Gold Key to Induct New Members May 2

The Gold Key Society has announced its inductees for the academic year. They are seniors Richard Dell'Aria, Patricia Hapkans, Pamela Clarke and Steve Kenney; Junior Claudia Gilchrist; and sophomores Christine Calihan and Peter Butterfield. Those admitted into the society as honorary members are alumni Patricia Costello, Dr. Lee Lieberman, professor of psychological Services, and Dr. Ilse M. Fang, assistant professor of German.

The ceremony will take place Sunday, May 2, at 2 P.M. in the auditorium. The selection was made by active members of the Society: senior Geraldine Marcinowski, president; Edward Wickham, vice president; Daniela Roubicek, secretary; and seniors Jean Alexander, treasurer, and Steve Buliga, preceptor.

The Society is designed to honor Suffolk members for service involving student activities and the University at large. The ceremony will be followed by a reception.

Other society members are alumni Mary Cahalane, Elliot Cleman, Stephen Donoghue, Susan Drevitch, Frank Holmes, James Hoole, Jay Horowitz, Carl Koenigsmann and John Merrill; Alumna Mary Hefron; Alumni Secretary Use M. Tang, assistant professor of humanities.

Suffolk Treasurer Francis X. Flannery said this program has also been made available to students at Northeastern, Boston College, and Bentley. He said Suffolk will be offering the tuition program to students each year, to relieve them of some of the burden of coming up with a large amount of money in a short period of time.

Turning to a related matter, Flannery said the $200 tuition increase for next year was made, as he put it, "in order to keep the University in the black." He explained that Suffolk has a salary base of $2 million and with maintenance costs continuing to rise and a lack of endowments coming into the University, the increase was adopted in order to keep the school on an "even keel."

The Treasurer also said he is hopeful that a bill granting state aid to private institutions would be passed by the Massachusetts legislature, thus alleviating some financial difficulties.

"Even with the tuition increase," said Flannery, "Suffolk University will still have the lowest tuition of any private four-year college in the state, and one of the lowest in New England."

Concerning the overcrowded condition of the school, Flannery observed, "If Suffolk was not crowded, it would really be in financial trouble." He explained that the University, unlike some others, is utilized practically to its fullest extent. Suffolk is open weekdays from 8:30 A.M. to 9:30 P.M. and even a few hours on Saturdays.

Flannery said the $2 million renovation of the Derne street building is almost completed. In addition, he added, "The physical plant of the whole school is just about in A-1 condition."

Nevertheless, the University still hasn't given up hope for expanding its facilities, as the search for additional space continues. The building at 56 Temple Street is being renovated and when completed, will include the Athletic office, Development Office, Alumni Office, the Building Superintendent's Office, Public Relations Office and Law Placement Office.

THE SOPHOMORE CLASS will not be returning $1 to its members as announced. The Student Government has ruled that such dispersion is not the purpose of the class funds.

Author James Michener Claims Guard Not Threatened at Kent State Shooting

New York -- Author James A. Michener says that his investigation of last May's shootings at Kent State University indicates that National Guardsmen were not under attack when they fired the shots that killed four students.

The author says that according to a photograph taken several minutes before the shooting began -- at a time when many reports claim Guardsmen were under direct attack -- at least 200 yards separated the Guards from the mass of students. Moreover, the photograph shows nearly 40 yards of empty space plus a high fence between the Guards and the parking lot where the students were shot.

Michener further that the Guard unit may unwittingly have trapped itself by taking up its position without realizing that it would be surrounded by a six-foot chain-link fence.

Michener's conclusions about the Kent State tragedy are contained in this month's issue of Reader's Digest.

His report is the second in a series commissioned by the Digest, to be published as a Reader's Digest Press book in cooperation with Random House April 30.

The author says that according to his own independent calculations, at least 113 Guard officers and men were at this time arrayed in a skirmish line along the ruins of the burned-out ROTC building. He says that the crowd confronting the Guard was between 900 and 1000, with perhaps another 2000 -- including citizens of Kent and high school students -- on the outskirts as spectators.

As the Guard advanced, Michener says, students began throwing rocks, chunks of wood studed with nails, and jagged chunks of concrete. However, he declares, most of the thrown objects fell short of the advancing troops.

Along with the missiles, "a steady barrage of verbal filth, curses and challenges came down upon the Guard. During the half hour that the Guard was in action, this rain of obscenity never let up." The Guard pressed across the Cont. on P. 8

Schools, and many of them are music students at the Longy School of Music in Cambridge and the New England and Boston conservatories. The wind players study with Miss Montgomery.

Some singers study privately, some with teachers at the New England Conservatory, and some play instruments as well as sing.

The instruments played are the following: all sizes of recorders and krummehorns, a shawm, rosenholh, a sort of small violin, viols da gamba, medieval vielle, Irish harp, psaltery, rebec, medieval fiddle, bowed lyre, guitars, lute, portable organ, bells and various percussion instruments. They are all reproductions of museum instruments and are purchased by the group with the proceeds from their concerts.

Admission will be free and refreshments will be served.

The committee on Lecture Series, headed by Dr. Dion J. Archer, chairman of the government and economics department, is sponsoring a concert of the Quadrivium Consort of Cambridge, Friday, April 30 at 8 p.m. in Room 311.

The concert, also called a "spring celebration" or an "all-university celebration with music" has met with enthusiasm from all parts of the University. It is not intended for the folk community alone, but the surrounding neighborhood as well.

The Consort is a young group of ten instrumentalists and five singers who perform "popular" music from 1100-1971, including music from Germany, England, France, Italy, Spain and the Americas.

The group feels especially that a musical experience should not have the usual barriers created by separating performers and audience, so it prefers to leave the stage and go out into the audience in the hope that the listener will become as involved as the performer in the joy of music-making.

In the words of Marleen Montgomery, Consort founder and director, "We approach the audience as equal partners in the experience of performance."

In an interview with the "Harvard Independent" last September, she adds, "Medieval music is usually performed in isolation today; it is like going to a museum. The world is getting further and further away from that sort of thing; people want to get involved in what they hear. Each performer in the group tries to reach somebody in the audience... We are trying to show them that you can feel the same way about something that was written in 1200 as something written today."

The average age of the members is 23. All of the instrumentalists teach privately or at Boston area schools, and many of them are music students at the Longy School of Music in Cambridge and the New England and Boston conservatories. The wind players study with Miss Montgomery.

Applications for Journal Editorship Due April 22

Suffolk has been awarded a charter to establish a Society of the Sigma Xi club. Formal installation will take place Friday, April 23 at 3:30 p.m. in the President's Conference Room. Dr. Raymond J. Seeger, director of the National Lectureship Program of the society, will be installing officer. The purpose of Sigma Xi, founded in 1866, is the encouragement of scientific research. The scientific equivalent to Phi Beta Kappa, its chapters include such schools as MIT, Harvard, and Boston University while the clubs comprise such institutions as Holy Cross, Emmanuel, Williams, and Lowell Technological Institute.

Following the April 23 installation, there will be a banquet in the evening at 7 o'clock at the Parker House. Dr. Seeger will address members and guests in an address, "The Humanism of Science."

GOLD KEY - May 2

On Sunday, May 2, at 3 pm the Gold key Society will formally induct its new members for this past academic year. All are welcome to attend.

A reception will follow.
Course Advising

Over April vacation a small news story appeared in the Boston Herald Traveler. It said that John E. Powers, an alumnus of Suffolk University and the clerk of the Superior Court, has asked for recognition of the Suffolk Alumni Association by the University. That's all very well and good and the Journal hopes that the alumni will get the recognition they deserve.

However, there's more behind that news story than the recognition of the Alumni Association. Mr. Powers was speaking at the hearing of Senate Bill S1274 which proposes a modification in the election procedure of the board of trustees and to which the Student Government Association had proposed an amendment with the hope of getting student representation on the board.

It's practically all over now. Mr. Powers was the only one who spoke in favor of the bill. The opposition was represented by President Thomas Fulham, Board of Trustees Chairman John E. Fenlon, and Mr. John Griffin, another board member.

We understand Mr. Powers' testimony had either been disregarded or ignored at the hearing. He had proposed an amendment with the hope of getting student representation on the board.

In our opinion, Mr. Powers was the only one who spoke in favor of the bill. The opposition was represented by President Thomas Fulham, Board of Trustees Chairman John E. Fenlon, and Mr. John Griffin, another board member.

As Professor Shawcross holds his meeting today with his test group, we remind all students that from now to May 7 has been about the whole matter of course advising. If a student must feel that he will get good advice.

Starting today, Professor Shawcross is meeting with a test group of marketing and management majors to show that course advising doesn't have to be a joke. The object of the meeting would be to check off courses already accomplished against those listed in the catalogue to prevent problems that might prevent graduation.

At times the computer is the only bunch of people who have a decent chance of making it done. If the next elections produce at least a higher percentage of capable people than in the past, something might get done next year.

What is a capable person? The most obvious answer is a person who is hard-working, enthusiastic and sincere. That's true, but how capable (creative and, most of the time, good) the candidate is talking about.

We hope to take twenty of these students in the test group and to the test group.

Chairman John E. Fenton, and Mr. Charles Daly of Boston, chairman of the House Committee on Education.

The question is, how many of those who are talking about the possibility of capable people. The only group which was to be this year is one who is creative and, most of the time, good.
Letters to the Editor

Dear Editor:

With all the fire bombings, assaults, dissension and demonstrations in the schools today, I wish to share with you and your readers if I may, the memory of a very pleasant evening I had.

On Saturday night, March 27th, at Suffolk University, I saw students perform in a musical comedy version of the famous temperance drama "Ten Nights in a Barroom" by William Pratt. I would like to congratulate the students on their professional-like presentation.

Why is it that only the bad deeds of some students are so often publicized? I usually consider myself "silent majority" but would like to take this opportunity to speak out and say I am very thankful to see that the money from our taxes that go toward education is not being spent in vain. It is also very reassuring to know that some of our students are not only interested in gaining an education but are also willing, in their spare time, to work together as a group to bring pleasure and laughter to other people of the community.

There was such a spirit of enthusiasm bubbling over from these students that it reached across the stage into the audience. I couldn't help being caught in the wonderful zest myself. I began clapping in time to all the songs. The closing number, "Look for the Silver Lining," had not only me, but most of the audience singing along spontaneously.

For one beautiful evening, I was encompassed by that special kind of magic that came from the hearts of these young people and found its way in the hearts of the audience.

I went backstage afterward and congratulated everyone. I had a chance to speak to, and I was not alone. The appreciation showed in their eyes and voices and I couldn't help being aware of the great feeling of togetherness that filled these young people. Truly envied them.

Once again, I would like to say, "Congratulations and thank you" to all the members of the Suffolk University Art Players and to all those inside and outside of the University who encourage and support these fine students.

They worked long and hard to produce this play and the many other plays they have put on, (most of them free of charge to the public). Let's give them the credit they so richly deserve and wish public). Let's give them the credit they so richly deserve and wish they carried over from these students that it reached across the stage into the audience. I couldn't help being caught in the wonderful zest myself. I began clapping in time to all the songs. The closing number, "Look for the Silver Lining," had not only me, but most of the audience singing along spontaneously.

Student Elected to School Committee

by Barry Brodsky

The Journal’s latest issue had a story on two Suffolk students, Ron Guba and Joe Shanahan, who ran for political office in their hometowns. A third student, Neal M. Brown, not only ran but was a seat on the Hull School Committee.

By winning, Brown became the youngest person ever to hold an elective office in his town. The 23-year-old senior, a Business major and a transfer student from Cape Cod Community College, where he served on the student senate and was vice president of his class, ran because of his active interest in politics and because "it was the right time to make the move -- the 19-year-olds had the vote and people were looking for a new politics."

Born and raised in Hull, he had been through the entire school system and was familiar with its problems. A lot of people asked me to run because I’ve been so vocal,” Brown has a reputation for speaking out at town meetings and has written editorials in his local paper. Brown is married and has two children and believes this helped his campaign because “it made people feel I had more maturity.”

"Student involvement in politics is a necessity,” he said. Next year Brown hopes to form a third party in Hull designed to have a candidate under 30 run for every elective office available. He doubts if many will win but feels it important that youth have a voice.

"The local electorate, he believes, is more issue-oriented than ever before. “They’re more concerned

Mary Ann Carr, Liz Kalinoski
Piano: Kevin Cummiskey

Love comes to Sample Swichel (Dick Nelson) and Mehitabel (Barbara Spears).

Simon Slade (Ed Povitch) welcomes weary traveller Romaine (Maynard Gregory) to town and tells him of the infamous “Sickle and Sheath.”

Harvey Green is “The man who broke Monte Carlo” (Kevin Berard).

“In spite of all my good intentions, here I am again!” Nick Zimmerman as hopeless drunk Joe Morgan.
"They've killed young Willie Hammond!" (left to right) Edward Povitch, Dick Nelson, Dave Graziano and Kevin Berard.

Simon Slade (Ed Povitch) stands beneath an image of vice (unknown).

Little Mary (Rosemary Brady) looks pretty good for a kid on her deathbed. Her parents (Barbara Morrison and Rick Zimmerman) don't seem to notice.

Traveller Romaine (Marnard Gregory) arrives at the "Sickle & Sheath."
Students Encounter Ex-Addict During Drug Education Day

Representatives of Marathon House conduct an informal discussion with Suffolk students on the problems they have faced as a result of drug abuse.

Cont. from P. 2

field. “But,” writes Michener, apparently none of the Guardsmen realize that along the far side of this field ran a six-foot chain-link fence, topped by barbed wire. If a unit were to be surrounded in this steel pocket, there would be no escape.

As the troops took up their positions against the fence, there was a flurry of rocks. Seventeen Guardsmen knelt on one knee and assumed a firing position.

At this point, Michener notes, many reports have filed of “a constant shower of rocks” and “mad, screaming masses of students encircling the Guard, attacking them on all sides.” But those reports are evidently wrong, according to photographic evidence.

The photograph was taken by Beverly K. Knowles, a Kent State student from Alliance, Ohio, from the practice field,” Michener writes, “some of them. A few kids, maybe ten, ran inside the fence to shoot them.”

Michener notes that dozens of reports of snipers were investigated, but that “no shred of evidence was found to support any of them.”

When the troops reached the pagoda, Michener writes, “some Guardsmen on the right flank suddenly stopped, wheeled, and aimed their rifles toward the students who had climbed on the south side of Taylor Hall. There was a single shot, then a prolonged but thin fusillade. The shooting lasted 13 seconds.”

Credit for the lack of even greater bloodshed is given by Michener to faculty members who “took upon themselves responsibility for informing the Guardsmen that ‘apparently none of the Guardsman, in a shower fusillade, was hurt. “But,” says Mrs. Agte, a sociology major, “no administrators were in evidence, no coaches, no counselors.” Only the faculty teachers.

The author also describes the tragic efforts of parents to find out what happened to their children.

He quotes Mrs. Barbara Agte, a psychology major: “No one felt the responsibility for informing the parents of the dead students.”

The performance involved the Marathon students’ tour of campus, the Suffolk Drug Information Center, the Marathon House, and the Suffolk Drug Information Center. Ed Borke of Turnabout, said students had not shown much interest, but that at other colleges interest had not been high.

The Suffolk Drug Information Center said questions on drugs could be answered in R.I., Room 15. The Suffolk Drug Information Center group recently printed pamphlets, explaining different drugs and their effects.

**EUROPE**

Year round: students, study abroad, work, travel, internships, courses, employment opportunities, discounts.

Sponsored by SAA
VA News

The Veterans Administration has announced standards for its mobile home program which guarantee up to 30 percent of loans — up to a maximum of $10,000 for mobile homes, or up to $17,500 if the loan is also for a fully developed lot.

The mobile home program was established by PL 91-506 and VA has prescribed regulations to govern the programs as mobile home sites, construction standards and written manufacturer's warranties.

There are also qualifications for mobile home sites, mobile home locations, basically the same as those for an average subdivision on which single family homes are built. They must have the same facilities, such as public transportation, water, sewage, electricity, etc.

The new law empowers VA Administrator Donald E. Johnson to set interest rates at levels to insure adequate capital for mobile home loans made by lending institutions. He set the interest rate at 10.75 percent.

The interest rate for money used to purchase a lot to make improvements was set at 7 percent.

The VA also explained that mobile homes purchased under its program must be at least 40 feet long and 10 feet wide, with a minimum of 400 square feet. Also eligible for purchase under its program are mobile homes purchased under its park sites, construction standards and mobile home program.

School Benefits

The VA reported that 175,000 veterans who died of nonservice-connected disabilities and 65,000 wives of veterans totally disabled in service were eligible for benefits for generally up to 36 months of educational benefits.

VA noted that 242 widows and 1,868 wives have already received such benefits with December 1970 as the peak month when 4,582 were in training. The number of participants is expected to be even higher in the spring school semester.

Also eligible for benefits under a law which became effective December 1, 1968, are widows of veterans who die of non-service-connected disabilities and 65,000 wives of veterans totally disabled in service. Applications should be filed by veterans who died of nonservice-connected disabilities before December 1970 or by their surviving spouses within a year of the veteran's death. Widows must present a certificate of eligibility from the VA, and the VA office in Boston reports that Mrs. Elizabeth Williams, associate professor of psychology and psychological services at Suffolk, Mass., has recently done research work in the field of homophobia and has spoken before a meeting of the Student Homophile Association. During the interview, she emphasized, not the lecture aspect of that meeting with this group, but the encounter value. "I went to ask questions, and learned a lot," she said.

Citing the work previously done in the sex research field, she concluded that a change in public awareness concerning homosexuality is necessary. Developments in the field of sex research were achieved by the Kinsey report and the work of Masters and Johnson. Both have begun to enlighten the public concerning human sexuality. But more attention needs to be given to the social implications of human sexual response, especially in the area of homosexuality.

"The work of Dr. Evelyn Hooker and research conducted by the New England Psychological Association have also served to set focus attention on this area. Homosexuality must be seen," said Mrs. Williams, "as a sexual preference not a disease. We must rid society of repressive laws which are so far too punitive in dealing with the homosexual. More importantly, we must rid society of the attitudes which force the homosexual into living a lie in great anxiety. We must learn to treat homosexuals as equals and avoid the harsh treatment which so often has been used in reaction against that which we cannot or will not understand.

By far the biggest problem confronting homosexuals is living in society without the ostracism imposed by the so-called "straight" community. Abusive treatment by government and the business community is frequently encountered by the homosexual and even the medical community is lax in recognizing the need for understanding and open-minded action in their field.

The reasons for homosexuality are complicated, said Mrs. Williams. It is a problem in which familial love breaks down, heterosexuality is not communicated and this results in behavior deviating from the norm. It is fairly obvious that ignoring any problem does not dismiss it and emotional reaction does not significantly change it. What, then, must be done? Mrs. Williams strongly asserts that we must aid in the homosexual adjustment to society and study it further from this point. The most recent work in this regard is Martin Hoffman's "The Gay World," which takes a fresh look at this age-old topic.

Top Prizes at Stake in Photo Contest

One of the most emotionally explosive issues confronting man in modern society is the definition of normal sexuality. This was the subject of a brief interview with Mrs. Elizabeth Williams, associate professor of psychology and psychological services at Suffolk, Mass. Mrs. Williams has recently done research work in the field of homophobia and has spoken before a meeting of the Student Homophile Association. During the interview, she emphasized, not the lecture aspect of that meeting with this group, but the encounter value. "I went to ask questions, and learned a lot," she said.

Citing the work previously done in the sex research field, she concluded that a change in public awareness concerning homosexuality is necessary. Developments in the field of sex research were achieved by the Kinsey report and the work of Masters and Johnson. Both have begun to enlighten the public concerning human sexuality. But more attention needs to be given to the social implications of human sexual response, especially in the area of homosexuality.

"The work of Dr. Evelyn Hooker and research conducted by the New England Psychological Association have also served to set focus attention on this area. Homosexuality must be seen," said Mrs. Williams, "as a sexual preference not a disease. We must rid society of repressive laws which are so far too punitive in dealing with the homosexual. More importantly, we must rid society of the attitudes which force the homosexual into living a lie in great anxiety. We must learn to treat homosexuals as equals and avoid the harsh treatment which so often has been used in reaction against that which we cannot or will not understand.

By far the biggest problem confronting homosexuals is living in society without the ostracism imposed by the so-called "straight" community. Abusive treatment by government and the business community is frequently encountered by the homosexual and even the medical community is lax in recognizing the need for understanding and open-minded action in their field.

The reasons for homosexuality are complicated, said Mrs. Williams. It is a problem in which familial love breaks down, heterosexuality is not communicated and this results in behavior deviating from the norm. It is fairly obvious that ignoring any problem does not dismiss it and emotional reaction does not significantly change it. What, then, must be done? Mrs. Williams strongly asserts that we must aid in the homosexual adjustment to society and study it further from this point. The most recent work in this regard is Martin Hoffman's "The Gay World," which takes a fresh look at this age-old topic. Written by a photographer who studied homosexual life in the San Francisco area, the emphasis is, as Mrs. Williams reaffirms, one of tolerance.

What is at stake is summed up by Mrs. Williams — intolerance seriously threatens the creative power of all of us.

EYE EXAMINATIONS

The Clinic of the Massachusetts College of Optometry is now accepting appointments for comprehensive vision examinations.

By special arrangement, students may obtain any diagnostic services offered by the Clinic at reduced fees. If spectacle or special therapy is needed, the patient will be advised accordingly and given the option of having the prescription filled by the Clinic at nominal fees or having the prescription filled elsewhere.

EXAMINATIONS BY APPOINTMENT ONLY:

Clinic Hours:

Monday to Friday: 8:30 a.m. to 5:00 p.m.
Saturday: 8:30 a.m. to 12:00 noon

SCHEDULE

ELECTIONS — Thurs., April 29 — Fri., April 30 in the cafeteria

1. A candidate must be a bonafide member of the class in which he or she is seeking office.

2. A candidate must not be on academic or disciplinary probation.

3. To be placed on the ballot a student must obtain at least 25 valid signatures on his nomination papers.

4. Posters may not be larger than 864 sq. in. and may not be posted on class, lockers, painted walls, dept. bulletin boards, classrooms, main lobby. Each candidate may not post more than 2 posters per floor, with the exception of the cafeteria

5. Students may sign one petition for each office e.g., 1 pres., 1 sec., 1 3 rep.

6. Candidates may submit short statement of 50 words or less that the election committee will publish.

VA office said 104 veterans had completed comprehensive vision examinations. The Clinic of the Massachusetts College of Optometry is now accepting appointments for comprehensive vision examinations.

By special arrangement, students may obtain any diagnostic services offered by the Clinic at reduced fees. If spectacle or special therapy is needed, the patient will be advised accordingly and given the option of having the prescription filled by the Clinic at nominal fees or having the prescription filled elsewhere.

EXAMINATIONS BY APPOINTMENT ONLY:

Clinic Hours:

Monday to Friday: 8:30 a.m. to 5:00 p.m.
Saturday: 8:30 a.m. to 12:00 noon

SCHEDULE

ELECTIONS — Thurs., April 29 — Fri., April 30 in the cafeteria

1. A candidate must be a bonafide member of the class in which he or she is seeking office.

2. A candidate must not be on academic or disciplinary probation.

3. To be placed on the ballot a student must obtain at least 25 valid signatures on his nomination papers.

4. Posters may not be larger than 864 sq. in. and may not be posted on class, lockers, painted walls, dept. bulletin boards, classrooms, main lobby. Each candidate may not post more than 2 posters per floor, with the exception of the cafeteria

5. Students may sign one petition for each office e.g., 1 pres., 1 sec., 1 3 rep.

6. Candidates may submit short statement of 50 words or less that the election committee will publish.

Sports

by Ken Masson

Sports is the password this spring at Suffolk. Three out of four intercollegiate teams are in action this season. They are baseball, golf and tennis.

Each team has great depth and looks strong. It should prove to be one of the most interesting sports seasons Suffolk has ever had.

Baseball

The team is already five games deep into a fifteen-game season. There is high hopes of continuing the success of past seasons with good indications that this could be the best team yet. Jim Nelson is the coach.

Golf

The team, which lost the fall in the Little Four Intercollegiate Golf Tournament, opens the season today. Merrimac and Brandeis are their first competitors.

Tennis

After a winter of preparation, the team began its spring season today. Merrimac and Brandeis are their first opponents.

Upcoming Sports

For baseball, golf and tennis fans, the following may interest you:

On April 22, the baseball team will play Clark University at 3 p.m.

On April 23 the golf team will play Curry College at 1:30 p.m.

On April 22, the tennis team will play Lowell State College at 2 p.m.

For places on the above see athletic director Charles Law.

NCAA

The NCAA baseball championships will be held at two places this year. The first, June 3, will be at Southwest Missouri State College, Springfield, Missouri. The other, on June 11, will be at Creighton University, Omaha, Nebraska.

In a recent Boston Globe article by Ray Fitzgerald, Suffolk's Captain Allan Dalton said that only an average of eight students showed up at the basketball gym.

We students at Suffolk should hang our heads in shame. There is still a way, however, to back up Suffolk sports with your attendance. The baseball team needs your help to cheer them on to victory. Go out and see at least one game. Is this too much to ask of students who want to be involved?

No game, no season, no championship has ever been won without athletes giving everything they've got. The late Bernard M. Baruch said in 1957, "I always repeat to myself 'two and two still make four' and no one has ever invented a way of getting something for nothing."

A good intramural program should encompass many sports. The complete program might consist of football, bowling, tennis, baseball and softball. Is this too much to ask of a school that is a University?

Pro-Draft takes Dalton

Suffolk basketball captain Allan "The Dare" Dalton has been drafted by both the Memphis Pro and the American Basketball Association and the Boston Celtics of the National Basketball Association.

Dalton is the first player in Suffolk’s 25-year basketball history to be drafted by a professional basketball team. He was chosen by Memphis on the 20th round and by the Celtics in the supplemental phase of the NBA draft.

Only other New Englanders to be selected by both leagues were Boston College's Jim O'Brien, Holy Cross' Bob Kissane and Assumption's Jake Jones.

A 6 foot 2 inch backcourtman, Dalton is a junior at Suffolk. A transfer student, he was eligible for this year's pro draft because his original class graduated in June.

Dalton has been a standout player for two and one half seasons of Suffolk. A year ago he averaged 26.2 points a game and during the past season his average was 21.4 points per contest. He has also been Suffolk's leader in assists for two seasons. Among the basketball honors accorded him this season were selection to the Eastern College Athlete Conference all-star team for Division III, a member of the University of Hartford's all-opponent team, and a member of the third team of the United Press International Coaches All New England College division team.

Son of Mr. and Mrs. Robert J. Dalton, now of 132 Tosca Dr., Brockton, Dalton is presently undecided on which league he will try. "I would actually like to try out for both the Celtics and the Memphis team," Dalton said. "Realistically, my chances are probably better in the ABA, but it would be a tremendous challenge to try out for the Celtics, a team I've followed since I was a kid, and an even bigger thrill to make the club."

Dalton's coach, Charlie Law, who's been coaching basketball at Suffolk for 25 years, thinks Allan has a good chance of catching on in either league.

"Allan's got as much talent as any player around this area," says Law. "He's a lot quicker than most players and there are few boys who love to play basketball or spend as much time at it as Allan. I think he could surprise a lot of people."

Dalton, formerly of 39 West Tremont Street, Dorchester, is a student of Hyde Park High School.

Parsons: 71-'72 Captain

Paul Parsons, a 6'3" junior forward from Watertown, has been elected captain of the 1971-72 Suffolk basketball team.

Parsons, a former St. Mary's of Cambridge High School star, averaged 17.4 points a game the past season and led the Rams in rebounds with 273. In two years of varsity play, he has scored 726 points and ranks ninth among Suffolk’s all-time scorers. He holds the single game rebounding record (27) for Suffolk, set against Merrimack College, 1969-70 season.

The son of Mr. and Mrs. Claude Parsons of 5C Lowell Avenue, Watertown, he succeeds Allan Dalton as Suffolk's court leader.

A Dean's List student the past semester, Parsons is a management major.

Baseball Schedule

April

20 Curry College 3 p.m.
22 Clark University 1:30 p.m.
24 Assumption 1 p.m.
28 Salem State 3 p.m.
30 Brandeis 3 p.m.
April (2 Games)

5 Babson 3 p.m.
8 Hartford University 12 p.m.
30 Brandeis (2 Games)

11 Nichols College 3 p.m.
15 War. Tech. 2 p.m.
20 Framingham St. 3 p.m.
22 Bates College 2 p.m.

Tennis Schedule

April

22 Clark University 2 p.m.
23 Curry College 1:30 p.m.
25 Clark and Lowell Tech 1 p.m.
29 Assumption and Babson 1 p.m.

May

4 Lowell State 12 noon
6 New England at Ellington Corn. 2 (days)
11 Bryant College 1 p.m.
14 Babson College 12 noon

Parsons Schedule

April

20 Merrimack and Brandeis 1 p.m.
23 Curry College 1 p.m.
25 Clark and Lowell Tech 1 p.m.
29 Assumption and Babson 1 p.m.

May

4 Lowell State 12 noon
6 New England at Ellington Corn. 2 (days)
11 Bryant College 1 p.m.
14 Babson College 12 noon

Opinion

Why doesn't Suffolk have an intramural program? For baseball, golf and tennis...
Student Suspicions Reflected in Task Force Review

By Dick Jones

Alumni Day festivities are being unveiled this week at Suffolk, and you should be getting a mailing from the school. We know that it will be on Saturday, June 5th, and the Punch-Sponsored Alumni News will publish a series of articles about the events. We are excited about our strong favor to its mission.

Augustus F. Wagner, Jr., LLB67, is a former counselor to the 알론. We do not know if he is staying in the building, but if so, we will let you know.

The Academic Committee has recommended several meetings, researching and testing to assure a favorable reaction to its mission.

In a recent article, the Board of Trustees has reviewed the academic program and has recommended several changes. They feel that the program is not as strong as it could be, and they want to make improvements.

The Academic Committee has also recommended that the university should be given a mailing list of all students, and that the list should include information about their academic progress. This will allow the university to keep track of student progress and to provide them with the necessary support.

The Academic Committee has also recommended that the university should be given a mailing list of all students, and that the list should include information about their academic progress. This will allow the university to keep track of student progress and to provide them with the necessary support.
The baby seal in the photo was one of 50,000 killed in the Gulf of St. Lawrence, one of over half a million seals clubbed, speared, shot, gaffed during the 1970 Canadian-Norwegian slaughter in the Atlantic.

Don't believe furriers who would persuade you that Friends of Animals has been "misleading" you, that any slaughter anywhere is done for the benefit of the seals.

I, Alice Herrington, testify that on March 21, 1970—the second day of the Canadian season on seals—I saw the same brutal massacre against which Friends of Animals, of which I am president, has been protesting for years.

As the bubble-domed helicopter flew low over the first day's kill, I saw mother seals nuzzling the skinless corpses of their babies. Standing ten feet away from the killers on the ice floes, twenty miles out in the Gulf, I saw baby seals, clubbed twice, raise their heads as they were sliced open. Other babies were battered as many as fourteen times while the mothers watched in terror and stress.

If You Are One Who Cannot Be Indifferent to the Suffering of Other Creatures

YOU CAN HELP
First—by refusing to garb yourself in the agony of another, by refusing to buy the skins of wildlife.
Second—by causing this advertisement to be inserted in your local newspaper. (A mat will be sent upon your request to Friends of Animals. See coupon.) Third—by sending a tax-deductible contribution to Friends of Animals, Inc., a non-profit organization that intends to pound on the world’s conscience until sentient men and women everywhere are made aware of the unnecessary cruelty and destruction being inflicted upon animals. Your contribution will be used to plead for those creatures who cannot speak for themselves but who dumbly implore your pity.

Friends of Animals, Inc.
11 WEST 60TH STREET
NEW YORK, N.Y. 10023

□ Enclosed is my tax-deductible contribution to help stop the slaughter of marine mammals. Please add my name to your mailing list.
□ Send me a mat of this advertisement so that I can place this advertisement in my local paper at my own expense (also tax-deductible).
