LET'S GET THE FACTS IN HAND

Some of us have the feeling that there is a real risk of presidential elections before the end of the year. This opinion is shared by our editorial board. If we do not want our editorial board to be split, that will be the best way for it.

PRIVY SYSTEM DEMOCRACY

Ten months have passed since the election of the Democratic National Administration to office. For twelve long years, the majority rule of the country has been countenanced. This victory made it possible for us to vote for the administration, and the result was convincing.

What happens now? The Republican Party is preparing to do everything possible to prevent the present administration from returning to office.

These are the facts. And we should all be thankful that there is no true Republican Party in this country.

MIGRATION

Increasingly there are coming to me reports from the United States concerning the migration of people from the United States to other countries. The trend is due to overpopulation and the desire for a better life. The United States has always been a land of opportunity, and the people of the United States have always been willing to work hard for a better life. This trend is likely to continue.
