SPRING REGISTRATION MAY TOP 1973 ENROLLMENT TOTAL

Enrollment figures for the Spring Semester may surpass the 1973 total of 3792 students in the college divisions, according to College Registrar Mary A. Hefron.

Miss Hefron said that as of Jan. 18, a total of 3721 students had registered for the Spring semester. Her projected figures predict enrollment will approximate the 1973 total or maybe better it, Miss Hefron added.

A breakdown shows 1875 day students enrolled in undergraduate, graduate and special classifications and 1733 evening students listed. In addition, 66 students are enrolled in the Western Electric program, 18 through the cooperative program with Emerson College, 13 under the flexible campus program and 16 unclassified.

Registrar Hefron noted that graduate business program is up 25 students from 373 to 398 while graduate education has dipped slightly from 335 to 320.

She said the shorter fall schedule proved helpful in many ways. "Some 80 per cent of the students registered in December," she said. "This was very helpful in that we were able to reduce crowd congestion and registration came at a time when the pace was a little slower. It also enabled us to plan schedules and classroom arrangements well ahead of time."

Miss Hefron said that after initial communication problems are overcome and faculty and staff adjust to the new schedule calling for classes ending before Christmas, the process should move very smoothly in future years.
