**Palestinian speaks on the Middle East**

by Rich Goralich

The political climate in the Middle East is one of the most complex and volatile in the world today. It is a situation that requires the constant and vigilant attention of the international community.

A visit to the Middle East in the early 1980s revealed the complexity of the situation. The conflict between Israel and the Palestinians is at the heart of the issue. The Palestinians have long sought an independent state, free from Israeli control. This goal is shared by many people around the world.

However, the situation is not simply a conflict between Israel and the Palestinians. It is also a conflict between the Arab world and Israel. The Arab nations have consistently supported the Palestinians in their struggle for independence. This support has been mixed with a desire for the destruction of Israel.

The United States has traditionally supported Israel. This has caused great frustration among the Palestinians. The Arab nations have also been critical of the United States for its support of Israel.

As a result of this complex situation, the United States has taken a leading role in efforts to resolve the conflict. The United States has sponsored numerous peace talks and has worked to broker agreements between Israel and the Palestinians.
