Since early in the ecology movement, the universities have been a major source of information and moral force in the struggle to preserve the earth for both the present and future generations.

For nearly 40 years we have demonstrated in every conceivable way the growing collection of books and materials on the subject which can be recycled. A long, complicated and costly battle to protect our environment, the universities have been a major source of information and moral force in the struggle to preserve the earth for both the present and future generations.

Here at Suffolk, with very little expense and effort, we can significantly reduce our contribution to this disastrous situation by taking the following simple steps right now.

1. **Recycle Paper**

   - Each faculty member and secretary and each student organization should keep a recycling bin in their office. If there is a recycling bin in your office, it should be filled daily. If there is no recycling bin in your office, please ask your building superintendent to provide one.

   - When you are finished using a paper product, such as a notebook, stapled paper, or a printed document, please place it in the recycling bin.

   - Do not throw away recyclable paper in the trash. This is a simple, effective way to reduce the amount of waste generated by the university.

2. **Separate Trash**

   - Each faculty member and secretary and each student organization should have a separate trash can for recyclable materials and a separate trash can for non-recyclable materials. This will make it easier to sort and recycle the materials.

   - Do not mix recyclable and non-recyclable materials in the same trash can. This will make it difficult to sort and recycle the materials.

3. **Reduce Waste**

   - Each faculty member and secretary and each student organization should take steps to reduce the amount of waste they generate. This can be done by:
     - Using reusable bags for shopping and carrying waste
     - Using reusable containers for food and beverages
     - Using reusable cups and utensils

   - Do not use disposable products. These products are not recyclable and contribute to the amount of waste generated by the university.

4. **Recycle with Others**

   - Encourage others to recycle with you. This can be done by:
     - Talking to your colleagues and students about the importance of recycling
     - Setting a good example by recycling yourself

   - Do not let anyone tell you that recycling is too difficult or too expensive. It is not. Recycling is a simple, effective way to reduce the amount of waste generated by the university.

There are many other ways in which you can improve your relationship to your environment. I encourage you to explore these options and to do all you can to reduce the amount of waste generated by the university.

Sincerely,

[Signature]

**Ecology one of these days**

contains a wealth of information which can be found in "The User's Environment," by Paul Swatek, a publication of the Field Station for Environmental Research at Suffolk University, most of which is paper which could be recycled.

I'm suggesting that the second half of this article there is a sort of mini-petition that you can sign and deposit in the box located in the main lobby.

Better yet, write your own note and drop it in. Get your student government to take a stand and become dedicated to changing your university from a polluter into a recycler. Perhaps we could initiate an effort to get all state governmental offices to recycle and to use recycled paper. How about applying pressure in your home town for municipal collection of recyclable materials.

I'm not sure what is done with our non-recyclable trash. But (now hear this all you capitalists) as the demand grows, so grows the industry and soon competition will increase sufficiently to lower prices (did I get that right?)

Now, in order for the above suggestions (or improvements thereof) to become realities, it must become apparent that a lot of people care. This university is fortunate to have as its president a man who is at the forefront in the battle to protect our environment. He has also indicated that he is very interested in knowing what his students are thinking.

Well, drop him a note. At the end of this article there is a sort of mini-petition that you can sign and deposit in the box located in the main lobby.

We have demonstrated in every conceivable way the growing collection of books and materials on the subject which can be recycled. A long, complicated and costly battle to protect our environment, the universities have been a major source of information and moral force in the struggle to preserve the earth for both the present and future generations.

Along the way with SGA

by Bob McKillop

Last year at this time, student representation at this University consisted of the Student Government Association, (SGA), elected by the students, and the Students Activities Association, (SAA), appointed by SGA. SAA's function was to take care of social events so that SGA could concentrate on the political aspects of student government. Apparently SGA didn't like this set up very well and after careful consideration last summer, the SGA abolished SAA because they felt the planning of social functions could be effectively accomplished within the body itself. They were right; SAA's function was accomplished within the body quite well. In fact they have done such a good job of being SAA they have almost totally forgiven all student politics, burying it under social programs. If you go to the Student Government and ask for copies of their minutes, you will find they are all waiting for mine, I finally dug them out.

Because the Association has to deal with them whether they want to or not and because most, if not all, of the clubs use their money for speakers of other social events, another interesting fact is that the total number of what could be considered 'political' motions put on the floor at SGA meetings stands at seven.

1) To amend the Constitution so that it prohibits members of clubs and fraternities (or sororities) to vote on motions concerning their organization.
2) To have David Cavalli (Pres. of the Freshman class) in his effort to abolish the gym requirements.
3) To publish the financial report of the University.
4) To initiate a faculty and course evaluation sheet and make it available to the students.
5) To elect a sophomore to fill a seat left by a resignation.
6) To support Paul Ezust in his effort to have the University recycle its waste paper and use recycled paper for stationery.
7) To establish a social committee (SAC) to run social functions.

The first motion was voided because of suspended privileges. The second is in the hands of the administration. The third seems to be somewhere in administrative limbo. The fourth has to be passed to come back to the next meeting with a majority vote. He brought the formal proposal back. After much debate and delay, the proposal was passed. At the time it looked as if our student representative would have to choose between the SAA or SGA. The proposal was passed and became a reality. The fourth has to be passed.

The seventh motion was brought to SGA by Dave Graziano (sophomore rep.) in the form of a proposal. He proposed that the Students Activities Committee (SAC), run social functions, be re-examined for efficiency purposes.

It seemed like a good idea and SGA approved the proposal, frivolously defeated the proposal, then turned around and voted to defeat the idea that SGA have given up on their own thing.

The second motion was passed. They told Graziano to resign. Despite the fact that he had been right all along, he was right.

The second has to be passed.

8) To discuss the potential for growth in important areas such as: academic credit by the University.
HOT LINE

Gary Stein gave the account of this semester I was amazed to find that if a student wished to take six courses during a semester, and take one of those courses at Emerson College under the cross-registration plan, he had to do it this way: $35.00 to go, we really don't know. What appears to have happened is that when the deal was made by the two schools to offer the cross-registration plan, they had taken just downright ousted by Emerson.

Dean Joseph Strain, who presently coordinates the program from his office at Suffolk, told us that the reason for the cross-registration plan is to keep the program in a manageable size. We do, however, know of two students who are reading this article and left it up to us.)

SHAFTED ON THE HILL

SHIFTED: Following the receipt of your inquiry, the writer is glad to have the opportunity once more to tell our researcher that the Emerson registrar’s office, Miss Mary Hefron, Suffolk Registrar’s office, was told that the Emerson registrar’s office to try the Suffolk Hot Line at 786-8110. Unfortunately, there were many girls to meet. And the majority of the people who went to the dance already knew each other so the purpose of the dance (to make new acquaintances) was not fulfilled.

When there were freshman class meetings, the attendance was very small. Letters publicizing the meetings were sent to every freshman. However, they were useless. Palmprints advertising the freshman dances were passed out at registration. Posters were hung all around the school. However, they were useless.

Dave Cavaleri, president of the freshman class, informed me that the small group of people at the dance were the same ones who went to the class meetings. I would never argue with anyone who said they are going to Suffolk to get an education. I’m sure that’s why everyone is here. But there is more to college than just sitting in classes and taking notes.

I’d like to see the end of people eating alone in the cafeteria. I’d like to see the end of people wandering around not knowing who’s who and why their fellow classmates are as friendly as the Arabs and Jews in the Middle East.

I’d like to see everyone break out of their shells, open up, and get to know who’s sitting next to you in class. In the cafeteria, etc. and know who’s who and why their fellow classmates are as friendly as the Arabs and Jews in the Middle East.

I’d like to see everyone break out of their shells, open up, and get to know who’s sitting next to you in class. In the cafeteria, etc. and know who’s who and why their fellow classmates are as friendly as the Arabs and Jews in the Middle East.

Well, freshness is a dirty word. Truth is it isn’t.

How’s that? You are afraid that the girls are going to bite you? Are you afraid that any guy is a "Jack the Ripper?" It’s obviously time to get off this subject. It’s time to go on to doing that anything they don’t want to do. But if this present condition continues, I, along with many others, want no part of it.

Well, freshness is a dirty word. Truth is it isn’t.

Baird shows first abortion film in America

by John McLeary

Birth control advocate Bill Baird delivered a strongly worded attack against "sexist, chauvinistic" women's liberation groups before showing the first abortion film seen in America last Thursday at Boston University's Hayden Hall. Baird was a center of controversy at Suffolk when the administration initially refused to let him speak in the auditorium in October 1969, then relented and permitted him to appear.

During his talk, Baird produced a book on birth control he found in the Suffolk library and pointed out that the book's availability could be considered illegal under the same laws that were found guilty of violating. Baird, whose whereabouts at Suffolk is known, is a permanent resident of Massachusetts as of September 7, 1972. Residence eligibility for these awards is fulfilled for the 1972-73 academic year that new scholarship applicants are notified of awards by Higher Education has announced already had one. Although this board (see above) tells of upcoming events it does not update scores and records as suggested in the editorial. A true A.D. board will consider the simple nature of these activities.

In a recent editorial, the Suffolk Journal said "the University should give the Athletic Department an award." At that point we did not realize that we could not speak because "I don't pass the sex test." This seems to be the common practice among women's liberation groups before speaking in public. There is a fear that a meeting of the Women's Liberation Groups before speaking will be a fiasco. That is why the committee of the United States Supreme Court, the National Abortion Action Coalition (Nationalong Women's Liberation) has filed a brief in support of his conviction for displaying birth control materials. Baird's lawyer, Dr. John Costello, said the Christmas layoff was a tremendous upset to the Suffolk-Suffolk game February 12. Tufts University is winning five out of their first six games the Rams are currently at a 9 loss record.

According to head coach Charlie Law, the team was hitting on the floor. He said the Christmas layoff hurt the team, for the players were unable to practice at all between December 17 and January 13. He said the first time they got together was at the Brandes gym on January 16.

Coach Law said the team was also hurt because of injuries to both Peter Crowley and Paul Parsons. He said the team problems stemmed from "a combination of things." He said that although the team has not been collecting victory as freely as it was in the early season, the Rams were fighting for a winning season. After winning five out of their first six games the Rams are currently at a 5 win, 9 loss record.

Leading the Suffolk scoring list is Tony Dascoll (averaging 15 p.p.g.), Peter Costello (averaging 10 p.p.g.), Kelloway at 32 p.p.g. and Fred Kelloway (averaging 14 p.p.g.). Kelloway is second in total points with 173. The team, as a whole, has been hitting about 43% of their shots from the free throw line and about 46 per cent from the floor.

The rebounding department Parsons leads with 203 (10.8 p.p.g.) and Crowley at 110 (10.0 p.p.g.). Currently on the team's roster are: Parsons, Noel, Crowley, Costello. Collins, Kelloway, Burns, Burke, Morris, Calante, Mederos, Dascoll, Barret and Bancos.

A good example of the determination this year's team has, is found on the Tufts story. In February 12. Tufts University is one of the top-scoring teams in the nation.

The Rams went into the game heavy underdogs. They also were without the services of Parsons. Parsons said he turned his ankle in practice and did not want to further irritate it. He said the Rams did not let the odds get them down, however, and finished out the season by only four points (34-30).

Games at 203. He is averaging 14.5 per game, second in the record in the last game of the season. Suffolk's other top scorers are: Tony Dascoll (averaging 15 p.p.g.), Peter Costello (averaging 10 p.p.g.), Fred Kelloway (averaging 14 p.p.g.). Kelloway is second in total points with 173. The team, as a whole, has been hitting about 43% of their shots from the free throw line and about 46 per cent from the floor.

The rebounding department Parsons leads with 203 (10.8 p.p.g.) and Crowley at 110 (10.0 p.p.g.). Currently on the team's roster are: Parsons, Noel, Crowley, Costello. Collins, Kelloway, Burns, Burke, Morris, Calante, Mederos, Dascoll, Barret and Bancos.

Scholarship News

The Massachusetts Board of Higher Education announced all eligible students must file their applications by April 1, 1972. Successful candidates will be notified of awards by July 1, 1972. Residence eligibility for these awards is available to students who are permanent residents of Massachusetts as of September 1, 1971 and must have full-time undergraduate work for the 1972-73 academic year.

General scholarships are provided for about 6,000 students in Massachusetts. These scholarships are paid in the amount of $700.00 to Suffolk University students and are renewable up to four years for undergraduate study. Applications for these scholarships are available in the Dean of Students' Office. Students who are currently receiving a Massachusetts State Scholarship shall not use these applications as they will be sent renewal forms directly by the Board of Higher Education.

Extra Points

2-15 mark they had come within three points of the game. At this point it looked like a tremendous upset was in the making. In the final minute, however, they turned cold and had to fight for the 66-58 win. Leading the Suffolk scoring list was 5 foot, 9 inch, Dascoll with 24 points. Burke had 11. Tufts top scorer was Young with 32 points. They had only one other player in double figures.

Much disappointment was expressed toward the officiating in this game. At one point Tufts had two technicals called against them in 20 seconds. Rams' statistician, Kevin Baracz, said it was the worst game he has ever seen.

The current record does not truly express the spirit of this year's team. They have not given up even when the odds were against them. With a little bit of luck and better breaks they could be, today, well into the win column.

Players who are currently being considered for a new position are Parsons, Kelloway, Collins, Costello, Calante and Mederos.

Rams slip to 7-9

by Ken Mason

Suffolk's basketball team is fighting for survival. Winning five out of their first six games the Rams are currently at a 5 win, 9 loss record. According to head coach Charlie Law, the team was hitting on the floor. He said the Christmas layoff hurt the team, for the players were unable to practice at all between December 17 and January 13. He said the first time they got together was at the Brandes gym on January 16.

Coach Law said the team was also hurt because of injuries to both Peter Crowley and Paul Parsons. He said the team problems stemmed from "a combination of things." He said that although the team has not been collecting victory as freely as it was in the early season, the Rams were fighting for a winning season. After winning five out of their first six games the Rams are currently at a 5 win, 9 loss record.

Leading the Suffolk scoring list is Tony Dascoll (averaging 15 p.p.g.), Peter Costello (averaging 10 p.p.g.), Kelloway at 32 p.p.g. and Fred Kelloway (averaging 14 p.p.g.). Kelloway is second in total points with 173. The team, as a whole, has been hitting about 43% of their shots from the free throw line and about 46 per cent from the floor.

The rebounding department Parsons leads with 203 (10.8 p.p.g.) and Crowley at 110 (10.0 p.p.g.). Currently on the team's roster are: Parsons, Noel, Crowley, Costello. Collins, Kelloway, Burns, Burke, Morris, Calante, Mederos, Dascoll, Barret and Bancos.
