus, Hesse and many others. In addition to a detailed study of Dostoevsky’s writings the course explores the socio-political, literary, and intellectual contexts in which he developed as a thinker, introducing students to both his opponents and admirers.

- **SPAN-426 Latin American Theater and Society**

  **Prerequisites:**
  SPAN 290 or SPAN 300 or Instructor’s consent. Spanish 302 is strongly recommended

  **Credits:**
  4.00

  **Description:**
  Introduces students to the most important movements and playwrights of Latin American Theater in the 20th and 21st Centuries. Students examine the history of Latin American Theatre since its inception and become familiar with the most important performing centers.

- **WGS-211 Heroines, Hotties & Hubris: Adolescent Girl’s Books**

  **Credits:**
  4.00

  **Description:**
  Explores what we can learn from the books that teenage girls read. In addition to a wide array of interesting and complex Young Adult novels targeted to young female readers, students will be exposed to theories of adolescent development, literary criticism, and social theory. Topics include how the dilemmas of girlhood have changed or stayed constant and the urge, so common in books for children and teens, to teach kids how to think and behave.
- **WGS-220 Other Worlds, Other Genders: Women and Science Fiction**
  **Credits:**
  4.00

**Description:**
Examines through both classic and contemporary science fiction a variety of possibilities for world-reimagining in the realms of gender, sexuality, race, and other forms of difference. Draws on theories of utopian and dystopian discourse, engages with questions of biology and reproduction, and explores colonialism through first-contact and space empire narratives.

- **WGS-325 Global Women’s Fiction**
  **Credits:**
  4.00

**Description:**
Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic.

- **WGS-340 Women on Stage**
  **Credits:**
  4.00

**Description:**
Examines the history of female portrayal on the Western stage including women in Shakespeare and other early modern plays (when female characters were played by men); in Restoration comedy; the works of Oscar Wilde and George Bernard Shaw; and 20th and 21st century depictions of women on stage, including in the works of authors such as Lillian Hellman, Lorraine Hansberry, Caryl Churchill, Paula Vogel, Suzan-Lori Parks, Rebecca Gilman, and Sarah Ruhl. Students develop familiarity with key concepts in performance theory including catharsis, Brecht’s alienation effect, and the distinction between performance and the performative.
Ethical & Philosophical Inquiry: 1 course, 4 credits
Archive 2018-2019

Choose one Ethics course from those listed below:

- PHIL-119 Ethics
  Credits: 4.00
  **Description:**
  A systematic introduction to the major thinkers and their positions on the main issues of ethics, such as: What is morality? What are moral values? How should we live our lives? Are there objective, universal, absolute moral standards? If so, what are they, and what is their basis? 1 term - credits. Normally offered every year.

- PHIL-120 Ethics and Civic Life
  Credits: 4.00
  **Description:**
  In this class you will be introduced to the perspectives and methods of politics, philosophy, and economics and see how these three disciplines present distinct but interconnected dimensions of current social and political issues.

- PHIL-123 Social Ethics: The Good Life
  Credits: 4.00
  **Description:**
  An examination of contemporary Western society, particularly in the United States, in relation to philosophical attempts to define the "good life.” Current books that exhibit a philosophical approach towards important contemporary social issues will be discussed, as well as classics in philosophy. Topics may include: civic virtue,
consumerism, current events, economic justice, popular culture (film, music, television), religion and secularism, etc. 1 term - 4 credits. Normally offered every year.

- **PHIL-127 Contemporary Moral Issues**
  
  **Credits:**
  4.00

  **Description:**
  A critical examination of a number of contemporary moral issues such as: abortion, affirmative action, animal rights, capital punishment, cloning, drug legalization, environmental ethics, euthanasia, genetic engineering, gun control, pornography, same-sex marriage, suicide, war and terrorism, etc. 1 term - 4 credits. Normally offered every year.

**Human Behavior & Societies: 1 course, 4 credits**

*Archive 2018-2019*

Choose one Human Behavior and Societies course from those listed below:

**Advertising and Public Relations**

- **ADPR-285 Media and Pop Culture I**
  
  **Credits:**
  4.00

  **Description:**
  Examines the influence of media on contemporary society from a social science perspective. Television, radio, film, and print formats are discussed in terms of their persuasive impact on mass culture in the U.S.. The emergence and development of "Rock N Roll" is discussed in unison with the Civil Rights, Student's Rights, and anti-War movements of the period from 1946-1972.
## Communication

- **CJN-255 Introduction to Media**  
  **Credits:** 4.00

  **Description:**  
  An introduction to the role of media in contemporary society, focusing on media's influence on cultural, political, and ideological processes. An examination of the historical contexts within which newspapers, radio, television, and new media technologies develop, and how audiences interact with and influence the use of media.

- **CJN-375 Organizational Communication**  
  **Credits:** 4.00

  **Description:**  
  Historical development of the theory of organizations, examination of information flow, network analysis, communication overload and underload, corporate culture, superior-subordinate communications, organizational effectiveness, and change processes.

## CUES

- **UES-101 Environmental Studies**  
  **Credits:** 4.00

  **Description:**
Focuses on the natural environment through the lens of social science and humanities. Students will study texts from those disciplines to acquire a deeper understanding of the values and beliefs that underlie environmental issues. Students will investigate the policy-making processes and institutions through which those issues are decided, and the social inequalities in the distribution of environmental problems. Texts to be studied will range from literature, philosophy, and film to policy statements, impact reports, community advocacy materials, and investigative journalism.

**Economics**

- **EC-151 Economic & Human Geography**
  **Credits:**
  4.00
  **Description:**
  The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

**Government**

- **GVT-110 Introduction to American Politics**
  **Credits:**
  4.00
  **Description:**
An introduction to the American political system and constitutional framework. Focus will be on the interplay of various institutions (the Presidency, Congress and the Judiciary) in creating public policies. Contemporary public issues will be discussed, as will the role of political theory in shaping American democracy. Attention will be given to the role of the news media, public opinion, political ideology, political parties and interest groups in the American system.

**GVT-115 Evolution of the Global System**

**Credits:**
4.00

**Description:**
Introduces the main actors, ideas, institutions, and processes that shape the international system. Analyzes key international developments, including imperialism, nationalism, the causes of wars and peace, and globalization. Integrates international relations concepts with history to explain the unprecedented levels of prosperity and violence in Europe, particularly in light of its dominant role in recent centuries. Emphasizes contemporary developments taking place in other regions such as Asia, Africa, and Latin America. Helps students understand the global arena as a space of complex interconnections and sets the foundations for other courses in international relations and regional studies. Normally offered every semester. This course sets the foundations for other courses in International Relations and Regional Studies.

**Psychology**

**PSYCH-114 General Psychology**

**Credits:**
4.00

**Description:**
Surveys core theoretical concepts and contemporary empirical research from the major sub-fields of psychology: physiology; perception; cognition; learning; emotion; motivation; development; personality; psychopathology; psychotherapy; and social behavior. Offered every semester.
- PSYCH-249 Introduction to Lifespan Development

**Credits:**
4.00

**Description:**
Examines biological, cognitive, social, and emotional development across the lifespan, with attention to the role of culture and context. Explores how various major theories of development can be used to adaptive and maladaptive behaviors and trajectories and considers. Implications for treatment, prevention, and positive development across the lifespan. Normally offered yearly.

**Sociology**

- SOC-113 Introduction to Sociology

**Credits:**
4.00

**Description:**
An introduction to the sociological understanding of human interaction, group process and social structures. Students are introduced to basic concepts, theories and methods of sociological investigation. Majors and minors must pass with a grade of "C" or better.

- SOC-116 Social Justice

**Credits:**
4.00

**Description:**
An examination of traditional and contemporary problems associated with major social institutions such as the family, economics, government and education. Social forces related to ethnicity, social class, health and welfare, and urbanization are also included. Alternative remedial measures based on behavioral science theories are discussed. Majors and minors must pass with a grade of "C" or better.
- **SOC-221 Environment and Society**

  **Credits:**
  4.00

  **Description:**
  This course will explore our natural environment and human interacations with it. We will connect a critical study of society, power, and inequality to the study of our natural environment and the ways it is altered by human behaviors. We will also consider ways to change our society's relationship with the natural environment to keep our earth clean and safe for human society.

- **SOC-223 Families in Contemporary Society**

  **Credits:**
  4.00

  **Description:**
  An exploration of the diversity of contemporary families. Comparisons are made between the cultural myths of the "ideal family" and the lived realities. Challenges confronting contemporary families and their implications for social policy are examined in such areas as work/family conflicts, gay and lesbian families, welfare, family violence.

- **SOC-224 Families in Contemporary Society (Spain)**

  **Credits:**
  4.00

  **Description:**
  Spain has experienced major socio-demographic changes since the mid 1970s. These transformations mainly arise from the new role of women in society and, in particular, women's higher levels of education, work experience, and labor market attachment. The changes in women's labor force participation have occurred in conjunction with a progressive postponement of main family events, such as leaving the parental home, forming a partnership and having children, as well as with a reduction in the family size. Spain is, indeed, characterized as having one of the "lowest low fertility levels" within Western industrialized countries, a pattern that is exacerbating the ongoing process of population aging. This picture partly reflects the conflicting relationship that currently exists between women's labor force
participation and the accommodation of family responsibilities: the so-called work/family balance. Ongoing differences among countries have been accounted for by different explanatory factors that involve socio-economic, cultural and social policy dimensions. From a comparative perspective, the course is intended to cover recent debates, controversies, and research on family formation and family dilemmas in contemporary Spain.

---

- **SOC-227 Race in American Society**

**Credits:**
4.00

**Description:**
Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

---

**Women's & Gender Studies**

- **WGS-113 Women, Science, and Society**

**Credits:**
4.00

**Description:**
Explores women's lives from the perspective of the social and natural sciences, including examination of recent biological, psychological, and sociological theories about gender and gender roles, as well as the influence of feminist scholarship in these areas. Topics include: the social construction of gender; the psychology and biology of sex and gender; women and work; media representations of women; the
female body and eating disorders; women's health and lifecycle; women and sexuality; reproduction, abortion, and motherhood; and sexual violence against women.

Social & Intellectual History: 1 course, 4 credits
Archive 2018-2019

Choose one course from those listed below:

American Studies

- AMST-101 American History and Culture
  Credits:
  4.00

  Description:
  This course offers a basic introduction to American culture and society through the study of American History. The city of Boston and its extraordinary history and institutions will be at the heart of the class and students will frequently visit sites close to the campus. Topics will focus on areas such as the way people from different cultures have understood and misunderstood each other; the evolution of American politics and political institutions; the American Revolution and the founding documents and institutions of the United States; the distinct forms of American religion, American literature and the American economy; slavery and race in American society; the rise of America to world power; the changing role of women; the New Deal and the rise of the modern welfare state; immigration; the development of popular culture; and the meaning of Donald Trump. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-111 Defining America and Americans.

- AMST-111 Defining America and Americans
  Credits:
  4.00
Description:
Examines artistic, social, and political imaginings of America and Americans. We will read works by American and foreign observers of the United States to ask how Americans define themselves and how others see them. Course assignments will introduce students to themes, perspectives, and methods in the field of American Studies. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-101 American History and Culture.

Art & Design

- ADG-224 History of Graphic Design
Credits:
4.00

Description:
The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various-isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

Asian Studies

- AS-100 Introduction to Asian Studies: Culture, People, Ideas
Credits:
4.00

Description:
An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations,
Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

**Communication**

- **CJN-114 Great Works of Journalism**  
  **Credits:** 4.00  
  **Description:**  
  An examination of important contributions to the literature of journalism through an analysis of major writers and news coverage of significant events from a journalistic perspective.

**English**

- **ENG-123 Great Books of the World I**  
  **Credits:** 4.00  
  **Description:**  
  Literary masterpieces from ancient times to the Renaissance, including: Homer's Odyssey, Sophocles' Oedipus, Virgil's Aeneid, selections from the Hebrew Bible and the Gospels, and Dante's Divine Comedy. List may vary at the discretion of the instructor.

- **ENG-124 Great Books of the World II**  
  **Credits:** 4.00  
  **Description:**
This course will introduce students to a selection of Great Books from around the world from the 17th century to the 21st, such as Don Quixote (Spain), Madame Bovary (France), The Communist Manifesto (Germany), The Origin of Species (England), War and Peace (Russia), On Dreams (Austria), Night (Hungary), Things Fall Apart (Nigeria), "Satyagraha" (India), "I Am Prepared to Die" (South Africa), Saeed the Pessoptimist (Israel), The Rouge of the North (China), and The House of Spirits (Chile). Readings may vary at the discretion of the instructor.

Environmental Science

- **UES-325 Environmental History of the U.S.**
  - **Credits:** 4.00

  **Description:**
  Explores how Americans have understood the environment and their relationship to it through analysis of classic environmental texts, historical contexts, and societal perspectives. Analyzes how the environment has changed from pre-colonial times to the present and how these changes have been described through the lens of environmental history. Themes include differing viewpoints of European and indigenous peoples toward the natural environment, the impacts of the Western expansion on native species and landscapes, the rise of industrialism and its impacts on natural resources and ecosystems, and the rise of 20th century environmentalism.

History

- **HST-101 History of Western Civilization I**
  - **Credits:** 4.00

  **Description:**
Surveys European culture, politics, and society from antiquity to the seventeenth century. Topics include: the Greek, Judaic, and Roman heritage; the rise of Christianity; feudal society in the Middle Ages; Renaissance and Reformation; the Scientific Revolution; and the development of absolutist and constitutional governments.

- **HST-102 History of Western Civilization II**
  **Credits:**
  4.00

  **Description:**
  Surveys European culture, politics, and society from the Scientific Revolution to the present. Topics include: the development of absolutist and constitutional governments; the Enlightenment; the French Revolution; Industrialization and urbanization; nationalism and imperialism; World War I, World War II, and the Cold War; the decline of Europe as a world power.

- **HST-103 Cultures and Social Transformations in Asia**
  **Credits:**
  4.00

  **Description:**
  Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

- **HST-121 World History I**
  **Credits:**
  4.00

  **Description:**
Explores the major themes of human history to 1500. Topics include: hunter-gathering, the migration of humans across the globe, transitions to food production, and the development of complex societies based on agriculture. Major early Eurasian civilizations (China, India, the Middle East, and Europe) are examined (alongside their interactions with Inner Asia and the Arabian Peninsula). So too are Sub-Saharan Africa and the Americas.

- **HST-122 World History II**
  **Credits:**
  4.00

  **Description:**
  Explores the major themes of human history since 1500. Topics include: the outward expansion of Europe, the Scientific Revolution, the Enlightenment, the Age of Revolutions, the Industrial Revolution, the creation of a great-power dominated global system, the two world wars, the Cold War, the Third World, globalization, climate change, and modern social and political movements.

- **HST-149 Empires & Globalization in World History I**
  **Credits:**
  4.00

  **Description:**
  This is the first of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include the formation of the medieval trade system, the development of finance and capitalism in the early modern ages, and economic changes prior to the Industrial Revolution. The specific topics may change every year due to new academic developments and publications.

- **HST-150 Empires & Globalization in World History II**
  **Credits:**
  4.00

  **Description:**
This is the second of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include state-making, wars, and the rivalry among early modern empires, economic development, the Industrial Revolution and the formation of the global trade system. The specific topics may change every year due to new academic developments and publications.

- **HST-181 American Life to the Civil War Era**
  **Credits:** 4.00
  **Description:** Surveys American history from European colonization up through the era of the Civil War. Topics include interactions with Native Americans; slavery; the American Revolution; the founding of a new republic; social and economic developments in the early nineteenth century; expansion; party politics; sectional conflict; the Civil War and Reconstruction.

- **HST-182 American Life Since the Civil War Era**
  **Credits:** 4.00
  **Description:** Surveys American history from the 1870s to the present. Topics include the new industrial order; farmer and worker protests; progressivism; America’s emergence as a world power; the two World Wars; the Great Depression; the New Deal; the Cold War; post-World War II American society; the Civil rights movement; Vietnam; dissent and counterculture in the 1960s; the women’s movement; economic, social, and political changes in the late-twentieth century; America’s relationship to a globalized world.

- **HST-251 Modern East Asia**
  **Credits:** 4.00
Description:
China, Japan, and Korea - East Asia's critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.

HST-256 Exploring Asia
Credits: 4.00

Description:
In this course each student will select a topic about Asia that they wish to study. Virtually any topic, to be approved by the professor, is acceptable. The goal will be to write a five to seven page paper about that topic by the end of the course. As a class, we will work together through each step of the process of defining a topic, gathering materials about it, and organizing and reporting the final paper.

HST-260 Asian Peoples and Cultures
Credits: 4.00

Description:
Introduces the peoples of Asia and the cultures they have created. Particular attention is paid to the lives of the common people in both historical and contemporary times. By understanding the richness and complexities of daily life in Asia, we will understand the continuities and discontinuities brought on by social, cultural, and economic changes. We will gain an appreciation of our fellow human beings in Asia.

HST-268 History of the Mediterranean
Credits: 4.00

Description:
Explores the history of the Mediterranean from the ancient times to the 20th century, with emphasis on the extraordinary interaction between the rich cultural, ethnic and religious backgrounds of the peoples of Europe, Middle East, and North Africa.

- **HST-292 American Foreign Relations Since 1898**

  **Credits:**
  4.00

  **Description:**
  Surveys the history of the U.S. as a world power. Examines officials' motives and methods, as well as influences on policy in the form of social and economic forces, interest groups, and foreign challenges. Explores public debates over America's role (as well as debates among historians and international relations theorists), and discusses the domestic and foreign impact of America's world role. Major events addressed include the two world wars, the Cold War, Vietnam, and the U.S. recent history of involvement in the Middle East.

- **HST-312 Renaissance and Reformation Europe**

  **Credits:**
  4.00

  **Description:**
  Explores the intellectual and cultural developments of the Renaissance, and of the Protestant and Catholic Reformation in their social and political contexts. Topics include: Humanism, the rise of the city-state; art, and science; changes in family and social life; the causes of the Reformation (intellectual, social, technological); Calvinists, Lutherans, and Radical Reformers; Counter-Reformation and its political consequences; the Wars of Religion.

- **HST-313 Cities of Early-Modern Europe**

  **Credits:**
  4.00

  **Description:**
Explores the political, economic, social and cultural development of the urban experience in Europe in the 14-1700s. The history of the most important cities of the continent and Mediterranean, and their common path in business, urbanism, society and imperialism.

- **HST-333 The United States: 1898-1945**
  **Credits:**
  4.00
  **Description:**
  Addresses social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also discussed. Topics include: the labor movement, civil rights, woman suffrage, progressivism, the rise of the U.S. as a world power, the First World War, the cultural and social crosscurrents of the nineteen-twenties, Fordism, new developments in advertising and industrial engineering, the Great Depression, the New Deal, and World War II.

- **HST-335 The United States Since 1970**
  **Credits:**
  4.00
  **Description:**
  Examines the transformation of America in the decades since the early nineteen-seventies, taking up social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also emphasized. Topics include: Watergate, the aftermath of the Vietnam War, the end of the post-World War II economic boom, the culture wars, the rise of the New Right and decline of the New Deal order, the end of the cold War, America's growing involvement in the Middle East globalization, the impact and aftermath of 9/11, and the Great Recession of the early twenty-first century.

- **HST-357 History of Spain I**
  **Credits:**
  4.00
### Description:
Surveys the most transcendental social, cultural, economic and political developments in the history of Spain from the Neolithic to the Early Modern Period. Examines the broad history of the nation and its peoples and placing emphasis on three central themes: diversity within the Iberian Peninsula, the region's social and geo-political structures, and the transformation of the Old Order of the ancient kingdoms into a modern, nation-state. Topics include: the Pre-historical period, Roman Hispania, the Medieval Kingdoms, Islamic Civilization, the Christian Reconquest, the Catholic Monarchy, Imperial Spain under the Habsburgs, and the Crisis of the Spanish Empire in the 17th century.

|        |       |         | **Description:**
|        |       |         | Boston from its foundation in 1630 to its development as a 21st century metropolis. From the Massachusetts Bay Colony, to cradle of the American Revolution, to a Yankee merchant capital, Brahmin cultural center, and immigrant melting pot. When offered in the hybrid format, this course will meet at the regularly-scheduled time, but lectures and other course materials will be available on the course Blackboard site in case you cannot attend. |
| HST-385 | Slavery & Race in American History | 4.00 | **Description:**
|        |       |         | Topics will be selected from the following: the nature of slavery; the origins of slavery in America and the process of enslavement; the economics of slavery; the American Revolution and slavery; the slave trade; black and white women and the institution of slavery; rebellions of enslaved people; the pro-slavery argument; racial thought; masters and the culture of the South; the movement to abolish slavery; the literature of slavery; the Civil War and the end of slavery; Reconstruction; Segregation; the Civil Rights Movement; race and racism in contemporary America. |
| HST-394 | Slavery in Film, Literature and History | 4.00 | **Description:**
|        |       |         | A seminar on slavery in the United States as depicted in history, literature, and film. Topics may include resistance to slavery, honor, the attack on slavery, the cultural and social worlds of masters and enslaved people, the thought of masters and enslaved people, women and slavery, and/or slavery as an economic institution. |
| HST-414 | Nazi Germany |         |             |
4.00

**Description:**
Examines German and European preconditions; the Versailles Treaty and the failure of the Weimar Republic; Hitler’s ideas, collaborators and institutions; Nazi foreign and domestic policy; World War II and the concentration camps.

- **HST-426 Politics and Culture in Europe, 1919-1939**
  **Credits:**
  4.00

  **Description:**
  Explores the social and political development of European society between the two world wars, primarily through the literature, art, and films of the period. Topics include: the dissolution of pre-1914 middle class society; deviance and sexuality in the 1920s; the role of decadence in art and the Fascist response to deviance in life and art; women, workers, and the new technology; the rise of Fascism; political engagement and polarization throughout European society in the face of economic and social crisis.

- **HST-483 Death, Disease, Healing-U.S. History**
  **Credits:**
  4.00

  **Description:**
  Investigates how Americans have understood and responded to health, illness, and death from the eighteenth century to the present. Examine interactions among patients, healers (orthodox and heterodox), the medical and scientific professions, business, and government. Explore the effects of scientific and technological advancements, industrialization, urbanization, immigration, war, and social movements on the nation’s moral and political economies of health, and on evolving ideas about bodily integrity and autonomy, linked to historical relations of gender, race, class, and sexuality.

- **HST-489 Germany: Film, Politics, Memory Since 1945**
  **Credits:**
4.00

**Description:**
Explores German history since 1945 through film, newsreels and other archival footage, war memorials and museums, novels, published diaries, memoirs, and recent historical scholarship. Topics include the representation, in film and other texts, of: post-war rebuilding; the German Economic Miracle; divided Berlin; 1960s and 70s radical politics; coming to terms since 1945, with Germany's Nazi past and the Holocaust; coming to terms since 1990 with the Stasi and East German past; "Ostalgie" (nostalgia in the 21st century for some aspects of East German socialism); the multi-cultural society that is Germany today, with new Turkish, Greek, Russian, Arab, and even Israeli communities.

---

**Philosophy**

- **PHIL-210 History of Ancient & Medieval Philosophy**
  - **Prerequisites:**
    Restricted to PHIL majors and minors, PPE majors, and honors students
  - **Credits:**
    4.00
  - **Description:**
    The study of philosophical thought from the period of the ancient Greek philosophers through the Medieval thinkers, including such philosophers as Socrates, Plato, Aristotle, Epicurus, Zeno, Parmenides, Pythagoras, Protagoras, Augustine, Aquinas, Anselm, and Abelard. An introductory course designed to equip the student with a well grounded understanding and appreciation of Philosophy. 1 term - 4 credits. Normally offered every year.

- **PHIL-250 Social & Political Philosophy**
  - **Credits:**
    4.00
  - **Description:**
An examination of persistent debates in political and social philosophy. Topics covered can include the meaning of property and welfare, the tensions between liberty and equality, censorship and freedom of expression, the relation of church and state, human rights and the common good, the possibility of political education and civic virtue, legitimacy of the state, revolution and counter-revolution, war and problems of ends and means, addressing historic injustices, such as racism, genocide, or sexism, among other topics. Students will read both classic and contemporary writings to address both the historical roots and the contemporary treatment of these questions. 1 term - 4 credits. Normally offered every year.

Women's & Gender Studies

- **WGS-111 Women, History, and Culture**
  
  **Credits:**
  4.00

  **Description:**
  Explores the roles and images of women in Western culture and the realities of women's everyday lives through literature, film, history, art, psychology, and recent feminist scholarship. Analyzes gender inequalities and the influence of gender on social structure, human behavior, and artistic expression. Topics include: the social construction of gender and identity; domestic prescriptions for women; women and work; intersections of gender, class, and race in American society; sexualities and identity; the politics of motherhood and reproductive rights; educating girls; negotiating male privilege and structural inequalities; representations of women in Western art and film; and women as artists and gendered models of creativity in art, film, fiction, and science.

- **WGS-115 Introduction to Gender Studies**
  
  **Credits:**
  4.00

  **Description:**
  Introduces the key topics and debates that have shaped the field of gender studies, including queer studies, masculinity studies, and women's studies. Through lecture and class discussion of texts from literature, film, history, psychology, and sociology,
explores the pervasive influence of gender on the structure of society and our everyday experiences and the role that gender plays in our understanding of love, friendship, sexuality, and even violence. Topics include: biological arguments about gender and sexuality; the social construction of gender and identity; intersections of gender, race, class, and sexuality; masculinity and femininity; and theories of sexual difference and the construction of sexuality.

— WGS-311 Engendering Entertainment: Feminism and Popular Culture

**Credits:**
4.00

**Description:**
Investigates the complex intersections between feminism and popular culture through several different lenses: by exploring how feminists make arguments about popular culture; by looking at the complexities of public femininity in today's popular culture, including figures such as Lady Gaga and Katy Perry and television shows like The Bachelor and Grey's Anatomy; by focusing on a variety of articulations of feminism within mass media, blogs, social media, and popular books such as Ariel Levy's Female Chauvinist Pigs, and Caitlin Moran's How to Be a Woman. Along the way we will ask questions about: what makes a work of art feminist; how modern media contributes to or distracts us from a variety of political debates in the realm of female equality and how can we, as individuals, use modern media to create and advance smart, feminist arguments.

— WGS-315 Feminist Thought

**Credits:**
4.00

**Description:**
Investigates how feminists, both today and in history, have understood inequality and difference and looked for the best ways to address these issues and bring about social justice. Examines how feminist theorists help us to understand how gender and other social categories, such as race, class sexuality, disability, age and nationality, are constructed within and through each other; and analyzes feminist engagements with liberalism, socialism, psychoanalysis, existentialism, post-colonialism, critical race theory, and queer theory, as well as consider anti-feminist
arguments. Readings include classic critical texts by authors including Mary
Wollstonecraft, Emma Goldman, Virginia Woolf, Chandra Mohanty, Gloria Anzaldua,
and Judith Butler.

- **WGS-330 Furies to Femi-Nazis: A History of Modern Anti-Feminism**
  **Credits:**
  4.00
  **Description:**
  Explore the deep antipathy women have faced at nearly every turn in their
  struggles for civic and social inclusion. Anti-feminist denials of women’s rights have
taken the form of attacks on women’s nature, bodies, and fitness for public life,
tagging them with labels of otherness: opponents of women’s rights deem them
irrational, unnatural, traitors to society, even sexual deviants. This course will
examine the dangers that women allegedly represent to social stability from the
Enlightenment to the present day, as well as how women have fought back to assert
their rights and independence.

- **WGS-335 Queer Narratives**
  **Credits:**
  4.00
  **Description:**
  Explores the stories that help us to understand communities, identities, and bodies
  that could be considered queer, and the ways that film, music, memoir and fiction
  have discussed queer as different, unusual, or other. Texts include the documentary,
  "Paris Is Burning", Frank Ocean's 2012 album, "Channel Orange", and Janet Mock's
  recent memoir, "Redefining Realness", as well as foundational queer theory from
  Judith Butler, Eve Kosofsky Sedgwick, and Lee Edelman, among others, to help
  build a framework for approaching and interpreting both fictional and non-fictional
  accounts of queer lives.

**Visual & Performing Arts Theory and History: 1 course, 3-4 credits**
Choose one course from those listed below:

- **ADG-224 History of Graphic Design**
  
  **Credits:**
  4.00

  **Description:**
  The first part of the course will focus on the history of graphic design from prehistoric times to the Industrial Revolution, including the origins of graphic communications in the ancient world, the development of the alphabet and early printing and typography. The second portion will concentrate on the period from the late 19th century to the present, and will include the Arts and Crafts Movement, the various-isms and their influence on modern art, the Bauhaus and International Style, and contemporary visual systems and image making.

- **ADI-234 History & Theory of Interior Architecture**
  
  **Prerequisites:**
  Taken concurrently with ADI S201

  **Credits:**
  3.00

  **Description:**
  This course introduces students to the important individuals, ideas and issues that have shaped the direction of contemporary interior design practice in the twentieth century, building upon the historical foundation established by the Ideas of Western Art and History of Furniture and Architecture classes. Intermixing lectures and readings with visits to important local buildings, it discusses the influences of culture, technology, fashion and media upon the work and thinking of the first generation of modern designers, as well as emerging social, moral and environmental imperatives that will form the basis of future practice; cultural identity, interdisciplinary collaboration, sustainability and universal design.

- **ARH-101 Art History I**
  
  **Credits:**
  4.00
Description:
Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

- **ARH-102 Art History II**

Credits:
4.00

Description:
Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

- **ARH-203 Arts of Asia**

Credits:
4.00

Description:
Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**

Credits:
4.00

Description:
Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

</tbody>
</table>
Examines European painting and sculpture from around 1880 to 1940, including Symbolism, Post-Impressionism, Fauvism, Expressionism, Cubism, Futurism, The Bauhaus, Dada, and Surrealism. Considers works by artists such as Gauguin, Cezanne, Van Gogh, Matisse, Kandinsky, Picasso, Braque, Mondrian, Duchamp, Magritte, Dali, and Ernst within their historical contexts.

- **ARH-311 American Art**
  **Credits:**
  4.00
  **Description:**
  Surveys American painting, sculpture, photography and architecture from the colonial period through WWII. Considers works by artists such as Smibert, Copley, West, Stuart, Whistler, Sargent, Eakins, Homer, Ryder, Bierstadt, Cole, Inness, Sloan, Sullivan, Wright, Hopper, O' Keefe, Dove, Hartley, Bellows, Stieglitz, Weston, and Steichen.

- **ARH-312 Art of the Northern Renaissance**
  **Credits:**
  4.00
  **Description:**
  Examines painting, sculpture, and architecture of the 14th,15th and 16th centuries in Northern Europe, within their historical context. Topics include the rise of oil painting, the development of woodcut and engraving, the effect of the Reformation on art. Artists include van Eyck,Bosch, Durer, Holbein and Brueghel.

- **ARH-316 Contemporary Art**
  **Credits:**
  4.00
  **Description:**
  Explores European and American art since WWII, including Abstract Expressionism, Colorfield Painting, Pop Art, Minimalism, Neo-Dada, Performance Art, Feminism, Neo-Expressionism and Post-Modernism. Artists include Bacon, Giacometti, Pollock,

- **CJN-152 Visual Aesthetics**
  **Credits:**
  4.00

  **Description:**
  This course provides an introduction to a humanities approach to a range of media, including but not limited to film and television. The course helps students develop visual literacies, enriching their understanding of multiple forms of media. The class also explores how media texts are constructed for specific cultural, entertainment, informative and propaganda purposes.

- **CJN-292 Film History: From Silent Cinema to the Modern Era**
  **Credits:**
  4.00

  **Description:**
  An introductory film studies course that covers the history of the film medium from its birth until the 1970s. It provides an introduction to major film theory concepts, such as genre and/or auteur studies, as well as key films and stars in movie history.

- **ENG-266 “Mad Men:” Reading Visual Narratives**
  **Credits:**
  4.00

  **Description:**
  The class will consider various theoretical approaches to the TV Series Mad Men beginning with ideas gleaned from the discourse of visual literacy and proceed by applying textual analysis adapted from more traditional modes of literary studies and film analysis. A combination of critical and evaluative critiques will be examined, including book-length studies of the series and essays based on the
series’ appeal to style, American popular culture, advertising, gender roles, race, and 60s nostalgia. The recent phenomenon of the series recap will serve as a touchstone to the class’s collective viewing of the first two seasons of the series.

- **FR-220 French & Francophone Cinema**
**Credits:**
4.00

**Description:**
Discusses and deepens understanding of French and Francophone cinema from its origins in the late nineteenth century to the early twenty-first century. Explores early works from France, by the Lumiere Brothers and Georges Melies as well as contemporary films from France, Algeria, Burkina Faso, Canada, Haiti, and Senegal.

- **MUH-101 History of Music I**
**Credits:**
4.00

**Description:**
Surveys Western music from CE800-1800, from Gregorian to Beethoven; selected major composers, representative masterworks, and the musical styles of the Medieval, Renaissance, Baroque, and Classical periods; links the music to some of the major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.

- **MUH-102 History of Music II**
**Credits:**
4.00

**Description:**
Surveys Western art music from 1800-present, from Schubert to Jennifer Higdon; selected major composers, representative masterworks, and the musical styles of Romantic, Contemporary, and post-Modern periods; links the music to some of the major historical, cultural, artistic, and intellectual trends of these periods. Normally offered yearly.
- **MUH-211 Music of the United States**  
  **Credits:**  
  4.00

  **Description:**  
  Surveys American music from Colonial times to the present; various attempts to create an indigenous musical style; vernacular and art music genres including folk, concert, and religious music, jazz and musical theatre; includes music of Billings, Amy Beach, Ives, Copland, Bernstein, and Libby Larsen. Normally offered yearly.

- **MUH-212 Popular Music in the United States**  
  **Credits:**  
  4.00

  **Description:**  
  Covers various popular music styles that emerged in America from 1850 to the present including minstrelsy, art song, piano music, band music, blues, jazz, country, rock and rap; includes representative musical selections, emphasis the social and cultural factors that foster the emergence and developed of these genres. Normally offered every other year.

- **MUH-221 History of Women in Music**  
  **Credits:**  
  4.00

  **Description:**  
  Surveys music in the lives of women, including composers, performers, producers, mothers, and educators from the Middle Ages to the present; examines issues of gender and control, perspective in historical narrative, and religious and secular traditions that impact the cross-cultural reception of women's music. Normally offered every year.

- **MUH-227 Jazz and Blues**  
  **Credits:**  
  4.00
### Description:
Follows the evolution of jazz from blues and ragtime through Dixieland, Swing, Bebop, Cool, Latin, Modern, Free, Fusion, and Avant-Garde to Post-modern expressions of the present; the contributions of major soloists, arrangers, composers, leaders, and bands. Normally offered every year.

</table>

**Description:**
“What counts as art?” “What is beauty?” “Are there objective standards of beauty?” This course examines the nature of aesthetic experience, art, beauty, and creativity. Through the classic and contemporary readings, the students will be introduced to philosophical issues concerning the meaning of art, artistic representation, perceptions of art, interpretation, and criticism. Students will be encouraged to reflect on their own experience of art and explore the relationships among the artist, the audience, the artwork, and the world. 1 term - 4 credits. Normally offered every third year.

</tbody>
</table>

**Description:**
This course is a survey of American musical theatre from its roots in the mid-19th century to the present. It provides the analytical tools and historical insight to more fully appreciate Broadway's greatest musicals and musical theatre artists. Students will explore the ways in which American forms of popular entertainment helped to shape Broadway musicals from their infancy through their adulthood. The course also explores the ways in which musicals provided opportunities for African-Americans, women, immigrants, and the GLBT community.

<tr>
<td>THETR-266</td>
<td>Intro to Theatre: 20th Century</td>
<td>4.00</td>
</tr>
</tbody>
</table>
Description:
Picking up chronologically where THETR 225 leaves off, this survey course is designed to provide students with an understanding of modern Western theatre. Beginning with a melodrama, plays will include representative works of realism, naturalism, expressionism, epic theatre, theatre of cruelty, theatre of the absurd, and metatheatricality. Lectures and class discussions will explore how these concepts translate to acting and production techniques as well as what they imply as artistic responses to a modern and post-modern world. Satisfies a core requirement for Theatre Majors.

Quantitative Analysis: 1 course, 4 credits Archive 2018-2019

Choose one course from those listed below:

Biology

- BIO-273 Biostatistics

Prerequisites:
BIO 111/L111

Credits:
4.00

Description:
Introduction to the statistical methods used to evaluate biological problems. Sampling, probability, confidence intervals, hypothesis tests, experimental design, analysis of variance, regression, and correlation are some of the topics offered. Software for data handling, graphics, and analysis will be used.

Communication
- **CJN-210 Communication Research Statistics**
  
  **Credits:**
  4.00
  
  **Description:**
  The course develops an understanding of how statistics are used in the presentation of information and arguments in Communication and Journalism. Emphasizing a conceptual approach to learning statistics, the course focuses on data collection and summarization, correlation, regression, sampling, estimation, and tests of significance. Students perform basic statistical calculations using SPSS software.

**Computer Science**

- **CMPSC-310 Introduction to Data Science**
  
  **Prerequisites:**
  CMPSC-F132 and 1 of the following: STATS-240, STATS-250, MATH-134, MATH-165, MATH-164 or MATH-255.
  
  **Credits:**
  4.00
  
  **Description:**
  The field of data science is emerging at the intersection of the fields of social science and statistics, information and computer science and design. Data science involves using automated methods to analyze massive amounts of data and to extract knowledge from them. This course serves as a project-based introduction to data science in Python language, covering data organization and retrieval, statistical data processing and data visualization.

- **CMPSC-F120 Programming for the World Wide Web**
  
  **Credits:**
  4.00
  
  **Description:**
This is a hands-on course aimed at non-CS students who want to learn how to build interesting and interactive web pages. We do not use any drag- and-drop software for this purpose. Instead we cover the basics of HTML and PHP and, if time permits, we look at some ways of building web pages that interact with databases. Each student will have, for the duration of the course, an account on a server that permits individuals to have web pages that are visible on the World Wide Web.

– CMPSC-F124 Game Programming
Credits: 4.00

Description:
This course introduces students to computer game development, including, but not limited to, game programming. We use Game Maker, a framework for personal computers that runs equally well on Mac and PC. We learn about the foundational concepts of two-dimensional (flat) games: graphics, sound, objects, actions, rooms, scores, levels, multiplayer support, artificial intelligence, and more. Game Maker has an intuitive interface that makes game development approachable for everyone, including those who have never written a single game or a single computer program. All games created by Game Maker can be saved as standalone applications and can be shared freely with classmates, friends, and family. This is not a course in graphics design, audio editing, or scriptwriting. Students are encouraged to use their creativity and imagination to design games and the correctness of game implementation is stressed throughout the course. Normally offered in Fall.

Government

– GVT-201 Data Analysis and Politics
Prerequisites: Sophomore Standing GVT 110 and 120 and Math 128 or higher.

Credits: 4.00

Description:
Quantitative analysis is quickly changing the way we understand and engage in politics, how we implement policy, and how organizations across the world make decisions. In this course, we will learn the fundamental principles of statistical inference and develop the necessary programming skills to answer a wide range of political and policy oriented questions with data analysis. Who is most likely to win the upcoming presidential election? Do countries become less democratic when leaders are assassinated? Is there racial discrimination in the labor market? These are just a few of the questions we will work on in the course.

Philosophy

- PHIL-212 Formal Logic
  Credits: 4.00

  Description:
  An introduction to formal (or semi-formal) study of the basic types of deductive arguments (propositional and syllogistic logic). 1 term - 4 credits. Normally offered every year.

Psychology

- PSYCH-215 Behavioral Statistics
  Prerequisites: PSYCH 114; Restricted to majors only unless with permission of instructor.

  Credits: 4.00

  Description:
  Introduces the use of statistics as tools for description and decision-making, including hypothesis testing. Prepares students for the analysis, interpretation, and evaluation of psychological research. Offered every semester.
Sociology

- **SOC-212 Statistics for Sociology**
  **Prerequisites:**
  SOC-113 OR SOC-116 and MATH-128 or higher

**Credits:**
4.00

**Description:**
In this course, students will be introduced to descriptive and basic inferential statistical techniques. The course will provide information on the following topics: Description - measures of central tendency (mean, median, mode) and measures of dispersion (range, standard deviation); logic of statistical inference, including normal curve and sampling distribution; hypothesis testing with one sample and two samples; measures of association between two variables (bivariate analysis), including chi-square, regression, and correlation; and introduction to multivariate regression. Students will utilize SPSS (Statistical Package for the Social Sciences) software to input and analyze data. The goals of the course are for students to appreciate the need for statistical methods in the broad field of sociology and to gain basic statistical literacy.

Statistics

- **STATS-240 Introduction to Statistics**
  **Prerequisites:**
  Math 128 or higher. REMINDER: STATS 240 is a required prerequisite MKT 220, FIN 200 and ISOM 201(prerequisite for ISOM 319)

**Credits:**
4.00

**Description:**
Topics include: data presentation, measures of central locations and dispersion, probability and probability distributions, estimation, hypothesis testing, simple and multiple regression models. The use of Excel and SPSS will be emphasized throughout the course. 1 term - 4 credits (4 hours per week). Normally offered each semester. STATS 240 satisfies the same requirements as STATS 250.

- **STATS-250 Applied Statistics**

**Prerequisites:**
MATH 128 or higher. REMINDER: STATS 250 is a required prerequisite MKT 220, FIN 200 and ISOM 201 (prerequisite for ISOM 319)

**Credits:**
4.00

**Description:**
Application of statistical analysis to real-world business and economic problems. Topics include data presentation, descriptive statistics including measures of location and dispersion, introduction to probability, discrete and continuous random variables, probability distributions including binomial and normal distributions, sampling and sampling distributions, statistical inference including estimation and hypothesis testing, simple and multiple regression analysis. The use of computers is emphasized throughout the course. Normally offered each semester.
BACHELOR OF SCIENCE IN BUSINESS ADMINISTRATION ARCHIVE 2018-2019

Academic Catalog Archive 2018-2019

- BSBA Degree Requirements Archive 2018-2019
- Freshman Year Requirements Archive 2018-2019
- Requirements to be Completed by End of Junior Year Archive 2018-2019
- Additional Requirements Archive 2018-2019
- Recommended Four-Year Course Sequence Archive 2018-2019
- Sophomore Year Requirements Archive 2018-2019
- Requirements to be Completed by End of Senior Year Archive 2018-2019
- Internship/Practicum Requirement Archive 2018-2019

BSBA Degree Requirements Archive 2018-2019

The completion of the Bachelor of Science in Business Administration (BSBA) degree includes:

- A minimum of 124 semester hours of coursework and satisfaction of all degree requirements;
- 2.0 overall cumulative average;
- 2.0 average in major and minor fields of study;
- A minimum of 30 semester hours of business coursework must be completed at Suffolk University; and,
- An overall minimum of 45 semester hours of coursework must be completed at Suffolk University to be eligible to be considered for degree.

Students are responsible for knowing and complying with specific degree requirements. Any exception to the Program of Study requires written approval from the Sawyer Business School Dean's Office.
Full-time students normally complete their degree requirements in four years. A student may shorten the time required by attending summer sessions. Part-time students normally take five to seven years to complete the requirements, depending on the course load carried.

**Recommended Four-Year Course Sequence Archive 2018-2019**

Below is an overview of the courses and experiential requirements that BSBA students must complete and the year they are required or suggested to do so. The Business School’s curriculum is designed to enable students to acquire knowledge and skills cumulatively, building from introductory material to more specialized or advanced study in areas of major concentration. Prerequisites have been established for courses that require preparation in order for students to benefit fully from the learning experience. Students should meet with their advisors to review their program of study.

Students are responsible for taking courses in the prescribed sequence as necessary. This means:

- All prerequisites must be satisfied.
- Students must have satisfactorily completed 54 credits in order to register for upper division courses in the Business School (Business School undergraduate courses numbered 300 or higher, unless otherwise stated).
- Students must have completed all freshman and sophomore required courses prior to registering in junior-level courses. In particular, students are expected to have completed required writing and quantitative courses before the junior year.

Note: Students who entered Suffolk prior to Fall 2014 are under a different program of study and should refer to their program evaluation and/or the catalog from that year for specific requirements. The Undergraduate Academic Advising Center can provide information about completing requirements where courses are no longer offered, or additional options now exist.

**Freshman Year Requirements Archive 2018-2019**
- **SBS-100 careerSTART**

**Prerequisites:**
ENT-101 to be taken concurrently or previously. SBS students with 30 credits or less only. CAS students by special permission.

**Credits:**
1.00

**Description:**
SBS 100 engages students in a series of activities, discussions, and programs on campus to explore their interests and strengths and learn how courses and co-curricular experiences together help them achieve their goals. Students also develop innovation, team, and presentation skills, get involved on campus, and learn about campus resources and services that aid in a successful college experience. This is the first in a four-year sequence of career courses.

- **WRI-101 First Year Writing I**

**Credits:**
4.00

**Description:**
Study and practice of the writing process and revision in terms of expository writing modes for an academic audience.

- **WRI-102 First Year Writing II**

**Prerequisites:**
WRI-101 or ENG-099 with at least a B and ENG-P099 with a P or WRI-H103

**Credits:**
4.00

**Description:**
Study and practice of argumentative and research writing through further work with writing process and revision and the critical reading of a variety of texts.
– ENT-101 Business Foundations
Credits: 3.00

Description: This course introduces students to foundational concepts in business, including functional areas, the life cycle, competition, stakeholders and ethical considerations. Students develop critical thinking by learning and using a problem solving process through a business situation analysis model to analyze various situations that confront managers and founders of small, medium, and large organizations. Students will also develop tools for analysis, allowing them to critically view business in a new and thoughtful way. The class culminates with student-teams presenting a detailed analysis and recommendations to a panel of executives and persuading them that the recommended strategy is not only feasible, but also practical for the stakeholders involved.

Creativity and Innovation: 3 credits
Numerous courses are offered to meet this requirement. Search for course options by using the course type "CI."

Math 4 credits
Choose one based on your Math placement score:

– MATH-128 Math for the Modern World
Prerequisites: MATH level 2, or Mathshop, or MATH-104
Credits: 4.00

Description: From the ISBN on a book, to buying a car, from the size of small chips in a cell phone, to the size of the national debt, or just reading a graph in the daily newspaper, mathematics plays an important and vital role in countless areas of life and your future career and courses included. Mathematics is both an art and a tool created by humans. The common bond is a way of thinking and a way of reasoning...
to describe and solve problems of many types. This course uses the context of modern real life problems to introduce math needed for literacy and problem solving in contemporary life and work. It uses a minimal amount of algebra and focuses on math models, concepts and basic math manipulations. It encourages students to move from anxiety about math, to using formulas well, to thinking critically in the math context to use math to solve problems and pose new problems. Topics include scientific notation, basic financial math, linear, exponential and polynomial models and an introduction to probability. (Formerly Math 132)

- **MATH-130 Topics in Finite Mathematics**
  **Prerequisites:**
  MATH-104, or MATH-121, or MATH level 3

  **Credits:**
  4.00

  **Description:**
  Linear Modeling (for example, using linear functions to model supply/demand situations), graphing, linear programming, financial functions (compound interest, annuities, and amortization of loans) sets, Venn diagrams, counting and combinatorics, discrete probability, conditional probability, Bernoulli experiments, Bayes theorem. Several sections offered each semester. *This course cannot be applied toward a departmental concentration in Mathematics by Sawyer Business School students.*

- **MATH-134 Calculus for Management & Social Sciences**
  **Prerequisites:**
  MATH-104, MATH-121 or MATH level 4

  **Credits:**
  4.00

  **Description:**
  A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, limits and continuity, derivatives, differentiation rules, applications of
derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, and area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester.

- **MATH-165 Calculus I**
  
  **Prerequisites:**
  MATH-121 with a minimum grade of C, MATH-075, or MATH level 5
  
  **Credits:**
  4.00
  
  **Description:**
  Functions, limits and continuity, squeeze theorem, limits at infinity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; derivatives of other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); applications of the derivative (implicit differentiation, related rates, optimization, differentials, curve sketching, L'Hopital's rule); anti-derivatives; indefinite integrals; Fundamental Theorem; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

**Requirements Also Recommended to be Taken During the Freshman Year**

- **STATS-250 Applied Statistics**
  
  **Prerequisites:**
  MATH 128 or higher. REMINDER: STATS 250 is a required prerequisite MKT 220, FIN 200 and ISOM 201(prerequisite for ISOM 319)
  
  **Credits:**
  4.00
Description:
Application of statistical analysis to real-world business and economic problems. Topics include data presentation, descriptive statistics including measures of location and dispersion, introduction to probability, discrete and continuous random variables, probability distributions including binomial and normal distributions, sampling and sampling distributions, statistical inference including estimation and hypothesis testing, simple and multiple regression analysis. The use of computers is emphasized throughout the course. Normally offered each semester.

Social, Cultural, and Global Perspectives (1 course)

Numerous courses are offered that will meet this requirement. Search for course options by using the course type, "PERSP."

Globalization Requirement

Choose one of the three (3) courses offered to meet this requirement. However, Global Business majors must take SIB 101. All other BSBA students may choose from the following:

- SIB-101 Globalization

Credits:
3.00

Description:
This course introduces the nature and processes of globalization which define today's international business environment. The course employs a multidisciplinary perspective to explore the growing interdependence of nations in their trade, investment, technology flows, and business operations. Topic include business, geographic, economic, social, cultural, political, and other issues related to globalization. The course is experiential in its approach. Students will undertake a team research project exploring globalization issues with reference to a particular country, region or industry.

- HST-149 Empires & Globalization in World History I

Credits:
4.00

**Description:**
This is the first of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include the formation of the medieval trade system, the development of finance and capitalism in the early modern ages, and economic changes prior to the Industrial Revolution. The specific topics may change every year due to new academic developments and publications.

- **HST-150 Empires & Globalization in World History II**

**Credits:**
4.00

**Description:**
This is the second of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include state-making, wars, and the rivalry among early modern empires, economic development, the Industrial Revolution and the formation of the global trade system. The specific topics may change every year due to new academic developments and publications.

---

**Sophomore Year Requirements Archive 2018-2019**

- **SBS-200 careerEXPLORE**

**Prerequisites:**
SBS 100 or SBS-H100. MKT-210 (concurrently or previously).

**Credits:**
1.00

**Description:**
SBS 200 fosters active exploration of career interests, jobs and fields. Students build introductory career management, information seeking, and self-presentation skills. Students refine oral and written communication through class presentations, networking, research, and writing a resume and cover letter. This is the second in a four-year sequence of career courses.

- **SBS-220 Business Writing**
  
  **Prerequisites:**
  MKT-210. WRI-102 or WRI-H103. SBS 300(concurrently or previously)

  **Credits:**
  3.00

  **Description:**
  The world is constantly changing and businesses as well as individual employees must adapt. In order to effectively leverage future communication technologies and media, you must be a critical reader and have strong foundational writing and editing skills. In this course, current business news will be read for its content and to understand the interplay of language and purpose. You will learn to write effectively for business by focusing on your audience, purpose, tone, and the design of various business documents and by revising and refining your writing.

- **ACCT-201 Accounting for Decision Making I**
  
  **Prerequisites:**
  MATH-128 or higher and WRI-102 or WRI-H103 or SBS-220

  **Credits:**
  3.00

  **Description:**
  Introduces students to the accounting cycle, the financial statements, and the theory underlying accounting as information. Provides users of accounting information with a basic understanding of how to appraise and manage a business. Addresses current accounting topics, including relevant ethical and international issues found in the financial press.
- **ACCT-202 Accounting for Decision Making II**

**Prerequisites:**
ACCT-201

**Credits:**
3.00

**Description:**
Enables students to apply the concepts and skills from ACCT 201. They learn how to analyze the financial condition and performance of a firm, and how to use accounting information in business planning, decision-making, and control. Topics include cost-volume-profit analysis, costing systems, variance analysis, and the budget process. Discusses relevant current ethical and competitive issues found in the financial press.

- **MKT-220 Business Research Methods**

**Prerequisites:**
Take MKT-210 or MKT-H210; and STATS-240 or STATS-250

**Credits:**
3.00

**Description:**
Business Research Methods is a general introduction to both quantitative and qualitative business research methods. Topics covered include the purpose of research, defining research and research problems, defining an hypothesis, problem solving and knowledge discovery, methods of quantitative and qualitative research, conducting literature reviews, designing appropriate methodologies, evaluating outcomes, analysis and communicating the results. Students will use Excel and SPSS to support research analysis, implementing what was learned in statistics and going beyond as they learn new data analysis techniques. Students will discuss and present research ideas and processes orally both informally and formally.

**Requirements Also Recommended to be Taken During the Sophomore Year**
EC-102 Global Macroeconomics

Prerequisites:
Non-CAS majors need to have completed at least 15 credits

Credits:
3.00

Description:
This course examines the workings of the national and the global economy. It will describe the determination of Gross Domestic Product, the problems of unemployment, inflation, and the determination of economic growth. It will also describe and analyze the determination of the country's exchange rate, the balance of payments, and international borrowing and lending. A particular focus will be on understanding economic fluctuations (booms, busts, and recessions) in the domestic economy and its effects on other economies. It will analyze the role of the government and the effects of government spending and taxation on the economy. Furthermore, it will describe and analyze the determination of the quantity of money and interest rates in the economy and the role of the country's central bank. It examines the basis and pattern of international trade and the effects of a country's trade policy on the economy.

---

BLE-215 Business Ethics and Law

Credits:
3.00

Description:
Business ethics is applied ethics. Explores the roles and responsibilities of business in a global society. Teaches models of ethical decision-making that incorporate multiple points of view, including diverse cultural worldviews and legal perspectives. Addresses factors that contribute to and constrain ethical behavior in and by organizations. Students apply concepts to current business problems, such as anti-trust, accounting fraud, deceptive advertising, and environmental dumping.

---

ISOM-201 Data and Decisions Analysis

Prerequisites:
MATH-128 or higher and STATS-240 or STATS 250.
<table>
<thead>
<tr>
<th>Credits:</th>
<th>3.00</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Description:</strong></td>
<td>Introduces fundamental quantitative methods of using data to make informed management decisions. Topics include: decision modeling, decision analysis, regression, forecasting, optimization, and simulation, as it applies to the study and analysis of business problems for decision support in finance, marketing, service, and manufacturing operations. Practical business cases and examples drawn from finance, marketing, operations management, and other management areas are used to provide students with a perspective on how management science is used in practice. Excel spreadsheets are used extensively to implement decision models.</td>
</tr>
</tbody>
</table>

| – MGT-217 Organizational Behavior |  |
| **Prerequisites:** | At least 30 credit hours and WRI-102 or WRI-H103 |
| **Credits:** | 3.00 |
| **Description:** | This course explores the application of sociological, psychological and anthropological concepts in domestic and international business settings. Attention is given to the study of human behavior in organizational settings, the organization itself, human interaction, and small group process. |

| – MKT-210 Principles of Marketing |  |
| **Prerequisites:** | SBS 200 (concurrently or previously). WRI 100, 100+, 101, or H103. ENT-101 or ENT-H101. |
| **Credits:** | 3.00 |
| **Description:** |  |
As part of the core curriculum for the BSBA, this course provides a comprehensive, innovative, managerial, and practical introduction to marketing. Students will learn and apply basic concepts and practices of modern marketing as used in a wide variety of settings. Technological advances, rapid globalization, economic shifts and cultural and environmental developments are causing profound changes in the marketplace. As the marketplace changes, so must the marketers who serve it. These new developments signify a brand new world of opportunities for forward thinking marketers. In response to these new developments, the focus of this course is on four major themes that go to the heart of modern marketing theory and practice: 1. Building and managing profitable customer relationships; 2. Building and managing strong brands; 3. Harnessing new marketing technologies in this digital age; and 4. Marketing in a socially responsible way around the globe.

**ISOM-210 Management Information Systems**

**Prerequisites:**
WRI-101 and ENT-101 and at least 24 completed credits

**Credits:**
3.00

**Description:**
Examines the rise of information-enabled enterprises and the role of information technologies/information systems (IT/IS) and e-commerce as key enablers of businesses and social changes globally. Topics include: the effective application of IT/IS to support strategic planning, managerial control, operations and business process integration in the digital economy, IT/IS related issues of ethics, and piracy and security in the information society.

**FIN-200 Business Finance**

**Prerequisites:**
ACCT-201, MATH-128 or higher, and STATS-240 or STATS-250 (can be taken concurrently with FIN-200); Sophomore standing

**Credits:**
3.00

**Description:**
This course is a study of the functions of business finance and focuses on basic financial principles such as time value of money, risk and return tradeoffs, and asset valuation. Formally FIN 310.

Requirements to be Completed by End of Junior Year Archive 2018-2019

- **SBS-300 careerBUILD**
  **Prerequisites:**
  SBS 200. SBS 220 (concurrently or previously) Prerequisite will be waived with 45 or more transfer credits from another institution. SBS students only. CAS students by special permission.

  **Credits:**
  1.00

  **Description:**
  SBS 300 deepens students' career information and skills with a focus on professionalism. Students refine career documents based on personal branding with a focus on articulating the experiences, learning, and skills gained in previous internships, volunteer and work experiences, courses, and club or performance roles. Students use technology, personal networks and professional organizations to develop job search skills. This is the third in a four-year sequence of career courses.

- **EC-101 Applied Microeconomics**
  **Prerequisites:**
  Non CAS majors need to have completed at least 15 credits.

  **Credits:**
  3.00

  **Description:**
This course introduces students to foundational principles of microeconomic theory, with an emphasis on applications of concepts to management decision-making in specific industry and market settings. It describes and analyzes the interaction of supply and demand and the behavior of the prices of goods, services. It explains the determinations of costs, output, strategic pricing, and governance by firms under conditions of perfect and imperfect competition in a global economy. In addition, it describes the supply demand for factors of production and the impact of taxes and government regulation and intervention on firms and consumers.

- **MGT-360 Leadership 360 Practicum**

**Prerequisites:**
MGT 217 (formerly MGT 317); does not count toward the Management Major, nor the minor for BSBA students

**Credits:**
3.00

**Description:**
Leadership 360 Practicum provides a fundamental understanding of the principles of leadership and the core competencies, traits and behaviors that enable effective leadership. Students will learn relevant leadership theories and gain awareness of how today’s organizations meet the challenges and opportunities that leadership brings. Through an individual leadership development project, students will conduct an in-depth self-examination of their leadership capacity and will choose a leadership skill to develop throughout the semester. Students will have the opportunity to apply their developing leadership skills in a team project that seeks solutions to a specific leadership challenge, leading to a project implementation plan. Student teams will present their solutions in class; feedback to the presenters will reinforce oral communication skills. This course is a requirement for all BSBA majors.

- **BLE-214 Principles of Business Law**

**Credits:**
3.00

**Description:**
Introduces the field of business law. Provides an overview of the organization and operation of the American legal system, court system and legal procedure. Examines selected business law topics such as contracts, torts, criminal law, agency, and business organizations. Attention is given to the ways in which business law manifests important social and ethical precepts.

**ISOM-319 Operations Management**

**Prerequisites:**
ENT-101 (formerly SBS 101) and ISOM-201 and at least 54 credits

**Credits:**
3.00

**Description:**
Introduces concepts and tools for managing operations in service/manufacturing organizations where inputs such as raw material, labor, or other resources into finished services and/or goods. Strategic and tactical issues of operations management (OM), including: operations strategy, product and process design, capacity planning, quality management, inventory management, queuing theory and workforce management are addressed. Quantitative models, analytical tools and case studies are used to analyze operational problems that business managers face in both local and global settings.

**Requirements to be Completed by End of Senior Year Archive 2018-2019**

**SBS-400 careerLAUNCH**

**Prerequisites:**
Take SBS-300. 90 credit hours required. SBS students only. CAS students by special permission.

**Credits:**
1.00
Description:
SBS 400 is the culminating career and professional experience for seniors. It focuses on career entry and transition, networking for career and job success, impression management, and related life-long learning skills. Students articulate and reflect on academic, work, and co-curricular experiences from the perspective of professionals entering or advancing their careers. This is the final course in a four-year sequence of career courses.

Prerequisites:
- SIB-429 Strategic Management
FIN-200, ISOM-319, MGT-217, MKT-210; Senior standing. Honors students must register for SIB-H429.

Credits:
3.00

Description:
This course covers and integrates administrative processes and decision making under uncertainty in business areas of marketing, accounting, management, finance, personnel, and production. It also focuses on strategic and policy issues from the viewpoint of senior management in both domestic and international corporations. Case discussions help develop the conceptual framework for analysis and implementation of strategy and policy decisions.

Science, Technology and Engineering (4 credits)
Choose 1 STE (Science, Technology, and Engineering) science course. In the case of a course that is a lecture plus a lab, the student must complete both components to earn credit for the STE requirement. Numerous courses are offered to meet this requirement. Search for course options by using the course type "STE."

Additional Requirements Archive 2018-2019

Experiential Components to be Done Any Time
Global Engagement Experience

The Global Engagement requirement has a range of options including non-credit service courses, study or work abroad, credit-bearing courses with global experiences, global travel seminars, and more. Students choose one that best matches their personal and career interests.

- **SBS-150 Global Engagement: Our Diverse Boston**
  - **Credits:** 0.00
  - **Description:** Domestic students who are not planning to travel internationally may meet their Global Engagement Experience by participating in a community service program in one of Boston’s ethnic or cultural communities. This will be organized by the Center for Community Engagement and opportunities may vary each semester. As part of this experience, students complete several reflective writing assignments.

- **SBS-162 Global Engagement: Home Away From Home**
  - **Credits:** 0.00
  - **Description:** International students studying here at our Boston campus are paired with another Suffolk student who helps them make the transition to studying in Boston. This is coordinated by the International Student Services Office. Students complete several writing assignments reflecting on their learning and experiences. Limited enrollment.

- **SBS-163 Global Engagement: American Family Visit**
  - **Credits:** 0.00
  - **Description:** International students studying here at our Boston campus are matched to local families who host them for a weekend visit, including meals and recreational activities. This is coordinated by the International Student Services Office. Students...
complete several writing assignments reflecting on their learning and experiences. Limited enrollment.

- **SBS-160 Global Engagement: Studying Abroad**
  
  **Prerequisites:**
  Instructor's consent required

  **Credits:**
  0.00

  **Description:**
  This zero credit course is for students concurrently studying abroad. It requires several reflective writing assignments related to the travel and study experience. Satisfactory completion of this co-requisite allows the study abroad experience to count toward the Global Engagement Requirement.

- **SBS-164 Global Engagement: Window on America**
  
  **Credits:**
  0.00

  **Description:**
  International students studying here at our Boston campus may participate in this Boston-based experiential program where they attend local interactive cultural or historical programs and complete several reflective writing assignments. The opportunities vary each year. Limited enrollment.

- **SBS-170 Global Engagement: Work Abroad**
  
  **Prerequisites:**
  Instructor consent required

  **Credits:**
  0.00

  **Description:**
This zero credit course is restricted to students who will complete an internship, volunteer job, teaching or other short-term position working abroad in a country other than their own. It requires several reflective writing assignments related to the global work experience.

- **SBS-175 Global Engagement: ASB Abroad**

**Credits:**
0.00

**Description:**
Students completing an Alternative Spring Break program abroad (including Puerto Rico) may register for this course in order to count it toward the Global Engagement Requirement. The Center for Community Engagement will coordinate registration after the trip is concluded (no further assignments are required). Instructor permission required.

[Note: each noncredit course above has a special purpose, carries no academic credit, does not require any tuition, and is graded pass/fail.]

**Credit-Bearing Options**

**Courses for credit** that have already been approved for the Global Engagement can be located by using the course search system. Enter course type "GLOBL" and then review the course details and prerequisites as well as the location of the course (Boston or Madrid campus). Some courses involve travel and fee, off-campus activities, or other requirements.

**Global Travel Seminars** are available to juniors and seniors in SBS and require a course fee, separate from airfare. These can also be located using the search above or by looking for SIB 550 courses directly.

**Alternative Winter Break:** Students participating in the Alternative Winter Break also register for GVT 387: Reconciliation and Conflict. This four-credit course is a co-requisite for both the study trip to El Salvador or the study trip to Vietnam and provides a historical and social context. The Center for Community Engagement hosts this program, and more information can be found on the Alternative Winter Break Webpage.
Other Courses: Students may petition to request that a course might count towards the Global Engagement requirement if it is proven to meet the learning goals for the Global Engagement Requirement by virtue of reflection assignments based on course-related travel outside the US or out-of-class research or course-embedded service-learning projects that involve extensive interaction with others whose country of origin differs from the student’s own. See "Other Options" below for instructions on how to petition.

Exceptions: The following courses may NOT count towards the Global Engagement requirement: SIB 101: Globalization, MKT 220: Business Research Methods, and MGT 360: Leadership Practicum. Some courses that meet the Creativity & Innovation requirement or the Diverse Perspectives requirement may double count for Global Engagement. These will be found by following the search procedure outlined above.

Other Options: Students may submit to the SBS Dean's Office a Petition Form for Global Engagement to to propose an alternative experience that meets the learning goals for the Global Engagement Requirement but that is not covered by the other options above. These may include extensive interaction via academic research projects, independent studies, volunteer or service projects with others whose culture, ethnicity or country of origin is different from their own in ways that meet the learning goals of this requirement. Students will be required to submit additional documentation about the experience, contact information for site supervisors, and/or proof of involvement. If approved, students would then register for SBS 180 Global Engagement– general. This zero-credit co-requisite requires several reflective writing assignments related to the experience.

Local Engagement Experience

The Local Engagement requirement has a range of options, including courses, co-curricular projects, tutoring, community service, and other engagement projects. Students choose one that best matches their personal and career interests.

Non-Credit Course Options

- SBS-120 Local Engagement: Center for Community Engagement

  Credits: 0.00

  Description:
This zero credit course is for students concurrently volunteering in programs coordinated by the Center for Community Engagement (CCE). It requires several reflective writing assignments related to the volunteer experiences. Minimum expectations for the volunteer work are 20 hours in one semester. Volunteer hours will be documented by Center for Community Engagement. Students must maintain professional and/or appropriate behavior in all interactions with the community organization in order for this experience to count toward the Local Engagement Requirement.

- **SBS-121 Local Engagement: Alternative Spring Break**

  **Credits:**
  0.00

  **Description:**
  This zero credit course is restricted to students concurrently participating in an Alternative Spring Break trip. Successful completion of the ASB trip will count toward the BSBA Local Engagement requirement. Students must abide by all ASB policies, behavioral expectations, and guidelines in order for this experience to count toward the Local Engagement Requirement.

- **SBS-122 Local Engagement: Jumpstart**

  **Credits:**
  0.00

  **Description:**
  This zero credit course is restricted to Jumpstart Corps volunteers. Jumpstart is a two semester commitment that involves about 300 hours of volunteer time, which includes ongoing training and working directly with children. Successful completion of Jumpstart volunteer year will count toward the BSBA Local Engagement requirement. Students must volunteer for both semesters and maintain appropriate behavior in all interactions in the grade school in order for this experience to count toward the Local Engagement Requirement.

- **SBS-123 Local Engagement: Greek Organizations**

  **Credits:**
  0.00
**Description:**
This noncredit course is restricted to students concurrently participating in a sorority or fraternity on campus and volunteering 20 or more hours in one semester. It requires several reflective writing assignments related to the volunteer experiences. Volunteer hours will be documented by the chapter advisor. Students must maintain professional and/or appropriate behavior in all interactions with the community organization in order for this experience to count toward the Local Engagement Requirement.

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SBS-124 Local Engagement: Athletes Serving Boston</strong></td>
<td>This noncredit course is restricted to student athletes who participate in weekly service through programs sponsored by the Suffolk Athletics Department. It requires several reflective writing assignments related to the volunteer experiences. The advisor will monitor volunteer hours. Students must maintain professional and/or appropriate behavior in all interactions with the community organization in order for this experience to count toward the Local Engagement Requirement.</td>
</tr>
<tr>
<td><strong>SBS-125 Local Engagement: Entrepreneurship</strong></td>
<td>This zero credit course is restricted to students concurrently volunteering 20 or more hours in one semester in programs coordinated by or approved by the Center for Entrepreneurship. Most opportunities require several reflective writing assignments related to the volunteer experiences. Volunteer hours will be documented by the Center for Entrepreneurship. Students must maintain professional and/or appropriate behavior in all interactions with the community organization in order for this experience to count toward the Local Engagement Requirement.</td>
</tr>
</tbody>
</table>
[Note: each noncredit course above has a special purpose, carries no academic credit, does not require any tuition, and is graded pass/fail.]

**Courses for credit** that have already been approved for the Local Engagement can be located by using the course search system. Enter the course type "LOCAL" and then review the course details and prerequisites as well as the location of the course (Boston or Madrid campus). Some courses involve off-campus activities or other requirements.

**Other courses:** Students may petition to request that a course might count towards the Local Engagement requirement if it is proven to meet the learning goals for the Local Engagement Requirement by virtue of reflection assignments based on course-embedded service-learning projects that involve extensive interaction with others off campus. See "Other Options" below for instructions on how to petition.

**Exceptions:** The following courses may NOT count towards the Local Engagement requirement: MKT 220: Business Research Methods, MGT 360: Leadership Practicum, MGT 419: Capstone Project, MGT 200: Leadership and Social Responsibility, nor any courses required for the BSBA business core. Some courses that meet the Creativity & Innovation requirement or the Diverse Perspectives requirement may double count for Local Engagement. These will be found by following the search procedure outlined above.

**Other Options:** Students may submit to the SBS Dean's Office a Petition Form for Global Engagement to propose an alternative experience that meets the learning goals for the Local Engagement Requirement but that is not covered by the other options above. These include, but are not limited to: internships in not-for-profits; practicum or fieldwork assignments, academic research projects or independent studies working directly with a local population; and volunteer or service projects sponsored by professional, religious or other organizations. BEFORE beginning the experience, students are encouraged to review the petition form and inquire about their proposed option to confirm if the experience will count. Students will be required to submit additional documentation about the experience, contact information for site supervisors, and/or proof of involvement. If approved, students would then register for SBS 130 Local Engagement – general. This zero-credit, co-requisite requires several reflective writing assignments related to the experience.

**Major Requirements Minimum (18-24 hours)**
Other Credits and Free Electives: Credit Varies

In addition to completing all degree program and major requirements, students have free elective (“other”) credits that they may use to complete a minor, explore topics of interest by taking courses in the College of Arts & Sciences or the Business School, take honors challenge courses, or use toward a second major. Many transfer students bring in credits that are applied as free electives when there is no program equivalent. The number of free elective credits to be completed varies by major, number of transfer credits, and other factors. Note: BSBA students must complete a total of 124 credits to graduate. Students should refer to their program evaluation for credit counts, and discuss free elective options with their advisors.

Internship/Practicum Requirement Archive 2018-2019

All Accounting, Finance and Information Systems majors complete a required non-credit practicum (formerly called the experiential component). Business Economics, Entrepreneurship, Management, Marketing and Global Business majors have no required internship, however, we encourage these students to take advantage of the major elective option if they wish to receive academic credit for an internship experience. Refer to your specific major’s web pages or catalog page for details. Students who wish to receive credit for a subsequent internship should ask an advisor for details.
ACCOUNTING (ARCHIVE 2018-2019)

The Accounting Department prepares students for professional careers in public and private accounting and financial management. Our graduates work in for-profit, not-for-profit, and governmental organizations. Suffolk University is the only school in Boston to achieve supplemental AACSB International Accreditation for our accounting and taxation programs, in addition to our business school accreditation.

Mission and Vision

Mission

The mission of the Sawyer Business School’s Accounting Department is to provide a quality accounting and tax education in contemporary subject matters, to prepare students to face challenges of a global business environment, and to appreciate the value of ethical behavior and reputation. It is our mission to earn an excellent reputation for the quality of our graduates, our teaching, and our research, as well as advance relationships within the professional communities.

Vision

The Accounting Department at Suffolk University will offer high-quality, cutting-edge, rigorous programs of instruction for undergraduate and graduate students of diverse backgrounds and interests. We will ensure our graduates are versatile and well-prepared for dynamic careers in accounting and taxation. We will support scholarly inquiry that values scholarship in all its forms including the generation of knowledge, the integration and dissemination of knowledge, creative activity, and scholarly reflection. We will inspire investment in an inclusive department that is built on ethical, forward-looking leadership, teamwork, and cooperation.

Professional Requirements
The Commonwealth of Massachusetts mandates a minimum of 120 semester hours, with specific course requirements, to sit for the Uniform CPA Exam. To apply for a CPA license, 150 semester hours are required, earned as part of a bachelor’s degree, master’s degree, or both. The Accelerated Bachelor’s/Master’s Degree (4+1 Program) enables students to satisfy the Massachusetts licensure educational requirements and prepares students for the successful completion of the CPA Exam and careers in accounting. Students who plan to qualify as CPAs in states other than Massachusetts should ascertain from the respective states or jurisdictions the specific requirements with which they must comply.

Suffolk’s Accelerated Bachelor’s/Master’s Degree prepares you for a professional career as an accountant. Our elective options are designed to prepare you for rewarding careers in various fields in addition to public accounting such as corporate accounting, international accounting, fraud investigation, tax advising, financial planning, not-for-profit accounting, and governmental accounting.

Accounting course offerings are designed to allow completion of the accounting major through part-time or full-time study, in day and evening courses.

**Accounting Major Requirements Archive 2018-2019**

The BSBA in Accounting requires completion of 24 credit hours in accounting beyond the completion of ACCT 201, Accounting for Decision Making I and ACCT 202, Accounting for Decision Making II. A cumulative grade point average of at least 2.0 in the accounting major and a cumulative grade point average of 2.0 overall must be maintained to graduate.

Accounting majors must complete 160 hours of pre-professional or professional accounting experience prior to graduating.

Accounting majors are assigned a faculty advisor from the Accounting Department to assist them in planning their program of studies and advise them on academic and career matters.

**Required Courses (7 courses, 21 credits)**

- **ACCT-320 Federal Taxation**

  **Prerequisites:**
  ACCT 202
Credits: 3.00

Description:
Focuses on the federal income taxation of individuals with some discussion of business taxation. Explores the basic structure of individual income taxation, including the individual tax formula, income, deductions, and credits, and provides an introduction to property transactions. Emphasizes how tax laws affect everyday personal and business decisions.

- ACCT-321 Intermediate Accounting I
  Prerequisites:
  ACCT-201 and ACCT-202 and Junior standing
  Credits: 3.00
  Description:
  Reviews basic financial accounting concepts and examines selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of current and non-current assets and liabilities and the income determination aspects of these items.

- ACCT-322 Intermediate Accounting II
  Prerequisites:
  ACCT-321 with a minimum grade of C
  Credits: 3.00
  Description:
  Continues to examine selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of investments and stockholders' equity and the income determination aspects of these items. Also considers special topics such as pensions, leases, deferred taxes, and cash flows.

- ACCT-331 Cost Accounting
  Prerequisites:

<td>3.00</td>
<td>Explores concepts and procedures underlying the development of a cost accounting system for managerial decisions, control, and performance reporting. Introduces the basic ideas of responsibility accounting.</td>
</tr>
</tbody>
</table>

- **ACCT-430 Accounting Information Systems**  
  **Prerequisites:** ACCT 322 and ISOM-210  
  **Credits:** 3.00  
  **Description:** Introduces the design, operation, and use of accounting information systems. Examines the functional relationships of the AIS within an organization. Provides a background in automated data processing, along with the important human and organizational considerations in system design and implementation.

- **ACCT-431 Auditing and Assurance Services**  
  **Prerequisites:** ACCT 321 AND ACCT 331  
  **Credits:** 3.00  
  **Description:** Provides an introduction to the field of auditing, with a concentration in auditing historical financial statements in accordance with generally accepted auditing standards, and some exposure to auditing the internal control over financial reporting of large public companies. Covers the environment, standards, regulation, and law of auditing in the US, with some exposure to the international environment. Covers audit planning, risk, and material assessments, audit evidence, evaluation of internal control, documentation, and audit reports.
- **ACCT-450 Accounting Theory and Practice**  
**Prerequisites:**  
ACCT 431 (may be taken Concurrently), ACCT 322 and Senior Status  

**Credits:**  
3.00  

**Description:**  
Covers accounting procedures involved in business combinations and consolidated financial statements. Topics also include accounting for partnerships, various foreign currency issues, and the role of regulatory authorities in financial reporting. Core elements include enhancing critical thinking skills and analytical thinking. Also, this course provides practice in using oral communication for impact, and anticipating and managing ethical conflicts.

**Elective Courses (1 course, 3 credits)**  
Select one from the following:

- **ACCT-310 International Business Accounting**  
**Prerequisites:**  
FIN-200 and ACCT-321  

**Credits:**  
3.00  

**Description:**  
Explores economic, political and cultural variables that shape accounting and disclosure in various countries. Students gain an understanding of international financial reporting standards and the forces for convergence between IFRS and US GAAP. Presents financial analysis in a multi-financial context.

- **ACCT-415 Not-For-Profit Accounting and Control**  
**Prerequisites:**  
ACCT 331  

**Credits:**
3.00

Description:
Studies accounting principles, unique financial reporting (such as fund accounting), and budgetary control in government agencies and charitable, healthcare, educational, and other not-for-profit organizations.

- ACCT-422 Federal Taxation II
Prerequisites:
ACCT 320

Credits:
3.00

Description:
Covers advanced individual tax topics such as cost recovery, itemized deductions, passive activity losses, AMT, complex basis rules, and the operation and formation of C corporations.

- ACCT-432 Advanced Accounting
Prerequisites:
ACCT-322 and junior standing

Credits:
3.00

Description:
Covers accounting procedures involved in business combinations and consolidated financial statements. Topics also include accounting for partnerships, various foreign currency issues, corporations in financial distress, and the role of regulatory authorities in financial reporting.

Pre-Professional Experience (1 course, 0 credits)

- ACCT-560 Accounting Practicum
Prerequisites:
Course Coordinator consent required

**Credits:**
0.00

**Description:**
All accounting majors are required to complete 160 hours of pre-professional or professional accounting or tax experience prior to graduating. The hours may be obtained through one or more accounting or tax (a) internships, (b) part- or full-time employment, or (c) cooperative education positions. Hours may also be obtained through participation in Suffolk’s Free Tax Preparation Clinic (SBS 555, SBS 556, and SBS 557 - each year will earn students 55 hours). Approval of the 160 hours work experience must be obtained in advance of beginning the work by completing a Practicum Approval Form and emailing it to acct560@suffolk.edu. Students register for the Accounting Practicum upon completion of the 160 hours and approval by the Accounting Department. Students should journal their work tasks and accomplishments. This experiential component carries no academic credit, does not require any tuition, and will be graded pass/fail.

**Accounting Learning Goals & Objectives**

Learning goals and objectives reflect the educational outcomes achieved by students through the completion of this program. These transferable skills prepare Suffolk students for success in the workplace, in graduate school, and in their local and global communities.

</tbody>
</table>
## Learning Goals

Demonstrate in depth knowledge of accounting principles, concepts, and applications and the role accounting plays in organizations and society. (Depth of Knowledge)

## Learning Objectives

- Demonstrate strong decision-making skills using model-building and evaluate the cost / benefit of available solutions.
- Understand both audit risk and business risk, identifying negative outcomes (including fraud) and evaluating methods through prevention, detection, and corrective controls. Communicate possible impact of identified risks and recommend corrective action.
- Identify what needs to be measured. Have familiarity with appropriate measurement criteria, including US GAAP and IFRS, present the results objectively, and resolve ambiguities involving estimates.
- Demonstrate ability to prepare reports that are objective, concise, and clear, with relevant information that leads to appropriate conclusions and decision-making.
- Demonstrate ability to utilize research skills to access, understand, and apply standards, rules, and other information, relying on industry trends, internal performance history, benchmarks, and best practices.
- Demonstrate ability to use technology effectively and efficiently as a tool to access and control risk, document work performed, research data, and build models.

## Accounting Minor Requirements Archive 2018-2019

### Accounting Minor for Business Students (3 courses, 9 credits)

The minor requires the completion of the following three (3) required courses (nine credit hours) beyond the completion of ACCT 201, Accounting for Decision Making I and ACCT 202, Accounting for Decision Making II.

- **ACCT-321** Intermediate Accounting I

Prerequisites:
**ACCT-201 and ACCT-202 and Junior standing**

**Credits:**
3.00

**Description:**
Reviews basic financial accounting concepts and examines selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of current and non-current assets and liabilities and the income determination aspects of these items.

---

**ACCT-322 Intermediate Accounting II**

**Prerequisites:**
ACCT-321 with a minimum grade of C

**Credits:**
3.00

**Description:**
Continues to examine selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of investments and stockholders’ equity and the income determination aspects of these items. Also considers special topics such as pensions, leases, deferred taxes, and cash flows.

---

**ACCT-331 Cost Accounting**

**Prerequisites:**
ACCT 202

**Credits:**
3.00

**Description:**
Explores concepts and procedures underlying the development of a cost accounting system for managerial decisions, control, and performance reporting. Introduces the basic ideas of responsibility accounting.
Accounting Degree Requirements - Suffolk University

Accounting Degree Requirements - Suffolk University

Accounting Minor for College of Arts and Sciences Students (6 courses, 18 credits)

College of Arts & Sciences students who wish to undertake a functional business minor in accounting must first complete ENT 101 Business Foundations, ACCT 201 and 202 which may be completed in the sophomore year, while the other accounting courses are taken junior or senior year.

After ENT 101, College students are required to take all of the following:

- **ACCT-201 Accounting for Decision Making I**
  **Prerequisites:**
  MATH-128 or higher and WRI-102 or WRI-H103 or SBS-220
  
  **Credits:**
  3.00
  
  **Description:**
  Introduces students to the accounting cycle, the financial statements, and the theory underlying accounting as information. Provides users of accounting information with a basic understanding of how to appraise and manage a business. Addresses current accounting topics, including relevant ethical and international issues found in the financial press.

- **ACCT-202 Accounting for Decision Making II**
  **Prerequisites:**
  ACCT-201
  
  **Credits:**
  3.00
  
  **Description:**
  Enables students to apply the concepts and skills from ACCT 201. They learn how to analyze the financial condition and performance of a firm, and how to use accounting information in business planning, decision-making, and control. Topics include cost-volume-profit analysis, costing systems, variance analysis, and the budget process. Discusses relevant current ethical and competitive issues found in the financial press.

- **ACCT-321 Intermediate Accounting I**
**Prerequisites:**
ACCT-201 and ACCT-202 and Junior standing

**Credits:**
3.00

**Description:**
Reviews basic financial accounting concepts and examines selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of current and non-current assets and liabilities and the income determination aspects of these items.

—— **ACCT-322 Intermediate Accounting II**

**Prerequisites:**
ACCT-321 with a minimum grade of C

**Credits:**
3.00

**Description:**
Continues to examine selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of investments and stockholders’ equity and the income determination aspects of these items. Also considers special topics such as pensions, leases, deferred taxes, and cash flows.

—— **ACCT-331 Cost Accounting**

**Prerequisites:**
ACCT 202

**Credits:**
3.00

**Description:**
Explores concepts and procedures underlying the development of a cost accounting system for managerial decisions, control, and performance reporting. Introduces the basic ideas of responsibility accounting.
Suffolk 4+1 Program Archive 2018-2019

Earn Your Bachelor's and Master's Degrees in Just 5 Years in the Suffolk 4+1 Program

Suffolk University's 4+1 Program recognizes the accomplishments of top undergraduate business students by waiving the GMAT/GRE application requirements for students who meet the qualifications. Qualifying students can earn the MSA in as few as 9 months of full-time study or 21 months of part-time study, or your MSA/MSF, MSA/MST, or MSBA/MSA in as few as 16-21 months at Suffolk University. To participate you must meet the following qualifications:

- Must be a second semester senior earning an undergraduate degree in business or economics major at a U.S. Institution.
- Applications from recent graduates will also be considered.
- You must have at least a 3.3 cumulative GPA.
- Top students will automatically be considered for merit-based fellowship awards. No separate application is required.

To apply, visit the Office of Graduate Admission, or contact us by phone at 617-573-8302 or by email.

Accounting Undergraduate Courses Archive 2018-2019

- **ACCT-150 Introduction to Fraud Examination**
  **Credits:**
  3.00

**Description:**
Study of the varieties of fraud, including financial statement fraud, fraud against organizations, consumer fraud, bankruptcy fraud, tax fraud and e-commerce fraud. The causes, prevention, detection and investigation of fraud are explored. Examination of famous past frauds with hands-on cases are used to apply these concepts and to understand the resolution of fraud in the legal system.

- **ACCT-201 Accounting for Decision Making I**
**Prerequisites:**
MATH-128 or higher and WRI-102 or WRI-H103 or SBS-220

Credits:  
3.00

Description:  
Introduces students to the accounting cycle, the financial statements, and the theory underlying accounting as information. Provides users of accounting information with a basic understanding of how to appraise and manage a business. Addresses current accounting topics, including relevant ethical and international issues found in the financial press.

— ACCT-H201 Honors Accounting for Decision Making I

Prerequisites:  
MATH-128 or higher and WRI-102, WRI-103 or SBS-220, and at least a 3.3 GPA

Credits:  
3.00

Description:  
Introduces students to the accounting cycle, the financial statements, and the theory underlying accounting as information. Provides users of accounting information with a basic understanding of how to appraise and manage a business. Addresses current accounting topics, including relevant ethical and international issues found in the financial press.

— ACCT-202 Accounting for Decision Making II

Prerequisites:  
ACCT-201

Credits:  
3.00

Description:  
Enables students to apply the concepts and skills from ACCT 201. They learn how to analyze the financial condition and performance of a firm, and how to use accounting information in business planning, decision-making, and control. Topics include cost-volume-profit analysis, costing systems, variance analysis, and the budget process. Discusses relevant current ethical and competitive issues found in the financial press.
- **ACCT-H202 Honors Accounting for Decision Making II**

**Prerequisites:**
ACCT 201; 3.3 GPA

**Credits:**
3.00

**Description:**
Enables students to apply the concepts and skills from ACCT 201. They learn how to analyze the financial condition and performance of a firm, and how to use accounting information in business planning, decision-making, and control. Topics include cost-volume-profit analysis, costing systems, variance analysis, and the budget process. Discusses relevant current ethical and competitive issues found in the financial press.

- **ACCT-310 International Business Accounting**

**Prerequisites:**
FIN-200 and ACCT-321

**Credits:**
3.00

**Description:**
Explores economic, political and cultural variables that shape accounting and disclosure in various countries. Students gain an understanding of international financial reporting standards and the forces for convergence between IFRS and US GAAP. Presents financial analysis in a multi-financial context.

- **ACCT-320 Federal Taxation**

**Prerequisites:**
ACCT 202

**Credits:**
3.00

**Description:**
Focuses on the federal income taxation of individuals with some discussion of business taxation. Explores the basic structure of individual income taxation, including the individual tax formula, income, deductions, and credits, and provides an introduction to property transactions. Emphasizes how tax laws affect everyday personal and business decisions.

- ACCT-H320 Honors Federal Taxation
  **Prerequisites:**
  ACCT-202, SBS Honors Students Only

  **Credits:**
  3.00

  **Description:**
  Focuses on the federal income taxation of individuals with some discussion of business taxation. Explores the basic structure of individual income taxation, including the individual tax formula, income, deductions, and credits, and provides an introduction to property transactions. Emphasizes how tax laws affect everyday personal and business decisions.

- ACCT-321 Intermediate Accounting
  **Prerequisites:**
  ACCT-201 and ACCT-202 and Junior standing

  **Credits:**
  3.00

  **Description:**
  Reviews basic financial accounting concepts and examines selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of current and non-current assets and liabilities and the income determination aspects of these items.

- ACCT-H321 Intermediate Accounting
  **Prerequisites:**
  ACCT-201 and ACCT-202 and Junior standing and GPA at least 3.3

  **Credits:**
Description:
Reviews basic financial accounting concepts and examines selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of current and non-current assets and liabilities and the income determination aspects of these items.

ACCT-322 Intermediate Accounting II
Prerequisites:
ACCT-321 with a minimum grade of C

Credits:
3.00

Description:
Continues to examine selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of investments and stockholders’ equity and the income determination aspects of these items. Also considers special topics such as pensions, leases, deferred taxes, and cash flows.

ACCT-H322 Honors Intermediate Accounting II
Prerequisites:
ACCT-321 with a minimum grade of C; 3.3 GPA or higher

Credits:
3.00

Description:
Continues to examine selected balance sheet and income statement items. The focus of this communication intensive course is on the valuation and reporting of investments and stockholders’ equity and the income determination aspects of these items. Also considers special topics such as pensions, leases, deferred taxes, and cash flows.

ACCT-331 Cost Accounting
Prerequisites:
ACCT 202
**Credits:**
3.00

**Description:**
Explores concepts and procedures underlying the development of a cost accounting system for managerial decisions, control, and performance reporting. Introduces the basic ideas of responsibility accounting.

- **ACCT-H331 Honors Cost Accounting**
  **Prerequisites:**
  ACCT-202 and GPA 3.3 or higher

**Credits:**
3.00

**Description:**
Explores concepts and procedures underlying the development of a cost accounting system for managerial decisions, control, and performance reporting. Introduces the basic ideas of responsibility accounting.

- **ACCT-415 Not-For-Profit Accounting and Control**
  **Prerequisites:**
  ACCT 331

**Credits:**
3.00

**Description:**
Studies accounting principles, unique financial reporting (such as fund accounting), and budgetary control in government agencies and charitable, healthcare, educational, and other not-for-profit organizations.

- **ACCT-422 Federal Taxation II**
  **Prerequisites:**
  ACCT 320

**Credits:**
3.00
Description:
Covers advanced individual tax topics such as cost recovery, itemized deductions, passive activity losses, AMT, complex basis rules, and the operation and formation of C corporations.

- **ACCT-430 Accounting Information Systems**

  **Prerequisites:**
  ACCT 322 and ISOM-210

  **Credits:**
  3.00

  **Description:**
  Introduces the design, operation, and use of accounting information systems. Examines the functional relationships of the AIS within an organization. Provides a background in automated data processing, along with the important human and organizational considerations in system design and implementation.

- **ACCT-431 Auditing and Assurance Services**

  **Prerequisites:**
  ACCT 321 AND ACCT 331

  **Credits:**
  3.00

  **Description:**
  Provides an introduction to the field of auditing, with a concentration in auditing historical financial statements in accordance with generally accepted auditing standards, and some exposure to auditing the internal control over financial reporting of large public companies. Covers the environment, standards, regulation, and law of auditing in the US, with some exposure to the international environment. Covers audit planning, risk, and material assessments, audit evidence, evaluation of internal control, documentation, and audit reports.

- **ACCT-432 Advanced Accounting**

  **Prerequisites:**
  ACCT-322 and junior standing
### Credits:
3.00

### Description:
Covers accounting procedures involved in business combinations and consolidated financial statements. Topics also include accounting for partnerships, various foreign currency issues, corporations in financial distress, and the role of regulatory authorities in financial reporting.

#### ACCT-450 Accounting Theory and Practice

**Prerequisites:**
ACCT 431 (may be taken Concurrently), ACCT 322 and Senior Status

**Credits:**
3.00

**Description:**
Covers accounting procedures involved in business combinations and consolidated financial statements. Topics also include accounting for partnerships, various foreign currency issues, and the role of regulatory authorities in financial reporting. Core elements include enhancing critical thinking skills and analytical thinking. Also, this course provides practice in using oral communication for impact, and anticipating and managing ethical conflicts.

#### ACCT-510 Independent Study

**Prerequisites:**
ACCT 322, ACCT 331 or approval from dept. chair

**Credits:**
3.00

**Description:**
Independent study allows students to expand their classroom experience by completing research in an area of interest not already covered by Suffolk courses. The student designs a unique project and finds a full-time faculty member with expertise in that topic who agrees to sponsor it and provide feedback as the proposal is refined. A well designed and executed research project broadens and/or deepens learning in a major or minor area of study and may also enhance a student's marketability to potential future employers. Students cannot register for an Independent Study until a full proposal is submitted.
approved by the faculty sponsor, department chair, and academic dean. Many Independent study proposals require revisions before approval is granted; even with revisions independent study approval is NOT guaranteed. Students are strongly encouraged to submit a proposal in enough time to register for a different course if the proposal is not accepted. For complete instructions, see the SBS Independent/Directed Study Agreement and Proposal form available online.

– **ACCT-560 Accounting Practicum**

**Prerequisites:**
Course Coordinator consent required

**Credits:**
0.00

**Description:**
All accounting majors are required to complete 160 hours of pre-professional or professional accounting or tax experience prior to graduating. The hours may be obtained through one or more accounting or tax (a) internships, (b) part- or full-time employment, or (c) cooperative education positions. Hours may also be obtained through participation in Suffolk's Free Tax Preparation Clinic (SBS 555, SBS 556, and SBS 557 - each year will earn students 55 hours). Approval of the 160 hours work experience must be obtained in advance of beginning the work by completing a Practicum Approval Form and emailing it to acct560@suffolk.edu. Students register for the Accounting Practicum upon completion of the 160 hours and approval by the Accounting Department. Students should journal their work tasks and accomplishments. This experiential component carries no academic credit, does not require any tuition, and will be graded pass/fail.

– **SBS-555 Suffolk Free Tax Preparation Clinic I**

**Prerequisites:**
Sophomore status or higher

**Credits:**
1.00

**Description:**
SBS 555 is a one-credit course for undergraduate students volunteering with the Suffolk Free Tax Preparation Clinic, a tax preparation program that assists community members to complete their tax returns. Students will complete the required training and
certification exams during class time before engaging in tax preparation service during the semester, including at least two Saturdays. To count this experience toward the Local Engagement Requirement, several reflective writing assignments are required and students must maintain professional and appropriate behavior in all interactions with the community members served. Students who are required to complete ACCT 560 can instead complete SBS 555, 556, and 557.

- **SBS-556 Suffolk Free Tax Preparation Clinic II**
  
  **Prerequisites:**
  SBS-555
  
  **Credits:**
  1.00
  
  **Description:**
  SBS 556 is a one-credit course for undergraduate students volunteering with the Suffolk Free Tax Preparation Clinic for the second time, a tax preparation program that assists community members to complete their tax returns. Students will complete the required training and certification exams during class time before engaging in tax preparation service and mentoring of fellow volunteers during the semester, including at least three Saturdays. Students who are required to complete ACCT 560 can instead complete SBS 555, 556, and 557.

- **SBS-557 Suffolk Free Tax Preparation Clinic III**
  
  **Prerequisites:**
  SBS-555, SBS-556
  
  **Credits:**
  1.00
  
  **Description:**
  SBS 557 is a one-credit course for undergraduate students volunteering with the Suffolk Free Tax Preparation Clinic for the third time, a tax preparation program that assists community members to complete their tax returns. Students will complete the required training and certification exams during class time before engaging in tax preparation service, mentoring fellow volunteers during the semester, and assisting with site coordination, including four Saturdays. Students who are required to complete ACCT 560 can instead complete SBS 555, 556, and 557.

*Description:*
A survey course that introduces students to advertising concepts and practices from the perspective of agencies, clients, the media, and consumers. Students learn to think critically about advertising messages and learn practical techniques for developing
effective advertising in various media.

- **ADPR-289 Social Media**
  
  **Credits:**
  4.00

  **Description:**
  Social media sites such as Facebook, Instagram, Snapchat and Twitter are examined from a cultural and critical perspective. Students use of social media for community formation, social presence, identity building, and social activism. The roles of advertising, public relations, and branding are examined.

- **ADPR-297 Web Design**
  
  **Credits:**
  4.00

  **Description:**
  Students learn HTML, CSS and Widgets for the construction, design and posting of web sites. In addition, we examine the use of websites, mobile sites for advertising, public relations, search engine optimization, and marketing.

- **ADPR-347 Media Planning**
  
  **Prerequisites:**
  CJN 257

  **Credits:**
  4.00

  **Description:**
  The planning and purchasing of advertising space and time. Examines media costs, budgets, and media strategy for different audiences and markets.

- **ADPR-359 Advertising Copy**
  
  **Prerequisites:**
  CJN 257

  **Credits:**
4.00

**Description:**
Continuation of basic advertising, with an emphasis on developing effective advertising messages and advertising campaigns.

---

- **ADPR-437 Ad Campaigns**

**Prerequisites:**
CJN 359, CJN 257

**Credits:**
4.00

**Description:**
Principles of advertising campaigns. Students design, plan, and produce a national advertising campaign for a client as members of a simulated agency team.

---

- **ADPR-2277 Public Relations I: Principles**

**Credits:**
4.00

**Description:**
Effective public relations involve an understanding of the history, theory, and practice of public relations including public relations concepts, the role of the practitioner, and the foundations of public relations. This course seeks to provide that foundation as an introduction to the field of public relations. Issues surrounding the history, legality, process, and principles of public relations are explored.

---

**Advertising Electives (2 courses, 8 credits)**

Choose two of the following:

- **ADPR-239 Creativity in Global Branding**

**Credits:**
3.00
Description:
This online course is provides students with an understanding of the role creativity plays in the development and management of a company's brands. </thead>
<tbody>
<tr>
<td>Students will know/understand</td>
<td>Students will be able to...</td>
</tr>
</tbody>
</table>
### Learning Goals

Be prepared for careers in advertising, marketing communication, and related fields, as well as for graduate study.

### Learning Objectives

- Identify and use key terms and concepts in advertising
- Develop an understanding of the process and practice of advertising
- Investigate the impact of target markets and market segmentation on advertising
- Analyze the social, economic and cultural impact of advertising
- Develop a media plan for an advertising campaign
- Create, develop, research, present and justify an advertising campaign
- Develop advertising messages that are persuasive and ethical
- Use social media as part of an advertising campaign
- Construct and deliver a presentation

---

### Advertising Minor Archive 2018-2019

#### Minor Requirements: 5 courses, 20 credits

Choose one (1) 4-credit ADPR elective.

- **ADPR-257 Advertising**
  
  **Credits:**
  
  4.00

  **Description:**
  
  A survey course that introduces students to advertising concepts and practices from the perspective of agencies, clients, the media, and consumers. Students learn to think critically about advertising messages and learn practical techniques for developing
effective advertising in various media.

- **ADPR-297 Web Design**
  
  **Credits:**
  4.00

  **Description:**
  Students learn HTML, CSS and Widgets for the construction, design and posting of websites. In addition, we examine the use of websites, mobile sites for advertising, public relations, search engine optimization, and marketing.

- **ADPR-347 Media Planning**
  
  **Prerequisites:**
  CJN 257

  **Credits:**
  4.00

  **Description:**
  The planning and purchasing of advertising space and time. Examines media costs, budgets, and media strategy for different audiences and markets.

- **ADPR-359 Advertising Copy**
  
  **Prerequisites:**
  CJN 257

  **Credits:**
  4.00

  **Description:**
  Continuation of basic advertising, with an emphasis on developing effective advertising messages and advertising campaigns.

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.
Minor Programs Policy: A student declaring a minor may use no more than two courses from a major to fulfill the requirements for the minor. No more than one course from one minor may count toward the fulfillment of a second minor. Students may not minor in a subject in which they are also completing a major. For more information, see the Minor Programs section of the CAS Degree Requirements page.

Accelerated Bachelor's/Master's in Communication Archive 2018-2019

Degree Requirements

1. Students admitted to this dual degree program must meet all the requirements of an undergraduate degree program within the departments of Communication & Journalism or Advertising, Public Relations, & Social Media.

2. Student must also meet all requirements for the Master's degree in Communication.

3. Students will take two Communication graduate courses during their senior year; one during the fall semester and one during the spring semester. The two graduate courses taken during the senior year will count toward BOTH the undergraduate and graduate degree requirements. Credit hours will be awarded based on the graduate course description.

4. The graduate courses taken during the senior year will be determined by the Communication graduate program director.

5. Students are subject to the usual standards for academic standing, i.e., undergraduate standards for undergraduate courses and graduate standards for graduate courses.

Upon successful completion of all of the degree requirements, a student will receive a dual Bachelor's and Master's degree. The exact degree will be awarded based on the specific undergraduate program the student completes. A student may permanently exit the dual degree program and opt to graduate with a Bachelor's degree if all the requirements for a Bachelor's degree have been met. In this case, the graduate courses taken in the senior year will be counted as 4-credit courses applied toward the undergraduate degree requirements.

Honors Archive 2018-2019

Honors
To complete requirements for honors in the major, a candidate must:

1. Graduate with a major GPA of 3.5 or higher
2. Graduate with an overall GPA of 3.3 or higher
3. Complete ADPR-H506 with a minimum grade of B+
4. CAS Honors Program students only: Present work from your senior honors experience at the Honors Symposium or Pecha Kucha event

**ADPR-H506 Honors Seminar**

---

**Advertising Courses Archive 2018-2019**

Description:
Examines the important functions performed by human and mediated communication for health care consumers and providers. The course focus is on the use of communication strategies to inform and influence individual and community decisions regarding health.

- **ADPR-347 Media Planning**

  **Prerequisites:**
  CJN 257

  **Credits:**
  4.00

Description:
The planning and purchasing of advertising space and time. Examines media costs, budgets, and media strategy for different audiences and markets.

- **ADPR-355 Advertising and PR Agency Management**

  **Prerequisites:**
  Take ADPR-257 or ADPR-2277

  **Credits:**
  4.00

Description:
Examines the skills and functions required in order to manage a successful Advertising or Public Relations agency. Students learn how agency leaders win new business and generate income by offering an evolving mix of new services and how they manage client relationships and diverse internal teams, including creative, research, and media professionals. Examines a variety of agency structures, including new agency models, full service and speciality boutiques, and the transformation of agencies initiated by social media and the digital age.

- **ADPR-359 Advertising Copy**

  **Prerequisites:**
  CJN 257

  **Credits:**
4.00

**Description:**
Continuation of basic advertising, with an emphasis on developing effective advertising messages and advertising campaigns.

---

- **ADPR-360 Lifestyles PR: Entertainment**

**Prerequisites:**
Take ADPR-2277

**Credits:**
4.00

**Description:**
This course introduces students to the entertainment industry and explore strategies for creating, executing and evaluating public relations campaigns for entertainment products. The course explores techniques and strategies employed in all areas of entertainment publicity, including television, film, music, and theater. Topics covered include the development of a publicity campaign; reputation management; digital media; social media; working relationships with the media; and writing effective press releases and other promotional content.

---

- **ADPR-361 Lifestyle Public Relations: Fashion**

**Prerequisites:**
Take ADPR-2277

**Credits:**
4.00

**Description:**
Examines the role of public relations practitioners in building fashion brands. Includes an exploration of fashion brands and trends, the role of manufacturers, wholesalers, importers, and retailers, and the media channels and tactics used to promote fashion. Students examine the use of market research, social media, blogs, and events to engage fashion-minded consumers based on their lifestyle.

---

- **ADPR-362 Lifestyle Public Relations: Entertainment**

**Prerequisites:**
Take ADPR-2277

Credits:
4.00

Description:
Introduces students to the entertainment industry and explores strategies for creating, executing, and evaluating public relations campaigns for entertainment products. Explores techniques and strategies employed in all areas of entertainment publicity, including television, film, music, and theater. Topics covered include the development of a publicity campaign; reputation management; digital media; social media; working relationships with the media; and writing effective press releases and other promotional content.

– ADPR-363 Lifestyle Public Relations: Travel and Tourism
Prerequisites:
Take ADPR-2277

Credits:
4.00

Description:
Students acquire the public relations knowledge and skills to build brands and enhance the public image of companies, organizations, and government bodies that are stakeholders in the travel and tourism industry. Based on an established PR process, students conduct market research, set objectives, develop strategy, and design a hypothetical public relations campaign for a "class client" to help it promote travel and tourism products and services.

– ADPR-364 Lifestyle Public Relations: Food and Beverages
Prerequisites:
Take ADPR-2277

Credits:
4.00

Description:
The application of the public relations process to build brands and enhance the public image of companies and organizations engaged in the hospitality industry. Based on an established PR process, students conduct market research, set objectives, develop strategy, and design a hypothetical public relations campaign for a "class client" to help it promote food and beverage products or services.

---

**ADPR-365 Lifestyle Public Relations: Nonprofit Promotion**

**Prerequisites:**
Take ADPR-2277

**Credits:**
4.00

**Description:**
Students examine effective processes, tools, and techniques for promoting nonprofit organizations. Based on established PR process, students conduct market research, analysis, and strategic planning, then design promotional plans for leveraging organizational identity to foster a positive public image for charities, cultural organizations, educational institutions, and government.

---

**ADPR-378 Event Planning and Promotion**

**Prerequisites:**
CJN-2277 (formerly CJN-277)

**Credits:**
4.00

**Description:**
Examines how events are built, promoted, managed, and assessed, with an emphasis on conventions, trade shows, and nonprofit events. Issues analyzed include facilities planning and contracts, legal issues, volunteer management, budgeting, marketing, and planner/staff communication.

---

**ADPR-383 Online Advertising**

**Prerequisites:**
CJN-257;

**Credits:**
4.00

Description:
All forms of online advertising are explored, including paid search, with a focus on building a brand online.

- ADPR-409 Content Management

Prerequisites:
ADPR-2277

Credits:
4.00

Description:
Examines best practices for web publishing, including creating, editing and maintaining content for online and social media platforms. Students analyze the content of websites and then produce their own content in a variety of forms. Covers content creation and maintenance techniques, as well as customer and client relationship skills, with an emphasis on effective writing. Includes practical experience creating, editing and maintaining content for online and social media platforms.

- ADPR-430 Social Media Campaigns

Prerequisites:
ADPR-289

Credits:
4.00

Description:
Covers the development of a social media campaign for a target audience using a variety of platforms. Students will use social media and design tools to create a campaign for a client, moving it from concept through execution.

- ADPR-431 Multi-Platform Marketing Communication

Prerequisites:
ADPR-257
**Credits:**
4.00

**Description:**
Focuses on creating an integrated multi-platform brand campaign that spans various media, including television, social media, search and print. Students will analyze the success and failure of brands’ campaigns and will also develop a multi-platform campaign for an existing brand.

---

ADPR-435 Advocacy and Public Policy

**Credits:**
4.00

**Description:**
Examines persuasion strategies and tactics for advancing public policy proposals and concerns. Students will learn how to apply the principles of Public Relations, Advertising, Negotiations and Persuasion to influence the public and government decision-makers.

---

ADPR-437 Ad Campaigns

**Prerequisites:**
CJN 359, CJN 257

**Credits:**
4.00

**Description:**
Principles of advertising campaigns. Students design, plan, and produce a national advertising campaign for a client as members of a simulated agency team.

---

ADPR-441 Risk and Crisis Communication

**Prerequisites:**
CJN-2277(formerly CJN-277)

**Credits:**
4.00

**Description:**
Provides students with insight into effective risk and crisis management within organizations, including health organizations. Focuses on the application of theories, strategies, and tactics from a public relations perspective. Students understand how communication can prevent, cause, accelerate, and assist in recovery from a crisis.

- **ADPR-444 Advanced Health Communication**
  **Prerequisites:**
  CJN-340

  **Credits:**
  4.00

  **Description:**
  Explores theory and research in the development of persuasive health campaigns in many contexts including social marketing. Examines aspects of health campaigns including formative research, audience segmentation, key message tailoring, and communication tools.

- **ADPR-457 Integrated Marketing Communication**
  **Prerequisites:**
  CJN-2277(formerly CJN-277)

  **Credits:**
  4.00

  **Description:**
  Examines the integration of advertising, promotion, public relations and marketing communication in the strategic communication process. By learning the fundamentals of interpersonal and persuasive communication, students have an opportunity to develop an effective communication plan for a brand that includes creative copy.

- **ADPR-458 Advanced Sports Public Relations**
  **Prerequisites:**
  CJN-258

  **Credits:**
  4.00
### Description:
Focuses on the theory and practice of effective sports public relations management including the development of sport, team, and league public relations campaigns. Also focuses on sports public relations in the context of stakeholder relations in sports.

- **ADPR-479 Environmental Public Relations**
  **Credits:**
  4.00
  **Description:**
  Examines public issues involving the environment. Focuses on public relations strategies for government agencies, corporations, and other organizations concerned with the environment.

- **ADPR-488 Grant Writing**
  **Credits:**
  4.00
  **Description:**
  Hands-on course that explores the process of writing and submitting grants to foundations, associations, the government, and other grantors on behalf of nonprofit organizations. Students learn how to identify grant resources through research, compile an effective submission, and write supporting material such as cover letters and appendices. Also covers how grants are reviewed and tips for successful grant submissions.

- **ADPR-489 Political Communication**
  **Credits:**
  4.00
  **Description:**
  Examination of special circumstances created by politics and their impact on attempts at persuasion. Case studies of famous politicians’ political campaigns are combined with discussions of current trends in media and politics.

- **ADPR-491 Special Topics in Advertising, Public Relations, and Social Media**
  **Credits:**
4.00

**Description:**
Explores current issues in the field.

---

- **ADPR-492 Special Topics in Public Relations**
  **Credits:**
  4.00

  **Description:**
  Explores current issues in public relations.

---

- **ADPR-494 Special Topics in Advertising**
  **Credits:**
  4.00

  **Description:**
  Current issues in the field of advertising. Normally offered every semester.

---

- **ADPR-503 Experiential Learning in Communication**
  **Prerequisites:**
  16 Hrs of CJN coursework or CJN advisor consent
  **Credits:**
  1.00-12.00

  **Description:**
  Internships and practicum in Advertising, Public Relations & Social Media are available prior to the start of each semester.

---

- **ADPR-506 Honors Seminar**
  **Prerequisites:**
  Senior CJN majors with an overall cumulative grade point average of 3.0, and a major GPA of 3.4
  **Credits:**
Description:
Senior CJN majors meeting requirements for Departmental Honors are invited to participate in this seminar, which entails research and presentation of an approved topic.

- ADPR-H506 Honors Seminar

Prerequisites:
By invitation only. ADPR majors with Senior standing, a minimum cumulative GPA of 3.3, and a minimum major GPA of 3.5 in at least 7 ADPR courses.

Credits:
4.00

Description:
Senior ADPR majors meeting the requirements for Department Honors are invited to participate in this Seminar. The course involves advanced research to produce a project and/or research paper. Students are also required to create a presentation of their work.

- ADPR-510 Independent Study

Prerequisites:
An independent study form must be submitted to the CAS Dean’s Office.

Credits:
1.00-12.00

Description:
An independent study experience in Advertising, Public Relations & Social Media is available prior to the start of each semester.

- ADPR-2277 Public Relations I: Principles

Credits:
4.00

Description:
Effective public relations involve an understanding of the history, theory, and practice of public relations including public relations concepts, the role of the practitioner, and the foundations of public relations. This course seeks to provide that foundation as an introduction to the field of public relations. Issues surrounding the history, legality, process, and principles of public relations are explored.

- **ADPR-3376 Public Relations II: Research**
  **Prerequisites:**
  CJN-2277 (Formerly CJN-277)
  **Credits:**
  4.00
  **Description:**
  Examines how research aids the public relations practice. Students learn research methods that address public relations planning and problem-solving. Assignments provide students with hands-on practice using research for a PR project.

- **ADPR-3377 Public Relations III: Strategic Writing**
  **Prerequisites:**
  CJN-2277 (formerly CJN-277);
  **Credits:**
  4.00
  **Description:**
  Focuses on writing principles for public relations including the formulation of clear PR objectives, determining the knowledge of the target audience, and the development of key messages. Students apply these principles to common PR formats, including news releases, pitch letters, biographies, speeches, emails, digital content, and social media posts.

- **ADPR-4477 Public Relations IV: Campaigns**
  **Prerequisites:**
  ADPR-2277 (formerly CJN-2277) and ADPR-3377 (formerly CJN-3377) and Senior Standing.
  **Credits:**
4.00

Description:
Examines typical public relations problems experienced by profit and not-for-profit organizations. Provides students with an opportunity to demonstrate their mastery of the skills, techniques, and knowledge of public relations by creating a comprehensive campaign plan for a community client.

- ADPR-4478 SL-Public Relations IV: Campaigns

Prerequisites:
ADPR-2277(formerly CJN-2277), ADPR-3376, and ADPR-3377(formerly CJN-3377; Senior Standing. **FULFILLS THE PR-IV REQUIREMENT**

Credits:
4.00

Description:
In this course, students meet community needs by engaging in service-learning outside the classroom. Examines typical public relations problems experienced by profit and not-for-profit organizations. Provides students with an opportunity to demonstrate their mastery of the skills, techniques, and knowledge of public relations by creating a comprehensive campaign plan for a community client. This course requires a Service Learning experience.
AMERICAN STUDIES (ARCHIVE 2018-2019)

The American Studies minor engages students in the study of historical and contemporary U.S. identities, cultures, and societies. This program allows students to create an individualized course of study that draws on insights and methods from the arts, history, literature, and the social sciences. With his/her American Studies minor advisor, a student will identify a particular focus (e.g., an era, a topic, a theme, a region, a population, or a problem in American culture) that he or she wishes to explore closely.

There is no major available in American Studies.

- **Minor Requirements Archive 2018-2019**  
- **American Studies Courses Archive 2018-2019**

**Minor Requirements Archive 2018-2019**

**Minor Requirements: 5 courses, 20 credits**

**Core Requirement (1 course, 4 credits)**

Choose one of the following:

- **AMST-101 American History and Culture**

  **Credits:**
  4.00

  **Description:**
  This course offers a basic introduction to American culture and society through the study of American History. The city of Boston and its extraordinary history and institutions will be at the heart of the class and students will frequently visit sites close to the campus. Topics will focus on areas such as the way people from different cultures have understood and misunderstood each other; the evolution of
American politics and political institutions; the American Revolution and the founding documents and institutions of the United States; the distinct forms of American religion, American literature and the American economy; slavery and race in American society; the rise of America to world power; the changing role of women; the New Deal and the rise of the modern welfare state; immigration; the development of popular culture; and the meaning of Donald Trump. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-111 Defining America and Americans.

- **AMST-111 Defining America and Americans**
  
  **Credits:**
  
  4.00

  **Description:**
  Examine artistic, social, and political imaginings of America and Americans. We will read works by American and foreign observers of the United States to ask how Americans define themselves and how others see them. Course assignments will introduce students to themes, perspectives, and methods in the field of American Studies. This course fulfills the core requirement for the American Studies Minor. Enrollees in the Minor program may not register for AMST-101 American History and Culture.

**Electives (4 courses, 16 credits)**

Choose four courses from the following, with no more than eight credits in one department.

**Art History**

- **ARH-311 American Art**
  
  **Credits:**
  
  4.00

  **Description:**
Surveys American painting, sculpture, photography and architecture from the colonial period through WWII. Considers works by artists such as Smibert, Copley, West, Stuart, Whistler, Sargent, Eakins, Homer, Ryder, Bierstadt, Cole, Inness, Sloan, Sullivan, Wright, Hopper, O’Keefe, Dove, Hartley, Bellows, Stieglitz, Weston, and Steichen.

Black Studies

  **Credits:**
  4.00

  **Description:**
  Introduces students to the Reconstruction era in American history, and uses Reconstruction as a bridge to look at enslavement, which preceded the era, and the issue of freedom during, and after the era. In the first half of the class students read from texts that will provide them with an understanding of slavery, emancipation and reconstruction. The second half of the class will utilize on-line collections of the Freedman’s Bureau Papers to allow students to use documents to deepen their understanding of the Reconstruction era. The class will also provide a comparative approach by considering questions of citizenship in the 19th century for people of African descent in the United States, Latin America and the Caribbean. This course is identical to HST 469.

Communication and Journalism

English

- **ENG-217 American Literature I**

  **Prerequisites:**
  English Majors and Minors or Instructor Permission

  **Credits:**
4.00

**Description:**
Study of major American writing from its origins through 1865. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

---

- **ENG-218 American Literature II**

  **Prerequisites:**
  English Majors and Minors or Instructor Permission

  **Credits:**
  4.00

  **Description:**
  Study of major American writing from 1865 through the present. Regularly assigned essays on reading provide the basis for individualized instruction in clear, correct, and persuasive writing. Offered every semester.

---

- **ENG-353 Dwelling in American Realism**

  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  In-depth exploration of American Realism from the post-Civil War era to the pre-WWI era (roughly 1875 to 1915). Particular emphasis is given to the role of houses and material and consumer culture in the forging of American identity. Authors may include Howells, Twain, James and Wharton among others. Normally offered alternate years. Students will also visit authors' houses in the Boston area. This course requires prior approval in order to count towards the Women's and Gender Studies Minor. Students should consult with the instructor and the director of the WGS Minor no later than the first week of classes.
- **ENG-356 Whitman and Dickinson**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  An investigation of the lives and works of two of nineteenth-century America's greatest and most original poets. Topics will include types of poetic language and formal structure, the work of the poetic imagination in transforming observations of the world into art, and the ways in which poets process the idea of death and the reality of war. Finally, this course examines Whitman and Dickinson's impact on American popular culture as well as on the writings of modern poets and literary critics.

- **ENG-357 African-American Literature**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
  African-American writing from the beginning through the present. Normally offered alternate years.

- **ENG-362 Asian-American Literature**
  **Prerequisites:**
  WRI-102 or WRI-H103

  **Credits:**
  4.00

  **Description:**
An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

**Government**

- **GVT-223 American Politics & Institutions**

  **Prerequisites:**
  GVT 110 or GVT 120 or instructor's permission

  **Credits:**
  4.00

  **Description:**
  This course will provide an examination of the institutions involved in the American policy-making process. The student will learn about the presidential system that exists in the United States. The course will focus on a relationship between the President and Congress and how that relationship impedes or facilitates the public policy process, including the budgetary process. The course will include a discussion of the president's role as head of the executive branch, and the implementation of congressional policies. Attention will be given to the role of the judiciary in the policy process. Normally offered every year.

- **GVT-346 The American Presidency**

  **Prerequisites:**
  GVT 110 AND GVT 120 OR INSTRUCTOR’S CONSENT

  **Credits:**
  4.00

  **Description:**
  Perspectives on the role and problems of the presidency in American political life; the nature and difficulties of presidential influence and effectiveness, presidential authority within our system of government, and the impact of presidential character. Normally offered alternate years.
- **GVT-363 American Foreign Policy**
  **Prerequisites:**
  GVT 281 and GVT 261

  **Credits:**
  4.00

  **Description:**
  A decision-making approach to understanding the domestic and institutional context of U.S. foreign policy. Includes analysis of continuity and change since WWII using case studies of critical decisions, e.g., Korea, Cuba, Vietnam, etc. Not open to freshmen. Prerequisites: GVT 110, GVT 120, GVT 261 or instructor's consent. 1 term - 4 credits. Normally offered every year.

- **GVT-434 Global Migration Politics**
  **Prerequisites:**
  Junior Status required

  **Credits:**
  4.00

  **Description:**
  This course examines how American governmental institutions, political actors, and processes have both shaped and responded to one of the most significant and complex issues of public policy facing the nation: immigration to the United States. This class will explore a number of intriguing and difficult policy topics related to the almost unprecedented level of immigration that the U.S. has been experiencing. The focus of the class will include the following: admissions, citizenship, deportation and detention (including that of suspected terrorists), refugee/asylum law, and highly contested issues of today, such as definitions of citizenship, immigrant rights, and border enforcement. A major objective of this course is to provide students with the opportunity to conduct their own original research in American politics by delving into some aspect of immigration as a public policy issue.

- **GVT-438 Environmental Policy & Politic**
Prerequisites:
This course will have a service learning component Junior Status required

Credits:
4.00

Description:
From Rio to the Boston Harbor Project, this course examines the policies and politics of the environment. It examines the origins of the environmental movement in the United States focusing on the development and present function of government and non-government organizations responsible for the development and implementation of global, national, state and local environmental policies.

History

- HST-271 African-American History 1619-1860
Credits:
4.00

Description:
Examines the history of Africans in the United States from their arrival in the colonies to the Civil War and the end of legal slavery. Topics examined include: the development of the slave system, African-Americans, and the Declaration of Independence, and the abolition movement.

- HST-272 African-American History from 1860
Credits:
4.00

Description:
Examines African American history from the end of slavery to the twenty first century. Topics examined include: Emancipation and Reconstruction, Reconstruction and the Constitution, the Harlem Renaissance, the Civil Rights and Black Power Movements, and African-Americans at the start of the twenty-first century.

<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HST-290</td>
<td>19th Century America</td>
<td>4.00</td>
<td>Explores the history of the United States from 1810 to 1910. Students study the growth of American institutions, the rise and effects of a market society, westward expansion and Indian affairs, the enlivening of U.S. civic ideals, debates over free labor and slavery, the causes and effects of the Civil War, post-Civil War redefinitions of citizenship, immigration, Progressivism, and the nation's entry on to the world stage.</td>
</tr>
<tr>
<td>HST-292</td>
<td>American Foreign Relations Since 1898</td>
<td>4.00</td>
<td>Surveys the history of the U.S. as a world power. Examines officials’ motives and methods, as well as influences on policy in the form of social and economic forces, interest groups, and foreign challenges. Explores public debates over America's role (as well as debates among historians and international relations theorists), and discusses the domestic and foreign impact of America's world role. Major events addressed include the two world wars, the Cold War, Vietnam, and the U.S. recent history of involvement in the Middle East.</td>
</tr>
<tr>
<td>HST-319</td>
<td>The History of Black Music in America</td>
<td>4.00</td>
<td>Using music as a window this class explores the history of Black America as well as the history of all America. Through a combination of texts, videos, and recordings this class examines the music of Black America, from its African roots to hip hop in the 21st century. This will be done in the context and communities in which black music was created and performed, and also in relationship to the wider world.</td>
</tr>
</tbody>
</table>
- **HST-333 The United States: 1898-1945**
**Credits:**
4.00

**Description:**
Addresses social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also discussed. Topics include: the labor movement, civil rights, woman suffrage, progressivism, the rise of the U.S. as a world power, the First World War, the cultural and social crosscurrents of the nineteen-twenties, Fordism, new developments in advertising and industrial engineering, the Great Depression, the New Deal, and World War II.

- **HST-334 The United States: 1945-1970**
**Credits:**
4.00

**Description:**
American history in the decades immediately following World War II. Topics include the origins of the Cold War, McCarthyism, the emergence of a consumer society, the growth of the suburbs, the Civil Rights movement, the new women’s movement, Vietnam, and the political upheavals of the 1960s.

- **HST-335 The United States Since 1970**
**Credits:**
4.00

**Description:**
Examines the transformation of America in the decades since the early nineteen-seventies, taking up social, intellectual, and cultural developments as well as politics and economics; foreign relations (and their connection to the domestic scene) are also emphasized. - **HST-H359 The Age of Franklin**  
*Prerequisites:*  
Permission of the Instructor required.  

**Credits:**  
4.00

**Description:**  
Benjamin Franklin (1706-1790) rose from relative poverty and obscurity to become one of the most powerful and successful men of his century. Examines the political, scientific, and literary, an diplomatic cultures of the eighteenth century by focusing on Franklin's life, reading Franklin's Autobiography, and selections from his political, scientific, and satirical writings. This is an Honors-level course.

- **HST-368 Boston’s Historic Houses**  
**Credits:**  
4.00

**Description:**  
Working with historic houses in Boston, students will learn that art of interpreting history. Using collections, archives, and other repositories, students will research the houses and the people who lived in them. Many of these houses have existed from colonial times and had various uses. Formerly:HST 368 Introduction to Historical Interpretation.

- **HST-371 U.S. Women's History Colonial to 1865**  
**Credits:**  
4.00

**Description:**  
Traces the roles, images and experiences of women in America from colonial times to 1865. Topics include the family, work, religion, education, health care, motherhood, sexuality, social and political activism legal status, labor activism and popular culture. With attention to ethnicity, race, class, age, region of residence, disability and sexual orientation, the course focuses primarily on the everyday lives of ordinary women.
- **HST-381 American Colonial History**

  **Credits:**
  4.00

  **Description:**
  Explores the founding and settlement of North America; the social, economic, and political development of European colonies and their interactions with Native People; the social religious, and cultural world of early America; witchcraft, slavery, and warfare; the British-French struggle for control of the North American continent; and the background and causes of the American Revolution.

- **HST-383 Boston: Heritage of a City**

  **Prerequisites:**
  One History course

  **Credits:**
  4.00

  **Description:**
  Boston from its foundation in 1630 to its development as a 21st century metropolis. From the Massachusetts Bay Colony, to cradle of the American Revolution, to a Yankee merchant capital, Brahmin cultural center, and immigrant melting pot. When offered in the hybrid format, this course will meet at the regularly-scheduled time, but lectures and other course materials will be available on the course Blackboard site in case you cannot attend.

- **HST-389 Creating the Constitution**

  **Prerequisites:**
  Sophomore Standing Required

  **Credits:**
  4.00

  **Description:**
Investigates the development of American constitutional government, from the political crisis of the 1780s to the Civil War. The problems of individual liberty versus government power; state rights; race and slavery; war powers; pluralism.

**HST-395 US History: Race and Ethnicity**

**Prerequisites:**
Permission of Instructor Required

**Credits:**
4.00

**Description:**
Explores the history of the United States from perspectives of some of America's racial and ethnic groups. Through readings, writings, and discussions students will examine the history of difference and diversity in the United States.

**HST-469 Research Seminar: African American Life in Slavery and Freedom- Reconstruction And the Freedman's Bureau Papers**

**Credits:**
4.00

**Description:**
Introduces students to the Reconstruction era in American history, and uses Reconstruction as a bridge to look at enslavement, which preceded the era, and the issue of freedom during, and after the era. In the first half of the class students read from texts that will provide them with an understanding of slavery, emancipation and reconstruction. The second half of the class will utilize on-line collections of the Freedman's Bureau Papers to allow students to use documents to deepen their understanding of the Reconstruction era. The class will also provide a comparative approach by considering questions of citizenship in the 19th century for people of African descent in the United States, Latin America and the Caribbean. This course is identical to BLKST 469.

**HST-494 Politics and Protest**

**Credits:**
4.00
**Description:**
Examine the impact of organized reform movements on American history from the 1800s to the twenty first century. In each era presented, students will explore the various dynamics that impact reform.

**Music History**

- **MUH-211 Music of the United States**
  **Credits:**
  4.00
  
  **Description:**
  Surveys American music from Colonial times to the present; various attempts to create an indigenous musical style; vernacular and art music genres including folk, concert, and religious music, jazz and musical theatre; includes music of Billings, Amy Beach, Ives, Copland, Bernstein, and Libby Larsen. Normally offered yearly.

- **MUH-227 Jazz and Blues**
  **Credits:**
  4.00
  
  **Description:**
  Follows the evolution of jazz from blues and ragtime through Dixieland, Swing, Bebop, Cool, Latin, Modern, Free, Fusion, and Avant-Garde to Post-modern expressions of the present; the contributions of major soloists, arrangers, composers, leaders, and bands. Normally offered every year.

**Philosophy**

- **PHIL-263 Native American Religion**
  **Credits:**
  4.00
Description:
This course is an examination of Native American (Indian) religious experience, both the similarities and differences among the myths and rituals of the major tribes which comprise the background of our nation’s history of Western migration and “settlement.” The emphasis will be on understanding how life was experienced by these peoples through a close look at the philosophical meanings of their mythology and ethics. 1 term - 4 credits. Normally offered alternate years. C a

Psychology

- PSYCH-241 Social Psychology
Prerequisites:
PSYCH 114

Credits:
4.00

Description:
Studies the social determinants of the behavior of individuals in relation to groups and surveys current research findings in such major content areas as attribution, prejudice, conformity, obedience, social cognition, interpersonal attraction, altruism, and aggression. Normally offered every semester.

Sociology

- SOC-218 Crime and Law in Indian Country
Credits:
4.00

Description:
What happens if you commit a crime on an Indian reservation? Who will prosecute you and how will they punish you? This course will explore the roots of tribal legal systems and criminal law, both the Native and American influences. You will gain an understanding of tribal government, legal systems, criminal law, and the role of
tradition in contemporary tribal law. The course will also examine the conflict between Native and Non-Native perspectives on several cases: sovereignty, rights to cultural practices, women, freedom of religion, and land.

- **SOC-227 Race in American Society**
  
  **Credits:**
  4.00

  **Description:**
  Despite the election of Barack Obama as President of the United States, race remains one of the most divisive forces in U.S. society. While many of us struggle against racism, racial classification continues to affect where we live, where we work, and how we see ourselves. Racial classification affects our access to health care and our encounters with police officers. Distorted images of racial groups fill television and movie screens. Appeals to racism and fear of foreigners are dominant themes in elections to state and national offices. This course examines the formation and re-formation of racial classifications: how particular groups become racially identified, how these classifications change over time, and how conflicts over race have shaped American society. The meanings of race, as seen from a variety of perspectives, will be a consistent theme throughout the course.

- **SOC-275 Women and Crime**
  
  **Credits:**
  4.00

  **Description:**
  This course examines the complex relationships between women and crime today. This focus will include women as criminal offenders; women as victims of crime; and women as both offenders and victims. Course materials draw from recent feminist scholarship on these issues in the social sciences. Topics include the causes of women's crime women, drugs, and crime; child abuse and trauma; prostitution and sex trafficking; race, gender and victimization; and feminist social movements against violence. Crimes of violence against women are a central focus in the course.
**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

**Minor Programs Policy:** A student declaring a minor may use no more than two courses from a major to fulfill the requirements for the minor. No more than one course from one minor may count toward the fulfillment of a second minor. Students may not minor in a subject in which they are also completing a major. For more information, see the Minor Programs section of the CAS Degree Requirements page.

- Foundation Studies Archive 2018-2019
- Foundation Studies (Minor) Archive 2018-2019
- Foundation Courses Archive 2018-2019

Foundation Studies Archive 2018-2019

Requirements: 8-10 courses, 26-32 credits

Foundation Studies Course Codes and Sequencing: The letter “S” preceding a course number indicates a studio course.

A studio fee is assessed for all studio courses.

ADF-S101 Foundation Drawing I

Prerequisites:
Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings

Credits:
3.00

Description:
Observational drawing is a fundamental way of understanding and communicating visual experience. This course stresses the development and mastery of traditional drawing skills, concepts, and vocabulary, and employs a variety of techniques and
materials. Fundamental principles are introduced in structured lessons and exercises, which are supplemented by related outside assignments. Subject matter may include still life, portraiture, and the clothed and unclothed human figure.

- **ADF-S102 Foundation Drawing II**

**Prerequisites:**
ADF S101 or Instructor approval; Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
This course will refine the basic visual skills developed in Foundation Drawing I (ADF S101). The elements of color and mixed media are introduced to expand technical possibilities, while more intensive work with the clothed and unclothed human figure provides exposure to gesture, structure and complex form. As students begin to develop a more sophisticated and personal approach, issues of expression and interpretation and varied subject matter will be explored, focusing on personal style and expression.

- **ADF-S152 3-Dimensional Design**

**Prerequisites:**
ADF S166; Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
An understanding of form is critical to the development of the professional artist or designer. This course focuses on the hands-on use of line, plane, and volume in space. The role of scale, proportion, structure, surface, light, and display are addressed as students create objects that activate space and engage the viewer. The course proceeds from work with simple forms and techniques to more challenging and comprehensive problems that employ a variety of media and approaches.
ADF-S166 2D/Color

Prerequisites:
Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

Credits:
3.00

Description:
The study of color and design is supportive of every studio discipline and is vital to the understanding of all visual media. This course emphasizes the basic concepts and practices of two-dimensional design and color theory. Students employ an intensive, hands-on approach as they explore and master the elements of design (including line, shape, and value) and the three fundamental properties of color (hue, value, and strength). These skills are used in the construction of formally cohesive compositions, the development of arresting images, and the communication of visual ideas.

ADF-S172 CI: Integrated Studio II

Prerequisites:
ADF S101; Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

Credits:
3.00

Description:
This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.
Credits: 4.00

Description:
Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

— ARH-102 Art History II
Credits: 4.00

Description:
Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

Interior Design majors add:

— ADI-S106 Interior Design Communications
Prerequisites:
Take ADF-S101 ADI-S108 OR ADI-S205;

Credits: 3.00

Description:
Interior Design Communications teaches students how drawing media, observational drawing, perspective theory, color and design graphics can be integrated into the designer's process. In addition to exploring contrast, accent,
reflection, shade and shadow, the course underscores the importance of freehand sketching as a tool to foster intellectual inquiry and convey design concepts to a wider audience. The course introduces students to manual and digital methods for composing work for conceptual expression, technical drawing presentation and portfolio purposes. Design comprises a series of iterative steps where ideas, of increasing complexity, are conveyed with an increasing variety of visual tools. This course therefore introduces students to the techniques that designers employ in the process of creating interior spaces. Rather than merely illustrative devices, the course reveals how designers use drawings as tools. Like any tool, design communication requires practice and frequent application. The goal therefore, is to introduce a series of techniques that may be exercised in subsequent courses in order to convey ideas in studio and in design presentations.

- **ADI-S107 Spatial Graphics**

  **Credits:**
  3.00

  **Description:**
  Students will employ a range of computer programs used in the design industry. Exercises will introduce students to Building Information Modeling, vector graphics and raster file formats. 2D and 3D compositional and graphic principles will also be explored in order that students better understand the importance of file hierarchies and the efficient organization of digital workflow. Import and Export functions will enable students to work between applications in order to integrate images, drawings and vector graphics into their design presentations. Vector graphics will also be employed to generate 3D artifacts using digital fabrication tools.

- **ADI-S110 Digital Orthographics**

  **Credits:**
  3.00

  **Description:**
  This course will provide students with an understanding of orthographic principles and their importance to spatial thinking and design communication. Students will produce manual drawings in order to manipulate scale. Students will employ Computer Aided Drafting (CAD) software to create measured architectural plans, elevations and sections. The course will introduce students to file management
skills and develop proficiency in using cloud based resources. Students will employ virtual workspaces to conduct work in, and out of class. Vector graphic software will also be used to compose work, manipulate technical drawings and illustrate plans and sections for portfolio use.

Fine Arts majors add:

- **ADF-S171 CI: Integrated Studio 1**
  
  **Prerequisites:**
  Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

  **Credits:**
  3.00

  **Description:**
  This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

Graphic Design majors add:

- **ADF-S156 Imaging**
  
  **Prerequisites:**
  ADF S166; Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

  **Credits:**
  3.00

  **Description:**
Digital visual image generation and modification, especially when combined with traditional hand techniques, are essential skills for artists and designers of the 21st century. This course introduces techniques of image capture, manipulation and output. Weekly and longer-length assignments will address creative and innovative idea generation using these approaches.

— ADF-S171 CI: Integrated Studio 1

**Foundation Studies (Minor) Archive 2018-2019**

**Minor Requirements: 6 courses, 18 credits**

BFA candidates cannot pursue a Foundation Studies minor.

— ADF-S101 Foundation Drawing I

**Prerequisites:**
Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings

**Credits:**
3.00

**Description:**
Observational drawing is a fundamental way of understanding and communicating visual experience. This course stresses the development and mastery of traditional drawing skills, concepts, and vocabulary, and employs a variety of techniques and materials. Fundamental principles are introduced in structured lessons and exercises, which are supplemented by related outside assignments. Subject matter may include still life, portraiture, and the clothed and unclothed human figure.

— ADF-S102 Foundation Drawing II

**Prerequisites:**
ADF S101 or Instructor approval; Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

Description:
The study of color and design is supportive of every studio discipline and is vital to the understanding of all visual media. This course emphasizes the basic concepts and practices of two-dimensional design and color theory. Students employ an intensive, hands-on approach as they explore and master the elements of design (including line, shape, and value) and the three fundamental properties of color (hue, value, and strength). These skills are used in the construction of formally cohesive compositions, the development of arresting images, and the communication of visual ideas.

ADF-S172 CI: Integrated Studio II
Prerequisites:
ADF S101; Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

Credits:
3.00

Description:
This course builds on the Integrated Studio 1 experience: synthesizing fundamental visual ideas. IS 2 investigates the construction, documentation, and transformation of volumetric form, environmental space, and time. Projects will explore narrative strategies and the creation of immersive experiences. Students will develop critical and analytical skills while employing a range of traditional and digital media as they explore the creative boundaries of the classroom studio, the city of Boston, and virtual space.

Choose one of the following:

ADF-S171 CI: Integrated Studio 1

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

**Minor Programs Policy:** A student declaring a minor may use no more than two courses from a major to fulfill the requirements for the minor. No more than one course from one minor may count toward the fulfillment of a second minor. Students may not minor in a subject in which they are also completing a major. For more information, see the Minor Programs section of the CAS Degree Requirements page.

**Foundation Courses Archive 2018-2019**
- **ADF-110 Discovering Boston’s Art and Design**
  
  **Credits:**
  2.00

  **Description:**
  Explore, investigate and savor Boston’s rich variety of visual art and design with Professor Brown, New England School of Art & Design Program Director and practicing multi-media artist, as your guide. Visit museums, galleries and artists’ studios and meet professional designers in their work spaces. Exercise your own creativity too, with fun cell phone photo tours of the Boston waterfront and the Italian North End and Beacon Hill neighborhoods. Throughout the course, you will create a visual journal in collage to record your own unique experiences in Boston’s world of art and design. A studio fee of $40 applies. This course does not fulfill core requirements.

- **ADF-S101 Foundation Drawing I**
  
  **Prerequisites:**
  Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings

  **Credits:**
  3.00

  **Description:**
  Observational drawing is a fundamental way of understanding and communicating visual experience. - **ADF-S102 Foundation Drawing II**
  
  **Prerequisites:**
  ADF S101 or Instructor approval; Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

  **Credits:**
3.00

Description:
This course will refine the basic visual skills developed in Foundation Drawing I (ADF S101). The elements of color and mixed media are introduced to expand technical possibilities, while more intensive work with the clothed and unclothed human figure provides exposure to gesture, structure and complex form. As students begin to develop a more sophisticated and personal approach, issues of expression and interpretation and varied subject matter will be explored, focusing on personal style and expression.

- **ADF-S123 Painting**

Prerequisites:
ADF S101, ADF S166

Credits:
3.00

Description:
In this introductory course, students will learn to accurately perceive relationships of shape, form, color and value, and to translate that information through the medium of paint. In a series of in-class and outside projects on canvas, prepared paper and panel, students will explore various approaches to the use of acrylic and oil paint. Emphasis will be placed on the development of disciplined technical skills as well as the exploration of painting's potential as a medium of communication and creative visual expression.

- **ADF-S152 3-Dimensional Design**

Prerequisites:
ADF S166; Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

Credits:
3.00

Description:
An understanding of form is critical to the development of the professional artist or designer. This course focuses on the hands-on use of line, plane, and volume in space. - Art History Minor Archive 2018-2019
- Art History Courses Archive 2018-2019

Art History Major Archive 2018-2019

Major Requirements: 11 courses, 39-40 credits

Students in this major must earn the BA.

Core Requirements (3 courses, 9 credits)

- **ARH-101 Art History I**
  
  **Credits:**
  4.00

  **Description:**
  Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

- **ARH-102 Art History II**
  
  **Credits:**
  4.00
Description:
Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

− CAS-201 College to Career: Explore Your Options And Find Your Path
Prerequisites:
CAS 101. CAS students only. SBS students by special permission. Restricted to the following majors: Art History, Asian Studies, Biology, Economics, English, French, History, Humanities, International Economics, Music History, Philosophy, Physics, Radiation Science, Spanish, and Undeclared. Instructor consent required for all other majors.

Credits:
1.00

Description:
This course engages students in the early stages of career planning. Students will explore their interests, skills, values, and strengths, which will allow them to begin setting appropriate goals for professional development. Once students understand themselves in relation to the world of work, they will learn how to research careers and employment paths that fit with their goals.

Studio Art Requirement (1 course, 3 credits)
Choose one of the following:

− ADF-S101 Foundation Drawing I
Prerequisites:
Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings

Credits:
3.00
Description:
Observational drawing is a fundamental way of understanding and communicating visual experience. This course stresses the development and mastery of traditional drawing skills, concepts, and vocabulary, and employs a variety of techniques and materials. Fundamental principles are introduced in structured lessons and exercises, which are supplemented by related outside assignments. Subject matter may include still life, portraiture, and the clothed and unclothed human figure.

— ADF-S123 Painting
Prerequisites:
ADF S101, ADF S166

Credits:
3.00

Description:
In this introductory course, students will learn to accurately perceive relationships of shape, form, color and value, and to translate that information through the medium of paint. In a series of in-class and outside projects on canvas, prepared paper and panel, students will explore various approaches to the use of acrylic and oil paint. Emphasis will be placed on the development of disciplined technical skills as well as the exploration of painting’s potential as a medium of communication and creative visual expression.

— ADF-S152 3-Dimensional Design
Prerequisites:
ADF S166; Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

Credits:
3.00

Description:
An understanding of form is critical to the development of the professional artist or designer. This course focuses on the hands-on use of line, plane, and volume in space. The role of scale, proportion, structure, surface, light, and display are addressed as students create objects that activate space and engage the viewer.
The course proceeds from work with simple forms and techniques to more challenging and comprehensive problems that employ a variety of media and approaches.

- **ART-S209 Introduction to Drawing and Mixed Media**
  **Credits:**
  3.00

  **Description:**
  This course is an introduction to the fundamental principles of drawing using both traditional and experimental techniques. Media includes pencil, charcoal, white chalk, ink and collage. Subject matter includes still-lives, landscapes/cityscapes, portraiture and live clothed models. This course is appropriate for beginners as well as more advanced students. Individual attention is given to students at various levels of ability, allowing students to progress at their own pace.

- **ART-S211 Introduction to Painting**
  **Credits:**
  3.00

  **Description:**
  This introductory course is designed to encourage students with little or no knowledge of the use of various painting processes. The basic elements of painting are introduced in exercises enhanced by demonstrations. Students work with acrylic paint and various painting mediums. Creative work is encouraged in a relaxed atmosphere where individual attention is given to students at various levels of ability.

**Art History Electives (7 courses, 27-28 credits)**

Choose seven electives, one of which must be an ARH 400-level seminar or ARH 502, Honors Thesis. Electives must include at least one course in groups A, B, and C.

A) Ancient through 18th century Art

- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**
  **Credits:** 4.00

  **Description:**
  Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

- **ARH-305 Art of Greece and Rome**
  **Credits:** 4.00

  **Description:**
  Examines the civic, religious, and domestic art and architecture of the Ancient Mediterranean cultures of Greece and Rome. Considers temples, forums, basilicas, city planning, sculpture, pottery, wall painting, mosaics, and engineering achievements in their cultural contexts.

- **ARH-307 Art of the Italian Renaissance**
  **Credits:** 4.00

  **Description:**
  Examines painting, sculpture and architecture of the 14th, 15th, and 16th centuries in Italy in their cultural context. Artists include Giotto, Masaccio, Donatello, Leonardo da Vinci, Raphael, Michelangelo, and Titian.

- **ARH-308 Art of the Baroque & Rococo**
  **Credits:** 4.00

  **Description:**
Explores painting, sculpture and architecture in Italy, Spain and Northern Europe during the 17th and 18th century. Works by Rembrandt, Rubens, Caravaggio, Bernini, Poussin, Velasquez, Watteau, Boucher, Fragonard, Chardin, Hogarth and others considered within their historical contexts.

- **ARH-312 Art of the Northern Renaissance**
  
  **Credits:**
  4.00

  **Description:**
  Examines painting, sculpture, and architecture of the 14th, 15th and 16th centuries in Northern Europe, within their historical context. Topics include the rise of oil painting, the development of woodcut and engraving, the effect of the Reformation on art. Artists include van Eyck, Bosch, Durer, Holbein and Brueghel.

- **ARH-404 Seminar in Art History: Caravaggio**
  
  **Prerequisites:**
  Permission of instructor required

  **Credits:**
  4.00

  **Description:**
  Explores the art of Caravaggio within the historical context of the Early Baroque period in Italy. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.

- **ARH-406 Seminar in Art History: Bernini**
  
  **Prerequisites:**
  Instructor’s consent required.

  **Credits:**
  4.00

  **Description:**
Explores the art of Gian Lorenzo Bernini, arguably the most important and influential figure in the world of 17th-century art. Designed for art history majors & minors, the seminar explores Bernini’s career within the context of the religious, political, and artistic upheavals of his time; it also helps students develop research skills and provides a foundation that will be valuable for anyone pursuing a career in the world of art and museums.

B) 19th century through Contemporary Art

- **ARH-309 Art of the 19th Century**
  
  **Credits:**
  4.00
  
  **Description:**
  Examines Neoclassicism, Romanticism, Realism and Impressionism in the European painting. Considers works by artists such as David, Ingres, Friedrich, Constable, Delacroix, Goya, Courbet, Millet, Daumier, Manet, Monet, Renoir, Degas, and Cassatt within their historical contexts.

- **ARH-310 Modernism in Art**
  
  **Credits:**
  4.00
  
  **Description:**
  Examines European painting and sculpture from around 1880 to 1940, including Symbolism, Post-Impressionism, Fauvism, Expressionism, Cubism, Futurism, The Bauhaus, Dada, and Surrealism. Considers works by artists such as Gauguin, Cezanne, Van Gogh, Matisse, Kandinsky, Picasso, Braque, Mondrian, Duchamp, Magritte, Dali, and Ernst within their historical contexts.

- **ARH-311 American Art**
  
  **Credits:**
  4.00
  
  **Description:**
Surveys American painting, sculpture, photography and architecture from the colonial period through WWII. Considers works by artists such as Smibert, Copley, West, Stuart, Whistler, Sargent, Eakins, Homer, Ryder, Bierstadt, Cole, Inness, Sloan, Sullivan, Wright, Hopper, O'Keefe, Dove, Hartley, Bellows, Stieglitz, Weston, and Steichen.

- **ARH-316 Contemporary Art**
  **Credits:** 4.00

  **Description:**
  Explores European and American art since WWII, including Abstract Expressionism, Colorfield Painting, Pop Art, Minimalism, Neo-Dada, Performance Art, Feminism, Neo-Expressionism and Post-Modernism. Artists include Bacon, Giacometti, Pollock, De Kooning, Frankenthaler, Rothko, Stella, Judd, Calder, David Smith, Serra, Johns, Rauschenberg, Warhol, Lichtenstein, Smithson, Christo, Nevelson, Kosuth, Kruger, Sherman, Basquiat, Kiefer, and Haring.

- **ARH-318 Art and Museums Today**
  **Credits:** 4.00

  **Description:**
  Examines the art world of the past few decades with special attention to the roles and exhibition practices of contemporary art museums and galleries. Considers the major artists and trends in today's art world, the history of museums, and the effect of museums on art produced today. Students will visit local museums, including the Institute of Contemporary Art (ICA) individually and in groups. This course fulfills the ECR requirement.

- **ARH-321 Women, Art and Society**
  **Credits:** 4.00

  **Description:**
Surveys women artists from the sixteenth century to the present and examines new direction in art-historical scholarship developed by feminist art historians during recent decades.

— ARH-411 Seminar in Art History: Impressionism

**Prerequisites:**
Permission of instructor required

**Credits:**
4.00

**Description:**
Explores the Impressionist movement of the late nineteenth-century, including Monet, Renoir, and Pissaro, within its historical context. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.

C) Non-Western Art

— ARH-203 Arts of Asia

**Credits:**
4.00

**Description:**
Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

Notes
One elective course may be in related areas of visual culture such as the philosophy of art, photojournalism, advertising, cinema, and select 3-credit studio art and design courses, such as the following:
ADF-S101 Foundation Drawing

**Prerequisites:**
Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
Observational drawing is a fundamental way of understanding and communicating visual experience. This course stresses the development and mastery of traditional drawing skills, concepts, and vocabulary, and employs a variety of techniques and materials. Fundamental principles are introduced in structured lessons and exercises, which are supplemented by related outside assignments. Subject matter may include still life, portraiture, and the clothed and unclothed human figure.

ADF-S123 Painting

**Prerequisites:**
ADF S101, ADF S166

**Credits:**
3.00

**Description:**
In this introductory course, students will learn to accurately perceive relationships of shape, form, color and value, and to translate that information through the medium of paint. In a series of in-class and outside projects on canvas, prepared paper and panel, students will explore various approaches to the use of acrylic and oil paint. Emphasis will be placed on the development of disciplined technical skills as well as the exploration of painting's potential as a medium of communication and creative visual expression.

ADF-S152 3-Dimensional Design

**Prerequisites:**
ADF S166; Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings.
Credits: 3.00

Description: An understanding of form is critical to the development of the professional artist or designer. This course focuses on the hands-on use of line, plane, and volume in space. The role of scale, proportion, structure, surface, light, and display are addressed as students create objects that activate space and engage the viewer. The course proceeds from work with simple forms and techniques to more challenging and comprehensive problems that employ a variety of media and approaches.

Prerequisites: ADF-182 and the Fine Art Program Director’s consent.

Description: This course introduces the students to Italian Renaissance art, artists and culture from the first evidence in the Italian Gothic (around the 1260’s) to the Early and High Renaissance, predominantly in Florence and Venice, up to the 1600’s. The course will survey the history of painting, sculpture and architecture as we study the works individually, for their formal elements and visual importance, but also within their aesthetic, historic, political and cultural context. Class discussion and a visual analysis of works of art will encourage personal interpretation and critical thinking. A list of terms related to the Renaisances introduces the language of art. Normally offered during the summer. Offered in Italy only.

Description:
A survey course that introduces students to advertising concepts and practices from the perspective of agencies, clients, the media, and consumers. Students learn to think critically about advertising messages and learn practical techniques for developing effective advertising in various media.

---

**ARH-290 Internship in Art History**

**Prerequisites:**
ARH-101 and ARH-102 and Instructor consent

**Credits:**
1.00- 4.00

**Description:**
Designed to accompany an internship at a local museum, gallery, archive, or other art institution, this independent study course will carry variable credit depending on the number of hours devoted to the internship and the related academic work done by the student. Interested students should consult the instructor as they are applying for internships.

---

**CJN-152 Visual Aesthetics**

**Credits:**
4.00

**Description:**
This course provides an introduction to a humanities approach to a range of media, including but not limited to film and television. The course helps students develop visual literacies, enriching their understanding of multiple forms of media. The class also explores how media texts are constructed for specific cultural, entertainment, informative and propaganda purposes.

---

**CJN-L218 Photojournalism**

**Credits:**
4.00

**Description:**

An introduction to the role of photography in the journalistic process. A discussion of photography as communication and a survey of the history of photography.

- FR-220 French & Francophone Cinema
  **Credits:**
  4.00

  **Description:**
  Discusses and deepens understanding of French and Francophone cinema from its origins in the late nineteenth century to the early twenty-first century. Explores early works from France, by the Lumiere Brothers and Georges Melies as well as contemporary films from France, Algeria, Burkina Faso, Canada, Haiti, and Senegal.

- SPAN-408 Latin American Cinema
  **Prerequisites:**
  Take ENG-102 or ENG-103 or Instructor’s consent. Span 302 is strongly recommended for Spanish and Latin American & Caribbean Studies majors and minors.

  **Credits:**
  4.00

  **Description:**
  Begins with the Cuban revolution as a point of departure and examines films from Argentina, Chile, Colombia, Mexico, and other Latin American countries. Students explore the relationship between film & society and consider how knowledge of a culture and its history is influenced and shaped by what is seen on the screen. Films in Spanish with English subtitles.

- PHIL-219 Philosophy of Art
  **Credits:**
  4.00

  **Description:**
"What counts as art?" "What is beauty?" "Are there objective standards of beauty?"
This course examines the nature of aesthetic experience, art, beauty, and creativity. Through the classic and contemporary readings, the students will be introduced to philosophical issues concerning the meaning of art, artistic representation, perceptions of art, interpretation, and criticism. Students will be encouraged to reflect on their own experience of art and explore the relationships among the artist, the audience, the artwork, and the world. 1 term - 4 credits. Normally offered every third year.

- A relevant Seminar for Freshmen with a strong concentration in art history or visual culture may also count as an elective at the discretion of the department chair.
- Upper-level Art History courses taken at other institutions or through study abroad must be approved by the department chair, and must not overlap significantly with any other upper-level Art History course(s) counted toward the major.
- AP credit cannot be applied toward the major.

Residency Requirement Policy: In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

Learning Goals & Objectives

Learning goals and objectives reflect the educational outcomes achieved by students through the completion of this program. These transferable skills prepare Suffolk students for success in the workplace, in graduate school, and in their local and global communities.

<table>
<thead>

<tr>
<td>Students will know/understand</td>
<td>Students will be able to...</td>
</tr>
</tbody>
</table>
### Learning Goals

<table>
<thead>
<tr>
<th>Students will know/understand</th>
</tr>
</thead>
<tbody>
<tr>
<td>The important roles that the visual arts have played in society.</td>
</tr>
<tr>
<td>Appropriate methods for analyzing works of visual art.</td>
</tr>
</tbody>
</table>

### Learning Objectives

<table>
<thead>
<tr>
<th>Students will be able to...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Demonstrate awareness of the multiple purposes visual arts have played in different cultures and periods</td>
</tr>
<tr>
<td>GENRE: know the traditional aims and conventions of the major types or genres of work produced in the historical and regional contexts covered by the course (e.g. Renaissance status portraits, Gothic cathedrals); and articulate how a given work or monument sustains, transforms, or breaks those conventions in the pursuit of its particular aims</td>
</tr>
<tr>
<td>FORM/STYLE: thoroughly and accurately perceive the media, techniques, and formal elements of a given work (composition, texture, scale, etc.); use appropriate technical vocabulary for describing them (contrapposto, nave, painterly brushwork); and relate them to the contextual meaning/purpose and expressive content of the work</td>
</tr>
<tr>
<td>CONTEXT: relate works to the ideas and practices of their original contexts (social, cultural, political, religious, etc.); and account for how a given work sought to affect or influence the ideas and practices of its original context</td>
</tr>
<tr>
<td>Analyze works of art seen in person at local museums and galleries using course-acquired knowledge and skills</td>
</tr>
</tbody>
</table>

### Art History Minor Archive 2018-2019

**Minor Requirements: 5 courses, 20 credits**

**Core Requirements (2 courses, 8 credits)**
- **ARH-101 Art History I**
  **Credits:** 4.00
  **Description:** Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

- **ARH-102 Art History II**
  **Credits:** 4.00
  **Description:** Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

**Upper Level Course Requirement (3 courses, 12 credits)**

Choose three of the following:

- **ARH-203 Arts of Asia**
  **Credits:** 4.00
  **Description:** Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.
- **ARH-205** Gender, Class and Alterity in Ancient and Medieval Art
  **Credits:**
  4.00

  **Description:**
  Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.

- **ARH-305** Art of Greece and Rome
  **Credits:**
  4.00

  **Description:**
  Examines the civic, religious, and domestic art and architecture of the Ancient Mediterranean cultures of Greece and Rome. Considers temples, forums, basilicas, city planning, sculpture, pottery, wall painting, mosaics, and engineering achievements in their cultural contexts.

- **ARH-307** Art of the Italian Renaissance
  **Credits:**
  4.00

  **Description:**
  Examines painting, sculpture and architecture of the 14th, 15th, and 16th centuries in Italy in their cultural context. Artists include Giotto, Masaccio, Donatello, Leonardo da Vinci, Raphael, Michelangelo, and Titian.

- **ARH-308** Art of the Baroque & Rococo
  **Credits:**
  4.00

  **Description:**
Explores painting, sculpture and architecture in Italy, Spain and Northern Europe during the 17th and 18th century. Works by Rembrandt, Rubens, Caravaggio, Bernini, Poussin, Velasquez, Watteau, Boucher, Fragonard, Chardin, Hogarth and others considered within their historical contexts.

- **ARH-309 Art of the 19th Century**
  
  **Credits:**
  
  4.00

  **Description:**
  
  Examines Neoclassicism, Romanticism, Realism and Impression in the European painting. Considers works by artists such as David, Ingres, Friedrich, Constable, Delacroix, Goya, Courbet, Millet, Daumier, Manet, Monet, Renoir, Degas, and Cassatt within their historical contexts.

- **ARH-310 Modernism in Art**
  
  **Credits:**
  
  4.00

  **Description:**
  
  Examines European painting and sculpture from around 1880 to 1940, including Symbolism, Post-Impressionism, Fauvism, Expressionism, Cubism, Futurism, The Bauhaus, Dada, and Surrealism. Considers works by artists such as Gauguin, Cezanne, Van Gogh, Matisse, Kandinsky, Picasso, Braque, Mondrian, Duchamp, Magritte, Dali, and Ernst within their historical contexts.

- **ARH-311 American Art**
  
  **Credits:**
  
  4.00

  **Description:**
  
  Surveys American painting, sculpture, photography and architecture from the colonial period through WWII. Considers works by artists such as Smibert, Copley, West, Stuart, Whistler, Sargent, Eakins, Homer, Ryder, Bierstadt, Cole, Inness, Sloan, Sullivan, Wright, Hopper, O' Keefe, Dove, Hartley, Bellows, Stieglitz, Weston, and Steichen.

</tbody>
</table>
Credits: 4.00

Description:
Surveys women artists from the sixteenth century to the present and examines new direction in art-historical scholarship developed by feminist art historians during recent decades.

ARH-404 Seminar in Art History: Caravaggio

Prerequisites:
Permission of instructor required

Credits: 4.00

Description:
Explores the art of Caravaggio within the historical context of the Early Baroque period in Italy. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.

ARH-406 Seminar in Art History: Bernini

Prerequisites:
Instructor's consent required.

Credits: 4.00

Description:
Explores the art of Gian Lorenzo Bernini, arguably the most important and influential figure in the world of 17th-century art. Designed for art history majors & minors, the seminar explores Bernini’s career within the context of the religious, political, and artistic upheavals of his time; it also helps students develop research skills and provides a foundation that will be valuable for anyone pursuing a career in the world of art and museums.
- **ARH-411 Seminar in Art History: Impressionism**

**Prerequisites:**
Permission of instructor required

**Credits:**
4.00

**Description:**
Explores the Impressionist movement of the late nineteenth-century, including Monet, Renoir, and Pissaro, within its historical context. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.

**Notes**

- Upper-level Art History courses taken at other institutions or through study abroad must be approved by the department chair, and must not overlap significantly with any other upper-level Art History course(s) counted toward the minor.
- AP credit cannot be applied toward the minor.
- The Art History requirement for the BFA degree (ARH 101, ARH 102) and one additional Art History course required by a BFA major may be used to satisfy the requirements of the minor in Art History.

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

**Minor Programs Policy:** A student declaring a minor may use no more than two courses from a major to fulfill the requirements for the minor. No more than one course from one minor may count toward the fulfillment of a second minor. Students may not minor in a subject in which they are also completing a major. For more information, see the Minor Programs section of the CAS Degree Requirements page.

**Honors Archive 2018-2019**
Art History Honors

To complete requirements for honors in the major, a candidate must:

1. Have a major GPA of 3.5 or higher
2. Have an overall GPA of 3.2 or higher
3. Complete ARH-H502
4. Complete a research paper in ARH-H502 that is approved by a department faculty member
5. Make a formal oral presentation
6. *CAS Honors Program students only:* Present work from your senior honors experience at the Honors Symposium or Pecha Kucha event.

---

ARH-H502 ARH Honors Thesis

**Prerequisites:**
Senior status and permission of Department Chair

**Credits:**
4.00

**Description:**
A major research project completed under the supervision of a regular faculty member.

ARH-101 Art History I

**Credits:**
4.00
Description:
Surveys the art of Western civilization from prehistoric caves to medieval cathedrals. Considers works from the Ancient Near East, Ancient Egypt, Ancient Greece and Rome, the Byzantine Era, the Romanesque Period, and the Gothic Period in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

- **ARH-102 Art History II**
  
  **Credits:**
  4.00

  **Description:**
  Surveys the art of Europe and America from the Renaissance to the present. Considers work of painting, sculpture, and architecture from periods such as the Renaissance, the Baroque, the Rococo, Neoclassicism, Romanticism, Impressionism, Abstract Impressionism, and Post-Modernism in their historical contexts. Introduces students to formal analysis, iconography, and critical thinking.

- **ARH-203 Arts of Asia**
  
  **Credits:**
  4.00

  **Description:**
  Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

- **ARH-205 Gender, Class and Alterity in Ancient and Medieval Art**
  
  **Credits:**
  4.00

  **Description:**
  Explores issues of sexuality, gender, race, and social class in the ancient and medieval worlds. Examines key artworks from ancient Greece, the Roman Empire and medieval Europe within historical, social and cultural contexts.
- **ARH-290 Internship in Art History**  
  **Prerequisites:**  
  ARH-101 and ARH-102 and Instructor consent

  **Credits:**  
  1.00- 4.00

  **Description:**  
  Designed to accompany an internship at a local museum, gallery, archive, or other art institution, this independent study course will carry variable credit depending on the number of hours devoted to the internship and the related academic work done by the student. Interested students should consult the instructor as they are applying for internships.

- **ARH-305 Art of Greece and Rome**  
  **Credits:**  
  4.00

  **Description:**  
  Examines the civic, religious, and domestic art and architecture of the Ancient Mediterranean cultures of Greece and Rome. Considers temples, forums, basilicas, city planning, sculpture, pottery, wall painting, mosaics, and engineering achievements in their cultural contexts.

- **ARH-307 Art of the Italian Renaissance**  
  **Credits:**  
  4.00

  **Description:**  
  Examines painting, sculpture and architecture of the 14th, 15th, and 16th centuries in Italy in their cultural context. Artists include Giotto, Masaccio, Donatello, Leonardo da Vinci, Raphael, Michelangelo, and Titian.
Description:
Explores painting, sculpture and architecture in Italy, Spain and Northern Europe during the 17th and 18th century. Works by Rembrandt, Rubens, Caravaggio, Bernini, Poussin, Velasquez, Watteau, Boucher, Fragonard, Chardin, Hogarth and others considered within their historical contexts.

ARH-309 Art of the 19th Century
Credits: 4.00

Description:
Examines Neoclassicism, Romanticism, Realism and Impression in the European painting. Considers works by artists such as David, Ingres, Friedrich, Constable, Delacroix, Goya, Courbet, Millet, Daumier, Manet, Monet, Renoir, Degas, and Cassatt within their historical contexts.

ARH-310 Modernism in Art
Credits: 4.00

Description:
Examines European painting and sculpture from around 1880 to 1940, including Symbolism, Post-Impressionism, Fauvism, Expressionism, Cubism, Futurism, The Bauhaus, Dada, and Surrealism. Considers works by artists such as Gauguin, Cezanne, Van Gogh, Matisse, Kandinsky, Picasso, Braque, Mondrian, Duchamp, Magritte, Dali, and Ernst within their historical contexts.

ARH-311 American Art
Credits: 4.00

Description:
Surveys American painting, sculpture, photography and architecture from the colonial period through WWII. Considers works by artists such as Smibert, Copley, West, Stuart, Whistler, Sargent, Eakins, Homer, Ryder, Bierstadt, Cole, Inness, Sloan, Sullivan, Wright, Hopper, O’ Keefe, Dove, Hartley, Bellows, Stieglitz, Weston, and Steichen.

- **ARH-312 Art of the Northern Renaissance**
  **Credits:** 4.00
  **Description:** Examines painting, sculpture, and architecture of the 14th, 15th and 16th centuries in Northern Europe, within their historical context. Topics include the rise of oil painting, the development of woodcut and engraving, the effect of the Reformation on art. Artists include van Eyck, Bosch, Durer, Holbein and Brueghel.

- **ARH-316 Contemporary Art**
  **Credits:** 4.00
  **Description:** Explores European and American art since WWII, including Abstract Expressionism, Colorfield Painting, Pop Art, Minimalism, Neo-Dada, Performance Art, Feminism, Neo-Expressionism and Post-Modernism. - **ARH-318 Art and Museums Today**
  **Credits:** 4.00
  **Description:** Examines the art world of the past few decades with special attention to the roles and exhibition practices of contemporary art museums and galleries. Considers the major artists and trends in today’s art world, the history of museums, and the effect
of museums on art produced today. Students will visit local museums, including the
Institute of Contemporary Art (ICA) individually and in groups. This course fulfills
the ECR requirement.

- ARH-321 Women, Art and Society
  **Credits:**
  4.00

  **Description:**
  Surveys women artists from the sixteenth century to the present and examines new
direction in art-historical scholarship developed by feminist art historians during
recent decades.

- ARH-404 Seminar in Art History: Caravaggio
  **Prerequisites:**
  Permission of instructor required

  **Credits:**
  4.00

  **Description:**
  Explores the art of Caravaggio within the historical context of the Early Baroque
period in Italy. The course emphasizes research skills and the methodology of art
history. Designed as a foundation for students intending to pursue a career in the
world of art and/or museums.

- ARH-406 Seminar in Art History: Bernini
  **Prerequisites:**
  Instructor's consent required.

  **Credits:**
  4.00

  **Description:**
Explores the art of Gian Lorenzo Bernini, arguably the most important and influential figure in the world of 17th-century art. Designed for art history majors & minors, the seminar explores Bernini's career within the context of the religious, political, and artistic upheavals of his time; it also helps students develop research skills and provides a foundation that will be valuable for anyone pursuing a career in the world of art and museums.

- **ARH-411 Seminar in Art History: Impressionism**

  **Prerequisites:**
  Permission of instructor required

  **Credits:**
  4.00

  **Description:**
  Explores the Impressionist movement of the late nineteenth-century, including Monet, Renoir, and Pissaro, within its historical context. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.

- **ARH-H502 ARH Honors Thesis**

  **Prerequisites:**
  Senior status and permission of Department Chair

  **Credits:**
  4.00

  **Description:**
  A major research project completed under the supervision of a regular faculty member.

- **ARH-510 Independent Study**

  **Prerequisites:**
  An independent study form must be submitted to the CAS Dean's Office.

  **Credits:**
1.00- 4.00

**Description:**
Students meet with a departmental faculty member to pursue advanced studies in areas of particular interest to them.
CAS HONORS SCHOLARS (ARCHIVE 2018-2019)

- CAS Honors Scholars Archive 2018-2019
- CAS Honors Courses Archive 2018-2019

CAS Honors Scholars Archive 2018-2019

CAS Honors Scholars Requirements

To achieve graduation as a CAS Honors Scholar, a student must maintain a 3.5 GPA and must complete the following requirements, at least one each semester:

2. Complete 4 general education (or major) requirements (3-4 credits each) at the honors level. One of these must be a first-year honors course taken in the first semester (Honors Seminar for Freshmen, Honors Creativity and Innovation, or Honors Advanced First-Year Writing).
3. Archive reflections on CAS Honors Blackboard, one in each of the first six semesters. Guidelines for writing reflections are available on the Honors Blackboard site. The first reflection will be written in Honors CAS H101; others should be archived in Blackboard within two weeks following the last day of the semester.
4. Earn 6 or more Honors Option Points (HOPs) with at least one point in 3 of 4 categories: 1) additional academic work, 2) experiential engagement, 3) research/creativity, or 4) community contribution. For guidelines for HOP options, see the CAS Honors Blackboard site. Internships counted toward major requirements may not 'double-count' toward honors requirements. To earn Honors Option Points, sign up for the relevant class BEFORE the Last Day to Add/Register for Classes of the semester. Follow the syllabus for that class.
5. Complete a senior honors experience: either satisfy the requirements for “Honors in the Major” (see major-specific information about senior year/departmental honors requirements) or satisfy the requirements for an Honors Portfolio. Sign up for relevant classes in the major or for CAS-H520 – Senior Honors Portfolio. Portfolio content submitted to satisfy the honors requirement may not overlap...
with portfolio content submitted to satisfy major requirements. Research or creative projects completed to satisfy Senior Year/Departmental Honors in the Major must be presented at the Suffolk Honors Symposium (Reading Day); portfolios must be published on the web.

**Maintaining Eligibility in the Honors Program**

To remain in good standing as an Honors Scholar, a student must maintain a minimum cumulative grade point average (GPA) of 3.5 GPA and must have no grades of D, F, or I. Students must also demonstrate progress to completion of honors requirements, archiving reflections on time and on average completing at least one 3-4 credit honors-level course or two HOPs per semester. Finally honors students must be in good standing with Suffolk University and have no disciplinary actions with the Dean of Students’ Office. To maintain good standing, students must also be in compliance with the Academic Misconduct Policy.

**CAS Honors Courses Archive 2018-2019**

**CAS Honors Scholars**

- **CAS-H101 Honors Strategies of Success**

  **Prerequisites:**
  CAS Honors students only. SBS students by special permission.

  **Credits:**
  1.00

  **Description:**
  CAS H101 is a one-credit course with no prerequisites that meets once a week and is designed to help you have a successful transition to Suffolk University and our unique urban community. This course will also give you opportunities to connect with the honors community, both on and off-campus. CAS H101 is also designed to introduce you to the principles and concepts of Oral Communication and Presentation Skills. Through interactive exercises and engaging assignments, you will explore the campus environment and learn about strategies for success as an honors student. You will improve your self-presentation and oral communications skills by presenting speeches and experiencing poster presentations.
- CAS-H211 Honors Experiential Engagement I
  **Prerequisites:**
  CAS honors students only

  **Credits:**
  0.00

  **Description:**
  To engage with the world beyond the Suffolk campus, students take on service or experiential roles in a local, regional, or global setting. Students archive and reflect upon their experience. Completion of this course is equivalent to one Honors Option Point.

- CAS-H212 Honors Experiential Engagement II
  **Prerequisites:**
  CAS honors students only

  **Credits:**
  0.00

  **Description:**
  To engage with the world beyond the Suffolk campus, students take on service or experiential roles in a local, regional, or global setting. Students archive and reflect upon their experience. Completion of this course is equivalent to two Honors Option Point.

- CAS-H221 Honors Research / Creativity I
  **Prerequisites:**
  CAS honors students only

  **Credits:**
  0.00

  **Description:**
Students complete or contribute to a research or creative project. Projects may involve independent work or collaboration with peers or faculty advisors. Students archive and reflect upon their experience and share results with the Suffolk community. Completion of this course is equivalent to one Honors Option Point.

— CAS-H222 Honors Research / Creativity II

**Prerequisites:**
CAS honors students only

**Credits:**
0.00

**Description:**
Students complete or contribute to a research or creative project. Projects may involve independent work or collaboration with peers or faculty advisors. Students archive and reflect upon their experience and share results with the Suffolk community. Completion of this course is equivalent to two Honors Option Point.

— CAS-H231 Honors Community Contribution I

**Prerequisites:**
CAS honors students only

**Credits:**
0.00

**Description:**
Students contribute to the university by mentoring, leading, or serving the Suffolk community. Contributions may include teaching or tutoring, administering student organizations, or promoting arts and culture. Students will archive and reflect on their experience. Completion of this course is equivalent to one Honors Option Point.

— CAS-H232 Honors Community Contribution II

**Prerequisites:**
CAS honors students only
**Credits:**
0.00

**Description:**
Students contribute to the university by mentoring, leading, or serving the Suffolk community. Contributions may include teaching or tutoring, administering student organizations, or promoting arts and culture. Students will archive and reflect on their experience. Completion of this course is equivalent to two Honors Option Point.

---

**CAS-H292 Honors Contract**

**Prerequisites:**
CAS honors students only.

**Credits:**
0.00

**Description:**
Students partner with a faculty mentor to make any course into an honors-level course. Education is enriched by enhanced or additional projects, activities, or assignments agreed upon by professor and student. Students will present their contracted honors work to the Suffolk community.

---

**CAS-H510 Honors CSDM Independent Study**

**Prerequisites:**
CAS Honors students only; instructor approval required.

**Credits:**
1.00-4.00

**Description:**
By special arrangement, a student who has declared the CAS Self-Designed Major may pursue an independent course of study and/or research or creative project under the supervision of a faculty member. The course should adhere to the guidelines for honors courses established by the honors program. Credits
completed in CAS 510 count toward the total of 8 independent study credits permitted for the CAS Self-Designed Major. Consent of major advisor and instructor required. Offered every semester.

— **CAS-H520 Honors Senior Portfolio**

**Prerequisites:**
CAS honors students only

**Credits:**
0.00

**Description:**
In this option for an honors senior capstone experience, the student creates and publishes a portfolio of academic and co-curricular development and achievements. Students will draw upon past archives and reflections to explore how their experiences have helped them to meet honors learning goals.

— **CAS-H525 Honors Start Up Institute**

**Prerequisites:**
Application must be made to the CAS Honors Program.

**Credits:**
12.00

**Description:**
Immerse yourself in an intensive educational experience at the Start Up Institute, a Suffolk University educational partner in downtown Boston. Students in their final year of undergraduate study enhance their professional development and networking strategies as well as acquire skills and knowledge in one of four programs: coding, web design, digital marketing, or sales. Application must be made to the CAS Honors Program.

— **CAS-H555 Honors CSDM Interdisciplinary Capstone**

**Prerequisites:**
CAS Honors students only; department approval required.
Credits:
1.00 - 4.00

Description:
The senior honors experience in the CAS Self-Designed Major is an individual program of interdisciplinary research and/or creative work on an approved topic, under the supervision of a faculty member. Required elements of the capstone include development of a final project, report, or thesis, as well as public presentation to the Suffolk community at an honors event. The plan for the honors capstone must be approved by the honors program in advance of the semester in which the work will be completed. Must be taken for at least 3 credits and may be taken in the fall and/or spring of the senior year for a total of no more than 8 credits. Credits completed in CAS H555 count toward the total of 8 independent study credits permitted for the CAS Self-Designed Major.
CAS SELF DESIGNED MAJOR (ARCHIVE 2018-2019)

- CAS Self-Designed Major Courses Archive 2018-2019
- CAS Self-Designed Courses Archive 2018-2019

CAS Self-Designed Major Courses Archive 2018-2019

CAS Self-Designed Major

A CAS Self-Designed Major must satisfy the following criteria:

1. The major must be at least 40 credits
2. The major must draw upon courses from at least two departments or distinct programs (as defined by the Double Major policy)
3. The major must be sufficiently unique at Suffolk: it should not duplicate or approximate an experience that may be created through a double-major and/or addition of one or more minors.
4. The major must include any requirements common to all CAS majors
5. The major must demonstrate sufficient coursework at the foundational level
6. The major must demonstrate sufficient coursework at the advanced level
7. The major must include coursework that imparts methodological and theoretical underpinning appropriate to the major
8. The major may include up to 4 credits of an internship course
9. The major may include up to 8 credits of independent study
10. The major must include completion of an interdisciplinary senior capstone project

Residency Requirement Policy: In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

## CAS-513 CSDM Internship

**Prerequisites:**
Instructor approval required.

**Credits:**
1.00-4.00

**Description:**
Individualized guidance in a professional development experience that relates to the student’s self-designed major. Applications to participate must be approved by the instructor and major advisor. It is the responsibility of students to arrange internship placements in advance of the start of the course. Consent of major advisor and instructor required. Offered every semester.

## CAS-555 CSDM Interdisciplinary Capstone

**Prerequisites:**
Department approval required.

**Credits:**
1.00-4.00

**Description:**
This course explores topics that require students to synthesize and analyze their accumulated interdisciplinary learning in the CAS Self-Designed Major. The course is designed as an individualized program of study under the supervision of a faculty member and culminates in a capstone interdisciplinary project. May be taken in the fall and/or spring of the senior year for a total of no more than 8 credits. Credits completed in CAS 555 count toward the total of 8 independent study credits permitted for the CAS Self-Designed Major.

## CAS-H555 Honors CSDM Interdisciplinary Capstone

**Prerequisites:**
CAS Honors students only; department approval required.

**Credits:**
1.00-4.00
Description:
The senior honors experience in the CAS Self-Designed Major is an individual program of interdisciplinary research and/or creative work on an approved topic, under the supervision of a faculty member. Required elements of the capstone include development of a final project, report, or thesis, as well as public presentation to the Suffolk community at an honors event. The plan for the honors capstone must be approved by the honors program in advance of the semester in which the work will be completed. Must be taken for at least 3 credits and may be taken in the fall and/or spring of the senior year for a total of no more than 8 credits. Credits completed in CAS H555 count toward the total of 8 independent study credits permitted for the CAS Self-Designed Major.
ARTS ADMINISTRATION (ARCHIVE 2018-2019)

As a complement to their undergraduate major, students who complete a minor in Arts Administration will have basic knowledge in the following areas:

- Arts administration, including the managerial, financial, and legal needs of arts organizations
- Marketing strategies and outreach programming for the arts
- Resource development for the arts, with an emphasis on grant and proposal writing

**Arts Administration Minor Archive 2018-2019**

**Minor Requirements:** 5 courses, 17-19 credits

**Core Requirements (3 courses, 11 credits)**

- **ADPR-488 Grant Writing**
  - Credits: 4.00

  **Description:**
  Hands-on course that explores the process of writing and submitting grants to foundations, associations, the government, and other grantors on behalf of nonprofit organizations. Students learn how to identify grant resources through research, compile an effective submission, and write supporting material such as cover letters and appendices. Also covers how grants are reviewed and tips for successful grant submissions.

− **PAD-325 Nonprofit Management**

**Prerequisites:**
Junior standing

**Credits:**
3.00

**Description:**
The primary focus will be on understanding the operational and strategic leadership aspects of managing mission driven, public service organizations. Specific emphasis will be placed on nonprofit corporations, including coursework that explores the legal, structural, and operational issues that are particular to such organizations.

− **THETR-281 Arts Administration I**

**Credits:**
4.00

**Description:**
The expansive world of arts administration provides a wealth of rewarding career opportunities. This course will provide a fundamental overview of the managing, marketing, fundraising, and financial management functions of the performing and visual arts organizations. Using Suffolk’s Modern Theatre as a laboratory, as well as site visits to some of Boston’s greatest arts and culture institutions, we will investigate real world successes and challenges and discover what special talents each individual student can bring to the management mix. This course is a core requirement for Suffolk’s new interdisciplinary Arts Administration minor.

**Electives (2 courses, 6-8 credits)**

Choose two of the following:

**Business**
- **ACCT-201 Accounting for Decision Making I**

  **Prerequisites:**
  MATH-128 or higher and WRI-102 or WRI-H103 or SBS-220

  **Credits:**
  3.00

  **Description:**
  Introduces students to the accounting cycle, the financial statements, and the theory underlying accounting as information. Provides users of accounting information with a basic understanding of how to appraise and manage a business. Addresses current accounting topics, including relevant ethical and international issues found in the financial press.

- **BLE-214 Principles of Business Law**

  **Credits:**
  3.00

  **Description:**
  Introduces the field of business law. Provides an overview of the organization and operation of the American legal system, court system and legal procedure. Examines selected business law topics such as contracts, torts, criminal law, agency, and business organizations. Attention is given to the ways in which business law manifests important social and ethical precepts.

- **ENT-101 Business Foundations**

  **Credits:**
  3.00

  **Description:**
  This course introduces students to foundational concepts in business, including functional areas, the life cycle, competition, stakeholders and ethical considerations. Students develop critical thinking by learning and using a problem solving process through a business situation analysis model to analyze various situations that confront managers and founders of small, medium, and large organizations. Students will also develop tools for analysis, allowing them to critically view business in a new and thoughtful way. The class culminates with student- teams...
presenting a detailed analysis and recommendations to a panel of executives and persuading them that the recommended strategy is not only feasible, but also practical for the stakeholders involved.

- **ENT-320 Managing the Small Business**
  **Prerequisites:**
  ENT-101 and Junior Standing

  **Credits:**
  3.00

  **Description:**
  How do you manage the day-to-day challenges of starting a new venture or working on a small business? This course is designed around problem-solving techniques that help you research the facts of a given situation, identify the problem, develop alternative solutions and defending the best solution. This course utilizes case analysis, role-plays, simulations, and other experiential lessons to help provide you with the knowledge and skills necessary to build and lead a new or innovative organization.

- **MGT-401 Negotiations**
  **Prerequisites:**
  MGT 217 (formerly MGT 317); Junior standing

  **Credits:**
  3.00

  **Description:**
  This course is premised on the fact that whereas a manager needs analytical skills to discover optimal solutions to business problems, a broad array of negotiation skills is needed to implement these solutions. This experiential course is designed to improve your skills in all phases of negotiation: understanding prescriptive and descriptive negotiation theory as it applies to dyadic and multiparty negotiations, to buyer-seller transactions and the resolution of disputes, to the development of negotiation strategy, and to the management of integrative and distributive aspects of the negotiation process. The course is based on a series of simulated negotiations in a variety of contexts including one-on-one, multi-party, cross-
cultural, third-party and team negotiations. Please note that given the experiential nature of the course, attendance is mandatory and will be strictly enforced beginning from the first class session.

— **MKT-210 Principles of Marketing**

**Prerequisites:**
SBS 200 (concurrently or previously). WRI 100, 100+, 101, or H103. ENT-101 or ENT-H101.

**Credits:**
3.00

**Description:**
As part of the core curriculum for the BSBA, this course provides a comprehensive, innovative, managerial, and practical introduction to marketing. Students will learn and apply basic concepts and practices of modern marketing as used in a wide variety of settings. Technological advances, rapid globalization, economic shifts and cultural and environmental developments are causing profound changes in the marketplace. As the marketplace changes, so must the marketers who serve it. These new developments signify a brand new world of opportunities for forward thinking marketers. In response to these new developments, the focus of this course is on four major themes that go to the heart of modern marketing theory and practice: 1. Building and managing profitable customer relationships; 2. Building and managing strong brands; 3. Harnessing new marketing technologies in this digital age; and 4. Marketing in a socially responsible way around the globe.

— **MKT-444 Social Media Marketing**

**Prerequisites:**
MKT 210 or MKT-H210

**Credits:**
3.00

**Description:**
Social media has altered the landscape of business, communications, marketing, and society as a whole. While some social media like Wikipedia and Facebook have become part of the fabric of many consumers' lives, new media like Snapchat and
Tumblr are emerging. This constantly evolving landscape offers businesses innovative ways for generating awareness, demand and revenue. In this course students will take away a social media vocabulary, a set of social media skills and tools, and analytical frameworks for analyzing effective social media business practices. Naturally, student projects, assignments, and other activities will use social media tools.

– MKT-477 eMarketing

**Prerequisites:**
MKT 210 or MKT-H210

**Credits:**
3.00

**Description:**
This course explores how we can use the principles of web marketing as effective marketing tools. The course will have the following learning components: lectures, guest lectures, web site analyses, and student project presentations.

Note: BSBA students cannot count the following BSBA core requirements (ACCT-201, BLE-214, or ENT-101) as Arts Administration minor electives and should instead choose other courses from the full list of options provided.

**Advertising, Public Relations, & Social Media**

– ADPR-103 Presentations Skills

**Credits:**
4.00

**Description:**
The development and delivery of oral presentations. Students acquire skills in oral and physical delivery, organization, persuasion, critical thinking, and use of support media.
ADPR-257 Advertising
Credits: 4.00

Description:
A survey course that introduces students to advertising concepts and practices from the perspective of agencies, clients, the media, and consumers. Students learn to think critically about advertising messages and learn practical techniques for developing effective advertising in various media.

ADPR-289 Social Media
Credits: 4.00

Description:
Social media sites such as Facebook, Instagram, Snapchat and Twitter are examined from a cultural and critical perspective. Students use of social media for community formation, social presence, identity building, and social activism. The roles of advertising, public relations, and branding are examined.

ADPR-378 Event Planning and Promotion
Prerequisites:
CJN-2277(formerly CJN-277)

Credits: 4.00

Description:
Examines how events are built, promoted, managed, and assessed, with an emphasis on conventions, trade shows, and nonprofit events. Issues analyzed include facilities planning and contracts, legal issues, volunteer management, budgeting, marketing, and planner/staff communication.

ADPR-2277 Public Relations I: Principles
Credits: 4.00
**Description:**
Effective public relations involve an understanding of the history, theory, and practice of public relations including public relations concepts, the role of the practitioner, and the foundations of public relations. This course seeks to provide that foundation as an introduction to the field of public relations. Issues surrounding the history, legality, process, and principles of public relations are explored.

---

### Theatre

- **THETR-100 Theatre Practicum: Performance**
  **Prerequisites:**
  This is a no credit course.

  **Credits:**
  0.00

  **Description:**
  A non-credit course to satisfy the Theatre practicum requirement for theatre majors and minors. Students should register for this course when participating in Theatre Department performance activities such as acting, directing, playwriting, dramaturgy, choreography, or stage management may. May be taken more than once.

- **THETR-102 Theatre Practicum: Production**
  **Prerequisites:**
  This is a no credit course.

  **Credits:**
  0.00

  **Description:**
A non-credit course to satisfy the Theatre practicum requirement for theatre majors and minors. Students should register for this course when participating in Theatre Department production activities such as design or assistant design, load-in or run crews, board operators, carpenters, electricians, stitchers and painters. May be taken more than once.

- **THETR-129 Acting**  
  **Credits:**  
  4.00

**Description:**  
This introduction to acting prepares students for work in production and develops skills in all forms of communication. The first part of the course uses improvisational exercises based on the Stanislavski method to teach fundamental acting techniques. The second half of the course applies those techniques to scene work from major 20th century plays. This course is a core requirement for all Theatre Majors.

- **THETR-151 Introduction to Design**  
  **Credits:**  
  4.00

**Description:**  
This rigorous class will give students the fundamental concepts, vocabulary and skills used to design for the stage such as: color, line, composition, research and script analysis. The class has a written component and is intended to prepare students to design workshop productions in the Studio Theatre. Students will be expected to complete a minimum of ten hours of production work for Theatre Department productions.

- **THETR-187 Intro to Stage Management**  
  **Credits:**  
  4.00

**Description:**
This course will teach both the methods and principles behind stage management demonstrating how to support a production while facilitating the work of directors, designers, and actors. In addition to teaching the specific technical skills necessary to each part of the production process, this course will also address the more subtle intellectual and managerial skills that make stage management an art. Satisfies a core requirement for Theatre majors.

---

**THETR-375 Directing I**

**Credits:**

4.00

**Description:**

This conservatory-style course provides students with fundamental directing skills through lectures, readings, and weekly projects that explore composition, staging, text analysis, and directorial communication skills. Students in this course become eligible to propose their own projects to the Theatre Department for production consideration. Directing students are also encouraged to stage manage and assistant direct faculty productions both in and outside of the Department.

---

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

**Minor Programs Policy:** A student declaring a minor may use no more than two courses from a major to fulfill the requirements for the minor. No more than one course from one minor may count toward the fulfillment of a second minor. Students may not minor in a subject in which they are also completing a major. For more information, see the Minor Programs section of the CAS Degree Requirements page.

---

**Art & Design/Art History**

---

**ADF-S101 Foundation Drawing I**

**Prerequisites:**

Non-majors interested in taking art and design courses for elective credit should refer to offerings under the ART course listings
**Credits:**
3.00

**Description:**
Observational drawing is a fundamental way of understanding and communicating visual experience. This course stresses the development and mastery of traditional drawing skills, concepts, and vocabulary, and employs a variety of techniques and materials. Fundamental principles are introduced in structured lessons and exercises, which are supplemented by related outside assignments. Subject matter may include still life, portraiture, and the clothed and unclothed human figure.

- **ADF-S166 2D/Color**

**Prerequisites:**
Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00

**Description:**
The study of color and design is supportive of every studio discipline and is vital to the understanding of all visual media. This course emphasizes the basic concepts and practices of two-dimensional design and color theory. Students employ an intensive, hands-on approach as they explore and master the elements of design (including line, shape, and value) and the three fundamental properties of color (hue, value, and strength). These skills are used in the construction of formally cohesive compositions, the development of arresting images, and the communication of visual ideas.

- **ADF-S171 CI: Integrated Studio 1**

**Prerequisites:**
Non-majors interesting in taking art and design courses for elective credit should refer to offerings under the ART course listings.

**Credits:**
3.00
**Description:**
This cross-disciplinary course will integrate the ideas and practices of two-dimensional design, color and drawing emphasis will be placed on understanding the creative process, exploring concepts and developing research skills. Students will undertake individual and collaborative projects in three spaces; the studio classroom, the digital world and the city at large.

</tr>
</thead>
<tbody>
<tr>
<td>ARH-316 Contemporary Art</td>
<td>4.00</td>
<td>Explores European and American art since WWII, including Abstract Expressionism, Colorfield Painting, Pop Art, Minimalism, Neo-Dada, Performance Art, Feminism, Neo-Expressionism and Post-Modernism. Artists include Bacon, Giacometti, Pollock, De Kooning, Frankenthaler, Rothko, Stella, Judd, Calder, David Smith, Serra, Johns, Rauschenberg, Warhol, Lichtenstein, Smithson, Christo, Nevelson, Kosuth, Kruger, Sherman, Basquiat, Kiefer, and Haring.</td>
</tr>
<tr>
<td>ARH-318 Art and Museums Today</td>
<td>4.00</td>
<td>Examines the art world of the past few decades with special attention to the roles and exhibition practices of contemporary art museums and galleries. Considers the major artists and trends in today's art world, the history of museums, and the effect of museums on art produced today. Students will visit local museums, including the Institute of Contemporary Art (ICA) individually and in groups. This course fulfills the ECR requirement.</td>
</tr>
<tr>
<td>ARH-404 Seminar in Art History: Caravaggio</td>
<td></td>
<td>Permission of instructor required</td>
</tr>
</tbody>
</table>

Credits:
Description:
Explores the art of Caravaggio within the historical context of the Early Baroque period in Italy. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.

— ARH-406 Seminar in Art History: Bernini
Prerequisites:
Instructor’s consent required.

Credits:
4.00

Description:
Explores the art of Gian Lorenzo Bernini, arguably the most important and influential figure in the world of 17th-century art. Designed for art history majors & minors, the seminar explores Bernini's career within the context of the religious, political, and artistic upheavals of his time; it also helps students develop research skills and provides a foundation that will be valuable for anyone pursuing a career in the world of art and museums.

— ARH-411 Seminar in Art History: Impressionism
Prerequisites:
Permission of instructor required

Credits:
4.00

Description:
Explores the Impressionist movement of the late nineteenth-century, including Monet, Renoir, and Pissaro, within its historical context. The course emphasizes research skills and the methodology of art history. Designed as a foundation for students intending to pursue a career in the world of art and/or museums.
- ART-S209 Introduction to Drawing and Mixed Media
  **Credits:**
  3.00

  **Description:**
  This course is an introduction to the fundamental principles of drawing using both traditional and experimental techniques. Media includes pencil, charcoal, white chalk, ink and collage. Subject matter includes still-lives, landscapes/cityscapes, portraiture and live clothed models. This course is appropriate for beginners as well as more advanced students. Individual attention is given to students at various levels of ability, allowing students to progress at their own pace.

- ART-S211 Introduction to Painting
  **Credits:**
  3.00

  **Description:**
  This introductory course is designed to encourage students with little or no knowledge of the use of various painting processes. The basic elements of painting are introduced in exercises enhanced by demonstrations. Students work with acrylic paint and various painting mediums. Creative work is encouraged in a relaxed atmosphere where individual attention is given to students at various levels of ability.

**Government and Law**

- GVT-247 Intellectual Property- Authors, Inventors, & Brands
  **Prerequisites:**
  GPA at least 3.3

  **Credits:**
  4.00

  **Description:**
  ...
This friendly, interactive introduction to intellectual property covers the fundamental pillars of copyrights, patents, trademarks, and trade secret, and more far-reaching topics like international and internet intellectual property, and indigenous people and IP. The course is open to all majors, because it is relevant to anyone who deals with creative works, inventions, discoveries, or business. This undergraduate course will be taught at the Suffolk Law School by a member of its faculty.

- **LAWU-221 Law of Contracts**
  
  **Prerequisites:**
  Certificate or Sophomore status, or Instructor’s consent
  
  **Credits:**
  4.00
  
  **Description:**
  The existence and validity of a contract is determined by specific rules. Students will learn about formation through offer and acceptance, contract enforceability, the necessity of consideration, and breach of contract and will draft contract provisions as a paralegal might in a law office. Normally offered each semester. Sophomore status required.

- **LAWU-350 Intellectual Property**
  
  **Prerequisites:**
  Take LAWU-101
  
  **Credits:**
  4.00
  
  **Description:**
  A survey of the law of the protection of ideas, trade secrets, inventions, artistic creations, and reputation. The course will briefly review the bases for patent, trademark, copyright and trade secret protection, the distinction among the various forms of intellectual property, and the statutory and common law methods of enforcing rights.

ASIAN STUDIES (ARCHIVE 2018-2019)

- Asian Studies Major Archive 2018-2019
- Honors Archive 2018-2019
- Asian Studies Minor Archive 2018-2019
- Asian Studies Courses Archive 2018-2019

Asian Studies Major Archive 2018-2019

**Major Requirements: 11-15 courses, 34-54 credits**

**Core Requirements: 3 courses, 6 credits**

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**
  
  **Credits:**
  
  4.00

  **Description:**
  
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **AS-511 Professional Development for Asian Studies**
  
  **Prerequisites:**
  
  Instructor consent required
Credits:
1.00

Description:
Students will reflect on their college career and develop a personal strategy for attaining professional goals. They will understand ethical guidelines and professional conventions by examining the differences between American work culture and Asian work culture; by applying this understanding to a transnational/diverse professional world. Students will understand what the job market and graduate school opportunities are like for Asian Studies graduates.

— CAS-201 College to Career: Explore Your Options And Find Your Path

Prerequisites:
CAS 101. CAS students only. SBS students by special permission. Restricted to the following majors: Art History, Asian Studies, Biology, Economics, English, French, History, Humanities, International Economics, Music History, Philosophy, Physics, Radiation Science, Spanish, and Undeclared. Instructor consent required for all other majors.

Credits:
1.00

Description:
This course engages students in the early stages of career planning. Students will explore their interests, skills, values, and strengths, which will allow them to begin setting appropriate goals for professional development. Once students understand themselves in relation to the world of work, they will learn how to research careers and employment paths that fit with their goals.

Electives (7 courses, 24-28 credits)
Choose seven courses from at least three departments, with no more than 20 credits from any one department. Some Seminar for Freshmen courses may qualify with the approval of the Program Director.

— ARH-203 Arts of Asia
Credits: 4.00

Description:
Surveys painting, sculpture, and architecture in Asia from prehistoric times to the modern era, including the Middle East, India, China, Korea, and Japan. Emphasizes the connection between visual arts, belief systems, and historical contexts with a focus on Hinduism, Buddhism, and Islam as well as secular literature.

AS-220 Chinese Food in America
Credits: 4.00

Description:
There are more Chinese restaurants in the U.S. than MacDonald's, Burger Kings and KFC'S combined. This course examines the unique American phenomenon of Chinese food from a historical and anthropological viewpoint. Students will gain a better appreciation and understanding of the subject through the course and will probably never look at local Chinese takeout the same way afterwards.

AS-510 Independent Study
Credits: 1.00-4.00

Description:
Works directly with a faculty member on an agreed topic related to Asia or an Asian language. Past topics include: intermediate Chinese and Japanese; Asian popular culture.

AS-H555 Senior Honors Thesis
Prerequisites:
Students must be in the CAS Honors Program, have a 3.5 overall grade point average, and a 3.7 grade point average in the major. Registration must be approved by the Asian Studies Director.

Credits:
1.00- 8.00

**Description:**
Students will work with an Asian Studies advisor to undertake a research project that will produce a 25-page paper that is suitable for an undergraduate academic conference in Asian Studies or relevant disciplines. Students must be in the CAS Honors Program, have a 3.5 overall grade point average, and a 3.7 grade point average in the major. Registration must be approved by the Asian Studies Director. May be taken in the fall and/or spring in the senior year.

---

**CHIN-211 Survey of Chinese Literature and Culture I**

**Credits:**
3.00

**Description:**
This is an introductory and interdisciplinary course on Chinese civilization and traditional Chinese literature. It will provide the student with a brief introduction to the cultural legacy and literature of China from the archaeological origins of Chinese civilization to the present time. The diverse origins of China’s civilization are stressed as topics in political, social, and economic history are explored, with a focus on developments in language, literature, and art. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for themes treated in Modern China.

---

**CJN-281 Asian Popular Culture**

**Credits:**
4.00

**Description:**
Students critically analyze Asian popular culture since the 1980s using a cultural ethnographic approach. Students apply the lenses of gender, identity, globalization, and business strategies to examine pop phenomena such as Korean Wave, Cool Japan, and Cantonese popular music.

---

**CJN-293 Hong Kong Cinema**

**Credits:**
4.00

**Description:**
By examining the film texts of Hong Kong auteurs such as John Woo, Wong Kar-wai, Tsui Hark, Andrew Lau, and Alan Mak, the course examines issues such as film genres, colonization/decolonization, transnational political economy, the Greater Chinese media market, and the diaspora.

---

**EC-410 Urban Economics: Asian Megacities in Comparative Perspective**

**Prerequisites:**
Take EC-101

**Credits:**
4.00

**Description:**
More than half of the world population lives in urban areas. This course sets out to explain the existence, growth, geographic patterns, and impact of cities, and the effects of public policy on urban form, structure, and activity. It addresses the urban issues of transportation, congestion, housing, crime, poverty and inequality, governance, and the environment, and asks how planning and policy can tackle these. The context of these discussions is the megacities of Asia: 24 of the world's 37 megacities (those with ten million or more inhabitants) are in Asia, where they are home to almost 500 million people. The choices made by these cities will be considered in comparative perspective, including with Boston, New York, Paris, and London.

---

**ENG-362 Asian-American Literature**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

---

- **GVT-389 Politics of China**
  
  **Credits:**
  
  4.00

  **Description:**
  
  Introduces China studies as a subfield of comparative politics. Covers topics such as history, political structure, communist revolution, political and economic development, authoritarian resilience, current issues, and foreign policy. Compares China with other countries in and outside of Asia.

---

- **GVT-411 Politics of North and Southeast Asia**
  
  **Prerequisites:**
  
  Junior Status required

  **Credits:**
  
  4.00

  **Description:**
  
  Examines cultural and historic backgrounds, political systems, political and economic development, and international relations of countries in North and South East Asia. Provides with the understanding of the main regional trends and offers case studies of some of the political systems in the region. Applies the concepts and theories learned in the previous international relations, comparative politics courses and other social science courses. * I do not include specific country names to make the description flexible for changes. In my class, I cover countries such as China, North and South Korea, Japan, Singapore, Malaysia, Indonesia, Thailand, Vietnam, Cambodia, Laos, Philippines, and Burma.

---

- **HST-103 Cultures and Social Transformations in Asia**
  
  **Credits:**
  
  4.00
Description:
Presenting the major trends relevant to social, cultural, and economic transformations that can be seen in Asia today. Especially, students will explore the following trends: the Diaspora of the Chinese and Indian People; the hold of Traditional Religious Beliefs in a Modernizing Asia such as the influences of Buddhism and Islam; the preservation of Martial Values and in Militarism in Asia; Issues related to Gender and Sexuality; Pop Culture among young people in Asia.

- HST-115 Introduction to Chinese History and Culture
Credits:
4.00

Description:
Discusses Chinese civilization from its origins to its recent rise as a world power. Spark students’ interest in China and enable them to relate Chinese history and society to their lives and careers.

- HST-250 A History of Martial Arts in Movies
Credits:
4.00

Description:
Outlines the history of Chinese martial arts in five movies, highlighting Chinese views of violence, personal loyalty, government, and justice.

- HST-251 Modern East Asia
Credits:
4.00

Description:
China, Japan, and Korea - East Asia’s critical players - share many historical influences, but each has a distinct culture, and they competed with each other for much of the twentieth century, proud of their achievements but feeling threatened by their neighbors. Lectures interspersed with movies and documentaries to show how East Asia has developed in the past one-hundred-plus years.
- **HST-252 The Rise of China: Through Films, Media, and History**
  **Credits:** 4.00
  **Description:**
  Discusses the rise of China as the world’s largest economy and its impact on our life through films, media, and history.

- **HST-256 Exploring Asia**
  **Credits:** 4.00
  **Description:**
  In this course each student will select a topic about Asia that they wish to study. Virtually any topic, to be approved by the professor, is acceptable. The goal will be to write a five to seven page paper about that topic by the end of the course. As a class, we will work together through each step of the process of defining a topic, gathering materials about it, and organizing and reporting the final paper.

- **HST-260 Asian Peoples and Cultures**
  **Credits:** 4.00
  **Description:**
  Introduces the peoples of Asia and the cultures they have created. Particular attention is paid to the lives of the common people in both historical and contemporary times. By understanding the richness and complexities of daily life in Asia, we will understand the continuities and discontinuities brought on by social, cultural, and economic changes. We will gain an appreciation of our fellow human beings in Asia.

- **HST-348 Samurai: History, Literature & Film**
  **Credits:** 4.00
  **Description:**
Explores the history of samurai and its cultural meaning for Japanese society. It examines not only how the samurai class developed into a major political force, but also how it has been represented by literatures and films in different eras.

- **PHIL-261 Eastern Philosophy**  
  **Credits:** 4.00  
  **Description:** The exposition and critical evaluation of Hinduism, Buddhism, Confucianism, Taoism, and Islam. Special attention is given to foundation principles as well as to the similarities and differences of each of these philosophies to basic ideas in Western philosophy. 1 term - 4 credits. Normally offered alternate years. C b

- **PHIL-262 Buddhism**  
  **Credits:** 4.00  
  **Description:** An historical survey of Buddhist philosophy. We will explore Buddhist origins, central teachings, devotional and meditational practices, ritual and institutions as developed from classical to modern times. Special attention given to the philosophical diversity of the Buddhist world view. 1 term - 4 credits. Normally offered alternate years. C b

- **PHIL-267 Chinese Philosophy**  
  **Credits:** 4.00  
  **Description:** A survey of the main developments in Chinese Philosophy. The course begins with the early dynastic concept of humanism and then turns to Confucius and Mencius. Having developed the central Confucian doctrines, students next examine the Taoist response to Confucianism in the writings of Lao Tzu and Chuang Tzu. The course
then considers Zen Buddhism, which is called Ch'an Buddhism in China, where it originated. In particular, students study the concept of sudden enlightenment before turning to the Neo-Confucian scholars.

- **PSYCH-247 Asian Perspectives on Health and Work**

  **Credits:**
  4.00

  **Description:**
  Examines theoretical and empirical approaches that provide insight into Asian viewpoints on socialization practices, family systems, health/well-being, cultural traditions/values, and spiritual philosophy/literature. Explores the diversity among Asian cultures in terms of language, history, religion/spiritual faith, and healthcare practices, all of which play a significant role in shaping the psychological characteristics, interpersonal relationships, and work dynamics of Asians and Asian immigrants.

- **RS-112 Introduction to World Religions: Eastern Traditions**

  **Credits:**
  4.00

  **Description:**
  This course will examine a variety of Eastern religions, including Hinduism, Buddhism, Jainism, Confucianism, Taoism, and Shintoism. Possible connections to be explored will be the impact of these traditions on others, such as Pacific Islands and African religion, as well as the growing place of Eastern religion in the West. This course will explore the history and structure of each tradition, while attempting to recognize the similarities and the differences among them. Attention will be given to the reading of original texts when available. Requiring students to observe religious ceremonies will enhance practical understanding of many of the above traditions. Normally offered every year. Cultural Diversity B

- **SF-190 Asia in America Fiction and Fact**

  **Credits:**
  4.00
Description:
With a focus on some selected ethnic groups from Asia, "Asia in America" studies the history and current status of Asian Americans in Boston and other parts of the country. We will examine the major reasons why these immigrants chose to leave their home country as well as their expectations and experiences here in America. We will also discuss the issues Asian immigrants have faced in this adopted "home" as well as the connections and conflicts among different ethnic groups or even within the same ethnic group due to political and socio-economic reasons. The course will include some level of community engagement, through Chinatown tour and service, which may enable us to have a direct contact with the Asian American population and reflect on what is being discussed in class. Through this course, we hope to gain a better understanding of the racial and cultural history of the country and arrive at a deep appreciation of the dynamics of cultural interactions in the twenty-first century. The course fulfills the SCGP requirement.

SF-1145 Emergence of Southeast Asia

Credits: 4.00

Description:
Explores the eleven countries and 600 million people of Southeast Asia starting with foundations- geography and environment- and then looking at the human imprint, in the form of the history, religions, and cultures of the region. An examination of contemporary issues related to demography, politics, and (especially) economics.

Students who choose the following courses and complete some specific reading and writing assignments may count them toward the Asian Studies major requirements. However, students need to consult the instructor and get the approval of the Asian Studies program director no later than the first week of the class.

CJN-216 Intercultural Communication

Credits: 4.00

Description:
An examination of communication variations and cultural viewpoints and their impact on cross-cultural communication. A special emphasis is placed on rituals and message patterns in non-Western cultures.

- **CJN-385 Globalization of Media and Telecommunications**
  
  **Credits:**
  4.00

  **Description:**
  A critique of the circulation of media goods and ideologies from both a cultural and political/economic perspective. Topics include global Hollywood, the images of Muslim women in transnational media, the information society, and global social movements.

- **EC-141 Development Economics**
  
  **Credits:**
  4.00

  **Description:**
  Why do so many countries remain so poor? Why have some (e.g. the Asian "tigers") grown so rapidly? Why have most of the countries of Eastern Europe and the Former Soviet Union been slow to ignite economic growth? These questions are addressed by looking at domestic factors (government policies, resource endowments) as well as the international environment (mobile investors, international financial institutions). Asks what economic choices these countries face now. Normally offered yearly. Cultural Diversity B

- **EC-151 Economic & Human Geography**
  
  **Credits:**
  4.00

  **Description:**
  The study of how economic and human activity is distributed across space, the reasons for these spatial distributions, and the processes that change the spatial organization of economic activity over time. Topics include: maps, map projections, and geographic information systems; population geography; the organization and
location of cities, towns and villages; transportation and communication policy; industrial location; the geography of world trade; and geographic features of economic development. The course takes a global perspective, and draws on cases and examples from all over the world. Cultural Diversity B

- **EC-430 International Trade Theory & Policy**

  **Prerequisites:**
  EC 101 and EC 102

  **Credits:**
  4.00

  **Description:**
  This course examines theories of international trade. The policy implications of each theory are explored and the effect of trade on the welfare of the nation is examined. Also the development of trade blocs and the the political economy of trade are studied. Normally offered every year.

- **EDUC-315 Strategies for Working With English Learners**

  **Credits:**
  4.00

  **Description:**
  This course examines the specific needs and challenges of the various language and cultural groups in schools. Topics include: theories of 1st and 2nd language acquisition, strategies for teaching academic content, modifying instruction in the mainstream classroom, creating classroom cultures that invite all students into learning, the role of advocacy and professional collaboration in ESL, and analysis of policies related to assessment and placement of English Language Learners.

- **EDUC-316 TESOL Practice**

  **Prerequisites:**
  Take EDUC-315

  **Credits:**
  4.00
Description:
Students will have opportunities to put the theories and techniques learned in EDUC 315- Strategies for Working with English Learners into practice. Students will be placed in various Suffolk University sites or classrooms where they will work to meet the specific needs and challenges of educating various language and cultural groups. Students will be required to spend 30 hours working in their placements. Students will attend a weekly seminar where connections between theory and practice are explored, experiences are shared, and Teaching & Service Portfolios will be created.

— HST-150 Empires & Globalization in World History II
Credits: 4.00

Description:
This is the second of the two-course series of Empires and Globalization in World History. Course discusses the origins and development of globalization and capitalism from the perspective of economic history. Major issues include state-making, wars, and the rivalry among early modern empires, economic development, the Industrial Revolution and the formation of the global trade system. The specific topics may change every year due to new academic developments and publications.

— SOC-228 Cultural, Global and Social Perspectives
Credits: 4.00

Description:
Enables students to examine, as well as develop an awareness and appreciation of, diversity within today's society. Providing an overview of the major racial, ethnic, and cultural groups in the U.S., the focus is on the ways in which cultural awareness enhances professional helping relationships and improves the operation of human services systems.

— SOC-329 Sociology of Globalization
Prerequisites:
Prerequisite: SOC 113 or SOC 116.
<table>

<tbody>
<tr>
<td>Description:</td>
<td>Globalization is shrinking the world. How and why did this happen? This course will explore global change and the global processes which effect key social institutions: culture, the economy and politics. Students will study the processes of globalization and its impact on our lives and people around the globe.</td>
</tr>
</tbody>
</table>

- **SOC-357 Global Health and Healing**
  | Credits:       | 4.00 |
  | Description:  | An examination of how different cultures understand health and illness. Healing approaches from Asia, Africa and the Americas will be explored. |

- **WGS-325 Global Women’s Fiction**
  | Credits:       | 4.00 |
  | Description:  | Explores of various cultural worldviews in order to reveal and assess the voices of women from around the world as they respond to important global issues such as sexual violence and gendered oppression. Topics include: national citizenship, sexual politics, legal discourse, aesthetic representation, literary movements, genre, constructions of femininity, sexual identities, and representations of gender in relation to race and class and international cultures, and the relationship of self-image to the body politic. |

**Language Requirement (0-4 courses, 0-16 credits)**

To qualify for the major, students must demonstrate one of the following:
1. Proficiency in one Asian language at the advanced-intermediate level. This can be fulfilled either:
   a. By successful completion of an Intermediate Level II Asian language course through study abroad or outside courses with an average grade of “B”
   b. Or by passing the same level language test offered by the World Languages & Cultural Studies Department.

2. Basic knowledge in two Asian languages at the elementary level. This can be fulfilled by successful completion of two Basic Level I Asian language courses with an average grade of “B” or by passing the same level language test offered by the World Languages & Cultural Studies Department.

**Study Abroad or an Internship (1 course, 4 credits)**

Students must complete either option A or B:

A. A Semester, Summer or Short-Term Study Abroad in Asia (which must bear at least 4 credits)

B. AS-500 Asian Studies Internship

<table>
<thead>
<tr>
<th>AS-500 Asian Studies Internship</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Credits:</strong></td>
</tr>
<tr>
<td>4.00</td>
</tr>
</tbody>
</table>

**Description:**
Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)

Note: AS-500 may not double count to fulfill major course requirements if taken as a substitute for study abroad.

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

Asian Studies Minor Archive 2018-2019

Minor Requirements: 5 courses, 17-20 credits

The minor requires a minimum of five courses (at least 17 credits) from at least two departments, up to two of which may consist of Asian Language courses. For the minor,
proficiency in an Asian language does not allow any reduction in the total number of courses.

**Language Course Options:**

- **CHIN-101 Elementary Chinese I**
  **Credits:**
  4.00

  **Description:**
  Introduces Modern Standard Chinese (Mandarin) with an emphasis on developing conversational skills by using authentic materials such as video, audio, and various print media that teach fundamental grammatical patterns and vocabulary in functional contexts. Basic reading and writing (in Simplified Characters) are also taught.

- **CHIN-102 Elementary Chinese II**
  **Prerequisites:**
  CHIN 101 or Instructor’s consent.
  **Credits:**
  4.00

  **Description:**
  Continues to develop proficiency in reading, writing, and speaking Modern Standard Chinese (Mandarin). Helps to develop listening comprehension skills with the use of authentic materials, such as print media, audio, and video materials. Advanced beginning level of reading and writing of Simplified Chinese characters is taught.

- **JPN-101 Elementary Japanese I**
  **Credits:**
  4.00

  **Description:**
  For students with no previous knowledge. An introduction to features of spoken and written Japanese. Stresses grammar, oral performance and simple characters.
– **JPN-102 Elementary Japanese II**  
**Prerequisites:**  
JPN-101 or Instructor's consent  

**Credits:**  
4.00  

**Description:**  
Continues to develop proficiency in reading, writing, and speaking Japanese. Helps to further develop listening skills with the use of authentic materials, such as print media and audio files.

– **JPN-202 Intermediate Japanese II**  
**Prerequisites:**  
JPN-201 or Instructor’s consent  

**Credits:**  
4.00  

**Description:**  
Continuation of skills developed from JPN 201. One language laboratory session per week.

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

**Minor Programs Policy:** A student declaring a minor may use no more than two courses from a major to fulfill the requirements for the minor. No more than one course from one minor may count toward the fulfillment of a second minor. Students may not minor in a subject in which they are also completing a major. For more information, see the Minor Programs section of the CAS Degree Requirements page.
Choose five of the following:

- **AS-100 Introduction to Asian Studies: Culture, People, Ideas**
  
  **Credits:**
  4.00

  **Description:**
  An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- **AS-220 Chinese Food in America**
  
  **Credits:**
  4.00

  **Description:**
  There are more Chinese restaurants in the U.S. than MacDonald’s, Burger Kings and KFC’S combined. This course examines the unique American phenomenon of Chinese food from a historical and anthropological viewpoint. Students will gain a better appreciation and understanding of the subject through the course and will probably never look at local Chinese takeout the same way afterwards.

- **AS-500 Asian Studies Internship**
  
  **Credits:**
  4.00

  **Description:**
  Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)
- **AS-510 Independent Study**
  **Credits:**
  1.00- 4.00

  **Description:**
  Works directly with a faculty member on an agreed topic related to Asia or an Asian language. Past topics include: intermediate Chinese and Japanese; Asian popular culture.

- **CHIN-211 Survey of Chinese Literature and Culture I**
  **Credits:**
  3.00

  **Description:**
  This is an introductory and interdisciplinary course on Chinese civilization and traditional Chinese literature. It will provide the student with a brief introduction to the cultural legacy and literature of China from the archaeological origins of Chinese civilization to the present time. The diverse origins of China’s civilization are stressed as topics in political, social, and economic history are explored, with a focus on developments in language, literature, and art. This course is a good introduction to further study of Chinese history and culture and, in particular, provides a valuable context for themes treated in Modern China.

- **CJN-281 Asian Popular Culture**
  **Credits:**
  4.00

  **Description:**
  Students critically analyze Asian popular culture since the 1980s using a cultural ethnographic approach. Students apply the lenses of gender, identity, globalization, and business strategies to examine pop phenomena such as Korean Wave, Cool Japan, and Cantonese popular music.

- **CJN-293 Hong Kong Cinema**
  **Credits:**
  4.00
**Description:**
By examining the film texts of Hong Kong auteurs such as John Woo, Wong Kar-wai, Tsui Hark, Andrew Lau, and Alan Mak, the course examines issues such as film genres, colonization/decolonization, transnational political economy, the Greater Chinese media market, and the diaspora.

---

**ENG-362 Asian-American Literature**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
An introduction to selected Asian-American writers with an emphasis on socio-cultural issues, such as race, gender and ethnicity. Authors include Bulosan, Hwang, Jen, Kingston, Lee, Mukherjee, Odada, and Tan.

---

**GVT-389 Politics of China**

**Credits:**
4.00

**Description:**
Introduces China studies as a subfield of comparative politics. Covers topics such as history, political structure, communist revolution, political and economic development, authoritarian resilience, current issues, and foreign policy. Compares China with other countries in and outside of Asia.

---

**GVT-411 Politics of North and Southeast Asia**

**Prerequisites:**
Junior Status required

**Credits:**
4.00

**Description:**
Examines cultural and historic backgrounds, political systems, political and economic development, and international relations of countries in North and South East Asia. Provides with the understanding of the main regional trends and offers case studies of some of the political systems in the region. Applies the concepts and theories learned in the previous international relations, comparative politics courses and other social science courses. * I do not include specific country names to make the description flexible for changes. In my class, I cover countries such as China, North and South Korea, Japan, Singapore, Malaysia, Indonesia, Thailand, Vietnam, Cambodia, Laos, Philippines, and Burma.

Asian Studies Honors
To complete requirements for honors in the major, a candidate must

1. Graduate with a major GPA of 3.7 or higher
2. Graduate with an overall GPA of 3.5 or higher
3. Complete AS-H555
4. CAS Honors Program students only: Present work from your senior honors experience at the Honors Symposium or Pecha Kucha event

Asian Studies Courses Archive 2018-2019

Asian Studies Courses

- AS-100 Introduction to Asian Studies: Culture, People, Ideas
  Credits: 4.00
  Description: An interdisciplinary introduction to Asian Studies will touch upon the history, politics, economics, philosophy, geography, arts, and cultures of Asia. Sample topics include political economy, religious and cultural exchanges, international relations, Asian experience in America, and the role of Asia in the twenty-first century. Students will develop conceptual frameworks for exploring the subjects covered by the Asian Studies curriculum.

- AS-220 Chinese Food in America
  Credits: 4.00
  Description:
There are more Chinese restaurants in the U.S. than MacDonald’s, Burger Kings and KFC’S combined. This course examines the unique American phenomenon of Chinese food from a historical and anthropological viewpoint. Students will gain a better appreciation and understanding of the subject through the course and will probably never look at local Chinese takeout the same way afterwards.

- **AS-500 Asian Studies Internship**
  
  **Credits:**
  4.00

  **Description:**
  Engages in an internship in a business or non-profit organization that deals with Asia or an Asian American community. Students may complete the internship either in Asia or in the U.S. Students will complete appropriate exercises and reports to document their learning. (1 course, 4-12 credits; can be taken multiple times in different semesters)

- **AS-510 Independent Study**
  
  **Credits:**
  1.00- 4.00

  **Description:**
  Works directly with a faculty member on an agreed topic related to Asia or an Asian language. Past topics include: intermediate Chinese and Japanese; Asian popular culture.

- **AS-511 Professional Development for Asian Studies**
  
  **Prerequisites:**
  Instructor consent required

  **Credits:**
  1.00

  **Description:**
Students will reflect on their college career and develop a personal strategy for attaining professional goals. They will understand ethical guidelines and professional conventions by examining the differences between American work culture and Asian work culture; by applying this understanding to a transnational/diverse professional world. Students will understand what the job market and graduate school opportunities are like for Asian Studies graduates.

- **AS-H555 Senior Honors Thesis**

**Prerequisites:**
Students must be in the CAS Honors Program, have a 3.5 overall grade point average, and a 3.7 grade point average in the major. Registration must be approved by the Asian Studies Director.

**Credits:**
1.00- 8.00

**Description:**
Students will work with an Asian Studies advisor to undertake a research project that will produce a 25-page paper that is suitable for an undergraduate academic conference in Asian Studies or relevant disciplines. Students must be in the CAS Honors Program, have a 3.5 overall grade point average, and a 3.7 grade point average in the major. Registration must be approved by the Asian Studies Director. May be taken in the fall and/or spring in the senior year.
BIG DATA & BUSINESS ANALYTICS (ARCHIVE 2018-2019)

Companies across all industries are using sophisticated technologies to collect and understand data to manage their operations. As a result, the demand for skilled analytics professionals is growing fast in all types of organizations—regardless of industry, size, or ownership structure. Be ready to capitalize on this opportunity by gaining specialized, practical knowledge and skills in Suffolk’s big data and business analytics programs.

Your array of business analytics program options includes undergraduate majors and minors, a graduate certificate, and accelerated and dual graduate degrees.

- **Big Data and Business Analytics (BDBA) Major Archive 2018-2019**
- **Big Data and Business Analytics Minor Archive 2018-2019**
- **Big Data and Business Analytics Undergraduate Courses Archive 2018-2019**

The major is designed to teach the theoretical and practical aspects of Big Data and Business Analytics through a curriculum focused on a mathematical (statistical), technical (including architecture and analytics), and communication components required in the business analytics field. The goal of the BDBA major is to educate students who can successfully fulfill the roles and responsibilities of the rapidly growing field related to business analytics. Through the BDBA curriculum, graduates will be equipped with the knowledge, skills, and abilities (KSA's) to obtain employment in a position such as a business analyst.

The BSBA in Big Data and Business Analytics requires completion of a minimum of 21 credit hours (7 classes) in Big Data and Business Analytics. A cumulative grade point average of at least 2.0 in the Big Data and Business Analytics major and a cumulative grade point average of 2.0 overall must be maintained to graduate.
Required Courses (5 courses, 15 credits)

- **ISOM-130 Data Science and Analytics**
  
  **Credits:**
  
  3.00

  **Description:**
  Provides students with a comprehensive introduction to the core concepts, applications and tools of data acquisition, preparation, querying, analytics, and data management. Students gain hands-on experience using real data to perform these functions. Topics include: data life cycle, big data, analytics, data collection, preparation, organization and storage, aggregation and summary, and presentation/visualization. Students use tools such as MS Excel, MS Access, SQL, and SAS Visual Analytics.

- **ISOM-230 Big Data, Business Intelligence and Analytics**
  
  **Prerequisites:**
  
  STATS-240 or STATS-250 or Instructor Permission

  **Credits:**
  
  3.00

  **Description:**
  Provides an understanding of the business potential of big data; how to build and maintain data warehouses, and how to analyze and use this data as a source for business intelligence and competitive advantage. Students study data mining concepts and the use of analytics tools and methods for producing business knowledge. Topics include: extraction, transformation and loading; decision support systems; analytics, text, web and data mining models as well as data presentation/visualization including dashboards, cockpits and scorecards. Students build a data warehouse and practice the extraction and filtering process used to produce high quality data warehouses. Students will use tools such as MS Excel, MicroStrategy (Salesforce), SQL and SAP Business Warehouse.
- **ISOM-330 Applied Predictive Analytics**

  **Prerequisites:**
  ISOM-130, ISOM-230, and STATS-240 or STATS-250 or Instructor Permission

  **Credits:**
  3.00

  **Description:**
  When companies make decisions, they do so with the future in mind and essentially are predicting that their decisions will achieve desired results. Predictive analytics allow people to ask and answer questions that can predict demand and/or outcomes and obtain results that lead to reasoned action. This course develops students' capability in applying the core concepts and techniques of predictive analytics for opportunity identification and risk assessment within the context of organizational decision-making. Students will use data-driven approaches to develop predictive analytical models. Students will create and use data models and techniques, apply trendlines to fit models to data, perform what-if analysis, construct data tables, evaluate scenarios, apply forecasting techniques, simulation and risk analysis. Students will learn to use various presentation and visualization tools to communicate results. Topics include: predictive analytics life cycle, opportunity/issue identification, data preparation, modeling, analysis, forecasting, simulation, risk assessment, and operationalization of predictive analytics.

- **EC-450 Applied Econometrics**

  **Prerequisites:**
  STATS-250 or STATS-240 or MATH-255 or permission of instructor

  **Credits:**
  4.00

  **Description:**
  This course begins with a brief review of statistical methods, including probability theory, estimation, and hypothesis testing. This background is used in the construction, estimation, and testing of econometric models. The consequences of a misspecified model, where the assumptions of a classical regression model are violated, are studied and the appropriate remedial measures are suggested. Other
topics include dummy variables, binary choice models, and autoregressive models. Emphasis is on applied aspects of econometric modeling. There is extensive use of statistical software for data analyses. Normally offered every year.

Choose one of the following:

- **ISOM-231 Automatic for the People: Turn Data Into Insight/W R~python**
  **Prerequisites:**
  STATS-240 or STATS-250

  **Credits:**
  3.00

  **Description:**
  Introduces a detailed overview of statistical learning for data mining, inference, and prediction in order to tackle modern-day data analysis problems. This course is appropriate for students who wish to learn and apply statistical learning tools to analyze data and gain valuable hands-on experience with R. Statistical learning refers to a vast set of tools for modeling and understanding complex datasets. Exciting topics include: Regression, Logistic Regression, Linear Discriminant Analysis, Cross-Validation, Bootstrap, Linear/Non-Linear Model Selection and Regularization, Support Vector Methodology, and Unsupervised Learning via Principal Components Analysis and Clustering Methods. Students learn how to implement each of the statistical learning methods using the popular statistical software package R via hands-on lab sessions.

- **ISOM-314 Object Oriented Programming**
  **Credits:**
  3.00

  **Description:**
  Develops problem solving and basic programming skills through a variety of business application assignments. Introduces fundamental control and data structures using the Java programming language. Students learn about the concepts of object-oriented / event-driven programming principles. The course
builds skills in the areas of programming logic, Class and Object concepts, and system development. Testing and debugging techniques and the writing of well-structured code are emphasized.

− **ISOM-323 Database Management**  
**Prerequisites:**  
ISOM-210 (formerly ISOM-310); This course was formerly ISOM-423  

**Credits:**  
3.00  

**Description:**  
Provides an understanding of the role of information and databases in information systems and their role as an organizational resource. Students learn to design databases using normalization and entity-relationship diagrams, develop data models and to build applications with database management systems such as MS Access and SQL. Techniques are examined and applied to realistic business problems through hands-on exercises and projects.

**Elective Courses (2 courses, 6 credit minimum)**  
Choose two (2) courses from the following list. You may also take a 300-level or higher, 3-credit course with your advisor’s approval.

− **ISOM-231 Automatic for the People: Turn Data Into Insight/W R-python**  
**Prerequisites:**  
STATS-240 or STATS-250  

**Credits:**  
3.00  

**Description:**  
Introduces a detailed overview of statistical learning for data mining, inference, and prediction in order to tackle modern-day data analysis problems. This course is appropriate for students who wish to learn and apply statistical learning tools to analyze data and gain valuable hands-on experience with R. Statistical learning
refers to a vast set of tools for modeling and understanding complex datasets. Exciting topics include: Regression, Logistic Regression, Linear Discriminant Analysis, Cross-Validation, Bootstrap, Linear/Non-Linear Model Selection and Regularization, Support Vector Methodology, and Unsupervised Learning via Principal Components Analysis and Clustering Methods. Students learn how to implement each of the statistical learning methods using the popular statistical software package R via hands-on lab sessions.

- **ISOM-240 Data Privacy and Compliance**
  
  **Credits:** 3.00

  **Description:**
  Students will analyze and evaluate privacy risks facing individual and organizational data and then design and evaluate solutions to protect the data. The course starts by introducing students to basic data privacy principles and the deteriorating state of privacy with frequent data breaches and identity theft explosion. The course then explores the disruption to privacy caused by emerging technologies like mobile, cloud, big data and social media and the consequences. Different privacy solutions including privacy enhancing technologies like Tors, Onions and encryption will be introduced. Various US Data privacy laws like HIPAA are explored and then compared to the European general data privacy regulation (GDPR) regime. The course ends by introducing different data privacy best practices and the "Privacy by Design" paradigm.

- **ISOM-314 Object Oriented Programming**
  
  **Credits:** 3.00

  **Description:**
  Develops problem solving and basic programming skills through a variety of business application assignments. Introduces fundamental control and data structures using the Java programming language. Students learn about the concepts of object-oriented / event-driven programming principles. The course builds skills in the areas of programming logic, Class and Object concepts, and system development. Testing and debugging techniques and the writing of well-structured code are emphasized.
- **ISOM-323 Database Management**  
  **Prerequisites:**  
  ISOM-210 (formerly ISOM-310); This course was formerly ISOM-423

  **Credits:**  
  3.00

  **Description:**  
  Provides an understanding of the role of information and databases in information systems and their role as an organizational resource. Students learn to design databases using normalization and entity-relationship diagrams, develop data models and to build applications with database management systems such as MS Access and SQL. Techniques are examined and applied to realistic business problems through hands-on exercises and projects.

- **ISOM-340 Global Cyber Security Principles**  
  **Prerequisites:**  
  ISOM-210 (formerly ISOM-310) and at least 54 credits

  **Credits:**  
  3.00

  **Description:**  
  Introduces the basics of information security & privacy including the legal and ethical issues. Common types of computer attacks and counter-attacks are addressed. Security technologies such as biometrics, firewalls, intrusion detection systems and cryptography systems will be analyzed and several lab exercises on the same are used to connect theory to practice. Best practices for planning and auditing security and privacy will also be covered.

- **ISOM-440 ERP System & Process Reengineering**  
  **Prerequisites:**  
  ISOM-210 (formerly ISOM-310) and at least 54 credits

  **Credits:**  
  3.00
Description:
Provides a conceptual, as well as, a mechanical understanding of enterprise integration and enterprise software, business process reengineering and strategies for maximizing benefits from enterprise systems. Students learn to examine complex issues in organizational changes including implementation challenge; risks, costs, and benefits; learning and knowledge management. Hands-on lab projects on the ERP System (provided by SAP) are utilized to reinforce understanding of important enterprise systems and business process concepts. This course is part of the SAP Student Recognition Certificate Program.

- **CMPSC-310 Introduction to Data Science**

**Prerequisites:**
CMPSC-F132 and 1 of the following: STATS-240, STATS-250, MATH-134, MATH-165, MATH-164 or MATH-255.

**Credits:**
4.00

Description:
The field of data science is emerging at the intersection of the fields of social science and statistics, information and computer science and design. Data science involves using automated methods to analyze massive amounts of data and to extract knowledge from them. This course serves as a project-based introduction to data science in Python language, covering data organization and retrieval, statistical data processing and data visualization.

- **MKT-322 Marketing Analytics**

**Prerequisites:**
MKT 210; and either MKT 220 or MKT H221 (or MKT 318 or MKT 319)

**Credits:**
3.00

Description:
In this course, students will learn a digitally driven approach to marketing analytics, an exciting field undergoing explosive growth and high demand. An emphasis will be placed on the practical methods used to measure, manage and analyze
consumer information. Topics covered will include making sense of the digital media landscape, demand forecasting and predictive analytics, performance evaluation, and Google Analytics. Upon graduation of this course, students will have gained a set of skills and certification that directly translates to modern marketing practices.

Learning Goals & Objectives

Learning goals and objectives reflect the educational outcomes achieved by students through the completion of this program. These transferable skills prepare Suffolk students for success in the workplace, in graduate school, and in their local and global communities.

**Learning Goals**

Students will...

- Demonstrate understanding of theories and concepts of big data and analytics. (Knowledge)

- Demonstrate skills in utilizing business analytics technology and techniques. (Skill)

**Learning Objectives**

Upon completion of the program, each student should be able to...

- Identify the main theories and concepts of big data and analytics.
- Understand the architecture and technical infrastructure of business intelligence and big data analytics.
- Understand analytical techniques used to generate descriptive and predictive models.
- Utilize many of the most popular business intelligence tools in industry.
- Utilize the architectural technologies used in generating business intelligence and big data analytics.
- Manage, extract, transform and load data as well as provide data visualizations.

l
s

Learning Objectives

- Access data and develop business intelligence solutions.
- Develop analytical models using data mining tools and be able to communicate the results to decision makers.
- Analyze, develop and critically assess data mining and predictive analysis models and projects.
- Evaluate analytical models from various industries and business functions.
- Communicate models developed using big data and analytical tools.
- Have a multidisciplinary perspective of the mathematical, technical and communication knowledge, and skill set.

Big Data and Business Analytics Minor Archive
2018-2019

Big Data and Business Analytics Minor for Business Students (3 courses, 9 credits)

Students are required to take the following:

- ISOM-130 Data Science and Analytics
  Credits: 3.00

Description:
Provides students with a comprehensive introduction to the core concepts, applications and tools of data acquisition, preparation, querying, analytics, and data management. Students gain hands-on experience using real data to perform these functions. Topics include: data life cycle, big data, analytics, data collection, preparation, organization and storage, aggregation and summary, and presentation/visualization. Students use tools such as MS Excel, MS Access, SQL, and SAS Visual Analytics.
- **ISOM-230 Big Data, Business Intelligence and Analytics**
  
  **Prerequisites:**
  STATS-240 or STATS-250 or Instructor Permission
  
  **Credits:**
  3.00
  
  **Description:**
  Provides an understanding of the business potential of big data; how to build and maintain data warehouses, and how to analyze and use this data as a source for business intelligence and competitive advantage. Students study data mining concepts and the use of analytics tools and methods for producing business knowledge. Topics include: extraction, transformation and loading; decision support systems; analytics, text, web and data mining models as well as data presentation/visualization including dashboards, cockpits and scorecards. Students build a data warehouse and practice the extraction and filtering process used to produce high quality data warehouses. Students will use tools such as MS Excel, MicroStrategy (Salesforce), SQL and SAP Business Warehouse.

- **ISOM-330 Applied Predictive Analytics**
  
  **Prerequisites:**
  ISOM-130, ISOM-230, and STATS-240 or STATS-250 or Instructor Permission
  
  **Credits:**
  3.00
  
  **Description:**
  When companies make decisions, they do so with the future in mind and essentially are predicting that their decisions will achieve desired results. Predictive analytics allow people to ask and answer questions that can predict demand and/or outcomes and obtain results that lead to reasoned action. This course develops students' capability in applying the core concepts and techniques of predictive analytics for opportunity identification and risk assessment within the context of organizational decision-making. Students will use data-driven approaches to develop predictive analytical models. Students will create and use data models and techniques, apply trendlines to fit models to data, perform what-if analysis, construct data tables, evaluate scenarios, apply forecasting techniques, simulation and risk analysis. Students will learn to use various presentation and visualization
tools to communicate results. Topics include: predictive analytics life cycle, opportunity/issue identification, data preparation, modeling, analysis, forecasting, simulation, risk assessment, and operationalization of predictive analytics.

**Big Data and Business Analytics Minor for College of Arts & Sciences Students (5 courses, 16 credits)**

- **ENT-101 Business Foundations**
  **Credits:**
  3.00
  **Description:**
  This course introduces students to foundational concepts in business, including functional areas, the life cycle, competition, stakeholders and ethical considerations. Students develop critical thinking by learning and using a problem solving process through a business situation analysis model to analyze various situations that confront managers and founders of small, medium, and large organizations. Students will also develop tools for analysis, allowing them to critically view business in a new and thoughtful way. The class culminates with student-teams presenting a detailed analysis and recommendations to a panel of executives and persuading them that the recommended strategy is not only feasible, but also practical for the stakeholders involved.

- **ISOM-130 Data Science and Analytics**
  **Credits:**
  3.00
  **Description:**
  Provides students with a comprehensive introduction to the core concepts, applications and tools of data acquisition, preparation, querying, analytics, and data management. Students gain hands-on experience using real data to perform these functions. Topics include: data life cycle, big data, analytics, data collection, preparation, organization and storage, aggregation and summary, and presentation/visualization. Students use tools such as MS Excel, MS Access, SQL, and SAS Visual Analytics.
- ISOM-230 Big Data, Business Intelligence and Analytics
  **Prerequisites:**
  STATS-240 or STATS-250 or Instructor Permission

  **Credits:**
  3.00

  **Description:**
  Provides an understanding of the business potential of big data; how to build and maintain data warehouses, and how to analyze and use this data as a source for business intelligence and competitive advantage. Students study data mining concepts and the use of analytics tools and methods for producing business knowledge. Topics include: extraction, transformation and loading; decision support systems; analytics, text, web and data mining models as well as data presentation/visualization including dashboards, cockpits and scorecards. Students build a data warehouse and practice the extraction and filtering process used to produce high quality data warehouses. Students will use tools such as MS Excel, MicroStrategy (Salesforce), SQL and SAP Business Warehouse.

- ISOM-240 Data Privacy and Compliance
  **Credits:**
  3.00

  **Description:**
  Students will analyze and evaluate privacy risks facing individual and organizational data and then design and evaluate solutions to protect the data. The course starts by introducing students to basic data privacy principles and the deteriorating state of privacy with frequent data breaches and identity theft explosion. The course then explores the disruption to privacy caused by emerging technologies like mobile, cloud, big data and social media and the consequences. Different privacy solutions including privacy enhancing technologies like Tors, Onions and encryption will be introduced. Various US Data privacy laws like HIPAA are explored and then compared to the European general data privacy regulation (GDPR) regime. The course ends by introducing different data privacy best practices and the "Privacy by Design" paradigm.

- ISOM-330 Applied Predictive Analytics
Prerequisites:
ISOM-130, ISOM-230, and STATS-240 or STATS-250 or Instructor Permission

Credits:
3.00

Description:
When companies make decisions, they do so with the future in mind and essentially are predicting that their decisions will achieve desired results. Predictive analytics allow people to ask and answer questions that can predict demand and/or outcomes and obtain results that lead to reasoned action. This course develops students’ capability in applying the core concepts and techniques of predictive analytics for opportunity identification and risk assessment within the context of organizational decision-making. Students will use data-driven approaches to develop predictive analytical models. Students will create and use data models and techniques, apply trendlines to fit models to data, perform what-if analysis, construct data tables, evaluate scenarios, apply forecasting techniques, simulation and risk analysis. Students will learn to use various presentation and visualization tools to communicate results. Topics include: predictive analytics life cycle, opportunity/issue identification, data preparation, modeling, analysis, forecasting, simulation, risk assessment, and operationalization of predictive analytics.

*In addition to the courses listed above, students are required to take an approved statistics course before taking ISOM 230 and ISOM 330. For more information, please email the Information Systems and Operations Management Department or call 617-573-8331.

Accelerated Degrees
If you’re earning an undergraduate business degree at Suffolk or another U.S. institution, you may qualify to earn both your Bachelor’s and Master’s degrees in just 5 years.

- **ISOM-231 Automatic for the People: Turn Data Into Insight/W R~python**

**Prerequisites:**
STATS-240 or STATS-250

**Credits:**
3.00

**Description:**
Introduces a detailed overview of statistical learning for data mining, inference, and prediction in order to tackle modern-day data analysis problems. This course is appropriate for students who wish to learn and apply statistical learning tools to analyze data and gain valuable hands-on experience with R. Statistical learning refers to a vast set of tools for modeling and understanding complex datasets. Exciting topics include: Regression, Logistic Regression, Linear Discriminant Analysis, Cross-Validation, Bootstrap, Linear/Non-Linear Model Selection and Regularization, Support Vector Methodology, and Unsupervised Learning via Principal Components Analysis and Clustering Methods. Students learn how to implement each of the statistical learning methods using the popular statistical software package R via hands-on lab sessions.

- **ISOM-240 Data Privacy and Compliance**

**Credits:**
3.00

**Description:**
Students will analyze and evaluate privacy risks facing individual and organizational data and then design and evaluate solutions to protect the data. The course starts by introducing students to basic data privacy principles and the deteriorating state of privacy with frequent data breaches and identity theft explosion. The course then explores the disruption to privacy caused by emerging technologies like mobile, cloud, big data and social media and the consequences. Different privacy solutions including privacy enhancing technologies like Tor, Onions and encryption will be introduced. Various US Data privacy laws like HIPAA are explored and then compared to the European general data privacy regulation (GDPR) regime. The course ends by introducing different data privacy best practices and the "Privacy by Design" paradigm.

- **ISOM-314 Object Oriented Programming**
  
  **Credits:**
  
  3.00

  **Description:**
  Develops problem solving and basic programming skills through a variety of business application assignments. Introduces fundamental control and data structures using the Java programming language. Students learn about the concepts of object-oriented / event-driven programming principles. The course builds skills in the areas of programming logic, Class and Object concepts, and system development. Testing and debugging techniques and the writing of well-structured code are emphasized.

- **ISOM-323 Database Management**
  
  **Prerequisites:**
  ISOM-210 (formerly ISOM-310); This course was formerly ISOM-423

  **Credits:**
  
  3.00

  **Description:**
  Provides an understanding of the role of information and databases in information systems and their role as an organizational resource. Students learn to design databases using normalization and entity-relationship diagrams, develop data
models and to build applications with database management systems such as MS Access and SQL. Techniques are examined and applied to realistic business problems through hands-on exercises and projects.

- **ISOM-330 Applied Predictive Analytics**
  
  **Prerequisites:**
  ISOM-130, ISOM-230, and STATS-240 or STATS-250 or Instructor Permission

  **Credits:**
  3.00

  **Description:**
  When companies make decisions, they do so with the future in mind and essentially are predicting that their decisions will achieve desired results. Predictive analytics allow people to ask and answer questions that can predict demand and/or outcomes and obtain results that lead to reasoned action. This course develops students’ capability in applying the core concepts and techniques of predictive analytics for opportunity identification and risk assessment within the context of organizational decision-making. Students will use data-driven approaches to develop predictive analytical models. Students will create and use data models and techniques, apply trendlines to fit models to data, perform what-if analysis, construct data tables, evaluate scenarios, apply forecasting techniques, simulation and risk analysis. Students will learn to use various presentation and visualization tools to communicate results. Topics include: predictive analytics life cycle, opportunity/issue identification, data preparation, modeling, analysis, forecasting, simulation, risk assessment, and operationalization of predictive analytics.

- **ISOM-340 Global Cyber Security Principles**
  
  **Prerequisites:**
  ISOM-210(formerly ISOM-310) and at least 54 credits

  **Credits:**
  3.00

  **Description:**
Introduces the basics of information security & privacy including the legal and ethical issues. Common types of computer attacks and counter-attacks are addressed. Security technologies such as biometrics, firewalls, intrusion detection systems and cryptography systems will be analyzed and several lab exercises on the same are used to connect theory to practice. Best practices for planning and auditing security and privacy will also be covered.

- **ISOM-440 ERP System & Process Reengineering**

**Prerequisites:**
ISOM-210(formerly ISOM-310) and at least 54 credits

**Credits:**
3.00

**Description:**
Provides a conceptual, as well as, a mechanical understanding of enterprise integration and enterprise software, business process reengineering and strategies for maximizing benefits from enterprise systems. Students lean to examine complex issues in organizational changes including implementation challenge; risks, costs, and benefits; learning and knowledge management. Hands-on lab projects on the ERP System (provided by SAP) are utilized to reinforce understanding of important enterprise systems and business process concepts. This course is part of the SAP Student Recognition Certificate Program.

- **CMPSC-310 Introduction to Data Science**

**Prerequisites:**
CMPSC-F132 and 1 of the following: STATS-240, STATS-250, MATH-134, MATH-165, MATH-164 or MATH-255.

**Credits:**
4.00

**Description:**
The field of data science is emerging at the intersection of the fields of social science and statistics, information and computer science and design. Data science involves using automated methods to analyze massive amounts of data and to
extract knowledge from them. This course serves as a project-based introduction to
data science in Python language, covering data organization and retrieval,
statistical data processing and data visualization.

- **MKT-322 Marketing Analytics**

**Prerequisites:**
MKT 210; and either MKT 220 or MKT H221 (or MKT 318 or MKT 319)

**Credits:**
3.00

**Description:**
In this course, students will learn a digitally driven approach to marketing analytics,
an exciting field undergoing explosive growth and high demand. An emphasis will
be placed on the practical methods used to measure, manage and analyze
consumer information. Topics covered will include making sense of the digital
media landscape, demand forecasting and predictive analytics, performance
evaluation, and Google Analytics. Upon graduation of this course, students will have
gained a set of skills and certification that directly translates to modern marketing
practices.
BIOCHEMISTRY (ARCHIVE 2018-2019)

- Biochemistry Major Archive 2018-2019
- Honors Archive 2018-2019
- Biochemistry Courses Archive 2018-2019

Biochemistry Major Archive 2018-2019

Biochemistry Major Requirements: 19 courses, 70-76 credits

The curricula for the BA and BS in Biochemistry satisfy the requirements for certification by the American Chemical Society if CHEM-375 and CHEM-L375 are elected, along with three combined credits of CHEM-428 and CHEM-429.

Core Requirements (17 courses and corresponding laboratories where applicable, 62-68 credits)

- CHEM-111 General Chemistry I

  Prerequisites:
  Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

  Credits:
  3.00

  Description:
  Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.
- **CHEM-L111 General Chemistry Laboratory I**

**Prerequisites:**
MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

**Credits:**
1.00

**Description:**
Introduces the basic principles of chemistry through "discovery" laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

- **CHEM-112 General Chemistry II**

**Prerequisites:**
CHEM 111/L111; CHEM-L112 must be taken concurrently. MATH 104 placement or higher.

**Credits:**
3.00

**Description:**
This course is a continuation of General Chemistry I. Fundamental principles of chemistry are discussed. Introduces thermochemistry, gases, solution chemistry, chemical kinetics, chemical equilibrium, acid-base systems, and thermodynamics.

- **CHEM-L112 General Chemistry Laboratory II**

**Prerequisites:**
CHEM-111/L111; CHEM-112 must be taken concurrently. MATH-104 placement or higher.

**Credits:**

1.00

Description:
This course is a continuation of General Chemistry I Laboratory. Apply the basic principles of chemistry through discovery laboratory experiments with an emphasis on quantitative analysis. Execute basic analytical techniques such as the application of Beer’s Law and acid-base titrations. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

— CHEM-211 Organic Chemistry I
Prerequisites:
CHEM 112 and CHEM-L112. CHEM-L211 must be taken concurrently.

Credits:
3.00

Description:
Introduces basic theories of structure, bonding, and chemical reactivity as specifically applied to modern organic chemistry. Includes functional groups, acid/base chemistry, nomenclature, resonance, spectroscopy, and stereochemistry.

— CHEM-L211 Organic Chemistry Laboratory I
Prerequisites:
CHEM-112 and CHEM-L112. Must be taken concurrently with CHEM 211.

Credits:
1.00

Description:
Introduces synthetic organic chemistry techniques. Includes melting point determination, distillation, crystallization, extraction, chromatographic separations, and infrared spectroscopy. Discusses experimental design within the context of green organic chemistry.

CHEM-212 Organic Chemistry II
Prerequisites:
CHEM 211 and CHEM L211. Must take CHEM-L212 concurrently.

Credits:
3.00

Description:
Builds on the core competencies acquired in Organic Chemistry I. Includes detailed mechanistic discussions of substitution, elimination, and addition reactions. Emphasizes organic synthesis, structure determination, and spectroscopy.

CHEM-L212 Organic Chemistry Laboratory II
Prerequisites:
CHEM-211 and CHEM-L211. Must be take CHEM-212 concurrently.

Credits:
1.00

Description:
Builds on the core competencies acquired in Organic Chemistry Laboratory I. Emphasizes the characterization of organic molecules via nuclear magnetic resonance spectroscopy. Discusses experimental design within the context of green organic chemistry.

CHEM-314 Instrumental Analysis
Prerequisites:
CHEM 211; CHEM L314 must be taken concurrently.

Credits:
3.00

Description:
Explores the basic techniques of collecting and analyzing data from different types of instrumentation, including: ultraviolet, visible, fluorescence, atomic and emission spectroscopy; chromatographic methods; electrochemical measurements. Students will apply these techniques to problems in chemistry, forensics, and environmental science.
- **CHEM-L314 Instrumental Analysis Laboratory**

  **Prerequisites:**
  CHEM L211; CHEM 314 must be taken concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory experiments in chemical analysis using instrumental techniques, including spectroscopy and chromatography. Data collection and evaluation includes computer-based methods. Reports are prepared in professional style.

- **CHEM-331 Biochemistry I**

  **Prerequisites:**
  CHEM 212/L212 or permission of instructor. CHEM L331 must be taken concurrently.

  **Credits:**
  3.00

  **Description:**
  Explores the foundations of biochemistry, including the structure, organization and behavior of proteins, carbohydrates, lipids, and nucleic acids. Topics include enzyme catalysis, kinetics, and inhibition as well as protein regulation and membrane structure. Introduces the use of biochemical literature and bioinformatics techniques.

- **CHEM-L331 Biochemical Techniques Lab**

  **Prerequisites:**
  CHEM 212/L212 or permission of instructor. CHEM 331 must be taken concurrently

  **Credits:**
  1.00

  **Description:**
Laboratory course introducing biochemical techniques. Includes buffer preparation, PCR, purification of DNA and proteins, agarose and polyacrylamide gel electrophoresis, protein quantitation and detection, and enzyme kinetic assays.

- **CHEM-332 Biochemistry II**  
  **Prerequisites:**  
  CHEM 331 and CHEM-L332 concurrently  
  **Credits:**  
  3.00  
  **Description:**  
  Explores the principles of bioenergetics and metabolism of biomolecules. Includes intermediary metabolism of carbohydrates, lipids, amino acids, and oxidative phosphorylation. Additional topics include signal transduction and the regulation and integration of metabolism.

- **CHEM-L332 Advanced Biochemical Techniques and Research Lab**  
  **Prerequisites:**  
  CHEM 331/L331. CHEM 332 must be taken concurrently.  
  **Credits:**  
  1.00  
  **Description:**  
  Advanced biochemistry laboratory course where students learn experimental design and critical analysis of the scientific literature while conducting novel research. Projects vary from year to year, but may include recombinant DNA techniques, purification and quantitation of DNA and proteins, protein detection, enzyme kinetics, and bioinformatics. Research is presented as a poster at the annual STEM banquet.

- **CHEM-411 Physical Chemistry I**  
  **Prerequisites:**  
  CHEM 112; MATH 166;
Credits:
3.00

Description:
Explores quantum chemistry through simple model systems such as particle in a box, harmonic oscillator, rigid rotor, and hydrogen atom. Applications to electronic, vibrational, and rotational spectroscopy and elements of atomic and molecular structure.

— **CHEM-L411 Physical Chemistry Laboratory I**

Prerequisites:
CHEM 411 must be taken concurrently

Credits:
1.00

Description:
Experiments in molecular spectroscopy, quantum chemistry, nanomaterials, and introduction to computational chemistry. Emphasis will be placed on experimental design and data analysis skills in addition to technical writing skills as demonstrated through reports prepared in the professional style.

— **CHEM-412 Physical Chemistry II**

Prerequisites:
CHEM 411

Credits:
3.00

Description:
Explores the laws of thermodynamics and their molecular basis through the kinetic theory of gases and statistical mechanics. Includes chemical kinetics and theories of reaction rates.

— **CHEM-L412 Physical Chemistry Laboratory II**

Prerequisites:
CHEM L411; CHEM 412 must be taken concurrently.

**Credits:**
1.00

**Description:**
Experiments in thermodynamics, materials, chemical kinetics, and computational chemistry. Emphasis will be placed on experimental design and data analysis skills in addition to technical writing skills as demonstrated by laboratory reports prepared in the professional style.

---

- **CHEM-428 Research & Seminar I**

**Prerequisites:**
CHEM 212; CHEM L212; Instructor’s Consent required

**Credits:**
1.00- 4.00

**Description:**
First of a senior level, two-semester sequence of independent study under the supervision of faculty. Students may opt to conduct experimental research or grant proposal development. Students desiring departmental honors and/or an ACS-accredited degree must conduct authentic research; consult with the course instructor. Development of a research report and poster presentation to the department are required elements.

---

- **CHEM-429 Research & Seminar II**

**Prerequisites:**
CHEM 212 and CHEM L212 and instructor’s consent required

**Credits:**
1.00- 4.00

**Description:**
Second of a senior level, two-semester sequence of independent study under the supervision of faculty. Students may opt to conduct experimental research or grant proposal development. Students desiring departmental honors and/or an ACS-
accorded degree must conduct authentic research; consult with the course instructor. Development of a final research report and oral presentation to the department and the SU community are required elements.

- **BIO-111 Introduction to the Cell**
  **Prerequisites:**
  Must take BIO L111 concurrently

  **Credits:**
  3.00

  **Description:**
  Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

- **BIO-L111 Introduction to the Cell Laboratory**
  **Prerequisites:**
  Concurrently with BIO 111

  **Credits:**
  1.00

  **Description:**
  Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

- **BIO-114 Organismal Biology**
  **Prerequisites:**
  Must take BIO L114 concurrently.

  **Credits:**
  3.00
Description:
Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

- BIO-L114 Organismal Biology Laboratory
Prerequisites:
Must take BIO 114 concurrently

Credits:
1.00

Description:
A series of laboratory experiences in evolution, diversity, anatomy and physiology.

- MATH-165 Calculus I
Prerequisites:
MATH-121 with a minimum grade of C, MATH-075, or MATH level 5

Credits:
4.00

Description:
Functions, limits and continuity, squeeze theorem, limits at infinity; instantaneous rate of change, tangent slopes, and the definition of the derivative of a function; power, product, and quotient rules, trig derivatives, chain rule, implicit differentiation; higher order derivatives; derivatives of other transcendental functions (inverse trig functions, exponential and log functions, hyperbolic trig functions); applications of the derivative (implicit differentiation, related rates, optimization, differentials, curve sketching, L'Hopital's rule); anti-derivatives; indefinite integrals; Fundamental Theorem; applications (net change). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

- MATH-166 Calculus II
Prerequisites:
MATH-164 or MATH-165 with a minimum grade of C

Credits:
4.00

Description:
Riemann sums and definite integrals; Fundamental Theorem; applications (areas); integration of exponential functions, trig functions, and inverse trig functions; techniques of integration (substitution, by parts, trig integrals, trig substitution, partial fractions); area, volume, and average value applications; differential equations (separable, exponential growth, linear); improper integrals; infinite sequences and series; convergence tests; power series; Taylor and Maclaurin series (computation, convergence, error estimates, differentiation and integration of Taylor series). 4 lecture hours plus 1 recitation session each week. Normally offered each semester.

— PHYS-151 University Physics I
Prerequisites:
MATH-121 or higher (previously or concurrently) and PHYS L151 concurrently

Credits:
3.00

Description:
PHYS 151 is the first of three courses (PHYS 151, 152, 153) that comprise the calculus based introductory physics sequence at Suffolk University intended for students majoring in the physical sciences, engineering and mathematics. This course aims to teach basic techniques in physics that fall under the topic of classical mechanics and their application in understanding the natural world. Specific topics include the study of vectors, Newton’s laws, rotations, rigid body statics and dynamics, fluid mechanics, simple harmonic motion, mechanical waves, sound and hearing. The student will learn how to analyze physical situations by using simple models, and also how to solve those models and derive useful conclusions from them. This course will show students how experimental results and mathematical representations are combined to create testable scientific theories, and how the complexities of most real-life physical situations can be reduced to simple problems.
by identifying the essential physical features and ignoring the rest. The student will learn to distinguish the scientific approach to physical situations from other ways of looking at them, for example, artistic, humanistic, and business.

- **PHYS-L151 University Physics Lab I**  
**Prerequisites:**  
MATH 121 or higher (previously or concurrently) PHYS 151 concurrently  

**Credits:**  
1.00

**Description:**  
The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton's laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

- **PHYS-152 University Physics II**  
**Prerequisites:**  
PHYS-151 and PHYS-L151. Must be taken concurrently with PHYS-L152.

**Credits:**  
3.00

**Description:**  
This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss' law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday's law and AC circuits are discussed. This is followed by Maxwell's equations, electromagnetic waves, and properties of light.

- **PHYS-L152 University Physics Lab II**  
**Prerequisites:**  
PHYS 151 and L151 and PHYS 152 must be taken concurrently

**Credits:**
1.00

**Description:**
The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday's law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

---

**Elective Requirements (2 courses and corresponding laboratories, 8 credits)**

Choose two Biology electives from the following:

- **BIO-203 Anatomy and Physiology I**
  **Prerequisites:**
  BIO L203 MUST BE TAKEN CONCURRENTLY BIO 111, BIO L111.

  **Credits:**
  3.00

  **Description:**
  First part of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course emphasizes histology and physiology in the understanding of the integumentary, skeletal, muscular, and nervous systems. Medical terminology will be used.

- **BIO-L203 Anatomy & Physiology Lab I**
  **Prerequisites:**
  BIO 111/L111; Must take BIO-203 concurrently

  **Credits:**
  1.00

  **Description:**
A study of the human skeletal system and a comparative look at other organ systems involving observation of anatomical models and dissection of mammalian specimens. Also includes microscopy and computer simulations of physiological processes.

- **BIO-204 Anatomy and Physiology II**
  **Prerequisites:**
  BIO 203, BIO L203; BIO L204 must be taken concurrently;

  **Credits:**
  3.00

  **Description:**
  Conclusion of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course investigates the endocrine, circulatory, respiratory, digestive, urinary, and reproductive systems as well as the physiology of immune responses, nutrition, and acid-base balance. Medical terminology will be used.

- **BIO-L204 Anatomy & Physiology Lab II**
  **Prerequisites:**
  BIO 203/L203 and BIO 204 must be taken concurrently;

  **Credits:**
  1.00

  **Description:**
  A study of the human viscera using anatomical models and dissection of mammalian specimens. Also includes microscopy of tissues and physiological experiments.

- **BIO-274 Genetics**
  **Prerequisites:**
  BIO 111/L111 and BIO 114/L114; BIO L274 concurrently;

  **Credits:**
3.00

**Description:**
An examination of the basic principles of genetics in eukaryotes and prokaryotes at the level of molecules, cells, and multicellular organisms, including humans. Topics include Mendelian and non-Mendelian inheritance, structure and function of chromosomes and genomes, biological variation resulting from recombination, mutation, and selection, and population genetics.

**- BIO-L274 Genetics Lab**

**Prerequisites:**
BIO-111, BIO-L111, BIO-114, and BIO-L114. Must be taken concurrently with BIO 274.

**Credits:**
1.00

**Description:**
Experiments designed to demonstrate principles presented in lecture, using a range of genetic model organisms that include E. coli, B. subtilis, S. cerevisiae, D. melanogaster, S. fimbicola, and C. elegans.

**- BIO-285 Microbiology**

**Prerequisites:**
BIO-111 and BIO-L111; BIO-L285 concurrently;

**Credits:**
3.00

**Description:**
Viruses and bacteria are surveyed in terms of their ecology, biochemistry, taxonomy, molecular biology and control.

**- BIO-L285 Microbiology Laboratory**

**Prerequisites:**
BIO 111/L111; BIO 285 concurrently;
### Credits:
1.00

### Description:
Introduction to microbiological techniques and their applications to health, research and industry.

### Prerequisites:
- **BIO-377 Immunology**

### Credits:
4.00

### Description:
The concept of immunity, response to infection, structure of the immune system, biochemistry of immunoglobins, antigen-antibody interactions, allergy, immunological injury, lymphocyte subpopulations and cellular immunity, tolerance suppression and enhancement. Taught alternate/even years.

### Prerequisites:
- **BIO-403 Cell Biology**

### Credits:
3.00

### Description:
The study of cells, approached through examinations of biochemical mechanisms, the relation between the structure and function of biological molecules and organelles, and the regulation of normal and diseased cells.

### Prerequisites:
- **BIO-L403 Cell Biology Lab**

### Credits:

- **BIO-111 and BIO-L11 and CHEM-211 and CHEM-L211. Must take BIO-403 concurrently.**
**Credits:**
1.00

**Description:**
Examination of biological molecules and their role in cell function. Techniques used in these examinations will include enzymatic analyses, gel electrophoresis, immunologic identification, chromatography, and spectroscopy. Students are expected to develop their proficiency in the laboratory techniques used, to analyze their results in a quantitative manner, and to present their findings.

— **BIO-474 Molecular Genetics**

**Prerequisites:**
CHEM-311 or BIO-274 and BIO-L274 and BIO-L474 concurrently

**Credits:**
3.00

**Description:**
An examination of concepts and techniques of modern molecular biology. Topics include the structure and function of DNA, RNA, and proteins, the regulation of gene expression in prokaryotes and eukaryotes at transcriptional and post-transcriptional levels, genetic modification of organisms, and genome analysis. This course will incorporate readings and discussions of primary scientific literature. Spring semester.

— **BIO-L474 Molecular Genetics Lab**

**Prerequisites:**
Take CHEM-331 or BIO-274 and BIO-L274. BIO-474 must be taken concurrently.

**Credits:**
1.00

**Description:**
This upper level laboratory course will consist of a semester-long project in the form of a series of consecutive experiments involving the generation of a genetically modified organism and its subsequent molecular analysis. Techniques
employed will include genetic screens, DNA isolation, restriction endonuclease analysis, transformation of bacteria, gel electrophoresis, gene reported assays, RNA isolation, reverse transcription, and quantitative PCR.

Note: BIO-274, BIO-403, and BIO-474 are recommended for those planning to take the Biochemistry GRE examination for application to graduate school.

CHEM-428 and CHEM-429 are variable credit courses (1-4 credits are awarded based on coursework). Please discuss this possibility with your advisor before registering for these courses. Students must take a total of three credits of CHEM-428 and CHEM-429 in order to satisfy the American Chemical Society Certification Requirements.

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

**Biochemistry Learning Goals and Objectives**

Learning goals and objectives reflect the educational outcomes achieved by students through the completion of this program. These transferable skills prepare Suffolk students for success in the workplace, in graduate school, and in their local and global communities.

</table>
| Know laboratory skills. | • Synthesize, separate, & characterize compounds  
  • Carry out an experiment precisely and accurately using the appropriate instrumentation  
  • Record results in a laboratory notebook  
  • Work safely in the laboratory |
| Know effective written and oral communication skills. | • Prepare and present a scientific poster  
  • Prepare and present formal oral scientific presentation  
  • Write a paper in style of professional scientific journal |
| Understand scientific ethics. | • Avoid plagiarism (including self-plagiarism)  
  • Cite scientific literature appropriately  
  • Follow ethical guidelines when keeping a laboratory notebook |
| Know the Fundamentals of Chemistry and Biochemistry. | • Demonstrate mastery of the fundamentals of inorganic chemistry (electronic structure, physical and chemical properties, bonding, inorganic chemical reactions and analyses, stoichiometric relations between reactants)  
  • Demonstrate mastery of the fundamentals of organic chemistry (structure and bonding in organic molecules; acid/base properties of molecules and how they affect reactivity; organic mechanisms, predict outcomes/routes; spectral analysis (IR, NMR, MS); green chemistry)  
  • Demonstrate mastery of the fundamentals of analytical chemistry (collect and analyze data from analytical instrumentation including spectrometric instruments (UV-vis, AA, luminescence); chromatographic instruments (GC,LC); and electroanalytical instrumentation (potentiometry))  
  • Demonstrate mastery of the fundamentals of physical chemistry (gas laws; chemical equilibria; chemical kinetics; enthalpy, entropy, spontaneity; laws of thermodynamics; electrochemistry)  
  • Demonstrate mastery of the fundamentals of biochemistry (structure/function of amino acids, proteins, enzymes, carbohydrates, lipids, and nucleic acids; protein folding, regulation; enzyme kinetics, inhibition, thermodynamics; bioinformatics) |
| Know advanced biochemistry concepts. | • Demonstrate mastery of the concepts and design of metabolism, including its regulation, integration, and compartmentalization  
  • Demonstrate mastery of cellular bioenergetics including cellular respiration, electron transport, chemical and proton gradients, and energy coupling |
Honors Archive 2018-2019

Biochemistry honors

To be eligible for honors in the Chemistry Department, majors must submit an application to the department and either:

1. Be in the CAS honors program, or
2. Have an overall GPA of 3.5 or higher and a major GPA of 3.5 or higher

To complete requirements for honors in the major, a candidate must:

1. Graduate with a major GPA of 3.5 or higher
2. Graduate with an overall GPA of 3.5 or higher
3. Complete CHEM-H429
4. Complete a final project involving original independent laboratory or field research and/or in-depth analysis that is approved by the major department and research advisor
5. CAS Honors Program students only: Present work from your senior honors experience at the Honors Symposium or Pecha Kucha event

Biochemistry Courses Archive 2018-2019

Biochemistry Courses

- CHEM-105 Chemical New Product Development

Prerequisites:
ENT 101

Credits:
4.00

Description: 
This course addresses the crucial intersection between chemistry and business, and the impact of these fields on society. It provides an introduction to important chemistry concepts and practices of business management. Primary focus is on understanding the chemistry principles behind some of the consumer products in our everyday lives, and using this knowledge to create and evaluate ideas for new products. The course also introduces the business aspects involved in the development and marketing of new products. An important component of the course is in making effective presentations; this component concludes the course, culminating in team presentations of a new chemical product to panel of executives and peers. This course satisfies the Sawyer Business School Science requirement.

- **CHEM-106 Biotechnology & Its Applications in Medicine, Agriculture, Law**

  **Credits:**
  4.00

  **Description:**
  Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, short documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.

- **CHEM-H106 Biotechnology & Its Applications in Medicine, Agriculture, Law**

  **Prerequisites:**
  GPA 3.3 or higher, or Honors student

  **Credits:**
  4.00

  **Description:**
  Introduces the latest discoveries and applications of biotechnology. Topics include genetically modified food, stem cells, genetic testing, cloning, and forensics. A combination of lectures, discussions, short documentaries, mock congressional hearings, and hands-on activities will provide insight into the numerous medical, social, legal, and ethical issues surrounding this technology.
- **CHEM-111 General Chemistry I**

  **Prerequisites:**
  Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

  **Credits:**
  3.00

  **Description:**
  Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

- **CHEM-L111 General Chemistry Laboratory I**

  **Prerequisites:**
  MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

  **Credits:**
  1.00

  **Description:**
  Introduces the basic principles of chemistry through "discovery" laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.
CHEM 111/L111; CHEM-L112 must be taken concurrently. MATH 104 placement or higher.

Credits:
3.00

Description:
This course is a continuation of General Chemistry I. Fundamental principles of chemistry are discussed. Introduces thermochemistry, gases, solution chemistry, chemical kinetics, chemical equilibrium, acid-base systems, and thermodynamics.

- CHEM-L112 General Chemistry Laboratory II

Prerequisites:
CHEM-111/L111; CHEM-112 must be take concurrently. MATH-104 placement or higher.

Credits:
1.00

Description:
This course is a continuation of General Chemistry I Laboratory. Apply the basic principles of chemistry through discovery laboratory experiments with an emphasis on quantitative analysis. Execute basic analytical techniques such as the application of Beer’s Law and acid-base titrations. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

- CHEM-211 Organic Chemistry I

Prerequisites:
CHEM 112 and CHEM-L112. CHEM-L211 must be taken concurrently.

Credits:
3.00

Description:
Introduces basic theories of structure, bonding, and chemical reactivity as specifically applied to modern organic chemistry. Includes functional groups, acid/base chemistry, nomenclature, resonance, spectroscopy, and stereochemistry.
- **CHEM-L211 Organic Chemistry Laboratory I**

**Prerequisites:**
CHEM-112 and CHEM-L112. Must be taken concurrently with CHEM 211.

**Credits:**
1.00

**Description:**
Introduces synthetic organic chemistry techniques. Includes melting point determination, distillation, crystallization, extraction, chromatographic separations, and infrared spectroscopy. Discusses experimental design within the context of green organic chemistry.

- **CHEM-212 Organic Chemistry II**

**Prerequisites:**
CHEM 211 and CHEM L211. Must take CHEM-L212 concurrently.

**Credits:**
3.00

**Description:**
Builds on the core competencies acquired in Organic Chemistry I. Includes detailed mechanistic discussions of substitution, elimination, and addition reactions. Emphasizes organic synthesis, structure determination, and spectroscopy.

- **CHEM-L212 Organic Chemistry Laboratory II**

**Prerequisites:**
CHEM-211 and CHEM-L211. Must be take CHEM-212 concurrently.

**Credits:**
1.00

**Description:**
Builds on the core competencies acquired in Organic Chemistry Laboratory I. Emphasizes the characterization of organic molecules via nuclear magnetic resonance spectroscopy. Discusses experimental design within the context of green organic chemistry.

---

**CHEM-314 Instrumental Analysis**

**Prerequisites:**
CHEM 211; CHEM L314 must be taken concurrently.

**Credits:**
3.00

**Description:**
Explores the basic techniques of collecting and analyzing data from different types of instrumentation, including: ultraviolet, visible, fluorescence, atomic and emission spectroscopy; chromatographic methods; electrochemical measurements. Students will apply these techniques to problems in chemistry, forensics, and environmental science.

---

**CHEM-L314 Instrumental Analysis Laboratory**

**Prerequisites:**
CHEM L211; CHEM 314 must be taken concurrently

**Credits:**
1.00

**Description:**
Laboratory experiments in chemical analysis using instrumental techniques, including spectroscopy and chromatography. Data collection and evaluation includes computer-based methods. Reports are prepared in professional style.

---

**CHEM-331 Biochemistry I**

**Prerequisites:**
CHEM 212/L212 or permission of instructor. CHEM L331 must be taken concurrently.

**Credits:**
3.00

**Description:**
Explores the foundations of biochemistry, including the structure, organization and behavior of proteins, carbohydrates, lipids, and nucleic acids. Topics include enzyme catalysis, kinetics, and inhibition as well as protein regulation and membrane structure. Introduces the use of biochemical literature and bioinformatics techniques.

**CHEM-L331 Biochemical Techniques Lab**

**Prerequisites:**
CHEM 212/L212 or permission of instructor. CHEM 331 must be taken concurrently

**Credits:**
1.00

**Description:**
Laboratory course introducing biochemical techniques. Includes buffer preparation, PCR, purification of DNA and proteins, agarose and polyacrylamide gel electrophoresis, protein quantitation and detection, and enzyme kinetic assays.

**CHEM-332 Biochemistry II**

**Prerequisites:**
CHEM 331 and CHEM-L332 concurrently

**Credits:**
3.00

**Description:**
Explores the principles of bioenergetics and metabolism of biomolecules. Includes intermediary metabolism of carbohydrates, lipids, amino acids, and oxidative phosphorylation. Additional topics include signal transduction and the regulation and integration of metabolism.

**CHEM-L332 Advanced Biochemical Techniques and Research Lab**

**Prerequisites:**
CHEM 331/L331. CHEM 332 must be taken concurrently.

Credits:
1.00

Description:
Advanced biochemistry laboratory course where students learn experimental design and critical analysis of the scientific literature while conducting novel research. Projects vary from year to year, but may include recombinant DNA techniques, purification and quantitation of DNA and proteins, protein detection, enzyme kinetics, and bioinformatics. Research is presented as a poster at the annual STEM banquet.

---

- CHEM-355 Environmental Chemistry

Prerequisites:
CHEM 211, or permission of instructor

Credits:
3.00

Description:
A study of the chemical processes (including biologically mediated ones) that affect the cycling and ultimate fate of chemicals in the environment. Topics include air, water, and soil chemistry as well as energy and climate change. The effects of pollutant loads on natural systems and the remediation and treatment methods used to minimize pollutant loads are investigated. 3 hour lecture. Normally offered spring, odd numbered years.

---

- CHEM-L355 Environmental Chemistry Lab

Prerequisites:
CHEM 355 must be taken concurrently. Take CHEM-L211;

Credits:
1.00

Description:
Laboratory exercises designed to illustrate principles covered by topics in CHEM 355. Prerequisites: CHEM L211, concurrent enrollment in CHEM 355 required. 4-hour laboratory. Normally offered spring, odd numbered years.

- **CHEM-375 Advanced Inorganic Chemistry**
  
  **Prerequisites:**
  CHEM 314/L314

  **Credits:**
  3.00

  **Description:**
  Topics in inorganic chemistry including bonding theories, chemical structures, symmetry and group theory, kinetics and mechanisms of reactions, and spectroscopy. Advanced topics may include bioinorganic chemistry, or organometallics.

- **CHEM-L375 Advanced Inorganic Laboratory**
  
  **Prerequisites:**
  CHEM 375 must be taken concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory exercises designed to illustrate principles covered by topics in CHEM 375. Prior or concurrent enrollment in CHEM 375 required.

- **CHEM-390 Advanced Organic Chemistry**
  
  **Prerequisites:**
  Prerequisite: CHEM 212.

  **Credits:**
  3.00

  **Description:**
Expands on topics introduced in Organic Chemistry I and II; depending on student interest, may include in-depth discussions of carbonyl chemistry, industrial organic chemistry, organometallic chemistry and biomolecules.

- **CHEM-411 Physical Chemistry I**  
  **Prerequisites:** CHEM 112; MATH 166;  
  **Credits:** 3.00  
  **Description:** Explores quantum chemistry through simple model systems such as particle in a box, harmonic oscillator, rigid rotor, and hydrogen atom. Applications to electronic, vibrational, and rotational spectroscopy and elements of atomic and molecular structure.

- **CHEM-L411 Physical Chemistry Laboratory I**  
  **Prerequisites:** CHEM 411 must be taken concurrently  
  **Credits:** 1.00  
  **Description:** Experiments in molecular spectroscopy, quantum chemistry, nanomaterials, and introduction to computational chemistry. Emphasis will be placed on experimental design and data analysis skills in addition to technical writing skills as demonstrated through reports prepared in the professional style.

- **CHEM-412 Physical Chemistry II**  
  **Prerequisites:** CHEM 411  
  **Credits:** 3.00
**Description:**
Explores the laws of thermodynamics and their molecular basis through the kinetic theory of gases and statistical mechanics. Includes chemical kinetics and theories of reaction rates.

**CHEM-L412 Physical Chemistry Laboratory II**

**Prerequisites:**
CHEM L411; CHEM 412 must be taken concurrently.

**Credits:**
1.00

**Description:**
Experiments in thermodynamics, materials, chemical kinetics, and computational chemistry. Emphasis will be placed on experimental design and data analysis skills in addition to technical writing skills as demonstrated by laboratory reports prepared in the professional style.

**CHEM-428 Research & Seminar I**

**Prerequisites:**
CHEM 212; CHEM L212; Instructor's Consent required

**Credits:**
1.00-4.00

**Description:**
First of a senior level, two-semester sequence of independent study under the supervision of faculty. Students may opt to conduct experimental research or grant proposal development. Students desiring departmental honors and/or an ACS-accredited degree must conduct authentic research; consult with the course instructor. Development of a research report and poster presentation to the department are required elements.

**CHEM-429 Research & Seminar II**

**Prerequisites:**
CHEM 212 and CHEM L212 and instructor’s consent required
Credits:  
1.00- 4.00

Description:  
Second of a senior level, two-semester sequence of independent study under the supervision of faculty. Students may opt to conduct experimental research or grant proposal development. Students desiring departmental honors and/or an ACS-accredited degree must conduct authentic research; consult with the course instructor. Development of a final research report and oral presentation to the department and the SU community are required elements.

– CHEM-H429 Honors Research & Seminar II  
Prerequisites:  
CHEM 212 and CHEM L212 and instructor's consent required

Credits:  
1.00- 4.00

Description:  
Second of a senior level, two-semester sequence of independent study under the supervision of faculty. Students may opt to conduct experimental research, proposal development, or literature review. Students desiring departmental honors and/or an ACS-accredited degree must conduct authentic research; consult with the course instructor. Development of a final research report and oral presentation to the department and the SU community are required elements. Depending on the project undertaken, students may obtain ECR credit.

– CHEM-L432 Advanced Biochemistry Research Laboratory  
Prerequisites:  
CHEM-331; CHEM-L331

Credits:  
3.00

Description:  

No longer offered. Laboratory course where students apply the use of biochemical techniques acquired in Biochemical Techniques I (CHEM L331) to conduct novel research. Projects vary from year to year, but may include recombinant DNA techniques, purification and characterization of DNA and proteins, and bioinformatics. Emphasis on experimental design, data interpretation, analysis of the scientific literature, and writing. Includes field trip to local research university or biotechnology/pharmaceutical laboratory.

- **CHEM-453 Introduction to Toxicology**
  
  **Prerequisites:**
  CHEM-331 or instructor's consent

  **Credits:**
  3.00

  **Description:**
  The study of toxic actions of chemicals on biological systems, with discussion of general principles, methodology, and target organ toxicity. Topics may include pesticides, neurotoxicants, toxicity of metals, and carcinogenesis/mutagenesis. Examples will be drawn from forensic toxicology, as well as environmental and occupational toxicology.

- **CHEM-L453 Introduction to Toxicology Lab**
  
  **Prerequisites:**
  Take CHEM-212 previously, CHEM-453 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory course where students learn to use biochemistry, cheminformatics and bioinformatics tools to predict the effect that various xenobiotics will have on various receptors, transporters and enzymes in the human body. Lab techniques may include: enzyme kinetics, binding affinity, ELISA.

- **CHEM-500 Experiential Learning in Chemistry**
Credits:
0.00

Description:
This course requires students to complete a minimum of 15 engagement hours per semester. Students gain exposure to a variety of activities related to research in a laboratory or field setting with faculty oversight. Permission of instructor required. May be taken more than once.

CHEM-510 Independent Study

Prerequisites:
An independent study form must be submitted to the CAS Dean’s Office.

Credits:
1.00-4.00

Description:
Advanced study of a special topic in chemistry, by arrangement with the chemistry faculty.

Biology Major Requirements Archive 2018-2019

Major Requirements: 19 courses and their corresponding laboratories, 69-70 credits

Concentrations in biotechnology, marine science, and health careers are also available. A Biology major must take courses in biology plus designated related science and math courses, in addition to the all-college requirements.

Core Requirements (13 courses and their corresponding laboratories where applicable, 46 credits)

Biology Requirement (6 courses and corresponding laboratories where applicable, 18 credits)

CAS-201 College to Career: Explore Your Options And Find Your Path

Prerequisites:
CAS 101. CAS students only. SBS students by special permission. Restricted to the following majors: Art History, Asian Studies, Biology, Economics, English, French, History, Humanities, International Economics, Music History, Philosophy, Physics, Radiation Science, Spanish, and Undeclared. Instructor consent required for all other majors.

Credits:
1.00
**Description:**
This course engages students in the early stages of career planning. Students will explore their interests, skills, values, and strengths, which will allow them to begin setting appropriate goals for professional development. Once students understand themselves in relation to the world of work, they will learn how to research careers and employment paths that fit with their goals.

**BIO-111 Introduction to the Cell**

**Prerequisites:**
Must take BIO L111 concurrently

**Credits:**
3.00

**Description:**
Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

**BIO-L111 Introduction to the Cell Laboratory**

**Prerequisites:**
Concurrently with BIO 111

**Credits:**
1.00

**Description:**
Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

**BIO-114 Organismal Biology**

**Prerequisites:**
Must take BIO L114 concurrently.
**Credits:**
3.00

**Description:**
Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

---

- **BIO-L114 Organismal Biology Laboratory**

**Prerequisites:**
Must take BIO 114 concurrently

**Credits:**
1.00

**Description:**
A series of laboratory experiences in evolution, diversity, anatomy and physiology.

---

- **BIO-274 Genetics**

**Prerequisites:**
BIO 111/L111 and BIO 114/L114; BIO L274 concurrently;

**Credits:**
3.00

**Description:**
An examination of the basic principles of genetics in eukaryotes and prokaryotes at the level of molecules, cells, and multicellular organisms, including humans. Topics include Mendelian and non-Mendelian inheritance, structure and function of chromosomes and genomes, biological variation resulting from recombination, mutation, and selection, and population genetics.

---

- **BIO-L274 Genetics Lab**

**Prerequisites:**
BIO-111, BIO-L111, BIO-114, and BIO-L114. Must be taken concurrently with BIO 274.
Credits: 1.00

Description:
Experiments designed to demonstrate principles presented in lecture, using a range of genetic model organisms that include E. coli, B. subtilis, S. cerevisiae, D. melanogaster, S. fomicola, and C. elegans.

- BIO-333 Ecology

Prerequisites:
BIO-114/L114; BIO-L333 concurrently;

Credits: 3.00

Description:
Areas of study include but are not limited to basic principles of population biology, community ecology, trophic dynamics, ecosystem structure and function and evolutionary theory.

- BIO-L333 Ecology Lab

Prerequisites:
BIO-114, BIO-L114, and BIO-333 concurrently

Credits: 1.00

Description:
Field and laboratory experiences in techniques and concepts relevant to ecological theory, data collection, statistical analysis, visual representation and report preparation.

Chemistry Requirement (4 courses and corresponding laboratories where applicable, 16 credits)
- **CHEM-111 General Chemistry I**

  **Prerequisites:**
  Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

  **Credits:**
  3.00

  **Description:**
  Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

- **CHEM-L111 General Chemistry Laboratory I**

  **Prerequisites:**
  MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

  **Credits:**
  1.00

  **Description:**
  Introduces the basic principles of chemistry through “discovery” laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

- **CHEM-112 General Chemistry II**

  **Prerequisites:**
  CHEM 111/L111; CHEM-L112 must be taken concurrently. MATH 104 placement or higher.
## Credits:
3.00

## Description:
This course is a continuation of General Chemistry I. Fundamental principles of chemistry are discussed. Introduces thermochemistry, gases, solution chemistry, chemical kinetics, chemical equilibrium, acid-base systems, and thermodynamics.

**Prerequisites:**
CHEM-112 and CHEM-L112. Must be taken concurrently with CHEM 211.

**Credits:**
1.00

**Description:**
Introduces synthetic organic chemistry techniques. Includes melting point determination, distillation, crystallization, extraction, chromatographic separations, and infrared spectroscopy. Discusses experimental design within the context of green organic chemistry.

---

**CHEM-212 Organic Chemistry II**

**Prerequisites:**
CHEM 211 and CHEM L211. Must take CHEM-L212 concurrently.

**Credits:**
3.00

**Description:**
Builds on the core competencies acquired in Organic Chemistry I. Includes detailed mechanistic discussions of substitution, elimination, and addition reactions. Emphasizes organic synthesis, structure determination, and spectroscopy.

---

**CHEM-L212 Organic Chemistry Laboratory II**

**Prerequisites:**
CHEM-211 and CHEM-L211. Must be take CHEM-212 concurrently.

**Credits:**
1.00

**Description:**
Builds on the core competencies acquired in Organic Chemistry Laboratory I. Emphasizes the characterization of organic molecules via nuclear magnetic resonance spectroscopy. Discusses experimental design within the context of green organic chemistry.
Math Requirement (1 course, 4 credits)

Choose one of the following Mathematics courses:

- **MATH-134 Calculus for Management & Social Sciences**

  **Prerequisites:**
  MATH-104, MATH-121 or MATH level 4

  **Credits:**
  4.00

  **Description:**
  A one-semester introduction to differential and integral calculus. Theory is presented informally and topics and techniques are limited to polynomials, rational functions, logarithmic and exponential functions. Topics include a review of precalculus, limits and continuity, derivatives, differentiation rules, applications of derivatives to graphing, minima/maxima, applications of the derivative, marginal analysis, differential equations of growth and decay, anti-derivatives, the definite integral, the Fundamental Theorem of Calculus, and area measurements. This course cannot be used to satisfy core or complementary requirements by students majoring in chemistry, computer science, engineering, mathematics, or physics. Several sections offered each semester.

or a higher level Mathematics course

Physics Requirement (2 courses and corresponding laboratories, 8 credits)

Choose one of the following sequences:

- **PHYS-111 College Physics I**

  **Prerequisites:**
  Take MATH-121 or MATH-134 or MATH-165 or permission of Physics department chair; PHYS-L111 taken concurrently
**Credits:**
3.00

**Description:**
Introduction to the fundamental principles of physics. Study of kinematics, vectors, Newton's laws, rotations, rigid body statics and dynamics, energy and work, momentum, heat and thermodynamics, kinetic theory. The laboratory consists of experiments to illustrate the basic concepts studied in the course.

---

OR

- **PHYS-151 University Physics I**

**Prerequisites:**
MATH-121 or higher (previously or concurrently) and PHYS L151 concurrently

**Credits:**
3.00

**Description:**
PHYS 151 is the first of three courses (PHYS 151, 152, 153) that comprise the calculus based introductory physics sequence at Suffolk University intended for students majoring in the physical sciences, engineering and mathematics. This course aims to teach basic techniques in physics that fall under the topic of classical mechanics and their application in understanding the natural world. Specific topics include the study of vectors, Newton’s laws, rotations, rigid body statics and dynamics, fluid mechanics, simple harmonic motion, mechanical waves, sound and hearing. The student will learn how to analyze physical situations by using simple models, and also how to solve those models and derive useful conclusions from them. This course will show students how experimental results and mathematical representations are combined to create testable scientific theories, and how the
complexities of most real-life physical situations can be reduced to simple problems by identifying the essential physical features and ignoring the rest. The student will learn to distinguish the scientific approach to physical situations from other ways of looking at them, for example, artistic, humanistic, and business.

- **PHYS-L151 University Physics Lab I**

  **Prerequisites:**
  MATH 121 or higher (previously or concurrently) PHYS 151 concurrently

  **Credits:**
  1.00

  **Description:**
  The laboratory consists of experiments to illustrate the basic concepts studied in the course: measurements, propagation of errors, vectors, Newton's laws, work and energy, momentum, rotations, oscillations, simple harmonic motion, fluid. Knowledge of algebra, trigonometry, differentiation and integration required.

- **PHYS-152 University Physics II**

  **Prerequisites:**
  PHYS-151 and PHYS-L151. Must be taken concurrently with PHYS-L152.

  **Credits:**
  3.00

  **Description:**
  This calculus based course begins with topics in kinetic theory and the laws of thermodynamics. It then covers electric charge and field, Gauss' law, electrical potential and capacitance, electric currents and DC circuits. Next magnetism, electromagnetic induction, Faraday's law and AC circuits are discussed. This is followed by Maxwell's equations, electromagnetic waves, and properties of light.

- **PHYS-L152 University Physics Lab II**

  **Prerequisites:**
  PHYS 151 and L151 and PHYS 152 must be taken concurrently
Credits:  
1.00

Description:  
The laboratory consists of experiments to illustrate the basic concepts studied in the course: heat, gas laws, electric forces, field, and potential, DC and AC circuits, magnetic field, electromagnetic induction, Faraday’s law, optics. Calculus, algebra, trigonometry are required. Error propagation, use of Excel, laboratory notebooks, and formal reports required.

Divisional Requirements (3 courses, 11-12 credits)

Molecular/Cellular Biology Requirement (1 course, 4 credits)  
Choose one of the following and its corresponding laboratory where applicable from the Molecular/Cellular division:

- BIO-262 Principles of Cell Culture  
Prerequisites:  
BIO 111, L111 and BIO 114, L114 and CHEM 111, L111

Credits:  
4.00

Description:  
The course is designed as an application base educational experience that will allow students to learn the standard techniques associated with successful cell culture. As such, students are responsible for the maintenance, propagation, isolation, and preservation of their cells. A number of cell types and experimental manipulations of the cultures are investigated throughout the semester.

- BIO-285 Microbiology  
Prerequisites:  
BIO-111 and BIO-L111; BIO-L285 concurrently;
Credits:
3.00

Description:
Viruses and bacteria are surveyed in terms of their ecology, biochemistry, taxonomy, molecular biology and control.

— BIO-L285 Microbiology Laboratory
Prerequisites:
BIO 111/L111; BIO 285 concurrently;

Credits:
1.00

Description:
Introduction to microbiological techniques and their applications to health, research and industry.

— BIO-360 Cancer Biology
Prerequisites:
BIO-111, BIO-L111, BIO-114, BIO-L114, BIO-274, and BIO-L274

Credits:
4.00

Description:
An examination of molecular and cellular mechanisms that lead to the development of cancer. Factors contributing to tumorigenesis, angiogenesis, and metastasis will be discussed; these factors, oncogenes, tumor suppressor genes, and signal transduction networks. In addition, an investigation of current strategies for cancer prevention and treatment will be considered.

— BIO-377 Immunology
Prerequisites:
Take BIO-274
Credits: 4.00

Description:
The concept of immunity, response to infection, structure of the immune system, biochemistry of immunoglobins, antigen-antibody interactions, allergy, immunological injury, lymphocyte subpopulations and cellular immunity, tolerance suppression and enhancement. Taught alternate/even years.

- **BIO-385 Advanced Microbiology**

Prerequisites:
BIO-274 and BIO-L274 or BIO-285 and BIO-L285;

Credits: 4.00

Description:
The molecular mechanisms of host-microbe interactions and the epidemiology and public health aspects of microorganisms are stressed. Also covered are current topics in microbiology including antimicrobial therapy and resistance, emerging pathogens and novel applications of microbiology. Experimental design and troubleshooting skills are developed, using contemporary microbiology and molecular biology laboratory techniques. Taught alternate/odd years.

- **BIO-403 Cell Biology**

Prerequisites:
BIO 111/L111; CHEM-211/L211; BIO-L403 concurrently;

Credits: 3.00

Description:
The study of cells, approached through examinations of biochemical mechanisms, the relation between the structure and function of biological molecules and organelles, and the regulation of normal and diseased cells.
- **BIO-L403 Cell Biology Lab**

**Prerequisites:**
BIO-111 and BIO-L11 and CHEM-211 and CHEM-L211. Must take BIO-403 concurrently.

**Credits:**
1.00

**Description:**
Examination of biological molecules and their role in cell function. Techniques used in these examinations will include enzymatic analyses, gel electrophoresis, immunologic identification, chromatography, and spectroscopy. Students are expected to develop their proficiency in the laboratory techniques used, to analyze their results in a quantitative manner, and to present their findings.

- **BIO-474 Molecular Genetics**

**Prerequisites:**
CHEM-311 or BIO-274 and BIO-L274 and BIO-L474 concurrently

**Credits:**
3.00

**Description:**
An examination of concepts and techniques of modern molecular biology. Topics include the structure and function of DNA, RNA, and proteins, the regulation of gene expression in prokaryotes and eukaryotes at transcriptional and post-transcriptional levels, genetic modification of organisms, and genome analysis. This course will incorporate readings and discussions of primary scientific literature. Spring semester.

- **BIO-L474 Molecular Genetics Lab**

**Prerequisites:**
Take CHEM-331 or BIO-274 and BIO-L274. BIO-474 must be taken concurrently.

**Credits:**
1.00

**Description:**
This upper level laboratory course will consist of a semester-long project in the form of a series of consecutive experiments involving the generation of a genetically modified organism and its subsequent molecular analysis. Techniques employed will include genetic screens, DNA isolation, restriction endonuclease analysis, transformation of bacteria, gel electrophoresis, gene reported assays, RNA isolation, reverse transcription, and quantitative PCR.

**Organismic Structure & Function Requirement (1 course, 4 credits)**

Choose one of the following and its corresponding laboratory where applicable from the Organismic Structure and Function division:

- **BIO-203 Anatomy and Physiology I**

  **Prerequisites:**
  BIO L203 MUST BE TAKEN CONCURRENTLY BIO 111, BIO L111.

  **Credits:**
  3.00

  **Description:**
  First part of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course emphasizes histology and physiology in the understanding of the integumentary, skeletal, muscular, and nervous systems. Medical terminology will be used.

- **BIO-L203 Anatomy & Physiology Lab I**

  **Prerequisites:**
  BIO 111/L111; Must take BIO-203 concurrently

  **Credits:**
  1.00

  **Description:**
  A study of the human skeletal system and a comparative look at other organ systems involving observation of anatomical models and dissection of mammalian specimens. Also includes microscopy and computer simulations of physiological
processes.

- **BIO-204 Anatomy and Physiology II**
  **Prerequisites:**
  BIO 203, BIO L203; BIO L204 must be taken concurrently;

  **Credits:**
  3.00

  **Description:**
  Conclusion of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course investigates the endocrine, circulatory, respiratory, digestive, urinary, and reproductive systems as well as the physiology of immune responses, nutrition, and acid-base balance. Medical terminology will be used.

- **BIO-L204 Anatomy & Physiology Lab II**
  **Prerequisites:**
  BIO 203/L203 and BIO 204 must be taken concurrently;

  **Credits:**
  1.00

  **Description:**
  A study of the human viscera using anatomical models and dissection of mammalian specimens. Also includes microscopy of tissues and physiological experiments.

- **BIO-225 Plant Biology**
  **Prerequisites:**
  Bio 111, L111 and Bio 114, L114; Must be taken concurrently with L225.

  **Credits:**
  3.00

  **Description:**
Course introduces students to the anatomy, physiology, systematics, ecology, and economic uses of all major groups of plants. Aspects of the biology of nonvascular, non-seed, gymnosperm, and angiosperm plants are explored. An overview of Kingdom Fungi is also covered. Each student is required to do a 10-15 minute presentation to the class highlighting the economic use of a group of plants assigned by the instructor. Normally offered Spring semester.

**BIO-L225 Plant Biology Laboratory**

**Prerequisites:**
BIO 111/L111 and BIO 114/L114; BIO 225 concurrently;

**Credits:**
1.00

**Description:**
Lab exercises focus on plant anatomy, physiology, and systematics. Instruction in the identification of major plant families and fungal types is covered. Trips to a Boston area herbarium and botanical garden are required.

**BIO-233 Human Nutrition**

**Prerequisites:**
BIO 111/L111 and BIO 114/L114;

**Credits:**
4.00

**Description:**
This interactive introduction to nutrition explores the science of human nutrition and further reviews concepts of how nutrition can promote health and well being. The course will review specific nutrient needs and functions, nutrient digestion, and the role of diet in well being and in the presence of chronic disease. Weekly course work encourages scientific literacy and fosters critical evaluation of nutrition in the news and in social media.

**BIO-304 Comparative Animal Physiology**

**Prerequisites:**
BIO-114 and BIO-L114. Must take BIO-L304 concurrently

Credits:
3.00

Description:
Mechanisms of physiological adaptations to environmental challenges are studied. Examples of gas exchange, osmoregulation, fluid transport, temperature regulation, nervous control, and movement are examined in various animal forms through class lecture and discussion, required readings, and external lectures. Spring semester.

- **BIO-L304 Comp Animal Physiology Lab**
  
  **Prerequisites:**
  BIO-114 and BIO-L114. Must take BIO-304 concurrently.

  **Credits:**
  1.00

  **Description:**
  Selected physiological processes and mechanisms or adaptation in invertebrate and vertebrate animals are examined by observation and controlled experiments.

- **BIO-475 Developmental Biology**
  
  **Prerequisites:**
  BIO-114, L114

  **Credits:**
  4.00

  **Description:**
  This course focuses on embryonic development in vertebrates. The conceptual focus on evolutionary developmental biology includes comparative developmental mechanisms and Epigenetic processes.
Diversity, the Environment, and Conservation Requirement (1 course, 3-4 credits)

Choose one of the following and its corresponding laboratory where applicable from the Diversity, the Environment, and Conservation division:

- **BIO-222 Field Botany**
  **Prerequisites:**
  BIO 111 and BIO-L111. This course will fulfill the Expanded Classroom Requirement.

  **Credits:**
  4.00

  **Description:**
  A three-week camping excursion, during which common tracheotypes, bryophytes, algae, and other photosynthetic organisms characteristic of various habits in Maine will be identified. Emphasis will be on plant ecology including species interactions and habitat requirements. Vertical zonation in mountains, lakes and intertidal areas will be a point of focus. Participants will camp for one week at each of three sites: Baxter State Park, Central Maine (near Augusta), and on Cobscook Bay. Travel will be by van(s) and hiking (up to ten miles a day) over difficult terrain. Sleeping bags and pads required (tents provided). Additional fees: Camping and food est. $525.00. ECR. The three-week camping excursion typically runs from late May (after tradition Spring course finals are over) into June. Taught yearly.

- **BIO-240 Introduction to Marine Mammals**
  **Prerequisites:**
  BIO-111, BIO-L111, BIO-114, and BIO-L114

  **Credits:**
  4.00

  **Description:**
  This course explores the biology and natural history of marine mammals, including cetaceans, pinnipeds, and sirenians, with a particular focus on species endemic to the North Atlantic. Topics include evolution, anatomy, physiology, behavior, ecology, field identification, the history of whaling and sealing, and contemporary management and conservation issues. Hands-on activities may include the dissection of a small marine mammal and a whale watch in Massachusetts Bay.
— BIO-254 Marine Biology
**Prerequisites:**
BIO-111/L111 or BIO-114/L114 or Instructor's consent; BIO-L254 concurrently;

**Credits:**
3.00

**Description:**
Introduction to the marine environment, its organisms and their specific adaptations. Emphasis on marine and estuarine ecology, intertidal habits, trophic relations, and physiology. Human impacts on the sea: fisheries, mariculture, pollution, introduced species, climate change and seawater acidification, and law of the sea. Taught yearly each fall.

— BIO-L254 Marine Biology Lab
**Prerequisites:**
BIO-111/L111 or BIO-114/L114 or Instructor's consent; BIO-254 concurrently;

**Credits:**
1.00

**Description:**
Field trips to local marine environments, museums, and aquaria; field and laboratory study and observations of live, preserved, and models of marine organisms.

— BIO-315 Animal Behavior
**Prerequisites:**
BIO-114/L114

**Credits:**
4.00

**Description:**
Surveys animal behavior in a range of species (invertebrates, birds, fish, mammals including humans) to assess similarities and differences in the evolution of behaviors and their physiological mechanisms by which individual organisms and species adapt to their environments. Topics include: predator evasion; mating systems; parental care; social behavior; and learning.

---

**BIO-337 Evolution**

**Prerequisites:**
Take BIO-111 BIO-L111 BIO-114 BIO-L114. BIO 274 recommended.

**Credits:**
4.00

**Description:**
A survey of evolutionary theory, exploring processes such as the genetic sources of variation, natural and sexual selection, and evolutionary developmental biology. Using phylogenetic systematics and other tools, we will demonstrate how these mechanisms result in the visible patterns of evolution. This is a reading-and-writing intensive course centered on close reading of Origin of the Species and discussion of recent peer-reviewed literature about evolution.

---

**BIO-343 Biodiversity & Conservation Biology**

**Prerequisites:**
BIO-114 and BIO-L114

**Credits:**
4.00

**Description:**
This course covers a broad spectrum of aspects of biodiversity and conservation by examining key elements ranging from global patterns in the distribution of life on our planet to the effects our human population is causing on those patterns. Examples from marine and terrestrial animals and plants are used to convey current ideas with a focus on the importance of global biodiversity, and the design of management programs for the conservation of species and ecosystems. 4-credit
- **BIO-345 The Biology of Vector Borne Diseases**
  
  **Prerequisites:**
  BIO-114/L114;

  **Credits:**
  3.00

  **Description:**
  A survey of the occurrence, life history and pathogenicity of the most important arthropod-borne, human diseases both internationally (malaria, dengue, plague, trypanosomiasis, yellow fever, etc.) and within the United States (Lyme disease, EEE, West Nile Virus, and others). Demographic and environmental factors leading to the re-emergence and spread of these diseases will be considered.

- **BIO-357 Biology of Fishes**
  
  **Prerequisites:**
  BIO 114/L114, and Junior standing. Requires permission from Marine Sciences Coordinator.

  **Credits:**
  3.00

  **Description:**
  The evolution, systematics, anatomy, physiology and behavior of freshwater, marine and anadromous fishes from temperate to tropical environments. The interactions of fish in their environments, including predator-prey relationships, host-symbiont interactions, and fish as herbivores. Taken with permission from the Marine Science Consortium Coordinator. [This is a Marine Science Consortium Course and enrollment is limited] Evenings only: off campus

- **BIO-359 Biology of Whales**
  
  **Prerequisites:**
  BIO-111, BIO-L111, BIO-114, BIO-L114, and 2 BIO courses at the 200 level or above. Requires permission from Marine Sciences Coordinator.

  **Credits:**
  3.00
**Description:**
This course provides a comprehensive review of the biology, ecology, and management of cetaceans. A thorough grounding in cetacean mammalogy and population biology will prepare students to understand conservation problems presented as case histories. Students will also complete an independent research paper on a topic related to cetacean biology. Hands-on activities may include the dissection of a small cetacean and a shore-based whale watch in Cape Cod Bay. This course is part of the Marine Studies Consortium and will be held at the New England Aquarium. Taken with permission from the Marine Science Consortium Coordinator. [This is a Marine Science Consortium Course and enrollment is limited]

**Electives (3 courses, 12 credits)**
Choose three Biology course electives and their corresponding laboratories where applicable. Any of the courses listed above may be taken as an elective if another course is taken to fulfill the division requirement. If a student chooses one of the concentrations, the concentration requirements will fulfill these elective courses.

Additional elective options are:

- **BIO-273 Biostatistics**
  **Prerequisites:**
  BIO 111/L111
  **Credits:**
  4.00
  **Description:**
  Introduction to the statistical methods used to evaluate biological problems. Sampling, probability, confidence intervals, hypothesis tests, experimental design, analysis of variance, regression, and correlation are some of the topics offered. Software for data handling, graphics, and analysis will be used.

- **BIO-503 Biology Internship**
  **Prerequisites:**
  BIO111/BIOL111, BIO114/BIOL114. BIO274/BIOL274 may be taken as a corequisite
**Credits:**
4.00

**Description:**
Biology Internship: This course provides students with credit for an unpaid internship completed during the semester when credit is earned. Students must secure an approved internship and provide documentation from the internship's overseer to a full time faculty member sponsor in order to register for the course. The internship must involve participation in research and / or patient care. Students or their overseers will be required to submit monthly records of internship hours and provide the faculty sponsor with a written summary of internship experiences and accomplishments by the last week of classes. Only one internship may be used as a biology elective. This course is available for variable credit. Prerequisites: An Internship for Credit form must be submitted to the department chair Credits: 1-4

- **BIO-510 Independent Study**
  **Prerequisites:**
  An independent study form must be submitted to the CAS Dean’s Office.

  **Credits:**
  1.00- 5.00

  **Description:**
  Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A paper and oral report are required. Only ONE independent study may be used toward biology electives.

- **BIO-H510 Honors Biology Independent Study**
  **Credits:**
  1.00- 4.00

  **Description:**
  Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A paper and oral report are required. Thesis work is required to involve original research or an in-depth analysis.
- **CHEM-331 Biochemistry I**
  
  **Prerequisites:**
  CHEM 212/L212 or permission of instructor. CHEM L331 must be taken concurrently.
  
  **Credits:**
  3.00
  
  **Description:**
  Explores the foundations of biochemistry, including the structure, organization and behavior of proteins, carbohydrates, lipids, and nucleic acids. Topics include enzyme catalysis, kinetics, and inhibition as well as protein regulation and membrane structure. Introduces the use of biochemical literature and bioinformatics techniques.

- **CHEM-L331 Biochemical Techniques Lab**
  
  **Prerequisites:**
  CHEM 212/L212 or permission of instructor. CHEM 331 must be taken concurrently.
  
  **Credits:**
  1.00
  
  **Description:**
  Laboratory course introducing biochemical techniques. Includes buffer preparation, PCR, purification of DNA and proteins, agarose and polyacrylamide gel electrophoresis, protein quantitation and detection, and enzyme kinetic assays.

- **SCI-251 Intro to Coastal Geology**
  
  **Prerequisites:**
  Intro Math
  
  **Credits:**
  4.00
  
  **Description:**
  Coastal environments will be analyzed with an emphasis on the important environmental characteristics of these areas. Management and environmental problems within the coastal and offshore areas such as beach erosion, beach
access, and oil spills will be considered. One required field trip.

- **SCI-410 Marine Biogeochemistry**

**Prerequisites:**
Take CHEM-111, CHEM-L111, CHEM-112, and CHEM-L112

**Credits:**
4.00

**Description:**
This course is designed to identify the ways that scientific knowledge can be used to resolve environmental problems, particularly the ocean’s role in the biogeochemical cycling of selected elements and the impacts of humans on the cycling of these elements. Sample topics include the chemical composition of seawater from the perspectives of elemental speciation and the impacts of solutes on water’s physical behavior; biogeochemical phenomena which control accumulation and preservation of marine sediments; marine chemistry of radioactive and stable isotopes; and how climate change and pollution impact the marine environment with mitigation strategies outlined.

**Note:** Transfer students wishing to major in Biology must meet the residency requirement plus complete senior seminar in Biology at Suffolk University with a minimum grade point average of 2.0.

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

**Biology Learning Goals and Objectives**

Learning goals and objectives reflect the educational outcomes achieved by students through the completion of this program. These transferable skills prepare Suffolk students for success in the workplace, in graduate school, and in their local and global communities.

| Understand the process of science. | • Design a scientific experiment with statistical foresight  
• Assess the ethics of a proposed study  
• Conduct an experiment following standard protocols  
• Recognize the importance of safety protocols  
• Culture, grow, or prepare specimens for study  
• Collect data via quantitative and qualitative observations and measurements  
• Interpret the results of an experiment |
| Know how science is communicated. | • Evaluate primary literature in biology  
• Interpret visual representations of data  
• Summarize the discoveries of scientific research |
| Know how to communicate scientific findings. | • Orally present findings to others in formal and informal settings  
• Construct a written document in a scientific style including proper citation of sources  
• Prepare visual representations of data  
• Access and utilize scientific databases |
| Know how to work collaboratively. | • Conduct an experiment or gather data from the field as part of a group  
• Participate in group discussions  
• Formulate hypotheses in conjunction with others  
• Record protocols and observations  
• Provide constructive feedback to group members  
• Accept feedback from group members |
<table>
<thead>
<tr>
<th><strong>Learning Goals</strong></th>
<th><strong>Learning Objectives</strong></th>
</tr>
</thead>
</table>
| Understand how genetic information is transmitted and regulated. | - Describe how information is transferred from DNA to RNA, and from RNA to protein  
- Explain some of the exceptions to the ‘central dogma’ described above  
- Describe how information in DNA is transmitted during cell division  
- Describe how cells maintain the integrity of their genetic information  
- Explain how information is passed from parent to offspring, by both Mendelian and non-Mendelian mechanisms  
- Explain how phenotypes and genotypes are related, including how this relationship is influenced by environmental factors.  
- Identify the levels at which gene expression can be regulated  
- Explain how transcription of genes is regulated  
- Explain how protein activity is regulated by intracellular and extracellular signaling molecules |
## Learning Goals

Understand that a structure’s physical and chemical characteristics influence its interactions with other structures and therefore its function.

Understand that energy can be changed from one form to another, and that chemical energy can be used by cells to drive energetically demanding activities necessary for life.

## Learning Objectives

- Identify the chemical structures and physical characteristics of the molecules of life, including carbohydrates, lipids, nucleic acids and amino acids
- Explain how the structure of DNA is important for its information storage and transmission functions
- Explain how protein structure is influenced by the chemical characteristics of amino acids and the cellular environment
- Explain how protein function is related to structure, and how function can be regulated through reversible alterations of structure e. g. phosphorylation
- Explain how membrane structure allows for compartmentalization in both prokaryotes and eukaryotes, and how this compartmentalization contributes to cellular functions
- Explain how the structure of a cell – its shape, and polarity—relates to its function

- Compare and contrast biologically relevant forms of energy (e. g. kinetic energy vs. potential energy, energy stored in bonds vs. potential energy of concentration gradients)
- Identify biomolecules that are commonly used to store and transfer energy in cells
- Explain how enzymes alter the energetics of biochemical reactions
- Differentiate between catabolic pathways that break down molecules in cells, and anabolic pathways that form biological molecules
- Describe the basic mechanisms of cellular metabolic function, including cellular respiration and photosynthesis
<table>
<thead>
<tr>
<th><strong>Learning Goals</strong></th>
<th><strong>Learning Objectives</strong></th>
</tr>
</thead>
</table>
| Understand the process of, and evidence for, evolution. | • Distinguish between the mechanisms of evolutionary change  
• Evaluate how mechanisms of evolution lead to speciation and the diversity of life  
• Examine how the classification of organisms reflects their evolutionary history  
• Assess how stochastic events and abiotic factors have influenced the history of life on Earth  
• Explain the connection between genetic inheritance and evolution |
| Understand the basic principles of ecology. | • Evaluate the importance of species interactions and trophic relationships for shaping population growth and community structure  
• Identify and assess through field exercises several measures that describe an ecosystem (e.g., biodiversity, productivity, trophic dynamics)  
• Explain how plant and animal communities change through time (e.g., succession) following natural environmental disturbances  
• Assess how human activities affect the distribution and abundance of species and how ecosystems function |
| Understand organismal structure and function. | • Assess the environmental challenges faced by organisms and the adaptations they have to address them  
• Evaluate the structural, physiological, and / or biochemical adaptations of organisms  
• Appraise how the structure of an adaption and / or molecule reflects its function |
Learning Goals

Understand how to pursue a career in the biological sciences.

Learning Objectives

- Appraise your technical and interpersonal skills and qualities
- Effectively search for and locate pertinent internships and jobs
- Assess your qualifications in relation to an internship and / or job description
- Prepare job application materials including a resume and cover letter
- Conduct a mock interview

Biology Concentrations Archive 2018-2019

Biotechnology Concentration Requirements: 19 courses and corresponding laboratories where applicable, 73 credits

The concentration in Biotechnology focuses on molecular and cellular principles in biology. Students are encouraged to seek relevant industry experience during the summer between the sophomore and junior year. Students should consult with the concentration coordinator early in their academic career to determine available placements and to obtain counseling regarding appropriate courses for the concentration.

The concentration requires the completion of all Biology major core requirements (listed in the Major Requirements tab), as well as the following:

- **BIO-403 Cell Biology**
  
  **Prerequisites:**
  BIO 111/L111; CHEM-211/L211; BIO-L403 concurrently;

  **Credits:**
  3.00

  **Description:**
  The study of cells, approached through examinations of biochemical mechanisms, the relation between the structure and function of biological molecules and organelles, and the regulation of normal and diseased cells.
- **BIO-L403 Cell Biology Lab**

**Prerequisites:**
BIO-111 and BIO-L11 and CHEM-211 and CHEM-L211. Must take BIO-403 concurrently.

**Credits:**
1.00

**Description:**
Examination of biological molecules and their role in cell function. Techniques used in these examinations will include enzymatic analyses, gel electrophoresis, immunologic identification, chromatography, and spectroscopy. Students are expected to develop their proficiency in the laboratory techniques used, to analyze their results in a quantitative manner, and to present their findings.

- **BIO-474 Molecular Genetics**

**Prerequisites:**
CHEM-311 or BIO-274 and BIO-L274 and BIO-L474 concurrently

**Credits:**
3.00

**Description:**
An examination of concepts and techniques of modern molecular biology. Topics include the structure and function of DNA, RNA, and proteins, the regulation of gene expression in prokaryotes and eukaryotes at transcriptional and post-transcriptional levels, genetic modification of organisms, and genome analysis. This course will incorporate readings and discussions of primary scientific literature. Spring semester.

- **BIO-L474 Molecular Genetics Lab**

**Prerequisites:**
Take CHEM-331 or BIO-274 and BIO-L274. BIO-474 must be taken concurrently.

**Credits:**
1.00
Description:
This upper level laboratory course will consist of a semester-long project in the form of a series of consecutive experiments involving the generation of a genetically modified organism and its subsequent molecular analysis. Techniques employed will include genetic screens, DNA isolation, restriction endonuclease analysis, transformation of bacteria, gel electrophoresis, gene reported assays, RNA isolation, reverse transcription, and quantitative PCR.

Choose one Organismic Structure and Function Division course (options listed in the Major Requirements section)

Choose one Diversity, Environment, and Conservation Division course (options listed in the Major Requirements section)

Choose two of the following Biology electives:

- **BIO-262 Principles of Cell Culture**
  
  **Prerequisites:**
  BIO 111, L111 and BIO 114, L114 and CHEM 111, L111

  **Credits:**
  4.00

  **Description:**
  The course is designed as an application base educational experience that will allow students to learn the standard techniques associated with successful cell culture. As such, students are responsible for the maintenance, propagation, isolation, and preservation of their cells. A number of cell types and experimental manipulations of the cultures are investigated throughout the semester.

- **BIO-285 Microbiology**
  
  **Prerequisites:**
  BIO-111 and BIO-L111; BIO-L285 concurrently;

  **Credits:**
Description:
Viruses and bacteria are surveyed in terms of their ecology, biochemistry, taxonomy, molecular biology and control.

- BIO-L285 Microbiology Laboratory
  Prerequisites:
  BIO 111/L111; BIO 285 concurrently;

  Credits:
  1.00

  Description:
  Introduction to microbiological techniques and their applications to health, research and industry.

- BIO-377 Immunology
  Prerequisites:
  Take BIO-274

  Credits:
  4.00

  Description:
  The concept of immunity, response to infection, structure of the immune system, biochemistry of immunoglobins, antigen-antibody interactions, allergy, immunological injury, lymphocyte subpopulations and cellular immunity, tolerance suppression and enhancement. Taught alternate/even years.

- BIO-385 Advanced Microbiology
  Prerequisites:
  BIO-274 and BIO-L274 or BIO-285 and BIO-L285;

  Credits:
  4.00
Description:
The molecular mechanisms of host-microbe interactions and the epidemiology and public health aspects of microorganisms are stressed. Also covered are current topics in microbiology including antimicrobial therapy and resistance, emerging pathogens and novel applications of microbiology. Experimental design and troubleshooting skills are developed, using contemporary microbiology and molecular biology laboratory techniques. Taught alternate/odd years.

- **BIO-510 Independent Study**

Prerequisites:
An independent study form must be submitted to the CAS Dean’s Office.

Credits:
1.00- 5.00

Description:
Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A paper and oral report are required. Only ONE independent study may be used toward biology electives.

- **CHEM-331 Biochemistry I**

Prerequisites:
CHEM 212/L212 or permission of instructor. CHEM L331 must be taken concurrently.

Credits:
3.00

Description:
Explores the foundations of biochemistry, including the structure, organization and behavior of proteins, carbohydrates, lipids, and nucleic acids. Topics include enzyme catalysis, kinetics, and inhibition as well as protein regulation and membrane structure. Introduces the use of biochemical literature and bioinformatics techniques.
CHEM 212/L212 or permission of instructor. CHEM 331 must be taken concurrently

**Credits:**
1.00

**Description:**
Laboratory course introducing biochemical techniques. Includes buffer preparation, PCR, purification of DNA and proteins, agarose and polyacrylamide gel electrophoresis, protein quantitation and detection, and enzyme kinetic assays.

**CHEM-332 Biochemistry II**

**Prerequisites:**
CHEM 331 and CHEM-L332 concurrently

**Credits:**
3.00

**Description:**
Explores the principles of bioenergetics and metabolism of biomolecules. Includes intermediary metabolism of carbohydrates, lipids, amino acids, and oxidative phosphorylation. Additional topics include signal transduction and the regulation and integration of metabolism.

Please note that all courses must be taken with the corresponding laboratory class where applicable.

**Marine Science Concentration Requirements: 19 courses and corresponding laboratories where applicable, 73 credits**

The Marine Science concentration introduces students to marine studies while maintaining the rigor and career flexibility of a traditional Biology major. Our aim is to prepare students to make career decisions based on real familiarity with marine studies. The distinguishing feature of the concentration is the completion of three courses and associated labs in the field of marine science.

**SCI-410 Marine Biogeochemistry**

**Prerequisites:**
Take CHEM-111, CHEM-L111, CHEM-112, and CHEM-L112

Credits: 4.00

Description:
This course is designed to identify the ways that scientific knowledge can be used to resolve environmental problems, particularly the ocean's role in the biogeochemical cycling of selected elements and the impacts of humans on the cycling of these elements. Sample topics include the chemical composition of seawater from the perspectives of elemental speciation and the impacts of solutes on water's physical behavior; biogeochemical phenomena which control accumulation and preservation of marine sediments; marine chemistry of radioactive and stable isotopes; and how climate change and pollution impact the marine environment with mitigation strategies outlined.

The concentration requires the completion of all Biology core requirements AND all Biology divisional requirements (listed in the Major Requirements tab), as well as the following electives:

- BIO-254 Marine Biology

Prerequisites: BIO-111/L111 or BIO-114/L114 or Instructor’s consent; BIO-L254 concurrently;

Credits: 3.00

Description: Introduction to the marine environment, its organisms and their specific adaptations. Emphasis on marine and estuarine ecology, intertidal habits, trophic relations, and physiology. Human impacts on the sea: fisheries, mariculture, pollution, introduced species, climate change and seawater acidification, and law of the sea. Taught yearly each fall.

- BIO-L254 Marine Biology Lab

Prerequisites:
BIO-111/L111 or BIO-114/L114 or Instructor’s consent; BIO-254 concurrently;

**Credits:**
1.00

**Description:**
Field trips to local marine environments, museums, and aquaria; field and laboratory study and observations of live, preserved, and models of marine organisms.

Choose two of the following courses:

- **BIO-240 Introduction to Marine Mammals**

  **Prerequisites:**
  BIO-111, BIO-L111, BIO-114, and BIO-L114

  **Credits:**
  4.00

  **Description:**
  This course explores the biology and natural history of marine mammals, including cetaceans, pinnipeds, and sirenians, with a particular focus on species endemic to the North Atlantic. Topics include evolution, anatomy, physiology, behavior, ecology, field identification, the history of whaling and sealing, and contemporary management and conservation issues. Hands-on activities may include the dissection of a small marine mammal and a whale watch in Massachusetts Bay.

- **BIO-343 Biodiversity & Conservation Biology**

  **Prerequisites:**
  BIO-114 and BIO-L114

  **Credits:**
  4.00

  **Description:**
This course covers a broad spectrum of aspects of biodiversity and conservation by examining key elements ranging from global patterns in the distribution of life on our planet to the effects our human population is causing on those patterns. Examples from marine and terrestrial animals and plants are used to convey current ideas with a focus on the importance of global biodiversity, and the design of management programs for the conservation of species and ecosystems. 4-credit

— **BIO-357 Biology of Fishes**

**Prerequisites:**
BIO 114/L114, and Junior standing. Requires permission from Marine Sciences Coordinator.

**Credits:**
3.00

**Description:**
The evolution, systematics, anatomy, physiology and behavior of freshwater, marine and anadromous fishes from temperate to tropical environments. The interactions of fish in their environments, including predator-prey relationships, host-symbiont interactions, and fish as herbivores. Taken with permission from the Marine Science Consortium Coordinator. [This is a Marine Science Consortium Course and enrollment is limited] Evenings only: off campus

— **BIO-359 Biology of Whales**

**Prerequisites:**
BIO-111, BIO-L111, BIO-114, BIO-L114, and 2 BIO courses at the 200 level or above. Requires permission from Marine Sciences Coordinator.

**Credits:**
3.00

**Description:**
This course provides a comprehensive review of the biology, ecology, and management of cetaceans. A thorough grounding in cetacean mammalogy and population biology will prepare students to understand conservation problems presented as case histories. Students will also complete an independent research paper on a topic related to cetacean biology. Hands-on activities may include the
dissection of a small cetacean and a shore-based whale watch in Cape Cod Bay. This course is part of the Marine Studies Consortium and will be held at the New England Aquarium. Taken with permission from the Marine Science Consortium Coordinator. [This is a Marine Science Consortium Course and enrollment is limited]

- **SCI-251 Intro to Coastal Geology**
  
  **Prerequisites:**
  Intro Math

  **Credits:**
  4.00

  **Description:**
  Coastal environments will be analyzed with an emphasis on the important environmental characteristics of these areas. Management and environmental problems within the coastal and offshore areas such as beach erosion, beach access, and oil spills will be considered. One required field trip.

- **SCI-410 Marine Biogeochemistry**
  
  **Prerequisites:**
  Take CHEM-111, CHEM-L111, CHEM-112, and CHEM-L112

  **Credits:**
  4.00

  **Description:**
  This course is designed to identify the ways that scientific knowledge can be used to resolve environmental problems, particularly the ocean's role in the biogeochemical cycling of selected elements and the impacts of humans on the cycling of these elements. Sample topics include the chemical composition of seawater from the perspectives of elemental speciation and the impacts of solutes on water's physical behavior; biogeochemical phenomena which control accumulation and preservation of marine sediments; marine chemistry of radioactive and stable isotopes; and how climate change and pollution impact the marine environment with mitigation strategies outlined.
Please note that all courses must be taken with the corresponding laboratory class where applicable.

**Health Careers Concentration Requirements: 19 courses and corresponding laboratories where applicable, 73 credits**

The objective of the Health Careers Concentration is to prepare students for graduate programs in fields such as allopathic or osteopathic medicine, physician assistant, dentistry, veterinary medicine, nurse practitioner, physical therapy, pharmacy, and other related fields. The Health Careers concentration is focused on assisting students in gaining acceptance to graduate clinical training but it is not intended to be bachelor's-level preparation for a specific clinical field. This concentration is intended to be general enough to allow students to tailor their coursework with their major advisor while still getting a solid grounding in the discipline.

**The concentration requires the completion of all Biology major core requirements (listed in the Major Requirements tab), as well as the following:**

<tr>
<td>BIO-203 Anatomy and Physiology I</td>
<td></td>
</tr>
</tbody>
</table>
Prerequisites:
BIO L203 MUST BE TAKEN CONCURRENTLY BIO 111, BIO L111.

Credits:
3.00

Description:
First part of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course emphasizes histology and physiology in the understanding of the integumentary, skeletal, muscular, and nervous systems. Medical terminology will be used.

---

- BIO-L203 Anatomy & Physiology Lab I

Prerequisites:
BIO 111/L111; Must take BIO-203 concurrently

Credits:
1.00

Description:
A study of the human skeletal system and a comparative look at other organ systems involving observation of anatomical models and dissection of mammalian specimens. Also includes microscopy and computer simulations of physiological processes.

---

- BIO-304 Comparative Animal Physiology

Prerequisites:
BIO-114 and BIO-L114. Must take BIO-L304 concurrently

Credits:
3.00

Description:
Mechanisms of physiological adaptations to environmental challenges are studied. Examples of gas exchange, osmoregulation, fluid transport, temperature regulation, nervous control, and movement are examined in various animal forms through class lecture and discussion, required readings, and external lectures. Spring semester.
Choose one Diversity, Environment, and Conservation Division course (options listed in the Major Requirements section)

Choose three of the following Biology elective courses:

- **BIO-203 Anatomy and Physiology I**
  **Prerequisites:**
  BIO L203 MUST BE TAKEN CONCURRENTLY BIO 111, BIO L111.

  **Credits:**
  3.00

  **Description:**
  First part of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course emphasizes histology and physiology in the understanding of the integumentary, skeletal, muscular, and nervous systems. Medical terminology will be used.

- **BIO-L203 Anatomy & Physiology Lab I**
  **Prerequisites:**
  BIO 111/L111; Must take BIO-203 concurrently

  **Credits:**
  1.00

  **Description:**
  A study of the human skeletal system and a comparative look at other organ systems involving observation of anatomical models and dissection of mammalian specimens. Also includes microscopy and computer simulations of physiological processes.

- **BIO-204 Anatomy and Physiology II**
  **Prerequisites:**
  BIO 203, BIO L203; BIO L204 must be taken concurrently;
Credits: 
3.00

Description: 
Conclusion of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course investigates the endocrine, circulatory, respiratory, digestive, urinary, and reproductive systems as well as the physiology of immune responses, nutrition, and acid-base balance. Medical terminology will be used.

– BIO-L204 Anatomy & Physiology Lab II 
Prerequisites: 
BIO 203/L203 and BIO 204 must be taken concurrently;

Credits: 
1.00

Description: 
A study of the human viscera using anatomical models and dissection of mammalian specimens. Also includes microscopy of tissues and physiological experiments.

– BIO-233 Human Nutrition 
Prerequisites: 
BIO 111/L111 and BIO 114/L114;

Credits: 
4.00

Description: 
This interactive introduction to nutrition explores the science of human nutrition and further reviews concepts of how nutrition can promote health and well being. The course will review specific nutrient needs and functions, nutrient digestion, and the role of diet in well being and in the presence of chronic disease. Weekly course work encourages scientific literacy and fosters critical evaluation of nutrition in the news and in social media.
- **BIO-273 Biostatistics**  
  **Prerequisites:**  
  BIO 111/L111  

  **Credits:**  
  4.00  

  **Description:**  
  Introduction to the statistical methods used to evaluate biological problems. Sampling, probability, confidence intervals, hypothesis tests, experimental design, analysis of variance, regression, and correlation are some of the topics offered. Software for data handling, graphics, and analysis will be used.

- **BIO-304 Comparative Animal Physiology**  
  **Prerequisites:**  
  BIO-114 and BIO-L114. Must take BIO-L304 concurrently  

  **Credits:**  
  3.00  

  **Description:**  
  Mechanisms of physiological adaptations to environmental challenges are studied. Examples of gas exchange, osmoregulation, fluid transport, temperature regulation, nervous control, and movement are examined in various animal forms through class lecture and discussion, required readings, and external lectures. Spring semester.

- **BIO-360 Cancer Biology**  
  **Prerequisites:**  
  BIO-111, BIO-L111, BIO-114, BIO-L114, BIO-274, and BIO-L274  

  **Credits:**  
  4.00  

  **Description:**
An examination of molecular and cellular mechanisms that lead to the development of cancer. Factors contributing to tumorigenesis, angiogenesis, and metastasis will be discussed; these factors, oncogenes, tumor suppressor genes, and signal transduction networks. In addition, an investigation of current strategies for cancer prevention and treatment will be considered.

**- BIO-377 Immunology**

**Prerequisites:**
Take BIO-274

**Credits:**
4.00

**Description:**
The concept of immunity, response to infection, structure of the immune system, biochemistry of immunoglobins, antigen-antibody interactions, allergy, immunological injury, lymphocyte subpopulations and cellular immunity, tolerance suppression and enhancement. Taught alternate/even years.

**- BIO-510 Independent Study**

**Prerequisites:**
An independent study form must be submitted to the CAS Dean’s Office.

**Credits:**
1.00- 5.00

**Description:**
Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A paper and oral report are required. Only ONE independent study may be used toward biology electives.

**- CHEM-331 Biochemistry I**

**Prerequisites:**
CHEM 212/L212 or permission of instructor. CHEM L331 must be taken concurrently.

**Credits:**
3.00

**Description:**
Explores the foundations of biochemistry, including the structure, organization and behavior of proteins, carbohydrates, lipids, and nucleic acids. Topics include enzyme catalysis, kinetics, and inhibition as well as protein regulation and membrane structure. Introduces the use of biochemical literature and bioinformatics techniques.

- **CHEM-L331 Biochemical Techniques Lab**

**Prerequisites:**
CHEM 212/L212 or permission of instructor. CHEM 331 must be taken concurrently

**Credits:**
1.00

**Description:**
Laboratory course introducing biochemical techniques. Includes buffer preparation, PCR, purification of DNA and proteins, agarose and polyacrylamide gel electrophoresis, protein quantitation and detection, and enzyme kinetic assays.

Please note that all courses must be taken with the corresponding laboratory class where applicable.

**Biology Minor Requirements Archive 2018-2019**

**Minor Requirements:** 6 courses, 24 credits

**Core Requirements** (2 courses with corresponding laboratories, 8 credits)

- **BIO-111 Introduction to the Cell**

**Prerequisites:**
Must take BIO L111 concurrently
Credits: 3.00

Description:
Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

---

- **BIO-L111 Introduction to the Cell Laboratory**

Prerequisites:
Concurrently with BIO 111

Credits: 1.00

Description:
Sessions are designed to familiarize the student with biological molecules, and the techniques used in their study. The techniques covered include basic solution preparation, separation and quantification of molecules, enzyme catalysis, and cell isolation.

---

- **BIO-114 Organismal Biology**

Prerequisites:
Must take BIO L114 concurrently.

Credits: 3.00

Description:
Rigorous introduction to organismal biology emphasizing evolution, phylogenetics, form, and function. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.
Prerequisites:
Must take BIO 114 concurrently

Credits:
1.00

Description:
A series of laboratory experiences in evolution, diversity, anatomy and physiology.

Electives (4 courses with corresponding laboratories where applicable, 16 credits)
The following courses will NOT count toward a minor in Biology because they are non-major’s courses. Choose any Biology course except:

- BIO-105 Humans and the Evolutionary Perspective
Prerequisites:
Non Science Majors Only

Credits:
4.00

Description:
Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

- BIO-109 Plants and People
Prerequisites:
Non Science Majors Only.

Credits:
4.00
Description: This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.

- BIO-201 Biology’s Big Questions

Prerequisites: Non Science Majors Only.

Credits: 4.00

Description: This course seeks to answer five current questions from all levels of biology, from the subcellular to the ecosystem level. Topics will be discussed in the context of genetics, evolution, and ecology. We will focus on the process of doing science, including how scientists evaluate ideas and communicate their findings. Emphasis will be placed on topics in biology that impact daily life.

Residency Requirement Policy: In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

Minor Programs Policy: A student declaring a minor may use no more than two courses from a major to fulfill the requirements for the minor. No more than one course from one minor may count toward the fulfillment of a second minor. Students may not minor in a subject in which they are also completing a major. For more information, see the Minor Programs section of the CAS Degree Requirements page.
Honors Archive 2018-2019

Biology Honors Pathway

To complete requirements for honors in the major, a candidate must:

1. Graduate with an overall GPA of 3.5 or higher
2. Complete an independent project in BIO-H510 or BIO-H503 or an equivalent summer research experience that has been pre-approved by the departmental honors committee. Students must submit an application to the committee and their advisor(s), for pre-approval. For departmental honors, thesis work is required to involve original research or an in-depth analysis.
3. Complete BIO-H512
4. Write a thesis and give an oral presentation on completed research in BIO-H512
5. Publicly present research at either the Eastern New England Biology Conference or the Chemistry Talks
6. CAS Honors Program students only: Present work from your senior honors experience at the Honors Symposium or Pecha Kucha event

The departmental honors committee, along with the student's advisor(s), will determine whether the application and the final research project qualify for departmental honors.

Student Organizations

The Biology Department supports three student organizations: the Health Careers Club, the American Society of Molecular Biology and Biochemistry (ASBMB), and the Chi Kappa Chapter of the Beta Beta Beta National Biological Honor Society. These two organizations give biology students opportunities to work closely with faculty while engaging in research that benefits the department and the greater Suffolk community.

Beta Beta Beta Biological Honor Society

Beta Beta Beta is an honor and professional society primarily for students of the biological sciences. Its goals include promoting student research, publication, and exposure to current biological scholarship and career possibilities. Regular membership is offered to majors in the biological sciences who have completed at least one term of the sophomore year (including three Biology courses) with a 3.0 average in Biology and an overall average of 2.7. Associate membership is open to any interested undergraduate.
Biology Courses Archive 2018-2019

- BIO-105 Humans and the Evolutionary Perspective
  **Prerequisites:**
  Non Science Majors Only

  **Credits:**
  4.00

  **Description:**
  Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

- BIO-H105 Honors Humans and the Evolutionary Perspective
  **Prerequisites:**
  CAS Honors students only.

  **Credits:**
  4.00

  **Description:**
  Major topics include the scientific basis of evolution, the fossil history of vertebrates, evidence of evolution in the human body, and applying an evolutionary perspective to the social interactions and possible futures of humanity. Meets one of the non laboratory science requirements for the non-science major. This reading and writing intensive course is a non-laboratory science option for non-science majors. This course will not fulfill requirement for a major or a minor in Biology.

- BIO-109 Plants and People
  **Prerequisites:**
  Non Science Majors Only.
Credits:
4.00

Description:
This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. We will also touch on the synergistic role of fungus and plants in alcohol fermentation. This course fulfills the non-lab natural sciences requirement for BFA, BSJ, and BA degrees. Non-biology majors only.

- BIO-H109 Plants and People

Prerequisites:
Non Science Majors Only. Honors student or 3.3 GPA only.

Credits:
4.00

Description:
This course focuses on the ancient, intimate, and mutually beneficial relationship between humans and plants. We will discuss the basic anatomy, physiology, and genetic characteristics of flowering plants and how these characteristics have facilitated their use by humans. We will explore the impacts of a wide range of plants and their products on human society while considering the evolutionary changes that these plants have undergone through artificial selection. Non-biology majors only.

- BIO-111 Introduction to the Cell

Prerequisites:
Must take BIO L111 concurrently

Credits:
3.00

**Description:**
Explanation of key biological structures and reactions of the cell. This is an introductory course required of all biology majors and minors, and some non-biology science majors. This course is not recommended for the non-science student.

- BIO-203 Anatomy and Physiology I

Prerequisites:
BIO L203 MUST BE TAKEN CONCURRENTLY BIO 111, BIO L111.

Credits:
3.00

Description:
First part of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course emphasizes histology and physiology in the understanding of the integumentary, skeletal, muscular, and nervous systems. Medical terminology will be used.
- **BIO-L203 Anatomy & Physiology Lab I**

  **Prerequisites:**
  BIO 111/L111; Must take BIO-203 concurrently

  **Credits:**
  1.00

  **Description:**
  A study of the human skeletal system and a comparative look at other organ systems involving observation of anatomical models and dissection of mammalian specimens. Also includes microscopy and computer simulations of physiological processes.

- **BIO-204 Anatomy and Physiology II**

  **Prerequisites:**
  BIO 203, BIO L203; BIO L204 must be taken concurrently;

  **Credits:**
  3.00

  **Description:**
  Conclusion of a systematic survey of the structural and functional interrelations of the organ systems of the human body. This course investigates the endocrine, circulatory, respiratory, digestive, urinary, and reproductive systems as well as the physiology of immune responses, nutrition, and acid-base balance. Medical terminology will be used.

- **BIO-L204 Anatomy & Physiology Lab II**

  **Prerequisites:**
  BIO 203/L203 and BIO 204 must be taken concurrently;

  **Credits:**
  1.00

  **Description:**
A study of the human viscera using anatomical models and dissection of mammalian specimens. Also includes microscopy of tissues and physiological experiments.

---

**BIO-222 Field Botany**

**Prerequisites:**
BIO 111 and BIO-L111. This course will fulfill the Expanded Classroom Requirement.

**Credits:**
4.00

**Description:**
A three-week camping excursion, during which common tracheotypes, bryophytes, algae, and other photosynthetic organisms characteristic of various habits in Maine will be identified. Emphasis will be on plant ecology including species interactions and habitat requirements. Vertical zonation in mountains, lakes and intertidal areas will be a point of focus. Participants will camp for one week at each of three sites: Baxter State Park, Central Maine (near Augusta), and on Cobscook Bay. Travel will be by van(s) and hiking (up to ten miles a day) over difficult terrain. Sleeping bags and pads required (tents provided). Additional fees: Camping and food est. $525.00. ECR. The three-week camping excursion typically runs from late May (after tradition Spring course finals are over) into June. Taught yearly.

---

**BIO-225 Plant Biology**

**Prerequisites:**
Bio 111, L111 and Bio 114, L114; Must be taken concurrently with L225.

**Credits:**
3.00

**Description:**
Course introduces students to the anatomy, physiology, systematics, ecology, and economic uses of all major groups of plants. Aspects of the biology of nonvascular, non-seed, gymnosperm, and angiosperm plants are explored. An overview of Kingdom Fungi is also covered. Each student is required to do a 10-15 minute presentation to the class highlighting the economic use of a group of plants assigned by the instructor. Normally offered Spring semester.
- **BIO-L225 Plant Biology Laboratory**
  **Prerequisites:**
  BIO 111/L111 and BIO 114/L114; BIO 225 concurrently;

  **Credits:**
  1.00

  **Description:**
  Lab exercises focus on plant anatomy, physiology, and systematics. Instruction in the identification of major plant families and fungal types is covered. Trips to a Boston area herbarium and botanical garden are required.

- **BIO-233 Human Nutrition**
  **Prerequisites:**
  BIO 111/L111 and BIO 114/L114;

  **Credits:**
  4.00

  **Description:**
  This interactive introduction to nutrition explores the science of human nutrition and further reviews concepts of how nutrition can promote health and well being. The course will review specific nutrient needs and functions, nutrient digestion, and the role of diet in well being and in the presence of chronic disease. Weekly course work encourages scientific literacy and fosters critical evaluation of nutrition in the news and in social media.

- **BIO-240 Introduction to Marine Mammals**
  **Prerequisites:**
  BIO-111, BIO-L111, BIO-114, and BIO-L114

  **Credits:**
  4.00

  **Description:**
This course explores the biology and natural history of marine mammals, including cetaceans, pinnipeds, and sirenians, with a particular focus on species endemic to the North Atlantic. Topics include evolution, anatomy, physiology, behavior, ecology, field identification, the history of whaling and sealing, and contemporary management and conservation issues. Hands-on activities may include the dissection of a small marine mammal and a whale watch in Massachusetts Bay.

- **BIO-254 Marine Biology**

**Prerequisites:**
BIO-111/L111 or BIO-114/L114 or Instructor's consent; BIO-L254 concurrently;

**Credits:**
3.00

**Description:**
Introduction to the marine environment, its organisms and their specific adaptations. Emphasis on marine and estuarine ecology, intertidal habits, trophic relations, and physiology. Human impacts on the sea: fisheries, mariculture, pollution, introduced species, climate change and seawater acidification, and law of the sea. Taught yearly each fall.

- **BIO-L254 Marine Biology Lab**

**Prerequisites:**
BIO-111/L111 or BIO-114/L114 or Instructor's consent; BIO-254 concurrently;

**Credits:**
1.00

**Description:**
Field trips to local marine environments, museums, and aquaria; field and laboratory study and observations of live, preserved, and models of marine organisms.

- **BIO-262 Principles of Cell Culture**

**Prerequisites:**
BIO 111, L111 and BIO 114, L114 and CHEM 111, L111
Credits: 4.00

Description: The course is designed as an application base educational experience that will allow students to learn the standard techniques associated with successful cell culture. As such, students are responsible for the maintenance, propagation, isolation, and preservation of their cells. A number of cell types and experimental manipulations of the cultures are investigated throughout the semester.

— BIO-273 Biostatistics
Prerequisites: BIO 111/L111

Credits: 4.00

Description: Introduction to the statistical methods used to evaluate biological problems. Sampling, probability, confidence intervals, hypothesis tests, experimental design, analysis of variance, regression, and correlation are some of the topics offered. Software for data handling, graphics, and analysis will be used.

— BIO-H273 Biostatistics
Prerequisites: BIO 111/L111; Restricted to CAS Honor Students

Credits: 4.00

Description: Introduction to the statistical methods used to evaluate biological problems. Sampling, probability, confidence intervals, hypothesis tests, experimental design, analysis of variance, regression, and correlation are some of the topics offered. Software for data handling, graphics, and analysis will be used.
BIO-274 Genetics

Prerequisites:
BIO 111/L111 and BIO 114/L114; BIO L274 concurrently;

Credits:
3.00

Description:
An examination of the basic principles of genetics in eukaryotes and prokaryotes at the level of molecules, cells, and multicellular organisms, including humans. Topics include Mendelian and non-Mendelian inheritance, structure and function of chromosomes and genomes, biological variation resulting from recombination, mutation, and selection, and population genetics.

BIO-L274 Genetics Lab

Prerequisites:
BIO-111, BIO-L111, BIO-114, and BIO-L114. Must be taken concurrently with BIO 274.

Credits:
1.00

Description:
Experiments designed to demonstrate principles presented in lecture, using a range of genetic model organisms that include E. coli, B. subtilis, S. cerevisiae, D. melanogaster, S. fimbicola, and C. elegans.

BIO-H274 Honors Genetics

Prerequisites:
BIO 111/L111 and BIO 114/L114; BIO L274 concurrently; CAS Honors

Credits:
3.00

Description:
An examination of the basic principles of genetics in eukaryotes and prokaryotes at the level of molecules, cells, and multicellular organisms, including humans. Topics include Mendelian and non-Mendelian inheritance, structure and function of...
chromosomes and genomes, biological variation resulting from recombination, mutation, and selection, and population genetics.

- **BIO-285 Microbiology**

  **Prerequisites:**
  BIO-111 and BIO-L111; BIO-L285 concurrently;

  **Credits:**
  3.00

  **Description:**
  Viruses and bacteria are surveyed in terms of their ecology, biochemistry, taxonomy, molecular biology and control.

- **BIO-L285 Microbiology Laboratory**

  **Prerequisites:**
  BIO 111/L111; BIO 285 concurrently;

  **Credits:**
  1.00

  **Description:**
  Introduction to microbiological techniques and their applications to health, research and industry.

- **BIO-302 Writing for Research**

  **Prerequisites:**
  BIO 111/L111 and WRI 101, WRI 102, or WRI-103. BIO and Radiation Therapy majors with junior standing only.

  **Credits:**
  4.00

  **Description:**
Development of skills for writing clearly, concisely, and creatively in the style of scientific journals. This course emphasizes the formulation of a research project of the student’s choice and leads to a formal manuscript on the topic. Instruction includes literature search methods and software for the graphical presentation of data. Professional development, including the preparation of job application materials and in-person interview skills, is also an integral part of this course. Required of all biology and radiation science majors. Junior standing required.

- **BIO-304 Comparative Animal Physiology**

  **Prerequisites:**
  BIO-114 and BIO-L114. Must take BIO-L304 concurrently

  **Credits:**
  3.00

  **Description:**
  Mechanisms of physiological adaptations to environmental challenges are studied. Examples of gas exchange, osmoregulation, fluid transport, temperature regulation, nervous control, and movement are examined in various animal forms through class lecture and discussion, required readings, and external lectures. Spring semester.

- **BIO-L304 Comp Animal Physiology Lab**

  **Prerequisites:**
  BIO-114 and BIO-L114. Must take BIO-304 concurrently.

  **Credits:**
  1.00

  **Description:**
  Selected physiological processes and mechanisms or adaptation in invertebrate and vertebrate animals are examined by observation and controlled experiments.

- **BIO-315 Animal Behavior**

  **Prerequisites:**
  BIO-114/L114
**Credits:**
4.00

**Description:**
Surveys animal behavior in a range of species (invertebrates, birds, fish, mammals including humans) to assess similarities and differences in the evolution of behaviors and their physiological mechanisms by which individual organisms and species adapt to their environments. Topics include: predator evasion; mating systems; parental care; social behavior; and learning.

- **BIO-333 Ecology**

  **Prerequisites:**
  BIO-114/L114; BIO-L333 concurrently;

  **Credits:**
  3.00

  **Description:**
  Areas of study include but are not limited to basic principles of population biology, community ecology, trophic dynamics, ecosystem structure and function and evolutionary theory.

- **BIO-L333 Ecology Lab**

  **Prerequisites:**
  BIO-114, BIO-L114, and BIO-333 concurrently

  **Credits:**
  1.00

  **Description:**
  Field and laboratory experiences in techniques and concepts relevant to ecological theory, data collection, statistical analysis, visual representation and report preparation.

- **BIO-337 Evolution**

  **Prerequisites:**
Take BIO-111 BIO-L111 BIO-114 BIO-L114. BIO 274 recommended.

Credits:
4.00

Description:
A survey of evolutionary theory, exploring processes such as the genetic sources of variation, natural and sexual selection, and evolutionary developmental biology. Using phylogenetic systematics and other tools, we will demonstrate how these mechanisms result in the visible patterns of evolution. This is a reading-and-writing intensive course centered on close reading of Origin of the Species and discussion of recent peer-reviewed literature about evolution.

---

- BIO-343 Biodiversity & Conservation Biology

Prerequisites:
BIO-114 and BIO-L114

Credits:
4.00

Description:
This course covers a broad spectrum of aspects of biodiversity and conservation by examining key elements ranging from global patterns in the distribution of life on our planet to the effects our human population is causing on those patterns. Examples from marine and terrestrial animals and plants are used to convey current ideas with a focus on the importance of global biodiversity, and the design of management programs for the conservation of species and ecosystems. 4-credit

---

- BIO-345 The Biology of Vector Borne Diseases

Prerequisites:
BIO-114/L114;

Credits:
3.00

Description:
A survey of the occurrence, life history and pathogenicity of the most important arthropod-borne, human diseases both internationally (malaria, dengue, plague, trypanosomiasis, yellow fever, etc.) and within the United States (Lyme disease, EEE, West Nile Virus, and others). Demographic and environmental factors leading to the re-emergence and spread of these diseases will be considered.

- **BIO-357 Biology of Fishes**
  **Prerequisites:**
  BIO 114/L114, and Junior standing. Requires permission from Marine Sciences Coordinator.

  **Credits:**
  3.00

  **Description:**
  The evolution, systematics, anatomy, physiology and behavior of freshwater, marine and anadromous fishes from temperate to tropical environments. The interactions of fish in their environments, including predator-prey relationships, host-symbiont interactions, and fish as herbivores. Taken with permission from the Marine Science Consortium Coordinator. [This is a Marine Science Consortium Course and enrollment is limited] Evenings only: off campus

- **BIO-359 Biology of Whales**
  **Prerequisites:**
  BIO-111, BIO-L111, BIO-114, BIO-L114, and 2 BIO courses at the 200 level or above. Requires permission from Marine Sciences Coordinator.

  **Credits:**
  3.00

  **Description:**
  This course provides a comprehensive review of the biology, ecology, and management of cetaceans. A thorough grounding in cetacean mammalogy and population biology will prepare students to understand conservation problems presented as case histories. Students will also complete an independent research paper on a topic related to cetacean biology. Hands-on activities may include the dissection of a small cetacean and a shore-based whale watch in Cape Cod Bay.
This course is part of the Marine Studies Consortium and will be held at the New England Aquarium. Taken with permission from the Marine Science Consortium Coordinator. [This is a Marine Science Consortium Course and enrollment is limited]

- **BIO-360 Cancer Biology**
  **Prerequisites:**
  BIO-111, BIO-L111, BIO-114, BIO-L114, BIO-274, and BIO-L274

  **Credits:**
  4.00

  **Description:**
  An examination of molecular and cellular mechanisms that lead to the development of cancer. Factors contributing to tumorigenesis, angiogenesis, and metastasis will be discussed; these factors, oncogenes, tumor suppressor genes, and signal transduction networks. In addition, an investigation of current strategies for cancer prevention and treatment will be considered.

- **BIO-377 Immunology**
  **Prerequisites:**
  Take BIO-274

  **Credits:**
  4.00

  **Description:**
  The concept of immunity, response to infection, structure of the immune system, biochemistry of immunoglobins, antigen-antibody interactions, allergy, immunological injury, lymphocyte subpopulations and cellular immunity, tolerance suppression and enhancement. Taught alternate/even years.

- **BIO-385 Advanced Microbiology**
  **Prerequisites:**
  BIO-274 and BIO-L274 or BIO-285 and BIO-L285;

  **Credits:**
4.00

**Description:**
The molecular mechanisms of host-microbe interactions and the epidemiology and public health aspects of microorganisms are stressed. Also covered are current topics in microbiology including antimicrobial therapy and resistance, emerging pathogens and novel applications of microbiology. Experimental design and troubleshooting skills are developed, using contemporary microbiology and molecular biology laboratory techniques. Taught alternate/odd years.

**BIO-403 Cell Biology**

**Prerequisites:**
BIO 111/L111; CHEM-211/L211; BIO-L403 concurrently;

**Credits:**
3.00

**Description:**
The study of cells, approached through examinations of biochemical mechanisms, the relation between the structure and function of biological molecules and organelles, and the regulation of normal and diseased cells.

**BIO-L403 Cell Biology Lab**

**Prerequisites:**
BIO-111 and BIO-L11 and CHEM-211 and CHEM-L211. Must take BIO-403 concurrently.

**Credits:**
1.00

**Description:**
Examination of biological molecules and their role in cell function. Techniques used in these examinations will include enzymatic analyses, gel electrophoresis, immunologic identification, chromatography, and spectroscopy. Students are expected to develop their proficiency in the laboratory techniques used, to analyze their results in a quantitative manner, and to present their findings.
－ **BIO-474 Molecular Genetics**
**Prerequisites:**
CHEM-311 or BIO-274 and BIO-L274 and BIO-L474 concurrently

**Credits:**
3.00

**Description:**
An examination of concepts and techniques of modern molecular biology. Topics include the structure and function of DNA, RNA, and proteins, the regulation of gene expression in prokaryotes and eukaryotes at transcriptional and post-transcriptional levels, genetic modification of organisms, and genome analysis. This course will incorporate readings and discussions of primary scientific literature. Spring semester.

－ **BIO-L474 Molecular Genetics Lab**
**Prerequisites:**
Take CHEM-331 or BIO-274 and BIO-L274. BIO-474 must be taken concurrently.

**Credits:**
1.00

**Description:**
This upper level laboratory course will consist of a semester-long project in the form of a series of consecutive experiments involving the generation of a genetically modified organism and its subsequent molecular analysis. Techniques employed will include genetic screens, DNA isolation, restriction endonuclease analysis, transformation of bacteria, gel electrophoresis, gene reported assays, RNA isolation, reverse transcription, and quantitative PCR.

－ **BIO-475 Developmental Biology**
**Prerequisites:**
BIO-114, L114

**Credits:**
4.00
**Description:**
This course focuses on embryonic development in vertebrates. The conceptual focus on evolutionary developmental biology includes comparative developmental mechanisms and Epigenetic processes.

Biology Internship: This course provides students with credit for an unpaid internship completed during the semester when credit is earned. Students must secure an approved internship and provide documentation from the internship’s overseer to a full time faculty member sponsor in order to register for the course. The internship must involve participation in research and / or patient care. Students or their overseers will be required to submit monthly records of internship hours and provide the faculty sponsor with a written summary of internship experiences and accomplishments by the last week of classes. Only one internship may be used as a biology elective. This course is available for variable credit. Prerequisites: An Internship for Credit form must be submitted to the department chair Credits: 1-4

---

- **BIO-510 Independent Study**
  **Prerequisites:**
  An independent study form must be submitted to the CAS Dean’s Office.

  **Credits:**
  1.00-5.00

  **Description:**
  Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A paper and oral report are required. Only ONE independent study may be used toward biology electives.

---

- **BIO-H510 Honors Biology Independent Study**
  **Credits:**
  1.00-4.00

  **Description:**
  Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A paper and oral report are required. Thesis work is required to involve original research or an in-depth analysis.
- **BIO-H511 Biology Honors Independent Study**
  
  **Credits:**
  1.00- 4.00
  
  **Description:**
  Student projects may be initiated by a student or faculty member with the approval of the Chairperson. A paper and oral report are required. Thesis work is required to involve original research or an in-depth analysis.

- **BIO-H512 Honors in Biology Thesis**
  
  **Prerequisites:**
  Biology Majors Only; GPA 3.5 or Higher; Instructor Permission Required
  
  **Credits:**
  1.00
  
  **Description:**
  Students will write an honors thesis based on their own discovery research or experience at an internship. Students will learn to write the sections of a scientific paper and review the writing of others. A public presentation is required.

- **SCI-103 Environmental Science**
  
  **Prerequisites:**
  SCI-L103 must be taken concurrently
  
  **Credits:**
  3.00
  
  **Description:**
  Case study approach to the fundamentals of science applied to environmental degradation, ecosystems, geological processes, population dynamics, deforestation and biodiversity, climate change, ozone depletion, air soil, and water resource management, pollution and risks to health, economics and the environment, politics and the environment, and ethics and the environment.
- **SCI-L103 Environmental Science Lab**
  **Prerequisites:**
  Must take SCI-103 concurrently

  **Credits:**
  1.00

  **Description:**
  Laboratory exercises to illustrate the topics covered in Science 103. Field-testing and analysis of environmental samples. Field trip required.

- **SCI-251 Intro to Coastal Geology**
  **Prerequisites:**
  Intro Math

  **Credits:**
  4.00

  **Description:**
  Coastal environments will be analyzed with an emphasis on the important environmental characteristics of these areas. Management and environmental problems within the coastal and offshore areas such as beach erosion, beach access, and oil spills will be considered. One required field trip.

- **SCI-410 Marine Biogeochemistry**
  **Prerequisites:**
  Take CHEM-111, CHEM-L111, CHEM-112, and CHEM-L112

  **Credits:**
  4.00

  **Description:**
  This course is designed to identify the ways that scientific knowledge can be used to resolve environmental problems, particularly the ocean’s role in the biogeochemical cycling of selected elements and the impacts of humans on the cycling of these elements. Sample topics include the chemical composition of
seawater from the perspectives of elemental speciation and the impacts of solutes on water’s physical behavior; biogeochemical phenomena which control accumulation and preservation of marine sediments; marine chemistry of radioactive and stable isotopes; and how climate change and pollution impact the marine environment with mitigation strategies outlined.
BLACK STUDIES (ARCHIVE 2018-2019)

Black Studies is an interdisciplinary program that provides students with the opportunity to critically examine the black experience in relationship to both historical and contemporary issues that have shaped and continue to shape the various communities they are a part of: neighborhoods, cities, states, nations, and the world.

- Black Studies Minor Archive 2018-2019
- Black Studies Courses Archive 2018-2019

Black Studies Minor Archive 2018-2019

There is no major available in Black Studies.

Minor Requirements: 5 courses, 20 credits

Core Requirements (2 courses, 8 credits)

- **BLKST-100 Introduction to Black Studies I: Survey of the Discipline**
  - Credits: 4.00
  - **Description:**
  Introduces students to the basic concepts, literature and interdisciplinary nature of Black Studies. Provides a conceptual framework for the investigation and analysis of black history and culture as well.

- **BLKST-101 Introduction to Black Studies II Research and Writing**
  - Credits: 4.00
Description:
Introduces students to basic research techniques and methods in Black Studies including library use, identifying resources, project development, documenting sources, and writing research papers.

Electives (3 courses, 12 credits)
Choose three of the following; no more than two may be taken from any one department outside of Black Studies:

- **BLKST-225 West African History Through Film and Literature**
  Credits: 4.00
  Description:
  Examines the history and culture of West Africa through its portrayal in literature and film. The specific countries that will be focused on are Senegal, Mali, Burkina Faso, Ghana and Nigeria. This class will also recognize the fact that borders are a modern, man-made element of the West African landscape serving to both separate people who have historically and traditionally seen themselves as connected, and to bring together people into a nation who have historically and traditionally seen themselves as distinct from one another.

- **BLKST-226 The African American Experience in Literature and Film**
  Credits: 4.00
  Description:
  Using literature and film to present aspects of the African American experience in the United States. By using film and literature it is possible to present the broad range of cultural styles, regional variations, class differences, gender issues, family structures and multiple viewpoints that make up the African American experience. Through lectures and in-class presentations a historical context will be provided for each of the films or texts that are used during the semester.

**Credits:**
4.00

**Description:**
Introduces students to the Reconstruction era in American history, and uses Reconstruction as a bridge to look at enslavement, which preceded the era, and the issue of freedom during, and after the era. In the first half of the class students read from texts that will provide them with an understanding of slavery, emancipation and reconstruction. The second half of the class will utilize on-line collections of the Freedman’s Bureau Papers to allow students to use documents to deepen their understanding of the Reconstruction era. The class will also provide a comparative approach by considering questions of citizenship in the 19th century for people of African descent in the United States, Latin America and the Caribbean. This course is identical to HST 469.

- **BLKST-510 Independent Study in Black Studies**

**Prerequisites:**
An independent study form must be submitted to the CAS Dean’s Office.

**Credits:**
4.00

**Description:**
Independent study in Black Studies

- **ENG-357 African-American Literature**

**Prerequisites:**
WRI-102 or WRI-H103

**Credits:**
4.00

**Description:**
African-American writing from the beginning through the present. Normally offered alternate years.

</table>
## Credits: 4.00

### Description:
Comparing and analyzing the history of race and politics in South Africa and the United States from the 17th century to the present. Examines how race as a social and ideological construct influenced and informed political conflicts over land, labor, and social relations in the two countries including slavery, segregation, apartheid, and the struggle to create racial democracies.

</tbody>
</table>

### Description:
- **HST-271 African-American History 1619-1860**
  - Credits: 4.00
  - **Description:**
    Examines the history of Africans in the United States from their arrival in the colonies to the Civil War and the end of legal slavery. Topics examined include: the development of the slave system, African-Americans, and the Declaration of Independence, and the abolition movement.

- **HST-272 African-American History from 1860**
  - Credits: 4.00
  - **Description:**
    Examines African American history from the end of slavery to the twenty first century. Topics examined include: Emancipation and Reconstruction, Reconstruction and the Constitution, the Harlem Renaissance, the Civil Rights and Black Power Movements, and African-Americans at the start of the twenty-first century.

- **HST-319 The History of Black Music in America**
  - Credits: 4.00
  - **Description:**
Using music as a window this class explores the history of Black America as well as the history of all America. Through a combination of texts, videos, and recordings this class examines the music of Black America, from it’s African roots to hip hop in the 21st century. This will be done in the context and communities in which black music was created and performed, and also in relationship to the wider world.

– HST-396 The African Diaspora

**Credits:**
4.00

**Description:**
Examines the global dispersion of African people outside of the African continent. The history and culture of African descendant people and their communities in the Americas, Europe, and Asia will be included.

**Residency Requirement Policy:** In the College of Arts and Sciences, a two-course (8 credit) residency requirement must be satisfied for completion of a minor and a four-course (16 credit) residency requirement must be satisfied for the completion of a major.

**Minor Programs Policy:** A student declaring a minor may use no more than two courses from a major to fulfill the requirements for the minor. No more than one course from one minor may count toward the fulfillment of a second minor. Students may not minor in a subject in which they are also completing a major. For more information, see the Minor Programs section of the CAS Degree Requirements page.

**Description:**
Examines the history and culture of West Africa through its portrayal in literature and film. The specific countries that will be focused on are Senegal, Mali, Burkina Faso, Ghana and Nigeria. This class will also recognize the fact that borders are a modern, man-made element of the West African landscape serving to both separate people who have historically and traditionally seen themselves as connected, and to bring together people into a nation who have historically and traditionally seen themselves as distinct from one another.

– **BLKST-226 The African American Experience in Literature and Film**

**Credits:**
4.00

**Description:**
Using literature and film to present aspects of the African American experience in the United States. By using film and literature it is possible to present the broad range of cultural styles, regional variations, class differences, gender issues, family
structures and multiple viewpoints that make up the African American experience. Through lectures and in-class presentations a historical context will be provided for each of the films or texts that are used during the semester.

- **BLKST-263 Sabar: Music and Dance**
  **Credits:**
  4.00
  **Description:**
  Introduces participants to the sabar music and dance tradition of Senegal through a study of music, dance, language and history. Taught by professional practitioners of the sabar tradition, students will develop a sense of how music and dance are used in both traditional and popular contexts. This course will be directed by Prof. Robert A. Bellinger.

  **Credits:**

4.00

Description:
Independent study in Black Studies
BUSINESS ECONOMICS (ARCHIVE 2018-2019)

The Business Economics major is an opportunity to gain a diverse business education, while taking a close look at what makes the economy move. Broad in scope, economics explains how people, businesses, governments, and organizations allocate limited resources to meet their goals. Understanding economics can also help you develop solutions for many social problems, such as unemployment, inflation, poverty, climate change, and access to healthcare.

- Business Economics Major Requirements Archive 2018-2019
- Business Economics Minor Requirements Archive 2018-2019
- Business Economics Undergraduate Course List Archive 2018-2019

Business Economics Major Requirements Archive 2018-2019

Business Economics Major Requirements

The Business Economics major consists of a minimum of 24 credits, which include four (4) required courses and two (2) elective courses. Students may begin the major after completing the following prerequisite courses: EC 101, EC 102, and statistics.

The BSBA in Business Economics requires completion of a minimum of 24 credit hours (6 classes) in Business Economics. A cumulative grade point average of at least 2.0 in the Business Economics major and a cumulative grade point average of 2.0 overall must be maintained to graduate.

- EC-312 Intermediate Macro Theory
  Prerequisites:
  EC-101 and EC-102
Credits: 4.00

Description:
This course covers the neoclassical and Keynesian models of aggregate economic activity. Coverage of the measurement of economic variables, such as aggregate income, the inflation rate, and the unemployment rate. Examines the behavior of the economy under conditions of price flexibility in the long run and price rigidity in the short run under rational and adaptive expectations. Analysis of the effect of changes in taxes and government expenditures, monetary policy and deficits on the economy. Coverage of the sources of economic growth. Required of all majors in Economics. Normally offered every semester.

– EC-432 Managerial Economics
Prerequisites:
EC-101 and EC-102

Credits: 4.00

Description:
Managerial economics applies microeconomic and quantitative analysis to the formulation of rational managerial decisions. These tools shape decisions about output and pricing, about the choice of product quality, the type of production process used, the mix of inputs employed, the suitability of mergers and acquisitions, the management of risk, and the design of incentives in a world of imperfect information. This course explains the tools of managerial economics, puts them into context using numerous case studies, and applies them to significant real business situations.

– EC-450 Applied Econometrics
Prerequisites:
STATS-250 or STATS-240 or MATH-255 or permission of instructor

Credits: 4.00
Description:
This course begins with a brief review of statistical methods, including probability theory, estimation, and hypothesis testing. This background is used in the construction, estimation, and testing of econometric models. The consequences of a misspecified model, where the assumptions of a classical regression model are violated, are studied and the appropriate remedial measures are suggested. Other topics include dummy variables, binary choice models, and autoregressive models. Emphasis is on applied aspects of econometric modeling. There is extensive use of statistical software for data analyses. Normally offered every year.

EC-490 Senior Seminar in Economics
Prerequisites:
EC-450 or STATS-350 and Senior Standing; Or permission of Undergraduate Director.

Credits:
4.00

Description:
This is a required course for all students majoring in economics, to be taken in the spring semester of their senior year. Students are required to develop an economic thesis project in consultation with the professor for the course and to present it to the class.

Elective Courses (2 courses, 8 credits)
Choose two (2) Economic Elective courses of which at least one is at the 400-level or higher.

Accelerated Degrees

If you’re earning an undergraduate business degree at Suffolk or another U.S. institution, you may qualify to earn both your Bachelor’s and Master’s degrees in just 5 years.

Learning Goals & Objectives
Learning goals and objectives reflect the educational outcomes achieved by students through the completion of this program. These transferable skills prepare Suffolk students for success in the workplace, in graduate school, and in their local and global communities.

<table>

Learning Goals

Communicate clearly both orally and in writing.

Learning Objectives

- Present the results of their business economic studies in writing.
- Orally present the results of their business economic studies.

Business Economics Minor Requirements Archive 2018-2019

Business Economics Minor Requirements

Students may minor in Business Economics after they have completed three (3) prerequisite courses, which are already required within the BSBA core. Complete these BSBA prerequisite courses:

- EC-101 Applied Microeconomics
  **Prerequisites:**
  Non CAS majors need to have completed at least 15 credits.

  **Credits:**
  3.00

  **Description:**
  This course introduces students to foundational principles of microeconomic theory, with an emphasis on applications of concepts to management decision-making in specific industry and market settings. It describes and analyzes the interaction of supply and demand and the behavior of the prices of goods, services. It explains the determinations of costs, output, strategic pricing, and governance by firms under conditions of perfect and imperfect competition in a global economy. In addition, it describes the supply demand for factors of production and the impact of taxes and government regulation and intervention on firms and consumers.
- **EC-102 Global Macroeconomics**

**Prerequisites:**
Non-CAS majors need to have completed at least 15 credits

**Credits:**
3.00

**Description:**
This course examines the workings of the national and the global economy. It will describe the determination of Gross Domestic Product, the problems of unemployment, inflation, and the determination of economic growth. It will also describe and analyze the determination of the country's exchange rate, the balance of payments, and international borrowing and lending. A particular focus will be on understanding economic fluctuations (booms, busts, and recessions) in the domestic economy and its effects on other economies. It will analyze the role of the government and the effects of government spending and taxation on the economy. Furthermore, it will describe and analyze the determination of the quantity of money and interest rates in the economy and the role of the country's central bank. It examines the basis and pattern of international trade and the effects of a country's trade policy on the economy.

- **STATS-250 Applied Statistics**

**Prerequisites:**
MATH 128 or higher. REMINDER: STATS 250 is a required prerequisite MKT 220, FIN 200 and ISOM 201(prerequisite for ISOM 319)

**Credits:**
4.00

**Description:**
Application of statistical analysis to real-world business and economic problems. Topics include data presentation, descriptive statistics including measures of location and dispersion, introduction to probability, discrete and continuous random variables, probability distributions including binomial and normal distributions, sampling and sampling distributions, statistical inference including
estimation and hypothesis testing, simple and multiple regression analysis. The use of computers is emphasized throughout the course. Normally offered each semester.

Choose one of the following:

- **EC-312 Intermediate Macro Theory**
  
  **Prerequisites:**
  EC-101 and EC-102

  **Credits:**
  4.00

  **Description:**
  This course covers the neoclassical and Keynesian models of aggregate economic activity. Coverage of the measurement of economic variables, such as aggregate income, the inflation rate, and the unemployment rate. Examines the behavior of the economy under conditions of price flexibility in the long run and price rigidity in the short run under rational and adaptive expectations. Analysis of the effect of changes in taxes and government expenditures, monetary policy and deficits on the economy. Coverage of the sources of economic growth. Required of all majors in Economics. Normally offered every semester.

- **EC-432 Managerial Economics**
  
  **Prerequisites:**
  EC-101 and EC-102

  **Credits:**
  4.00

  **Description:**
  Managerial economics applies microeconomic and quantitative analysis to the formulation of rational managerial decisions. These tools shape decisions about output and pricing, about the choice of product quality, the type of production process used, the mix of inputs employed, the suitability of mergers and acquisitions, the management of risk, and the design of incentives in a world of
imperfect information. This course explains the tools of managerial economics, puts them into context using numerous case studies, and applies them to significant real business situations.

Choose any other two (2) economics courses of which at least one is at the 400-level or higher, for a total of eight credits.

**Accelerated Degrees**

If you're earning an undergraduate business degree at Suffolk or another U.S. institution, you may qualify to earn both your Bachelor's and Master's degrees in just 5 years.

<td>EC-311 Intermediate Micro Theory</td>
<td>Theory of consumer behavior and demand. Theory of production and costs of production. Theory of the firm, and price and output decisions in different market structures, i.e., under perfect competition, monopoly, monopolistic competition and oligopoly. Decisions relating to pricing and employment of various inputs (labor and capital) under perfectly competitive, and less than perfectly competitive, resource markets. Required of all majors in Economics. Normally offered every semester.</td>
</tr>
<tr>
<td>EC-312 Intermediate Macro Theory</td>
<td></td>
</tr>
</tbody>
</table>

**Prerequisites:**
EC 101 and EC 102

**Credits:**
4.00
Credits: 4.00

Description:
This course covers the neoclassical and Keynesian models of aggregate economic activity. Coverage of the measurement of economic variables, such as aggregate income, the inflation rate, and the unemployment rate. Examines the behavior of the economy under conditions of price flexibility in the long run and price rigidity in the short run under rational and adaptive expectations. Analysis of the effect of changes in taxes and government expenditures, monetary policy and deficits on the economy. Coverage of the sources of economic growth. Required of all majors in Economics. Normally offered every semester.

— EC-421 Public Finance
Prerequisites:
EC 101 and EC 102

Credits: 4.00

Description:
The theory of tax policy and tax structure. The effects on economic behavior (including labor supply, saving, risk-taking and investment, charitable giving, and growth) of different taxes (income, sales, value-added, inheritance, wealth, property). Tax equity, efficiency and incidence, in the United States and in comparative perspective. Additional topics include modeling state taxes; social security and pensions; and tax compensation. Normally offered yearly.

— EC-423 Economics of Regulation
Prerequisites:
EC 101 and EC 102

Credits: 4.00

Description:
This course examines regulation and analyzes the structure, conduct, and performance of American industry. Monopoly and strategic behavior in oligopoly and monopolistic competition are considered. U.S. antitrust law and the effect of regulatory laws on industrial performance are explored. Regulatory practices, rate setting, deregulation, public-enterprise pricing, and issues in privatization are examined, with an emphasis on case studies and policy analysis. Normally offered every other year.

- **EC-430 International Trade Theory & Policy**

**Prerequisites:**
EC 101 and EC 102

**Credits:**
4.00

**Description:**
This course examines theories of international trade. The policy implications of each theory are explored and the effect of trade on the welfare of the nation is examined. Also the development of trade blocs and the the political economy of trade are studied. Normally offered every year.

- **EC-432 Managerial Economics**

**Prerequisites:**
EC-101 and EC-102

**Credits:**
4.00

**Description:**
Managerial economics applies microeconomic and quantitative analysis to the formulation of rational managerial decisions. These tools shape decisions about output and pricing, about the choice of product quality, the type of production process used, the mix of inputs employed, the suitability of mergers and acquisitions, the management of risk, and the design of incentives in a world of imperfect information. This course explains the tools of managerial economics, puts them into context using numerous case studies, and applies them to significant real business situations.

<tbody>
<tr>
<td>EC-442 International Monetary Economics</td>
<td>EC 101 and EC 102</td>
<td>The balance of payments and foreign exchange markets and instruments, and the determination of exchange rates. Balance-of-payments adjustments under alternative exchange-rate systems, international liquidity, international economics policy and open economy macroeconomics.</td>
</tr>
<tr>
<td>EC-445 The Economics of the European Union</td>
<td>EC 101 and EC 102</td>
<td>An economic analysis of the European Union, the history of European monetary and economic integration, and the creation of the Euro. A survey of the development and evolution of key European policies, such competition, industry, agriculture, environment, regional, etc. A discussion of economic implications of the enlargement of the European Union, as well as its trade relations with the U.S. and other countries within the context of the World Trade Organization.</td>
</tr>
<tr>
<td>EC-460 Game Theory</td>
<td>EC 101 and EC 102</td>
<td></td>
</tr>
</tbody>
</table>
**Description:**
This course introduces students to the foundations of game theory using applications from economics and everyday decision-making. The course examines the common strategic elements of interactions between consumers and producers, governments and citizens, politicians and their constituencies, countries and their trading partners, and various other participants in social relationships. The course provides a theoretical framework for modeling strategic interaction, beginning with the development of the concept of a Nash equilibrium, reputation, signaling, collective-action problems, and voting procedures and strategies. Normally offered every other year.

---

- **EC-480 Financial Economics**

**Prerequisites:**
EC 102; STATS 250 or equivalent; EC 311 or EC 432 (or EC 101 with a B grade or higher)

**Credits:**
4.00

**Description:**
This course provides a solid foundation in financial economics. The course begins by setting out the nature of financial decision-making by households and firms in a risk-free world, and then introduces risk in the context of financial markets. It considers portfolio management, including mean-variance, utility-maximizing, and behavioral approaches. Attention next turns to asset valuation - of equities and fixed income securities, as well as financial derivatives. The final section evaluates the applicability of the ideas of financial economics to the real world.

---

- **EC-483 Money, Banking & Financial Markets**

**Prerequisites:**
EC 101, EC 102

**Credits:**
4.00

**Description:**
This course examines the role of depository institutions and the Federal Reserve system in determining the supply of money. The course also explains the financial environment and the role of monetary policy decisions on changes in price, interest rates, money, and economic activity. The course provides the student with both theoretical and applied analysis. Prerequisites: EC 101, EC 102.

- **EC-490 Senior Seminar in Economics**
  **Prerequisites:**
  EC-450 or STATS-350 and Senior Standing; Or permission of Undergraduate Director.
  
  **Credits:**
  4.00
  
  **Description:**
  This is a required course for all students majoring in economics, to be taken in the spring semester of their senior year. Students are required to develop an economic thesis project in consultation with the professor for the course and to present it to the class.

- **EC-H490 Honors Senior Seminar in Economics**
  **Prerequisites:**
  EC-450, Senior Standing, and Honors students only
  
  **Credits:**
  4.00
  
  **Description:**
  This is a required course for all students wishing to graduate with honors in economics, to be taken in the spring semester of their senior year. Students are required to develop an economic thesis project in consultation with the professor for the course and to present it to the class.

- **EC-503 Internship in Economics**
  **Prerequisites:**
  Instructor’s consent required
Credits: 4.00

Description:
Approximately 12 hours per week working in a position designed to give the student responsibility and a learning opportunity in economics. Interested students should consult the instructor in advance.

EC-510 EC Independent Study

Prerequisites:
An independent study form must be submitted to the CAS Dean's Office.

Credits: 1.00 - 5.00

Description:
Independent study in economics
BUSINESS LAW (ARCHIVE 2018-2019)

Understanding business law is essential in today's economy regardless of the business discipline. With a minor in business law, you will add value to your major by gaining insight into highly relevant legal principles and business cases. Area of focus may include forming a business and protecting that business from liability; preventing and detecting corporate crime and fraud; developing strategic relationships with regulatory authorities; applying intellectual property rights; and understanding the global legal environment in which businesses operate. The business law minor encourages you to tailor your focus around your major and interests.

- **Business Law Minor Requirements Archive 2018-2019**
- **Business Law Undergraduate Courses Archive 2018-2019**

**Business Law Minor Requirements Archive 2018-2019**

**Business Law Minor for Business Students (3 courses, 9 credits)**

Choose three (3) of the following courses in addition to completing BLE 214, Principles of Business Law:

- **BLE-315 Legal Lessons for Business Startups Organizations**
  **Prerequisites:**
  BLE-214

  **Credits:**
  3.00

  **Description:**
  Examines the formation, strategic use, and financial implications of alternative forms of business organization, namely partnerships, corporations, trusts, subchapter corporations, and the new limited liability hybrids.
- **BLE-316 How Not to Get Sued**
  **Prerequisites:**
  BLE 214

  **Credits:**
  3.00

  **Description:**
  One of the greatest threats to business is the potential for litigation. Lawsuits can seriously hurt profits and even lead to bankruptcy. Even when businesses win in court, they still lose, what with the cost of the legal defense and the possibility of adverse publicity and decreased consumer confidence. Managers need to know how to avoid the potential for litigation and be aware of the areas of their business that provide the greatest risks to their enterprise. This course covers common ways in which businesses can protect themselves from common lawsuits ranging from product defects to environmental and worker safety to employee discrimination and harassment. Students will learn how to establish systems that will put their companies ahead legally.

- **BLE-317 Managing in the Global Legal Environment**
  **Prerequisites:**
  BLE 214

  **Credits:**
  3.00

  **Description:**
  Surveys the global legal environment of business. Emphasizes case analysis of topics such as: sovereignty, extraterritoriality, treaties, international contracts, arbitration, and the European Union. Explores the managerial and economic significance of these topics.

- **BLE-321 Corporate Crime and Financial Fraud**
  **Credits:**
  3.00
**Description:**
 Presents an in-depth study of corporate crime and financial fraud. Examines accounting devices and schemes employed to defraud stakeholders, failure of industry watchdogs, and the regulatory and legislative environment. Topics include: corporate governance, corporate finance, corporate compliance programs, ethical misconduct by outside legal, accounting, investment and banking professionals, Sarbanes Oxley Act, Foreign Corrupt Practices Act, Organizational Sentencing guidelines, mail fraud, wire fraud, money laundering, conspiracy, securities violations, qui tam litigation (whistleblowers) and financial accounting crimes.

**Prerequisites:**
 BLE-214

**Credits:**
 3.00

**Description:**
 Government can be a vital ally to business, as much as it can be a roadblock. Government sets the minimum standards for how society expects companies to deal with customers and each other. Businesses that do not recognize why government needs to be an integral part of their decision-making as opposed to an afterthought-- are doomed to fail. This course teaches students how to get government on their side.

**Prerequisites:**
 BLE-214

**Credits:**
 3.00

**Description:**
 As a growing number of firms choose to produce goods abroad, piracy, counterfeiting, and other acts that dilute their brands are becoming increasingly common. This course focuses on the legal and practical tools that entrepreneurs, start-ups, and existing business can use to protect their intellectual property (IP). It
offers best practices on the strategic use of copyright, patent, trademark, and trade secrets to enhance corporate value in different industries and regions. The course provides a legal foundation in IP and demonstrates how to apply that knowledge to business through case analysis.

**Business Law Minor for College of Arts & Sciences Students (5 courses, 15 credits)**

Choose three (3) of the following courses in addition to completing ENT 101: Business Foundations and BLE 214: Principles of Business Law:

- **BLE-315 Legal Lessons for Business Startups Organizations**  
  **Prerequisites:** BLE-214
  **Credits:** 3.00
  **Description:**
  Examines the formation, strategic use, and financial implications of alternative forms of business organization, namely partnerships, corporations, trusts, subchapter corporations, and the new limited liability hybrids.

- **BLE-316 How Not to Get Sued**  
  **Prerequisites:** BLE 214
  **Credits:** 3.00
  **Description:**
  One of the greatest threats to business is the potential for litigation. Lawsuits can seriously hurt profits and even lead to bankruptcy. Even when businesses win in court, they still lose, what with the cost of the legal defense and the possibility of adverse publicity and decreased consumer confidence. Managers need to know how to avoid the potential for litigation and be aware of the areas of their business that provide the greatest risks to their enterprise. This course covers common ways

- **BLE-322 Getting Government to Say 'yes!' to Business**
  **Prerequisites:**
  BLE-214
Credits: 3.00

Description:
Government can be a vital ally to business, as much as it can be a roadblock. Government sets the minimum standards for how society expects companies to deal with customers and each other. Businesses that do not recognize why government needs to be an integral part of their decision-making as opposed to an afterthought-- are doomed to fail. This course teaches students how to get government on their side.

— BLE-323 Protect Your Brand: Using Intellectual Property Law to Win
Prerequisites:
BLE-214

Credits: 3.00

Description:
As a growing number of firms choose to produce goods abroad, piracy, counterfeiting, and other acts that dilute their brands are becoming increasingly common. This course focuses on the legal and practical tools that entrepreneurs, start-ups, and existing business can use to protect their intellectual property (IP). It offers best practices on the strategic use of copyright, patent, trademark, and trade secrets to enhance corporate value in different industries and regions. The course provides a legal foundation in IP and demonstrates how to apply that knowledge to business through case analysis.

Business Law Undergraduate Courses Archive 2018-2019

Business Law Undergraduate Courses

— BLE-214 Principles of Business Law
Credits:
3.00

Description:
Introduces the field of business law. Provides an overview of the organization and operation of the American legal system, court system and legal procedure. Examines selected business law topics such as contracts, torts, criminal law, agency, and business organizations. Attention is given to the ways in which business law manifests important social and ethical precepts.

— BLE-H214 Honors Principles of Business Law

Prerequisites:
GPA of 3.3 or above required.

Credits:
3.00

Description:
Introduces the field of business law. Provides an overview of the organization and operation of the American legal system, court system and legal procedure. Examines selected business law topics such as contracts, torts, criminal law, agency, and business organizations. Attention is given to the ways in which business law manifests important social and ethical precepts.

— BLE-215 Business Ethics and Law

Credits:
3.00

Description:
Business ethics is applied ethics. Explores the roles and responsibilities of business in a global society. Teaches models of ethical decision-making that incorporate multiple points of view, including diverse cultural worldviews and legal perspectives. Addresses factors that contribute to and constrain ethical behavior in and by organizations. Students apply concepts to current business problems, such as anti-trust, accounting fraud, deceptive advertising, and environmental dumping.
− **BLE-H215 Honors Business Ethics and Law**

**Prerequisites:**
GPA of 3.3 or above required.

**Credits:**
3.00

**Description:**
Business ethics is applied ethics. Explores the roles and responsibilities of business in a global society. Teaches models of ethical decision-making that incorporate multiple points of view, including diverse cultural worldviews and legal perspectives. Addresses factors that contribute to and constrain ethical behavior in and by organizations. Students apply concepts to current business problems, such as anti-trust, accounting fraud, deceptive advertising, and environmental dumping.

− **BLE-310 I Want to Buy a Home**

**Prerequisites:**
Junior standing or above needed.

**Credits:**
1.00

**Description:**
Teaches students all they have to know about purchasing a residence, starting with finding a home to financing, inspections, documents, and final ownership conveyance.

− **BLE-315 Legal Lessons for Business Startups Organizations**

**Prerequisites:**
BLE-214

**Credits:**
3.00

**Description:**
Examines the formation, strategic use, and financial implications of alternative forms of business organization, namely partnerships, corporations, trusts, subchapter corporations, and the new limited liability hybrids.

- **BLE-316 How Not to Get Sued**
  
  **Prerequisites:**
  BLE 214
  
  **Credits:**
  3.00
  
  **Description:**
  One of the greatest threats to business is the potential for litigation. Lawsuits can seriously hurt profits and even lead to bankruptcy. Even when businesses win in court, they still lose, what with the cost of the legal defense and the possibility of adverse publicity and decreased consumer confidence. Managers need to know how to avoid the potential for litigation and be aware of the areas of their business that provide the greatest risks to their enterprise. Students will learn how to establish systems that will put their companies ahead legally.

- **BLE-317 Managing in the Global Legal Environment**
  
  **Prerequisites:**
  BLE 214
  
  **Credits:**
  3.00
  
  **Description:**
  Surveys the global legal environment of business. Emphasizes case analysis of topics such as: sovereignty, extraterritoriality, treaties, international contracts, arbitration, and the European Union. Explores the managerial and economic significance of these topics.
BLE-318 Intro to Real Estate Principles

Prerequisites:
BLE 214

Credits:
3.00

Description:
Introduces students to the concepts and principles of real estate. Enables students to understand the key components of each major real estate asset class including: residential, retail, commercial, industrial, hospitality, and properties. Students learn the range of professional players in the industry and what roles they play. Teaches basic elements of a Development Pro-forma Budget; Operating Pro-forma Budget; Sources and Uses Statement; and financial schedules. Utilizes textbook, case work, web based data sources, selected readings and field trips. Emphasizes practical application of the concepts taught, the use of current examples from the industry, and today’s marketplace.

BLE-319 Real Estate Development and Public Policy

Prerequisites:
BLE 214

Credits:
3.00

Description:
This class builds on BLE-318 and explores the process of responding to the public procurement process, large shopping malls, the hospitality industry and office and retail mixed use projects. We also explore the phases of the real estate development process by investigating, Zoning and Variances, Project Review Committees, Community Benefit Packages, Historic Preservation issues and Environmental issues. Students will understand the complete development process and the role of all the stakeholders from this class. No changes to 318 summary.

BLE-321 Corporate Crime and Financial Fraud

Credits:
3.00
**Description:**
Presents an in-depth study of corporate crime and financial fraud. Examines accounting devices and schemes employed to defraud stakeholders, failure of industry watchdogs, and the regulatory and legislative environment. Topics include: corporate governance, corporate finance, corporate compliance programs, ethical misconduct by outside legal, accounting, investment and banking professionals, Sarbanes Oxley Act, Foreign Corrupt Practices Act, Organizational Sentencing guidelines, mail fraud, wire fraud, money laundering, conspiracy, securities violations, qui tam litigation (whistleblowers) and financial accounting crimes.

**BLE-322 Getting Government to Say ’yes!’ to Business**

**Prerequisites:**
BLE-214

**Credits:**
3.00

**Description:**
Government can be a vital ally to business, as much as it can be a roadblock. Government sets the minimum standards for how society expects companies to deal with customers and each other. Businesses that do not recognize why government needs to be an integral part of their decision-making as opposed to an afterthought-- are doomed to fail. This course teaches students how to get government on their side.

**BLE-323 Protect Your Brand: Using Intellectual Property Law to Win**

**Prerequisites:**
BLE-214

**Credits:**
3.00

**Description:**
As a growing number of firms choose to produce goods abroad, piracy, counterfeiting, and other acts that dilute their brands are becoming increasingly common. This course focuses on the legal and practical tools that entrepreneurs, start-ups, and existing business can use to protect their intellectual property (IP). It
offers best practices on the strategic use of copyright, patent, trademark, and trade secrets to enhance corporate value in different industries and regions. The course provides a legal foundation in IP and demonstrates how to apply that knowledge to business through case analysis.

- **BLE-325 Global Business Ethics**

  **Prerequisites:**
  BLE-215, PHIL-119, PHIL-120, PHIL-123 or PHIL-127

  **Credits:**
  3.00

  **Description:**
  Surveys business ethics as they transcend the diverse perspectives of global business. Explores current global ethics standards and values, ethical challenges, controversies, convergence and trends. Students explore famous global business cases through films, websites and independent research. Emphasizes identification and resolution of global business ethical issues within the context of ethical decision-making and sustainability. Analyzes corporate social responsibility; hence, transforming global business ethics through business.

- **BLE-510 Independent Study in Business**

  **Prerequisites:**
  Approval of Dept Chair or Dean

  **Credits:**
  3.00

  **Description:**
  Involves a student initiated written proposal to a willing and appropriate full-time faculty member for a directed study project. Normally this is for three credits and completed during one semester. Prior to registration, the faculty member and student must concur on a written proposal, which includes a reading list and description of requirements for grading of the final project.

Chemistry Major Archive 2018-2019

The Chemistry & Biochemistry Department offers a Chemistry major and minor. Through a wide variety of laboratory-based courses and opportunities for independent research with faculty, the department provides students with the tools that will allow them to achieve success in their field while learning in the heart of one of the most scientifically progressive cities in the world.

Major Requirements: 17 courses, 62-68 credits

The curricula for the BA and BS degrees in Chemistry may satisfy the requirements for certification by the American Chemical Society. Students in the College of Arts & Sciences must fulfill all general requirements for their chosen degree in addition to specific major requirements.

Core Requirements (16 courses and corresponding laboratories where applicable, 58-64 credits)

- **CHEM-111 General Chemistry I**

  **Prerequisites:**
  Placement at MATH 104 or better. Students who do not place at MATH 104 must take MATH 104 concurrently. Must be taken concurrently with CHEM-L111.

  **Credits:**
  3.00

  **Description:**
Fundamental principles of chemistry are discussed. Introduces atomic structure, stoichiometry, the periodic table, the nature of chemical bonds, and chemical reactions. This course is recommended for science majors or those considering careers in the health sciences.

— CHEM-L111 General Chemistry Laboratory I

Prerequisites:
MATH-104 MATH-108 MATH-121 MATH-128 MATH-130 MATH-134 MATH-164 MATH-165 MATHT-MPEL1 MATHT-MPEL2 or MATHT-MPEL3. Must be taken concurrently with CHEM 111.

Credits:
1.00

Description:
Introduces the basic principles of chemistry through “discovery” laboratory experiments. Learn safe laboratory practices and basic techniques such as determining mass and volume, representing data in the form of tables and graphs, and synthesizing and isolating a metal complex. Participate in workshop activities that include understanding modern approaches to the scientific method, reading and understanding the scientific literature, and building molecular models. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

— CHEM-112 General Chemistry II

Prerequisites:
CHEM 111/L111; CHEM-L112 must be taken concurrently. MATH 104 placement or higher.

Credits:
3.00

Description:
This course is a continuation of General Chemistry I. Fundamental principles of chemistry are discussed. Introduces thermochemistry, gases, solution chemistry, chemical kinetics, chemical equilibrium, acid-base systems, and thermodynamics.
— **CHEM-L112 General Chemistry Laboratory II**  
**Prerequisites:**  
CHEM-111/L111; CHEM-112 must be take concurrently. MATH-104 placement or higher.

**Credits:**  
1.00

**Description:**  
This course is a continuation of General Chemistry I Laboratory. Apply the basic principles of chemistry through discovery laboratory experiments with an emphasis on quantitative analysis. Execute basic analytical techniques such as the application of Beer's Law and acid-base titrations. This laboratory is designed around the foundational laboratory skills practiced by science students in a wide variety of majors.

— **CHEM-211 Organic Chemistry I**  
**Prerequisites:**  
CHEM 112 and CHEM-L112. CHEM-L211 must be taken concurrently.

**Credits:**  
3.00

**Description:**  
Introduces basic theories of structure, bonding, and chemical reactivity as specifically applied to modern organic chemistry. Includes functional groups, acid/base chemistry, nomenclature, resonance, spectroscopy, and stereochemistry.

— **CHEM-L211 Organic Chemistry Laboratory I**  
**Prerequisites:**  
CHEM-112 and CHEM-L112. Must be taken concurrently with CHEM 211.

**Credits:**  
1.00

**Description:**
Introduces synthetic organic chemistry techniques. Includes melting point determination, distillation, crystallization, extraction, chromatographic separations, and infrared spectroscopy. Discusses experimental design within the context of green organic chemistry.

- **CHEM-212 Organic Chemistry II**
  **Prerequisites:**
  CHEM 211 and CHEM L211. Must take CHEM-L212 concurrently.

  **Credits:**
  3.00

  **Description:**
  Builds on the core competencies acquired in Organic Chemistry I. Includes detailed mechanistic discussions of substitution, elimination, and addition reactions. Emphasizes organic synthesis, structure determination, and spectroscopy.

- **CHEM-L212 Organic Chemistry Laboratory II**
  **Prerequisites:**
  CHEM-211 and CHEM-L211. Must be take CHEM-212 concurrently.

  **Credits:**
  1.00

  **Description:**
  Builds on the core competencies acquired in Organic Chemistry Laboratory I. Emphasizes the characterization of organic molecules via nuclear magnetic resonance spectroscopy. Discusses experimental design within the context of green organic chemistry.

- **CHEM-314 Instrumental Analysis**
  **Prerequisites:**
  CHEM 211; CHEM L314 must be taken concurrently.

  **Credits:**
  3.00
Description:
Explores the basic techniques of collecting and analyzing data from different types of instrumentation, including: ultraviolet, visible, fluorescence, atomic and emission spectroscopy; chromatographic methods; electrochemical measurements. Students will apply these techniques to problems in chemistry, forensics, and environmental science.

CHEM-L314 Instrumental Analysis Laboratory

Prerequisites:
CHEM L211; CHEM 314 must be taken concurrently

Credits:
1.00

Description:
Laboratory experiments in chemical analysis using instrumental techniques, including spectroscopy and chromatography. Data collection and evaluation includes computer-based methods. Reports are prepared in professional style.

CHEM-331 Biochemistry I

Prerequisites:
CHEM 212/L212 or permission of instructor. CHEM L331 must be taken concurrently.

Credits:
3.00

Description:
Explores the foundations of biochemistry, including the structure, organization and behavior of proteins, carbohydrates, lipids, and nucleic acids. Topics include enzyme catalysis, kinetics, and inhibition as well as protein regulation and membrane structure. Introduces the use of biochemical literature and bioinformatics techniques.

CHEM-L331 Biochemical Techniques Lab

Prerequisites:
CHEM 212/L212 or permission of instructor. CHEM 331 must be taken concurrently
