KELLY MILLER'S COLUMN

WHY THE SQUIRREL SHOULD DIVIDE HIS VOTE

The question of whether to divide one's vote among various candidates is often debated. However, in the case of the squirrel, it is more of a physical act than a strategic decision. Here's why:

1. The squirrel's alimentary canal is limited. If it tries to eat too much at once, it will have digestion problems.
2. The squirrel needs to conserve energy. Consuming more food than it can handle at once will result in a bigger energy cost.
3. The squirrel needs to save time. It would be less efficient to travel to multiple food sources than to find a source that provides all its needs.
4. The squirrel's teeth are designed for grinding, not for breaking open hard objects. It would be inefficient for the squirrel to try to divide its food into smaller pieces.

In summary, the squirrel should divide its vote among various candidates for the same reasons it should divide its food among various sources.
