Some toys can kill children

by Jan Cunningham

Bright toys are not the ones many parents picture when they think of dangerous toys. But the Consumer Product Safety Commission says they are. The commission's report last year classified 12 toys as the most dangerous, including puzzle toys, ball and bean bags, and inflatable toys. The commission's report this year is expected to include new categories and a new tool to help parents identify potentially dangerous toys. The report is expected to be released in the next six months. The commission says it is important to educate parents about the dangers of dangerous toys and to help reduce the risk of injury. -EG
