As for now

Reflecting upon the elections

By John MacLaren

Well, somehow I never expected it didn't have that much of an effect on me, I mean, it's not like I'm going to jump on the bandwagon. It was more of a surprise to me. I thought I was going to be able to handle it easily. But now I'm not so sure. The whole thing was just a big mess. I don't see how we can go on like this.

Vending machines should be closer

The vending machine along with the new vending machine at the Colonnade and the one at the University Center are being added. The new machine is being added next to the University Center. The old machine is being removed. The new machine is being added to the University Center.

Women rockers take control in Boston

Sarah Vincent-Smith

Women have been at the forefront of rock and roll since the 1970s, but it wasn't until recently that the genre began to see a resurgence of female artists taking control. The scene in Boston is a prime example of this trend.

"The 1980s were a time when women were finally being heard," said Sarah Vincent-Smith, a musician and promoter in the Boston area. "Women were no longer just background vocalists or backup dancers, they were the ones leading the charge." 

Vincent-Smith, who is also the founder of a local music venue, has been at the forefront of this movement. "It's not just about playing music," she said. "It's about having a platform to share our stories and experiences." 

The female artists in Boston are diverse in their styles, from punk to pop to alternative rock. "We have a lot of talent," said Vincent-Smith. "And we're not afraid to express ourselves through our music." 

The scene in Boston has been dubbed "The New Wave of Feminist Rock," and it's not just limited to the area. "This is a national trend," said Vincent-Smith. "Women all over the country are stepping up and taking control of the music scene." 

The success of these female artists is not just about their music, but about their presence in the industry. "It's about representation," said Vincent-Smith. "It's about breaking down barriers and making sure everyone has a voice." 

As more women continue to take control of the music industry, Vincent-Smith hopes to see even more diversity and inclusivity. "There's still a long way to go," she said. "But we're making progress." 

"The future of rock and roll is female," she concluded. "And we're here to stay."
