Public Administration Program

What lies ahead for Reagan?

By Judah A. Myers

The United States can expect to see many national and international implications of the Reagan Administration. The Administration's policies of social, economic, and military action are expected to have profound impact on the nation.

When the U.S. entered the Administration, the United States was a economic superpower in the world. The United States was the leading economic power, and the United States was the leading political power of the world.

CURRENTS

Commentary

By Richard A. Bentley

"All the best pictures of the year" is a title that this year's Academy Awards nominated. However, there is no film that would have received such an award. Let's take a look at the history of the Academy Awards, which have been given since 1928. The award is given to the best film of the year, which is considered to be the best film in the United States.

Journal Editor speaks before SGA meeting

By Larry Buckley

In a rare move for Business, the Journal Editor appeared before the Student Government Association meeting. Although the Journal Editor's remarks were brief and to the point, the meeting was marked by a general unease among the student body.

Journal Editor's remarks weren't the only highlight of the meeting. The meeting also featured a heated debate over the school's budget, with many students expressing concern over the proposed cuts. The meeting ended with a vote to table the budget proposal until the next meeting.

Unique bookstores cater to many themes

by Fred Warnock

Frankly, there's only so much I'm looking forward to in the way of unique bookstores. Last Friday, my attention was caught by a sign advertising "Unique Bookstores Cater to Many Themes." I decided to check it out.

The store itself was quite a sight. It was filled with an array of books on a variety of topics. Some were about art, others about science, and a few about history. There were also several sections dedicated to fiction and non-fiction, but the most interesting part was the section dedicated to "Unique Themes.

I was immediately drawn to a book titled "The Modern Art of the 21st Century." It promised to provide a glimpse into the latest trends in art and design. I flipped through a few pages, and I was quite impressed. The book was visually stunning, and the writing was engaging.

I also came across a section on "Science Fiction and Fantasy." I was curious, so I picked up a copy of "The Ultimate Guide to the Future." I was not disappointed. The book was well-researched and written in a way that was easy to understand.

I continued to browse the store, and I came across a book on "Environmental Issues." I had been meaning to learn more about this topic, so I decided to purchase the book. I was happy with my decision, as the book was informative and well-written.

I spent several hours in the store, enjoying the unique atmosphere and the variety of books available. It was a pleasant experience, and I left the store with a few new books to read.

If you're looking for a bookstore that caters to unique themes, I would highly recommend this one. It's definitely worth a visit.

49 days to Christmas: 'tis the season to go broke

by Ivan Martino

I'm not sure who said it, but I'm fairly certain that the saying "Christmas is the season when you are broke" is one of the most accurate things anyone has ever said.

It's true, you know. You think about all the presents you have to buy, and then you think about all the gifts you want to buy for yourself. And then there's the food, and the travel, and the decorations, and the party planning. It's enough to make you want to go broke.

But don't worry, there are ways to avoid going broke this holiday season. Here are a few tips:

1. Start planning early. Don't wait until the last minute to start buying gifts. This will only lead to stress and overspending.
2. Make a budget. Set a limit for how much you want to spend on gifts, and stick to it. This will help you stay on track.
3. Look for sales. Retailers often offer sales and discounts during the holiday season. Take advantage of these to save money.
4. DIY. If you're short on cash, consider making your own gifts. This can be fun and budget-friendly.

I hope these tips help you avoid going broke this holiday season. Remember, it's not about spending a lot of money; it's about enjoying the season with family and friends.

Traditional weddings are "Punking Out"

by Linda Simmons

Hey, you didn't think I was going to let you get away with that, did you? "Punking Out" is not a wedding plan. It's a protest. A protest against the traditional wedding, that is.

The wedding industry has been skewering us with their" I do, therefore I must" attitude for far too long. It's time to put an end to this ridiculousness.

We, the punks, are going to show that we can have a wedding as well as any other guy. We're going to punk out. We're going to show that we can have a wedding as well as any other guy. We're going to punk out.

So, mark your calendars for the 1990s punk wedding. It's going to be a blast. Come on down to the punk wedding and see what we're all about.

MALONI: It’s a little bit like making a record...
Red Sox problems:
pitching's the answer

By Jon Wanner

The American League champs, who next month will need to go to the World Series, were struck by a pitching problem last week. The Red Sox have been good enough in the past, but they are starting to look like looking for another way to win.

Patriots on top,
but Houston's next

By John McHaffey

The New England Patriots have taken the top spot in the NFL this year. They have an excellent record, and it looks like they will be in the Super Bowl. Houston, on the other hand, is struggling. They have a lot of injuries, and they are not doing as well as they would like. It will be interesting to see who wins this season.

Cross Country team ties in first home meet ever

By Sue Kramer

The Suffolk Cross Country team tied with a rival team in their first home meet ever. The team is growing and improving every day. They are excited about the future.

The computer market

By John H. Taylor

For the past three years, the computer industry has been in a state of transition. The industry has moved from a consumer to a business focus, creating a need for more advanced software and hardware products.

In the past, computer users have been isolated in their needs and desires. However, the current market is much more diverse.

The future of the computer industry is uncertain, but one thing is certain: the demand for computer technology will continue to grow.

Engineering

The computer industry is in a state of flux. This is due to the rapid changes in technology and the need for high-quality engineers.

Many universities and companies are looking for high-quality engineers to fill the growing demand.

In the past, engineers were trained in a specific area of engineering. However, the current market requires engineers to be versatile and knowledgeable in multiple areas.

The computer market is growing at an unprecedented rate. This growth is driven by the demand for new and improved products.
