1986 American League Preview
Bluejays to repeat: As to surprise

by Michael Maroney

The Blue Jays, who recently signed free agent catcher Gary Megugorac to a one-year deal, have given the fans in Toronto a reason to be excited about the upcoming season. With the addition of Megugorac, the Blue Jays have a solid lineup that should be able to compete with the other teams in the American League East.

The Blue Jays' success in recent years has been attributed to their strong pitching rotation. The team has several experienced pitchers, including Roy Halladay and David Price, who are expected to lead the team to another successful season.

However, the Blue Jays' success in the past has been weighed down by their inconsistencies. The team has struggled to maintain consistent play throughout the season, and there are questions about whether they will be able to correct these issues this year.

Despite these concerns, the Blue Jays remain a team to watch in the American League. With their experienced lineup and strong pitching, they are likely to be a force to be reckoned with once the season begins. The Blue Jays' fans will be hoping for another successful season and are excited about the possibilities it holds.

Suffolk announces newspaper competition winners

Several Suffolk students have been announced as winners of the Suffolk Student Newspaper's annual writing competition. The winners were announced on the front page of the newspaper on March 24th.

The first place winner was a senior English major named John Smith, who submitted an essay on the importance of diversity in literature. The second place winner was a junior history major named Jane Doe, who wrote an article on the history of the suffragette movement. The third place winner was a sophomore psychology major named Mary Brown, who submitted a poem on the impact of technology on relationships.

The Suffolk Student Newspaper's writing competition is open to all Suffolk students and is designed to encourage creative writing and promote excellence in journalism. The winners were chosen by a panel of judges who reviewed all of the entries submitted.

A career PLUS a free lunch

Suffolk students can now enjoy a free lunch while pursuing a career. Suffolk's College of Liberal Arts and Sciences has launched a new program called "The Career PLUS Program," which offers students the chance to gain valuable work experience while earning a degree.

The Career PLUS Program provides students with the opportunity to work in a field related to their major while still pursuing a degree. The program offers students the chance to gain real-world experience and build their resumes, while also earning a degree.

Suffolk students interested in the Career PLUS Program can learn more by contacting their academic advisors or visiting the Career Center. The program is open to all Suffolk students and is available to those pursuing any major.

SUFFOLK students tour Soviet Union

Suffolk University students were recently invited to tour the Soviet Union as part of a cultural exchange program. The students were given the opportunity to explore the country's rich history and culture, and they were able to experience the country's unique way of life.

The tour included visits to major cities such as Moscow and St. Petersburg, as well as smaller towns and rural areas. The students were able to meet with local residents and learn about their daily lives, as well as view the country's natural beauty.

The cultural exchange program is designed to promote understanding and cooperation between the United States and the Soviet Union. Suffolk University is one of several institutions participating in the program, and it aims to provide students with a unique educational opportunity.

Suffolk students were able to gain valuable insight into the Soviet Union's culture and society, and they were able to form lasting connections with their hosts. The program is a testament to the power of cultural exchange and its ability to bridge divides and promote peace.

The Pill: Pros and cons

by Linda Rechnitz

Two major groups are involved in this moral debate: those who believe in the right to choose and those who believe in the right of the mother and father to restrict use.

Two recent polls show a growing awareness of the pill as an option. According to a survey conducted by the National Opinion Research Center, 83 percent of those between the ages of 15 and 44 said they would choose the pill if they wanted to avoid pregnancy.

The pill is effective in preventing pregnancy, but it is not without risks. It can cause irregular bleeding, weight gain, and changes in mood. It can also interact with other medications. Women who take the pill should be aware of these potential side effects.

The pill is not recommended for women who have a history of blood clots or heart disease. It is also not recommended for women who are pregnant or breastfeeding.

The pill is available without a prescription, but women should talk to their healthcare provider before starting it.

Catholic Relief Services
1011 First Avenue
New York, NY 10022

or you can drop them off at the Campus Ministry.

Pettiness hampers election speeches

By Robert Stein

The American Cancer Society holds its annual Relay for Life on the main campus. The event is a fundraiser where teams raise money for cancer research and support services. It is a fun and hospitable event. Each team is assigned a table in the main dining hall and has the opportunity to invite other students to join them for dinner and games. The relay itself is a 24-hour race where teams take turns walking or running around a track. The winning team is the one that raises the most money.

The Relay for Life is an annual event that brings together students, faculty, and staff to support cancer research and support services. It is a great opportunity to raise money for a good cause and to have a fun time with friends. The event takes place on the main campus and is open to everyone.

The Relay for Life is a great opportunity to come together and support a good cause. It is a fun and hospitable event that brings people together. It is a great opportunity to raise money for cancer research and support services and to have a good time with friends.
