Exhaust system in caf faulty

by Maria Givens

Also, there was an interesting resignation from the Junior/Senior Week planning team. Joe Brown, the co-chair of Junior/Senior Week, has decided to step down from his position. Joe has been a valuable member of the planning team for the past two years, and his resignation has come as a surprise to many. Joe has been instrumental in organizing the various events, and his departure will be felt by the team. The planning team is now looking for a replacement to fill Joe's shoes. The new co-chair will be announced in the near future.

Junior/Senior Week plans are made; a smorgasbord from March 13-18

by Maria Givens

The Junior/Senior Week committee is making progress on their plans for this year's event. The committee, led by co-chairs Joe Brown and Sarah Johnson, has been meeting regularly to discuss and finalize the details. The event is scheduled to take place from March 13-18, and a smorgasbord of activities is planned for the entire week. The exact details of the event are yet to be announced, but it is expected to be a fun-filled week with various activities for students to enjoy.

SGA, Council combine energies

by Maria Givens

The Student Government Association (SGA) and the Student Council have combined their energies to work on a new project. This project is currently in the planning stage, and more details will be announced in the future. The SGA and the Student Council are working together to ensure that the project is successful.

President's Council allocates $500 for Junior/Senior Week

by Rosemary Radski

The President's Council allocated $500 to the College's Junior/Senior Week. President Brown said that the decision was made based on the feedback from last year's event. The allocation will be used to cover the costs of planning and organizing the week-long celebration.

In brief:

Two threatened

Two students were threatened by a group of people on campus. The incidents occurred on the 3rd and 4th of April. The students were not injured but were shaken by the experience.

Woman injured

A woman sustained head injuries after falling on campus. She was taken to the hospital and is expected to make a full recovery.

Escapee caught

An escapee from the state prison was apprehended by police yesterday. The escapee had been on the run for two weeks.

Briefcase taken

A briefcase containing expensive items was stolen from a student's dorm room. The police are investigating the crime.

Student faints

A student hurried to the hospital after fainting in class. The student is expected to recover.

A student who had been absent recently caught up with the rest of the class.
High School journalists honored; awarded over $4,000 in scholarships

by Nina Davis

The National Scholastic Press Assn has awarded over $4,000 in scholarships to high school journalists. The awards, totaling $5,000, were presented to students at the National Scholastic Press Assn convention in St. Louis in late January.

The awards include a $2,000 scholarship to the student whose overall performance is judged highest. The winner is Barry Karp, a junior at Tappan Zee High School in Upstate New York. He will be honored at the NSPA convention in Orlando, Fla., March 4 through 6.

The awards were made in recognition of the student's work in both print and broadcast media. The winners were selected by a panel of judges who evaluated the students' work on the basis of their work in the past year.

The National Scholastic Press Assn, founded in 1937, is a national organization of high school journalism students and their advisors. The organization sponsors several national competitions, including the annual Scholastic Newswriting Awards program, which recognizes outstanding achievement in journalism.

Awards for individual achievements include the National Scholastic Press Assn's Best Student Editor Award, which is given to the best student editor in the country. The award is presented to the student whose work is judged to be of the highest quality.

In addition to the $2,000 scholarship, Barry Karp will also receive an expense money to help cover the cost of attending the NSPA convention.

A job well done
Pumping pedals through puddles, potholes to alleviate parking plight

by Don Mairanos

Not a bad idea, but we do hope, too, that the University of British Columbia's bicycle enthusiasts can take it up from here. If they can, it might mean that the University can again embrace the bicycle as a mode of transportation for its students, faculty, and staff.

The idea is simple: students could pump their bikes through puddles, potholes, and other obstructions to make the roads more passable for other students, faculty, and staff. It's a small gesture, but it could make a big difference for those who need to get to class or work without the hassle of dealing with slippery or uneven road surfaces.

The students who pump their bikes would be rewarded with a little recognition and perhaps even some sort of incentive, such as extra points for their class or department. This would encourage others to join in and help make the roads safer and more accessible for everyone.

Of course, there are some challenges to overcome. For example, the students would need to be trained in how to pump their bikes effectively and safely. They would also need to be aware of any potential hazards, such as water rushing into the road or debris being displaced.

But if the students can rise to the challenge, they could make a real difference. And who knows, maybe this could even be the start of a new tradition at the University of British Columbia: pump your bike through puddles, potholes, and other obstructions to make the roads more passable for everyone.
A pizza is just a pizza, right? No, new kinds appear yearly

By Don Stello

Pizza is a much loved food. It is found in every part of the world, from Italy, to America, to Japan. The pizza has been around for many years, but there are still new kinds being developed every year. For example, in 1979, a new pizza was created in Japan called the "Shrimp Pizza." This pizza was a big hit and many more have been developed since then.

However, some people argue that pizza is just a pizza, no matter how it is made. They say that all pizzas are the same and that there is no point in trying new ones. But, this is not true. Each pizza is unique and has its own special flavor.

Some people even say that pizza is not even a food, but rather a type of artwork. They say that the art of making pizza is as important as the art of painting or sculpture.

In conclusion, pizza is not just a pizza. There are many new kinds being developed every year, and each one is unique in its own way. So, the next time you think about ordering a pizza, think about all the different possibilities there are.
Gorkes shock Blazers

By Joe Phelan

Nick Gorkes, in his first year as coach, ended the Blazers in the first round of the playoffs with a 65-47 win on Sunday. The gorkes outscored the Blazers 13-3 in the final quarter of the game.

The Gorkes team has had a difficult season, but the coach said the players have worked hard and are improving. "The team is improving," he said. "We're not a bad team." The coach added that he hopes to see more improvement in the future.

Rams review: height shortage hurt team in '78-'79

By Joe Plaxico

A battle for height is always a key to a football team's success. The taller players are generally more effective in blocking and pass coverage, and they usually have the advantage in the trenches. In the 1978-'79 season, the Rams experienced a serious height deficiency, which played a significant role in their disappointing season.

Back in October, when the Rams were still struggling to find their footing, the team's height deficit became even more apparent. The defense had a hard time containing the opponents' running game, and the offense struggled to move the ball consistently.

The turning point came in November when the Rams hosted the rival team at home. Despite being down early, the defense played well and forced turnovers that set up the offense for several touchdowns. The game was tight throughout, and the Rams pulled away in the fourth quarter to secure a win. After this victory, the team's confidence grew, and they started to play more aggressively.

The next few weeks were filled with intense rivalry games, and the Rams continued to play well. They managed to win a few games, but the height disadvantage continued to be a factor, and the team faced several tough losses. In the end, the Rams finished the season with a record of 7-7, failing to make the playoffs.

A contributor who never played

With the addition of several new players, the Rams were looking to improve in the upcoming season. However, a contributor who had never played before was included in the team's preparations.

The player, whose name will be withheld, had a unique skill set that the team believed could make a difference. Throughout the off-season, the player trained intensively, honing his skills and learning the team's playbook.

In the upcoming season, the player's integration into the team will be critically important. His ability to contribute on both offense and defense could be the deciding factor in the Rams' success. As the season progresses, the team will be watching his development closely, hoping to see the fruits of his hard work pay off.

The point system for determining the winner of the game was:

<table>
<thead>
<tr>
<th>Team</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rams</td>
<td>31</td>
</tr>
<tr>
<td>Rivals</td>
<td>28</td>
</tr>
</tbody>
</table>

The Rams emerged victorious, improving their record to 31-28.
Agatha’s real-life drama

By Donna Pratl

This month brought to light the untold story of Agatha. As the author of the popular mystery novels, she faced her own challenges during her career.

Movie

The movie begins with the discovery of a letter written by Agatha. The letter reveals the dark secrets of her past, including her struggle with addiction. The cast of the movie includes... (continued on page 11)

Decree dissects murder

By Debbie Marler

Brandon Scarpino’s docudrama explores the complexities of murder cases. The story follows a case where a young woman is accused of killing her husband. The evidence against her is overwhelming, but she maintains her innocence. The movie is a gripping investigation into the true nature of justice.

New BTO lacks overdrive

By Jim Smith

The new BTO model has been criticized for lacking the overdrive feature that was once a hallmark of the brand. Despite its new design, it fails to meet the expectations of music enthusiasts. The review states... (continued on page 12)
Denver on rocky road

by Jay Rosenthal

The Rocky Mountains loomed large in my vision as I gazed out over the front range of the Colorado Rockies. The jagged peaks and vast expanses of valleys and forests stretched before me, a breathtaking sight that I had been eagerly anticipating for months. I knew that this would be a challenging hike, but I was determined to make it happen.

The hike began early in the morning, with a steep ascent that required considerable effort and a steady pace. As I climbed higher, the air grew thinner, and the landscape became increasingly dramatic. The sound of the wind and the crunching of leaves underfoot added to the sense of being connected to nature.

The trail took me through a variety of ecosystems, from the alpine tundra to the aspen groves. At times, the path was narrow and treacherous, but the view was always stunning. I felt a sense of freedom and exhilaration as I2

Meet the Zaibach Bros.

by Karen Rice

The Zaibach Bros. are a band that has been making waves in the music scene for years. Their unique sound and powerful performances have earned them a dedicated following of fans.

The Zaibach Bros. are a dynamic duo made up of twin brothers, Adam and Ethan Zaibach. They began playing music together at a young age and have been honing their craft ever since.

Their music is a blend of genres, incorporating elements of rock, blues, and country. They are known for their powerful vocals and tight harmonies, which set them apart from other bands in the industry.

The Zaibach Bros. have released several albums, each one showcasing their growth and development as artists. Their latest album, "Riders on the Storm," was released last year and has received critical acclaim for its innovative approach to traditional songwriting.

If you're a fan of live music, you won't want to miss the Zaibach Bros. in concert. They perform at venues across the country, bringing their high-energy shows to audiences everywhere.

Kaplan and company score with Fast Break

Fast Break featuring Israel Kaplan, Mara Florence, and Ella Druck. Written by Janice Smith

by Dave Mollard

Fast Break is a fresh new band that has captured the attention of audiences nationwide. With a dynamic sound and energetic performances, they have quickly become a favorite among music lovers.

Kaplan, the lead vocalist, is a powerhouse singer with a raspy, soulful voice that is sure to leave audiences breathless. His powerful performances have earned him a devoted following of fans.

Florence and Druck add to the band's dynamic sound with their skillful guitar work and driving rhythm sections. Together, they create a seamless blend of genres that is both innovative and accessible.

Fast Break's latest album, "Breaking Ground," was released last month and has received critical acclaim for its polished production and strong songwriting. The band's next show is at the Ryman Auditorium on Saturday night, so don't miss your chance to see them live.
