$2.2 MILLION RENOVATION OF 32 DERNE ST. BUILDING

A $2.2 million project which will convert the former Wright & Potter printing building to a Suffolk University classroom building is now underway. Target date for completion is September of 1975.

Contract for the conversion of the 60-year old, six-story structure was awarded to Vappi & Co., Inc. of Cambridge. The 32 Derne St. building will house 14 new classrooms and 67 faculty offices. It will be the new home of Suffolk's English, Education, Psychology, Sociology and Language departments.

The first floor will be used for student recreational lounges and offices.

The architects, Knight, Bagge & Anderson of Boston said design plans call for the installation of new floors, walls, ceilings, elevators and stairways and creation of a new main entrance on Derne St.

Following consultations with the architectural committee of the Beacon Hill Civic Association and the Boston Redevelopment Authority, it was decided that the structure's original lines would be preserved so that it will continue to harmonize architecturally with the State House and other traditional buildings nearby.
