Students shutdown SU

Classrooms like a 'Ghost town'

Students have shutdown Suffolk University, the college named a 'Ghost town' on the campus.

Students get voting power on student-trustee committee

New financial aid forms include faculty remarks

Students gain voting power on student-trustee committee

Even though the student group agreed with the alumni group on the issue of student voting power, the student group wasn't satisfied with the results so it is back to the drawing board for the student group.

The group actually agreed before the meeting with the faculty group in a letter that the student representatives be reinstated. The student group isn't happy with that solution, but they are not sure what to do if they can't get the student representatives back on the student-trustee committee.

"We need the students on the committee because the students have a lot of say in the decision-making of the board and they're a legitimate part of the college," said Board Chairman Vincent A. Mallozzi, who is also the Business Manager of the College.

I think what has to be brought is a student perspective of the issues that are being brought to the committee," he said.

The student group and the faculty group have both agreed to work together to find a solution to this problem.

New financial aid forms include faculty remarks

Janet E. Peterson

Janet E. Peterson is a reporter for the student newspaper of the college. She is also a student of the college. She is working on a story about the new financial aid forms and the faculty remarks that are included on the forms.

The new forms are a part of the college's "Financial Aid Office" program and they are designed to help students understand their financial aid options.

"The new forms are a part of the college's "Financial Aid Office" program and they are designed to help students understand their financial aid options," she said.

The new forms include information about the different types of financial aid available, the eligibility criteria for each type of aid, and the application process for each type of aid.

The forms also include information about the college's financial aid policies and procedures, and the contact information for the financial aid office.

"The new forms are a part of the college's "Financial Aid Office" program and they are designed to help students understand their financial aid options," she said.

Undergrads supported by law students

By Jillian Paradise

The Student Bar Association (SBA), in conjunction with the Suffolk Law School, is offering a unique opportunity for undergraduates by providing a forum to engage with challenging issues and trends in the legal field. This initiative is designed to foster knowledge, discussion, and networking opportunities for students who are interested in pursuing legal careers or simply gaining a deeper understanding of the law.

Long wait for proposal on Interdisciplinary Studies

By Fred Parnass

The proposal for the creation of a new Interdisciplinary Studies program has been a long time coming, and the wait is finally over. Following the recent approval of the proposal by the Suffolk Law School Council, the program will be introduced in the fall of this year, offering students an exciting new academic path.

The program, which will be housed in the law school, will offer a range of courses focusing on various interdisciplinary topics, providing students with a unique opportunity to explore the intersection of different fields.

A top S.U. administration official expressed concern about the S.U. president's recent actions in relation to the Student Association. The official said that the president's decision to cut funding for student activities could have serious implications for the future of the university.

It's a time of cutbacks, and each of us must be prepared to make sacrifices. We need to be aware of the decisions being made by our campus leaders and support those who work hard to maintain a quality education system. Our university deserves support from all of us.

We must also look at what the student association is proposing. In the past we've stood up for our rights and demanded fair treatment. As students, we can make a difference.

The sun shines if shadows cast on Groundhog Day

by Don Holba

Lawrence features a unique event on Feb. 2, Groundhog Day. The great Philadelphia Groundhog, Punxsutawney Phil, will cast his shadow on the ground, predicting six more weeks of winter weather.

Groundhog Day is celebrated in the U.S. and Canada and is considered a folk holiday. The tradition dates back to the early 19th century. It is believed that if the groundhog casts a shadow on Feb. 2, it means that winter will continue for six more weeks, and if there is no shadow, spring will arrive early.

The day is celebrated in various ways, such as holding races with groundhogs or planting special seeds that will sprout if the groundhog casts a shadow.

Kung hay fate choy or wishing you prosperity

by Mark Mark

The Chinese New Year is celebrated with special foods and traditions. The most popular of these is the "Kung hay fate choy" or wishing you prosperity. This phrase is often shouted to wish others good fortune.

The Chinese New Year, also known as the Spring Festival, is one of the most important holidays in Chinese culture. It is a time for family reunions and enjoying special dishes.

The traditional foods include dumplings, spring rolls, and sticky rice. These foods are believed to bring good luck and prosperity.

The day is celebrated with fireworks, parades, and other festivities. The Chinese New Year festival is a time of joy and happiness, and it is a symbol of hope and renewal for the coming year.
